Nearly Four Thousand Illustrations

EDITED BY

PROF. CHARLES SMITH MORRIS, A.M., LL.D.

Of the Philadelphia Academy of the Natural Sciences

With the Assistance of the Following

ASSOCIATE EDITORS AND SPECIAL CONTRIBUTORS:

PROF. FREDERIC A. LUCAS, M.D., Ph. D.

Curator Department of Comparative Anatomy, U. S. National Museum, Washington, D. C.

PROF. MARCUS BENJAMIN, A.M., Ph D., F.C.S.

Of the Smithsonian Institute, Washington, D. C.

PROF. AMOS EMERSON DOLBEAR, A.M., Ph.D.

Professor of Physics, Tuft's College, Mass.

PROF. LEWIS SWIFT, Ph.D., F.R.A.S.

Director of Echo Mountain Observatory, California.

PROF. J. MARK BALDWIN, A.M., Ph.D.

Professor of Experimental Psychology, Princeton University.

PROF. SIMON NEWCOMB, LL.D., M.N.A.S.

Director U. S. Naval Observatory, Georgetown, D. C.

REV. JOHN F. HURST, D.D., LL.D.

Bishop of the M. E. Church and Chancellor of the American University, Washington, D. C.

MANSFIELD MERRIMAN, C.E., Ph.D.

Professor of Civil Engineering, Lehigh University.

CHARLES S. DOLLEY, A.M., M.D.

Late Professor of Biology, University of Pennsylvania.

REV. GEORGE T. PURVES, D.D., LL.D.

Professor of New Testament Literature and Exegesis, Princeton Theological Seminary.

PROF. DANIEL G. BRINTON, A.M., M.D.

Of the University of Pennsylvania, and President of the American Association for the Advancement of Science.

And more than Two Hundred Specialists in the Various Departments

Sal (*Bot.*) The common name of the order *Eleagnaceae*, consisting of large trees, with gray, silky foliage, and the only European species is *H. rhamnifolia*, a low tree, native of the W. Europe.

Sal'inst. *CRISPUS*, a Roman historian, distinguished equally for his talents and profligacy, was b. at Amiternum, B. C. 86. He was expunged from the list of senators, in consequence of his extravagance and shameless debaucheries; but being restored by Julius Cæsar, and made governor of Numidia, he there amassed an enormous fortune by acts of rapine. He died B. C. 35. His *Histories of the Jugurthine War*, and the *Conspiracy of Catiline*, bear ample testimony to his genius; but the rigid morality displayed in his writings forms a strange contrast to the vices of his life.

Sally, *n.* [Fr. *saillie*, from Lat. *salio*.] A leaping or springing forth. — Specifically, a sudden issue or rushing out of troops from a beleaguered place to attack the besiegers; a sortie; as, the garrison made a successful *sally*. — Excursion from the ordinary track; range; deviation; digression; as, to make *sallies* into a country district. — A spring or darting of intellect, fancy, or imagination; flight of liveliness or humor; sprightly exertion of the faculties; as, *sallies* of wit. — Act of levity or extravagance; unseemly display of vivacity; an act of wild frolic or obstreperous gaiety; an escapade; an overleaping of the bounds of propriety; as, *sallies* of hot-blooded youth.

v. n. (*imp.* and *pp.* *SALLIED*.) [Fr. *saillir*.] To leap, spring, bound, or rush out or forth; to issue suddenly, as a body of troops from a fortified place to attack besiegers; to make a sudden irruption or sortie.

Sally-lump, *n.* [Called after the inventor.] In England, a sort of sweet tea-cake, toasted and well-buttered before eaten.

Sally-port, *n.* (*Fortif.*) An opening cut in the glacis of a fortified work, through which a passage leads by a ramp from the terreplein of the covered way to the exterior.

(*Naval*.) A landing-place in a harbor at which the boats of men-of-war (but no other boats) are allowed to land. It is also the name for an opening in the quarter of a fire-ship by which the crew escape after setting her on fire.

Salmagundi, *n.* [Fr. *salmigondis*, from Lat. *salmaga*, pickles.] (*Cookery*.) A mixture of chopped meat and pickled herrings, seasoned with oil, vinegar, pepper, and onions. (*Johnson*.) — Hence, a hodge-podge of various ingredients; an olio; a medley; an olla podrida; a miscellany; a pot-pourri; — used in a literary sense; as, Washington Irving's *Salmagundi*.

Salmi, (*sāl'mē*), *n.* [Fr.] (*Cookery*.) A ragout of roasted game stewed with wine, forcemeat, and spices, as a provocative of the appetite; as, a *salmi* of pheasants.

Salm'o, *n.* [Lat., from *salio*, to leap or spring,] the species being remarkable for its power of leaping.] (*Zoöl.*) The principal genus of the *Salmonideæ*. The Salmon, *S. salar* of the Arctic seas, whence it visits the rivers of both continents, is one of the largest of the genus, and is celebrated for its delicious flesh. It is from 24 to 36 inches long, and attains a weight of 30 pounds or more. In N. America it frequents the rivers of Labrador, Canada, Nova Scotia, New England, and those of N. York communicating with the St. Lawrence, ascending even to Lake Ontario. The *S.*-fishing in the Gulf of St. Lawrence is estimated as worth \$500,000 a year, and by steamers the fish are delivered in Boston, N. York, and Philadelphia in the best condition. The Great Tront of the lakes, *S. amethystus*, of the Northern lakes of North America, is from 24 to 60 inches long, dark-gray, with numerous lighter spots on the back and sides; under parts light ash-gray or cream-color. It sometimes attains

Fig. 2299. — SALMON, (*Salmo salar*.) the weight of 120 pounds, and is often called Mackinaw Trout. It is also known as the Longe. The Speckled Tront, or Brook Trout, *S. fontinalis* (Mitch.), of the clear streams of Northern North America, is from 6 to 20 inches long, horn-color above with irregular darker marking, sides bluish mixed with silvery white, and ornamented with yellow spots and vermillion dots. There are many varieties of trout, and probably some of the so-called varieties are distinct species. All are highly prized on account of the delicacy of their flesh.

Salmon, (*sām'un*), *n.* (*Zoöl.*) See SALMO.

Salmonidae, *n. pl.* (*Zoöl.*) The Salmon family comprising abdominal malacopterygious fishes, which have the body more or less scaly, a first dorsal with soft rays, followed by a second small one, which is fatty, and unsupported by rays. They inhabit both salt and fresh water, are very voracious, and highly prized for food. See SALMO.

Salmon Creek, in New York, enters Cayuga Lake at Ludlowville, Cayuga co. — Another, enters Braddock's Bay of Lake Ontario, from Monroe co. — A village of Wayne co., abt. 30 m. E. by N. of Rochester.

Salmon Falls River, rises in Carroll co., New Hampshire, and flowing a general S.E. course along the boundary between that State and Maine, joins the Cocheco River to form the Piscataqua River.

Salmon-on-peel, *n.* A young salmon; a samlet.

Salmon-pipe, *n.* A contrivance for catching salmon.

Salmon River, in Connecticut, enters the Connecticut River in Middlesex co.

Salmon River, in New York, rises in Franklin co.,

and enters the St. Lawrence River abt. 10 m. N.E. of St. Regis.

Sal'o, a town of Italy, prov. of Brescia, 14 m. from Brescia. *Manuf.* Linen, yarn, and thread. *Pop.* 6,000.

Sal'ogen, *n.* (*Chem.*) The electro-negative component of haloid salts; salt-radical.

Salo'me, (*Script.*) the mother of James the Elder and John the Evangelist, one of those holy women of Galilee who attended our Saviour in his journeys and ministered to him; *Matt.* xxvii. 56. Some infer, from comparing *Matt.* and *John* xix. 25, that she was a sister of Mary the mother of Jesus.

Salon, (*sah-lōng'*), *n.* [Fr., *saloon*.] A state apartment; a room for the reception of visitors; — hence, plurally, assemblies of the fashionable world; circles of select society, the elite, &c.; as, her *salons* were crowded with notabilities.

Salon, (*sal'awng*), a town of France, dept. of Bouches-du-Rhône, 29 m. N.N.W. of Marseilles. *Manuf.* Silk plush, hats, and soap. *Pop.* 6,600.

Salona, a town of European Turkey, at the foot of Mount Parnassus. It contains many interesting ruins. *Pop.* 6,000.

Salona, in Pennsylvania, a post-village of Clinton co., abt. 104 m. N.W. of Harrisburg.

Salonica, (*sa-lon-ek'a*), a city and seaport of European Turkey, in Rumania, on the Bay of Salonica, 155 m. N.W. of Athens; Lat. 40° 30' 47" N., Lon. 22° 57' 13" E. It is built on the acclivity of a steep hill, and is 5 m. in circumference. It is commanded by a large citadel called the "Seven Towers," and contains numerous public buildings and anc. remains. *Manuf.* Silk; besides, a large trade in maize, wheat, barley, tobacco, wool, sponges, timber, wine, &c. *Pop.* 70,000.

— The GULF of SALONICA, is 70 m. long, and 30 m. broad at its entrance.

Saloon, *n.* [Fr. *salon*; It. *salone*, augmentative of *sala*, a hall.] (*Arch.*) A large state apartment; a spacious and lofty hall; — specifically, a spacious and elegant apartment for the reception of company, or the exhibition of works of art; also, a large public room or parlor; also, again, a refreshment room in a theatre.

— A concert or dancing room where liquors are sold; — hence, in American parlance, a public house; a tavern.

(*Navl.*) The main cabin of a steamer or passenger-ship.

Sal'op, or **Shropshire**, an inland co. of England, having N. the co. of Denbigh, and a portion of Flint and Cheshire, E. Stafford, S. Worcester, Hereford, and Radnor, and W. Montgomery; *area*, 1,300 sq. m. The surface is generally diversified, but mountainous in the S., and the soil fertile. *Rivers*, Severn, Teme, Shelbrook, Elf Brook, Weaver, Clnn, Orme, and Cowe. *Prod.* The usual cerealia, with hemp, flax, hops, &c. Numerous cattle and sheep are also raised. *Min.* Iron, coal, lead, salt, limestone, sandstone, &c. *Manuf.* Flannels, woolen, cotton, and linen goods, gloves, buttons, hardware, paper, porcelain, china, tobacco-pipes, iron-ware, tar, &c. *Cap.* Shrewsbury.

Sal'safy, *Sal'sify*, *n.* (*Bot.*) See TRAGOPOGON.

Salsamenta'rons, *a.* [From Lat. *salsamentum*, brine.] Salted; pertaining to, consisting of, or partaking of the quality of, salt.

Sals'es, *n. pl.* Mud-eruptions, being vents of vapor and heat, where there is no true volcano.

Sal'sette, an island on the W. coast of Hindostan, prov. of Aurungabad, N. of Bombay Island, with which it is connected by a narrow causeway. *Ext.* 18 m. long, with an average breadth of 13 m. *Pop.* 60,000.

Salsify, *n.* (*Bot.*) See TRAGOPOGON.

Salsilla, *n.* (*Bot.*) A twining, tuberculous-rooted plant, also called Oyster-plant, *Alstræmeria salsilla*, ord. *Amargyllidaceæ*, cultivated in the W. Indies for its roots, which are used as the tubers of the potato.

Sal'so-acid, (*-as'id*), *a.* Possessing a combined taste or flavor of salt and acid.

Sal-so'da, *n.* The commercial term for impure carbonate of soda.

Sal'sola, *n.* [Lat. *sal*, salt, and *salus*, alone, from its saline qualities.] (*Bot.*) A genus of plants, order *Chenopodiaceæ*. The species inhabit salt-marshes and contain much soda. See BARILLA.

Salsolaceous, (*-lā'shus*), *a.* (*Bot.*) Pertaining, or having reference, to the family *Salsola*.

Salsuginons, (*-sū'jī-nus*), *a.* [Fr. *salsugineux*, from Lat. *salsugo*, saltiness.] Saltish; somewhat salt; salty. (*R.*)

Salt, *n.* [*A. S.* *salt*, *salt*; Ger. *salz*; Fr. *sal*.] A substance used for seasoning, being the chloride of sodium, and generally known as *common salt*. It is obtained by evaporation from the waters of the sea, or saline lakes or springs, and from the earth in a crystallized state, or in the form of *rock-salt*, *q. v.*

— Hence, savor; taste; relish; vapor; smack; seasoning; as, "we have some *salt* of our youth in us." — *Shaks.*

— Hence, also, pungency; piquancy; wit; epigrammatic point; poignancy; as, *Attic salt*. — A vessel to hold salt at table; a salt-cellar; as, a set of silver *salts*. — A veteran sailor; a weather-beaten tar; as, an old *salt*.

(*Chem.*) A salt may be defined as a compound containing either a metallic oxide or alkaloid in combination with an acid or a metal, or pseudo-metallic grouping in combination with a halogen. The advocates of Gerhardt's theory reverse his well-known definition of an acid, — namely, "a salt whose basis is hydrogen," — and describe a salt as any metallic compound that is obtainable from an acid by the substitution of a metal or pseudo-metallic grouping for hydrogen. When first Lavoisier proposed his admirable scheme of chemistry, it was supposed that an acid could not exist without containing oxygen. As the science advanced, Sir Humphry Davy discovered the true composition of hydrochloric acid, and found that there were acids whose

acidifying principle was hydrogen, which, when entering into combination with metallic oxides, gave up their hydrogen to the oxygen to form water. Taking the union of hydrochloric acid and soda as an example, it was found that the chlorine united directly with the sodium, the water formed at the time being readily driven off by heat. To meet this difficulty, salts were divided into two classes, — *oxy-salts*, formed by the union of a base and an acid, and *haloid salts*, formed by the union of a metallic and a halogen. Sir Humphry Davy advanced a theory, however, which is now almost universally received as the correct one. He assumed that when acids were rendered anhydrous they lost their acid properties, an assumption provable by direct experiment. Sulphuric acid he looked on not as SO_3 , the anhydrous acid, but as H_2OSO_3 , or rather H_2SO_4 . This at once brought the two classes of salts into harmony, the grouping SO_4 being equivalent to the halogen in HCl , HI , HBr , &c. A few examples of salts and acids will render this more intelligible:

Hydrochloric acid,	HCl	Potash salt,	KCl
Hydrochloric acid,	HBr	"	KBr
Sulphuric acid,	H_2SO_4	"	K_2SO_4
Nitric acid,	HNO_3	"	KNO_3
Sulphurous acid,	H_2SO_3	"	K_2SO_3

This theory is accepted in its entirety by the advocates of the new school. Salts being looked on as the union of an acid radicle with a metal, the name in a few cases has been necessarily altered. Thus we now constantly meet with carbonate of *potassium*, nitrate of *sodium*, sulphate of *ammonium*, &c., in chemical publications. Salts are generally divided into three classes: — *Basic salts*, in which the amount of base predominates over the acid; *neutral salts*, when these are united equivalent for equivalent in protosalts, or one of base to three of acid in sesquisalts; and *acid salts*, where the acid is in excess. These terms must be taken in their chemical sense, and not as meaning the effect that certain salts have on litmus or turmeric paper. Thus, carbonate of potash, which is chemically a neutral salt, reddens turmeric paper, and sulphate of alumina, also neutral, reddens litmus. Numerous examples of each of these classes will be found throughout this work. *Double salts* are those whose acid apparently combines with two bases to form a crystalline compound, but the real union appears to take place between the two salts; thus, we have the double chloride of platinum and potassium, KClPtCl_2 ; the double sulphate of potash and alumina, or ordinary alum, $\text{K}_2\text{SO}_4\text{Al}_2\text{SO}_4$; the double sulphate of potash and magnesia, $\text{K}_2\text{SO}_4\text{MgSO}_4$.

— *pl.* An Eng. provincialism for marshes flooded by the tide.

Above the salt, on the dais, or at the upper end of the table; hence, in a position of honor; — derived from the ancient custom in the banqueting-halls of people of rank, of placing a large salt-cellar in the centre of a long table, the places above which were assigned to guests of distinction; while the places below were reserved for retainers, inferior guests, &c.

Below the salt, at the lower end of the table; — hence, in an inferior or mean position.

— *a.* (*comp.* *SALTER*; *superl.* *SALTEST*.) Having the taste of salt; impregnated with salt; abounding with salt, or yielding it; prepared with, or tasting of, salt; as, *salt water*, *salt provisions*. — Overflowed with salt water; as, a *salt marsh*. — Growing on salt marshes or meadows, and hence, having the flavor of salt; as, *salt grass*. — Poignant; bitter; sharp; acid; as, "a *salt rheum*." (*Shaks.*) — Salacious; lecherous; libidinous; as, a *salt* jest, a *salt* story, a *salt* imagination.

— *v. a.* To sprinkle, impregnate, or season with salt; as, to *salt* meat or fish. — To stuff with salt between the timber and planks, for the preservation of the wood; as, to *salt* a ship.

— *v. n.* To throw off salt, as a saline solution; as, the brine *salts* but slowly.

Sal'ta, a city of the Argentine Republic, cap. of prov. of same name, abt. 180 m. N. of Tucuman; Lat. 24° 15' S., Lon. 64° 50' W. It is well built, and contains some handsome religious and other edifices. *Pop.* 10,000.

Sal'tant, *a.* [Lat. *saltans*, from *salire*, to leap.] Leaping; dancing; skipping; jumping.

(*Her.*) In a leaping attitude; bounding forward; as, a squirrel *saltant*.

Saltarel'lo, *n.* [It.] (*Mus.*) A dance among the Neapolitans.

Salt'ate, *v. a.* To leap; to dance; to bound. (*R.*)

Saltation, (*-lā'shun*), *n.* [Fr., from Lat. *sallatio*, from *sallare*, to dance.] Act of dancing, leaping, or jumping; as, to practise *saltations*. — Beating; throbbing; palpitation; as, the *sallation* of the great artery.

Saltato'rial, *a.* Belonging, or having reference, to leaping; as, *saltatorial* exercises or exploits. — Possessing the power of leaping; as, *saltatorial* animals.

Saltatory, *a.* Leaping or dancing, or having the power of leaping or dancing; employed in leaping or dancing; as, *saltatory* motions, *saltatory* performances.

Salt'-cake, *n.* Sulphate of soda, in its prepared form, for the use of glass-blowers and soap-manufacturers.

Salt'-cat, *n.* A lump of salt used as a lure for pigeons.

Salt'-cellar, *n.* A small vessel used at table for holding salt; a salt.

Saltcoats, (*solt'kotes*), a seaport-town of Scotland, co. of Ayr, 24 m. S.W. of Glasgow. It is a great resort for sea-bathing. *Pop.* 4,800.

Salt Creek, in Illinois, enters the Sangamon River, between Menard and Mason cos.

Salt Creek, in Indiana, enters the East Fork of White River from Lawrence county. — A township of Decatur county. — A township of Franklin county. — A township of Jackson county. — A township of Monroe county.

Salt Creek, in *Iowa*, enters the Iowa River from Tama co.—A village and township of Davis co., abt. 75 m. S.W. by S. of Iowa City.

Salt Creek, in *Michigan*, enters Maple River from Gratiot co.

Salt Creek, in *Ohio*, enters the Sciota River from Ross co.—Another enters the Muskingum River from Muskingum co.—A township of Hocking co.—A post-township of Holmes co.—A township of Muskingum co.—A township of Pickaway co.—A township of Wayne co.

Salt Creek, in *Texas*, a p. o. of Montague county.—In *Virginia*, a p. o. of Amherst county.

Salt'er, *n.* One who salts, or applies salt; as, a *salter* of provisions.—One who sells salt; a dealer in salt; a dry-salter; also, a maker of salt.

Salt'ern, *n.* A place where salt is manufactured; a salt-work.

Salt'-fish, *n.* A fish preserved or cured with salt.—A fish taken in salt water;—in contradistinction from *fresh-water fish*.

Salt'-foot, *n.* A large salt-cellar, formerly used at the tables of persons of rank to mark the line of demarcation between the superior and inferior guests. See **SALT**.

Salt Fork, in *Missouri*, an affluent of the Black River, which it joins in Saline co.

Salt'-guage, (-gāj), *n.* An instrument used to guage or test the strength of brine or salt-water.

Salt-green, *n.* Sea-green.

Saltier, **Saltire**, (*sāl'teer*), *n.* (*Her.*) A bearing in form of a St. Andrew's cross, formed by two bends—dexter and sinister—crossing each other.

Saltier-wise, **Saltire-wise**, *a.* (*Her.*) In the form of a saltier;—thus, charges having length (as swords, bâtons, &c.) placed in the direction of the saltire, are said to be borne *saltier-wise*.

Salt'igrade, *a.* [*Fr.*; from *Lat. saltus*, a leap, and *gradus*, to go.] (*Zool.*) Having feet or legs adapted to leaping, as certain animals.

—*n.* (*Zool.*) One of a tribe of spiders which seize their prey by leaping upon it from a distance.

Salt'illo, a town of Mexico, on the Tigre River, abt. 110 m. S. of Coahuila; pop. 7,000. See **BUENA VISTA**.

Salt'illo, in *Indiana*, a village of Jasper co., abt. 10 m. N.E. of Rensselaer.

Salt'illo, in *Tennessee*, a post-village of Hardin co., abt. 12 m. N. of Savannah.

Salt'illoville, or **SALTILLO**, in *Indiana*, a post-village of Washington co., abt. 47 m. N.W. of New Albany.

Salt'ing, *n.* Act of sprinkling, impregnating, or seasoning with salt.

—A salt-marsh.

Salt'ish, *a.* Somewhat salt; seasoned or impregnated with a moderate quantity of salt.

Salt'ishly, *adv.* With a moderate degree of saltiness.

Salt'ishness, *n.* A moderate degree of saltiness.

Salt'-juuk, *n.* Hard salt beef for use at sea.

Salt Key, a sandy and rocky bank, abt. 90 m. S. by E. of Florida, between Cuba and the Grand Bahama Bank. Length, abt. 62 m.; greatest breadth 36 m. Its W. border consists of a chain of barren rocks called *Double-Headed Shot Key*, of which the extreme N.W. one has a lighthouse, exhibiting a fixed light 100 feet above the sea; Lat. 23° 26' 24" N., Lon. 80° 27' 35" W.

Salt Lake, in *Utah*. See **GREAT SALT LAKE**.—A N. co.; area, about 784 sq. m. River, Jordan river. Surface, diversified, and in some parts mountainous; soil, generally very fertile, producing wheat, corn, oats, potatoes, and hay in abundance. Cap. Salt Lake City. Pop. (1895) 68,182.—A city, cap. of Salt Lake co., and seat of the State government, on the Jordan river, about 22 m. S.E. of Great Salt Lake. The city is regularly laid out, and contains some handsome edifices, among which is a magnificent temple which was 40 years in building. S. L. City was founded July 24, 1847, by Brigham Young and his company of Mormons, numbering 143. Pop. (1895) 66,400.

Salt'less, *a.* Lacking salt;—hence, pointless; insipid; as, a *saltless* joke.

Salt'-lick, *n.* A saline spring, resorted to by buffaloes, deer, &c. See **LICK**.

Salt Lick, in *Pennsylvania*, a township of Fayette co.

Salt Lick, in *Ohio*, a township of Perry county.—*n.* See **LICK**.

Salt'ly, *adv.* With a smack of salt; in a salt manner.

Salt'-marsh, *n.* Meadow or grass-land subject to the overflow of the tides.

Salt'-mine, *n.* A mine where rock-salt is obtained.

Salt'ness, *n.* Quality of being salt or impregnated with salt; as, the *saltiness* of brine.—Taste or flavor of salt; hence, raciness; as, the *saltiness* of dried cod, the *saltiness* of an anecdote, &c.

Salt'-pan, **Salt'-pit**, *n.* A pan, basin, or pit where salt is obtained or made.

Saltpetre, (-pē'tr), *n.* [From *sall*, and *Gr. petra*, a rock, a stone.] (*Chem.*) See **POTASH (NITRATE OF)**.

Saltpe'trous, *a.* Pertaining, or relating, to saltpetre; impregnated with, or partaking of the qualities of, saltpetre.

Salt'-raker, *n.* A collector of salt in natural salt ponds, or inclosures from the sea.

Salt'-rhenm, (-rōm), *n.* (*Med.*) A name somewhat indefinitely applied in the U. S. to various cutaneous affections of the eruptive and herpetic forms.

Salt River, *n.* An imaginary river up which defeated politicians, &c., are supposed to be sent to oblivion. The phrase *To run up Salt River* has its origin in the fact that there is a small stream of that name in Kentucky, the passage of which is made difficult and laborious as well by its tortuous course as by the abundance of shallows and bars. The real application of the phrase is to

the unhappy wight who has the task of propelling the boat up the stream; but in political or slang usage it is to those who are *rowed up*.

Salt River, in *Kentucky*, rises in Shelby co., and flowing S.W., W., and N.W., enters the Ohio River between Hardin and Jefferson cos.

Salt River, in *Missouri*, is formed in Monroe co., by the union of several branches, and flowing an irregular E.S.E. course, enters into the Mississippi River from Pike co.—A village of Audrain co., abt. 40 m. N. of Jefferson City.—A township of Knox co.

—A township of Randolph co.

Salt Rock, in *Ohio*, a township of Marion county.

Salt Spring, in *Missouri*, a township of Randolph co.

Salt Sulphur Springs, in *W. Virginia*, a post-village of Monroe co., abt. 230 m. W. of Richmond, Va.

Salt'ville, in *Virginia*, a post-village of Smyth co., about 20 m. N.E. of Abingdon.

Salt'-water, *n.* Sea-water; water impregnated with salt in solution.

Salt'y, *a.* Saltish; moderately salt.

Salt'burg, or **Salts'burg**, in *Pennsylvania*, a post-borough of Indiana co., 32 m. E. of Pittsburg.

Salu'bria, in *New York*, a village of Chemung co., abt. 20 m. N. of Elmira.

Salu'brious, *a.* [*Lat. saluber, salubris*, from *salus*, a sound condition.] Favorable to health; promoting health; wholesome; salutary; healthful; as, a *salubrious* climate.

Salu'briously, *adv.* In a salubrious manner; so as to promote health.

Salu'briousness, **Salu'brity**, *n.* [*Fr. salubrité*; *Lat. salubritas*.] Quality of being salubrious; wholesomeness; healthfulness; favorableuess to the preservation of health; as, the *salubrity* of country air.

Salu'da, in *Indiana*, a post-township of Jefferson county.

Saluda, in *S. Carolina*, a river rising among the Blue Ridge Mountains, between Pickens and Greenville dists., and flowing a general S.S.E. course, joins Broad River at Columbia; length, abt. 200 m.—A village of Newberry dist., abt. 55 m. W. by N. of Columbia.

Salu'ria, in *Texas*, a village and port of entry of Calhoun co., on Matagorda Island, abt. 125 m. S.W. of Galveston.

Sal'utarily, *adv.* In a salutary manner.

Sal'utariness, *n.* Wholesomeness; quality of being salutary.—Quality of conducing to good or prosperity; as, *salutariness* of counsel.

Salu'tary, *a.* [*Fr. salutaire*; *Lat. salutaris*, from *salus*, a whole condition.] Healthful; wholesome; salubrious; promoting health; as, to take a *salutary* walk.

—Promotive of public good or safety; contributing to some beneficial purpose; useful; advantageous; profitable; as, to adopt *salutary* measures, to set a *salutary* example.

Salutation, *n.* [*Lat. salutio*, from *salus*, safety.] The act or ceremony of saluting or paying respect or reverence to any one. Among the Romans, *salutio* was the daily homage paid by clients and dependents to their superiors. The women, too, had their crowds of saluters attending them every morning. In the reception of those who came to pay their respects, the better sort were honored with a kiss, while the poorer had a small

entertainment set before them, and were even feasted by those who wished to be thought very liberal. It is not a little interesting to observe the different modes of salutation that prevail in different countries. In most civilized countries, bowing, uncovering the head, pressing the hand, embracing, and kissing, are the usual modes in which good-will, esteem, and love, are expressed; but, not unfrequently what is regarded as an act of civility in one country, would be out of place, or even considered as rude, in another. In some parts of Germany, it is considered an act of politeness to kiss the hands of ladies; in Italy, this is a familiarity only permitted to nearest relatives. In the East, the salutations are generally of a very slavish character; as the throwing oneself on the ground before persons of distinction, and repeatedly kissing their feet. In Sumatra, the saluting person bows, begs the left foot of him whom he addresses, kneels on the ground, and applies this foot to the crown of his head, forehead, breast, and knee; finally, he touches the ground with his head, and remains for some moments stretched out on his belly. In the Pellew Islands, a person seizes the hand or foot of

Fig. 2300.—ORIENTAL SALUTATIONS.

him whom he wishes to salute, and rubs his face with it. In the Philippines, they bend their body very low, place their hands upon their cheeks, raise one leg, and bend the knee. In Siam, the inferior throws himself on the ground before his superior. In Japan, the inferior takes off his sandals, puts his hands into the opposite sleeves, bends slowly till they reach his knees, and thus with short and measured steps, and with a rocking motion, passes his superior, crying, "Do not hurt me." In China, the forms of salutation are various. The Turk crosses his hands, places them upon his breast, and bows; the Laplanders rub noses; the Franks are said to have pulled out a hair, and presented it to the person saluted; an Ethiopian takes the robes of another and ties it about his own waist, leaving his friend half naked. In some parts, they show their humility by presenting themselves naked before the person whom they salute; in others, they scratch the hand slightly, and reciprocally suck a drop of blood from the wound, or, as a peculiar mark of esteem, they open a vein and present a goblet of blood as a beverage for their friend.

Salutato'rian, *n.* In the U. States, the student of a college who pronounces the salutatory oration at the annual Commencement, or like exercises.

Saluta'torily, *adv.* After the manner of salutation.

Saluta'tory, *a.* Containing, implying, or expressing salutation; speaking a welcome; conveying a greeting;—applied particularly to the oration introductory of the exercises of the Commencements, &c., in American colleges.

—*n.* In American colleges, the salutatory oration.

Salute, *v. a.* [*It. salutare*; *Lat. saluto*, from *salus*.] To greet; to hail; to address or accost with friendly gratulations or expressions of kind wishes.—To greet with a kiss; to greet with a wave of the hand or nod of the head; as, to *salute* a lady's lips, to *salute* a stranger.

(*Mil.* and *Nav.*) To greet or show honor to by a discharge of cannon or small arms, by striking colors, rolling drums, presenting arms, &c.; as, the President *was saluted* by the troops.

—*n.* Act of saluting, or of expressing respect, gratulation, or kind wishes; greeting; salutation; as, friendly *salutes* were exchanged between them.—A kiss; a lip-greeting expressing more than mere courtesy.

"No cold salute is in yon lovers' kiss."—*Earl of Roscommon*.

—In the military and naval services, a mark of respect performed in different ways, according to circumstances. Naval salutes are fired from ships, the number of guns engaged in which denotes the rank of the personage saluted. A foreigner's salute is returned gun for gun. Troops under arms salute with their rifles or swords; staff-officers not drawing their swords salute with the hand, as, also, do soldiers when unarmed. Another form of salute at sea is *dipping the ensign*, that is, lowering the colors for a few moments, and then rehauling them up to the masthead or gaff-peak. See also **COLORS** and **FEU-DE-JOIE**.

Salu'ter, *n.* One who, or that which, salutes.

Salutiferous, *a.* [From *Lat. salus, salutis*, health, and *ferre*, to bring.] Bringing health; salubrious; healthy; as, *salutiferous* weather. (*R.*)

Salutiferously, *adv.* In a salutiferous manner.

Salut Public, (**Comité de**), [*Fr.*, Committee of Public Safety.] (*Fr. Hist.*) The term applied to a number of members of the National Convention during the Reign of Terror, 1793-94, who acted as the dictators of France. The committee arose out of that section of the convention called the "Mountain," which had gained the victory over the Girondist party; and at length its power came to be concentrated in three of its members—Robespierre, the real chief, though half concealed from view, Couthon, and St. Just. Among these men there was perfect unanimity down to the moment of their fall; and there is reason to believe that they had resolved to perpetuate their power by establishing a supreme council of three consuls, in which Robespierre would have had the perpetual presidency, with the departments of Justice, Exterior, and Finance; Couthon that of the Interior, and St. Just the War Department. The career of this sanguinary tribunal was brought to a termination by some of their former associates impeaching its members before the convention; and a reaction having taken place in the public mind, Robespierre, Couthon, and St. Just were executed on the 9th Thermidor (July 28, 1794).

Saluzzo, (*sa-luot'so*), a town of Italy, prov. of Coni, near the Po, 30 m. S.S.W. of Turin. It consists of an Upper and Lower town, the former situated on a height crowned by a magnificent castle, now used as a prison; the latter contains a handsome cathedral and other public buildings. It was the cap. of a dept. under the French domination. *Manuf.* Silk, leather, and hats. Pop. 17,548.

Salvability, *n.* The possibility of being saved, or admitted to everlasting life.

Salv'able, *a.* [From *Lat. salvus*, safe.] That may be saved or received to eternal happiness; admitting of salvation; as, *salvable* souls.

Salvador, **San**. See **SALVADOR**.

Salvador St. See **SALVADOR**.

Salvadora'ceæ, *n.* (*Bot.*) The *Salvadora* family, a small order of plants, alliance *Echiales*, consisting of shrubs and small trees, with leathery leaves and minute panicle flowers. The species are natives of India, Syria, and North Africa. The only one of any importance is *Salvadora Persica*, which Dr. Royle has shown to be the mustard-tree of Scripture. Its fruit is edible, and resembles in taste the garden-cress. The bark of its root is acrid, and is employed in India as a blistering agent. Its leaves are said to possess purgative properties.

Salvage, (*sāl'vaj*), *n.* [*Fr.*, from *L. Lat. salvagium*,

from Lat. *salvus*, safe.] (*Mar. Law.*) A reward or recompense allowed by law for the saving of a ship or cargo (or any part or parts thereof) from loss at sea; also, the goods or property so saved.

Salvages, a group of uninhabited islands off the W. coast of Africa, N. of the Canaries; Lat. 30° N., Lon. 16° W. **Salvatella**, *n.* [Lat., from *salvare*, to save.] (*Anat.*) A vein of the arm terminating in the fingers. It was formerly regarded as having peculiar influence on the health when opened.

Salvation, (*vā'shun*), *n.* Act of saving; rescue or preservation from danger, great calamity, or total destruction; as, marrying money was his *salvation*.

(*Theol.*) The deliverance wrought out by Christ for mankind, saving them from the consequences of their sins. This last is the sense in which it is commonly used in the New Testament, as by the apostle Paul, when he says, "How shall we escape if we neglect so great *salvation*?"

—Deliverance from enemies; victory; saving power; as, "see the *salvation* of the Lord." — *Exod.* xiv. 13.

Salvator Ro'sa. See ROSA, SALVATOR.

Salvatory, *n.* A repository; a place where things are kept safe and secure. (*R.*)

Salve, (*sawv*), *n.* [*A. S. scalfe*; kindred with Lat. *salvus*.] That which saves, mitigates, relieves, or preserves; a help; a remedy; an aid; an antidote; as, heavy damages proved a *salve* to his dishonor. — An adhesive composition; a substance applied to heal, mollify, or relieve wounds or sores; an unguent; an ointment; a plaster.

—*v. a.* (*imp.* and *pp.* SALVED, (*sawvd.*) To cure by remedial or emollient treatment; to heal by external applications; to apply salve to; as, to *salve* a wound.

Salver, (*sawv'er*), *n.* A piece of plate with a foot; or, a waiter on which articles are carried round and presented; as, the groom of the chambers brought me their cards on a *salver*.

Salver-shaped, (*-shāpt*), *a.* (*Bot.*) Tubular, with a flat border rectangular to the tube; — said of the corolla of a plant.

Sal'via, *n.* [Lat. *salvus*, well, in good health, because it was esteemed capable of curing many diseases.] (*Bot.*) A genus of plants, order *Sabiaceae*, consisting of herbs and under-shrubs, with aromatic leaves, which have generally a ringose appearance, and flowers commonly in spikes. The species best known is *S. officinalis*, the Common or Garden Sage, so much used by the cook as a flavoring agent, particularly in the stuffing for pork, goose, and duck. *S. lyrata*, the Wild or Meadow Sage, is found in shady woods from Canada to Georgia. An infusion of sage was formerly used, under the name of *sage-tea*, as a substitute for that of China tea; it is still largely employed in North America as a gargle in common sore throat, and when the uvula is relaxed. Many of the *salvias* are very ornamental plants, and are favorite objects of culture with the florist.

Sal'visa, in Kentucky, a post-village of Mercer co., abt. 20 m. S. of Frankfort.

Sal'vo, *n.*; *pl.* SALVOS. [Lat. *salvo jure*.] An exception; an excuse; a reservation; as, "private *salvos* or evasions." — *Locke*.

(*Mil.*) A discharge of heavy guns, or volley of musketry; as, to fire a *salvo*.

Sal-volat'ile, *n.* (*Chem.*) Carbonate of ammonia. The term is often applied to a spirituous solution of carbonate of ammonia flavored with aromatics, as in the compound spirit of ammonia.

Sal'vor, *n.* (*Mar. Law.*) One who saves a ship or goods at sea.

Salzburg, (*saltz-boorg*), a city of Upper Austria, on the Salzach, 67 m. S.W. of Liuz, and 70 m. E.S.E. of Munich. It is situated amidst lofty mountains, and surrounded by walls. The Salzach flows through the city, dividing it into two parts. It contains numerous public buildings and monuments. *Manuf.* Leather, tobacco, starch, and iron-wire. It is the birth-place of Mozart and Haydn. *Pop.* 18,000.

Salz'burg, a town of Hungary, S.W. of Eperies; *pop.* 4,000.

Sa'makov, a town of European Turkey, in Bulgaria, 30 m. S.S.E. of St. Sophia. It has extensive iron-works. *Pop.* 7,000.

Sama'na, a peninsula on the N.E. of the island of Hayti, republic of San Domingo, extending 32 m. from W. to E., with a breadth of 11 m.; Lat. 19° 18' N., Lon. 69° 8' W. The surroundings indicate that it was formerly an island. *Soil*, fertile, producing timber for ship-building and cabinet-ware. *Min.* Copper, gold, and coal. *Pop.* 1,721.

Samana Bay, in San Domingo, S. of ab. peninsula, 30 m. long and several broad, one of the most important harbors of the W. Indies. On the shores are the harbors of Santa Barbara and San Lorenzo. The bay was surveyed by a U. S. vessel in 1882. See HAYTI.

Samán'co, a bay on the coast of Peru, Lat. 9° 15' 30" S., Lon. 78° 32' 45" W.

Samar', one of the Philippine Islands, situated to the S.E. of Luzon, from which it is separated by a strait 20 m. wide; Lat. between 11° 15' and 12° 45' N., Lon. 124° 15' and 125° 52' E. *Ext.* 140 m. long, with an average breadth of 60 m. It is fertile and easily cultivated. *Prod.* Sugar, cotton, coffee, and various kinds of fruits and vegetables. — *Lat.* 100,000.

Sam'ara, *n.* [Lat., the seed of the elder-tree.] (*Bot.*) A superior two or more celled fruit, each cell being dry, indehiscent, few-seeded, and having its pericarp extended into a winged expansion. Each cell of the *Samara* is, in fact, an achæniun, with a winged margin. Examples of the *Samara* occur in the so-called sycamore, the ash, and the elm.

Samara', a city of European Russia, cap. of govt. of

same name, on the Volga, at the junction of the Samara, 100 m. S.E. of Simbirsk. *Pop.* 25,343.

Samarang', a seaport-town of Java, on the N. coast, near the mouth of the river Samarang, 240 m. E.S.E. of Batavia; Lat. 6° 56' S., Lon. 110° 27' E. It is strongly fortified, and has a considerable trade in coffee, pepper, and rice.

Sam'arcand, a fortified city of Independent Tartary, in Bokhara, on the Sogd, or Zer-Afshan, 120 m. E. of Bokhara; Lat. 39° 30' N., Lat. 68° 50' 15' E. It was formerly the cap. of Timour's empire, and was a place of great importance. *Pop.* 25,000. Captured and annexed by the Russians in 1868. See also BOKHARA.

Sam'are, *n.* Same as SIMAR, *q. v.*

Sama'ria, (*Jewish Hist.*), a city and country of Palestine, situated towards the north of Judea. Samaria was the country in which the ten revolted tribes raised their independent state, and formed the kingdom properly denominated Israel, in contradistinction to that of Judah, embracing the two tribes of Judah and Benjamin, from which the other ten had seceded when, refusing the authority of Rehoboam, they established a dynasty of their own, at the head of which they placed Jeroboam, the first king of the nation of Israel. So deadly was the animosity, and so implacable the hatred that existed between these two nations of Jews, that, from the time of their severance to the destruction of their capital and the captivity of Israel, an almost perpetual state of warfare existed between Judah and Israel; indeed, so intensely did the former hate the latter, that the term of Samaritan was one of the bitterest contempt and reproach that could be applied to any one. It was the consciousness of this fact, though it had long outlived the existence of the nation, that made the woman at the well marvel when Jesus asked her to draw him some water. The antipathy borne by the people of Judah for those of Israel or Samaria was not only political, but religious, and they hated them not alone for the difference of their institutions, but more for the difference that existed in the form of worship adopted by the Samaritans. These theological dissensions were, however, in time greatly modified by the return of the Samaritans to the ancient form of worship, and by the erection of a temple in the capital that professed to be a model of the great fabric completed by Solomon in Jerusalem, an event that was celebrated soon after the passage of Alexander the Great through the land of Syria. The city of Samaria, and capital of the kingdom, was situated on a hill, Mount Sameron, was founded by Omri, and from that time till its overthrow by the Assyrians was the residence of all the kings of Israel. It was subsequently rebuilt by Herod, who called it *Sebaste* (a Greek word signifying *Augustus*), in honor of Augustus Cæsar.

Samar'itan, *a.* (*Geog.*) Pertaining, or relating, to Samaria, the chief city of the ten tribes of Israel.

(*Philol.*) Denoting the ancient characters and alphabet used by the Hebrews before the Babylonian captivity, and retained by the people of Samaria.

—*n.* (*Geog.*) An inhabitant of Samaria; one who belonged to the sect which derived their appellation from that city.

(*Philol.*) The language of Samaria; — a dialect of the Chaldee.

Sam'aroid, *n.* (*Bot.*) Bearing resemblance to a samara. **Samar'rah**, a town of Asiatic Turkey, pashalic of Bagdad, 65 m. N.N.W. of Bagdad. It is frequented as a place of pilgrimage.

Sambas', a river on the W. coast of Borneo; Lat. 1° 12' N., Lon. 109° 5' E. — A town on the above river, 40 m. from its mouth. The British were repulsed in an attack upon it in 1812, but captured it in the following year. *Pop.* 10,000, mostly Malays.

Sam'bo, *n.* [*Sp. zambo*.] The offspring of a black person and a mulatto; — hence, sportively or derisively, a negro.

Sambre, (*sambr*), a river of France and Belgium, rising in the dept. of Aisne, and after a N.E. course of 100 m., joins the Meuse, at Namur.

Sambri'cus, *n.* [Lat., from *sambuca*, a musical instrument formed of this tree.] (*Bot.*) The Elder, a gen. of the ord. *Caprifoliaceae*. *S. nigra* is the Common Elder,

Fig. 2301. — ELDER.
(*Sambucus canadensis*.)

a low tree, native of Europe, from which the elder-wine of old-fashioned folk is manufactured, a liquor which is now chiefly used for adulterating port-wine. Several parts of this plant are used in medicine. Its

flowers contain a volatile oil, which renders them mildly stimulant and anodific; they are employed in the preparation of a cooling ointment, and to make elder-flower water. The inner bark and leaves have more or less purgative and emetic properties. The fruit is mildly aperient and diuretic. The American species, *S. canadensis* (Fig. 2301), much resembles *S. nigra*, but never assumes anything of a tree character.

Sam'buke, *n.* [Lat. *sambuca*; Gr. *sambukē*.] (*Mus.*) An ancient stringed musical instrument, resembling a harp, the invention of which has been attributed to the Syrians and Phœnicians. — The name was also applied to a military engine for scaling the walls of besieged cities.

Same, *a.* [*A. S.*] Having the property of oneness; identical; not different from other; as, he is the *same* individual I spoke of. — Of the identical kind or species, though not the specific thing; being of the like class, kind, like, or degree; corresponding; equal; exactly similar; as, it is all the *same* to me whether he accepts or rejects. — That was mentioned before, or that was just about to be mentioned; as, he spoke too of the *same*.

Sameness, *n.* State of being the same, or of being identical; state of not being different or other; state of being perfectly alike; near resemblance; correspondence; similarity; identity; oneness; as, *sameness* of individuality, of appearance, of sound, &c. — Hence, tedious monotony; absence of variety; tiresome repetition; as, there's too much *sameness* in his style.

Sam'ian, *a.* [Lat. *Samius*.] (*Geog.*) Pertaining or relating to the island of Samos, or to its inhabitants; as, *Samian* wine.

Samian earth, a sort of marl brought from Samos, and formerly used, medicinally, as an astringent.

Sam'ian, *n.* (*Geog.*) A native or inhabitant of Samos; a Samiot.

Sam'iel, *n.* The simoom. See SIMOOM.

Sam'iot, **Sam'iot**, *a.* (*Geog.*) Pertaining or relating to Samos, or its inhabitants; Samian.

—*n.* (*Geog.*) A native or inhabitant of Samos.

Sam'let, *n.* A young salmon; a salmonet.

Sam'ols, *n.* (*Bot.*) A genus of plants, order *Primulaceae*. They are herbs with alternate leaves, and flowers corymbose or racemose. *S. valerandi*, the Water Pimpernel, found in wet, gravelly places throughout the world, is 1 foot high, and has small, white flowers, the corolla of which is twice the length of the calyx.

Sam'rites, *n. pl.* (*Anc. Hist.*) A people of ancient Italy, who inhabited the country between Apulia on the east and Latium and Campania on the west; a brave and warlike nation, who distinguished themselves by their implacable hatred of the Romans, with whom, from their earliest existence as a people, they waged a perpetual hostility. They were, however, ultimately compelled to succumb before the growing power of Rome, and after a succession of disasters were finally exterminated about 272 B. C. Their capital city was called Samnium, or Samnis. — The term *Samnites* was subsequently applied to an order of Roman gladiators, so named because accoutred and armed in the fashion of the ancient nation of Samnites.

Samoan Islands. See NAVIGATORS' ISLANDS.

Samo'ens, a town of France, in Savoy; *pop.* 4,000.

Samo'edes, **Samo'yeds**, *n. pl.* (*Geog.*) Three tribes inhabiting a region skirting the Arctic Ocean.

Sa'mes, [*Turk. Susam-adassi*.] An island of the Grecian Archipelago, belonging to Turkey, off the W. coast of Asia Minor, from which it is separated by the Little Bosphorus, a strait 2 m. wide, 42 m. S.W. of Smyrna; Mount Kerki, on its W. extremity, being in Lat. 37° 43' 48" N., Lon. 26° 38' 21" E.; *area*, 165 sq. m. The surface is mountainous, varied in scenery, the highest peak (Mount Kerki) being 4,725 feet. It is well wooded and fertile. *Prod.* Grain, wine, and the vegetables and fruits of the temperate zone. *Min.* Silver, lead, and marble. *Cap.* Khora. *S.* was anciently one of the most famous isles of Greece, and early turned its attention to naval affairs, establishing numerous colonies along the shores of the Mediterranean. It took part in the numerous wars of Greece, and finally became a Roman province B. C. 84. It took part in the war against the Turks for Grecian independence, but at its conclusion was retained by the Turks.

Samothrace, (*sa'mo-thraice*). [*Mod. Gr. Samothraki*; *Turk. Semendrek*.] An island belonging to European Turkey, in the Ægean Sea, 15 m. S.E. of Nubros; *area*, 30 sq. m. The surface is rugged and mountainous. *Pop.* 1,500.

Samp, *n.* An article of food consisting of maize, broken or bruised, which is cooked by boiling, and often eaten with milk; — a dish borrowed from the aborigines of America.

Samphire, (*sā'm'fur*), *n.* (*Bot.*) See CRITHMUM.

Sample, (*sām'pl*), *n.* [*Fr. exemple*, from Lat. *exemplum*.] A specimen; that which is taken out of a larger quantity as a specimen; a part of anything presented for inspection, or intended to be shown, as evidence of the quality of the whole; as, cotton is purchased by *sample*, give me a *sample* of the goods. — A pattern; an example; an instance; as, is this a *sample* for me to follow?

Sam'pler, *n.* [*Lat. exemplar*.] A pattern or model of work; a specimen; — particularly, a piece of needle-work sewed by learners, containing specimens of various kinds of stitches. — One who apportions things into samples for inspection; as, a tea *sampler*.

Samp'son, in N. Carolina, a S.E. central co.; *area*, about 996 sq. m. *Rivers*. Black and South rivers. *Surface*, mostly level; *soil*, not very fertile. *Cap.* Clinton. *Pop.* (1897) 26,100.

Samp'sondale, in New York, a village of Rockland co., about 100 m. S. of Albany.

Samp'sonville, or **SAMSONVILLE**, in *New York*, a post-village of Ulster co., abt. 50 m. S.W. of Albany.

Samp'town, in *New Jersey*, a village of Middlesex co., abt. 8 m. N. of New Brunswick.

Samse, (*sam'se(r)*), an island of Denmark, in the Great Belt, between Zealand and Jutland; *area*, 40 sq. m.; *pop.* 5,500.

Sam'son. (*Script.*) The son of Manoah, of the tribe of Dan. He was endowed with extraordinary strength, and obtained several advantages over the Philistines. At length his mistress betrayed him into the hands of his enemies, who put out his eyes, and made him work at a mill. On a public festival, when the Philistine lords were assembled in the temple of Dagon, Samson was sent for to show them sport. Laying hold of two pillars of the temple as if to support himself, he pulled down the building, and was buried in the ruins, with more than 3,000 Philistines.

Sam'son's-post, *n.* (*Naut.*) A strong pillar resting on a ship's keelson, and supporting a beam of the deck over the hold, thus helping to keep the cargo in its place.—Also, a temporary or movable pillar carrying a leading block for various purposes.

Samuel, (*sām'u-el*). (*Script.*) A prophet and judge of Israel, of the tribe of Levi, was called in his youth, while attending Eli, the high priest. He consecrated Saul king of Israel, and was afterwards commanded to anoint David. After governing Israel either alone or in conjunction with Saul during 50 years, he died in the 90th year of his age, B. C. 1072.

Books of Samuel. Two of the ceremonial books of the Old Testament, called after the prophet Samuel, their reputed author. They were anciently reckoned as one book by the Jews, the present division into two being derived from the Septuagint and Vulgate. Various attempts have been made to determine the age and authorship of these books, with more or less of probability. The common opinion, founded on 1 *Chron.* xxix. 29, is that the first twenty-four chapters were written by Samuel himself, and the remainder by Nathan and Gad. There is no reason to believe, however, that these documents were identical with the present Books of Samuel. From Samuel and Kings being sometimes called the four Books of Kings, John is of opinion that they were all written by the same person, and at a date so recent as the thirtieth year of the Babylonish captivity. This hypothesis, however, will not stand the test of criticism. The language and style of the books are very different, denoting different periods and different authors. The Books of Samuel bear the impress of a hoary age in their language, allusions, and mode of composition. The insertion of odes and snatches of poetry, to enliven and verify the narrative, is common to them with the Pentateuch. They appear to have been made up from documents contemporary, or nearly so, with the events to which they refer, and wrought into their present form by some later hand. Some portions are more fully detailed and warmly colored than others, and the minute and vivid sketches with which they abound prove that their author speaks what he knows, and testifies what he has seen. With respect to the person who compiled and brought them together in their present form, all that can be affirmed with probability is that he lived not long after the time of David. Though much has been made of discrepancies and contradictory statements that are said to occur in these Books, their historical character is abundantly supported both by external and internal evidence. Portions of them are quoted or referred to in the New Testament, and allusions to them also occur in the Book of Psalms, to which they often furnish historical illustration.

Sauyda'ceæ, *n.* (*Bot.*) A small order of plants, alliance *Violales*, consisting of trees and shrubs, exclusively tropical, and principally S. American. Leaves alternate simple, evergreen, stipulate, usually with round or linear transparent markings. Flowers perfect, calyx inferior, 4-5-partite. Stamens perigynous, two, three, or four times as many as the segments of the calyx. Fruit superior, capsular, leathery, 1-celled. Seeds numerous, arillate, with oily or fleshy albumen and large embryo. The plants are of little economic value.

Sau, a river of Austrian Poland, rising in the Carpathian Mountains, and after a N. course of 250 m., falling into the Vistula, near Sandomir.

Sa'na, a city of Arabia, cap. of Yemen, and residence of the Iman, near the head of the Shab River, 150 m. N.N.E. of Mocha; *Lat.* 15° 21' N., *Lon.* 44° 9' E. It has a considerable trade in coffee. *Pop.* 40,000.

Sanability, *n.* State of being sanable or curable.

San'able, *a.* [*Lat. sanabilis—sano*, to cure.] That may be healed or cured; curable; healable; susceptible of remedial treatment.

San And'reas, in *California*, a post-vill., cap. of Calaveras co., abt. 42 m. E. by N. of Stockton;

San Angel, (*anzh'l*), a town of Mexico, abt. 6 m. S. of the city of Mexico; *pop.* 2,500.

San Antonio, (*an-to'ne-o*), a bay of Patagonia; *Lat.* 40° 49' S., *Lon.* 65° 54' W.

San Antonio, a cape of Brazil, at the entrance to the Bay of Bahia. It has a light 140 feet high; *Lat.* 13° 0' 7" S., *Lon.* 38° 31' 7" W.

San Antonio, a cape of Buenos Ayres, Argentine Republic, at the mouth of the Rio de la Plata; *Lat.* 36° 19' S., *Lon.* 56° 45' W.

San Antonio, a town of Venezuela, abt. 110 m. E. of Varinas.

San Antonio, in *New Mexico*, a village abt. 45 m. S.S.W. of Santa Fé.—A village abt. 150 m. S.S.W. of Santa Fé.

San Antonio, in *Texas*, a river rising in Bexar co.,

and flowing a S.E. course enters Guadalupe River from Refugio co., a few m. above Espiritu Santo Bay. The upper portion is called Medina River.—A city, cap. of Bexar co., on the San Antonio River, abt. 110 m. S.W. of Austin. It is well built, and contains many fine public and private edifices. A U. S. arsenal is here located. Fort Alamo, near here, is memorable as having been the scene of one of the most affecting episodes of the Texan war of independence. On March 6, 1836, a small body of patriots, under the command of Col. Travis, resisted a Mexican army ten times their number, and, rather than surrender, perished to a man;—hence it has been called the *Thermopylæ of Texas*, and "Remember the Alamo" afterwards became the war-cry of the Texan army.

San Ant'o'nio, one of the Cape Verd Islands; *Lat.* 16° 26' N., *Lon.* 25° 21' W.

San Antonio Creek, in *California*, flows into the Pacific Ocean from Marin co.

San Antonio de Gibraltar, a town of Venezuela, abt. 50 m. N.W. of Trujillo; *pop.* 3,500.

San Antonio de los Cues, a town of Mexico, abt. 70 m. N. of Oajaca.

San'ative, *a.* Having the power to heal or cure; tending to cure or heal; healing; curative; remedial; sanatory; as, *sanative treatment*.

San'ativeness, *n.* Quality of being sanative; power of healing; curativeness.

San'atory, *a.* [*From Lat. sanare*, to heal.] Sanative; curative; healing; tending to promote health; as, *sanatory regulations*;—this term is often confounded with *sanitary*, as being synonymous in definition; this is, however, not properly so, the word *sanitary* having the passive sense of *belonging to health*, rather than *tending to, or conducive of health*.

San Augus'tin, a town of Mexico, abt. 12 m. S. of the city of Mexico.

San August'ine, in *Texas*, an E. co.; *area*, abt. 620 sq. m. *Rivers*, Angelina and Attoyac rivers. *Surface*, mostly level; *soil*, very fertile, and noted for its cotton-growing qualities. *Cap.* San Augustine, a thriving post-village, abt. 310 m. E.N.E. of Austin. *Pop.* of co., abt. 5,000.

San-benito, (*bā-nē'to*), *n.* [*It.*; *Lat. saccus benedictus*.] A robe painted with bizarre images of hideous aspect, formerly worn by those condemned by the Spanish Inquisition.—Also, a garment of sack-cloth worn by a penitent restored to the bosom of the Roman Catholic Church.

San Bernard', in *Texas*, a small river flowing S.E. into the Gulf of Mexico from Brazoria co.

San Bernardino, (*ber-nar-dee'no*), in *California*, a lofty peak of the Coast Range, in San Bernardino co., abt. 30 m. E. of San Bernardino. *Height*, abt. 8,500 ft.—A southeast co., adjoining Nevada and Arizona; *area*, about 21,000 square miles. *Rivers*, Colorado, Mohave, Amargosa, and Santa Anna rivers. There are also several brackish lakes, or *sinks*. *Surface*, much diversified, the Coast Range traversing the S.W. part of the co.; *soil*, in some parts fertile. *Min.* Gold, silver, and tin. *Cap.* San Bernardino.—A thriving city, cap. of the above county, about 30 miles east of Los Angeles. *Pop.* (1897) 4,900.

San Bernar'do, a group of islets belonging to the U. S. of Colombia, in the Caribbean Sea, at the mouth of the Gulf of Morrosquillo, abt. 50 m. S. by W. of Cartagena.

San Blas, or **MANDINGO**, a bay or gulf of the U. S. of Colombia, formed by an arm of the Caribbean Sea on the N. coast of the Isthmus of Panama; *Lat.* 9° 30' N., *Lon.* 79° W. See *CAPE SAN BLAS*.

San Blas, or **SAINT BLAS**, a seaport-town of Mexico, on an island in the Pacific Ocean, at the mouth of the Santiago River, abt. 37 m. W.S.W. of Tepic; *Lat.* 21° 32' 34" N., *Lon.* 105° 15' 24" W. It has an excellent harbor, but the climate is very unhealthy. *Pop.* abt. 2,500.

San Borom'bon, (*ENSENADA DE*), a bay of the Argentine Republic, in the Rio de la Plata, abt. 30 m. S.E. of Buenos Ayres.

San'bornton, in *Iowa*, a village of Clinton co., abt. 45 m. N.E. by E. of Iowa City.

Sanbornton, in *New Hampshire*, a post-township of Belknap co.

San'bornton Bridge, in *New Hampshire*, a village of Belknap co., about 18 m. N. of Concord.

San Buenaventura (*bua-na-ven-to'ra*), in *California*, a small river flowing W. into the Pacific Ocean from Santa Barbara co.

—A town of Ventura co.; its post-office is VENTURA.

Sau Cascia'no, a town of Central Italy, prov. of Florence, 10 m. S.W. of Florence; *pop.* 11,258.

Sau Carlos, (*kar'loce*), a town of Chili, on the N.E. coast of the island of Chiloe. It has a fine harbor, well fortified, and commands an extensive trade.

Sau Carlos, a town of Venezuela, abt. 130 m. S.W. of Caracas. In the vicinity, rich plantations of indigo, coffee, and cotton, and immense numbers of sheep and cattle are raised on the neighboring savannas. *Pop.* 10,000.

Saucerre, (*san-sair*), a town of France, dept. of Cher, on the Loire, 27 m. N.E. of Bourges; *pop.* 4,000.

San Clemente, in *California*, one of the Santa Barbara Islands, abt. 15 m. S. of Santa Catalina.

Sau'coty Head, in *Massachusetts*, a promontory and light-house at the S.E. extremity of Nantucket Island. It exhibits a fixed light 150 ft. above sea level; *Lat.* 41° 17' N., *Lon.* 69° 59' W.

San Cristo'val, a lake of Mexico, abt. 12 m. N.N.E. of the city of Mexico. On its S. side is a village of same name.

San Cristoval, a town of Venezuela, abt. 96 m. S.S.W. of Merida.

San Croce, (*-kro'chai*), a town of Italy, on the Arno, 4 m. N.W. of San Miniato; *pop.* 5,200.

Sanctification, (*sank-tif-e-kai'shun*), *n.* [*Lat. sanctus*, holy, and *facio*, to make.] (*Theol.*) The work of the Holy Spirit on the soul of the regenerate man, by which it is made "meet for the inheritance of the saints in light." It is to be carefully distinguished from *justification*, which is the divine pardon and acceptance of the sinner. It is the progressive conformity of the heart and life of the Christian man to the will of God from his justification to his final salvation.

Sanctified, (*-fid*), *p. a.* Sanctimonious; made to present an appearance of affected holiness; puritanical;—used in a reproachful or contemptuous sense; as, *a sanctified sinner*.

Sanctifier, *n.* One who sanctifies or makes holy; specifically, the Holy Spirit; as, *God the sanctifier*.

Sanctify, (*sangk'ti-fi*), *v. a.* (*imp.* and *pp.* *SANCTIFIED*.) [*Fr. sanctifier*, from *Lat. sanctus*, holy, and *facio*, to make.] To make holy or sacred; to hallow; to separate, set apart, or appoint to a holy, sacred, or religious use; to consecrate by appropriate ceremonies.—To make holy or pure; to free from sin; to cleanse from moral corruption or pollution; to render fit for the service of God and the enjoyment of heaven.—To make productive of holiness or piety; to provide, as the active means of holiness.—To secure from violation; to give sanction, or authoritative title, reverence, and respect to; to impart venerableness or inviolability to; as, *a doctrine sanctified by truth*.

Sanctifyingly, *adv.* In a manner tending to sanctify; in a degree adapted to make or increase holiness.

Sanctiloquent, (*-kwent*), *a.* [*Lat. sanctus*, holy, and *loquens—loqui*, to speak.] Speaking of holy things, of discoursing in a devout manner.

Sanctimonious, *a.* [*From Lat. sanctimonia—sanctus*, holy.] Sacred; saintly; possessing sanctimony of devoutness.—Having the external appearance of sanctity; pretending to religiousness; mock-pious; hypocritically devout; puritanical; as, *a sanctimonious Sabatarian*.

Sanctimoniously, *adv.* In a sanctimonious manner; puritanically.

Sanctimoniousness, *n.* State or quality of being sanctimonious; sanctity, or the appearance of it; devoutness; mock piety; hypocritical devoutness; pretended holiness; artificial saintliness; puritanical manners or practices.

Sanctimony, *n.* [*Lat. sanctimonia—sanctus*, holy.] Holiness; sanctity; devoutness; religiousness;—particularly, assumed saintliness; mock piety; pretended holiness; sham or hypocritical devoutness.

Sanction, (*sangk'shun*), *n.* [*Fr.*; *Lat. sanctio*, from *sanctio*, to make sacred or inviolable.] Solemn or magisterial authorization, confirmation, or ratification; official countenance or support; an authoritative act of a superior, by which he ratifies and gives validity to the act of some other person or body of persons; confirmation or acceptance derived from testimony, character, influence, or custom.—That which is acted or uttered to carry out the will, law, or authority of another or others; as, "the public *sanctions* of the peace." *Dryden*.—*v. a.* To give a sanction to; to make authoritative or valid; to ratify; to confirm; to countenance; to support; as, *he refused to sanction so risky an enterprise*.

Sanctionary, *a.* Serving to, or giving, sanction.

Sanctitude, *n.* [*Lat. sanctitudo*.] Sanctity. (*R.*)

Sanctity, *n.* [*It. santità*; *Fr. sainteté*; *Lat. sanctitas*, from *sanctus*.] State or quality of being sacred, holy, or devout; state of being pure or godly; holiness; saintliness; godliness; piety; purity; goodness; as, *he makes no pretensions to sanctity of life*.—State of being religiously or solemnly binding or incumbent; sacredness; inviolability; as, *the sanctity of an oath or moral obligation*.—A saint; a holy personage. (*R.*)

Sanctuary, *n.* [*Lat. sanctuarium*.] Among the ancient Jews, a sanctuary was the innermost chamber of the tabernacle,—afterwards of the temple, in which was kept the ark of the Covenant, and was never entered, except by the high-priest once a year. It was also called the *Holy of Holies*, *Sanctum Sanctorum*. In the Christian church, the bema, or inner portion of the church, immediately round the altar, was called the *sanctuary*. From the sacred character of the churches, and from the rising power of the clergy, they came to be resorted to as asylums by fugitives from the hands of justice, and afterwards certain churches were set apart specially for that purpose, and were termed *sanctuaries*. This seems to have been originally intended only to prevent sudden violence, and to give time for the regular administration of the law, and perhaps, in the case of certain delinquencies, for the intercession of the church. The abuses to which this system gave rise, as tending entirely to defeat the ends of justice, led to its abolition in all the Christian countries.

Sanctus, *n.* [*Lat.*] (*Mus.*) In sacred music, an anthem commencing with the word *sanctus*, holy.

Sand, *n.* [*A. S.* and *Ger.*] Any mass or collection of fine particles of stone, particularly of fine, granular particles of silicious stone, which constitutes common river- and sea-sand. Particles of other substances are often blended with it, and sometimes it becomes calcareous from the prevalence of carbonate of lime. Silicious sand selected for the mixing of mortar and other cements, should be freed from all saline matters, not too fine-grained, and somewhat sharp or angular. In the manufacture of glass and of porcelain, sand should be from oxide of iron and other tinging oxides. The fine, white sand resulting from the disintegration of soft and pure sandstone, is much used, under the name of *silver-sand*.

George Sand

[BARONESS DUDEVANT]

1804-1876

—*france*, chiefly in the plural, a moment; a measured interval; — from the use of sand in the hour-glass.

"The sands are number'd that make up my life." — *Shaks.*

—*pl.* Tracts of land consisting of sand, like the deserts of Arabia, Africa, Asia, &c.; as, "the Libyan sands." — *Milton.*

—*v. a.* To sprinkle or cover with sand; as, to sand a floor.

Sand, GEORGES, the *nom de plume* of MADAME AMANTINE LUCILE AURORE, BARONESS DUDEVANT, a French authoress of great celebrity, b. in Paris, 1804, and descended from the famous Marshal de Saxe by her father the Marquis Maurice Dupin de Franceuil. After having received a conventual education, from 1817 to 1820, she married in 1822 M. Dudevant. A separation took place in 1831. She went to Paris, where her first literary efforts appeared in the *Figaro*. In conjunction with a young student, Jules Sandeau, from whose name she composed her *nom de plume*, she wrote the romance *Rose et Blanche*, in 1832, but which, though clever in parts, gave no hint of the splendid ability first fully developed in *Indiana*, published in the same year. Much interest was excited by this, which increased on the appearance of the romances *Valentine*; *Lélia*; *Jacques*; *André*; *Leone Leoni*; *Simon*; and *Mauprat*. Besides imaginative productions, she contributed miscellaneous papers, articles, and political essays to *La Monde*, edited by Lamennais. She started the *Revue Indépendante*, in connection with P. Leroux and Viardot. She wrote for this paper *Horace*; *Consuelo*; and *La Comtesse de Rudolstadt*. Madame Dudevant obtained possession of her private property and her children, and afterward chiefly resided at the Château de Nohant. She published an autobiography and several popular dramas, and attained the highest distinction for versatility, brilliancy of imagination, intrepidity of mind, and mastery of the great problems of modern social progress. Died in 1876.

Sand'al, *n.* [Fr. *sandale*.] A protection for the foot, worn in ancient times, and which, in the Authorized Version of the Old Testament, is usually denoted by the word translated *shoe*. It was usually a sole of hide, leather, or wood, bound on the foot by thongs; but it may sometimes denote such shoes and buskins as eventually came into use. Jewish ladies appear to have paid great attention to the beauty of their sandals (*Cent.* vii. 1), which, probably, did not differ much from those used in Egypt, excepting, perhaps, that from the greater roughness of their country, they were usually of more substantial make and materials. The Egyptian sandals varied slightly in form; those worn by the upper classes, and by women, were usually pointed and turned up at the end, like our skates and many of the Eastern slippers at the present day. In transferring a possession or

varnish, for incense; and is, also, employed under the name of *pounce* to prevent ink from sinking into paper. (*Min.*) Realgar.

Sand'ay, one of the Orkney islands; *pop.* 2,000.

Sand'baeh, a town of England, co. of Chester, on the Wheelock, 24 m. E.S.E. of Chester; *pop.* 5,000.

Sand'-bag, *n.* (*Engrav.*) A leathern cushion, tightly filled with fine sand, used by engravers to prop their work at a convenient angle, or to give motion to a place or wood-cut, in engraving curved lines, &c.

—*pl.* (*Fortif.*) Bags of coarse canvas filled with sand, much used in cases where cover for troops is required to be speedily obtained, as a temporary revestment for parapets, &c.

Sand'-ball, *n.* Soap mixed with sand, or powdered pumice-stone, made into a ball for use in ablutions.

Sand'-bath, *n.* (*Chem.*) See BATH.

Sand'-blind, *a.* Having a defect of sight, by reason of which small particles like sand appear to fly before the eyes.

Sand'-box, *n.* A box with a perforated lid, for distributing sand over paper.

(*Mach.*) In locomotive engines, a box from which sand is sprinkled on the rails in front of the driving-wheel, to increase their power of adhesion, &c.

Sand'-box-tree, *n.* (*Bot.*) See ILURIA.

Sand'-erab, *n.* (*Zool.*) See ACTYPODA.

Sand'-crack, *n.* (*Far.*) A vertical crack in a horse's hoof, apt, if not remedied, to induce lameness.

Sand Creek, in Indiana, rises in Decatur co., and flowing S.W. and W., enters Driftwood Fork of White River from Jackson co. — A township of Bartholomew co. — A township of Decatur co. — A township of Jennings co.

Sand'-drift, *n.* Whirling or driving sand.

Sand'ed, *a.* Covered with sand; barren; desert-like; as, a sand'ed valley. — Checkered with small spots; mottled; variegated with spots; speckled; as, a sand'ed hound. — Short-sighted; as, sand'ed eyes; — an English provincialism.

Sand'-eel, **Sand'-lanee**, *n.* (*Zool.*) See AMMODYTE.

Sandema'nians, *n. pl.* (*Eccl. Hist.*) Same as GRASS-ITES, *q. v.*

Sand'ering, *a.* (*Zool.*) A small bird, a species of *Tringa*, *T. arenaria*, family *Scolopacida*, native of North America and Europe.

Sand'ers, or **Red Sand'-al-wood**, *n.* See SANTALUM.

Sand'ers-blue, *n.* (*Paint.*) See SAUNDERS-BLUE.

Sand'erson's Hoop, a promontory of Greenland, S. of Upernavik; the cliff is 3,000 feet high.

Sand'ersville, or **SAUNDERSVILLE**, in Georgia, a city, cap. of Washington co., about 28 m. E. of Milledgeville. *Pop.* (1897) 2,150.

Sandersville, or **SAUNDERSVILLE**, in Indiana, a village of Vanderburg co., about 10 m. N. of Evansville.

Sand'ford, in New York, a post-township of Broome county.

Sand'-fly, *n.* (*Zool.*) A small, troublesome fly, *Simulium nocivum*.

Sand'gate, in Vermont, a post-township of Bennington co.

Sand'-glass, *n.* An hour-glass.

Sand'-grouse, *n.* (*Zool.*) A species of grouse, *Tetrao arenarius*.

Sand'-heat, *n.* The caloric of warm sand in chemical operations.

Sand'-hopper, **Sand'-flea**, *n.* (*Zool.*) See AMPHIPODA.

San Diego, in California, an extreme S. co., having Arizona Territory on the E., Lower California on the S., and the Pacific Ocean on the W.; *area*, abt. 15,000 sq. m. *Rivers.* Colorado, San Diego, San Luis del Rey, and Santa Margarita rivers. *Surface*, much diversified, and in the central part mountainous; *soil*, in the E. sterile, and in the W. generally fertile. *Min.* Gold is found near the Colorado river. *Cap.* San Diego. *Pop.* (1897) 38,660.

— A city, cap. of the above co., on a bay of the same name, about 470 m. S.E. of San Francisco; *Lat.* 32° 44' 41" N., *Lon.* 117° 8' W. It possesses one of the best harbors on the Pacific coast. *Pop.* (1897) 21,400.

Sand'iness, *n.* [From *sandy*.] State of being sandy, or of a sandy color; as, sand'iness of the hair, sand'iness of soil.

Sand'ing Isles, two small islands off the S.W. coast of Sumatra.

Sand'isfield, in Massachusetts, a post-village and township of Berks county, about 37 miles W. of Springfield.

Sand'iston, in New Jersey, a township of Sussex county.

Sand'diver, **Sand'dever**, *n.* Same as GLASS GALL, *q. v.*

Sand'jak, **Sand'giae**, *n.* A Turkish governor of a territorial district.

Sand Lake, in New York, a post-village and twp. of Rensselaer co., abt. 10 m. S.E. of Albany.

Sand'-martin, *n.* (*Zool.*) A species of Swallow (*Hirundo riparia*).

San Domin'go, or the DOMINICAN REPUBLIC. See HAYTI.

San Domingo, a town of the U. S. of Colombia, abt. 60 m. E. of Antioquia.

San Domingo, an islet of the W. Indies, on the Great Bahama Bank, abt. 90 m. N.E. of Nuevitas, in Cuba.

San Domingo, in New Mexico, a town on the Rio Grande del Norte, abt. 28 m. S.W. of Santa Fé.

San Domingo Sineantan', a town of Mexico, in Chiapa, on the borders of Tabasco; *pop.* abt. 2,500.

San Domingo Suriano, (*sao-re-a'no*), a village of Uruguay, on the Rio Negro, abt. 80 m. N. of Buenos Ayres.

Sandomir, (*san'do-meer*), a town of Russian Poland, on the Volga, 50 m. S.W. of Lublin. It was formerly the residence of the kings of Poland. *Pop.* 4,500.

San Do'na, a town of Italy, on the Piave, 18 m. N.E. of Venice. *Manuf.* Silk and linen goods. *Pop.* 4,600.

San'doval, in Illinois, a post-village of Marion co., abt. 61 m. E. of St. Louis.

San'down, in New Hampshire, a post-township of Rockingham county, about 34 miles south-east of Concord.

Sand'-paper, *n.* Paper covered on one side with a fine gritty substance, small as sand, for smoothing and polishing.

Sand'-piper, *n.* (*Zool.*) See TRINGA.

Sand Prair'ie, in Illinois, a township of Tazewell co.

Sand Ridge, in Iowa, a village of Des Moines co., abt. 75 m. S.S.E. of Iowa City.

Sand'-rock, *n.* A rock composed of cemented silicious sand.

Sand'-star, *n.* A species of star-fish, *Ophiura texturata*.

Sand'stone, *n.* (*Geol.*) A general term applied to all stones composed of agglutinated grains of sand, which may be silicious or calcareous.

Sand Stone, in Michigan, a post-township of Jackson co.

Sand Stone Creek, in Michigan, enters Grand River from Jackson co.

Sand'town, in Georgia, a village of Campbell co., abt. 11 m. W. of Atlanta.

Sand'town, or **BERKELEY**, in New Jersey, a village of Gloucester co., abt. 5 m. S.W. of Woodbury.

Sand'-tube, *n.* Same as FULGURITE, *q. v.*

Sandus'ky, in New York, a post-village of Cattaraugus co., abt. 40 m. S.E. of Buffalo.

Sandusky, in Ohio, a N. co., bordering on Sandusky Bay, of Lake Erie; *area*, 420 sq. m. *Rivers.* Portage, with Toussaint, Muddy, and Sugar creeks. *Surface*, level, and in the W. is the famous Black Swamp, covered with dense forests; *soil*, fertile. *Min.* Limestone. *Cap.* Fremont. *Pop.* (1897) 36,710. — A thriving commercial city, port of entry, cap. of Erie co., on Sandusky Bay, 5 m. from Lake Erie, and 110 N.E. of Columbus; *Lat.* 41° 27' N., *Lon.* 82° 45' W. The bay, 20 m. long and 60 broad, with an average depth of 12 feet, forms a commodious and safe harbor. The city, situated on an elevation overlooking the bay, is mostly built of stone or brick, and contains many elegant churches, dwellings, and warehouses. It is the terminus of two extensive lines of railway, and its commerce is rapidly increasing. *Pop.* (1897) 20,100. — Also, the name of three townships in Crawford, Richland, and Sandusky cos.

— A river rising on the boundary-line of Crawford and Richland cos., and flowing N. enters Sandusky Bay.

Sandusky, in Vermont, a post-village of Addison co., abt. 22 m. W.S.W. of Montpelier.

Sand'-wasp, *n.* (*Zool.*) See VESPARIE.

Sand'wich, *n.* A viand, or slight refection, consisting of two slices of bread and butter, with a thin slice of ham or other cold salt-meat placed between.

— *v. a.* To lay between other parts; to form an inner lamina; as, to sandwich the permanent way of a railroad, to sandwich a newspaper column.

Sandwich, a Cinque-port of England, co. of Kent, on the Stour, 2 m. from its mouth, and 65 m. S.E. of London. It was formerly a place of considerable importance, but is much decayed, mainly owing to the receding of the sea. *Pop.* 8,000.

Sandwich, in prov. of Ontario, a p.-v. and twp., cap. of the co. of Essex, on the Detroit River, opposite the city of Detroit, Michigan. — In Ill., a city of DeKalb co. *Pop.* (1897) 2,950. — In Mass., a post-township of Barnstable co., about 56 m. S.E. of Boston. — In N. H., a post-township of Carroll co., abt. 50 m. N. of Concord.

Sandwich (EDWARD MONTAGU), EARL OF, general and admiral, son of Sir Sidney Montagu, of Broughton, England, was born July 27, 1625, and in 1643 raised a regiment in the service of the Parliament, with which he distinguished himself at Marston Moor, Naseby, and the siege of Bristol. He sat in the House of Commons (1645-48), was a member of the "Little Parliament" and of the Council of State (1653), and in 1656 succeeded Penn — father of William Penn — as admiral. In 1657, England having joined France in war against Spain, he aided with the fleet to prevent the relief of 3 coast towns besieged by the French, and defeated the attempt of a great Spanish force to retake Mardike, one of these towns. After the death of Cromwell, Sandwich aided in the restoration of Charles II., conveyed him to England in the fleet under his command, and was, in reward, made Knight of the Garter, and afterward elevated to the peerage as Baron Montagu, Viscount Hinchinbroke, and Earl of Sandwich. He commanded the Blue Squadron in the war with the Dutch of 1664-65, in which he greatly distinguished himself. In a renewal of the war in 1672, he again commanded the Blue Squadron, and during the fight in Southwold Bay, May 28, his ship, the *Royal James*, was set on fire by the Dutch, whereupon he leaped overboard and was drowned. His body was recovered and buried in Westminster Abbey.

Sandwich (JOHN MONTAGU), FOURTH EARL OF, was born Nov. 3, 1718, and succeeded to the earldom in 1729. He was educated at Eton and Cambridge, and took an active part in politics as a supporter of Sir Robert Walpole. He was appointed plenipotentiary to the Congress at Breda, in 1746, and in 1748 became first Lord of the Admiralty, which he held till 1751, and again 1763-65 and 1771-82. Died April 30, 1792. He became famous as the inventor of the sandwich, the invention being due to his devotion to the gaming-table, the convenient layers of bread and meat enabling

Fig. 2302. — EGYPTIAN AND TURKISH SANDALS.

domain, it was customary among the Jews to deliver a sandal (*Ruth* iv. 7), as in our Middle Ages, a glove. Hence, the action of throwing down a shoe upon a region or territory, was a symbol of occupancy (*Ps.* lx. 10). It was undoubtedly the custom to take off the sandals on holy ground, in the act of worship, and in the presence of a superior. Hence the command to take the sandals from the feet under such circumstances (*Exod.* iii. 5; *Josh.* v. 15). This is still the well-known custom of the East — an Oriental taking off his shoe in cases in which a European would remove his hat. The shoes of the modern Orientals are, however, made to slip off easily, which was not the case with sandals, which required to be unbound with some trouble. This operation was usually performed by servants; and hence the act of unloosing the sandals of another became a familiar symbol of servitude (*Mark* i. 7; *Luke* iii. 16; *John* i. 27; *Acts* xiii. 25).

— *pl.* A kind of ladies' slippers, having ribbons tied criss-cross over the instep of the foot.

Sand'al, **San'dal-wood**, *n.* See SANTALUM.

Sandal'iform, *a.* Shaped like a sandal or slipper.

San'dal-wood Isle, an island of the Eastern Archipelago, in *Lat.* 10° S., *Lon.* 119° E. *Ext.* 120 m. long, and 60 m. broad in its widest part. The surface is generally mountainous, but fertile. *Prod.* Cotton, rice, coffee, sugar, maize, pepper, indigo, ebony, &c. *Chief towns.* Nangamessi and Padewawy. *Pop.* 1,000,000.

San'darac, **San'daraeh**, *n.* [Gr. *sandarakē*, realgar; Fr. *sandarac*.] A white brittle resin obtained from *Callitris quadrivalvis*, a tree growing in N. Africa. The powder of this resin is used in the manufacture of

him to satisfy his appetite without leaving the cards.

Sandwich Bay, an inlet of the coast of Labrador.

Sandwich Islands. See HAWAII.

Sand'-worm, *n.* A general name for any of the worms living in the sand of the seashore. There are many forms of these, mostly belonging to the order of *Chetopoda*, and having setae for organs of motion. The most important of the sedentary forms is the Lobworm of the fishermen. This is extremely abundant on the British shores and is highly valuable as bait. *Terebella conchilega* dwells in a tube, mostly composed of fragments of shell, examples of which are common on many beaches. There are, in addition, various wandering forms, which hide under stones or burrow deeply in the sands, of the genera *Nereis*, *Nephtys*, *Polynoe*, *Syllis*, &c.

Sand'-wort, (*-wurt*), *n.* (*Bot.*) See ARENARIA.

Sandy, *a.* [*A. S. sandig*] Abounding with, or full of, sand; consisting of, or containing, sand; covered or sprinkled with sand; as, a sandy desert, a sandy soil.—Of the color of sand; characterized by a yellowish-red color; as, sandy hair.

Sandy, a river of prov. of Ontario, entering Lake Superior 30 m. S. of Cape Chaillons.

Sandy, in *O.*, a twp. of Tuscarawas co.—A twp. of Stark co.—In *Oregon*, a p.-v. of Multnomah co., abt. 15 m. N.E. of Portland.

Sandy Creek, in *Ala.*, enters the Tallapoosa River a short distance W. of Dadeville.—Or **BIG SANDY**, in *Geo.*, flows into the Oconee River from Wilkinson co., at its S. E. extremity.—In *Geo.*, unites with Labor Creek in Morgan co.—In *N. Y.*, a p.-v. and twp. of Oswego co., abt. 47 m. N.W. of Rome.—In *N. Y.*, enters the N. end of Lake Ontario from Jefferson co.—Another, flows into Lake Ontario from Monroe co., abt. 20 m. N.W. of Rochester.—In *N. C.*, flows S. into Deep River, E. of Ashtaburgh.—In *Penna.*, a v. and twp. of Mercer co.—A v. and twp. of Venango co.—In *Penna.*, flows into the Alleghany River from Venango co.—In *Ohio*, rises in the E. part of the State, and flows S.W. into the Tuscarawas River at Bolivar.—In *Texas*, flows into Colorado R. from Gillespie co.—Another, flows S. into the Navidad R. from Jackson co.—In *Va.*, enters Banister R. at Meadville, Halifax co.

Sandy Hill, in *Md.*, a p.-v. of Worcester co., abt. 109 m. S.E. of Annapolis.—In *N. Y.*, a p.-v. of Washington co., on the Hudson, abt. 52 m. N.E. of Albany.

Sandy Hook, in *Conn.*, a p.-v. of Fairfield co., abt. 21 m. W.N.W. of New Haven.—In *Md.*, a v. of Washington co., on the Potomac, abt. 1 m. E. of Harper's Ferry.—In *N. J.*, a sandy beach at the entrance to New York Bay, 6 m. long and abt. 1 m. wide, with a fixed light 90 ft. high, at the N. point; Lat. $40^{\circ} 27' 3''$ N., Lon. $74^{\circ} 0' 48''$ W.—In *Va.*, a p.-v. of Rappahannock co., abt. 28 m. S. of Winchester.

Sandy Lake, in *Penna.*, a p.-twp. of Mercer co., abt. 12 m. N.E. of Mercer.

Sandy Neck, in *Mass.*, a light-house on the W. side of the entrance to Barnstable Bay; Lat. $41^{\circ} 44'$ N., Lon. $70^{\circ} 15'$.

Sandy River, in *Maine*, rises in Franklin co., and flows into the Kennebec in Somerset co.—In *Mich.*, rises in the W. part of the State, and enters Lake Michigan from Mason co.—In *Oregon*, rises in Clackamas co., and flows N.W. into the Columbia River from Multnomah co.—In *S. C.*, flows into Broad River from the S.W. of Chester dist.—Or **BIG SANDY RIVER**, in *W. V.* and *Ky.*, formed by the junction of the Tug Fork from Tazewell co., and the W. or Lonisa Fork from Russell co., *Va.*, and flows into the Ohio River, nearly opposite Burlington, in Ohio, after a N. course of 50 m.

Sandys, GEORGE, a famous early traveller and translator, was born in 1577, son of an archbishop of York, studied at Oxford, and began his travels in 1610. He journeyed by way of Venice to Constantinople, thence to Egypt and Palestine, returning by way of Sicily, Naples, and Rome. These travels gave rise to a series of geographical and ethnological volumes, written in an entertaining and often eloquent style. Later in life he translated Ovid's *Metamorphoses*, part of Virgil's *Aeneid*, and some books of the Scriptures, his verse being praised by Dryden, and deservedly so. He died in 1644.

Sandy Spring, in *Maryland*, a post-village of Montgomery co., about 30 m. W. S. W. of Baltimore.

Sandyville, in *Ohio*, a post-village of Tuscarawas co., abt. 112 m. E.N.E. of Columbus.

Sane, *a.* [*Lat. sanus*; Gr. *sōs*, *sōs*, safe and sound; Fr. *sain*.] Sound; whole; healthy; not disordered or shattered; as, a sane body.—Sound in mind; having the regular exercise of reason and the other faculties of the mind; not disordered in intellect; as, a sane person.

Sane'ness, *n.* State of being sane, or of sound mind.

San Felipe, a port of Central America, in Honduras, on Golfo Dulce River; Lat. $15^{\circ} 38'$ N., Lon. $89^{\circ} 1' 45''$ W.—In *Texas*, a p.-v. of Austin co., abt. 150 m. E.S.E. of Austin City.—In *Venezuela*, a town of the dept. of Caracas, 60 m. W.N.W. of Valencia.

San Felipe de Aconeagua, (*-da-a-kon-ka'gwa*), in *Chili*, a town, cap. of the prov. of Aconcagua, abt. 15 m. N. of Santiago; pop. 13,000.

San Felipe-de-Javita, (*-de-ha-ve'ta*), a town of Spain, prov. of Valencia, 43 m. from Valencia. *Manuf.* Woollen goods. Pop. 13,500.

San Fernan'do, a town of the Argentine Republic, 15 m. from Buenos Ayres; pop. 3,000.—In *Cal.*, a town of Los Angeles co., abt. 27 m. N.W. of Los Angeles.—In *Chili*, a town, cap. of the dept. of Colchagua, abt. 80 m. S. of Santiago.—In *Venezuela*, a town of the dept. of Caracas, abt. 130 m. W.N.W. of Calabozo.

San Fernan'do, SERRA DE DORADOS, a mountain of S. America, dividing the Brazilian prov. of Matto-Grosso from the Bolivian territory of Chiquitos.

Sau Fernando de Apure, (*-da-a-poo'ra*), a town of Venezuela, 70 m. S. of Calabozo; pop. 6,000.

San Francisco, (abbreviated *Frisco* by California usage), a city and seaport of the U. States, in *California*, (of which State it is the metropolis in point of size, wealth, and importance,) is situate on the S. promontory bounding the great Bay of San Francisco, and a little to the S. of the "Golden Gate" (Fig. 479), opening to the Pacific, in Lat. $37^{\circ} 48' 30''$ N., Lon. $122^{\circ} 27' 23''$ W. The city is built over a series of eminences of comparatively moderate elevation, but from which fine prospects of the bay and surrounding country are afforded. The growth of *S. F.* has been quite extraordinary. In the early part of 1848 it consisted only of a few rude shanties; whereas it is now, comparatively speaking, one of the chief American cities as regards the number and elegance of its public and domestic edifices. This transformation, as is well known, was the result of the discovery of the gold deposits in the beds of the tributaries of the San Joaquin and Sacramento rivers, which fall into her bay. Such, however, are the advantages of the location of the city, the spirit of enterprise of its inhabitants, and the fertility of the adjacent region, that even the exhaustion of gold-mining would not sensibly affect her growth, or the extent of her trade. Among the public edifices are the New City Hall, Custom House, U. S. Mint, Banks of California and of Nevada, Merchants' Exchange, Palace, Baldwin, and other fine hotels. The Palace hotel cost, including ground and furniture, \$3,250,000. A stone dry-dock, with capacity for a ship of 6,000 tons; these, together with handsome churches, theatres, public halls, gardens, parks, excellent libraries and reading-rooms, club-houses, and institutions established for science, literature, and benevolence. The city of *S. F.* is well governed; an efficient police system insures the public safety; fires are less frequent and destructive than in eastern cities; prostitution is less openly carried on; and gambling is of late years forbidden. The streets are dirty, it is true, and with the clouds of dust which, in blowing weather, sweep over the city like a sand-storm, form drawbacks which,

Fig. 2303. — MONTGOMERY STREET, (San Francisco.)

after all, are but slight in comparison with its many advantages. The principal business thoroughfare, Montgomery street, the fashionable promenade, is neat and handsome, with many fine edifices. The business streets are paved with cubical blocks and cobble-stones; others are planked, both in the carriage-way and sidewalk. Golden Gate Park contains over 1,000 acres; besides this are several small squares, and innumerable gardens attached to the houses of the citizens. Flowers and shrubs greet one's sight in every direction; so much, indeed, is this the case, that a recent enthusiastic traveller has declared that *S. F.* should be called the "City of Flowers." The climate is also everything that could be desired, being at once sunny and cool. The winter is like the spring of the Eastern States, showery, but delightful. *S. F.* is the centre of great wealth and the home of many millionaires. Many of the mines of gold, silver, quicksilver, and coal, the deposits of borax and sulphur, the quarries of granite, marble, trap, slate, and steatite, the mining and irrigating ditches, the quartz-mills and saw-mills, the vineyards, farms, orchards, and ranches, from Arizona to Idaho, and from the Pacific to the Rocky Mountains, are owned here. The city possesses large manufacturing interests, its various establishments having an annual product of about \$45,000,000 and employing 20,000 workmen. They comprise large sugar refineries, iron foundries, rolling mills, and machine shops, in which steam-engines of the largest size are made; also extensive ship-yards, in which vessels of the largest size are built, rope-walks, door and sash factories, and manufactures of glass, flour, furniture, clothing, tinware, &c. The gross value of the annual product is nearly \$100,000,000, of which about one-fifth is the value of refined sugar, while that of metal-work foots up one-fourth of the total.—*Com.* The bay of *S. F.* has a narrow entrance, but within it expands to one of the noblest basins that is anywhere to be met with, having a coast-line of about 275 miles. The city has become the seat of a very extensive foreign commerce, and is now the great emporium of the U. S. on the Pacific seaboard. A large number of ocean steamers run from the port of *S. F.* in regular lines to Hawaii, Japan, Australia, Panama, Mexico, &c., with coast lines to Puget Sound and all intervening ports. A large stone dry-dock and floating docks give abundant facilities for repairs, while the tidal rise is so slight that vessels can always load and discharge at the wharves. There is a large wheat and lumber export trade, the former to the value of \$6,000,000, the latter of \$20,000,000 yearly. More than 1,000,000 tons of shipping annually enter the harbor. Pop. (1897) 349,650.

San Francis'co, in *California*, a W. co., bordering on the Pacific, having N. and E. San Francisco Bay, and S. San Mateo; area, 50 sq. m. Surface, diversified; soil, fertile. *Min.* At one time there was considerable gold found within the limits of this county, but the deposits were long ago exhausted. *Cap.* San Francisco, with which city the co. is coextensive.

San Francisco, a port on the S.W. coast of California; Lat. $30^{\circ} 45'$ N., Lon. $113^{\circ} 40'$ W.

San Francisco, in *Minnesota*, a village and township of Carver co., abt. 35 m. S.W. of St. Paul.

San Francisco, (*-fran-sis'ko*), a village of N. Peru.

San Francisco, (Bay of), an inlet of the Pacific, in *California*, between Lat. $37^{\circ} 30'$ and $38^{\circ} 8'$ N., Lon. 122° and $122^{\circ} 30'$ W. *Extent*, 55 m. long from N.W. to S.S.E.; breadth varying from 2 to 12 m. The entrance to the bay, called the *Golden Gate* (Fig. 479), is very picturesque; the shores are bold and rocky; and the channel in its narrowest part is but 1 m. wide.

San Francisco de la Montaña, a town of the Republic of Colombia, department of Istmo, on the Isthmus of Panama, N. E. of Santiago. Pop. (1897) 6,160.

Sang, *imp.* and *pp.* of SING, *q. v.*

Sau Gabriel, an island of the Argentine Republic, in the estuary of the Plata, abt. 22 m. N.E. of Buenos Ayres; Lat. $34^{\circ} 30'$ S., Lon. $57^{\circ} 58'$ W.

Sau Gabriel, in *California*, a post-village of Los Angeles co., abt. 8 m. E. of Los Angeles.

—A town of Los Angeles co., abt. 18 m. N.E. of Los Angeles.

Sau Gabriel, in *Texas*, a river rising in the W. of Williamson co., and flowing E. into Little River, a short distance S.W. of Cameron in Milan co.

San Gabriel River, in *California*, enters the Pacific Ocean from Los Angeles co.

Sau'gamon, a river of W. Illinois, formed in Sangamon co. by the junction of its N. and S. branches, and falls into the Illinois River, 10 m. N. of Beardstown, after a W. course of 200 m. It is navigable for small steamboats during high water.

Sau'gamon, in *Illinois*, a S.W. central co.; area, 750 sq. m. Rivers, Sangamon and S. Fork; also, Sugar, Lick, Brush, and Spring creeks. Surface, level, and mostly prairies; soil, fertile. *Min.* Coal. *Cap.* Springfield. Pop. (1897) 63,400.

Sangaree, *n.* [*Sp. sangria*, a drink.] A West Indian term for wine and water sweetened and spiced; negus.

Sau'gerfield, in *New York*, a post-village and township of Oneida county, about 15 miles south-south-west of Utica.

Saugerhausen, a town of Prussian Saxony, at the foot of the Hartz Mountains, 33 m. W.N.W. of Merseburg. *Manuf.* Woollens and linens. Pop. 7,283.

Sang'-froid, (*sang'-froid*), *n.* [*Fr.*, cold blood.] Cool-bloodedness; freedom from agitation or perturbation of the spirits; presence of mind; lack of ardor or violent emotion; apathetic indifference.

San Ger'man, a town of the W. Indies, on the S.W. of the island of Porto Rico; pop. 9,125.

San Geronimo, (*ha-ron'-ne-mo*), a small river of California, which enters the Pacific from Marin co.

San Geron'imo, a town of the Republic of Colombia, about 16 m. S. E. of Antioquia.

San Geronimo, a village of Mexico, about 15 m. S. W. of the city of Mexico.

Saugerville (*sang'-gher-vil*), in *Maine*, a post-township of Piscataquis county, about 70 miles N. N. E. of Augusta.

San Gil, or **Saint Giles** (*san'-heel'*), a town of the Republic of Colombia, department of Boyaca, about 64 m. S. W. of Pamplona. Pop. (1897) 7,170.

Sau'gir, an island of the Eastern Archipelago; Lat. $3^{\circ} 28'$ N., Lon. $125^{\circ} 44'$ E.

San Gorgonio, (Monnt.) in *California*, San Diego co.; Lat. $33^{\circ} 48'$ N., Lon. $116^{\circ} 40'$ W. Height, 7,000 ft.

Sau'giac, *n.* Same as SANDJAK, *q. v.*

Sau'giacate, *n.* A division of a Turkish province or pashalic.

Sau'grealis, SANGREAL, or SAINT GRAIL. [The Holy Cup or Grail, said to be from Mod. Lat. *gradale*, a cup; but supposed by some to be a corruption of the Old Fr. *le Sang Real*, i. e., the true blood of Christ.] This sacred relic, preserved in an emerald cup, is said in legendary history to have been brought to England by Joseph of Arimathea. According to the romantic story of King Arthur, it could only be discovered by one possessed of perfect virtue; and the "Quest of the St. Grail" by the Knights of the Round Table, of whom the perfect champion, Sir Galahad (in other legends *Perceval*), was favored by its discovery, is narrated therein at great length.

Sanguif'erous, *a.* [*Lat. sanguis*, blood, and *ferre*, to bear.] Conveying or imparting blood; as, the *sanguiferous* vessels.

Sanguiferous vessels. (*Anat.*) The arterics, veins, and capillaries.

Sanguifica'tion, *n.* [*Fr.*] (*Physiol.*) The conversion of the chyle into blood.

Sanguif'er, *n.* That which produces blood.

Sanguifluous, *a.* Running or flowing with blood.

Sanguify, *v. n.* [*Fr. sanguifier*.] To produce blood.

Sanguina'ria, *n.* [*Lat. sanguis*, blood, because used to stop hemorrhage.] (*Bot.*) A genus of plants, order *Papaveraceae*. The most interesting species is *S. canadensis*, the Puccoon, a native of N. America. Its root, often called *blood-root*, from its containing a red juice, is used internally in large doses as an emetic and purgative, and in small doses as a diaphoretic and expectorant. When applied externally, it is said to exhibit marked escharotic properties, and has been tried combined with chloride of zinc as an application to check cancerous growths.

Sanguinarily, *adv.* In a sanguinary or blood-thirsty manner.

Sanguinarity, *n.* State or quality of being sanguinary.

Sanguinary, (*sang'gwī-nar'ē*), *a.* [Fr. *sanguinaire*; Lat. *sanguinarius* — *sanguis*, blood.] Bloody; murderous; causing, or attended with, much bloodshed; as, a sanguinary war. — Bloodthirsty; savage; cruel; eager to shed blood; as, a sanguinary tyrant.

Sanguine, (*sang'gwīn*), *a.* [Fr. *sanguin*.] Red; crimson; having the color of blood; as, sanguine streamers. (*Dryden*.) — Abounding with blood; plethoric; characterized by full and active circulation of the blood; as, a sanguine constitutional temperament. — Ardent; warm; animated; lively; as, a sanguine temper. — Confident; hopeful; anticipating the best; not diffident or desponding; as, to be sanguine of success.

Sanguinely, *adv.* In a sanguine or ardent manner; confidently; with lively anticipation of success; as, he looks forward quite sanguinely.

Sanguineness, *n.* State or quality of being sanguine; redness; plethora; ardor; warmth of temper; confidence; hopefulness.

Sanguineous, *a.* [Lat. *sanguineus*.] Sanguine; plethoric; abounding with blood; as, a sanguineous habit of body. — Of the nature of blood; relating to, or consisting of, blood. — Constituting blood; as, sanguineous particles. — Of a red or blood color; crimson; as, a sanguineous tint.

Sanguivorous, *a.* [Lat. *sanguis*, blood, and *vorare*, to gorge.] Eating or subsisting on blood, as leeches.

Sanguinolency, *n.* State of being sanguinolent.

Sanguinolent, *a.* [Fr., from Lat. *sanguinolentus*.] Bloody; tinged or commixed with blood.

Sanguisorba, *n. pl.* (*Bot.*) An order of plants, alliance *Rosales*, usually combined with *Rosaceae*, but separated by Lindley on account of the constantly apetalous flowers, indurated calyx, and solitary or almost solitary carpels. Their general character is that of astringency. The *Sanguisorba officinalis*, or Burnet (*Fig. 2304*), is sometimes grown as a pasture plant.

Sanguisuge, (*sang'gwī-sūj*), *n.* [From Lat. *sanguis*, and *sugere*, to suck; Fr. *sangsue*.] (*Zoöl.*) The horse-leech. See *LEECH*.

Sanhedrim, *n.* (*Jewish Hist.*) The highest judicial tribunal among the Jews, consisting of 71 members, including the high-priest. Its origin is referred by some writers to the institution by Moses of a council of 70 persons on the occasion of a rebellion of the Israelites in the Wilderness. According to the Talmudists, they assembled in a chamber within the precincts of the temple; but according to Josephus, it was in a room on the east side of Mount Zion, not far from the temple; and at the trial of Christ we read that they assembled in the high-priest's house. The authority of this council was very extensive. It decided on all the great affairs of the nation, and it was also a court of appeal from inferior tribunals. The right of judging in capital cases and pronouncing sentence of death belonged to this court alone. In the time of Christ, its power had been much limited by the interference of the Romans. It still retained the right of passing sentence of death, but the power of executing it rested with the Roman procurator.

Sanicle, *n.* (*Bot.*) The Sanicle, a genus of plants, order *Apiaceae*, having the umbel nearly simple; rays few, with many-flowered, capitate umbellets; involucre of few, often cleft leaflets; involucre of several, entire.

Sanies, *n.* [Lat.] (*Med.*) A thin, unhealthy, serous discharge from wounds or sores.

Sanilac, in *Michigan*, an E. co., bordering on Lake Huron; area, abt. 950 sq. m. *Rivers*, Cass, Black, and North Fork of Cass River. *Surface*, undulating; *soil*, moderately fertile. There is a great abundance of pine, sugar-maple, and other trees. *Cap.* Sanilac Center. *Pop.* (1894) 33,944.

—A township of the above co., on Lake Huron.

San Idefonso, (*-el-da-fon'so*), a group of islands, in the S. Atlantic, abt. 80 m. W. of Cape Horn.

Sanious, *a.* [Fr. *sanieux*.] Pertaining, or relating, to sanies; thin and serous, and slightly tinged with blood; as, the sanious discharge of a sore. — Effusing a thin, unhealthy, serous, reddish pus; as, a sanious ulcer.

San Isidro, (*-e-se-dro*), a town of the Argentine Republic, abt. 12 m. E. of Buenos Ayres; *pop.* abt. 1,200.

Sanitarist, *n.* One who advocates, or carries into effect, measures of sanitary reform.

Sanitarium, *n.* [Lat.] A health station; as, a sanitarium for invalids.

Sanitary, *a.* [Fr. *sanitaire*, from Lat. *sanitas* — *sanus*.] Pertaining to health; having reference to sanity, or to the promotion and preservation of health; hygienic; as, sanitary rules.

—*n. S. science.* That department of human knowledge which regards the laws of the human body, and of the agents by which it is surrounded, with a view to the preservation of health and the warding off of disease and death. The practical application of these laws constitutes *hygiene*, or the art of preventing disease. This is commonly divided into *public* and *private* hygiene, the former having regard to the healthy condition of persons in communities, in camps, barracks, work-houses, &c.; the latter to the health of individuals.

Sanity, *n.* [Fr. *santé*, from Lat. *sanitas* — *sanus*.] Quality or condition of being sane in body or mind; soundness of the intellectual faculties; especially, the state of mind in the perfect exercise of reason; sanity; — correlative to *insanity*; as, doubts are entertained of his sanity.

San Jacinto, (*ha-seen'to*), a river of Texas, rising in the W. of Walker co., and flowing into Galveston Bay, 25 m. E. of Houston. — A village of Harris co., abt. 18 m. E. of Houston; *pop.* abt. 511. Here was fought, in 1836, the battle of San Jacinto, which insured the independence of Texas. See *HOUSTON*, (*SAM*).

San Jaime, (*-hi'ma*), a town of Venezuela, dept. of Apure, abt. 30 m. N.N.W. of San Fernando de Apure; *pop.* 7,000.

San Joaquin, (*-ho-a-keen*), an important river of California, rises in the Sierra Nevada Mountains, and after a general N.W. course of 350 m., for two-thirds of which it is unavigable, joins the Sacramento abt. 30 m. E. of Martinez; Lat. 38° 10' N., Lon. 120° 50' W. — A N. W. central co.; area, 1,380 sq. m. *Rivers*, Mokelumne, San Joaquin, and Calaveras. *Surface*, generally level; *soil*, fertile. *Min.* Gold. *Cap.* Stockton. *Pop.* (1897) 29,800. — A town of San Joaquin co., about 77 m. S. E. of San Francisco.

San Joaquín, a village of Paraguay, about 100 m. E. N. E. of Assumption.

San Jorge (*-hor'ha*), a river of the Republic of Colombia, which, after a N. E. course of 180 m., joins the Cauca, 30 m. S. W. of Mompox.

San Jorge D'Olancho, (*-hor'ha do-lan'cho*), a town of Central America, in Honduras, abt. 80 m. S.S.W. of Truxillo.

San José, (*-ho'sā*), an island in the Gulf of California, abt. 100 m. S.E. of Loreto.

San José, a town of Bolivia, prov. of Chiquitos; Lat. 17° 40' S., Lon. 64° 40' W.; *pop.* 2,000.

San José, in California, a city and township, cap. of Santa Clara co., on the Guadalupe River, abt. 51 m. S.S.E. of San Francisco; Lat. 37° 24' N., Lon. 121° 54' 30" W. *Pop.* 20,000.

San José, one of the Pearl Islands of the Republic of Colombia, in the Bay of Panama, department of Istmo, about 8 m. S. W. of the island of Rey.

San José, an island in the Rio Negro, on the boundary line between Brazil and Venezuela.

San José del Interior, (*-een-ta-re-or'*), in Central America, a town, cap. of the state of Costa Rica, abt. 15 m. W.N.W. of Cartago; *pop.* 18,000.

San José del Parral, a town of Mexico, in Durango, abt. 200 m. N.W. of Durango; *pop.* 5,000.

San José de Orma, (*-da o-roo'na*), a town and former cap. of the island of Trinidad, abt. 5 m. E. of Port-of-Spain.

San Juan, (*-hoo-an'*), a navigable river of Central America, in Nicaragua, formed by the surplus waters from Lake Nicaragua, which it discharges into the Caribbean Sea, at the port of San Juan, 80 m. S. of the mouth of Bluefields River, after an E. course of abt. 100 m.

San Juan, a river of Bolivia, prov. of Chiquitos, an affluent of the Aguapehi.

San Juan, a river of Bolivia, which joins the Pilcomayo, abt. 80 m. S.S.E. of Sinti, after a S.E. course of 300 m.

San Juan, a river of Mexico, rises in Cohahuila, and joins the Rio Grande del Norte abt. 120 m. from its mouth, after an E. course of 150 m.

San Juan, a river of the Argentine Republic, rises in the Andes, and flows E. into Lake Guanacache.

San Juan, a river of the Republic of Colombia, dept. of Cauca, flows into the Pacific, by several mouths, about 35 m. N. W. of Buenaventura, after a S. W. course of 150 m.

San Juan, a town of Cuba, abt. 15 m. S.S.W. of Havana. — Also, a town, about 42 m. W.N.W. of Santiago de Cuba.

San Juan, a town of Peru, province of Chachapoyas, on San Juan river. *Pop.* 18,000.

San Juan, a town of the island of Hayti, about 80 m. N. W. of San Domingo.

San Juan, in California, a post-village and township of San Benito co., about 42 m. S. E. of San Jose.

San Juan Bautista, or BAPTISTA DEL RIO GRANDE, a town of Mexico, about 85 m. N. N. E. of Cohahuila.

San Juan Bautista, or BAPTISTA, formerly *Villa Hermosa*, a town of Mexico, cap. of Tabasco, on the river Tabasco, abt. 70 m. from its mouth in the Caribbean Sea.

San Juan Bautista, or SAN JUAN BAPTISTA DEL PAO, a town of Venezuela, department of Caracas, about 110 m. S. W. of Caracas.

San Juan Cape, the N. E. extremity of the island of Porto Rico, West Indies. — Also, the most S. point of Vancouver's Island, in British North America.

San Juan Capistrano, in California, a town of Orange co., about 32 m. S. E. of Los Angeles.

San Juan Chitame'ea, a town of Central America, in San Salvador, about 15 m. N. of San Miguel.

San Juan de Fuca, an island of British North America. See *FUCA*, STRAIT OF.

San Juan de la Frontera (*-fron-ta'ra*), a W.

prov. of the Argentine Republic, between Lat. 30° and 32° S., Lon. 65° and 70° W., having N. the prov. of Rioja, S. Mendoza, and W. the Andes. *Cap.* San Juan. *Pop.* 25,000.

San Juan de los Llauros, (*-da loce la'noce*), a town of the U. S. of Colombia, dept. of Cundiuamarca, abt. 65 m. S.S.E. of Bogotá.

San Juan de los Remedios, (*-da loce ra-ma'de-oce*), a seaport-town on the N. coast of Cuba, abt. 180 m. E. of Havana; *pop.* 6,000.

San Juan del Rio, (*-ree'o*), a town of Mexico, in Queretaro, abt. 30 m. S.E. of Queretaro; *pop.* abt. 10,000.

San Juan del Sur, (*-soor*), a seaport of Nicaragua, on the Pacific, about 24 m. S.W. of Nicaragua; Lat. 11° 15' 37" N., Lon. 85° 52' 56" W.

San Juan de Nicaragua, SAN JUAN DEL NORTE, or GREYTOWN, a seaport-town of Nicaragua, in Mosquito Territory, at the mouth of the San Juan, in the Caribbean Sea; Lat. 10° 55' N., Lon. 83° 43' W. Its harbor is one of the finest on the coast.

San Juan de Porto Rico, (*-por'to ree'ko*), the principal city and seaport of the island of Porto Rico, on an island off its N. coast; Lat. 18° 29' N., Lon. 66° 7' 2" W. It is strongly fortified, one of the healthiest towns of the W. Indies, and is the seat of government and of the superior courts of the island. *Pop.* 11,000.

San Juan de Ulloa, (*-da oo-loo'a*), a strong castle or fort of Mexico, defending the harbor of Vera Cruz, on a small island N.E. of the city.

Sank, *imp.* of SINK, *q. v.*

San Loreu'zo, a small island in the Gulf of California.

San Lorenzo, a river of the Argentine Republic, which joins the Vermejo, abt. 55 m. N. of Corrientes, after an E. course of 120 m.

San Lorenzo, a town of the Argentine Republic, abt. 32 m. S.E. of Santa Fé.

San Leau'dro, in California, a post-village, former cap. of Alameda co., about 20 m. S.E. of San Francisco. *Pop.* about 700.

San Loren'zo, in California, a post-village of Alameda co., abt. 3 m. S.E. of San Leandro.

San Lorenzo de la Frontera, a town of Bolivia, on the Guapey, a short distance from Santa Cruz de la Sierra; *pop.* 4,000.

San Lu'car, a seaport-town of Spain, prov. of Cadiz, 14 m. N.W. of Cadiz; *pop.* 17,000.

San Luis, or SAN LUIS DE LA PUNTA, (*-loo'is da la-poon'ta*), in the Argentine Republic, a city, cap. of the prov. of San Luis, 2,417 feet above the sea, abt. 423 m. W.N.W. of Buenos Ayres; *pop.* 1,500.

San Luis de la Paz, a town of Mexico, in Guanajuato, abt. 45 m. E.N.E. of Guanajuato.

San Luis Obispo, (*-o-bee'spo*), in California, a S.W. co. bordering on the Pacific Ocean, having N. Monterey, E. the Coast Mountains, and S. Santa Barbara; area, 3,404 sq. m. *Surface*, level in the N.E., and mountainous in the S.E.; *soil*, fertile. *Rivers*, San Buenaventura and Nacimiento rivers. *Products*, The usual cerealia, grapes, and fruits. *Min.* Copper, sulphur, and limestone. *Principal ports*, San Luis Obispo (the cap.) and San Simeon. *Pop.* (1897) 18,950.

—A city, cap. of the above co. *Pop.* (1897) 3,340.

San Luis Potosi, a state of Mexico, having N. New Leon, E. Tamaulipas, S.E. and S. Vera Cruz, Queretaro, and Guanajuato, and W. Zacatecas; area, 29,486 sq. m. *Rivers*, Santauder, and Panuco or Tampico rivers. *Surface*, mountainous in the W., and in the E. and S.E. undulating; *oil*, generally fertile. *Prod.* Maize, wheat, and barley. *Manuf.* Woollen and cotton fabrics, glass, pottery, leather, and metallic wares. *Cap.* San Luis Potosi. *Pop.* abt. 394,592. — A city, cap. of the above dept., at the source of the Tampico, 70 m. N.N.E. of Guanajuato. The houses are mostly built of stone, and there are several splendid churches and a fine government house. It has an active trade with the neighboring depts., principally in foreign imports. *Pop.* 40,000.

San Luis Rey, in California, a post-town of San Diego co., abt. 84 m. S.E. of Los Angeles.

San Marcos, in Texas, a river rising in the N. of Comal co., and flowing S.E. into the Guadalupe N.W. of Gonzales. — A post-town, cap. of Hayes co., about 30 m. S. S. W. of Austin.

San Mar'ino, a state of Italy. See *MARINO*.

San Martín, (*mar-teen'*), in the Argentine Republic, a village of the prov. of Cordova, 30 m. E.S.E. of Cordova; *pop.* 2,000.

San Mateo, (*-ma-ta'o*), in California, a W. co., bordering on the Pacific, having E. and N.E. the Bay of San Francisco; area, 460 sq. m. *Surface*, diversified by hills and valleys; *soil*, fertile in the valleys. *Products*, Wheat, hay, lumber, and cattle. *Climate*, mild and healthy. *Cap.* Redwood City. *Pop.* (1897) 12,150.

—A post-village of the above co.

San Mateo, in Venezuela, a town of the dept. of Cumana, 50 m. S.S.W. of Cumana; *pop.* 7,000.

San Miguel, (*me-ghe'l*), in Central America, a town of San Salvador, 80 m. E.S.E. of San Salvador. It is an old but well-built town, and has a considerable trade in indigo. *Pop.* 10,000.

San Miguel, in Bolivia, a town of the prov. of Chiquitos, 160 m. N.E. of Santa Cruz de la Sierra; *pop.* 3,000.

San Miguel, a town of Brazil, prov. of Parahyba, abt. 35 m. N. of Parahyba.

San Miguel, a town of Brazil, prov. of Rio Grande do Sul, abt. 150 m. W.N.W. of Porto Alegre; *pop.* 1,000.

San Miguel, in California, a town of San Luis Obispo co., abt. 156 m. S.S.E. of San Francisco.

Sau Miguel, in New Mexico, a N. co., E. of Santa Fé. *Rivers*, Pecos and Canadian rivers. *Surface*, diversified; *soil*, generally fertile. *Prod.* Corn and wheat. *Cap.* Las Vegas.

Fig. 2304. — GREAT BURNET, (Sanguisorba officinalis.)
a, a leaf; b, spikes of flowers; c, a flower.

San Miguel, in Texas, a river of Medina co., which flows S.E. into Rio Frio.

San Miguel, a gulf of the U. S. of Colombia, in the Isthmus of Darien, on the E. side of the Bay of Panama; Lat. 8° 10' N., Lon. 78° 20' W.

San Miguel-el-Grande, in Mexico, a town of the dept. of Guanajuato, 40 m. E. of Guanajuato; pop. 3,000.

San Nicholas, a city of the Argentine Republic, abt. 120 m. N.W. of Buenos Ayres; pop. 3,000.

San Pablo, in California, a bay connected by the Straits of Karquenas with Suisun Bay. — A post-village of Contra Costa county, about 15 miles N.N.E. of San Francisco.

San Pasqual, (*pas'kwál*), in California, a village of San Diego co., abt. 97 m. S.E. of Los Angeles.

San Patricio (*pa-tree'-se-o*), in Texas, a S. co., bordering on the Gulf of Mexico; area, 630 sq. m. Rivers. Arkansas and Nueces rivers. Surface, generally level, soil, fertile. Cap. Sinton. Pop. (1897) 1,980.

—A post-town, former cap. of the above co., on the Nueces river, about 20 m. N.W. of Corpus Christi.

San Paulo, a town and prov. of Brazil. See SÃO PAULO.

San Pedro, (*pa'dro*), a town of the Argentine Republic, abt. 190 m. N.N.E. of Buenos Ayres; pop. 1,200.

San Pedro, a town of Bolivia, on the Mamore River; Lat. 14° S., Lon. 64° 48' W.

San Pedro, in Mexico, a river rising in the dept. of Tabasco, and joining the Usumasinta near its confluence with the Tabasco.

San Pedro, a town of the Republic of Colombia, dept. of Cundinamarca, about 25 m. S.E. of Antioquia.

San Pedro, in California, a post-town and port of Los Angeles, Lat. 33° 45' N. It has a good anchorage.

San Pedro Bay, in California, an inlet of the Pacific Ocean, abt. 105 m. S.E. of Santa Barbara; Lat. 33° 45' N., Lon. 118° W.

San Pedro y San Pablo, (*Rio de*), in Mexico, enters the Caribbean Sea abt. 10 m. N.E. of Tabasco.

San Pete, in Utah, a central co.; area, 1,784 sq. m. Surface, Wahsatch Mountains in the W., fertile valleys in the E.; good timber. Cap. Manti. Pop. (1895) 15,538.

San Quentin, in California, a post-village of Marin co., abt. 15 m. N. of San Francisco.

San Rafael, in California, a post-village and township, cap. of Marin county, about 16 miles N. of San Francisco.

Sans. A Latin preposition denoting without; wanting; destitute of.

"Sans teeth, sans eyes, sans taste, sans everything."—Shaks.

San Saba, a river of Texas, which flows E. into the Colorado River from Bexar co. — A central co.; area, 925 sq. m. Rivers. Colorado and San Saba rivers. Surface, undulating; soil, generally fertile. Cap. San Saba. Pop. (1897) 7,120. — A post-village, cap. of the above co., about 92 m. N.W. of Austin.

San Salvador, a republic of Central America, consisting of a strip of territory stretching along between Honduras and the Pacific Ocean; bounded on the W. by Guatemala, and on the E. by Fonseca Bay, which separates it from Nicaragua. It averages 180 m. in length, by about 40 in breadth; area, 7,230 sq. m. The N. frontier is formed by a portion of the great Cordillera chain, and parallel to this range, and between it and the Pacific sea-board, runs another range of mountains along the whole length of the country, breaking it up into an inland valley, with a long, low, rich belt along the coast. This central range is highly volcanic in character, and has 16 volcanic peaks, ranging in height from 7,386 to 4,000 feet high. S. S. possesses numerous lakes, the largest of which is Guiza, about 90 m. in circumference, and abounding in fish. The greater portion of the interior valley, and the alluvial strip lying along the coast, are of extreme fertility, and agriculture is extensively and successfully practised, to the almost total exclusion of pastoral pursuits. The principal agricultural products are indigo, sugar, and maize; cotton, also, being successfully cultivated in the districts around La Libertad and the Bay of Jiquilisco. The coast from Acajutla (30 m. from the W. frontier) to La Libertad is known as the *Costa del Balsamo*, or Balsam Coast, as in the woods of this district is produced the famous balsam known as "Balsam of Peru," in such quantities that from 17,000 to 22,000 lbs. av. are annually exported. The commercial intercourse of S. S. is chiefly with the U. S. and Great Britain. In 1897, the value of imports was abt. \$2,000,000, and of exports, abt. \$6,600,000. The staple articles of export are coffee (60 per ct.), indigo, known commercially as "indigo of Guatemala," reckoned the finest of any (30 per ct.), sugar, dye-stuffs, turpentine, cocoa, and spices. The climate of S. S. is salubrious, and the temperature lower than might be expected from the low latitude and general want of elevation of the country. The population is composed of whites (of Spanish origin), Indians, *Ladinos* (of mixed white and Indian blood), negroes, and mulattoes. The whites form little more than one-fifth, the Indians one-third. The Indians are of the Aztec race, speak the Spanish language, profess the Roman Catholic religion (the one established by statute), and hold the rights of citizens. The government is carried on by a president, vice-president, and two ministers, one for foreign affairs and finance, and the other for internal business and war. The legislature consists of two chambers, an upper one of 12 senators, and a lower of 24 representatives. Education is well provided for, every village of 50 inhabitants being bound by law to support a school, and there is a university in the capital, San Salvador (*q. v.*), which is well endowed by the state. S. S., originally called *Cuzcatlan*, "the land of riches," is said to have been, previous to the immigration of Europeans, the best peopled and most civilized country in America. It was conquered

after a long and obstinate contest by Pedro de Alvarado, a lieutenant of Cortez, and under the Spanish rule was one of the most flourishing portions of the Guatemalan kingdom. In 1821, it threw off the yoke, joined the Mexican Confederation, from which it seceded in 1823, and finally became an independent state.

SAN SALVADOR, the cap. of the above republic, was founded in 1559. It was the cap. of the Union of Central America from 1821 till 1839. In 1854, it was a fine, well-built city, adorned with numerous splendid buildings, and containing a pop. of more than 30,000; but on the night of April 16th, it was completely destroyed by an earthquake, and about 100 lives lost. In Jan., 1855, it again became the capital, and its trade once more flourishing. March 19, 1873, it was again destroyed by earthquake, with great loss of life, but one building left standing. The first R.R. was begun in 1882.

San Salvador, GUANAHANI, or CAT ISLAND, one of the Bahama Islands, in the West Indies, 28 m. S.E. of Eleuthera; Lat. 24° N., Lon. 75° 30' W., 46 m. long, and 5 broad. It was the first part of America discovered by Columbus, Oct. 12, 1492.

San Salvador, or **Ban'za**, a town of Africa, in S. Guinea, cap. of Congo, abt. 160 m. S.E. of Loango; pop. 20,000.

San Salvador de Bayamo, (*-ba-a'mo*), a town of Cuba, abt. 78 m. N.W. of Santiago; pop. 14,000.

San Salvador Pequena, (*pa-ka-na*), an island of Cuba, W. of the above town.

San Salvatore, (*sal-va-to'ra*), a town of N. Italy, 7 m. N.W. of Alessandria; pop. 6,521.

Sansanding, a town of Central Africa, in Bambarra, on the Niger, 20 m. N.E. of Sego; pop. 11,000.

Sans-culotte, (*sông-ku-lôt'*), *n.* [Fr., without breeches.] (*Fr. Hist.*) A term first applied in derision by the aristocrats to the popular party in France at the beginning of the Revolution of 1789; and, as in several cases of a like kind, it came afterwards to be regarded by them as a title of honor. In the republican calendar, the five supernumerary days (each month having only 30 days, and therefore making 360 in the twelve) were at first called *jours sans-culottides*.

—Hence, by implication, a red-republican; a Jacobin; a rabid revolutionist; a bloodthirsty demagogue.

Sans-culotism, *n.* [Fr. *sansculottisme*.] Principles or practice of the *sans-culottes*; rabid revolutionary doctrines; red-republicanism.

San Sebastian, the cap. town of the island of Gomera, in the Canaries, on the S. coast. It is well built, and has a harbor defended by several forts. Pop. 2,000.

San Sebastian de los Reyes, (*-sa-bas-tean' da-loe-ra'es*), a town of Venezuela, prov. of Caracas, abt. 50 m. S.S.W. of Caracas.

San Severo, (*-sai-rai'ro*), a town of S. Italy, prov. of Capitanata, 16 m. N.E. of Foggia; pop. 18,000.

Sanskrit, *Sans'crit*, *n.* The name of the ancient, and now literary, language of the Hindoos. Originally a vernacular dialect in Hindostan, it has for nearly or quite 2,000 years past been kept artificially in use, like the Latin in Europe, by the labors of grammarians and lexicographers, and the transmitted usages of an educated caste, to serve as the means of learned intercourse and composition. Its name (*Sanskṛta*, completed, perfected), denotes it as "the cultivated, elaborated, and perfected form of speech," in distinction from the uncultivated dialects, called *Pracrit* (*prākṛta*, left in the natural condition), which sprang from, or were contemporaneous with, it. It was brought into India from the N.W. by tribes belonging to the Aryan branch of the Indo-European family, and having for their next of kin the Iranians, who spoke dialects which were the ancestors of the modern Persian languages. Syntax is a branch of the grammar of very inferior interest in Sanskrit. Whatever expressiveness and rhetorical charm the language has, lie chiefly in its boundless wealth of epithets, and not at all in the construction of its sentences and periods; indeed, a period in Sanskrit is next to an impossibility. The formation and connection of its clauses are of the boldest simplicity. The excessive use of cumbrons compounds is also a very general fault in Sanskrit construction, appearing in all styles of composition, but especially the more artificial. To say, for instance, "Water-play-delighted-maiden-bathing-fragrant (river-breezes)," for "Made fragrant by the bathing of maidens delighted with sporting in the water," is a virtual abnegation of the privileges of an inflected language, and a partial retrogradation to the stiff inexpressiveness of the Chinese. — See HINDOSTAN (LANGUAGES OF).

Sans-sonci, (*sông-sôo-see'*), *adv.* Free and easy; harum-scarum; devil-me-care; happy-go-lucky.

San'ta, a river of N.W. Peru, which flows into the Pacific Ocean, after a N.W. course of 200 m. Opposite its mouth, in Santa Bay, are the islets of Santa.

San'ta, or **Parilla**, (*pa-reel'ya*), a town of N.W. Peru, on the Santa, abt. 65 m. S.E. of Truxillo.

San'ta Anna, ANTONIO LOPEZ DE, ex-president of the republic of Mexico, b. in Xalapa, 1798. At the outset of his career, he served in the Spanish army, in which he attained the grade of lieutenant-colonel in 1821; but, in the following year, while stationed at Vera Cruz, he joined the movement inaugurated by Iturbide, which resulted in the total defeat of the Spanish forces, and the reduction of the whole of that province. He next turned his arms against, and overthrew, Iturbide, who had proclaimed himself emperor. The Mexican republic was shortly afterwards formed, and from that period until the year 1833, when he succeeded in himself obtaining the presidency of the republic, S. A. was engaged in opposing or defending, at the head of the

Mexican troops, the claims of rival chiefs. He maintained his position as president until 1836, when he was defeated and taken prisoner at San Jacinto by his political opponents. Liberated in 1837, he participated in the repulse of the French troops at Vera Cruz, on which occasion he lost a leg. He was once more president, from 1841 until 1845, in which latter year he was deposed and banished for ten years, but was recalled soon afterwards, reinstated as president, and charged to defend Mexico against the U. States army. He was defeated in several encounters by Generals Scott and Taylor, and finally, in 1848, was compelled to resign, Mexico having proclaimed peace with the U. States, by the cession of California, and by submitting to the erection of Texas into an independent state. From the close of the year 1852 until the middle of 1855, he again held the reins of power, only to be driven into exile, however, at the latter period, by General Carrera, who had revolted against his rule. He retired to the island of St. Thomas, where he lived quietly for some years. In the winter of 1863-64 he went to Vera Cruz, with the intention, as was naturally expected, of taking a more active part in politics than was deemed desirable. He had prepared a manifesto to the Mexican army, in which, after disclaiming any ambitious intentions, he expressed a strong desire to lay his bones among the people for whose independence he had done so much, but the French authorities would not allow him to publish it. On the arrival of the Emperor Maximilian in Mexico, he embraced the cause of the empire, but soon abandoned it, left Mexico, and returned to St. Thomas. S. A. had a long interview with Mr. Seward when he was in the W. Indies. He visited the U. States in May, 1866; and it is generally believed that his visit was connected with the then state of affairs in Mexico. He was taken prisoner by the Juarist party in 1867, but was soon after released. After that time the veteran general lived in comparative obscurity. Died in 1877.

San'ta Anna, an island of Brazil, in the Atlantic, 40 m. E.N.E. of Maranhao. — An island, prov. of Goyaz, in the River Araguay, abt. 210 m. long, and 40 m. broad. — A town, prov. of Matto-Grosso, abt. 30 m. E.N.E. of Cuyaba; pop. 4,000. — A town, prov. of Rio Grande do Sul, on the Siao, N. of Porto Alegre; pop. 1,400.

Santa Anna, or VILLA NOVA, a town of Brazil, prov. of Santa Catharina, abt. 20 m. N.E. of Laguna; pop. 2,000.

Santa Anna, a town of Central America, in San Salvador, 11 m. W. of San Salvador; pop. 10,000.

Santa Anna, a lake of Mexico, prov. of Tabasco, abt. 154 m. S.E. of Vera Cruz.

Santa Anna (now SAN JUAN), in New Mexico, a N.W. co., bordering on Arizona; area, 6,008 sq. m. Rivers. Rio San Juan and Rio Chusco. Surface, generally mountainous. Cap. Aztec. Pop. (1897) 1,960.

Santa Anna, a town of S. Peru, abt. 8 m. N.W. of Cuzco.

Santa Anna, in California, a river which flows into the Pacific Ocean from Los Angeles co.

Santa Anna, or SANTA ANA, in California, a post-village, cap. of Orange co., 28 m. S.E. of Los Angeles.

Santa Anna, in Illinois, a township of DeWitt co., 16 m. E. of Clinton. Pop. (1897) 2,320.

Santa Barbara, a town of Brazil, about 30 m. N.N.E. of Ouro-Preto. Pop. 4,000.

Santa Barbara, a town of Venezuela, on the Orinoco, opposite the mouth of the Ventuari.

Santa Barbara, in California, a S.W. co., bordering on the Pacific, having N. San Luis Obispo co., and W. those of Kern and Los Angeles; area, 2,380 sq. m. Rivers. Santa Clara, or Saticoy, and Santa Inez rivers. Surface, mountainous in the E., and undulating in the center and W.; soil, generally fertile. Vineyards are largely cultivated. Min. Gold, iron, copper, salt, and asphaltum. Cap. Santa Barbara. Pop. (1897) 19,450.

—A city and seaport, cap. of the above co., 279 m. S.E. of San Francisco; Latitude 34° 25' N., Longitude 119° 30' W. Pop. (1897) 6,455.

Santa Barbara Islands, in California, extending abt. 175 m. along the coast of Santa Barbara, Los Angeles, and San Diego cos., at a distance varying from 20 to 65 m. They are nine, and consist of San Miguel, Santa Rosa, Santa Cruz, Anacapa, Santa Barbara, Santa Catalina, San Clemente, San Nicholas, and San Juan.

Santa Catalina, an island and harbor of Central America, on the Mosquito coast; Lat. 13° 23' 40" N., Lon. 81° 22' 10" W.

Santa Catharina, (*-ka-ta-ree'na*), a marit. prov. of S. Brazil, bordering on the Atlantic, between Lat. 26° and 30° S., Lon. 49° and 51° W.; area, 25,002 sq. m. Surface, mountainous, except along the coast, which is low; soil, generally fertile. Climate, mild and healthy.

Prod. Rice, manioc, millet, sugar, coffee, and cochineal. Chief towns. Desterro, São Francisco, and Laguna. Pop. 90,000. — A fortified island of Brazil, off the coast of the above prov., 30 m. long, and 8 broad. Surface, mountainous, and well watered. Principal town. Desterro. Pop. 12,000.

Santa Clara, (*-kla'ra*), an island of Ecuador, in the Gulf of Guayaquil, abt. 13 m. S.E. of Puna.

Santa Clara, a river in California, rises in the mountains, and flows W. into the Pacific Ocean from Santa Barbara co.

Santa Clara, in California, a W. co., bordering on San Francisco Bay; area, 1,200 sq. m. Rivers. Guadalupe and Pajaro rivers. Surface, mountainous in the S.W., elsewhere, generally level; soil, fertile. Prod. Wheat and fruits. Min. Quicksilver, copper, alum, asphaltum, and limestone. Cap. San José. Pop. (1897) 52,280. — A post-town and township of the above co., about 3 m. from San José. Pop. (1897) 3,480.

Santa Clara, in Nevada, a village of Humboldt co., 13 m. N. of Unionville.

General Santa Anna

1798-1877

San'ta Cla'ra, in *Utah*, a post-village of Washington co., 6 m. N.W. of Saint George.

Santa Cruz, (-croos,) a river of Patagonia, enters the Atlantic Ocean, lat. 50° S., lon. 68° 30' W., after an E. course of over 200 m.

Santa Cruz, a seaport-town, cap. of the island of Tenerife, on the N.E. extremity; pop. 9,500.

Santa Cruz, a town of Brazil, 120 m. S.E. of Goyaz; pop. 3,000.

Santa Cruz, or **Saint Croix**, the largest of the Virgin Islands, in the W. Indies, belonging to Denmark, 65 m. E.S.E. of Porto Rico; lat. 17° 45' 30" N., lon. 64° 34' W.; area, 110 sq. m. Surface, generally level; soil, fertile. Climate, variable, and at times unhealthy. Hurricanes and earthquakes are of frequent occurrence. Prod. Sugar, rum, cotton, coffee, and indigo. Cap. Christiansted. Pop. 30,000.

Santa Cruz, an island of the W. Indies, N. of Cuba, abt. 30 m. N.E. of Matanzas.

Santa Cruz, an island in the Gulf of California, abt. 80 m. S.E. of Loreto.

Santa Cruz, in *California*, a W. co., bordering on the Pacific; area, 425 sq. m. Surface, diversified, but mountainous in the N.E.; soil, generally fertile. Min. Gold. Cap. Santa Cruz. Pop. (1897) 21,350.

—A city and seaport, cap. of the above co., 59 m. S.S.E. of San Francisco. Pop. (1897) 6,250.

Santa Cruz de los Rosa'es, a town of Mexico, abt. 68 m. N.W. of Chihuahua. It was taken in 1848 by the Americans under Gen. Price.

Santa Cruz de Mayo, a seaport-town of Mexico. See *GUTIVIS*.

Santa de Jesus, (ha'soos,) a town of Venezuela, on the Meta, abt. 46 m. W. of its junction with the Orinoco.

San Tadeo, (san-ta-da'o,) a river of Patagonia, which flows W. into the Gulf of St. Estevan in the Pacific Ocean.

Santa Fé, ("holy faith,") a prov. of the Argentine Republic, between lat. 30° and 33° S., lon. 61° and 62° W.

Rivers. Salado, and the Tercero, or Carcaranal. Pop. 89,117. Chief towns. Santa Fé (the cap.), Rosario, and Fort St. Espiritu.—A city, cap. of the above prov., 5 m. N.W. of Paraná; pop. 10,670. It is situated on an island formed by the Paraná and Salado rivers, 50 m. long, and 6 in average breadth.

Santa Fé, in *New Mexico*, a N. central co.; area, 2,292 sq. m. Rivers. Rio Grande, which forms part of its W. boundary, and several small affluents. Surface, mountainous in the S.W. and E., elsewhere undulating; soil, generally fertile. Cap. Santa Fé. Pop. (1897) 14,140.

—The cap. of the territory in the above co., on the Rio Chieito or Santa Fé River, about 20 m. N.E. of its mouth in the Rio Grande, lat. 35° 41' N., lon. 106° 10' W. It is situated on a plateau 7,000 ft. above the sea, and the houses are principally built of brick. The completion of the Union Pacific and other railroads has greatly added to the prosperity of the city. Pop. (1897) 6,850.

Santa Fé, in *Florida*, a river forming the boundary of Alachua and Columbia cos. It flows into the Suwanee River.

Santa Fé, in *Indiana*, a village of Spencer co., 40 m. E. N.E. of Evansville.

Santa Fé, in *Missouri*, a post-village of Monroe co., abt. 60 m. N. of Jefferson City.

Santa Fé de Antio'quia. See *ANTIOQUIA*.

Santa Fé de Bogotá. See *BOGOTÁ*.

Santa Helena, a town of Brazil, 60 m. W.S.W. of Guimarães.

Santa Herman'dad. See *HERMANDAD*.

Santa Inez, (e'nes,) in *California*, a river of Santa Barbara co., rises in the Coast range, and flows W., entering the Pacific Ocean 10 m. N. of Cape Concepcion.—A town of Santa Barbara co., abt. 265 m. S.S.E. of San Francisco.

Santa Isabel, a town of Brazil, 120 m. N.E. of São Paulo.

Santaline, *n.* (Chem.) The red coloring matter of red-sandal-wood.

Santa Juana, (-hoo-a'na,) an island of Chili, in the river Biobio, 38 m. E.S.E. of Concepcion.

Santalaceæ, *n.pl.* [Ar. zandal.] (Bot.) The Sandal-wood family, an order of plants, alliance *Asarales*. DIAG. A one-celled ovary and definite ovules, having a coated nucleus.—The species are natives of various parts of the world. Those of North America and Europe are inconspicuous herbs; while those of India and Australia are trees or shrubs. The genus *Thesium* is parasitic on the roots of other plants. Some of the plants are remarkable for their fragrant wood; a few produce edible seeds. See *SANTALUM*, and *FUSANUS*.

Santa Lucia, (-loo-see'a,) a town of the Argentine Republic, on the Paraná, 106 m. S. of Corrientes.

Santa Lucia, a town of Brazil, abt. 110 m. S.S.W. of Recife; pop. 2,000.

Santa Lucia, or **Luzia**, a town of Brazil, 120 m. S. E. of Goyaz.

Santa Lucia, a town of Italy, in Sicily, 7 m. S. of Milazzo; pop. 4,500.

Santa Lucia, a river of Uruguay, which joins the Rio de la Plata 7 m. N.W. of Montevideo, after a S. course of 100 m.

Santa Margarita, (-mar-gah-ree'tah,) in *California*, an island on the S.W. coast, from which it is separated by the Bay of Madelina; lat. 24° 30' N., lon. 111° 30' W. Ext. 45 m. long, and 15 m. in greatest breadth.

Santa Margarita, in *Colorado*, a village of Conejos co., 110 m. S.S.W. of Pueblo.

Santa Maria, (-ma-ree'a,) an island in the Bay of Arauco, off the coast of Chili, 30 m. S.W. of Concepcion; lat. 37° 2' S., lon. 73° 34' 15" W. Its surface was raised about 10 ft. by an earthquake in 1835.

Santa Maria, in *California*, a river which rises in the Coast range, flows W., forming part of the boundary be-

tween San Luis Obispo and Santa Barbara cos., and falls into the Pacific 40 m. N. of Cape Concepcion.

Santalum, *n.* [Arab. zandal.] (Bot.) The typical gen. of the order *Santalaceæ*. The fragrant wood called sandal-wood is obtained from *S. album*, a native of India. It is employed in perfumery, and is used by the Indian doctors as a sedative and refrigerant. *S. freycinetium* and *paniculatum* furnish the sandal-wood of the Sandwich Islands.

Fig. 2305. — *SANTALUM ALBUM*.

Santa Mari'a de Fé, a town of Paraguay, abt. 45 m. E. of Neembucu.

Santa Mar'ta, or **Martha**, a seaport-town of the Republic of Colombia, on a bay of the Caribbean Sea, 40 m. N.E. of the mouth of the river Magdalena. Pop. 9,000.

Santa Manra, or **LEUCADIA**, (mo'ra,) one of the Ionian Islands, on the W. coast of Arcanania; area, 180 sq. m. Pop. 20,000.

Santander, a river of Mexico, dept. of Tamaulipas, flows N.E. into the Gulf of Mexico, 110 m. N. of Tampico.

Santander, (san-tan-dair') a seaport-town of Spain, cap. of the prov. of same name, 50 m. N.E. of Bilbao. It has a commodious harbor, protected by 2 forts. Pop. 19,000.

Santanilla, or **SWAN ISLANDS**, (san-ta-neel'ya,) two islands at the entrance to the Bay of Honduras, about 150 m. N. of the Mosquito coast; lat. 17° 25' N., lon. 83° 50' W.

Santaquin', in *Utah*, a post-village of Utah co., 24 m. S.W. of Provo City.

Santarem', a town of Brazil, on the Tapajos, at its junction with the Amazon, 60 m. S.W. of Montalegre; pop. 10,000.

Santarem, (san-ta-reng'), a town of Portugal, on the Tagus, N.W. of Lisbon; pop. 8,000.

Santarem' Chan'nel, in the W. Indies, between the Great Bahama and Salt Key Banks; lat. 24° N., lon. 79° W., with a width of 40 m.

Santa Rita, (ree'ta,) a town of Brazil, abt. 60 m. S. of Villa Rica; pop. 7,000.

Santa Rita, in *Texas*, a village of Cameron co., about 10 m. N.W. of Brownsville.

Santa Ro'sa, a town of Chili, 18 m. E.S.E. of San Felipe; pop. 7,000.

Santa Rosa, in Mexico, 32 m. N. of Cohahuila; pop. 5,000.

Santa Rosa, a town in the Republic of Colombia, 40 m. E. of Antioquia. It has rich gold mines.

Santa Rosa, in *California*, an island off the N.W. coast, 35 m. S.W. of Santa Barbara.

—A city and township, cap. of Sonoma co., 60 m. N. of San Francisco. Pop. (1897) 5,840.

Santa Rosa, in *Florida*, a W. co., bordering on the Gulf of Mexico; area, 1,296 sq. m. Rivers. Yellow-water and Blackwater. Surface, flat; soil, unproductive. Prod. Indian corn and sweet potatoes. Cap. Milton. Pop. (1895) 8,914.

Santee', in *S. Carolina*, a river formed by the junction of the Congaree and Wateree, at the S.E. of the Richland dist., and flows into the Atlantic by 2 mouths, near lat. 33° 6' N., after a S.E. course of 150 m.

Santi'go, or **SAINT JAGO**, an island near the W. coast of Africa, the largest of the Cape de Verd Islands; lat. 15° N., lon. 23° 40' W. Ext. 35 m. long, and 12 broad. The surface is mountainous, but fertile and well cultivated. Prod. Sugar, coffee, indigo, orchilla-wood, cotton, and a variety of tropical fruits. Manuf. Cotton goods. It has an extensive trade. Chief town. Porto Praya. Pop. 20,000.

Santiago, a town of Bolivia, 190 m. S.E. of Chiquitos.

Santiago, a river of Central America, in San Salvador, which enters the Pacific about 20 m. W. of Sonsonate. At its mouth stands a small town of same name.

Santiago, a river of Ecuador, joins the Amazon a short distance W. of San Borja, after an E. course of 180 m.

Santiago, (san-te-ah'go,) a river of Ecuador, enters Salinas Bay in the Pacific, 50 m. N.E. of Esmeraldas, after a N.W. course of 75 m.

Santiago, in *Minnesota*, a post-village of Sherburne co., 20 m. E. of St. Cloud.

Santiago Atitlan, (-a-teet-lan'), a town of Guatemala, between 2 volcanoes from 8,000 to 10,000 ft. high, 90 m. W. of Guatemala.

Santiago de Alanje, (-a-lang'gh'), a town of the Republic of Colombia, 90 m. W. of Ve'agua.

Santi'go de Chili, (-chill'e,) a city, cap. of the republic of Chili, at the foot of the Andes, 1,800 feet above the sea, 90 m. E.S.E. of Valparaiso; lat. 33° 35' S., lon. 70° 43' 38" W. The river Mapocho divides the city into 2 parts, that on the N., the largest, being regularly laid out, the streets running at right angles. The Plaza, or Great Square, is adorned with a magnificent fountain, and surrounded by elegant public buildings and fashionable stores, the most notable of the former being the mint, the old palace (formerly the residence of the presidents), and the cathedral. The new hotel and the opera house are also fine buildings; the Alameda, 600 ft. wide, extends to the Exposition Buildings, a distance of four miles. S. was founded in 1851, by Pedro de Valdivia, but made very little progress, owing to the restrictions of Spain, until Chili became independent of the mother country, since which time it has become one of the most important cities of S. America. A fire broke out in the Jesuit church of La Compania, during the celebration of a feast in honor of the Immaculate Conception, Dec. 8, 1863. The interior of the building, with the roof, being constructed of timber, the flames spread with great rapidity; and as there was only one door for egress, upwards of 2,000 victims, mostly women and children, perished. 160 wagon-loads of corpses were taken from the ruins.

Santiago de Compos'tella. See *COMPOSTELLA*.

Santiago de Cuba, a city, seaport, and former cap. of Cuba, on the river Santiago, 6 m. from its mouth on the S. coast; lat. 19° 55' 9" N., lon. 75° 50' W. It is regularly built, and the houses are mostly of stone; but the situation is unhealthy. The harbor, 4 m. long, is fortified and well sheltered, and is next in commercial importance to Havana and Matanzas. Pop. 26,000.

Santiago de las Atalayas, (-a-ta-l'as,) a town of the U. S. of Colombia, 70 m. E.N.E. of Bogotá.

Santiago de las Ve'gas, a town of Cuba, about 15 m. S. of Havana; pop. abt. 6,500.

Santiago de la Ve'ga, or **SPANISH TOWN**, a town, cap. of the island of Jamaica, on the river Cobre, 10 m. W. of Kingston; pop. abt. 6,500.

Santiago del Este'ro, a town of the Argentine Republic, cap. of a prov. of same name, on the Dulce; lat. 25° S., lon. 64° W.; pop. 5,000.

Santiago de los Caballeros, (-ka-bal-ya-roce'), a town of the island of Hayti, on the Yaqui River, 103 m. E. of Cape Haytien; pop. 12,000.

Santi Baelmully, (san'tee-ba-chul'lee,) a considerable walled town of S. India, in the dominions of Mysore, 4 m. N.W. of Seringapatam.

Santilla, or **Satilla**, in *Georgia*, rises in Irwin co., and flows E.S.E. into the Atlantic through St. Andrew's Sound.—The Little Santilla joins the above in Wayne co., after a S.E. course.

San'to Agostinho, or **SAINT AUGUSTIN**, (-a-gos-teen'-yo,) a cape of Brazil, 25 m. S. of Pernambuco; lat. 8° 21' S., lon. 34° 56' W.

Santo Ama'ra, a town of Brazil, prov. of Rio Grande do Sul, on the Jacuhy; pop. 3,000.

Santo Ama'ro, a town of Brazil, 45 m. N.W. of Bahia.

Santo Antonio da Patrulha, (-pa-trool'ya,) a town of Brazil, prov. of Rio Grande do Sul, E.N.E. of Porto Alegre; pop. 3,103.

Santo Antonio de Sa, or **Macacu'**, a town of Brazil, 30 m. N.E. of Rio de Janeiro; pop. 8,000.

Santo Antonio dos Guarulhos, (-doce-gwa-rool'-yoce,) a town of Brazil, on the Parahiba, opposite Campos; pop. 7,000.

San'ton, *n.* [Sp. from Lat. sanctus, holy.] A Turkish dervish, believed in by the vulgar as a saint; a hermit; a recluse.

Santonia, (san-tone'ya,) a fortified seaport-town of Spain, prov. of Santander, on the Bay of Biscay, 16 m. E. of Santander; pop. 1,000.

Santonine, *n.* [Fr.] (Chem.) A proximate vegetable principle, obtained from the flower-heads of *Artemisia santonica* and other species, known in pharmacy as *worm-seed*. It is white, crystallizable, bitterish, and very little soluble in water, but more so in alcohol. It is occasionally used as a vermifuge in doses of from 10 to 30 grains, followed by a brisk purge.

Santorin, (san-to'ren,) an island in the Grecian Archipelago, 12 m. S. of the island of Scio; area, 40 sq. m. Prod. Cotton, figs, wine, and barley. Pop. 13,000.

Santos, a seaport-town of Brazil, on the N. of the island of Engua Guacu, 34 m. S.S.E. of São Paulo; lat. 23° 55' S., lon. 46° 19' W. Its harbor is large and commodious, and it has an active trade in sugar. Pop. 8,000.

Santos, (Los,) a town of the U. S. of Colombia, dept. of Isruo, on the W. coast of the Gulf of Parita, S.S.E. of Parita.

Santos Luga'res, a village of the Argentine Republic, 14 m. W. of Buenos Ayres, noted for the defeat of the dictator Rosas, by Urquiza, in 1852.

San'tyam, in *Oregon*, a river which rises in the E. of Linn co., and flows W. into the Willamette River, abt. 20 m. S. of Salem.—A vill. of Linn co., on the Santyam River, abt. 5 m. S. of its junction with the Willamette.

San Vicien'te, in Central America, a town, cap. of San Salvador, 25 m. E.S.E. of San Salvador; pop. 9,000.—Near it is the volcano of San Vicente, abt. 800 ft. high.

São Ben'to, a town of Brazil, abt. 40 m. N. of Alagoas; pop. 3,000.

São Bernar'do, a city of Brazil, on the Russas, 70 m. S.S.E. of Ceará; pop. 6,000.

São Christovão, or **Sergipe**, (sowng-krees-to-rown'), a city of Brazil, cap. of the prov. of Sergipe, on the Paromapama River, about 20 m. from its mouth in the Atlantic; pop. 2,000.

São Feliz, or **Felis**, (-fa-lees') a town of Brazil, 280 m. N.N.E. of Goyaz; S.S.E. of it are the famous thermal

springs of Caldas de Frei Reinoldo, in which the water is almost boiling hot.

São Francisco's co., an island on the S.E. coast of Brazil, prov. of Santa Catharina, from which it is separated by a narrow channel. Ext. 20 m. long and 10 broad. The cap. of the same name is in Lat. 26° 12' S., Lon. 48° 43' W.

—A town of Brazil, 45 m. N.W. of Bahia; pop. 2,000.

—A river of Brazil, rises in the N.W. of the prov. of Santa Catharina, and flows into the Atlantic opposite the island of São Francisco, after an E. course of 100 m.

São Francisco, or **Saint Francisco**, an important river of Brazil, rises in Lat. 20° S., Lon. 45° W., and after a N.E. course of 1,200 m., enters the Atlantic by two mouths; Lat. 10° 24' S., Lon. 36° 20' W. It is navigable almost its entire length, except where impeded by the falls of Paulo Afonso, 160 m. from its mouth.

São Gonçalo, (-gon-sa'lo,) a town of Brazil, on the Potengi, 12 m. W. of Natal. — A town of Brazil, 75 m. N.E. of Rio de Janeiro; pop. of dist. 10,000.

São Gonçalo D'Amarante, (-da-ma-ran'ta,) a town of Brazil, 56 m. N.N.W. of Leiras; pop. 1,800.

São João de Barra, (-zho-own'), a town of Brazil, on the Parahiba, near its mouth in the Atlantic, 18 m. E.N.E. of Campos; pop. 2,000.

São João da Palma, a town of Brazil, 400 m. N. of Goyaz.

São João das Duas Bar'ras, a town of Brazil, at the confluence of the Araguay and Tocantins.

São João del Rei, (-del-ra'e,) a town of Brazil, 80 m. S.W. of Ouro-Preto; pop. 5,000.

São João do Principe, or **Mar'cos**, (-preen-se-pa,) a town of Brazil, 60 m. W.N.W. of Rio de Janeiro; pop. 6,000.

São Jorge dos Ilheos, (-zhor-zha-doce-cel-ya'oce,) a seaport-town of Brazil, at the mouth of the Rio dos Ilheos in the Atlantic, 130 m. S.W. of Bahia; pop. 4,000. The above river has an E. course of 130 m.

São José, (-zho-za'), a bay of Brazil, E. of the island of Maranhão, formed by the mouths of the rivers Moni and Itapicuru. Ext. 24 m. long and 8 broad.

—A town of Brazil, on the Parahiba, 60 m. N.E. of São Paulo; Lat. 23° 12' S., Lon. 46° W.; pop. of dist. 4,000.

—A town of Brazil, prov. of Santa Catharina, 4 m. W. of Desterro; pop. 6,000.

São Matheos, (-ma-ta'oce,) a town of Brazil, 190 m. S.S.W. of Ceara; pop. 2,000. — A town of Brazil, prov. of Espírito Santo, 16 m. W. of the Atlantic.

São Miguel, a town of Brazil, 25 m. S.S.W. of Alagoas; pop. 2,000.

Saona, an island off the S.W. coast of Hayti, from which it is separated by a channel 10 m. wide. Ext. 15 m. long and 5 broad.

Saône, (sone,) a river of France, rising in the dept. of Vosges, and after a S. course of 225 m., joins the Rhone at Lyons.

Saône-et-Loire, a dept. of the E. of France, between Lat. 46° and 47° N., Lon. 3° 40' and 5° 30' E., having N. the dept. Cote d'Or, E. Jura and Ain, S. Rhone and Loire, and W. Allier and Nievre; area, 3,300 sq. m. The surface is mountainous and well wooded, and the soil is generally fertile. Rivers. Saône, Loire, Arroux, Doubs, and Seille rivers. Prod. Principally corn and wine. Min. Iron, coal, marble, and manganese. Manuf. Glass, earthenware, and iron-works. Chief towns. Macon, the cap., Autun, Charolles, Chalons, and Louhans. Pop. 111,894.

Saône, (Haute,) a dept. of the E. of France, between Lat. 47° 15' and 48° N., Lon. 5° 35' and 7° E., having N. Vosges, E. Haut-Rhin, S. Doubs, and W. Cote d'Or and Haute-Marne; area, 1,792 sq. m. The surface is undulating and fertile, except in the N.E., which is mountainous. Rivers. Saône, Oignon, Drejon, and Amance. Prod. Corn, wine, and timber. Min. Iron and coal. Manuf. China, glass, cloth, and straw hats. Chief towns. Vesoul, the cap., Gray, and Lure. Pop. 317,706.

São Paulo, (pau'lo,) a city of Brazil, cap. of a prov. of same name, stands on an uneven elevation between two small streams, tributaries of the Tiede, 220 m. W.S.W. of Rio de Janeiro. There is an academy of laws, attended by about 500 students. The general appearance of the town is picturesque, and the vicinity and suburbs are beautiful.

São Pedro D'Alcantara, (-dal-kan'ta-ra,) a town of Brazil, prov. of Goyaz, 80 m. S.S.E. of São João das Duas Barras.

São Pedro do Rio Grande, a marit. prov. of Brazil. See RIO GRANDE DO SUL.

São Romão, (-ro-moun'), a town of Brazil, prov. of Minas-Geraes, on the São Francisco River; Lat. 15° 22' S.; pop. 4,000.

São Roque, (-ro'ka,) a town of Brazil, 32 m. W.S.W. of São Paulo; pop. 5,000.

São Roque, (Cape,) a promontory on the N.E. coast of Brazil; Lat. 5° 28' S., Lon. 35° 16' W.

São Sacramento, in Brazil. See PERNAMBUCO.

São Sebastião, (-sa-bas-ta-own'), a seaport-town of Brazil, prov. of São Paulo; Lat. 23° 48' 20" S., Lon. 45° 29' 6" W. Pop. 5,000. — Also, an island opposite the above town, from which it is separated by a narrow channel. Ext. 12 m. long and 6 broad. Pop. 3,000.

Sap, n. [A. S. sap.] (Bot.) The nutrimental fluid which circulates in plants. As it rises in the stem it is of a watery nature, and contains the various inorganic matters absorbed by the roots, also some sugar, dextrine, and other organic substances, which it has dissolved in its upward course. In its passage to the leaves it becomes more and more altered from the state in which it was absorbed by the roots; but when it reaches the leaves it is still unfitted for the requirements of the plant, and is hence termed *crude sap*. Through the action

of the light and air, it undergoes important changes in the leaves and other green parts, and becomes adapted for the nourishment of the plant. In this state it is termed *elaborated sap*. In dicotyledons, this elaborated fluid descends through the internal bark and cambium layer towards the root, and is transmitted laterally inwards by the medullary rays. See BOTANY.

—v. a. [Fr. saper; It. zappare, from *zappa*, a spade, or *zappone*, a mattock.] To subvert by digging under or removing the foundation of; to undermine; to mine.

—v. n. To proceed by mining, or by secretly undermining.

—n. A trench for undermining, or an approach made to a fortified place by digging under cover of gabions, &c.

Sap'ajon, n. (Zool.) See MONKEY.

Sapani-wood, n. A dye-wood produced by certain species of *Cesalpina*. It resembles Brazil-wood in its color and properties.

Sap'green, n. See RHAMNUS.

Saph'e'na, n. [Gr. *saphes*, distinct.] (Anat.) The large vein of the leg which ascends over the external ankle.

Saph'ire, n. See SAPPHIRE.

Sap'id, a. [Fr. *sapide*; Lat. *sapidus*, from *sapis*, to taste.] Tasteful; savory; having the power of affecting the organs of taste.

Sap'id'ity, **Sap'id'ness**, n. Quality of being sapid; flavor; tastefulness; savor; the quality of affecting the organs of taste.

Sap'ience, n. [Fr.; Lat. *sapientia*, from *sapiens*.] Good taste; good sense; discernment; discretion; prudence; wisdom; sageness; knowledge.

Sap'iently, adv. Wisely; sagaciously.

Sapinda'ceae, n. [From Lat. *sapo* *Indicus*, Indian soap.] (Bot.) The Soap-wort family, an order of plants, alliance *Sapindales*. DIAG. Complete, unsymmetrical flower, petals usually with an appendage, anthers opening longitudinally, 3 carpels, and usually arillate, wingless seeds. — The plants of this order flourish chiefly in tropical regions, especially in S. America and India.

The S. are represented in the U. States by the horse-chestnuts. The presence of a saponaceous principle is one of the most prominent properties of the order. Many of these plants are poisonous in all their parts; but it more frequently happens that, while the roots, leaves, and branches are dangerous, the succulent fruits are innocuous, or in some cases even valuable articles of dessert. The useful products of the order are timber, edible fruits, starch, and the soapy matter above referred to. See *ÆSCULUS*, *NEPHELIUM*, *PAULLINIA*, *SAPINDUS*.

Sapin'dales, n. pl. (Bot.) An alliance of plants, subclass *Hypogynous exogens*. DIAG. Monodichlamydeous unsymmetrical flowers, axile placentae, an imbricate calyx and corolla, definite stamens, and little or no albumen. The alliance includes 9 orders, — TREMANDRACEÆ, POLYGALACEÆ, VOCHYACEÆ, STAPHYLEACEÆ, SAPINDACEÆ, PETIVERIACEÆ, ACERACEÆ, MALPIGHIACEÆ, and ERYTHROXYLACEÆ, q. v.

Sapin'dus, n. [From Lat. *sapo* *Indicus*, Indian soap.] (Bot.) A genus of the order *Sapindaceae*. The most important species is *S. saponaria*, the fruits of which are employed in the W. Indies instead of soap for cleansing linen. The fruits of *S. unequalis* contain the same saponaceous principle, and are used for the same purpose.

Sap'tess, a. Destitute of sap; not juicy; — hence, dry; old; husky.

Sapodil'la, n. (Bot.) See ACHRAS.

Saponaceous, (-äs'-) a. [From Lat. *sapo*, *saponis*, soap.] Soapy; resembling soap; having the qualities of soap.

Saponac'ity, n. Quality of being saponaceous or soapy.

Sapon'ifiable, a. That may be converted into soap.

Saponifica'tion, n. The separation of the fatty acids from their glycerine base, by the addition of an alkali or other metallic base, which unites with them. See SOAP.

Sapona'ria, n. (Bot.) A genus of plants, order *Caryophyllaceae*. The common Soap-wort, *S. officinalis*, found by roadsides in all the States, is a hardy, smooth, succulent plant, with handsome pink-like flowers; stem 1-2 feet high. It has a bitter taste, with a saponaceous juice.

Sapon'ify, v. a. [Fr. *saponifier*.] To convert into soap.

Sap'online, n. [Lat. *sapo*, soap.] (Chem.) A substance resembling soap, contained in a large number of plants, such as the *Sapomana officinalis*, in the root of the Common Pink, and in the fruit of the horse-chestnut. It is easily extracted from these sources by boiling in alcohol. It is soluble in water in all proportions, and froths strongly on agitation. The juice of soap-wort is often used as a detergent for cleansing the finer variety of wool from grease. Powdered, it forms a powerful sternutatory. Boiled with dilute acids, it forms saponic acid.

Sap'ouille, n. (Chem.) A combination of a volatile or an essential oil with a base.

Sap'or, n. [Lat., from *sapio*.] Taste; savor; flavor; relish; the power of affecting the organs of taste.

Sapor I., a king of Persia of the Sassanide dynasty, succeeded his father, Artaxerxes, 240. He invaded Mesopotamia 242, and having conquered Armenia, Syria, and Cilicia, he put to death the Emperor Valerius with great cruelty. He was defeated by Odenatus 269, and d. 271. — **Sapor II.**, a posthumous son of Hormisdas II., was proclaimed 310, before his birth. He became an active and warlike prince in conflict with the Romans, and was a great enemy to Christianity, d. 380. — **Sapor III.**, succeeded Artaxerxes II., 384. He kept peace with the Romans. D. 389.

Saporo's'ity, n. Quality of exciting taste or affecting the palate.

Sap'orons, a. Savory; tasteful. (r.)

Sapota'ceae, n. pl. (Bot.) An order of plants, alliance

Rhamnales. DIAG. Monopetalous flowers, epipetalous stamens, ascending ovules, a short radicle, and amygdaloid cotyledons. They are trees or shrubs, often having a milky juice, with alternate, simple, exstipulate, coriaceous leaves, and hermaphrodite flowers. Calyx usually with 5 divisions, sometimes 4-8; corolla with as many divisions, or twice or thrice as many; stamens definite, in a single row, half of them sterile and alternating with the fertile ones, the latter being opposite to the segments of the corolla; ovary 4-12-celled, with a solitary ovule in each cell; style single. Fruit fleshy; seed large, with bony surface. The plants of this order are natives of the tropical parts of Asia, Africa, and America; many yield edible fruits. The seeds of some contain fatty oils. The valuable substance gutta-percha is a product of this order.

Sap'per, n. [Fr. *sapeur*.] One who saps; one who digs a sap or trench.

Sapphic, (säf'fik,) a. In the style or manner of Sappho; as, a *Sapphic* ode.

—n. A species of Greek verse, named after the celebrated poetess Sappho, by whom it is said to have been invented. It consists of eleven syllables, or five feet; the first being a trochee, the second a spondee, the third a dactyl, and the last two trochees; as follows: —

Grändi | nīs mī | sīt pütēr | ēt rū | Cēntē.

This measure was afterwards introduced into Latin, and received great improvements at the hands of Horace and Catullus.

Sapphire, (säf'fire,) n. [Gr. *sappheiros*.] (Min.) A precious stone, next in hardness to the diamond. It consists of nearly pure alumina, or clay, with a minute portion of iron as the coloring matter. It is found of various colors; the blue variety being generally called *sapphire*, the red the *oriental ruby*, and the yellow the *oriental topaz*. The finest variety of sapphire comes from Pegu, where they occur in the Capelan Mountains near Sgrian. S. have also been found in France, Saxony, and Bohemia.

Sapphirine, a. Resembling sapphire; made of sapphire; having the qualities of sapphire.

Sappho, (säf'fo,) a celebrated Greek poetess, was a native of the island of Lesbos, and flourished in the 6th century B. C. She was the contemporary and friend of Alceus, and won so high a reputation by her exquisite lyrics that she was called the *Tenth Muse*. Hardly anything is known of her biography, and fragments only of her nine books of poems are extant. Among them, however, is a fine hymn to Aphrodite, probably complete. The admiration of the ancients is justified by these precious remains of her songs. The moral character of S. has to be inferred from these compositions, and while some critics find ground for the gravest charges, others vigorously contend for her purity and virtue.

Sap'piness, n. [From *sappy*.] State or quality of being full of sap; succulence; juiciness.

Sappington, in Missouri, a post-village of St. Louis co., abt. 15 m. W.S.W. of St. Louis.

Sap'sago, n. [Ger. *schabzieger*.] A kind of Swiss cheese of a dark olive-green color.

Sap'sucker, n. See WOODPECKER.

Sapucaly, (sa-poo-ka'ee,) in Brazil, a river which rises in the S. of the prov. of Minas-Geraes, and joins the Parana, after a N.W. course of 200 m. — A town of Brazil, on the Sapucaly, abt. 180 m. S.W. of Ouro-Preto; pop. 4,000.

Sapuca'ya-mut, n. (Bot.) See LECYTIS.

Sap'wood, n. (Bot.) See ALBURNUM.

Saquarema, or **Sequarema**, (sa-kwa-ra'ma,) a town of Brazil, 29 m. E. of Rio de Janeiro; pop. 8,000.

Sa'ra, (Bayou,) in Louisiana, rises in W. Feliciana parish, and flows S. into the Mississippi at the village of Bayou Sara.

Sar'aband, n. A slow Spanish dance, said to be of Saracenic origin. — Hence,

(Mus.) A composition in triple time very similar to a minuet. When denoting music for the dance, it is to the same measure which usually terminates when the beating hand rises; being thus distinguished from the *couranto*, which ends when the hand falls.

Sarabi'ta, or **SUA'REZ**, a river of the Republic of Colombia, rises near the center of the country, and joins the Galinazo, or Sogamoze, a tributary of the Magdalena, after a N.N.E. course of 160 m.

Saracenic Art, n. See ARABIAN ARCHITECTURE.

Sa'racens, n. pl. The name of an Arab tribe, is by some authorities derived from *Sarah*, the wife of Abraham, whom they are said to claim as their foundress, to avert the stigma of their descent from the bond-woman Hagar. Bochart denies this theory, and asserts that they were called Saracens in consequence of their nomadic and predatory habits, *Saraka* being the Arabic verb "to plunder." Reland states that the word simply denotes the eastern origin of the Saracens, *Sharaka* being a modification of the Arabic "to rise," and applied in this case because the east is the quarter in which the sun rises. They are mentioned by the classical geographers, who do not define very exactly the locality they occupied. In consequence of their predatory encroachments, the Emperor Decius caused a number of lions to be conveyed into their country from Africa, and turned loose among them, in 251. The name, at first applied to a tribe, then to the Bedouin Arabs, was afterwards given to all Moorish and Mohammedan people, and especially to the opponents of the Crusaders, and in fact to all opponents of Christianity.

Saragossa, (sa-ra-gos'sa.) [Sp. *Zuragoza*.] A city of Spain, the capital of the old kingdom of Aragon, on the Ebro, which is here at about the middle of its course, and separates the city from its suburbs, 176 m. N.E. from

Madrid. Without being regularly fortified, it is surrounded by an earthen wall, and is built throughout of bricks. The houses are seldom above three stories in height; the streets narrow and crooked, except one long and wide one, called the *Cozo*. Here are two bridges over the Ebro. The public buildings are numerous, — churches, convents, and a cathedral celebrated throughout Spain for its sanctuary. The city has a university, founded in 1478; also an academy of fine arts, with schools for drawing, and other branches of education. It is noted in history for the memorable siege it sustained against the French, under Marshals Mortier and Lannes, and which lasted with slight intermission from July 15th, 1808, to Feb. 21st, 1809, when it finally surrendered.

Sarah, (*sai'ra*). (*Script.*) The niece and wife of Abraham. She became the mother of Isaac at the age of 90 years, and caused Abraham to cast forth Hagar and Ishmael. She lived to the age of 127 years.

Sarah Ann Furnace, in Pennsylvania, a village of Lancaster co.

Sar'ahsville, in Ohio, a post-village, the former cap. of Noble co., 85 m. S. E. of Columbus.

Saraisk', a town of European Russia, govt. of Riazan, 40 m. N.W. of Riazan; pop. 6,000.

Sarama'ca, a river of Dutch Guiana, which enters the Atlantic 30 m. W. of the mouth of the Surinam, after a N. course of 200 m.

Sarauac', in Illinois, a township of De Kalb co.

Sarauac, in Michigan, a post-village of Ionia co., on Grand River, 25 m. E. of Grand Rapids.

Sarauac, in New York, a post-township of Clinton co., 15 m. W. of Plattsburg.

Sarauac Hollow, in New York, a village of Clinton co., 17 m. W. of Plattsburg; pop. abt. 600.

Sarauac Lake, in New York, in the S. of Franklin co., 10 m. long.

Sarauac River, in New York, formed by the surplus waters of Sarauac Lake in Franklin co. It falls into Lake Champlain near Plattsburg.

Saragupoor', a town of British India, 110 m. E. of Lucknow; pop. 10,000.

Saransk', a town of European Russia, govt. of Pensa, on the Saraga, near the Insar, 68 m. N.E. of Pensa. *Manuf.* Soap and leather. Pop. 9,000.

Sarapi'qui, a river of Central America, rises in Costa Rica, and flows into the San Juan near its mouth in the Caribbean Sea.

Sarapol', a town of European Russia, govt. of Viatka, on the Kama, 188 m. S.E. of Viatka; pop. 6,000.

Sarare, (*sa-ra'ra*), a river of Brazil, rises in the prov. of Matto-Grosso, and flows S.W. into the Guapore; Lat. 14° 51' S., Lon. 60° 30' W.

Sarato'ga, in Illinois, a township of Grundy co. — A twp. of Marshall co., 28 m. N. of Peoria.

Saratoga, in Iowa, a post-township of Howard co., 60 m. W. of Lansing.

Saratoga, in Minnesota, a post-village and township of Winona co., 25 m. W.S.W. of Winona.

Saratoga, in N. Carolina, a village of Wilson co., 58 m. E. of Raleigh.

Saratoga, in Nebraska, a village of Douglas co., N. of Omaha City.

Saratoga, in New York, an E. co., bordering on the Hudson; area, 780 sq. m. *Rivers.* Mohawk and Sacandaga rivers. *Surface*, mountainous in the N.W., in other parts level; *soil*, generally fertile. It is noted for its excellent potato crops. *Min.* Iron, sandstone, and limestone. *Cup.* Ballston. Pop. (1897) 58,260. — A township of the above co., 30 m. N. E. of Albany. Pop. (1897) 4,050.

Saratoga, in Wisconsin, a township of Wood co., 8 m. S. of Grand Rapids.

Saratoga Lake, in New York, 7 m. long and 2 broad, 5 m. E. of Ballston Spa, in Saratoga co.

Saratoga Springs, in New York, a village and township of Saratoga co., 38 m. N. by W. from Albany. It is one of the chief watering-places in the U. States. It contains 23 mineral springs, some chalybeate, some containing iodine, with salts of soda and magnesia, and all highly charged with carbonic acid. They are prescribed in diseases of the liver, chronic dyspepsia, &c. The most celebrated are *Congress*, *Empire*, *Iodine*, and *High Rock Springs*, the last of which was known by the Indians for its medicinal virtues many years before the Revolutionary War. During the season, which lasts from about June 20 to the end of August, the number of visitors ranges from 25,000 to 35,000, who find ample accommodation in the village, which contains about 25 hotels, some of immense magnitude. Pop. (1897) 12,200. — Here, Sept. 14 and Oct. 7, 1777, the Americans, under Gen. Gates, fought the memorable battles (the first of which is also known under the names of Stillwater and Bemis's Heights), against the English forces under Gen. Burgoyne, who, Oct. 13, was compelled to capitulate. See BURGUYNE.

Saratov, (*sa-ra-tof'*), a town of Russia in Europe, cap. of a govt. of same name, on the Volga, 335 m. S.S.E. of Nijni-Novgorod, and 360 m. N.N.W. of Astrakhan. Though its houses are generally built of timber, the town has a rich and picturesque appearance. Its 16 churches are ornamented with numerous towers and cupolas; and its broad streets, from the character of the houses and of the elegant equipages that roll through them, have quite a handsome appearance. *Manuf.* Canvas, cotton goods, cordage, leather, &c.

Sarawak', a kingdom or rajahship of Borneo, extending from Cape Datto on the W. to the river Samarahan on the E., between Lat. 1° 8' and 1° 58' N., and Lon. 109° 19' and 110° 39' E. The aboriginal inhabitants, called Dyaks, consist of various wild tribes, who, in

1844, took for their sovereign an Englishman, Sir James Brooke (*q. v.*), through whom the country is chiefly known. Pop. 50,000. — Sarawak, the capital, situate upon a river of same name, carries on a considerable trade with Singapore. Pop. 15,000.

Sarawan', a prov. of Beloochistan, between Lat. 28° and 30° 20' N., Lon. 64° and 67° 40' E.; area, 15,000 sq. m. The surface is mountainous, the highest peak, Tuk-atoo, reaching an elevation of 11,000 feet. *Chief towns.* Sarawan, the cap., Quetta, and Mstung. Pop. 50,000.

Sarayaen, (*sa-ri-a-koo'*), a town of Peru, on the river Ucayale; Lat. 6° 50' S., Lon. 75° W.

Sar'casin, *n.* [Lat. *sarcasmus*; Gr. *sarkasmos*, a bitter laugh.] A bitter laugh; a sneer. — A cutting jest; a keen, reproachful expression; a satirical remark or expression, uttered with some degree of scorn or contempt; satire, personal and severe; irony; a taunt; a gibe.

Sarcas'tic, *Sarcas'tical*, *a.* Containing sarcasm; bitterly satirical or ironical; scornfully severe; taunting.

Sarcas'tically, *adv.* In a sarcastic manner; with scornful satire.

Sar'cel, *n.* (*Falconry*.) The pinion or outer joint of a hawk's or a falcon's wing.

Sarcenet, (*sars'net*), *n.* [Fr., from L. Lat. *saracenicum*.] A species of fine, thin, woven silk, so named from its having been originally made by the Saracens.

Sar'cle, *v. a.* [Fr. *sarcler*.] To weed, as corn. (*R.*)

Sarcobasis, *n.* [Gr. *sarx*, *sarkos*, flesh, and *basis*, a base.] (*Bot.*) A many-celled fruit, having its cells dry, indehiscent, few-seeded, and cohering by a common style round a common axis.

Sar'cocarp, *n.* [Gr. *sarx*, and *karpos*, fruit.] (*Bot.*) The fleshy part of a pericarp, lying between the epicarp and endocarp (Fig. 940).

Sar'cocele, *n.* [From Gr. *sarx*, and *kêlē*, a tumor.] (*Med.*) A tumefaction of the testicle.

Sar'cocol, *n.* [Gr. *sarkokolla*, a Persian gum.] A gum resin, said to be the produce of *Panea sarcocolla*, a plant growing in the northern parts of Africa. This sarcocol somewhat resembles gum-arabic, but is soluble in alcohol, and its aqueous solution is precipitated by tannin.

Sar'coderm, *n.* [Gr. *sarx*, and *derma*, skin.] (*Bot.*) An intermediate fleshy layer found in the testa of some seeds.

Sarcology, *n.* [Gr. *sarx*, and *logos*, a discourse.] (*Anat.*) The history or doctrine of the fleshy parts of the body.

Sarco'ma, *n.* [Gr., from *sarx*, flesh.] (*Med.*) Any species of excrescence having a fleshy consistence.

Sarcophagus, (*sar-kof-a-gūs*), *n.* [Lat.; Gr. *sarkophagos*—*sarx*, *sarkos*, flesh, and *phago*, to eat.] A species of stone used among the Greeks for making coffins, which was so called because it had the supposed property of consuming the flesh of bodies deposited in it within a few weeks. — Hence, any stone coffin or tomb in which the ancients deposited bodies which they chose not to burn.

Sarcophagy, *n.* [Gr. *sarx*, and *phago*, to eat.] The practice of eating flesh.

Sarcosis, *n.* [From Gr. *sarx*, flesh.] (*Med.*) Same as SARCOMA.

Sarcot'ic, *a.* (*Med.*) Generating or breeding new flesh.

Sarco'x'ie, in Missouri, a post-village and township of Jasper co., 170 m. S.W. of Jefferson City.

Sard, *n.* [From *Sardis*, a city of Asia.] (*Min.*) A deep brownish chalcidony exhibiting a blood-red color when held up to the light.

Sardachate, *n.* [Gr. *sardion* — *sardis*, and *achates*, agate.] (*Min.*) A variety of agate containing layers of sard or cornelian.

Sardanapalus, the name of several princes of Assyria, the most celebrated of whom was the last sovereign of the first Assyrian empire. His reign dates from 836 to 817 B. C., when he was dethroned by Arbaces and Belshazzar at the head of a revolt of the Medes, Persians, and Babylonians. In the last extremity, Sardanapalus, who had withstood a siege for three years in Nineveh, placed himself, his treasures, his wives, and his eunuchs on a funeral pile, which he fired with his own hand. He had ceased to exist when the city was taken, and that event was followed by the dismemberment of the Assyrian empire. The above date is only an approximation to the true one, as authorities vary.

Sardel, **Sardine**, **Sardius**, *n.* [Lat. *sardius*; Gr. *sardion*, from *Sardis*.] A precious stone; a species of chalcidony; the cornelian.

Sarden, **Sardel**, *n.* (*Zoöl.*) Same as SARDINE, *q. v.* **Sardinias**, or **SALDINAS**, a bay of the U. S. of Colombia, in the Pacific; Lat. 1° 30' N., Lon. 79° W.

Sardine, *n.* (*Zoöl.*) A small fish of the Herring family (*Clupea Sardina*), taken in vast numbers off the coast of America, and in other parts of the Mediterranean Sea and Atlantic Ocean, where the herring is unknown. They form an important article of commerce, their flavor being highly esteemed.

Sardinia, (*sar-din'yah*) [It. *Sardegna*.] An island of the Mediterranean, belonging to the kingdom of Italy, between Lat. 39° and 41° N., Lon. 8° and 10° E., separated from Corsica on the N. by the Strait of Bonifacio. It is of an oblong form, 160 m. long from N. to S., and 60 m. in average breadth. Area, with its dependent islands, 9,240 sq. m. The surface is mountainous, the highest peak, Mount Genargentu, attaining an elevation of 7,000 feet. The soil is generally fertile. *Prod.* Principally wine; — also, flax, linseed, hemp, saffron, tobacco, and barilla. *Min.* Iron, lead, salt, antimony, marble, &c. *Manuf.* Linens, cottons, leather, earthenware, and glass. *Chief towns.* Cagliari and Sassari. *S.* is said to have been founded B. C. 1200 by Sardus, with a colony of Lybians. It was early taken by the Carthaginians,

and afterwards by the Romans. At the fall of the W. empire, it came successively under the power of the Vandals, Goths, and Moors. It was taken by the Genoese in the 12th century, and afterwards by Aragon. It was ceded to the Duke of Savoy in 1720, when it became a part of the kingdom of Sardinia. Pop. 588,064.

Sardin'ia, (KINGDOM OF.) [It. *Stati Sardi*.] The name given to the dominions appertaining to the house of Savoy, and so called after the island of that name. The kingdom of Sardinia consists of, or till lately did consist of, the duchy of Savoy, the principality of Piedmont, duchy of Genoa, county of Nizza, and the island of Sardinia. The continental territories were bounded on the N. by the Lake of Geneva and the Pennine Alps, S. by the Gulf of Genoa, W. by France, and E. by the Lombardo-Venetian kingdom. The area of these territories is 20,000 sq. m. The kingdom of *S.* was founded in 1720 by Victor Amadens I., Duke of Savoy. It was the cradle of Italian unity, and the nucleus of the new kingdom of Italy, into which it was merged in 1861. See ITALY.

Sardin'ia, in New York, a post-village and township of Erie co., 30 m. S.E. of Buffalo.

Sardinia, in Ohio, a post-village of Brown co., 90 m. S.W. of Columbus.

Sardis, or **Sard'es**, a ruined city of Asia Minor and the ancient cap. of Lydia, 50 m. from Smyrna (Fig. 2006). *S.* was one of the first towns to embrace Christianity, its people having, it is said, been converted by the apostle

Fig. 2006. — SARDIS.

John. It is one of the seven churches of Asia mentioned in *Revelations* (i. 11). It was captured by the Turks in the 11th and 14th centuries. *Sart*, which now occupies its site, is a miserable place, consisting of a few mud huts. All the neighborhood is covered by ruins of temples, theatres, and other monuments of ancient grandeur.

Sardis, in Kentucky, a post-village of Mason co., abt. 14 m. S. of Maysville.

Sardis, in Mississippi, a post-town, semi-cap. of Panola co., 54 m. S. of Memphis.

Sardis, in Ohio, a post-village of Monroe co., 36 m. E.N. E. of Marietta.

Sardon'ic, *a.* [Fr. *sardonique*; etymology uncertain.] Forced or feigned; — applied to laughter or smiles in which, under the semblance of gayety, one scarce conceals bitterness of thought, or mockery.

S. laugh. See RISUS SARDONICUS.

Sardon'yx, *n.* [Gr., from *Sardis*, *q. v.*] (*Min.*) Onyx consisting of alternate layers of sard and nearly opaque-white chalcidony. It is the most beautiful and the rarest variety of onyx, and that which was held in the greatest esteem by the ancients for engraving into cameos.

Sa'ree, **Sa'ri**, *n.* A cotton fabric worn by Indian women, wrapped about the person; — also, a long embroidered scarf of gauze or silk.

Sarep'ta, a fortified town of European Russia, govt. of Saratov, on the Sarpa, near its confluence with the Volga, 15 m. S. of Tzaritsin; pop. 5,000.

Sarepta, in Mississippi, a post-village of Calhoun co., 28 m. S.E. of Oxford.

Sargas'so Sea. (*Phys. Geog.*) A name given to that part of the N. Atlantic Ocean, whose area is covered with floating sea-weed (*Sargassum bacciferum*).

Sargas'sum, *n.* (*Bot.*) A genus of *Algae*. *S. bacciferum* is the Gulf-weed of the Atlantic. Its stems are much employed in S. America, under the name of *goitre-sticks*, in the treatment of goitre. Their beneficial effects are due to the large proportion of iodine existing in the plant.

Sargantsville, (*sar'jants-vill*), in New Jersey, a village of Hunterdon co.

Sarguemines, (*sarg'meen*), a town of France, dept. of Moselle, on the Sarre, 41 m. N.E. of Metz. *Manuf.* Silks, velvets, gauzes, leather, and earthenware. Pop. 6,500.

Sari, (*sar're*), a town of Persia, cap. of the prov. of Mazanderan, 18 m. from the S. shore of the Caspian Sea, and 115 m. N.E. of Teheran.

Sark, *n.* [A. S. *serce*, *syrc*.] A Scottishism for a shirt.

Sark, a river of Scotland, co. of Dumfries, falling into the Solway Frith, near its E. extremity.

Sark, a small island in the English Channel, belonging to Great Britain; Lat. 49° 30' N., Lon. 2° 52' W., 7 m. E. of Guernsey, and 9 m. N.E. of Jersey. *Ext.* 2 m. in length, and greatest breadth. Pop. 580.

Sark'ing, *n.* (*Carp.*) Thin skirting-boards, &c.

Sarlat, (*sar'la*), a town of France, dept. of Dordogne, on the Sarlat, 98 m. E. of Bordeaux; pop. 6,000.

Sarmatia, (*sar-mā'shi-a.*) (*Anc. Hist.*) A name given by the Romans to all the country in Europe and Asia between the Vistula and the Caspian Sea. The people inhabiting this country were usually called *Sauromatæ* by the Greeks, and *Sarmatæ* by the Romans. The Sarmatians began to threaten the Roman empire in the reign of Nero (54-68). Since that time they figure promiscuously among the barbarians who vexed the N.E. frontier of the Roman empire. They were finally subdued by the Goths, with whom, in process of time, they were amalgamated.

Sarment, *n.* [Fr., from Lat. *sarmentum*, a twig.] (*Bot.*) A prostrate filiform runner, as of the strawberry.

Sarmentaceous, (*-tā'shas.*) *a.* [From *sarment.*] (*Bot.*) Runner-bearing, as the strawberry.

Sarmentose, **Sarmentous**, *a.* (*Bot.*) Long and filiform, and almost nude; as, a *sarmentose* stem.—Bearing sarments; as, a *sarmentose* plant.

Sarmiento, (*sar-me-en'to.*) a mountain of Terra del Fuego, S. of Gabriel Channel; Lat. 54° 27' 12" S., Lon. 70° 51' 30" W. Height, 6,800 feet.

Sarn, *n.* [W. *sarn*, a causeway.] A stepping-stone in the centre of a brook. (*Prov. Eng.*)

Sarnia, or **Port Sarnia**, in prov. of Ontario, cap. of Lambton co., on the St. Clair River, near Lake Huron. Immense oil refineries have been erected here.

Sarno, a town of S. Italy, prov. of Principato-Citricorio, at the head of the Sarno, 11½ m. N.W. of Salerno. It is noted for its sulphur-baths. Pop. 16,374.

Sarong, *n.* A sort of petticoat worn by women in the East.

Saros, *n.* (*Astron.*) An ancient Assyrian astronomical period, the origin and exact length of which are unknown, though they have been the subject of much dispute. By some authors the *Saros* has been confounded with the *Metonic Cycle*, *q. v.*

Saros, or **Scharos**, (*sha'ros.*) a town of Hungary, 15 m. from Zemplin; pop. 5,500.

Sa'ros, (*Gulf of.*) an inlet of the Ægean Sea, separated from the Hellespont by the peninsula of Gallipoli; ext. 40 m. long, and 20 broad.

Saros-Patak, a town of Hungary, on the Bodrog, 20 m. N.E. of Tokay; pop. 6,000.

Sarothamnus, *n.* (*Bot.*) A genus of plants, order *Fabaceæ*. *S. scoparius* is the common Broom, one of the most elegant of the European shrubs.

Sarpa, a river of Russia, rising in the government of Astrakhan, and, after a N. course of 200 m., falling into the Volga, near Sarapta.

Sarplar, *n.* In England, a large bale, or package, of wool, containing 80 tods, or a ton, in weight.

Sarplier, **Sarpelere**, *n.* [Fr. *serpillière*.] A coarse hempen kind of cloth used as bagging, &c.

Sarpy, in *Nebraska*, an E. co. bordering on Iowa; area, 245 sq. m. Rivers, Elkhorn and Papillon. Surface, undulating; soil, fertile. Min. Limestone. Cottonwood, oak, hickory, and walnut are plentiful. Cap. Papillon. Pop. (1897) 7,230.

Sarracenia cecæ, *n.* (*Bot.*) The *Sarracenia*, or Water-pitcher, or Side-saddle flower family, an ord. of plants, alliance *Ranales*. Diag. Consolidated carpels, a permanent calyx, and axile placentæ.—They consist of perennial herbs, growing about mud-lakes from Labrador to Florida. They have pitcher- or trumpet-shaped leaves.

Fig. 2307.—SIDE-SADDLE FLOWER, (*Sarracenia purpurea.*)

1. A flower, from which the corolla has fallen off, showing the very large 5-angled stigma; a, a fully expanded flower; b, germin; c, section of the fruit.

Calyx permanent, imbricated, carpels united so as to form a compound ovary, and a 3-celled dehiscent fruit, with large axile placentas. A decoction of the root of *Sarracenia purpurea* (Fig. 2307) has been recommended as a remedy for small-pox; but the opinions of medical men differ widely as to its efficacy.

Sar'rasin, **Sar'rasine**, *n.* (*Bot.*) A name sometimes given to buckwheat.

(*Fortif.*) A portenllis; a sarrasin.

Saras, **Saraz**, *n.* A contracted form of sarsaparilla.

Sarsaparilla, *n.* [Sp. *zarzaparilla*; Fr. *salsepareille*.] (*Bot.*) See *SMILAX*.

Sarsfield, in *Maine*, the former name of a township of Aroostook co.

Sartine, (*sart.*) in France, a river rising in the dept. of Orne, and after a S.S.W. course of 160 m., joins the Mayenne near Angers.—A dept. of the N.W. part of France, between Lat. 47° 35' and 48° 40' N., Lon. 0° 25' W., and

0° 50' E., having N. Orne, E. Eure-et-Loire and Loire-et-Cher, S. Indre-et-Loire and Maine-et-Loire, and W. Mayenne; area, 2,470 sq. m. The surface is level, except in the N.W. part, which is hilly. The soil is generally fertile. Rivers. Sarthe, Loire, Huisne, and Vegre rivers. Prod. Wheat, barley, rye, potatoes, wine, &c. Manuf. Woollen and cotton fabrics, paper, hardware, glass, earthenware, and sail-cloth. Chief towns. Le Mans, the cap., La Flèche, Mamers, and St. Calais. Pop. 463,619.

Sarto, (**Andrea del**), (ANDREA VANUCCI), a celebrated Italian painter, b. at Florence, 1488. He was the son of a tailor, and was first apprenticed to a goldsmith, but afterwards studied painting under Piero di Cosimo. Among his earliest and best works are the frescoes of the *Santissima Annunciata* at Florence, representing scenes in the life of the founder of that convent. In the same convent is his admired *Madonna del Sacco*, painted in 1525. S. was invited to France by Francis I. in 1518, and was well received, but returned to Florence the next year, and mispending the money entrusted to him for the purchase of works of art for Francis, he never saw Paris again. Among his other frescoes are a *Last Supper*, in the convent of San Salvi, and an *Annunciation*, and *Disputa della Santissima Trinità*, in the Pitti Palace. The finest of his easel pictures is the *Madonna di San Francesco*, now at Florence. D. in Florence, 1530.

Sarto'rial, *a.* Pertaining, or relating, to a tailor.

Sarto'rius, *n.* [Lat. *sartor*, a tailor.] (*Anat.*) A flat and slender muscle, but the longest of the human body, extending obliquely from the upper and anterior part of the thigh to the upper anterior and inner part of the tibia. It serves to bend the leg obliquely inwards, or to roll the thigh outwards, and at the same time to bring one leg across the other, on which account it has received the name of *sartorius*, or "tailor's muscle."

Sar'versville, in *Pennsylvania*, a post-village of Butler co.

Sarga'na, an ancient town in the Genoese territory, on the Magra, 45 m. from Genoa. It had formerly its own parliament. Pop. 4,000.

Sasbach, (*sas'bak.*) a village of Baden, 17 m. from Strasbourg; pop. 1,500. Here Marshal Turenne fell by a random shot in 1675.

Sash, *n.* [Ar. *saj*, a green sash rolled round the head and falling down behind.] A belt or scarf wound round the waist, or over the shoulders, for ornament; a silken band worn by officers in the army, by the clergy over their cassocks, and, also, as a part of female dress.

[Fr. *chassis*.] (*Arch.*) A piece of framing for holding the squares of glass in a window. It is of two sorts—viz., that called the *French sash*, which is hung like a door to the sash-frame; and that in which it moves vertically from being balanced by a weight on each side, to which it is attached by lines running over pulleys at the top of the sash-frame. When in a window both the upper and lower sashes are movable, the sashes are said to be *double hung*, and *single hung* when only one of them moves.

—*v. a.* To furnish with sashes, or frames, for glass; as, a *sashed* door or window.

Sa'sik, a lake of European Russia, govt. of Bessarabia, 35 m. W. of Akerman. Ext. 16 m. long, and 6 broad.

Sas'in, *n.* (*Zool.*) See ANELOPE.

Saskatch'ewan, ("swift current,") or NELSON RIVER, a river of British N. America, rises in the Rocky Mountains by two heads, one in Lat. 49°, and the other in 53° 30' N., both uniting near Lon. 115° W., and flowing thence into Lake Winnipeg after a N.E. course of about 1,000 m., the greater part of which is navigable.

Sas'safraz, in *Maryland*, a river which rises in Cecil co., and flows W. into Chesapeake Bay, between Cecil and Kent cos.

[Named after the above river.] (*Bot.*) A genus of plants, order *Lauracæ*. *S. officinalis*, common in the forests and barrens of almost all the states, is 10-40 feet high, leaves alternate, flowers greenish-yellow, appearing in May and June, in clustered racemes at the end of the last year's twigs, and after the leaves have expanded. Every part of the tree has a pleasant fragrance, and a sweetish, aromatic taste, which is strongest in the bark of the root. These qualities depend upon an essential oil, which may be obtained by distillation, and which has been highly valued in medicine. The young shoots are a common ingredient in *small beer*, imparting to it a grateful flavor.

Sas'savage, *n.* [Fr., from *sasser*, to lift.] Stones left after sifting.

Sas'sanides, *n. pl.* (*Hist.*) A Persian dynasty, founded by Artaxerxes I., abt. 226. They governed Persia until the Mohammedan conquest in 651.

Sassari, (*sas'sa-re.*) a town of Italy, in the N.W. of the island of Sardinia, on the Turritano, 10 m. from its mouth at Porto Torres, in the Gulf of Sassari, 58 m. N.W. of Oristano, and 100 m. N.N.W. of Cagliari; Lat. 40° 43' 33" N., Lon. 8° 35' E. It is well built and strongly fortified, and has a considerable trade in tobacco, oil, and fruit. Pop. 23,672.—The gulf of same name is 20 m. long and 35 m. broad.

Sas'solin, **Sas'soline**, *n.* (*Min.*) Native boracic acid, from the vicinity of Sasso, near Florence.

Sas'tar, *n.* [Hind. *shāstr*.] Same as SHASTER, *q. v.*

Sat. Sate, *imp.* of SIT, *q. v.*

Satalia, or ANTALIA, a seaport-town of Asia Minor, on the Gulf of Satalia, 50 m. N.E. of Cape Chelidonia; Lat. 36° 50' N., Lon. 30° 45' E.; pop. 8,000.

Sa'tan, *n.* A Hebrew term, meaning *enemy* or *adversary*, and used in several instances in this sense in the Old Testament. Generally, however, it is applied to the Devil, as being the great adversary and enemy of mankind.

Satan'ic, **Satan'ical**, *a.* Having the qualities of

Satan; resembling Satan;—hence, devilish; infernal; extremely wicked or malicious; as, a *satanic* smile.

Satan'ically, *adv.* With the wicked and malicious spirit of Satan; diabolically; infernally; in a satanic manner; fiendishly.

Satan'icalness, *n.* Quality of being satanic; fiendishly wicked, or diabolical; devilishness.

Sa'tanism, *n.* The evil and diabolical spirit of Satan. (*R.*)

Sa'tanist, *n.* A diabolically wicked person. (*R.*)

Satartia, (*sa-tar'she-a.*) in *Mississippi*, a post-village of Yazoo co., 40 m. N.W. of Jackson.

Satch'el, *n.* [Fr. *sacbet*.] A little sack, pouch, or bag;—also, a lady's reticule.

Sate, *old imp.* of SIT for SAT. See SIT.

—*v. a.* [Lat. *satio*, from *satis*, enough; It. *saziare*, to satisfy.] To satiate; to satisfy the appetite of; to glut; to cloy; to feed, or fill, beyond natural desire; as, he *sated* of pleasure.

Sate'less, *a.* That may not be sated; insatiable. (*R.*)

Sat'ellite, *n.* [Lat. *satelles*, an attendant.] (*Astron.*)

A term applied to certain secondary planets moving round the other planets, as the moon does round the earth. They are so called because always found attending them, for rising and setting, and completing the orbit round the sun together with them. The words *moon* and *satellite* are sometimes used indifferently; thus Jupiter's moons, or Jupiter's satellites, are spoken of; but the term *moon* is generally applied to the earth's attendant, and the term *satellite* to the small moons around Jupiter, Saturn, and Uranus.

—An obsequious dependant; a subservient follower; a close, submissive attendant; as, every great man has his satellites.

Sat'ellitions, *a.* Pertaining or relating to, or consisting of, satellites. (*R.*)

Satiate, (*sā'shi-āt.*) *v. a.* [Lat. *satio*, *satiatus*, from *satis*, enough.] To satisfy; to fill or fully gratify the appetite or desire of; to feed to the full, or to furnish enjoyment to the extent of desire; to fill to the extent of want or demand; to sate; to glut; as, a tiger *satiated* with blood.—To gorge; to surfeit; to fill or cram beyond natural desire; to gratify desire to repletion or the utmost; as, though *satiated*, he is not satisfied.

—*a.* Filled to satiety; glutted; gorged; cloyed;—preceding with or of; as, *satiated* of applause.

Satiation, (*sā'shi-ā'shun.*) *a.* State of being filled to satiety.

Satie'ty, *n.* [Fr. *satiété*; Lat. *satietas*—*satis*.] State of being satiated; fulness of gratification, either of the appetite or any sensual desire;—usually, fulness beyond desire; surfeit; repletion; an excess of gratification which cloy, or excites wearisomeness or loathing.

Satil'pa Creek, in *Alabama*, enters the Alabama from Clarke co., a few m. S.E. of Coffeeville.

Sat'in, *n.* [Fr.; probably from Gr. and Lat. *serikon*, muslin, from *Indos*, Scinde.] A species of silk stuff, originally brought from China. It is so manufactured that it does not exhibit the crossing of the warp and weft in weaving, but has a uniform and highly-glossed surface; it is also thicker than ordinary silk.

(*Manuf.*) A soft, closely-woven silk cloth, with a glossy surface. In making other silk stuffs, each half of the warp is raised alternately, but in weaving *S.* the workman only raises the fifth or eighth part of the warp; thus the woof is hidden beneath the warp, which, presenting an even, smooth, and close surface, is better able to reflect the rays of light. In France the chief seat of the *S.* manufacture is at Lyons, and in Italy at Genoa and Florence.

Satinet, *n.* [Fr., from *satim*.] A thin kind of satin;—also, a particular sort of cloth, made of cotton warp and woollen filling.

Sat'in-flower, *n.* (*Bot.*) See LUNARIA.

Sat'in-spar, **Sat'in-stone**, *n.* (*Min.*) A fibrous variety of gypsum. It exhibits, when polished, a lustre like satin, whence its name.

Sat'in-wood, *n.* (*Bot.*) See CHLOROXYLON.

Sat'iny, *a.* Resembling, or consisting of, satin; as, a *satin* texture, a *satin* skin.

Satire, (*sā'tīre*, sometimes pron. *sāt'ur*.) *n.* [Fr., from Lat. *satira*.] Keenness and severity of remark; sarcasm; trenchant wit; biting ridicule; incisive humor; pungent irony; denunciatory and exposure to derision or reprobation.

(*Lit.*) The representation of follies or vices in a ridiculous form, either in discourse or dramatic action. The Romans were the first to distinguish themselves in this species of literature. The Roman *S.* was at first a kind of rude dramatic composition, filled with various matter and written in various kinds of verse, and took its name of *satira*, or *satira*, from the *lanx satira*, a dish filled with various kinds of fruits and herbs, which was carried in procession at the feasts of Ceres as the first-fruits or gatherings of the season. These *S.* were set to music and repeated with suitable gestures, accompanied with the flute and dancing. They contained much ridicule and smart repartee; and hence poems characterized by these marks, and written to expose vice, got the name of *S.* Lucilino was regarded by the Romans as the father of this species of composition, and was the first to introduce those principles of art which came afterwards to be regarded as essential to it. His poems formed the models of the *S.* of Horace, the great master in this art, and whose humorous and playful raillery of the follies and foibles of mankind are ever fresh and ever true. He reproves with a smiling aspect, and while he moralizes like a philosopher, he discovers at the same time all the politeness of a courtier. Juvenal is much more serious and declamatory. He has more strength and fire, and more elevation of style than Horace, but is at the same time greatly inferior to him in gracefulness and

ease. Persius, the only other satirist of note whose works have come down to us, is a nervous and lively writer, but has more of the fire and force of Juvenal than of the politeness of Horace. Though the name *satire* usually is confined to poetical compositions, prose works of a satirical character are frequently included under the same head. Modern nations have not generally furnished many distinguished satirists. Among the French may be mentioned Rabelais, Montaigne, and Voltaire, and in England, Pope, Swift, Fielding, Byron, and Thackeray.

Satir'ic, Satir'ical, a. [Fr. *satirique*.] Belonging to, or conveying, satire; having the nature of satire; as, a *satiric* style, a *satirical* effusion. — Censorious; severe in language; cutting; incisive; caustic; trenchant; poignant; bitter; reproachful; abusive; sarcastic; as, a *satirical* vein of humor, a *satirical* tongue.

Satir'ically, adv. With severity of remark; with caustic invective; with disposition or intent to censure sarcastically; as, to speak or write *satirically*.

Satir'icalness, n. State or quality of being satirical.

Sat'irist, n. One who writes or speaks satire; as, Pope, Byron, and Thackeray are the chief English *satirists*.

Sat'irize, v. a. [Fr. *satiriser*.] To expose by satire; to censure with scathing keenness or severity; to lampoon; as, he was one who *satirized* his betters.

Satisfaction, (-fák'shun,) v. a. [Fr. Lat. *satisfactio*—*satis*, enough, and *facio*, to make.] Act of satisfying, or state of being satisfied; that state of the mind which results from the full gratification of desire; repose of mind, or contentment with present possession and enjoyment; pleasure of the mind in the certainty of anything; contentment. — That state which results from relief from suspense, doubt, or uncertainty; conviction; compensation; atonement.

"Pay the rigid satisfaction—death for death."—Milton.

—Indemnification; recompense; amends; payment or settlement of a claim, due, right, demand, &c.; discharge, as of a debt; as, an acquittance in full *satisfaction* of all demands.

Satisfactorily, adv. In a manner to give satisfaction or content; in a manner to express or command conviction or belief; in a satisfactory manner; as, he answered *satisfactorily* the questions put to him.

Satisfactoriness, n. State, quality, or condition of being satisfactory or satisfied; power of giving content or satisfaction; as, the *satisfactoriness* of a promise or agreement.

Satisfactory, a. [Fr. *satisfactoire*.] Giving or producing satisfaction; yielding content; relieving the mind from doubt or uncertainty, and enabling it to rest with confidence; as, a *satisfactory* account of a thing, person, or transaction. — Making amends, indemnification, or recompense; atoning; causing to cease from claims, and to rest content; as, to make *satisfactory* compensation, to render a *satisfactory* excuse or apology, &c.

Satisfiable, a. That may be satisfied.

Satisfier, n. One who gives or renders satisfaction.

Satisfy, v. a. (imp. and pp. SATISFIED.) [Fr. *satisfaire*.] To do that which is enough to; to afford full gratification, as to wants, wishes, needs, or desires; to supply, as possession or enjoyment, till no more is desired; to gratify; to content; to feed to the full; to suffice; to satiate; to supply fully, as what is necessary and demanded by natural laws; as, to *satisfy* one's appetite. — To pay to content, or to the full extent of claims or demands; to recompense; to discharge, as a debt; to indemnify; to requite; to compensate; to remunerate; to appease by punishment; as, to *satisfy* a judgment. — To free from doubt, suspense, or uncertainty; to convince; to cause to rest in confidence by ascertaining the truth; as, to *satisfy* one's self by personal observation.

—v. n. To do that which gives satisfaction or content; to afford gratification. — To feed or supply to the full. — To atone; to make payment or compensation.

Satisfyingly, adv. In a manner to afford satisfaction.

Sativa (sa-tē'ra), a town of the Republic of Colombia, 60 m. N.E. of Tunja.

Satorally-Ujahely, (sa-to-ral'ya oo-je-le,) a town of N. Hungary, 8 m. W.S.W. of Zemplin; pop. 7,600.

Sat'rap, n. [Fr. *satrape*, from Gr. *satrapēs*; a word of Persian origin.] In ancient Persia, the governor or viceroy of a province.

Sat'rapy, n. The government or jurisdiction of a satrap.

Sat'sop River, in Washington, rises in Sawamish co., and flows in a southerly direction into the Chehalis river, 22 miles from its mouth.

Sattara', a state of British India, presidency of Bombay, bet. Lat. 16° 22' and 18° 32' N., Lon. 73° 30' and 76° E. Area, 16,222 sq. m. Cap. Sattara. Pop. 1,000,000.

Sat'urable, a. [Fr.] That may be saturated; susceptible of saturation.

Sat'urant, a. [Lat. *saturans*.] Saturating; absorbing or impregnating to the full.

—n. (Med.) A medicine which serves to neutralize an acidulous condition of the stomach.

Saturate, (sāt'yū-rāt,) v. a. [Lat. *saturo*, *saturatus*.] To fill or supply to fullness; to impregnate or unite with till no more can be received or absorbed; to glut; to saturate; as, the earth is *saturated* with rain.

—a. [Lat. *saturatus*.] Soaked or filled with to repletion; as, leaves *saturated* with moisture.

Saturation, (sāt-yū-rā'shun,) n. [Fr., from L. Lat. *saturatio*.] Act of saturating, or state of being saturated; a filling or impregnation to fullness.

(Chem.) A term signifying a fluid which has absorbed as much of an article as it can hold in solution. If a quantity of salt be gradually added to a glass of water, and the liquid stirred after each addition till the fresh supply is dissolved, the water will eventually become so

loaded or charged with salt that all fresh additions, instead of being taken up by the water, will fall to the bottom of the vessel just as they were put in. When the fluid has reached the point at which it can dissolve or hold no more, it is said to be *saturated*.

Sat'urn, n. [Symbol ♄, a sickle.] (Astron.) Beyond Jupiter, and at a distance almost twice as great, is the ring-engirdled planet Saturn, the most distant planet from the sun known to the ancients. It is in several respects the most interesting planet in the solar system, being environed with 3, probably 5, stupendous rings, and accompanied by at least 8 moons, with vacancies probably occupied by 2 others, as yet undiscovered. A volume would be required to treat exhaustively of a world so unique, and on a scale so extensive, as compared with our little world. In size Saturn ranks next to Jupiter, its diameter being 73,000 miles. Its year is nearly 29½ times longer than ours, and though exceeding the earth in bulk nearly 750 times, its rotation period is much less, being only 10h. 14m. Saturn's distance from the sun is 875,000,000 miles. It would take an express train, at 40 miles an hour, 2,535 years to make the journey thither, and 16,000 years to pass round the circle of its orbit. Yet this mighty globe, with its rings and moons, accomplishes the distance in 29½ years, at the speed of 6 miles a second. Its oblateness, owing to rapid rotation and small density (about equal to that of pine wood), exceeds that of any planet, amounting to 6,170 miles. This rapid rotation, combined with the great length of the year, gives 25,200 days to the Saturnian year, or 3 times as many days as our year has hours. The appearance of Saturn through a telescope of adequate size and power affords a marvellous and resistless fascination to every beholder. As far as known, it is the only planet surrounded with a ring, or rather with multiple rings.

The following data and physical details are the result

Fig. 2308.—SATURN.

of a recent and prolonged series of measurements and observations by Dr. E. E. Barnard, with the 36-inch telescope at the Lick Observatory, Mt. Hamilton, Cal. They were made in 1894, and are more trustworthy than any heretofore published, except those made by Prof. Asaph Hall, at the Naval Observatory, Washington, in 1884-7, with a 23-inch telescope. These results are strikingly in accord, which lends an additional assurance to their correctness. The ring system is triple, and often appears to be quintuple. The outer ring, though much narrower than the middle one, is sometimes seen with one, and then again with two, black, hair-like lines, which strongly suggest that they are temporary divisions. This conclusion is strengthened by the fact that they have been seen on both sides of the ring. The inner ring is transparent, the body of the planet being easily visible through it, showing that it is not solid, but composed of discrete particles. Various opinions have been entertained regarding the composition of the other two. The telescope was inadequate to the task, but the spectroscopic, which has solved so many mysteries, has settled the controversy, and decides that they are also composed of separate solid particles, destitute of coherence. The method of solution was briefly as follows: Let it be understood that the spectral lines in a stationary light, and a stationary spectroscopic, always occupy their several places undeviatingly; while the light is moving toward the spectroscopic the lines will be displaced toward the violet end of the spectrum, and, if it be receding, the same lines will be moved slightly toward the red. In this way the motion of stars in the line of sight can be determined, which cannot be done with a telescope. Now, if the ring be a solid, the outer edge will move faster than the inner edge. On the other hand, if the ring be composed of moving particles, the inner edge will move the faster, being nearer the planet, the same as Mercury moves faster than Venus, and the earth faster than Mars. The test was applied by Prof. Keeler, of the Allegheny Observatory, Pa. The lines from the inner edge were seen to be moved toward the violet, and those from the outer edge toward the red. The theory is as beautiful as it is ingenious. The inner ring, from its translucency, is called the *crane* ring. The following table gives Dr. Barnard's values of the dimensions of the planet and its rings:

Equatorial diameter of Saturn...	76,150 miles.
Polar diameter of Saturn	69,980 miles.
Polar compression.....	6,170 miles.
Outer diameter of outer ring.....	172,730 miles.
Inner diameter of outer ring...	149,620 miles.
Outer diameter of middle ring...	144,830 miles.
Inner diameter of middle ring...	109,530 miles.
Inner diameter of crane ring...	90,260 miles.
Width of space between outer and middle rings.....	2,395 miles.

His measures indicate that the globe of Saturn is centrally placed within the rings. As the edge of the

rings is parallel with the line of sight only once in nearly 15 years, and was not thus parallel when the above measures were made, their thickness was not of course susceptible of measurement. They are supposed to be from 50 to 100 miles in thickness. As the year of Saturn is 29½ times the length of ours, it follows that the polar regions are alternately 14¾ years in light and darkness. The first known ring was discovered by Galileo, but of its nature he was ignorant. He announced his discovery to Kepler in the following logograph (word riddle): a a a a, b, e e e e, g, i i i i, m u m m m, u n, o, p, r r, s s s, t t t, v v, which, arranged properly, reads: "Altissimum planetam tergeminum observavi" ("I have observed the most distant planet to be threefold.") He died ignorant of the cause of its triplex appearance. Not until the lapse of 50 years was the mystery solved by Huyghens, which, like Galileo, he announced logographically, as follows: a a a a a a a, c c c c c, d, e e e e e, g, h, i i i i i, l l l l, m m, n n u n n n n n, o o o o, p p, q, r r, s, t t t t, u u u u u. When he had assured himself that his discovery was a certainty, he restored the letters to their allotted places, forming a Latin sentence, which translated reads: "The planet is surrounded by a slender flat ring, nowhere touching it, inclined to the ecliptic."

The discovery excited an immense amount of popular enthusiasm, but poor Galileo had died in ignorance of the cause of what he had seen, and which he thought might be handles to the planet. All the rings lie in one plane, and revolve around the planet in about 10h. 30m. The inner edge of the inner transparent ring is but 10,000 miles from the surface of the planet. A magnifying power therefore of 2,000 diameters would bring it to within 5 miles of an observer when in its zenith. The view of the planet from the ring would be inexpressively grand, filling as it would nearly the whole sky, leaving only a narrow margin near the horizon. The two sides of the flat rings are alternately in light and darkness for 14¾ years. Minus is the nearest moon, and when in the zenith is but 17,000 miles from an observer, if any there be, and would appear 350 times as large as our moon. (See *SATELLITE*.) The frequency and prolonged duration of the eclipses of the sun by the ring is another of the many marvels visible to a Saturnian inhabitant. The following statement shows the great length of the duration of totality as seen from a few latitudes, both north and south: In N. Lat. 40°, the sun will rise and set totally eclipsed for 1 year and 28 days, passing clear of the ring at noon; in N. Lat. 20°, the period will be 9 years and 48 days; in S. Lat. 20°, the eclipse will be total some part of the day for 11 years and 306 days, and in S. Lat. 40°, at summer solstice, it will last all day for 6 years and 236 days. The assigned limit of this paper forbids a more complete statement of the many eclipses by the different rings, and their sudden ending while passing across the spaces between them, and of their re-commencement as the sun crosses the next ring, sometimes being total, at other times partial, affording an unending source of delight if there be anyone there to enjoy the scene. Another set of eclipses of the sun are almost hourly occurring by Saturn's 8 satellites, to say nothing of their being themselves eclipsed by the planet, full details of which would fill a volume to describe.

(Alchemy.) The metal lead.

(Her.) Same as *SABLE* (q. v.).

Saturnian, a. [Lat. *Saturnius*.] (Myth.) Pertaining to Saturn, whose fabulous age or reign, from the wildness and wisdom of his government, is called the *Golden Age*.—Hence, golden; happy; distinguished for purity, integrity, and simplicity.

"Th' Augustus, born to bring Saturnian times."—Pope.

Saturnine, a. [Fr. *saturnien*, from Lat. *saturninus*, from *Saturnus*.] Born under the planet Saturn, and supposed to be under his influence.—Hence, dull; heavy; grave; lethargic; phlegmatic; not readily susceptible of excitement; not mercurial; as, a *saturnine* temper, a *saturnine* face.

(Alchemy.) Pertaining, or relating, to lead.

Saturnist, n. A person of grave, melancholic, or phlegmatic temperament.

Satyr, (sāt'ēr,) n. [Fr. *satyr*; Lat. *satyrus*; Gr. *satyros*, a faun.] (Myth.) A mythological sylvan deity or

Fig. 2309.—A SATYR.

demi-god, represented as part man and part goat, and extremely wanton and lascivious; a faun.

Satyrfa'sis, *n.* [Lat. and Gr.] (*Med.*) Immoderate desire for venery; priapism.

Satyr'ic, *a.* Pertaining, or having reference, to satyrs; as, the *satyr'ic* drama.

Satyr'idæ, *n. pl.* (*Zoöl.*) A family of lepidopterous insects, comprising butterflies which have the wings broad and more or less rounded. The larvæ are pale-green. The genus *Satyrus*, or *Hipparchia*, has the wings of a most delicate brown color, with eye-like spots near the outer margins. The species have a wing expanse of 2 to 3 inches.

Satyr'ium, *n.* (*Bot.*) A genus of plants, order *Orchidaceæ*, possessing supposed aphrodisiac properties.

Sauce, (*saws*), *n.* [O. Fr. *sauce*; Fr. *sauce*, from Lat. *salsus*, from *salio*, to salt.] That which gives relish or savor to food; a mixture or compound to be eaten with food for improving its gusto; an appetizing condiment; a piquant or pungent *bonne-bouche* serving as a quickener of the palate.—Culinary vegetables and esculents eaten with flesh-meat. (Used as colloquial American and provincial English.)—Insolence; impertinence; indecorous language; oral abuse; as, give me no *sauce*. (*Vulgar.*)

To serve one the same *sauce*, to retaliate in kind, as by one injury for another.

—*v. a.* To make saucy with *sauce*; to accompany meat with some condiment to give it a higher relish or flavor; to furnish with an appetizing concomitant.—To gratify with rich tastes; to please; to pamper;—hence, to cover, mix, or dress, as if with *sauce*. (*R.*)—To render poignant, pungent, or piquant; to give zest, gusto, flavor, or interest to; to set off; to vary and cause to be attractive.

"Thou say'st his meat was *sauced* with thy upbraidings." *Shaks.*

—To be impudent or saucy to; to treat with pert, insolent, or shrewish language; as, his wife *sauces* him when she notices him to be the worse for liquor. (*Colloq. and vulgar.*)

Sauce-boat, *n.* A *sauce-tureen*; a vessel with a lip for pouring out *sauce* at table.

Sauce-box, *n.* A saucy, pert, impudent person.

Saucelito, in *California*, a village and shipping station of Marin co., on San Francisco Bay, 9 m. N.W. of San Francisco.

Sauce-pan, *n.* A small skillet in which *sauce*, &c., is boiled or prepared; a kind of stew-pan.

Saucer, (*saw'sr*), *n.* [Fr. *saucière*.] A circular plate, like a deep dish, in which a tea-cup or coffee-cup is set.

—*a.* Round and deep-set; as, *saucer* eyes.

Sauce-tureen, *n.* Same as *SAUCE-BOAT*, *q. v.*

Sau'con, in *Pennsylvania*, a township of Northampton co.

Saucun Creek, in *Pennsylvania*, flows into the Lehigh River near Easton, from Northampton co.

Saucily, *adv.* [From *saucy*.] Impudently; pertly; with impertinent boldness or contemptuous insouciance; as, she spoke quite *saucily*.

Sauciness, (*saw'si-nes*), *n.* Quality of being saucy; impudence of language; pertness or petulance of speech; contemptuous disrespect manifested toward superiors; impertinent insouciance or boldness of manner.

"Imputing it to the natural *sauciness* of a pedant, they made him eat his words."—*L'Estrange*.

Saucisse, *Saucisson*, (*sō-sees'*, *sō-sees-sōng'*), *n.* [Fr., from *saucisse*, sausage.] (*Gun.*) A fascine of more than the usual length,—but the principal application of the term is to the apparatus for firing a military mine. This consists of a long bag or pipe of linen, cloth, or leather, from one inch to one-and-a-half inches in diameter, and charged with gunpowder. One end is laid in the mine to be exploded; the other is conducted through the galleries to a place where the engineers can fire it in safety. The *electric spark* is now preferred to the *saucisson*.

(*Fortif.*) A long bundle of fascines for erecting batteries, &c.

Saucy, (*sau'sy*), *a.* (*comp.* *SAUCIER*; *superl.* *SAUCIEST*.) [From *sauce*; Lat. *salsus*, salt, sharp, pungent.] Indulging in a pungent sort of wit or humor; impudent; insolent; impertinent; rude; bold to excess; transgressing the rules of decorum; contemptuously insouciant or petulant; as, a *saucy* domestic.

"No *saucy* citizen shall dare to strike a soldier."—*Dryden*.

—Expressive of insouciance or impudence; as, she has a *saucy* look.

Sau'ey-bark, *n.* Same as *SASSY-BARK*, *q. v.*

Saud, *n.* See *SAADH*.

Sauer-kraut, (*sour'-krout*), *n.* [Ger. *sauer*, sour, and *kraut*, cabbage.] (*Cookery.*) A salted preparation of cabbage much esteemed in Germany, and among the German population of the U. States, and of which large quantities are got ready for winter use. It is made by shredding the cabbages, and packing them in layers in barrels with salt, whole pepper, and a few cloves, the whole mass being firmly pressed down with weights. Partial fermentation soon sets in, and the watery juice rises to the surface. This expressed juice is, after a time, poured off, and water containing a solution of salt poured in, and changed from time to time till it ceases to rise with a scum and fetid smell. The cabbage is then fit for keeping, and is stored in barrels, still under pressure, in cellars, and continues in excellent condition for use till late in the spring. When used, it is washed with soft water, and stewed with bacon or salted meat, and is said to be very wholesome.

Sangatuck, in *Connecticut*, a post-vill. of Fairfield co.

—A river flowing into Long Island Sound from Fairfield co.

Sangatuck, in *Michigan*, a post-village of Allegan co., 40 m. S.W. of Grand Rapids.

Sau'gerties, in *New York*, a post-village and township of Ulster co., on the Hudson, abt. 100 m. N. of New York.

Sau'gus, in *Massachusetts*, a post-township of Essex co., 11 m. N. of Boston.

Sauk, in *Wisconsin*, a S.W. central co., bordering on the Wisconsin river; *area*, 850 sq. m. *Rivers.* The Baraboo is the principal. *Surface*, undulating; *soil*, fertile; timber is abundant. *Cap.* Baraboo. *Pop.* (1895) 32,919.

Sauk Cen'ter, in *Minnesota*, a city of Stearns co., 45 m. W.N.W. of St. Cloud. *Pop.* (1895) 2,015.

Sauk City, in *Miss.*, a v. of Stearns co., 3 m. N. of St. Cloud.—In *Wis.*, a p.-v. of Sauk co., 16 m. S. of Baraboo.

Sauk Rapids, in *Miss.*, a p.-v. and twp., cap. of Benton co., on the Mississippi, 80 m. N.W. of St. Paul. April 14, 1886, this town was almost destroyed by a cyclone, about 30 persons were killed and over 100 wounded.

Sauk River, in *Minnesota*, formed from several lakes in Stearns co., and flows E. into the Mississippi abt. 3 m. N. of St. Cloud.

Saukville, in *Wisconsin*, a post-village and township of Ozaukee county, 26 miles north of Milwaukee city.

Saul, (*sawl*). (*Script.*) The son of Kish, of the tribe of Benjamin, the first king of the Israelites, anointed by Samuel, B. C. 1091, and after a reign of forty years, filled with various events, slain with his sons on Mount Gilboa. He was succeeded by David, who was his son-in-law, and whom he had endeavored to put to death. His history is contained in 1 *Sam.* x.-xxxi.

(*Bot.*) See *SHOREA*.

Sault, (*sō*), *n.* [O. Fr.] A rapid in certain rivers; as, the *Sault* de Ste. Marie.

Sault aux Récollets, (*soo-o-ra-kol-la'*), a village of prov. of Quebec, on the island of Montreal, 8 m. from the city of Montreal.

Sault Sainte Marie (*soo-sent-ma'ree*), in *Michigan*, an important city of Chippewa co., on St. Mary's river. *Pop.* (1897) 8,560. See SECTION II.

Sault Saint Mary, a village of Ontario, on St. Mary's River, abt. 12 m. E. of Lake Superior.

Sau'mur, (*so'moor*), a town of France, dept. of Maine-et-Loire, on the Loire, 28 m. S.E. of Angers. *Manuf.* Linens and cambrics. *Pop.* 14,500.

Sau'nders, *n.* See *SANDERS*.

Sau'nders-blue, *n.* (*Paint.*) An old name for *ULTRAMARINE*, *q. v.*

Saunders's Island, in the S. Atlantic Ocean; Lat. 57° 49' S., Lon. 26° 44' W.

Sau'ne'min, or **Sau'ne'man**, in *Illinois*, a township of Livingston co.

Sau'ntee, in *Nebraska*, a village of Sarpy co., 28 m. S.W. of Omaha City.

Saunter, (*sân'ter*), *v. n.* [Icel. *seinlátr*, full of delay.] To wander or stroll about idly or discursively; to lounge; to linger in a dilly-dallying manner; as, to *saunter* about town.

—*n.* A sauntering or strolling about idly; also, a place for sauntering; as, he takes his daily *saunter* up and down Broadway.

Sau'nter, *n.* One who saunters, or wanders about idly; as, he is a well-known *saunterer* about the clubs.

Sau'quoit, in *New York*, a post-village of Oneida co., 9 m. S. of Utica.

Saur, *n.* [From Gael. *sal*, filth.] Urine from a shippon or cow-house.

Sau'ria, or **Sau'rians**, *n. pl.* [Gr. *sauros*, a lizard.] (*Zoöl.*) An order of reptiles founded by Cuvier, and now divided into the two orders of *Lacertilia*, lizards, and *Crocodylia*, crocodilians. The most gigantic and remarkable species of saurian reptiles are now extinct, but their fossil remains, immense in size and wonderful as they appear, afford incontestable evidence of their similarity in structure to the harmless little lizard of the present day. The diversity in the habits of the existing saurians is very considerable—some being more or less aquatic, others strictly terrestrial, while others are essentially arboreal. The greater part feed on animal substances; some of them preferring fish, and others attacking small animals, while some are entirely insectivorous, and a few are herbivorous. They are all furnished with teeth, which are of a simple conical form, and adapted rather for securing and tearing their prey, than for masticating it; their toes are generally furnished with claws, and they all have a tail more or less strout, and generally very thick at the base. A few species, exceptions to the general character, have only two legs. The distinguishing characteristics of different Saurian reptiles will be found under the words *CROCODILE*, *ALLIGATOR*, *CHAMELEON*, *AEAMA*, *LIZARD*, *IGUANA*, *GECKO*, *PLESIOSAURUS*, *ICHTHYOSAURUS*, &c.

Sau'roid, *n.* [Gr. *sauros*, lizard, and *eidos*, form.] Resembling the lizard in various characteristics; as, *sau'roid* fish.

Sau'ride, *n. pl.* (*Zoöl.*) The Gar-pike family, comprising elongated fishes covered with scales of stony hardness, which are extended into imbricated spines upon the first rays of all the fins; about 25 species, all American, are known. The genus *Lepidosteus*, containing the Gar-fishes of the Northern lakes, Western and Southern rivers, is characterized by elongated slightly unequal jaws, which are furnished over their whole inner surface with rasp-like teeth, and a row of long, pointed teeth along their edges.

Saururææ, *n.* (*Bot.*) The Lizard-tail family, a small order of plants, alliance *Piperates*, consisting of marshy herbs, with alternate stipulate leaves and spiked achlamydeous flowers. They are natives of N. America, N. India, and China. They are of no economic importance.

Sau'rurus, *n.* (*Zoöl.*) The typical genus of the order *SAURURACEÆ*, *q. v.*

Sausage, (*saw'saj*), *n.* [Fr. *saucisse*, from Lat. *salsus*,

seasoned, from *sal*, salt.] The prepared intestine of an ox, sheep, or pig, stuffed with minced meat seasoned, and sometimes prepared by being simply rolled, without stuffing.

Sau'sage-meat, *n.* Meat minced and seasoned for cooking into sausages.

Sau'sage-roll, *n.* (*Cookery.*) A patty consisting of a sausage baked between layers of light puff paste.

Saussure, (*sos'soor*), HORACE BENEDICT DE, a celebrated naturalist, b. at Geneva, 1740; attained an early proficiency in the mathematical and physical sciences, and was for several years professor of philosophy at Geneva. He at first applied himself to the study of botany. He travelled in France, England, Italy, &c., and by the valuable observations which he made, particularly among the glaciers of the Alps, he contributed much to the advancement of geology and meteorology. *S.* first visited Chamouni in 1760. In 1788 he spent seventeen days on the pass of the Col du Géant. *S.* constructed several improved scientific instruments, viz., a thermometer, a hygrometer, a eudiometer, an electrometer, &c. His most important work is the record of his Alpine observations, — *Voyages dans les Alpes*, in 4 vols., published between 1779-96. D. 1799.

Saus'surite, *n.* [Named after *Saussure*, *q. v.*] (*Min.*) A compact variety of equidote of a green or ash-gray color, forming the jade or nephrite of the Swiss Alps.

Sauterelle, (*sôt'rel*), *n.* An instrument used by stoucutters and carpenters to trace and form angles.

Sauterne, (*sô-lairn*), *n.* [Fr.] A favorite growth of the Bordeaux class of French white wines.

Sauvage'siaceæ, *n. pl.* (*Bot.*) The *Sauvagesia* family, a small order of plants, alliance *Violales*, by some botanists regarded as a sub-order of *Violaceæ*, but distinguished by several minor characters. The plants of this order are natives of South America and the West Indies. Their properties have not been investigated. *S. erecta*, the species best known, contains much mucilage, and has been used internally as a diuretic, also externally in diseases of the eye.

Sauvegarde, (*sôu'gahrd*), *n.* (*Zoöl.*) Same as *MONITOR*, *q. v.*

Sauvé, (*sove*), CHARLOTTE DE LA BAUME SEMBLANÇAY, BARONESS DE, a French lady, b. 1551, was equally distinguished for her beauty and wit. She was one of the attendants upon Catherine de Medici, and was beloved by the King of Navarre, afterwards Henri IV., over whom she, for a long time, held considerable ascendancy. She was subsequently married to the Marquis de Noirmoutier. D. 1617.

Sav'able, *a.* [From *save*.] That may be saved; as, a *savable* condition of the soul.

Sav'ableness, *n.* Susceptibility of being saved.

Savacon, (*sáv'a-kor*), *n.* (*Zoöl.*) Same as *BOAT-BILL*, *q. v.*

Savage, (*sáv'aj*), *a.* [Fr. *sauvage*; Sp. *salvaje*; It. *selvaggio*, from Lat. *selva*, a wood, *sylvaticus*, a sylvan.] Pertaining to the forest; remote from human abodes and civilization; wild; uncultivated; as, a *savage* wilderness.—Without tameness or gentleness; wild; fierce; as, a *savage* beast of prey.—Without civilization or refinement; untaught; unpolished; rude; coarse; as, *savage* life or manners, *savage* instincts.—Barbarous; inhuman; murderous; merciless; truculent; characterized by fierceness or cruelty; as, a *savage* disposition, a *savage* deed.

—*n.* A human being in his native state of rudeness, inhabiting the forest or wilderness; one who is untaught, uncivilized, or without cultivation of mind or manners.—A man of extreme or brutal cruelty of disposition; a barbarian; one destitute of human feeling.

—*v. a.* To make wild, barbarous, or cruel; as, *savaged* by woe.

Savage Islands, a group in the S. Pacific Ocean, Lat. 19° 1' S., Lon. 169° 37' W. The largest is 33 m. in circumference.

Sav'agely, *adv.* In a *savage* manner; barbarously; brutally; cruelly; as, a person *savagely* abused.

Savage Mountain, extending from Alleghany co., Maryland, to Somerset co., Pennsylvania.

Sav'ageness, *n.* State or quality of being *savage*; wildness; an untamed, uncultivated, or uncivilized condition.—Cruelty; brutality; barbarousness; as, the *savageness* of a grizzly bear.

Sav'agery, *n.* [Fr. *sauvagerie*.] State or condition of being *savage*; a wild, rude, aboriginal condition; barbarism.—A deed of cruelty; an act of barbarity or brutality.

Sav'age's Station, in *Virginia*, on the Richmond and York River Railroad, in Henrico co., abt. 10 m. E. of Richmond, noted as the scene of one of the "Seven Days" battles in June, 1862.

Savagism, (*sáv'aj-izm*), *n.* Quality of being *savage*; state of men in their rude, uncouth, and uncivilized state.

Sav'ana la Mar', a seaport-town of the island of Hayti, on the Bay of Samana, 15 m. S.W. of Samana.

Savana la Mar, a town of the island of Jamaica; Lat. 18° 12' N., Lon. 78° 6' W.

Savanilla (*sav-an-el'ya*), a seaport town of the Republic of Colombia, 60 m. N.E. of Cartagena.

Savanillo, a town of Cuba, 18 m. S. of Matanzas; *pop.* abt. 600.

Savan'na, **Savan'nah**, *n.* [Sp. *savana*, *sabana*, counterpane, from Lat. *sabanum*; Gr. *sabanon*, a linen cloth.] An extensive, open, grassy plain or prairie, destitute of, or sparsely dotted with, trees or shrubs. See *PRAIRIE*.

Savan'nah, an important river of the U. S., which forms the boundary between Georgia and S. Carolina, rises in the Alleghanies, on the S.W. border of N. Carolina, and flowing S.S.E. about 450 m., enters the Atlantic

18 miles S.E. of Savannah city. It is navigable for large vessels to Savannah; for small vessels of 150 tons to Augusta, 230 m. from its mouth; and for small boats 150 m. higher.

Savannah, in Georgia, a city and port of entry of the U. States on the river of its own name, about 12 m. from its mouth, and 80 m. S.W. of Charleston. Savannah stands on a bluff sandy point, rising about 40 feet above the river, from which it has an imposing appearance; its spacious and regular streets, and handsome public buildings, being interspersed with many trees. Previous to 1820, when it suffered from a terrible fire, it was mostly built of wood, and it was formerly also insalubrious from the contiguity of rice swamps. This evil has, however, been greatly obviated; and being now principally of neat stone houses, it is one of the handsomest cities in the U. S., see fig. 1145. It has numerous churches, an exchange, and many academies. Previous to the breaking out of the great Civil War, it was one of the principal ports in the U. S. for the export of cotton, a trade it has long since recovered, being to-day the third largest cotton-shipping port in the U. S. In addition, it has a large export trade in rice, lumber, and naval stores, and ships early fruits and vegetables to Northern cities. Its manufacturing interests are mainly confined to fertilizers, foundry and machine-shop work, and rice cleaning and polishing. The harbor admits vessels of 14-feet draught to the wharf at high water; large ships discharge and load 3 miles below. The city is defended by Forts Pulaski and Jackson. It was founded in 1733. In 1776, a British fleet, attempting to take the town, was repulsed after a severe action; but the British took possession of S. in 1778, and in the following year the French and American armies, under Count d'Estaing and General Lincoln, were unsuccessful in their attempt to recapture it. In the Civil War, after many unsuccessful attacks by sea, it was taken by General Sherman, in Feb., 1865. Pop. (1897) 51,200.

Savannah, or **Savanna**, in Illinois, a city of Carroll co., on Mississippi river. Pop. (1897) 13,520.

Savannah, in Iowa, a post-village of Davis co.

Savannah, in Missouri, a post-town, cap. of Andrew co., 15 m. N. of St. Joseph.

Savannah, in New York, a post-village of Wayne co.

Savannah, in Ohio, a post-village of Ashland co.

Savannah, in Tennessee, a post-town, cap. of Hardin co., 120 m. S.W. of Nashville.

Savaut, (*sa'vōng'*) *n.*; *pl.* SAVANTS, or SAVANS, (*sa-vōng'*) [*Fr. from savoir*, to know, from Lat. *sapere*.] A person eminent for his literary or scientific learning or accomplishments; a man of erudition; a philosopher; a virtuoso. — *pl.* Men of learning and science; the literati.

Savary, ANNE JEAN MARIE, DUKE DE ROVIGO, (*sa-va-re*), a French general, b. at Champagne, 1774. He entered the army in 1790; was rapidly promoted; and having distinguished himself in the army of the Rhine, he was named aide-de-camp to General Desaix, and accompanied him in the expedition to Egypt and Syria. At the battle of Marengo, in which Desaix was killed, Savary rescued his chief's body and conveyed it to the headquarters of Napoleon. He was then made aide-de-camp to Napoleon, and was almost constantly employed by him on important missions for the next five years. The mock-trial and shameful murder of the young Duke d'Enghien was intrusted to his direction, and he never cleared himself of the disgrace which it brought upon him. Made general of division in 1804, S. was sent on a private mission to the Emperor Alexander, both before and after the battle of Austerlitz; won the victory of Ostrolenka over the Russians in 1807; and for the part he took at Friedland was created Duke of Rovigo. The next year he was sent to the Peninsula, to observe and to negotiate; and the conferences at Bayonne were the result of his influence. He accompanied Napoleon to the conferences at Erfurt, thence to Spain, and in 1809 throughout the campaign of Wagram. In June, 1810, S. was appointed minister of general police, and while he held that post the formidable conspiracy of Mallet broke out. On the return of Napoleon from Elba, S. was created peer of France. He would have followed his master to St. Helena, but was refused permission, and was confined some months in Malta. Sentence of death for contumacy having meanwhile passed against him at Paris, he fled to Smyrna, and afterwards to Austria and to England. In 1819, he returned to France, submitted to a trial, and being acquitted, was reinstated in his dignities. D. 1833.

Save, *v. a.* [*Fr. sauver*; *L. Lat. salvo*, from Lat. *salvus*, safe.] To keep safe from injury, destruction, or evil of any kind; to bring out of danger; to preserve; to protect; to rescue; to deliver; to keep from final or everlasting destruction, or from eternal death; to free from the power or pollution of; as, to save a person from drowning, or to save a woman from outrage, &c. — To hinder from being spent or lost, as time or money; to lay by for preservation; to reserve; to secure from waste or expenditure. — To spare; to relieve from, as something distasteful or harmful; as, let me save you the trouble. — To prevent; to hinder from occurrence; to obviate.

"Will you not speak to save a lady's blush?" — Dryden.

—To take or use opportunely, so as not to lose; to catch; to be in time for; as, he was just in time to save the train.

To save appearances, to preserve a becoming exterior; to avoid exposure of that which is disadvantageous or embarrassing; as, he is polite to his wife in company to save appearances.

—*v. n.* To be economical; to avoid expense.

—*prep.* Except; not including; leaving out.

"A prophet is not without honor, save in his own country." Matt. xiii. 57.

Save, a river of Austria, rising in Illyria, in the N. extremity of Carniola, Lat. 46° 30' N., Lon. 14° E., which, after an E.S.E. course of 590 m., joins the Danube at Belgrade.

Save-all, *n.* Any contrivance adapted to avoid waste or loss; especially,

(*Naut.*) A small sail sometimes set under the foot of another sail, to catch the wind that would otherwise pass under it.

Save-loy, *n.* A polony; a kind of dried sausage.

Sa'vendroog, a fortified town of S. India, prov. of Mysore, 20 m. from Bangalore; Lat. 12° 56' N., Lon. 77° 29' E.

Saver, *n.* One who saves, preserves, or rescues from danger, evil, or destruction; as, the *saver* of a country. — One who escapes loss, but without gain; an economist; one who limits or curtails his expenditure.

Saverne, (*sa'vairn*), a town of Germany, in Alsace, on the Zorn, a tributary of the Rhine, 19 m. N.W. of Strasburg. *Manuf.* Woollen cloth, hosiery, and hardware. Pop. 6,500.

Saverton, in Missouri, a post-village of Ralls co., 125 m. N.W. of St. Louis.

Savignano, (*sa'veel-ye-a'no*), a fortified town of N. Italy, prov. of Coni, 9 m. E. of Saluzzo. *Manuf.* Woollens, silks, and linens. Pop. 19,000.

Saville, in Pennsylvania, a township of Perry co., 12 m. S. of Mifflin.

Sav'in, *n.* [*Fr. sabine*.] (*Bot.*) See JUNIPERUS.

Saving, (*sa'ving*), *p. a.* Not lavish; frugal; economical; avoiding needless expenses; as, a *saving* housewife. — That incurs no loss, though not gainful; returning in an equal amount the sum expended; as, a *saving* bargain.

—*prep.* Excepting; with an exception in favor of.

"Saving the reverence due to so great a man." — Ray.

—*conj.* Without disrespect to; — with *that*; as, *saving* that your intentions are good.

—*n.* Something saved; something kept from being expended or lost; exception; reservation; as, he effected a considerable *saving* in his expenses.

—*pl.* Earnings; small sums accumulated by thrift, industry, and economy; as, when he married the cook he had an eye to her *savings*.

Savingly, *adv.* In a saving manner; with thrift or parsimony. — So as to be saved from eternal death and damnation.

Savingness, *n.* Quality of being saving; heedfulness not to expend money unnecessarily; thrift; frugality; — also, in a bad sense, parsimony; penuriousness. — Tendency to promote eternal salvation.

Savings-bank, *n.* [*From Lat. salvo*, to keep safe.]

An institution of very modern date, established for the purpose of encouraging provident habits among the poorer classes, by enabling them to deposit small sums of money at liberal interest, and returnable on demand. The value of such institutions can scarcely be over-estimated. They enable those who have anything to spare not only to deposit it in safety, but also to receive interest upon it, while the sum itself can be received back at any time it may be required. By this means provident habits are fostered, and in general such habits require only a beginning; and a sum is thus secured against a time of sickness, distress, or old age. The earliest S. B., properly so called, of which we have any account, are those of Hamburg, founded in 1778, and of Berne about 9 years afterwards. Both of them were restricted, more or less closely, to the use of domestic servants, mechanics, and the like. The first institution of this kind in this country was established in Philadelphia, in Nov., 1816, though Franklin had suggested something of the kind 50 years earlier. The second was organized in Boston the same year, and the third in New York in 1819. Since that time they have been greatly multiplied, but are by far more numerous in the Northern than in the Southern States. In each State there are laws for their regulation. The interest formerly allowed was usually 6 per cent. on sums under \$500, and 5 per cent. on any excess of that sum. It is now from 3 to 4 per cent. Post-office savings-banks have been established in Great Britain, for which see POSTAL SERVICE. The minimum deposit is generally fixed at \$1, but there are now banks receiving 5-cent or dime deposits. The American S. B. are for the most part well managed; and from the care with which their deposits are invested, they are generally allowed to reserve a large surplus and erect substantial banking-houses.

Savio, (*sa've-o*), a river of Central Italy, rising in the prov. of Florence, and after a N.N.E. course of 50 m., falling into the Adriatic, 10 m. S.E. of Ravenna.

Saviour, (*sa'vior*), *n.* [*Fr. sauveur*; *Lat. salvator*; *Gr. sōter*.] One who saves, preserves, or delivers from destruction or danger; as, Cincinnatus was the *saviour* of his country.

—Specifically, Jesus Christ, the Redeemer of the world.

Savona, a seaport-town of Italy, prov. of Genoa, on the Mediterranean, 20 m. S.W. of Genoa. *Manuf.* Silk goods, iron, and earthenware. Pop. 18,526.

Savona, in New York, a post-village and township of Steuben co., 6 m. S.E. of Bath.

Stavoncola, GIROLAMO, an Italian monk of the order of Dominicans, b. at Ferrara, 1452. In 1489 he removed to Florence, where he soon became a celebrated preacher, and declaimed with extraordinary freedom and daring, and with unusual success, against every form of hypocrisy, vice, and unbelief. His unbounded influence and constitutional ardor seem to have heated his imagination, and he ventured on occasional predictions, at once novel and startling, and published them in the form of authentic oracles, and under the impression that they were genuine revelations to himself from heaven. With characteristic boldness and energy, he interfered with

the politics of Florence, inculcated democracy, and opposed the ascendancy of the Medici, so that when they were expelled, he became a leader of the triumphant party. His enemies, in the meantime, accused him to the Pope, Alexander VI., as an impostor and a heretic. The Pope summoned him to Rome, and on his refusal to obey the citation, he was excommunicated and forbidden to preach. But this sentence only excited him to more terrible denunciations, in which the Pope himself was styled a usurper. A Franciscan inquisitor was sent to challenge and confront S., but the citizens interfered and sheltered him. The popular tide at length turned, when he shrank, after some vacillations, from subjecting his cause to an ordeal by fire. On being ultimately condemned to death, with two of his associates, he was first strangled, then his body was tossed into the flames, and his ashes were thrown into the river, May 23d, 1498. He left behind him about 300 *Sermons*, a treatise entitled the *Triumph of the Cross*, and other works.

Savor, *n.* [*Fr. saveur*; *Lat. sapor*, from *sapio*, to taste.] Something that perceptibly affects the organs of taste and smell; taste; relish; flavor; gusto; odor; scent; as, the *savor* of roasted game, a sweet *savor*, a rank *savor*, &c. — The quality which renders a thing valuable; the characteristic property which renders other bodies agreeable to the taste; specific flavor, tinge, taint, &c.

"I taste the savor of death in all things." — Milton.

—Acute sense of smell; power to trace by scent. (*R.*)

—*v. n.* To have a peculiar or characteristic taste or smell; — preceding *of*; as, this aroma *savors of* a good dinner.

—To partake of the quality or nature; to have the appearance; to indicate the presence; to betoken.

"The duke's answers all *savor of* an humble spirit." — Wotton.

—*v. a.* To taste or smell with delectation or delight; to like; to taste intellectually or spiritually. — To have the flavor or quality of; to denote the presence of. (*R.*)

Savorily, *adv.* [*From savor*.] In a savory or gustable manner; with piquant relish; with delectation.

Savoriness, *n.* Quality of being savory; pleasantness of taste or smell; piquant relish; gusto; as, the *savoriness* of a roast duckling.

Savorless, *a.* Lacking savor; tasteless; insipid.

Savory, *a.* Piquant; properly seasoned; having a good smack or relish.

—*adv.* With a delectable relish or gusto.

Savory, *a.* [*From savor*.] Pleasing and grateful to the organs of taste and smell; possessing savor, relish, or richness of flavor; piquant.

—*n.* [*Fr. savorie*.] (*Bot.*) See SATUREJA.

Savoy, (*sa-voi*), [*Fr. savoie*], a former duchy of the kingdom of Sardinia, now annexed to France, and forming the depts. of Savoie and Haute-Savoie, having N. and N.E. Switzerland, S.E. and S. Piedmont, and W. the depts. of Isère and Ain; area, 4,270 sq. m. It is the most elevated country of Europe, consisting principally of mountains, the most elevated of which is Mont Blanc, *q. r.* The valleys and low grounds are fertile and well cultivated. *Rivers.* Rhône, Arve, Drance, and Isère. *Lakes.* Annecy and Bourget. *Prod.* Wheat, oats, barley, rye, and hemp. *Min.* Iron, copper, silver, lead, coal, and salt. *Manuf.* Cotton and woollen fabrics, hosiery, felt-hats, glass, earthenware, &c. *Cap.* of Savoie, Chambéry; of Haute-Savoie, Annecy. S. was anciently a part of Sapaudia, whence the name *Saboia*, or *Savoy*, is derived. It was erected into a duchy under Amadeus VIII., in 1416, and was ceded to France in 1860. Pop. 545,431.

House of Savoy. One of the most ancient royal families, and also distinguished for having produced more great warriors and politicians than any other royal house of Europe. Its origin is not historically established, but most genealogists trace it to a German count, Berthold, who, in the 11th century, established himself on the western slope of the Alps between Mont Blanc and Lake Lemman. In 1111 his descendants were enrolled among the counts of the Holy Roman Empire. Count Amadeus, in 1383, founded a law of primogeniture which greatly strengthened the family, leading to the immediate acquisition of the territory of Nice. In 1416, the counts of Savoy adopted the title of *Duke*; and, in 1418, they acquired the principality of Piedmont. Taking part in the great wars between France and the Holy Roman Empire, now on the one side and then on the other, as policy dictated, the princes of Savoy increased their possessions in all directions, but chiefly towards the south; and at the peace of Utrecht, in 1713, they obtained the island of Sicily, with the title of *King*. Sicily had to be exchanged, in 1720, for the isle of Sardinia, to which henceforth the royal dignity remained attached. Genoa and the surrounding territory were added to the Sardinian crown at the peace of 1815. The direct male line of the House of Savoy died out with King Charles Felix, in 1831, and the existing Salic law prohibiting the accession of females, the crown fell to Prince Carlo Alberto, of the House of Savoy-Carignan. The latter branch — taking its name from a small town in the province of Turin — was founded by Thomas Francis, born in 1596, a younger son of Duke Carlo Emanuele I. of Savoy. King Carlo Alberto, the first of the house of Savoy-Carignan, abdicated the throne, March 23, 1849, in favor of his son, Vittorio Emanuele II., the first King of Italy. See VICTOR EMANUEL.

Savoy, *n.* [*Fr. chou de Savoie*.] (*Bot.*) One of the hardier of the varieties of Cabbage, remarkable for its bullate or blistered leaves. Is the type of a race of sub-varieties, included under the name *Brassica oleracea* — *bullata major*.

Savoy, in Massachusetts, a post-township of Berkshire co., 125 m. W.N.W. of Boston.

Savoyard, (*sa-voi'yard*), *n.* [*Fr.*; *It. Savojardo*.] (*Geog.*) A native or inhabitant of Savoy.

Savu, (sa-voo') an island of the Eastern Archipelago, belonging to the Dutch; Lat. 10° 35' S., Lon. 122° 30' E. Ext. 25 m. long, and 8 broad.

Saw, *imp.* of SEE, *q. v.*

Saw, *n.* [A. S. *sagu*.] A saying; a proverb; a maxim; an axiom; as, "Old *saws* and modern instances."

Haliburton.

—[A. S. *sago*.] A cutting instrument, formed from a plate of sheet-steel, and toothed by means of a press and tools. Circular saws have the advantage of being very accurately divided in their teeth by means of a division-plate; this prevents irregularity of size, and imparts smoothness and uniformity of action. All saws are hardened and tempered in oil. The forms of the teeth do not depend on taste, but are those best fitted for cutting through the particular section, quality, or hardness of the substance to be cut. Iron bars, shaftings, &c., are cut to length by a steel circular saw, which revolves very rapidly. (See CIRCULAR.) The iron is presented to the saw red-hot. A bar 2 inches in diameter can thus be cut through in a few seconds.

—*v. a.* [Ger. *sagen*; It. *segare*; Fr. *scier*, to saw, from Lat. *secare*, to cut.] To cut with a saw; to sunder apart with a saw; as to saw timber. — To form by cutting with a saw; as, to saw planks, or, in other words, to saw logs into planks. — To hoax; to play upon; to bamboozle. (An Americanism.)

—*v. n.* To use a saw; to practise sawing; as, he *saws* indifferently. — To cut with a saw; as, I never saw a saw saw as this saw *saws*. — To be cut or separated with a saw; as, these logs *saw* smoothly.

—*Manuf.* The largest saws in the world for sawing boards and plank are probably those made by R. Hoe & Co., in New York, expressly for the California market, where they are required for the gigantic timber of that region.

Sawcar'na, former name of the Ree or Grand river, in South Dakota, which flows into the Missouri river in Lat. 45° 40' N., Lon. 100° 30' W., after a W. course of 200 m.

Sawar'ra-nut, **Saowari'-nut**, *n.* (Bot.) See CARYOCAR, *q. v.*

Saw'-bill, *n.* (Zool.) A family of birds, *Trinitidae*, order *Insectores*, comprising birds with the bill as long as the head, gently decurved near the tip, but not hooked, and the cutting edges dentated; the tarsi rather long, feet large, the middle and outer toes connected for more than half their length. This family is represented in N. America by *Momotus ceruliceps*, the Saw-bill of Mexico.

Saw'der, *n.* [A corruption of *solder*.] Flattery; blarney; honied speech; — used generally in the phrase *soft sawder*, meaning something which appeals to one's vanity or self-esteem, and is employed, generally, to accomplish some purpose or design; — an expression of American origin, having its equivalent in the English phrase *soft soap*. (Vulgar.)

Saw'dust, *n.* Dust, or small particles of wood or stone made by the action of a saw.

Saw'er, *n.* A sawyer.

Saw'-fish, *n.* (Zool.) A genus of fishes, family *Squalidae*, having a very long, depressed snout, annexed on

Fig. 2310. — SAW-FISH.

each side with pointed spines, planted like teeth. The Common Saw-fish, *Pristis antiquorum* (Fig. 2310), found both in polar and tropical seas, attains sometimes the length of 15 feet.

Saw'-file, *n.* A triangular file for sharpening a saw.

Saw'-fly, *n.* (Zool.) See TENTHREDINETÆ.

Saw'-frame, *n.* The frame in a saw-mill, in which the saw is set for action.

Saw'-gin, *n.* A cotton-gin.

Sawkchatch'ee Creek, in Alabama, flows W. into the Tallapoosa River, from Tallapoosa co.

Saw'-mandrel, *n.* A mandrel for holding a saw firm in a lathe.

Saw'-mill, *n.* A mill for sawing timber, marble, &c., driven by water, steam, or other power.

Saw-mill Flat, in California, a village of Tuolumne co., abt. 1 m. E. of Columbia.

Saw'ney, *n.* [Corrupted from *Sandy*, a familiar diminutive of *Alexander*.] A Scotsman; — used as a nickname. (Vulgar.) — A stupid fellow; a gaby; a thick-headed loon.

Saw'-pit, *n.* A pit over which timber is sawed by two men, one standing above the timber and the other below.

Saw'-set, **Saw'-wrest**, *n.* An instrument employed to set or turn the teeth of a saw a little outward.

Saw'-toothed, (*-toothed*) *a.* Having a tooth, or teeth, after the manner of a saw.

(Bot.) Serrate, as certain leaves.

Saw'-wrest, (*-rest*) *n.* Same as SAW-SET, *q. v.*

Saw'-wurt, *n.* (Bot.) The common name for *Serratula*, a genus of plants, order *Asteraceæ*, having the habit and qualities of the thistle, and called from having leaves edged with cutting teeth.

Saw'yer, *n.* One who saws timber into boards or planks; also, a sawyer of wood for fuel. — In the U. S., a limb of a tree, consisting of one or more branches, bobbing above the surface of a stream (as in the Mississippi and other rivers), and presenting a serious and often fatal obstruction to navigation. See SNAG.

Saw'yer's Bar, in California, a post-village of Siskiyou co., about 20 m. N. of Orleans.

Saw'yer's Mill, in Massachusetts, a manufacturing village of Worcester co., 35 m. W. of Boston.

Saw'yer's River, in New Hampshire, rises in Grafton co., and flows E., forming one of the sources of Saco River.

Saxa'tile, *a.* [Fr.; Lat. *saxatilis*, from *saxum*, a rock.] Pertaining or relating to, or living among, rocks.

Saxe, MAURICE, COUNT DE, marshal of France, was a natural son of Augustus II., King of Poland, and was B. at Dresden in 1696. He entered the army at an early age, and was present with Prince Eugene at the siege of Belgrade. In 1720 he went to Paris. After an unsuccessful attempt to get himself elected Duke of Courland, he took service in the French army, distinguished himself in the campaign of 1733-35, and was made lieutenant-general. In the general war which followed the death of the Emperor Charles VI., S. took a distinguished part. He captured Prague, defended Alsace, and in 1743 was named marshal of France. In the following year he held a command in Flanders. One of his most brilliant achievements was his victory over the English and Hanoverian forces at Fontenoy in May, 1745. He was at the time "nearly dead of dropsy; could not sit on horseback, except for a few minutes; was carried about in a wicker bed; had a lead bullet in his mouth all day, to mitigate the intolerable thirst." (Carlyle.) The victories of Ronconx and Laufeldt, and the capture of Maestricht, added to his fame in two following years. S. was a man of great size and strength, intrepid, self-possessed, and as a commander won fame for his ingenuity and dash; but he was one of the most dissolute men of his age, and unscrupulous in the gratification of his lust. He d. of putrid fever, the result of his debaucheries, November 21, 1750. Marshal S. was author of a work on military affairs, entitled *Mes Récit*, issued in 1757. George Sand (*q. v.*), the eminent author, was descended from an illegitimate daughter of his.

Saxe-Al'tenburg, (Duchy of,) a state of N. Germany, inclosed by Saxe-Weimar, the kingdom of Saxony, Prussian Saxony, and Saxe-Meiningen; area, 510 sq. m. The surface is undulating and very fertile, and agriculture much advanced. *Prod.* The usual cerealia. The government is a limited monarchy, in accordance with the constitution of 1831. The Duke of S. A. was a member of the Germanic Confederation, and the Duchy forms part of the new German Empire. *Cap.* Altenburg.

Saxe-Co'burb-Gotha, (Duchy of,) a state of N. Germany, inclosed by Prussia, Bavaria, Saxony, Saxe-Meiningen, and Weimar; area, 970 sq. m. It is a limited monarchy, under the general law of the new German Empire. *Cap.* Gotha.

Saxe - Mein'ingen - Hild'burghausen, (Duchy of,) a state of N. Germany, consisting of the old duchy of Meinigen, Kranichfeld, and Kamburg; area, 970 sq. m. It forms part of the new German Empire. *Cap.* Meinigen.

Saxville, (*sax'vil*), in Wisconsin, a post-village and township of Wausara co.

Saxe-Wei'mar-Ei'senach, (Grand-Duchy of,) a principality of N. Germany, consisting, besides Weimar and Eisenach, of Alstadt, Ilmenau, Ostheim, and Neustadt; area, 1,418 sq. m. Charles Augustus received some acquisition of territory, and the title of Grand-Duke, from the Congress of Vienna, June 9, 1815. Representative government was introduced in 1816. It has one vote in the Federal Council of the Empire. *Chief town.* Weimar.

Sax-horn, *n.* (Mus.) A brass instrument, invented by Mr. A. J. Sax, constructed in such a manner that the large portion, after passing under the arm of the performer, repasses over his shoulder, presenting the bell to the front. The advantage of this shape is that it avoids the elbows, which would otherwise impair the progress of the sound. They have great powers, more especially the contra basses in E and B flat; the latter of which has forty-eight feet of development in its tube.

Saxifraga, *n.* (Bot.) The typical genus of the order *Saxifragaceæ*, *q. v.*

Saxia'vons, *a.* [From Lat. *saxum*, rock, and *cavo*, to hollow.] (Zool.) Rock-boring; — applied to marine animals which perforate rocks.

Saxi'cola, *n.* (Zool.) A genus of birds, family *Sylviolidæ*, including the Furze-chat.

Saxifragaceæ, (*saks'e-frā-gai'se-e*) *n.* [Lat. *saxum*, a stone, *frangus*, to break, because supposed to break or dissolve stones in the bladder.] (Bot.) The Saxifrage family, an order of plants, alliance *Saxifragales*. *Diag.* Distinct styles, alternate leaves, and unsymmetrical flowers. — They are herbs, with calyx inferior, or generally more or less superior, 4-5-partite. Stamens perigynous or hypogynous. Ovary superior, or more or less inferior, composed of 2 carpels, united at the base, and diverging at the apex to the carpels. Fruit capsular, 1-2-celled. Seeds numerous, small, with fleshy albumen. The plants of this order are generally natives of northern regions, and usually inhabit mountain districts, being sometimes found at a height of 16,000 feet above the sea. They are generally characterized by astringency. This is particularly the case with *Henchera Americana*, which, under the name of *alum-root*, is much used as an astringent in North America. Some *Saxifraga* are well-known in gardens, and are

employed to cover rock-works, &c. *S. umbrosa*, the Ladies' Cushion, None-so-Pretty, London Pride, &c. (Fig. 2311), a native of the hills of Spain, is familiar in our flower-gardens. There are abt. 50 American species.

Fig. 2311. — SAXIFRAGE, (*Saxifraga umbrosa*.)

Saxifragales, *n. pl.* (Bot.) An alliance of plants, sub-class *Perigynous exogens*. *Diag.* Monodichlamydeous flowers, consolidated carpels, sutural or axile placentæ, indefinite, a polypetalous corolla, if any present, and a small taper embryo, with a long radicle and little or no albumen. The alliance includes 5 orders, — SAXIFRAGACEÆ, HYDRAUGEACEÆ, CUNONIACEÆ, BREXIACEÆ, and LYTHRACEÆ, *q. v.*

Saxon, (*saks'on*, or *saks'n*) *n.* [A. S. *Seaxan*, pl. *Seaxe*.] (*Geog.*) One of a nation, or people, who formerly dwelt in the N. part of Germany, and who invaded and conquered Britain in the 5th and 6th centuries; also, a native or inhabitant of the kingdom of Saxony. See SUP'T. — The language of the ancient Saxons; ANGLO-SAXON, *q. v.* — *a.* (*Geog.*) Pertaining, or relating, to the ancient Saxons, their country, or to their language; also, belonging, or having reference, to the kingdom of Saxony, or its inhabitants.

Sax'on Architecture. The name usually given to the style of building used in England before the introduction of the Norman architecture after the Conquest. There are few specimens remaining which can be depended upon as genuine. The Saxons built chiefly in wood, and all their wooden edifices are now lost. It seems probable that a rude and simple style, not unlike early Norman, was that used by the Saxons. There are several buildings in England which Mr. Rickman considers entitled to rank as Saxon. Among these, the Tower of Earl's Barton, Northamptonshire (Fig. 2312), is one of the best examples.

Sax'on-blue, *n.* (*Dyeing*.) A solution of indigo in concentrated sulphuric acid: — it is much used as a dye-stuff. — SAXON-GREEN, a color obtained by dyeing with yellow upon a ground of Saxon-blue.

Sax'onburgh, in Pennsylvania, a post-borough of Butler co., about 9 m. S.E. of Butler.

Saxonism, (or *saks'n*.) *n.* An idiom of the Anglo-Saxon language.

Sax'onist, *n.* One learned in the Anglo-Saxon tongue.

Sax'onville, in Massachusetts, a post-village of Middlesex co., 22 m. N.W. of Boston.

Sax'ony, a kingdom situated towards the N.E. of Germany, bounded S. by Bohemia, and N. by the Prussian States; Lat. between 50° 10' and 51° 28' N., Lon. between 11° 35' and 15° 3' E.; area, 6,777 sq. m. Saxony, politically divided into the four circles of Dresden, Leipzig, Zwickau, and Bautzen, is shaped as a triangle, of which the longest line is the frontier on the side of Bohemia, formed by a range of mountains, extending in a long line from S.W. to N.E. In the southern and mountainous parts, the valleys only are well cultivated; but in the level districts in the north, tillage is general. The mean elevation of the country is about 1,100 feet. — *Rivers.* The principal are the Elbe, the two Elsters, the two Muldas, the Pleisse, and the Saale. — *Prod.* Wheat, barley, oats, and other grain; also tobacco and hops; and, in a few situations of favorable exposure, vines. Fruit is extensively cultivated, and a fourth of the surface is covered with excellent timber. The breed of the

Fig. 2312.
TOWER OF EARL'S BARTON,
(Northamptonshire, Eng.)

merino sheep is celebrated, and yields valuable wool, and the cattle are of a superior kind. Horses are not extensively reared.—*Minerals.* Few countries equal Saxony in mineral riches, and in none has this department of natural history been more fully described. The topaz is frequently found, also chrysolites, amethysts, chalcedonies, cornelians, agates, jasper, garnets, and tourmalines; and among the coarser stones, serpentine, asbestos, amianthus, barytes, and fluates of lime. The porcelain clay in the neighborhood of Meissen is well known; there are also fullers'-earth, terra-sigillata, and other minerals with an argillaceous base; petrifications are very common. The lofty primitive mountains abound in iron; the secondary in copper and lead. Next to these are arsenic, cobalt, antimony, manganese, zinc, sulphur, alum, vitriol, and borax. The salt-mines and springs of Saxony are included in the districts ceded in 1815 to Prussia. There are also a few silver-mines.—*Manuf.* These comprise linen and woollen goods, stockings, fine porcelain called *Dresden china*, cotton-spinning, and silks. Tanneries are general, and paper manufactories are numerous. Every town of consequence has breweries and distilleries. At Dresden, also, there are foundries of cannon and shot.—*Exp.* These comprise minerals, linen, yarn, woollens, and lace.—*Imp.* Silk, flax, cotton, coffee, sugar, wine, and in certain seasons, grain.—*Education.* Good; public instruction being well developed, while the University of Leipzig is one of the best in Germany.—*Govt.* A hereditary limited monarchy.—*Army.* 26,000. After being, during many centuries, an electorate, Saxony was formed, in 1806, into a kingdom, in consequence of the occupancy of Prussia by Napoleon I. The Prussians invaded Saxony in June, 1866, and by a treaty signed Oct. 21, the King of Saxony agreed to pay to Prussia abt. \$8,000,000, ceded the fortress of Königstein, and afterwards joined the Confederation of N. Germany. Saxony contributed the XII. Army Corps to the German Empire, with which it was incorporated in 1871. The actual king, Albert was crowned October, 1873. *Pop.* (1897) estimated, 2,645,440.

Sax'ophone. *n.* (*Mus.*) A brass instrument, made of various sizes, soprano, alto, and bass, and played with a mouth-reed, like a clarinet. It was invented by M. Sax.

Sax'ton, in *Minnesota*, a village of Lake co. In *Pennsylvania*, a post-borough of Bedford co.

Say, (*imp.* and *pp.* SAID, contracted from SAYED.) [*A. S. secgan, sægan; Du. zeggen; Ger. sagen.*] To put forth or pronounce in articulate sounds; to utter in words; to speak; to declare; as, what do you say? she said so positively.—To repeat; to rehearse; as, to say one's prayers.—To allege, by way of argument; as, it is all that can be said for him.

—To report or announce as a judgment, decision, or opinion;—hence, to form an opinion upon; to be determined in mind as to; as it is hard to say what is best to be done.

It is said, or they say, it is commonly asserted, rumored, or reported; as, it is said you have had a fortune left to you, they say the old lady likes rum in her tea.

—Say, used parenthetically in the imperative for, speak; tell me.

"Say, Stella, feel you no content?"—*Swift.*

That is to say, that is; in other words.

—*v. n.* To speak; to tell; to utter; to relate.

—*n.* [*A. S. sagn.*] A speech; that which is said; a saying; a proverb; a current story; as, let him say his say. (*Colloq.*)

Saybrook, in *Connecticut*, a post-township of Middlesex co., on the Connecticut River, 35 m. S.S.E. of Hartford.

Saybrook, in *Ohio*, a post-township of Ashtabula co., abt. 4 m. W. of Ashtabula.

Sayer, *n.* One who says, speaks, or utters; as, a sayer of good things.

Sayette, *n.* A mixed fabric of silk and cotton.

Say'ing, *n.* Something said; an expression; a sentence uttered; a declaration;—particularly, an aphorism; a hyword; an adage; a maxim; an axiom; a popular or proverbial expression.

Say'lor, in *Iowa*, a post-village and township of Polk co.

Say'lorsburg, in *Pennsylvania*, a post-village of Monroe co., 112 m. N.E. of Harrisburg.

Scab, *n.* [*A. S. scæt; It. scabbia, from Lat. scabies—scabo.*] (*Med.*) An eruption of minute pimples on the skin, which, by its itching, causes those affected with it to scratch; an incrustated substance, dry and rough, formed over a sore in healing.

(*Furriery.*) A contagious disease of sheep, resembling the mange in horses, &c.

—A mean, paltry, dirty fellow.—(*Slang.*) A workman who continues to work during a strike of his fellows.

Scab'bard, *n.* [*Icel. skalpr.*] The sheath of a sword.

—*v. a.* To place in a scabbard or sheath, as a sword.

Scab'bed, *a.* [*From scab.*] Abounding with scabs; scabby.

—Diseased with the scab or mange.—*Paltry; sorry; vile; worthless; as, a scabbed fruit.*

Scab'bedness, *n.* State of being scabbed.

Scab'biness, *n.* Quality or state of being scabby.

Scab'ble, *v. a.* Same as SCAPPLE, *q. v.*

Scab'by, *a.* (*comp.* SCABBIER; *superl.* SCABBIEST.) [*From scab.*] Affected with scabs; full of scabs; as, a scabby tetter.

—Diseased with the scab; mangy; as, scabby sheep.

Scab'ies, *n.* [*Lat. (Med.)*] The itch. See ITCH.

Scabio'sa, *n.* [*Lat. scaber, rough, from its hairy surface.*] (*Bot.*) The Scabious, a genus of the order *Dipsacaceæ*. *S. succisa* is said to yield a green dye. It is

called the *Devil's-bit Scabious* on account of its abruptly-terminated root, which appears as though a piece had been bitten off. The Sweet Scabious, *S. atropurpurea*, of which the Double-dwarf Scabious (Fig. 2313) is a variety, is a well known fragrant garden-flower. It is supposed to be a native of India.

Fig. 2313. — DOUBLE-DWARF SCABIOUS.

Scab'ions, *a.* Consisting of scabs; itchy; leprosy; as, scabious eruptions.

—*n.* [*Fr. scabiense.*] (*Bot.*) One of the SCABIOSA, *q. v.*

Scab'line, Scab'ling, *n.* A chip of stone.

Scab'rous, *a.* [*Fr. scabreux, from Lat. scaber, rough.*] Having hard, rough, short, jagged points; rugged.

—Harsh; unmelodious; unmusical; as, a scabrous line in poetry.

Scab'rouness, *n.* State or quality of being scabrous; ruggedness; harshness; roughness.

Scad, *n.* (*Zoöl.*) Same as HORSE-MACKEREL, *q. v.*

Scævo'la. See MUTIUS.

Scaff'old, *n.* [*Fr. échafaud; It. catafalco; L. Lat. catafalculus.*] A temporary gallery or stage raised either for shows or spectators; an assemblage or structure of timbers, boards, or planks, erected by the wall of a building to support the workmen; as, to raise a scaffold.—Particularly, a stage or elevated platform erected for the execution of a criminal; as, to perish on the scaffold.

—*v. a.* To furnish with a scaffold; to sustain; to prop; to uphold.

Scaffolding, *n.* A frame or structure raised for support in an elevated place; a frame-work; a stage; a scaffold; anything which supports or sustains.—Materials for the construction of scaffolds.

Scaffold-pole, *n.* A long pole used in the building of a scaffold.

Scag'lia, *n.* [*It., a scale or shell.*] (*Min.*) A reddish variety of chalk.

Scagliola, (*skal-ye-o'la*), *n.* [*It.*] A term applied to ornamental plaster-work, made of finely-ground calcined gypsum worked into a paste with glue. It produces the most perfect imitation of marble, from which it can scarcely be distinguished either by the eye or the touch, as it takes an equally high polish, and is equally hard and cold to the touch. In Italy, *S.* has long been in use, where it was invented by Guido del Conte, or Fassi (1584-1649), an ingenious mason of Carrara, near Correggio, in Lombardy. It has been brought into more general use since that time, and the manufacture has not only improved considerably, but can be executed upon a comparatively small outlay. For columns and other interior decorations, it has to a considerable extent superseded the use of colored marbles, being far less costly and quite as durable. In the process of manufacture, the purest of gypsum is first broken into small pieces, and after being calcined, is reduced to powder. It is then passed through a fine sieve, and mixed with Flanders glue, isinglass, &c. While in this condition, it is mixed with different coloring matters, according to the shades of color required in the variety of marble to be imitated. In this state it is laid on like cement. After hardening, the next process is to polish it; this is effected first by rubbing with pumice-stone, and afterwards by rubbing it with tripoli and charcoal on a piece of fine linen, and afterwards with felt dipped in tripoli and oil, and lastly with oil alone. One of the chief advantages of *S.*-work is that it can be applied to columns made of wood and hollow, or else filled with a plaster core. Columns of this kind do not require that support in the floor beneath which is necessary when solid shafts of marble are employed. The use of *S.* is not confined to columns and pilasters only; it can be applied to other ornamental purposes, such as table-slabs, pedestals, borders of floors, &c. By means of *S.*, some of the rarest and most costly stones can be imitated; such as porphyry, verde-antico, giallo-antico, and others.

Scal'able, *a.* That may be scaled; as, scalable heights.

Scala'de', Scala'do, *n.* (*Mil.*) Same as ESCALADE, *q. v.*

Scala No'va, a seaport-town of Asiatic Turkey, on the Gulf of Scala Nova, 40 m. S. of Smyrna. It has an important export trade. *Pop.* 20,000.—The Gulf of Scala Nova, inclosed at the S. by the island of Samos, is 40 m. long and 20 broad.

Scala'ria, *n.* [*Lat., flight of steps.*] (*Zoöl.*) The Wattle-trap, a genus of Gasteropodous molluscs, family *Litorimidae*, distinguished by having the turreted spire

covered with longitudinal, elevated, rather sharp ribs, and the mouth being encircled by a varix. The finest species (*Scalaria pretiosa*) (Fig. 2314), was long famous for the rarity and high prices given for a single specimen. It is now found to be not an uncommon shell in the Eastern seas. It is known by the whorls being separated from each other.

Fig. 2314.

SCALARIA PRETIOSA.

Scalar'iform, *a.* Having transverse bars and spaces, after the manner of a ladder.

Scal'awag, *n.* A pitiful scamp; a scapegrace. (*Vulgar.*)

Scald, (*skawld*), *v. a.* [*Icel. skállda, to deprive of hair or bristles.*] To deprive of hair or bristles by the application of boiling water; to burn or painfully affect or injure by immersion in, or contact with, a liquor of a boiling heat, or a heat approaching it; as, to scald one's fingers, to scald the carcass of a pig after killing.—To expose to a boiling or violent heat over a fire, or in water or other liquor; as, to scald milk.

—*n.* A burn or injury to the skin or flesh, as by hot liquor, or steam.—Scurf or scab on the head.

Scald, Skald, *n.* [*Icel. skald.*] (*Scand. Lit.*) One of the poets of the ancient Scandinavian race. They were the companions and chroniclers of their kings and princes, attended them on their martial expeditions, and resided at their courts in times of peace. They sang the praises of the gods and the exploits of their mighty men. They were often richly rewarded for their songs, and sometimes even permitted to marry the daughters of princes. A sacred character was also attached to them, and they performed the office of ambassadors between hostile tribes. See NORWEGIAN LANGUAGE AND LITERATURE.

Scald'er, Skald'er, *n.* A Scandinavian poet or scald.

Scald'head, SCALDED-HEAD, *n.* (*Med.*) The popular name of a fungous parasitic disease of the scalp (and occasionally of the face and other parts), known in medical phraseology as *Favus*, *Tinea favosa*, and *Porri'go scutulata*. The primary seat of the parasite is in the lowest portion of the hair-follicles, outside the layer of epithelium which covers the root of the hair. The plant is, however, often found in cup-shaped depressions on the surface of the scalp, forming the yellow honeycomb-like masses which suggested the specific name *Favus* (honey-comb) for the disease. The honeycomb crust continues to increase, preserving its circular form and depressed centre, till it occasionally reaches a diameter of nearly half an inch. These crusts commonly appear in crops, and may be either *distinct* or *confluent*.

At a more advanced stage, the epidermis disappears, and a viscid fluid is secreted in such abundance as to form one entire incrustation over the entire head; hence the *Porri'go larvalis*—mask- or visor-like scald-head. The smell of the scab is peculiar, and has been compared to that of the urine of a cat, or of a cage in which mice have been kept. It is probably due to a species of alcoholic fermentation in connection with the vegetable growth. The scab sometimes resembles a lupine, or a minute shield, rather than the cell of the honeycomb, and hence the varieties of scald-head which have been described under the name of *Porri'go lupinosa* and *Porri'go scutulata*. The great point to be aimed at in the treatment of this affection is to destroy the cryptogamic parasite, and to eradicate its germ. For this purpose, the head should be shaved, and poultices then applied till the scabs are removed. Tar-ointment should then be applied, night and morning, the old ointment being washed off with soft-soap and water before the fresh dose is laid on. In the early stage of the disease, in place of the preceding treatment, it is sometimes sufficient to cut the hair close, and to wash the affected parts, night and morning, with oil of turpentine. If the disease does not yield to these applications, the same treatment as that recommended for ringworm must be tried.

Scald'ic, Skald'ic, *a.* Pertaining, or relating, to the ancient Scalds, or composed by them; as, *Scaldic* writings.

Scald'ing-hot, *a.* So hot as to scald or blister the skin.

Scale, (*skāl*), *n.* [*A. S. scale, sceale; Fr. écaille.*] The basin or dish of a balance;—hence, the balance itself, or whole apparatus, which is more usually rendered in the plural; as, to turn the scales.

—*pl.* (*Astron.*) The sign of the Balance, or Libra, in the zodiac.

(*Zoöl.*) The name applied to the plates, generally thin, small, and imbricated, which defend the skin of fishes. They are substances of different texture, which are developed beneath the true epiderm, and appertain to the system of the *rete mucosum*. The so-called scales of serpents and other reptiles are modifications of the epidermis, and are sometimes termed *scutes*.

(*Bot.*) A small scale-like appendage, resembling a rudimentary leaf; as, the scale of a bud, of a pine-cone, &c.

—The thin metallic lining of the handle of a pocket-knife.

—Any incrustation deposited on the interior parts of a steam-boiler, or any vessel in which water is heated.

Scale armor. (*Archæol.*) Ancient armor consisting of small metallic scales overlapping, and fastened upon a lining of leather and cloth.

Scale, *n.* [*Fr. échelle; Lat. scala, from scando, to climb.*] A ladder, or series of steps, or any means of ascent.

"On these mountains the mark of ancient scales of stairs may be seen."—*Addison.*

—Hence, any instrument, figure, line, or scheme, grad-

rated for the purpose of measuring extent or proportions; as, specifically, (1.) In mensuration, a line or rule of a definite length, divided into a given number of equal parts, and used for the purpose of measuring other linear magnitudes; also, a mathematical instrument, consisting of an assemblage of lines and figures engraved on a plane rule, by means of which certain proportional quantities or arithmetical results are obtained by inspection, as, the plane scale, the diagonal scale, Gunter's scale, &c. — (2.) A basis for a numeral system; as, the decimal scale, denary scale, binary scale, &c. — (3.) A scale of distance, denoting miles, yards, feet, &c., for a map, chart, or plan.

—Hence, regular gradation; a series, rising by steps or degrees, like those of a ladder; progressive series; scheme of comparative rank or order; as, "according to their several gradations in the scale of beings." — *Cheyne*. — Anything graduated or marked with degrees at equal distances; as, a map on a scale of an inch to the square mile.

(*Mus.*) A series of sounds, rising or falling from any given pitch or tone to the greatest possible distance through such intermediate degrees as make the succession most agreeable and perfect, and which contains all the harmonical divisions most commodiously divided. The scale may be simple, as comprising only the notes of one octave, or compound, as embracing a series of octaves. Taken in the former sense, it presents a limited course of contiguous degrees of different dimensions, as tones and semitones; received in the latter sense, it implies a series of equal degrees, consisting of equal degrees or semitones, and bounded only by the powers of instrumental expression. Again, in its former sense, the scale signifies a measured course of tones and semitones, taken in certain order, as that order which constitutes the major mode, or that which forms the minor mode; but, in its latter sense, it neither has nor requires any diversified arrangement whatever. The modern scale, consisting as it does of an enumeration of all the diatonic sounds of our system, arranged in order, is properly termed the *universal system*, in the same manner as the Turks combined their three scales (viz., the Diatonic, Chromatic, and Enharmonic, each consisting of four sounds only), under the name of Tetrachord. See *MUSIC*. — Act of storming a place by mounting the wall on ladders. See *ESCALADE*.

—*v. a.* [*Fr. escalader*, from *Lat. scala*, a ladder.] To climb, as by a ladder; to mount or ascend by steps; to clamber up; as, to scale a mountain peak.

—[From *scale*, a balance.] To measure or compare; to weigh. (*R.*)

—[From *scale*, the lamina of a fish.] To strip or clear of scales; as, to scale a fish. — To take off their laminae or scales; to pare off a surface. — To scatter or spread about, as manure, straw, &c. (*Prov. English.*)

(*Gan.*) To clean, as the inside of a caanon, by the explosion of a small quantity of powder.

—*v. n.* To separate and come off in thin layers; to peel off in thin laminae; as, the surface of a scab scales off. — To dispose; to dissipate; to scatter.

Scale-beam, *n.* The beam or lever of a balance.

Scale-board, (*skål'urd*), *n.* A thin veneer used for covering the exterior surface of pieces of furniture, &c.

(*Print.*) A thin slip of wood used to extend a page to its true length, make types register, secure uniformity of margin, and for other purposes.

Scaled, *a.* Possessing scales like a fish; squamous; as, a scaled serpent.

Scale-less, *a.* Without scales.

Scalene, *a.* [*Fr.*, from *Lat. scalenus*; *Gr. skalenos*.] (*Geom.*) With the sides and angles unequal; as, a scalene triangle. — With the axis inclined to the base; as, a scalene cone.

—*n.* (*Geom.*) A triangle presenting unequal sides and angles.

Scalenohe'dron, *n.* [*Gr. skalenos*, unequal, and *hedra*, base.] (*Crystallog.*) A pyramidal form under the rhombohedral system, in which the pyramids are six-sided, and the faces are scalene triangles.

Scal'er, *n.* One who scales.

Scales Mound, in *Illinois*, a post-village and township of Jo Daviess co., 12 m. N.E. of Galena.

Scale-stone, *n.* (*Min.*) See *TABULAR SPAR*.

Scaliger, (*skål'e-jeer*), father and son, both eminent for their vast literary acquirements. JULIUS, the elder, was b. at Verona, 1484. He was at first in the army, then he studied physic; and, after he was forty years of age, he began to study Greek, and became eminent for his prodigious learning and critical writings. He wrote several learned works, and commentaries on some of the ancient authors. D. 1558. — JOSEPH, the younger, was b. in 1540. At the age of seventeen, he wrote a tragedy on the story of "Oedipus," acquired the Greek and Hebrew languages almost without a master, and was esteemed the most learned man of his age, and the "Colossus" of literature. He was professor at Leyden, and annotated on most of the classics. D. 1609.

Scaliness, *n.* State of being scaly; roughness.

Scal'ing-bar, **Scal'ing-ham'mer**, *n.* A rod or hammer for removing scale from the heated surfaces of a steam-boiler.

Scal'ing-lad'der, *n.* (*Mil.*) A ladder constructed in lengths of about 12 feet, which are joined together by inserting the end of one portion in staples at the end of another, and securing it.

Scallop, (*skål'lup*), *n.* [*Du. schelp*, a shell.] (*Conch.*) See *ESCALLOP*.

—A recess or curvature of the edge of anything, like that on the margin of a scallop-shell. — A kind of vessel for baking oysters in.

—*v. a.* To mark, or cut, the edge or border of anything

into segments or circles, like those of a scallop. — To cook in the shell, as oysters.

Scalloped, (*skål'lup't*), *a.* Furnished with, or performed by, or in, a scallop. — Cut at the edge into segments of circles.

Scalloped oysters. (*Cookery.*) Opened oysters baked with bread-crumbs strewn over the surface.

Scalp, *n.* [*Du. schelp*, or *schulp*, a shell.] The skin of the cranium on the top of the head; — sometimes, the skull itself, or the fore part of it; — specifically, the skin of the top of the head cut or torn off, as by the N. American Indians.

—*v. a.* To deprive of the scalp or integuments of the head; as, the Arapahoes scalp their captives.

Scalp'el, *n.* [*Fr.*, from *Lat. scalpellum*.] A small, surgical, cutting instrument or knife, used in anatomical dissections and surgical operations.

Scalper, **Scal'ping-iron**, *n.* (*Surg.*) A raspatory.

Scalp'iform, *a.* [*Lat. scalprum*, chisel, and *forma*, form.] Chisel-shaped, as the incisors of rodent animals.

Scal'y, *a.* Rough; covered with, or abounding in, scales; squamous; as, a scaly alligator. — Resembling scales, laminae, or layers. — Mean; scabby; underhand; as, a scaly fellow, he served me a scaly trick. (*Colloquial and vulgar.*)

(*Bot.*) Lamine; as, a scaly bulb. — Covered with layers; as, a scaly stem.

Scal'y-winged, *a.* Having wings in the form of scales, as certain insects.

Scaman'der, or **XANTHUS**, a river of Asiatic Turkey, rising in Mt. Ida, and flowing W.S.W. into the Ægean Sea.

Scam'ble, *v. n.* [*Du. schommelen*, to stir, to shake.] To be quick, busy, or scrambling; to be bold, turbulent, and rapacious; as, a scrambling soldier. — To move about in an awkward manner; as, "scrambling shifts." — *More*.

—*v. n.* To maul; to mangle.

Scam'bler, *n.* One who scrambles. — One who sponges; a bold trespasser upon one's hospitality or generosity.

Scam'blingly, *adv.* In a scrambling manner.

Scam'mony, *n.* [*Lat. scammonia*.] (*Med.*) A gum-resin, the product of the plant *Convolvulus scammonium*. It is one of the best of our resinous purgatives, being less drastic and irritating than aloes, and more manageable than colocynth or jalap. It is a simple purgative, and acts exclusively on the small intestines; and, according to the amount of it employed, is either a laxative, purgative, or cathartic, and on this account it enters into many of the preparations of the pharmacopoeia, and is a great favorite with most medical men for children.

Scamp, *n.* [*From O. Fr. escamper*, to abscond.] A mean knave; a rascally person; a rogue; a petty villain; a pitiful scoundrel. (*Colloq.*)

Scam'per, *v. n.* (See *SCAMP*.) Originally, to flee from the field of battle. — Hence, to run with fear and celerity; to hasten flight; as, he scampered away home.

—*n.* A hasty flight; a run, as on a horse; as, to take a scamper.

Scamp'ish, *a.* Resembling or befitting a scamp; rascally; roughish; with petty villainy; as, scampish behavior.

Scan, *v. a.* (*imp.* and *pp.* *SCANNED*), (*skänd*). [*Lat. scandere*.] To measure or read by its feet, as a verse; to examine, as a verse, by counting the feet; to recite or measure, as verse, by distinguishing the feet in pronunciation. — Hence, to examine with critical care or nicety; to scrutinize.

Scan'dal, *n.* [*Fr. scandale*; *Lat. scandalum*; *Gr. skandalon*.] A cause or occasion of sin; the condition of being imputatively disgraced or subjected to reproach; reproach or reprobation evoked by that which is regarded as wrong, heinous, or flagrant. — Opprobrious censure; reproachful aspersion; defamatory speech or report; something uttered which is false and injurious to reputation; slander or defamatory talk circulated heedlessly or falsely.

(*Equity.*) Anything alleged in the pleadings which is impertinent and reproachful to any person, or which derogates from the dignity of the court, or is contrary to good manners.

—*v. a.* To asperse, traduce, defame, or treat opprobriously. (*R.*)

Scan'dalize, *v. a.* [*Fr. scandaliser*, from *Gr. skandalizō*.] To offend by some action supposed criminal; to displease; to subject to reproach; to excite the reprobation of; as, he scandalized his family by his notorious vices. — To reproach; to defame; to assail with opprobrium; to traduce; to slander; to bring disgrace upon; as, the better class of people looked on scandalized.

Scan'dalous, *a.* [*Fr. scandaleux*.] Giving scandal or offence; exciting reprobation; calling forth opprobrium; as, such conduct would be deemed scandalous. — That brings shame or ignominy; opprobrious; disgraceful to reputation; as, a scandalous vice. — Defamatory; libellous; scurrilous; as, a scandalous story.

Scan'dalously, *adv.* Shamefully; in a manner to cause scandal or excite offence. — Censoriously; capriciously; with a disposition or propensity to find fault; as, a person scandalously nice or particular.

Scan'dalousness, *n.* Quality or state of being scandalous; quality of exciting offence, or of being disgraceful or opprobrious.

Scan'dent, *a.* [*Lat. scandens*, from *scandere*, to climb.] Climbing, as a stalk or petiole.

Scan'derbeg, GEORGE CASTRIOTA, an Albanian chief, b. at Croia, 1404, fought for some time under the Crescent for Aumrath II., but becoming possessed of the chief city of his country, which the Turks had taken, he turned against them, abjured Mohammedanism, and raised the whole of Epirus in revolt. For 25 years he withstood all the efforts of the Turks to overcome him,

defeating them in many battles, even when led by the Sultan. However, shortly before he died he was compelled to yield to superior forces. D. 1466 or 1467.

Scandinavia, (*skån-di-nai'-vi-ä*), a general name given by the ancients to the great tract of country lying to the N. of Germany, comprising Denmark, Norway, and Sweden.

Scandinavia, in *Wisconsin*, a post-township of Waupaca co., 7 m. N.W. of Waupaca.

Scan'ing, *n.* (*Poet.*) The measuring a verse by feet, in order to see whether the quantities be duly observed. Thus, a hexameter verse is scanned by reducing it into six feet, a pentameter into five, and so on. It is chiefly used in regard to Greek and Latin verses.

Scan'sion, *n.* [*Lat. scansio*.] The act of scanning.

Scanso'ries, **SCANSORIA**, or **CLIMBERS**, *n. pl.* [*From Lat. scandere*, to climb.] (*Zoöl.*) The name of an order of birds, including those which have the toes arranged in pairs, two before and two behind; a conformation of the foot which is well adapted for the act of climbing. This order comprises five families, — *Psittacidae* or Parrots, *Ramphastidae* or Toucans, *Trogonidae* or Trogons, *Cuculidae* or Cuckoos, and *Picidae* or Woodpeckers.

Scant, *v. a.* [*Dan. skaane*, to spare.] To limit; to straiten; to treat illiberally or parsimoniously; as, to scant one in pay or necessities. — To cut short; to make narrow, mean, or scanty; as, his allowance of liquor was scant.

—*n.* State of being scant or scanty; scantiness; want of sufficiency; scarcity.

—*a.* Without due proportions; not full, large, or plentiful; scarcely sufficient; rather less than what is required for the purpose; scanty; as, a scant allowance of money or provisions.

Scant'ic, in *Connecticut*, a village of Hartford co., 10 m. N.N.E. of Hartford.

Scant'ic River, in *Massachusetts*, rises in Hampden co., and flows S.S.W. into the Connecticut River, abt. 7 m. N. of Hartford.

Scant'ily, *adv.* [*From scanty*.] With scantiness or parsimony; not fully, plentifully, or liberally; sparingly; niggardly; meanly; as, he keeps me scantily supplied with money.

Scant'iness, *n.* State of being scanty; narrowness; want of space or compass; deficiency of amplitude, greatness, or abundance; limited extent or quantity; want of sufficiency or fulness; as, the scantiness of a man's purse accounts for the scantiness of his wardrobe, her beauty made amends for the scantiness of her apparel.

Scant'ing, *n.* [*Fr. échantillon*.] A piece of timber cut from a log, of a small size, as for studs, rails, &c. — The transverse dimensions of a piece of timber in breadth and thickness; also, a piece of timber, as a quartering for a partition, or the rafters, purlin, or pole-plate of a roof. All quartering under five inches is termed scantling.

(*Masonry.*) The size of the stones cut, in length, breadth, and thickness.

—A rough draught, sketch, pattern, or outline.

Scant'ly, *adv.* In a scant manner.

Scant'ness, *n.* State or quality of being scant.

Scanty, *a.* (*comp.* *SCANTIER*; *superl.* *SCANTIEST*.) Narrow; small; scant; insufficient; lacking amplitude or proper quantity or extent. — Barely sufficient; defective; poor; not copious, full, or ample; as, a scanty stock of ideas. — Sparing; parsimonious; niggardly; penurious; as, a scanty delivery of words.

Scap'e, *n.* [*Fr.*, from *Lat. scapus*; *Gr. skapos*.] (*Arch.*) The shaft of a column. — The apophyge of a shaft.

(*Bot.*) A flower-stalk springing straight from the root, as in the primrose, snow-drop, &c.

Scap'e-gallows, (*gål'luz*), *n.* One who has narrowly escaped death on the gallows.

Scap'e-goat, *n.* [*escape* and *goat*.] (*Jewish Antiq.*) A goat which was brought to the door of the Jewish tabernacle, where the high-priest laid his hands upon him, confessing the sins of the people, and putting them on the head of the goat, after which the goat was sent away and let loose in the wilderness, bearing the iniquities of the people. — Hence, one who is made to suffer or bear the penalty of another's crime or wrong-doing.

Scap'e-grace, *n.* A graceless, reckless, harum-scarum fellow; a spendthrift; a rake.

Scap'e-wheel, *n.* (*Horol.*) The wheel in the escapement of a watch or clock, which drives the balance or pendulum.

Scaphite, (*skáf-ít*), *n.* [*From Gr. skaphē*, a boat.] (*Pol.*) A genus of elliptical-chambered shells, belonging to the *Ammonitidae*. They resemble the ancient form of a boat, and are almost peculiar to the chalk formation.

Scaph'oid, *a.* [*From Gr. skaphē*, and *eidōs*, form.] (*Anat.*) A name given to some small bones and varieties of bones (Fig. 1044), from their fancied resemblance to a little boat. Sometimes called *navicular*.

Scap'iform, *a.* [*Lat. scapus*, scape, and *forma*, form.] (*Bot.*) Having the form of a scape or flower-stem.

Scap'olite, *n.* [*Fr.*, from *Gr. skapos*, a staff, and *lithos*, stone.] (*Min.*) A silicate of alumina and lime, originally from Arendal in Norway, the crystals of which are often collected in groups of parallel diverging, or intermingled prisms (whence its name). It is generally of a pale color; either white or gray, yellowish, blue, green, or red, and transparent or translucent.

Scap'ple, *v. a.* (*Masonry.*) To reduce a stone to a straight surface without working it smooth.

Scap'poose, in *Oregon*, a precinct of Columbia co., pop. abt. 200.

Scap'ula, *n.* [*Lat.*, the shoulder-blade.] (*Anat.*) The name given to that flat, triangular bone passing from the shoulder-joint in a direction towards the vertebral col-

amn, and extending, when the arms hang loosely, from the first to about the seventh rib. It presents various irregularities, and is so thin in some places as to be transparent. The outer surface is slightly convex, and divided into two unequal parts by a very prominent ridge or plate of bone, termed the "spine." The use of this bone is to afford a movable fulcrum for the motions of the arm, as well as an extensive surface for the attachment of the muscles which effect the movement.

Scap'ular, *a.* [Lat. *scapularis*, from *scapula*=Sansk. *skandha*, the shoulder-blade.] Pertaining to the shoulder, or to the shoulder-blade; as, the *scapular* arteries.

Scap'ular, *n.* [Fr. *scapulaire*, from Lat. *scapula*, the shoulders.] (*Ecll.*) A portion of the dress of the monastic orders in the Roman Catholic Church, consisting of two hands of woollen stuff, of which the one crosses the back or shoulders, and the other the stomach. The scapulary of lay persons consists of two little pieces of stuff, on which the name of the Virgin is embroidered.

(*Surg.*) A broad bandage divided into two tails for three-quarters of its length.

Sca'pus, *n.* [Lat.] (*Arch.*) Same as *SCAPE*, *q. v.*

(*Zoöl.*) The stem or trunk of a feather, including the hollow base or quill (*calamus*), which is inserted into the skin, and the solid exerted stem supporting the barbs (*rachis*).

(*Bot.*) A scape. See *SCAPE*.

Scar, *n.* [A. S. *sceran*.] A mark in the skin or flesh of an animal made by a wound or an ulcer, and remaining after the wound or ulcer is healed; any mark denoting previous injury; a cicatrix; a blemish. — A precipitous bluff;—also written *scaur*.

(*Bot.*) A mark left upon a stem or branch by the fall of a leaf, leaflet, froud, &c., or upon a seed by the severance of its stem.

(*Zoöl.*) See *SCARUS*.

—*v. a.* (*imp.* and *pp.* *SCARRED*,) (*skärd*.) To mark or cicatrize with a scar, or scars; as, "I'll not *scar* that white skin of hers."—*Shaks.*

—*v. n.* To form a scar; to be covered with a scar; as, the ulcer *scars* over.

Scar, a mountain of Ireland, prov. of Leinster, co. of Wicklow, 2,105 feet high.

Scarabæidæ, (*skar-a-be'e-de*,) *n.* (*Zoöl.*) The Scarabæes, a large family of *Coleoptera*, embracing beetles which, though differing in many respects, agree in having the antennæ ending in a knob composed of three or more leaf-like pieces; a projecting plate or clypeus, which extends forwards over the face like a visor; a short, broad, thick, and convex form; legs fitted for digging, being toothed on their outer edges; and feet five-jointed. Some live mainly upon or beneath the surface of the earth, and are hence called *Ground-beetles*; others in the winged state are found upon trees, the leaves of which they devour, and are called *Tree-beetles*; and others, which in the perfect state feed upon the juices of flowers, are called *Flower-beetles*. This group has been much divided, thus appearing in some works as many distinct families. The Goliath (Fig. 1178), and the

Fig. 2315. — SCARABÆUS,

(The Sacred Beetle of the Egyptians.)

Inca (Fig. 1371), are among the most splendid species of *S.*, but the type of the family is *Scarabæus*, or *Atenichus sacer* (Fig. 2315), the Sacred Beetle of the Egyptians. The use and meaning of the *scarabæus*, as a symbol, are, as yet, among the mysteries of the archæological science. It was habitually worn by the ancient Egyptians and Etrurians as an amulet. The ancient Egyptian *scarabæus* was plain, or inscribed with characters, and was made of opaque stone, basalt, or porphyry. The Etrurian *scarabæus* (found in quantities in the sepulchres) was of semi-transparent stone, cornelian, onyx, sardonyx, agate, or jasper.

Scara'bæus, *n.* [Lat.] (*Zoöl.*) The typical genus of the *SCARABÆIDÆ*, *q. v.*

Scara'bee, *n.* (*Zoöl.*) One of the *Scarabæidæ*, *q. v.*

Scaramouch, (*skär'a-mouch*,) *n.* [Fr. *scaramouche*; It. *scaramuccio*.] A personage in the old Italian comedy, dressed in the Spanish or Hispanio-Neapolitan costume, and representing a military personage, a poltroon and braggadocio (a kind of *Captain Bobadil*), who always ended by receiving a beating from the hands of *Harlequin*.—Hence, a buffoon; a bombastic, pretentious character.

Scar'ba, (*skar'ba*,) a small island of the Hebrides, separated from the N. end of Jura by a narrow sound. *Ext.* 3 m. long, and 3 broad.

Scar'borough, *Scar'bro'*, a seaport-town of England, co. of York, on a bay in the German Ocean, 35 m. N.E. of York, and 227 m. N. of London. Its harbor is extensive, safe, and of easy access. It is much frequented for sea-bathing, and for its mineral springs.

Scarborough, a seaport-town of the Island of Tobago, West Indies, 7 m. N.E. of Milford; Lat. 11° 6' N., Lon. 60° 30' W.

Scar'borough, in Indiana, a village of Pulaski co., 85 m. S.E. of Chicago.

Scarborough, in Maine, a post-village and township of Cumberland co., 60 m. S.W. of Augusta.

Scarce, (*skärs*,) *a.* (*comp.* *SCARCER*; *superl.* *SCARCEST*.) [It. *scarse*, rare, scarce.] Being in small quantity in proportion to the demand; not plentiful or abundant; being few in number and scattered; deficient; wanting; rare; infrequent; uncommon; as, money is *scarce*, contentment *scarcer*, happiness *scarcest*.

Scarce, *Scarce'ly*, *adv.* Hardly; barely; scantily; but just; with difficulty; as, I *scarce'ly* knew her again, he has *scarce* an enemy in the world.

Scarce'ment, *n.* (*Arch.*) A plain, flat set-off in a wall.

Scarce'ness, **Scarcity**, (*skär'si-ty*,) *n.* State of being scarce; smallness in quantity, or smallness in proportion to the wants or demands; defect of plenty; a deficiency; dearth; as, a *scarcity* of corn.

"Let the *scarce'ness* recommend the fare."—*Addison*.

—State of being raro or infrequent; as, the value of an advantage is enhanced by its *scarce'ness*.

Root of scarcity. (*Bot.*) The Mangel-wurzel. See *BETA*.

Scare, (*skär*,) *v. a.* [Icel. *skiarr*, apt to flee.] To strike with sudden fright or terror; to frighten; to terrify; to alarm; as, to *scare* a hare from its form.

To *scare away*, to drive away by frightening; as, they have *scared away* two of my best sheep.

Scare'crow, *n.* Originally, any frightful effigy or thing set up to scare crows, or other birds, from grain-fields;—hence, anything terrifying without danger; a bugbear; any vain object to inspire a momentary feeling of terror.

Scarf, *n.*; *pl.* *SCARVES*, or *SCARFS*. [A. S. *scarf*, a fragment; Ger. *scherf*, from *scheren*, to shear, to cut.] A piece of dress that hangs loose from the shoulders; a light, loose vesture worn about the neck and shoulders.

—*v. a.* To throw loosely on, like a scarf. — To cover with a loose vesture; to dress, as with a scarf.

Scarf, *v. a.* [Dan. *skarre*, to joint, to unite timber.] To lap the ends of a plank or piece of timber one over the other, in order to appear like one solid piece, as keelsons, clamps, &c.

—*n.* (*Carp.*) The part cut away from each of two pieces of timber to be joined longitudinally, so that the corresponding ends may fit together in an even joint. — The joint formed by scarfing.

Scar'fing, *n.* (*Carp.*) The formation of a beam out of two pieces of timber; usually employed when it cannot be conveniently obtained in one length. It is usually performed by cutting the ends obliquely, indenting the faces where they are joined to each other, and bolting them through the tapering ends when brought together.

Scarf'skin, *n.* (*Anat.*) The cuticle or epidermis. See *SKIN*.

Scarification, (*ska're-fe-kai-shun*,) *n.* [Lat. *scarificatio*.] (*Surg.*) The operation of making small cuts or punctures in the skin by means of lancets or other cutting instruments, particularly the cupping instrument, or *scarificator*, consisting of ten or twelve lancets, which are discharged through apertures in its plane surface by pulling a kind of trigger, so that in passing they make a number of incisions in the part to which the instrument is applied.

Scarifica'tor, *n.* (*Surg.*) See *SCARIFICATION*.

Scarifier, *n.* One who, or that which, scarifies.

(*Agric.*) An implement used for stirring and loosening the soil, without bringing up a fresh surface. Under the same head may be included the *grubber*, the *cultivator*, and the *scuffler*, all of which act on the combined principles of the plough and harrow at the same time. Some of these implements have wheels, by the raising or lowering of which the tines or prongs may be made to sink more or less into the earth.

Scarify, *v. a.* (*imp.* and *pp.* *SCARIFIED*.) [Lat. *scarifico*.] To scratch or cut, as the skin, with a sharp-pointed instrument; or to make small incisions in by means of a lancet or cupping instrument, so as to draw blood from the smaller vessels without opening a large vein. — To stir or loosen the upper soil of; as, to *scarify* a piece of ploughed land.

Scar'iose, **Scar'ions**, *a.* [Fr. *scarieux*.] (*Bot.*) Tough, thin, dry, and membranous.

Scar'latina, *n.* [Lat.] (*Med.*) Same as *SCARLET FEVER*, *q. v.*

Scarlati'ons, *a.* Of a scarlet color;—hence, pertaining, or relating, to the scarlet fever.

Scarlat'ti, ALESSANDRO, an Italian composer, b. at Naples, 1650, who was the founder of the Neapolitan school of music. He is said to have written 200 masses, 100 operas, and 3,000 cantatas. His writings, although they produced a revolution in the style of operatic music, are almost all completely forgotten. D. in Sweden, 1735.

Scar'less, *a.* Without scars; unmarked by cicatrices.

Scar'let, *n.* [Ger. *scharlach*; It. *scarlato*; Fr. *écarlate*.] A beautiful bright-red color, lighter than crimson; an orange-red color, of various tints and shades; vermilion. — Cochineal furnishes a fine scarlet color, which is still largely employed in dyeing. Scheffer, who produced the best formula for dyeing this color, gives the proportions as follows: Starch, 9 lbs.; cream of tartar, 9 lbs. 6 oz.; solution of tin, 9 lbs. 6 oz.; and cochineal, 12 lbs. 4 oz. These are the quantities required for 100 lbs. of wool or cloth. See *ROSANILINE*.

—Cloth of a scarlet color. — *Shaks.*

—*a.* Of the color called *scarlet*; of a light orange-red hue; as, a *scarlet* coat, a *scarlet* lip, she blushed *scarlet*, &c.

Scarlet-bean, *SCARLET-RUNNER*, *n.* (*Bot.*) The *Phaseolus multiflorus*, extensively cultivated in England as an esculent. See *BEAN*.

Scar'let Fever, or *SCARLATINA*, *n.* (*Med.*) A contagious febrile disease, almost always attended during a part of its course by a rash and by sore throat. Sometimes only one of these features is well marked, sometimes both. Though persons of all ages are susceptible of it, it is eminently a disease of children. Like small-pox or measles, it rarely attacks a person more than once. It usually comes on with shiverings and a feeling of lassitude, followed by more or less of fever, restlessness, loss of appetite, headache, nausea, and occasionally vomiting. Then, generally on the second day, the eruption begins to come out, though in some of the worst forms it may be deferred to the fourth. In the most regular and favorable cases, the eruption stands out for three or four days, and begins to fade and decline, becoming, by degrees, faint, and disappearing altogether in the major instances before the end of the seventh day. The tongue is often covered at the outset with a thick white cream-colored fur, which gradually cleans away, and the surface becomes preternaturally red and raw-looking. There is a sensation of stiffness and pain on moving the neck, with pain on swallowing; the voice is thick, and the throat feels rough and straitened. Physicians distinguish three different varieties of *S. F.*; viz., *S. simplex*, in which there is a florid rash and little or no affection of the throat; *S. anginosa*, in which both the skin and the throat are decidedly implicated; and *S. maligna*, in which the stress of the disease falls upon the throat. In malignant cases the eruption, if it appear at all, is livid and partial, fades early, and is attended with a feeble pulse, a cold skin, and extreme prostration of strength. Sometimes the patient sinks at once, and irretrievably, under the virulence of the poison, and life is extinguished in a few hours. The chance of recovery is much greater in anginosa, when the eruption is florid and stands out well; but even here there are various ways in which it may prove fatal. The state of the throat is full of peril, becoming foul and sloughy, and many cases prove fatal in the second week of the disorder. *S. simplex* is a very mild form of the disease, and deviates only slightly from a state of health. *S.* is also dangerous from its tendency to give rise to other complaints, as boils or strumous ulcers, various forms of scrofula, dropsy, &c. In treating the simplest form of scarlet fever, little else is required than confinement to the house, regulation of the bowels, and the avoidance of all stimulating substances in the matter of diet. In anginosa, frequently, all that is necessary is to keep the bowels open by moderate laxatives, and watch the progress of the complaint. If the heat of the surface is great and distressing, cold or tepid sponging may be adopted, and if the pulse is hard and strong, some leeches may be applied behind the ear. If delirium come on, the scalp may require to be shaved, and cold water applied to it; and if the fever and delirium are violent, blood may have to be taken cautiously from the arm. In the worst form of this disease, all efforts to save the patient will often be unavailing. When the system seems to be overwhelmed with the strength of the poison, a liberal administration of wine and bark will be required to sustain the flagging powers until the deadly agency has in some measure passed away. As gargles for the throat, a weak solution of chloride of soda or of nitrate of silver is very useful. A solution of chlorate of potash in water (a drachm to a pint) is recommended as a drink in this disease. The bowels also require to be carefully watched; and great care is necessary to avoid cold during the period of convalescence.

Scar'let Maple, *n.* (*Bot.*) The red maple. See *ACER*.

Scar'let Lake, *n.* (*Paint.*) A pigment prepared in the form of cochineal; it is of a beautiful transparent red color, and excellent body, working well both in water and oil, though, like other lakes, it dries slowly. Strong light discolors and destroys it, both in water and oil; its tints with white-lead, and its combinations with other pigments, are not permanent, yet when well prepared and judiciously used in sufficient body, and kept from strong light, it has been known to last many years; but it ought never to be employed in glazing, nor at all in performances that aim at high reputation and durability.

Scar'let Oak, *n.* (*Bot.*) A species of *Quercus* (*Q. coccinea*). It is a large tree, 80 feet in height, with a diameter of 3 or 4. Leaves of a bright, shining green, with about 4 deep sinuses, remarkably rounded and broad at the base. By the frosts of autumn they are changed to *scarlet*, unlike those of the red oak, which become dull-red or brown. The wood is little valued for timber or fuel. It is most abundant in the Middle and Southern States, but is often met with in the more S. parts of New England.

Scarp, *n.* See *ESCARP*.

—*v. a.* (*imp.* and *pp.* *SCARPED*,) (*skärpt*.) To cut down, so as to make almost perpendicular; as, a *scarped* rock.

Scar'pa, ANTONIO, a distinguished Italian anatomist, physiologist, and physician, b. in the prov. of Friuli, 1748. He was professor of anatomy at Paris. Surgical anatomy owes its first development to the labors of this exact and patient observer. D. 1832.

Scar'ron, a French poet, b. at Paris, 1610, is famous for his humor and pleasantry of manners, deformity of body, and vigor of mind, and as the husband of Francoise d'Aubigné, who, after his death, became famous as Madame de Maintenon, *q. v.* D. 1660.

Scar'ry, *a.* Covered with scars.

Scars'dale, in New York, a post-village and township of Westchester county, 22 miles north north-east of New York.

Scar'rus, *n.*; *pl.* *SCARI*. [Lat.] (*Zoöl.*) A genus of acanthopterygious fishes, known also as Spar- and Parrot-fish.

They are chiefly found in tropical seas, and are remarkable for their brilliant colors.

Seal, interj. Begone; off; away;—an expression used in driving away a cat.

Seal'ary, in British N. America, an island E. of Cape Breton Island, 6 m. long and 2 broad; Lat. 43° N., Lon. 59° 41' W.

Seal'ies, *n. pl.* [O. Fr. *escaches*.] A kind of stilts to fit to the feet, used in walking across miry places.

Seath, Seathie, (*skāth*), *v. a.* (*imp.* and *pp.* SCATHED,) (*skāthd*). [A. S. *scathan*; Ger. *schaden*; Icel. *skéðia*; allied to Gr. *askēthes*, scatheless.] To injure; to harm; to damage; to waste; to destroy.

Seath'ful, *a.* Harmful; wasteful; detrimental; destructive.

Seath'fulness, *n.* Harmfulness; destructiveness.

Seath'less, Seathe'less, *a.* Without injury, waste, or damage.

Scat'ter, *v. a.* [A. S. *scateran*, from *sceadan*.] To strew; to throw loosely about here and there; to sprinkle; to spread or set thinly.—To separate or remove, as things to a distance from each other; to disperse; to dissipate; to reduce from serried or compact to loose or broken order; as, to scatter an enemy's ranks.—Hence, to frustrate; to subvert; to overthrow; as, his hopes were scattered beyond redemption.

—*v. n.* To be dispersed or dissipated; as, sound scatters in the open air.

Scat'ter-brain, Scat'ter-brains, *n.* A giddy or volatile person; one who is incapable of concentrating the thoughts or attention; an addle-pate.

Scat'ter-brained, *a.* Giddy; thoughtless; volatile; addle-pated.

Scattered, (*skāt'terd*), *p. a.* Dissipated; dispersed; sprinkled or thinly spread over; as scattered raisins in a pudding, troops scattered in a rout, scattered clouds, &c.

(*Bot.*) Without any apparent regular order or position; as, scattered branches.

Scat'teredly, *adv.* In a scattered manner; dispersedly; separately.

Scat'tering, *p. a.* Divided among many; not uniform.—*n.* Something scattered.

Scat'teringly, *adv.* In a scattered or dispersed manner.

Scap, *n.* Broken shell-fish.

(*Zool.*) The Scap-duck. See **FALIX**.

Scaper, *n.* A tool having a semi-circular face, used by engravers to clear away the spaces between the lines of an engraving, in the manner of a chisel.

Scarr, *n.* A precipitous rock or cliff. See **SCAR**.

Seavage, (*scāv'enj*), *v. a.* To cleanse from filth, impurities, &c.

Seav'enger, *n.* [A. S. *scafan*, to shave, to make smooth; Ger. *schaben*.] A person whose employment is to scrape or cleanse the streets of a city, &c., and carry away the filth.

Scavenger's daughter. (A corruption of *Skeffington's daughter*.) An instrument of torture, invented by Sir W. Skeffington, which so compressed the body as to start the blood from the nostrils, and sometimes also from beneath the nails of the hands and feet.

Seclerat, (*sēl'er-ah*), *n.* [Fr.] A villain; a criminal; a ruffian. (*R.*)

Seclidother, (*sēl'i-dō-thēr*), *n.* [Gr. *skelidos*, leg, and *thērion*, beast.] (*Pal.*) A fossil quadruped of the genus *Seclidotherium*, related to the Sloth, of which several S. American species are known.

Scena, (*shā'nah*), *n.* [It.] A scene, or tableau, of an opera.

Scene, (*seen*), *n.* [Fr. *scène*; Lat. *scena*; Gr. *skēnē*, a covered place; probably from Gr. *skia*, a shadow, a shade, the word being first applied to the shaded part of a theatre.] A stage; the theatre, or place where dramatic pieces and other shows are exhibited.

—The entire decorations, appointments, and fittings incidental to the representation of theatrical action; the curtain or hanging of a theatre adapted to the play in course of performance; as, to paint or shift the scenes, to go behind the scenes.—The whole series of actions and events connected and dramatically exhibited;—hence, a part of a play; a sub-division of an act; so much of an act of a play as represents the same persons in the same place; as, an act of three scenes, the balcony scene in "Romeo and Juliet," &c.—The imaginary place in which the action of a play is supposed to occur, or where the place, time, circumstances, &c., bearing on the plot and incidence of a play, story, poem, &c.; surroundings setting of a subject brought to the imagination.

"The scene is now transported to Southampton."—*Shaks.*

—General aspect or appearance of any object; the whole texture of a series of objects; a sequence of actions or events presented in connection; display; show; spectacle; exhibition; tableau.

"A mute scene of sorrow mixt with fear."—*Dryden.*

—An exhibition of strong feeling between two or more persons, usually of a pathetic, passionate, or tempestuous kind; sometimes, a tableau performed for artificial effect; a theatrical display;—also, occasionally, a domestic broil or contretemps; as, meeting him in another lady's company his wife caused a scene.

Scene'ful, *a.* Presenting much of scenery or imagery.

Scene'man, *n.*; *pl.* SCENE-MEN. One who manages the movable scenes in a theatre; a scene-shifter.

Scene'painter, *n.* One whose avocation is to paint scenes for theatres.

Scene'painting, *n.* A department of the art of painting, governed by the laws of perspective, applied to the peculiar exigencies of a theatre. It is conducted chiefly in distemper or water colors, and admits of the most striking effects, which indeed, in scene-painting, is almost all that is required.

Scenery, (*seen'-*), *n.* Scenes in general; the appearance of a place, or of the various objects presented to view; or, the various objects themselves, as seen together; the representation of a place in which an action, or series of actions, is performed.—Combination of natural views or scenes; general aspect as regards variety and beauty, or the reverse, in a landscape; as, go to Switzerland for fine scenery.

Scene'-shifter, *n.* A scene-man in a theatre.

Scen'ic, Scen'ical, *a.* [Fr. *scénique*.] Pertaining, or relating, to scenery; theatrical; as, scenic effect.

Scenographic, Scenograph'ical, *a.* Pertaining, or having reference, to scenography; drawn in perspective.

Scenograph'ically, *adv.* Perspectively.

Scenography, (*sē-nog'ra-fy*), *n.* [Gr. *skēnographia*—*skēnē*, a scene, and *graphō*, to delineate.] In perspective, the representation of a body on a perspective plane, or a description thereof in all its dimensions, such as it appears to the eye.

Scent, (*sēnt*), *v. a.* [Fr. *sentir*, from Lat. *sentio*.] To discern or perceive by the sense of smell; to smell; as, a hound scents game.—To perfume; to imbue or fill with odor or aroma, good or bad; as, to scent a handkerchief.

—*v. a.* To hunt animals by their scent.

—*n.* [Fr. *senteur*.] That which affects the olfactory organs, and causes the sensation of smell; odor; aroma; perfume; fragrance; smell; as, the scent of heliotrope.—Sense of smell; power of smelling; as, a hound of fine scent.—Chase followed by the scent; track; course of pursuit; as, detectives are on the scent after him.

Scentful, (*sēnt'-*), *a.* Odorous; imparting scent or odor; as, scentful grasses.—Of quick or acute olfactory powers; as, a scentful coyote.

Scent'less, *a.* Inodorous; lacking scent or aroma; destitute of smell; as, a scentless flower.

Seepace, (*ske-pai'-see*), *n.* (*Bot.*) The *Scepa* fam., a small order of plants, alliance *Euphorbiales*, only distinguished from *Euphorbiaceae* by its flowers being amentaceous. There are but 3 genera and 6 species, all natives of India. The wood of *Lepidostachys Roxburghii* is called *cocus*, or *kokra*, and being very hard, is employed for flutes and similar musical instruments.

Sceptic, (*skēp'tik*), *n.* [Fr. *sceptique*; Gr. *skeptikos*, from *skeptomai*, to look carefully into, to examine, to consider.] An inquirer after facts or reasons; one who is as yet undecided as to what is true; one who searches and never finds.

(*Metaph.*) One who doubts the truth and reality of any principle; a Pyrrhonist;—hence, among the moderns, sometimes one who doubts whether any truth, fact, or ruling principle can be established on a philosophical basis; or, a critical inquirer or analyst, as distinguished from a dogmatist.

(*Theol.*) A person who doubts the existence of God, or the truth of revelation; one who holds unbelief of the divine original of Christianity.

Scept'ic, Scept'ical, *a.* Doubting; hesitating to admit the certainty of doctrines or principles; believing in nothing, or doubting of everything.—Doubting or denying the truth of revelation.

Scept'ically, *adv.* In a sceptical or doubting manner.

Scept'icalness, *n.* State or quality of being sceptical.

Scepticism, (*skēp'te-sizm*), *n.* [Gr. *skepsis*, doubt.]

(*Metaph.*) That negative system of philosophy which, by doubting of everything beyond the region of phenomena, doubts the possibility of all speculation; or, according to Sextus Empiricus, "the power of opposing, in all their contradiction, the sensuous representations and the conceptions of the mind, and thus to induce perfect suspension of judgment." The sceptic, in general, accepts of the phenomena of nature as he finds them, and, convinced of the impossibility of diving beneath the appearances to the real causes of things, contents himself with a spirit of doubt and indifference. The ten topics of argument used in the schools of the sceptics were:—1. That on account of the variety that exists in the organism of different animal bodies, it is probable that the same external object presents different images to different animals, and man has no reason for asserting that his perceptions are more conformable to the real nature of things than those of inferior animals.—2. That even among men there is a great diversity both of mind and body, which necessarily occasions a great variety of opinions, every one judging according to his particular apprehension, while no one is able to determine the real nature of things.—3. That the different senses give different reports of the same thing; and hence bodies may have different properties from those which the senses lead us to suppose.—4. That the same thing appears differently according to the different disposition or circumstances of the person who perceives it; whence it is impossible for any one man to pronounce that his judgment concerning any object is agreeable to nature.—5. That things assume a different aspect according to their distance, position, or place, and no reason can be assigned why one of these aspects should agree with the real object rather than the rest.—6. That no object offers itself to the senses which is not so connected and mixed with others that it cannot be distinctly separated and examined.—7. That objects of sense appear exceedingly different when viewed in a compound and in a decomposed state, and that it is impossible to say which appearance most truly expresses their real nature.—8. That every object being always viewed in its relation to others, it is impossible to determine what is simply in its own nature.—9. That our judgment is liable to uncertainty from the circumstances of frequent or rare occurrence, that which happens every day appearing in a very different light from that in which the same thing would appear if new.—10.

That mankind are continually led into different conceptions concerning the same thing through the influence of custom, law, fabulous tales, and established opinions. On all these grounds they held that every human judgment is liable to uncertainty, and that we can only say concerning anything that it seems to be, not that it is what it seems. They likewise maintained that every proposition requires some previous proposition to support it, in infinitum, or supposes some axiom which cannot be proved, and is therefore taken for granted without demonstration; that in argument, the point assumed and that which is to be proved may often be alternately used in each other's place, both being equally uncertain; and lastly, that nothing can be understood by itself, as appears from the endless disputes of philosophers concerning the nature of things, nor by means of something else while itself remains unknown. This perpetual uncertainty and indecision on every point, this entire abnegation of man's proudest faculty—reason—is contrary to the manifest purposes which man has to serve upon earth, and but little accords with the prodigious activity and creative power of the mind. The most celebrated thinkers, if we may so call them, of this class in ancient times, were Pyrrho, Timon, Cenesidemus, and Sextus Empiricus; in modern times, David Hume. The S. of Hume was, beyond all doubt, the most thorough and wide-reaching that philosophy has yet witnessed. He starts with the popular theory of experience, and proceeds with surprising coolness to hew down every intellectual principle for which his theory was incapable of accounting. In open argument, in candid statement, and in solid attack, the Scottish sceptic is greatly in advance of his Greek predecessors. The S. of Hume called forth a host of assailants, and has more or less influenced philosophical thought and opinion since that time, more particularly in the cases of Reid, Stewart, and Hamilton in Scotland; of Jouffroy and Cousin in France; and of Kant, Fichte, Hegel, and Schelling in Germany.

Sceptre, (*sēp'tēr*), *n.* [Fr.; Lat. *sceptrum*; Gr. *skēptron*, a staff, as the badge of command, borne by kings and chiefs, and transmitted from father to son.] A staff, baton, or mace borne by monarchs on solemn or state occasions as a badge of authority or emblem of sovereignty; the appropriate ensign of royalty, of higher antiquity than the crown.—Hence, sovereign or regal power or authority; as, to invest a monarch with the sceptre.

—*v. a.* To invest with regal authority, or with a sceptre, as the ensign of sovereign sway; as, a sceptred monarch.

Scept'reless, *a.* Without a sceptre;—hence, destitute of royal power.

Schæsburg, Schassburg, (*shass'boorg*), a town of Austria, in Transylvania, near the Great Kockel, 120 m. from Temesvar; pop. 8,000.

Schaffhausen, (*shāf'-hou'zn*), the most N. canton of Switzerland, between Lat. 47° 40' and 47° 50' N., Lon. 8° 25' and 8° 55' E., separated by the Rhine on the S., from the cantons of Zurich and Thurgau, and surrounded on the other sides by the Grand-Duchy of Baden; area, 116 sq. m. The surface is undulating, and the soil fertile. Prod. The usual cerealia, fruits, and wine. Manuf. Cotton and hardware. Cap. Schaffhausen. Pop. (1897) 38,940.

SCHAFFHAUSEN, cap. of the above canton, on the Rhine, 25 m. N.W. of Constance, and 23 miles from Zurich. It is a place of antiquity, and has a large parish church, an academy, town library, town hall, and market-house.—Manuf. Cotton, silk, and leather, and it exports the wine raised in the neighborhood. A wooden bridge, of very ingenious construction, is here thrown across the Rhine, and forms a channel of communication between this town and the rest of Switzerland. Pop. 9,000.—The Falls of SCHAFFHAUSEN is a cataract of the Rhine, 3 miles from the town, and has a descent of about 100 feet. It is one of the most striking waterfalls in Europe.

Schaghticoke, (*shat-e-kook'*), in New York, a post-village and township of Rensselaer co., 21 m. N.E. of Albany.

Schamy, (*shā'mil*), the prophet and supreme military chieftain of the Circassians, b. 1797, at the Aoul of Ilmiri, in the north of the Caucasian district of Daghestan. From his earliest years he was ambitious and eager to compete in athletic sports and trials of skill, and his character seems to have been formed from the instructions he received from a teacher named Dschelal-Edin, who taught him the doctrine of Sufeyism, which, dissatisfied with the barren letter of the Koran, appeals to human consciousness, and seeks to inculcate nobler hopes than a gross Mohammedan paradise can offer. When S., in 1824, first took part in his country's

Fig. 2316. — SCHAFFHAUSEN.

Friedrich von Schiller

1759-1805

defence, the leader of the warlike Lesghians was Kasi Mollah. From that time till his capture, in 1859, *S.* became the most troublesome enemy whom the Russians had to encounter in their constant irruptions into Circassia, and the exploits attributed to him would fill a volume. In 1831, in a battle with the Russians, the Murids, under Kasi Mollah, were slain almost to a man, and *S.*, pierced by a ball, lay at his leader's feet; but he escaped in time to present himself at the first meeting of the discomfited tribes held after the battle. In 1836, when his leader fell, the victim of a conspiracy, *S.* was chosen chief. Year after year he baffled the efforts of the Russians, who sent large forces against him, and it was not till after the Crimean War that they were able to break down the power of the Circassians. In 1857-58 they won several important victories over the mountaineers, and made themselves masters of the defile which cut off communications between Vedei, the residence of *S.*, and the pasture grounds of the Tchetchenia. *S.*, with his son, was captured Sept. 7, 1859, by the Russians, who treated their prisoners with great respect. He resided in Moscow, and had an establishment befitting his former station and character. *S.* and his sons took the oath of fidelity to the Emperor of Russia in 1866. Died in 1871.

Schap'ziger, n. A kind of cheese made in Switzerland, to which the common flavor of *Mcilolus cæruleus* is communicated.

Schatul'ga, in Georgia, a village of Muscogee co., 10 m. E. of Columbus.

Schaumburg-Lippe. (PRINCIPALITY OF,) one of the minor states of N. Germany, between Lat. 52° 10' and 52° 30' N., Lon. 9° E., bounded by Hesse-Schaumburg, Hanover, and the Prussian Westphalia; area, 212 sq. m. Cap. Bückeburg.

Schediasm, (skē'di-āzm,) *n.* [Gr. *schediasma*, an extempore speech or action.] Desultory writing on a loose sheet of paper or vellum. (*R.*)

Schedule, (skēd'yūl, shēd'yūl, or sēd'yūl,) *n.* [Lat. *schedula*, dimin. of *scheda*, a strip of papyrus bark, from *scindo*, to cut.] A small scroll, or piece of paper or parchment, containing some writing; a piece of paper or parchment annexed to a larger writing, as to a will, a deed, a lease, &c.; a piece of paper or parchment containing an inventory of goods; a debtor's list of liabilities.

Scheele, (shēel,) KARL WILHELM, an illustrious Swedish chemist, b. at Stralsund, 1742, was educated at a private academy in his native town, and afterwards at a public school, and then served his apprenticeship as an apothecary at Gotheborg. He subsequently acted as assistant to apothecaries at Malmo, Stockholm, and Upsala. There his genius attracted the attention of the professors at this celebrated university, who encouraged him in his pursuits; but it is remarkable that the Swedish government, although aware of his talents, allowed perhaps the ablest man which that country has produced, ultimately to end his days as a humble apothecary in a village on the banks of Lake Moeler. To him we owe the discovery of fluorine, chlorine, and of molybdcic, tungstic, arsenic, lactic, gallic, tartaric, oxalic, citric, malic, purpuric, and saccharic acids, glycerine, and oxygen. He ascertained the nature and the constituents of ammonia and prussic acid, the characters of barytes and manganese, and the elements of the atmosphere. Few men of his century, with the exception of Priestley, can be compared with him as a discoverer. D. 1786.

Scheele's-green, n. (*Paint.*) The delicate and beautiful green color known under this name is composed entirely of arsenite of copper. Its manufacture and use are so dangerous to health, that they are forbidden in France, and should be so in other countries.

Scheele'tine, n. [After the chemist Scheele, q. v.] (*Min.*) A native tungstate of lead, composed (when pure) of 51.7 per cent. of tungstic acid, and 48.3 lead. It occurs in faintly translucent four-sided prisms, which are colorless, or of a yellowish-gray, brownish, or green color.

Scheelite, n. [After Scheele, q. v.] (*Min.*) A tungstate of lime.

Scheerer'ite, n. [From Scheerer, the discoverer.] (*Min.*) A mineral resin found in loosely aggregated, feebly shining, crystalline grains and folia, or in minute acicular crystals, with a yellowish or greenish tinge, in small cavities in brown coal at Utznach in Switzerland, and in Denmark in peat-mosses.

Scheffer, ARY, (shēf'fer,) a French historical painter, b. in Dordrecht, Holland, 1794, who, after studying in Holland, went to Paris, where he finished his artistic education under Baron Guérin. In 1812 he exhibited his first picture at the Paris Exhibition, and from that time rose rapidly to the highest position, both as an historical and *genre* painter. His manner partook of the lofty and devotional character of the modern German school, combined with a certain Gallic style of color and effect. As a portrait-painter he was likewise eminently successful, his best works in this line of art being the portraits of Charles Dickens, Talleyrand, Lamartine, &c. Many of his finest productions have been made familiar in this country, through the medium of the engraver's art; as, for example, the reproductions of his *Faust*; *Mignon*; *Francesca da Rimini* and her lover *Mertine*; *Dante and Virgil in Hell*; and Byron's *Giaour*. Some critics have desired more color, movement, and vigor in his paintings; but, as a distinguished French writer observes, "the materialist brilliancy of color would add too much of the substantial to the charming effects of his brush, which he himself chose rather to give just so much of life as was necessary to the expression of the finest shade of sentiment." D. 1858.

Scheik, n. Another orthography of SHEIK, q. v.

Scheldt, (shelt,) a river of France and Belgium, rising

in the dept. of Aisne, near St. Quentin, and, after a N.N.E. course to Antwerp, dividing into two branches, the E. and W. Scheldt, which flow into the German Ocean. Length, 200 m.

Schelestadt, (shel'stat,) a fortified town of France, dept. of Bas-Rhin, on the Ill, a tributary of the Rhue, 26 m. S.S.W. of Strasburg. *Manuf.* Cotton and linen fabrics, ironware, &c. *Pop.* 9,500.

Schelling, FRIEDRICH WILHELM JOSEPH VON, the last survivor of that famous band of German philosophers of which Kant, Jacobi, Herbart, Fichte, and Hegel are the other chiefs, b. 1775, at Leonberg, in Würtemberg. He studied first at Tübingen, where he and Hegel became intimate friends, thence he went to Leipzig and Jena. At Jena he studied under Fichte, whom he succeeded in the chair of philosophy at that university in 1798. In 1803, he was transferred to Würzburg; and, in 1807, to Munich, where he remained till 1841, when he accepted a chair at Berlin. This chair he soon relinquished, and the last years of his life were spent in comparative seclusion. By the nature of his speculations, developed in a number of fragmentary publications, chiefly in the earlier part of his life, *S.*'s place in the great series of German philosophers is determined to be between Fichte and Hegel, the former of whom b. in 1814, and the latter in 1831. *S.*'s metaphysical theory is generally known by the name of the *System of Identity*. It rests on the principle that the two elements of thought, the objects respectively of *understanding* and *reason*, called by the various terms of *matter* and *spirit*, *objective* and *subjective*, *real* and *ideal*, &c., are only relatively opposed to one another as different forms of the *absolute* or *infinite*, hence sometimes called the two *poles* of the *absolute*. D. 1854.

Schellsburgh, in Pennsylvania, a post-borough of Bedford co., 9 m. W. of Bedford.

Schematism, (skēm'-tizm,) *n.* [Lat. *schematismus*, from Gr. *skematismos*, a dressing up.] A configuration in outline of any systematic arrangements; disposition of the form or figure of a thing. (*R.*)

Sche'matist, n. A schemer; a projector; a contriver; a promoter of plans or designs.

Sche'matize, v. n. [Fr. *schématiser*.] To form or promote a scheme, or schemes.

Scheme, (skēm,) *n.* [Lat. and Gr., from *echō*, to have, to hold, to retain; second aorist infin. *schein*.] A system; a plan; a combination of things connected and adjusted by design; as, an outward *scheme* of things. (*Locke*.) —A purpose or design; a plan; a project; a contrivance; a device; a plot; as, he formed a *scheme* to overthrow the government. —Any lineal or mathematical diagram; a plan or representation of any geometrical or astronomical figure; as, to draw a *scheme* of nativity.

—*v. a.* To plan; to contrive; to devise; to plot.

—*v. n.* To form or devise a plan, or plans; to contrive.

Scheme'ful, a. Fertile in schemes or plans.

Schemer, (skēm'er,) *n.* One who schemes; a contriver; a projector; a planner; also, an intriguer; as, an astute *schemer*.

Schem'ing, p. a. Giving to, contriving, or forming schemes; intriguing; artful; astute; as, a *scheming* intellect.

Schem'ingly, adv. By scheming, or contriving.

Schem'ist, n. A schemer; a schematist. (*R.*)

Schemnitz, (shēm-nitz,) a mining town of Hungary, co. of Houth, on the Schemnitz, a tributary of the Gran, 46 m. N.E. of Gran. It contains the most extensive mines in Hungary, consisting of gold, silver, lead, iron, copper, zinc, and arsenic. *Pop.* 15,000.

Schenk-beer, (shēnk-) *n.* [Ger. *schenk-bier*, from *schenken*, to pour out.] A German beer of mild quality.

Schenectady (shēn-ek'tā-de), in New York, an E. co.; area, 200 sq. m. *Rivers*. The Mohawk, and its tributaries. *Surface*, diversified; *soil*, fertile, especially along the Mohawk. *Cap.* Schenectady. *Pop.* (1897) 33,190.

—A flourishing city, cap. of the above co., on the Mohawk river, 16 m. N.W. of Albany; Lat. 42° 48' N., Lon. 73° 55' W. It is the seat of Union College, and has several churches, banks, newspapers, large machinery and locomotive works, foundries, cotton-mills, manufactories of shawls and agricultural implements, and an immense plant of the Edison Manuf. Co. *S.* was settled by the Dutch in 1661. In 1690 occurred the massacre by the French and Indians. *Pop.* (1897) 22,350.

Scherif, (shēr'if,) *n.* [Ar., a prince, a noble, from *sharafa*, to be eminent or noble.] A title given in the East, by prescriptive usage, to those males who descend from Mohammed through his son-in-law and daughter, Ali and Fatima. Such persons also bear the title of *emir* and *seid*, and have the privilege of wearing the green turban. The chiefs of Mecca and Medina, who are always supposed to belong to this sacred family, are styled the *scherrifs* of those cities.

Schero'ma, n. [Gr. *skeros*, another form of *zeros*, dry.] (*Med.*) A dryness of the eye, arising from a deficiency in the secretion of the lachrymal glands.

Scherzando, Scherzo. (skért-san'do, skért-so,) *adv.* [It.] (*Mus.*) In an airy or sportive manner.

Scherzo, (skért-so,) *n.* (*Mus.*) A composition in an airy or playful style.

Schesis, (skē'sis,) *n.* [Gr.] (*Rhet.*) A figure of speech whereby a certain affection or inclination of an adversary or opponent is feigned for the purpose of answering it.

Scheveningen, (ska'ven-ing-hen,) a town of the Netherlands, prov. of E. Holland, on the N. Sea, 2 m. N.W. of the Hague; *pop.* 5,000.

Schiedam, (shke'dam,) a town of the Netherlands, prov. of S. Holland, on the Schie, a tributary of the Meuse, 3 m. W. of Rotterdam, and 1 m. N. of the Meuse. *Manuf.* Principally gin. *Pop.* 15,500.

Schiller, (shil'lr,) JOHANN CHRISTOPH FRIEDRICH VON, one of the most illustrious of German poets, b. at Marbach, in Würtemberg, 1759. After having studied medicine, and become surgeon in a regiment, he, in his 22d year, wrote his tragedy of *The Robbers*, which at once raised him to the foremost rank among the dramatists of his country. It was performed at Mannheim, in 1782. But some passages of a revolutionary tendency having incurred the displeasure of the Duke of Würtemberg, *S.* left Stuttgart by stealth, and made his way to Mannheim, where, after various wanderings and many hardships, he got his tragedy of *Fiesco* brought out on the stage. The tragedies of *Cubal and Love*, and *Don Carlos*, were his next productions. In 1785 he repaired to Leipzig and Dresden, where he found many admirers. Here he wrote his singular romance called *Geisterscher*, and his *Philosophical Letters*, and collected materials for a *History of the Revolt of the Netherlands under Philip II.* In 1707 he repaired to Weimar, where he was welcomed with great warmth by Weiland and Herder, undertook the management of a periodical

Fig. 2317. — SCHILLER.

called the *German Mercury*, and not long afterwards made the acquaintance of Goethe, which soon ripened into a friendship only dissolved by death. In 1789 he was appointed to the chair of history in the University of Jena, and besides lecturing to crowded audiences, he published his *History of the Thirty Years' War*, and engaged in various literary enterprises, which had great influence on the literature of Germany. *Die Horen*, and *Der Musen-Almanach*, to which the most eminent men in Germany contributed, belong to this period. He also produced the *Xenien*, a collection of epigrams, and wrote his *Ballads*, which are reckoned among the finest compositions of their kind in any language. About 1790 he exhibited a strong tendency to consumption, which, by precluding him from lecturing, greatly reduced his income; but he was relieved from the pressure of misfortune by the kindness of the Prince of Denmark, who settled upon him a pension of a thousand dollars for three years, and thus enabled him to pursue his studies, free at once from narrow circumstances and public duties. He soon after settled at Weimar, in order to direct the theatre in conjunction with Goethe, in accordance with their mutual tastes and opinions; and here he at intervals published the works which, together with those above mentioned, have immortalized his name. Among these are *Wallenstein*, *Mary Stuart*, *Joan of Arc*, and *William Tell*. The best English biographies of *S.* are Carlyle's and Bulwer's. D. at Weimar, May 9, 1805.

Schiller-spar, n. (*Min.*) A hydrated silicate of magnesia, in which a large proportion of the magnesia is replaced by the protoxides of iron and manganese, and by lime.

Schilling, Skilling, n. A small German coin, equal to about 1½ cents.

Schinus, n. [Gr. *schinos*, the mastic-tree.] (*Bot.*) A genus of plants, order *Anacardiaceæ*, consisting of trees and shrubs, natives of tropical America, &c., having unequally pinnate leaves, which in some of the species are so filled with a resinous fluid, that the least degree of unusual repletion of the tissue causes it to be discharged. Some of them fill the air with fragrance after rain; and *S. molle* and some others expel their resin with such violence, when immersed in water, as to have the appearance of spontaneous motion, in consequence of the recoil. *S. areira* is said to cause swellings in those who sleep under its shade. The root of *S. molle* is used medicinally in Peru, while the resin that exudes from the tree is employed to astringe the gums.

Schio, (shē'o,) a town of Lombardy, prov. of Vicenza, 15 m. N.W. of Vicenza; *pop.* 6,800.

Schir'raz Wine, n. A light, aromatic Persian wine, much esteemed in the East, particularly by the Chinese.

Schir'rus, n. (*Med.*) See SCIRRHUS.

Schism, (sizm,) *n.* [Fr. *schisme*; Lat. *schisma*, from Gr. *schizō*, to cleave.] A division or separation in a church or denomination of Christians; breach of unity or concord among people professing the same religious

faith;—also, the offence of seeking to produce disunion in a church without useful or justifiable cause.—Hence, division among tribes, classes, or families of people.

Schismatic, Schismatical, (*sis-mät'ik*), *a.* Pertaining, or relating, to schism; implying schism; partaking of the nature of, or tending to, schism; as, *schismatical* opinions.

Schismatic, n. One guilty of schism; one who proposes, promotes, or practises schism; one who separates from an established church or religious faith.

"The schismatics united to alter the whole system of spiritual government."—*Swift*.

Schismatically, adv. In a schismatical manner; by schism.

Schismaticalness, n. State of being schismatical.

Schismatize, v. a. [*Fr. schismatiser.*] To be guilty of schism; to practice or promote schism; to make a breach of union in a church or religious body.

Schismless, a. Free from schism; undivided by differences of opinion.

Schist, n. [*Gr. schistos, cleaven.*] (*Geol.*) The name given to fissile rocks greatly metamorphosed, and generally having imperfect cleavage. Their basis is more silicious than argillaceous, and if the salts of alumina are present, they exist, not as clay, but as new combinations. Thus we have micaceous schists, chloritic schists, garnet schists, &c. Schists occur geologically with metamorphic rocks, overlying or interstratified with gneiss, and even granite. They differ from slates in being imperfectly fissile, and from shales in being perfectly metamorphosed. They are very abundant in mountainous countries, sometimes forming the entire mountain mass, but more frequently flanking a granite nucleus. They often contain metalliferous veins; but rarely have any other economic value, not being readily dressed to a smooth surface, and not answering the purpose of either stone or slate for building.

Schist'ic, Schistose, Schist'ous, a. [*Fr. schisteux.*] (*Geol.*) Susceptible of separation by natural cleavage into flags, slates, or slabs, as certain metamorphic rocks.

Schizandra'ceæ, n. (*Bot.*) The *Schizandra* family, an order of plants, alliance *Menispermæles*, consisting of trailing shrubs, with alternate exstipulate, simple leaves, and unisexual flowers. Sepals and petals imbricated. Stamens numerous, hypogynous. Ovary pendulous; embryo very minute, with abundant homogeneous albumen. There are but five genera and one species, natives of India, Japan, and the southern parts of N. America. Some have edible fruits. The genera *Schizandra* and *Spharostema* are represented by two scrambling shrubs cultivated in conservatories.

Schizopods, n. pl. [*From Gr. schizo, to divide, and pous, a foot.*] (*Zool.*) A tribe of long-tailed Decapod Crustaceans, including those which have the legs slender and filamentous, accompanied by an external articulated branch as long as the limbs, which thus appear doubled in number.

Schlegel, (sla'gl), AUGUST WILHELM VON, a celebrated critic, poet, and philologist, b. at Hanover, 1767. After finishing his studies at Göttingen, he became professor at Jena, where he lectured on the theory of art, and joined his brother Frederick in the editorship of the *Athenæum*. In 1802 he repaired to Berlin as a wider field for his literary pursuits; accompanied Madame de Staël, in 1805, on a tour through Italy, France, Germany, and Sweden; delivering lectures in Vienna, in 1808, on dramatic art; became secretary to Bernadotte, the Crown-Prince of Sweden, in 1813; and, after studying Sanscrit in Paris, obtained in 1818 the professorship of history at Bonn, which he held till his death. Besides publishing numerous profound philological works, and many dissertations on subjects connected with the fine arts and poetry, he was the founder of the so-called *romantic* school, in contradistinction to the *classical*; his poems and ballads rank among the highest in Germany; his lectures on dramatic art and literature have become a standard work; and his translation of Shakspeare is accounted one of the most wonderful achievements in that difficult, though too often ill-appreciated, art. *S.* often displayed a puerile passion for titles and small court distinctions, which formed a great drawback to his real merits, and drew down upon him merited ridicule. D. 1845.

SCHLEGEL, FRIEDRICH VON, a celebrated German critic and philologist, was a younger brother of the preceding, b. 1772, and studied at Göttingen and Leipzig. His first production of any importance was the *Greeks and Romans*. He then joined his brother in conducting a periodical called the *Athenæum*, and after publishing the philosophical romance of *Lucinda*, he visited Paris, where he delivered lectures on philosophy, and occupied himself with the fine arts. In 1804 he published a *Collection of the Romantic Poetry of the Middle Ages*. In 1805 *S.*, with his wife, a daughter of Moses Mendelssohn, was received into the Church of Rome, at Cologne. After this, he repaired to Vienna, and, in 1809, received an appointment at the headquarters of the Archduke Charles, where he drew up several animating proclamations. When peace was concluded, he delivered in Vienna the lecture on *The History of Ancient and Modern Literature*; a work which has been translated into nearly every European language. In 1812, he edited the *German Museum*, and gained the confidence of Prince Metternich by the composition of various diplomatic papers; in consequence of which he was appointed Austrian counsellor of legation at the German diet, which he held from 1814 to 1818. He then returned to Vienna, and resumed his literary occupations with great zest, contributing to various journals and reviews, lecturing

on many topics connected with philosophy and æsthetics, and above all, producing his *Philosophy of Life, Philosophy of History, and Philosophy of Language*, which rank among his best literary efforts. *S.*'s strong devotional tendencies are especially shown in his interesting *Letters on Christian Art*. D. 1829.

Schleiermacher, (shli'er-ma-ker), FRIEDRICH DANIEL ERNST, a celebrated German theologian and philologist, b. at Breslau, 1768, studied at Halle in 1787, and after holding various ecclesiastical appointments in different parts of Germany, was called to Berlin in 1809 as preacher, and in the following year received the chair of theology in the University. The influence of his writings in Germany was, and still is, very great; but it was, perhaps, surpassed by that which his oral instructions and his personal character exercised over those who lived within his sphere. Of his numerous works we can only name the following: *Reden ueben die Religion; Der Christliche Glaube; the Translation of Plato, unrivalled in excellence; the Critical Commentary on Luke's Writings; and the Sermons*. As a theologian, Schleiermacher held a place in his own country very similar to that of Coleridge in England, midway between the extremes of orthodoxy and doubt. D. 1834.

Schleisingerville, (shli'sing-er-vill), in Wisconsin, a post-village of Washington co., 33 m. N.W. of Milwaukee.

Schleitz, or SCHLEIZ, (shlits), a town of Saxony, co. of Reuss, on the Wiesenthal, 24 m. S.W. of Gera; pop. 5,000.

Schleswig, or SLESWICK, [Dan. Slesvig.] Formerly a duchy of Denmark, bounded N. by Jutland, from which it is nearly separated by the Konge Aa River and the Kolding Fiord. Prussia took possession of it in 1867 along with Holstein, and those two duchies formed the province of Schleswig-Holstein. Area, 6,818 sq. m. Pop. (1897) 1,320,480.

SCHLESWIG, or SLESWICK, a seaport-town of Prussia, prov. of Schleswig-Holstein, formerly the cap. of the Duchy of Schleswig, on an arm of the sea called the Sley, 21 m. from its mouth, and 70 m. N.N.W. of Hamburg; Lat. 54° 32' N., Lon. 9° 35' E. Manuf. Woollens, leather, earthenware, and sugar. Pop. 12,500.

Schleswig, (sles'wig), in Wisconsin, a township of Manitowoc co.

Schley, (shli), in Georgia, a W.S.W. co. Surface, level; soil, generally fertile. Cap. Ellaville.

Schlick, (shlik), n. [*Ger. (Metal.)*] Same as SLICK, *q. v.*

Schliemann, HEINRICH, archaeologist, was born at Neubuckow, Mecklenburg, Germany, Jan. 6, 1822, the son of a Lutheran pastor. His early years were spent in mercantile life; he became a banker in Sacramento, Cal., and was naturalized; amassed a fortune, and (1869) went to the Trojan plain to follow a long-cherished plan to search for the site of old Troy. The results of his 12 years' labor are given in his book, *Troy and Its Remains* (1874). He paid a large price to the Ottoman government for permission to remove the relics he had unearthed, and which he presented to the German nation. In 1876, Dr. Schliemann secured the permission of the Greek government to explore the site of Mycenæ. These excavations brought to light royal tombs, and buried treasures of gold and silver, now deposited at the Polytechnic in Athens. The account is published in *Mycenæ; a Narrative of Researches and Discoveries*. Dr. *S.*'s explorations extended to the island of Ithaca (1869-78); to Orchomenus (1881-82), and to Tiryns (1884-85). Died Dec. 27, 1890.

Schmalkalden, (shmal'kal-den), a town of Germany, in Hesse-Cassel, on the Fulda, 12 m. N. of Meiningen; pop. 55,000.

Schmidelia, n. [After the botanist *Schmidel.*] (*Bot.*) A genus of plants, order *Sapindaceæ*, distributed through the tropics of both hemispheres, consisting of trees or shrubs. The sweet pulpy part of the fruit of *S. edulis* is eaten in Brazil, where the fruits are called *Fruta de Paraê*; but the seeds of most of the genus possess unwholesome properties, and those of *S. cobbe*, a Cingalese species, are reputed to be poisonous.

Schmol'n, a town of Germany, in Saxe-Altenburg, on the Spotta, 7 m. S.W. of Altenburg; pop. 6,500.

Schmol'nitz, a mining-town of N. Hungary, co. of Zips, 21 m. S.E. of Leutschau. It has mines of gold, silver, copper, iron, and sulphur. Pop. 5,500.

Schnapps, (shnap's), n. [*Du. and Ger.*] Holland gin; schiedau.

Schnecks'ville, in Pennsylvania, a post-village of Lehigh co., 63 m. N.N.W. of Philadelphia.

Schneeberg, (shna'berg), a town of Saxony, circle of Zwickau, 20 m. S.S.W. of Chemnitz. Gold and silver lace, cotton fabrics, and chemical apparatus. Pop. 7,600.

Schneidemuhl, (shni'de-mül), a town of Prussian Poland, on the Kuddow, 54 m. W. of Bromberg; pop. 6,000.

Schodack, (sko-dak'), in New York, a post-township of Rensselaer co., 11 m. S.E. of Albany.

Schodack' Centre, in New York, a post-village of Rensselaer co.

Schodack' Landing, in New York, a post-village of Rensselaer co., 12 m. S. of Albany.

Schoeffer, (sheaf'fer), PETER, one of the improvers of the art of printing, who appears to have been at first a copyist at Paris, but was afterwards employed in the establishment of Gutenberg and Faust at Mentz. By one account he is said to have discovered the more easy method of casting the types. When Faust and Gutenberg separated, in 1455, he became the partner of the former, after whose death he printed many works alone. His three sons also became eminent as printers. D. about 1502.

Schoharie (sko-har'ree), in New York, an E. co.; area, 647 sq. m. Surface, mountainous in the W., and else-

where diversified; soil, fertile. Min. Iron, limestone and sandstone. Cap. Schoharie.

—A post-village and township, cap. of the above co., 30 m. W. of Albany.

Schoharie Creek, in New York, rises in the Catskill Mountains, Greene co., and flowing N. enters the Mohawk River from Montgomery co.

Scholar, (sköl'ar), n. [*Fr. écolier, from L. Lat. scholaris*—*schola*, a school; *Gr. scholē*, spare time, that in which leisure is employed, learning.] One who learns of a teacher; one who is under the tuition of a preceptor; a pupil; a disciple; a student;—hence, any member of a college, academy, school, or seminary.—Emphatically used, a man eminent for learning or erudition; a person of high attainments in science or literature; one engaged in scholastic pursuits; a learned person; a classic; a savant; a man of letters.—Hence, a book-learned person; a pedant; a purist or precisian in letters or learning;—used in a sense of ridicule or reproach.—In the great English universities, an undergraduate who belongs to the foundation of a college, and receives partial maintenance from its revenues; as, a *scholar* of Brasenose, Oxford.

Schol'ar-like, Schol'arly, a. Like a scholar; befitting a scholar; as, a *scholarly* composition, *scholarly* taste.

Schol'arly, adv. In the manner of a scholar. (*R.*)

Schol'arship, n. The character, qualities, and acquirements of a scholar; literary or scientific attainments; erudition; learning; as, a man of sound *scholarship*.—Literary education; as, a house of *scholarship*. *Milton. (R.)*

—In the two great English universities, the common appellation given to foundations in colleges,—inferior to *fellowships*, but superior to *exhibitions*, for the maintenance of scholars under certain regulations.—Also, in the universities themselves as rewards for proficiency; as, to read for a *scholarship* at Cambridge.

Scholastic, Scholastic, a. [*Fr. scholastique; Lat. scholasticus; Gr. scholastikos.*] Pertaining, or relating, to a scholar, to a school, or to schools; suitable to a scholar or a school; scholar-like; as, *scholastic* studies, *scholastic* learning.—Pertaining, or having reference, to the schoolmen, or philosophers and divines of the Middle Ages called SCHOLASTICS, *q. v.*

—Hence, pedantic; formal; needlessly or excessively subtle or precise; as, a *scholastic* nicety.

Scholastically, adv. In a scholastic manner; after the method of schools; according to the niceties or system of the schoolmen.

Scholasticism, (sko-lās'ti-sizm), n. The method or doctrines of the scholastic philosophy. See SCHOLASTICS.

Scholastics, n. pl. [*Gr. scholastikos.*] (*Philos.*) The name given to a class of philosophers who flourished in the Middle Ages, and taught a peculiar kind of philosophy, which consisted in applying the ancient dialectics to theology. The *scholastic* theology was, in its general principle, an alliance between faith and reason; an endeavor to arrange the orthodox system of the Church, such as authority had made it, according to the rules and methods of the Aristotelian dialectics, and sometimes upon premises supplied by metaphysical reasoning; and *scholastic* philosophy seems chiefly to be distinguished from this theology by a larger infusion of metaphysical reasoning, or by its occasional inquiries into subjects not immediately related to revealed articles of faith. The name is derived from the circumstance that it originated in the schools instituted by and after Charlemagne for the education of the clergy. It probably arose from the necessity felt of combating heretics with their own weapons, and establishing the doctrines of the Church upon a rational and scientific basis. The founder of the system is generally regarded to have been Scotus Erigen, a native of Ireland, who flourished in the 9th century. The first era of its history is considered to come down to Roscellinus, in 1059, or the contest of the *Realists* and *Nominalists*, *q. v.*; the second, to Albertus Magnus, who died in 1280, when the metaphysical works of Aristotle were more generally known and commented on; and the third, to the revival of learning in the middle of the 15th century, and the consequent improvement in philosophy. Among the most distinguished *S.* besides those already mentioned, were Abelard, Thomas Aquinas, Duns Scotus, and William of Ockham.

Scholiast, (sköl'i-äst), n. [*Fr. scoliate, from Gr. scholias*—*scholion*, interpretation, commonly from *scholē*, a learned discussion. See SCHOLIUM.] A writer of *scholia*; a commentator or annotator;—a name given to the old grammarians or critics who wrote on the margins of manuscripts annotations, called *scholia*, from being, as it were, the fruits of their leisure.

Scholiastic, a. Pertaining, or relating, to a scholiast, or his studies.

Scholium, (sköl'e-üm), n.; Lat. pl. SCHOLIA; Eng. pl. SCHOLIUMS. [*Fr. scholie; Lat. scholium, from Gr. scholion*—*scholē*, incubation.] A note, annotation, or remark, occasionally made on some passage, proposition, or the like. (*Geom.*) An explanatory observation, or excursive remark, on the nature and application of a train of reasoning.

Scholl'ville, in Kentucky, a village of Clarke co.

Schonebeck, (shon-bek'), a town of Prussian Saxony, on the Elbe, 9 m. S.E. of Magdeburg. Manuf. Salt, chemicals, leather, and tobacco. Pop. 9,500.

Schonlinde, (shon-lin-de'r), a town of Austria, in Bohemia, 33 m. from Leitmeritz. Manuf. Cotton and linen fabrics. Pop. 4,500.

Schoodic Lakes, in Maine, a chain of lakes, chiefly in Washington co., the surplus waters of which form the Schoodic River, which falls into the St. Croix River abt. 50 m. from its mouth.

Arthur Schopenhauer

1788-1860

School, (skōōl,) *n.* [Fr. *école*; Du. *school*; Ger. *schule*; Lat. *schola*, from Gr. *scholē*, leisure, spare time; — hence, learning, as being that in which spare time is employed.] This word was formerly used in a larger acceptation than at present, and signified places of instruction not only for children, but for those of more advanced age. It was applied generally to what are now called *colleges* and *universities*. Thus, Shakspeare, in *Hamlet*, speaks of being at *school* at Wittenberg, that is, at the university. The school is one of the institutions of civilized life. In early times, and among rude races, education and instruction were matters of domestic concern. Among the ancient Jews, parents were strictly enjoined to instruct their children in the precepts of the law, the fear of God, and in the history of the people. That reading and writing constituted a part of their education may be inferred from their being instructed to write the precepts of the law upon their door-posts, so that they might be read by all. Schools were not established among them until after their return from the Babylonish captivity, when Ezra, their language and law being in great measure forgotten, gathered round him learned persons, and trained a number of public teachers, some of whom were established in Jerusalem, and others sent into the provincial towns of the country. Schools were first instituted for educating the higher classes of society; the great mass of the people were left to ignorance, or what of instruction their parents could impart. In particular, this seems to have been the case in ancient Egypt, Persia, &c. In Greece, private schools for instructing in reading, writing, and arithmetic, were established as early as 500 B. C.; and afterwards young persons eager for knowledge resorted to the instructions of the philosophers and sophists; but still the great mass of the people remained in ignorance. The same was the case with the Romans, who, from 300 B. C. had schools for boys in the cities; and from the age of Cæsar, who conferred the rights of citizenship on teachers, the higher institutions of the grammarians. The Emperor Vespasian was the first who established public professorships of grammar and rhetoric, with fixed salaries attached to them, for the education of young men for the public service; and in A. D. 150, Antoninus Pius founded imperial schools in the larger cities of the Roman empire. There was still, however, no general system of education. With the diffusion of Christianity, the importance of education came to be seen in a new light. Schools were instituted in the cities and villages for catechumens, and, in some capitals, catechetical schools for the education of clergymen, of which that in Alexandria was the most flourishing from the 2d to the 4th century. From the 5th century, however, these higher establishments seem to have been discontinued, and the episcopal or cathedral schools to have taken their place, in which the young men intended for the clerical profession learned, besides theology, the seven liberal arts, viz., grammar, logic, rhetoric (the *trivium*), arithmetic, geometry, astronomy, and music (the *quadrivium*). The imperial schools declined, and finally became extinct, in the confusion which followed the irruptions of the barbarians, and cathedral and parochial schools for boys and young men of all classes were established in the cities, in which the learning of reading and writing was followed by the *trivium*, and which hence received the name of *trivial schools*. The conventual schools began to be established in the 6th century, and from being at first intended only to prepare persons for the monastic life, they came to be resorted to by laymen, and at length became very famous. It is one of the noblest traits in the character of Charlemagne, that in that age of gross ignorance, he labored with zeal for the instruction of the people under his sway. He decreed (789) that not only every bishop's see and every convent, but that every parish, was to have its school; the two former for the instruction of clergymen and public officers, the latter for the lower classes of the people. At his court he established an academy of distinguished scholars, to whom he himself resorted for instruction, and whom he employed to educate his children and capable boys belonging to the nobility. Charlemagne's decrees were forgotten during the disputes of his grandsons about the government, under whom, also, the court-school was abandoned. In the 12th and 13th centuries, the inactivity and luxury of the clergy led to the neglect of the cathedral and conventual schools, and they rapidly declined. But at length, with the increasing power of the cities, the citizens became more independent, and the magistrates began to take care of the instruction of youth, which was being so much neglected by the clergy. They established schools, in which reading, writing, and the *trivium* were taught, and itinerant monks and students were employed as teachers. It was the commencement of a new system. The teachers, though indeed still belonging to the clerical order, now formed a separate class. They were, however, generally ignorant, frequently immoral, and wandered about from place to place. From the 14th to the 16th century, Germany was overrun with bands of these vagrants, who, as Luther says, though they had hardly seen a university, received appointments as teachers, because they were generally the only persons who could be hired as school-masters, since the more learned youths were ambitious of clerical benefices and academical professorships. The Reformation in the 16th century exercised a most decided and beneficial effect upon the schools, more particularly in Germany. The property of the convents, which had been confiscated by the governments, was in most cases applied to the use of schools, the number of which was now very much increased, their character elevated, and a higher class of teachers established in them. The corporations of cities founded

gymnasias and lycæums, with permanent teachers; schools for girls were also founded, and in the villages instructors were appointed to teach the Catechism. Soon after this, the rise of the Jesuits, and their devotion to education, effected a great improvement on the old Catholic system. At the present time, Germany, with most of the other European countries, England, and the U. States, present three different methods of administering the national elementary education. The Prussian educational system is purely governmental. The primary schools are all under laws and regulations proceeding from the communes. Every child in the kingdom is obliged, under pains and penalties, to attend school from the age of 7 to 14, and the result is that the Prussian people are efficiently educated throughout the entire community. The national education of all the German states closely resembles that of Prussia. The primary schools of France are, in like manner, established and directed by governmental authority. Permission is, however, given to any teacher, under certain conditions, to open a private school. But in England, no schools (except those connected with naval, military, pauper, and penal establishments), are initiated by the civil government. The education of the people is under the care of the Established Church, and of the other religious organizations, and the government comes to their aid by bestowing grants on certain conditions when its assistance is required. The system is entirely different in the U. States, where, though the State governments take the initiative, they go only so far as to ordain that schools of a certain character must exist among a given population. All the questions concerning the buildings, teachers, and methods of instruction, are determined by the people in their capacity of free citizens. There is, consequently, much diversity in the educational condition of different parts of the country; but on the whole, it may be said that there are few countries, if any, where more intelligent attention is given to the education of the people, and where the public schools are more liberally provided for than in this country. (See *Education* under the names of the several states and principal cities of the U. States, and other countries generally.) — *Evening schools* are established in almost all the American cities of any importance, with the view of extending the benefits of education to persons engaged in business during the day. — *Sunday schools*. Their origin is popularly ascribed to Robert Raikes, an English philanthropist, B. 1735, D. 1811; he began in 1781. In 1739, Ludwig Hecker opened *Sabbath schools* for the poor around him, at Ephrata, Pennsylvania. The instruction in S. S. is primarily religious. The number of S. S. pupils in all countries in 1897 was estimated at 20,000,000, with about 2,250,000 teachers. S.-S. pupils in the U. S. number about 10,000,000. — See also *EDUCATION*.

School, *n.* [A. S. *scōol*.] A shoal; a swarm; a multitude; as, a *school* of fishes.

—*v. a.* To instruct; to train; to educate at a school — To tutor; to chide; to admonish; to reprove; to teach by force of example; as, a man *schooled* by adversity.

School/craft, in Michigan, a N. co.; area, 1,216 sq. m. Rivers, Manistee and Whitefish. Surface, diversified, and mostly covered with forest. Cap. Manistique. Pop. (1894) 7,127.

—A post-village and township of Kalamazoo co.

School/craft, HENRY ROWE, an American philologist and traveller, B. in Guilderland (then Watervliet), Albany co., N. Y., 1793. After devoting his youth to the study of natural history and the acquisition of languages, he commenced in 1817 that career in which he subsequently earned a high reputation, by making a journey of exploration through Missouri, whence he returned to Washington with a valuable mass of notes and mineralogical specimens. His *Mines and Mineral Resources of Missouri*, published in 1819, met with the most decided success, and obtained for its author the post of geologist to the exploring expedition dispatched to the sources of the Mississippi in the following year. The *Journal and Report* which he produced at the termination of this mission greatly enhanced his reputation. He was chosen to fulfil, in succession, posts of great responsibility and distinction. In 1821 he acted as secretary to an Indian conference at Chicago. In the following year he was acting as agent for Indian affairs in the N.W. territories, and while discharging these duties he became acquainted with Miss Johnston, a young lady who had received a high education in Europe, but was the child of an Irish gentleman married to the daughter of an Indian chief. From this lady, who became his wife, he received the most valuable assistance in prosecuting that course of research into the languages, traditions, and antiquities of the Indian tribes which, even from his earliest youth, it had been his ambition to pursue. In 1832 he was charged with the conduct of an expedition to the Upper Mississippi and beyond St. Anthony's Falls. Of that mission he produced an account, in his *Expedition to Alaska Lake*, a work in which he showed that he had succeeded in tracing the Mississippi up to its ultimate forks, and to its actual source in Itasca Lake. He was afterwards described as "the only man in America who had seen the Mississippi from its source to its mouth in the Gulf of Mexico." He subsequently acted as commissioner to the Indians for the purchase of territory upon the N.W. frontier, as superintendent of Indian affairs, and in capacities of a like nature. In 1841 he took up his residence at New York, afterwards making a philological and archaeological tour in Europe and Canada. At a later period he devoted himself to the task of arranging and publishing his vast stores of information upon Indian language, antiquities, and ethnology, which he had spent thirty years in collecting. An enumeration of

several of this learned gentleman's most important publications will afford a notion of the great services he performed relative to the aboriginal history of America. His greatest work was entitled *Historical and Statistical Information respecting the History, Condition, and Prospects of the Indian Tribes of the United States*; and of scarcely less value are—*American Indians, their History, Condition, and Prospects*; *Personal Memoirs of a Residence of Thirty Years with the Indian Tribes on the American Frontiers*; *The Myth of Hiawatha*, and other *Oral Legends of the North American Indians* (from this work Mr. Longfellow derived the legend of his poem of "Hiawatha"); *A Complete Lexicon of the Algonquin Language, the most primitive and widely-diffused aboriginal language*; and *Algonic Researches*. S. was a member of the chief European and American literary and learned societies. D. 1864.

School/dame, *n.* **School'-mis'tress**, *n.* The female teacher of a school.

School'-days, *n. pl.* That period of life passed by youth at school.

School'-district, *n.* In the U. States, a division of a town or city in which schools are established and conducted.

School'ey's Mountain, in New Jersey, a post-village of Morris co., 50 m. W. of New York. The mountain, 1,100 feet high, is a great resort for visitors, owing chiefly to the mineral springs at the summit.

School'-fellow, **School'-mate**, *n.* A school associate; one bred and educated at the same school.

School'-girl, *n.* A girl who attends school.

School'-hour, *n.* Time of instruction passed at school.

School'-house, *n.* A building appropriated for the use of schools.

School'ing, *n.* Instruction in school; education in a seminary or institution of learning; tuition; teaching. — Compensation paid for instruction; reward paid to a teacher or preceptor for his services; as, to pay a quarter's *schooling* in advance. — Reproof; reprimand; rebuke; as, he received a sharp *schooling* for his pertness.

School'-maid, *n.* A school-girl.

School'-man, *n.*; *pl.* **SCHOOL-MEN**. A person versed in the niceties or subtleties of academical disputation, or of school-divinity. See *SCHOOL*.

School'-master, *n.* One who presides over and teaches a school; a teacher, instructor, or preceptor of youth;—in a reproachful sense, a pedagogue; a dominie; as, "The *school-master* is abroad." (Lord Brougham.) — One who, or that which, leads, instructs, and disciplines, as, stern experience was his *school-master*.

School'-mate, *n.* Same as *SCHOOL-FELLOW*, *q. v.*

School'-mistress, *n.* Same as *SCHOOL-DAME*, *q. v.*

School'-teacher, *n.* One who teaches or instructs at a school.

School'-teach'ing, *n.* The vocation or employment of imparting instruction to a school.

Schooner, *n.* [Du. *schoner*.] (*Naut.*) A small vessel with two masts, whose main- and fore-sails are suspended by gaffs, reaching from the mast towards the stern, and stretched out below by booms, the foremost ends of which are hooked to an iron, which clasps the mast so as to turn the veils as upon an axis, when the after-ends are swung from one side of the vessel to the other. The S. is generally a fast sailer, and principally employed in trade by those who make speculations where dispatch is a particular object.

Schopenhauer, ARTHUR, a German philosopher, B. at Dantzic, 1788, was the son of *Johanna Schopenhauer*, the popular novelist and littérateur. He studied at Göttingen, attended the lectures of Fichte at Berlin, spent some time at Weimar and Dresden, and led a very restless life till 1831, when he settled at Frankfurt-on-the-Main. He was accompanied only by a female servant and a dog, and lived a quiet, reserved, selfishly comfortable life; seeming to some the model of a sage, and to others a surly fanatic. He despised his countrymen and their philosophies, read much of French and English literature, and latterly paid much attention to oriental studies. He became an enthusiast for Buddha and the Vedas, and enjoyed tracing all Western accomplishments to Eastern sources. The principal work of S. is entitled *Die Welt als Wille und Vorstellung*. It appeared in 1819, and after being neglected for many years, attracted a good deal of attention, and received some sharp blows of criticism. The practical upshot of his system, which makes *will* the one sole reality, is intolerably melancholy, taking from man all that constitutes his greatness, his goodness, or his bliss. God—futility—the soul—mere names, illusions; and the world of men is to him bad, hopelessly bad, and made so. Strange, melancholy, and deterrent, the speculations of S. are likely to remain a monument of dark genius rather than a light of philosophy. They form no centre of warmth and hope, but the funeral pyre on which faith and trust

Fig. 2318. — SCHOONER.

and aspiration immolate themselves. *S.* published several other works of philosophy, of which the most important is, *Die beiden Grundprobleme der Ethik*. D. 1860.

Schorl, (*shorl*), *n.* [Ger. *schörl*.] (*Min.*) Black tourmaline.

Schorl rock. (*Geol.*) A rock formed of an aggregation of schorl and quartz.

Schorlite, *n.* (*Min.*) Same as PYCNITE, *q. v.*

Schottische, (*shöt'teesh*), *n.* [Ger.] (*Dancing.*) A quick kind of dance, performed by two persons, and danced in common time;—it may be described briefly as a combination of the polka and the mazurka.

(*Mus.*) A piece of music set in appropriate time to the steps of such a dance.

Schralenburg, (*shra'len-berg*), in *New Jersey*, a post-village of Bergen co., 5 m. N.E. of Hackensack.

Schran'kia, *n.* (*Bot.*) A genus of plants, sub-order *Mimosæ*. The sensitive brier, *S. uncinata*, is a perennial herb found in the Southern States in dry soils; stem 2-4 feet long, and with the petioles and peduncles armed with short, sharp prickles, turned downwards; flowers in spherical heads, purplish.

Schreckhorn, (*shrek'horn*), ("peak of terror") one of the loftiest of the Swiss Alps; Lat. 46° 35' 26" N., Lon. 7° 21' E. Height, 13,492 feet. It was ascended in 1842 by Agassiz and Desor.

Schrode, or **Serod**, *n.* A codfish or haddock prepared for cooking.

Schreppel, (*skrood'pel*), in *N. Y.*, a twp. of Oswego co.

Schroon, (*skroon'*), in *New York*, a township of Essex co.

Schroon Lake, in *New York*, partly in Essex and Warren cos., abt. 10 m. long, and 1½ wide.

—A post-village of Essex co., abt. 98 m. N. of Albany.

Schroon River, in *New York*, rises in Essex co., and flows S., entering the Hudson in Warren co.

Schubert, FRANZ, a celebrated German musical composer, b. at Vienna, in 1797. He belonged to a family distinguished for their musical talents, and from his earliest years showed so strong a bent to musical studies and composition that the wishes of his friends, who would fain have made him a philosopher, gave way, and he was allowed to follow his true calling. At 7 years of age he was the pupil of Michael Holzer; became a chorister in the imperial chapel, and the pupil of the court-organist and of Salieri. He studied the works of Haydn, Mozart, and Beethoven, and gave lessons in music for a living. The number and variety of his compositions is extraordinary. The most admired is his *Lieder*, and among them *Der Erlkönig*, *Ave Maria*, *Der Wanderer*, and *Die Erwartung*, are perhaps the best known. But he wrote also operas, sonatas, symphonies, overtures, cantatas, 6 masses, &c. He left numerous works unpublished at the time of his death. Schubert spent almost his whole life at Vienna, and there d. 1828. His remains rest near those of Beethoven.

Schuya, or **Shuya**, (*shoo-ja'*), a town of European Russia, govt. of Vladimir, 60 m. N.E. of Vladimir. *Manuf.* Woollens, linens, and soap. *Pop.* 10,000.

Schultzville, (*shoolts'vill*), in *New York*, a post-village of Dutchess co.

Schumla, (*shoom'la*), a fortified town of European Turkey, in Bulgaria, 60 m. S. of Silistria. *Manuf.* Tin and copper wares, leather, and silk goods. *Pop.* 25,000.

Schutt, (*shoot'*) two islands in *W. Hungary*, formed by the arms of the Danube. The largest is 53 m. long and 16 broad; and the smaller 28 m. long and 7 broad. The soil is fertile and well cultivated.

Schuyler, (*ski'lür*), in *Illinois*, a W. central co., bordering on the Illinois River; area, 420 sq. m. *Surface*, undulating, and consists of prairie and timbered land; soil, very fertile. *Cap.* Rushville.

Schuyler, in *Missouri*, a N.N.E. county, bordering on Iowa; area, 324 sq. m. *Rivers*. Chariton, the forks of Fabius River, and the N. Fork of Salt River. *Surface* diversified; soil, fertile. *Cap.* Lancaster.

Schuyler, in *New York*, a S. co., bordering on Seneca Lake. *Pop.* (1897) 17,170.

—A township of Herkimer co., 6 m. E. of Utica. *Pop.* (1897) 1,290.

Schuyler Island, in *New York*, in the W. of Lake Champlain, belonging to Essex co., and nearly opposite Burlington, Vermont.

Schuyler's Falls, in *New York*, a post-township of Clinton co., 7 m. W. of Plattsburg.

Schuylersville, in *New York*, a post-village of Saratoga co., 35 m. N.E. of Albany.

Schuylkill, (*skool'kil*), in *Pennsylvania*, a river which rises near Pottsville, and falls into the Delaware River 5 m. S. of Philadelphia, after a S.E. course of 120 m. It is navigable for sloops to Philadelphia, and for boats to Port Carbon, 3 m. N.E. of Pottsville. It was called by the Indians *Manayunk*. —An E. co.; area, 750 sq. m. *Rivers*. Schuylkill, and Swatara Creek. *Surface*, mountainous, being traversed by the Broad, Sharp, and Mahanoy mountains; soil, thin and infertile. *Min.* Almost all the area of the county is occupied by anthracite coal, varying from 3 to 30 feet in thickness, which forms the principal product of the county, immense quantities being annually mined and exported. Extensive beds of iron ore are also found near Pottsville, the cap. of the co.

—A post-township of Chester co., 13 m. N.N.E. of West Chester.

—A township of Schuylkill co.

Schuylkill Haven, in *Pennsylvania*, a post-town of Schuylkill county, 4 miles south of Pottsville. It is the principal shipping-point of the Schuylkill coal region.

Schwabach, (*shwa'bak*), a town of Bavaria, circle of Middle-Franconia, 9 m. S.S.W. of Nuremberg. *Manuf.*

Cottons, woollens, hosiery, gold and silver lace, paper, printing type, tobacco, &c. *Pop.* 10,000.

Schwal'bea, *n.* (*Bot.*) A genus of plants, order *Scrophulariaceæ*, represented in *N. America* by *S. Americana*, the Chaff-seed.

Schwan'thaler, LUDWIG MICHAEL, an eminent German sculptor, b. in Munich, 1802, whose ancestors had been of the same profession during some generations. He received his artistic education at the Munich Academy of Fine Arts, and subsequently repaired to Rome, where he gained the friendship of Thorwaldsen, who aided him with some valuable advice. His first successes in his profession were due to the patronage of King Louis of Bavaria, who employed the young sculptor in carving a statue of Shakspeare for the theatre at Munich, and afterwards in executing the sculptural decorations for the fine architectural works with which that art-loving monarch was adorning his capital city. He continued to labor with unceasing zeal until he became the acknowledged head of the Munich school of sculpture. In 1835 he was appointed professor of sculpture; but although his health began to decline about this time, his energy was scarcely less ardent than formerly. His grandest work was the colossal statue of Bavaria, which occupies the centre of the Bavarian Hall of Fame, and is about 60 feet in height. His colossal statues of St. Peter, St. Paul, Count Tilly, and monumental statues of Goethe, Jean Paul Richter, and Mozart, are noble productions. The new palace of King Louis of Bavaria, the "Walhalla" of Ratisbon, and, indeed, many of the finest art-collections throughout Germany, are enriched by his splendid works. At his death he bequeathed his studio, together with models of his most important works, to the "Fine Arts Academy" of Munich; and in the same city there is a street named in his honor. D. 1848.

Schwartz, BERTHOLD, a monk of the order of Cordeliers, at the end of the 13th century, was a native of Fribourg, in Germany, and an able chemist. It is said that as he was making some experiments with nitre, he was led to his invention of gunpowder, which was first applied to warlike purposes by the Venetians, in 1300. There is, however, much discrepancy in the accounts of this discovery; and it is certain that Roger Bacon, who d. in 1292, was acquainted with an inflammable composition similar to gunpowder, the knowledge of which Europeans appear to have derived from the Orientals.

Schwartzburg, in *Michigan*, a village of Wayne co., 19 m. W. of Detroit.

Schwartzburg-Rudol'stadt, a principality of the German Empire, bet. Lat. 50° and 51° N., Lon. 11° E., inclosed by Saxe-Weimar, Coburg, Meiningen, and Hildburghausen; area, 340 sq. m. The surface is mountainous and well wooded. *Rivers*. Schwartz, Ilm, and Saale rivers. *Min.* Iron and salt. *Manuf.* Woollen cloth, earthenware, glass, &c. *Chief towns*. Rudolstadt, the cap., and Frankenhansen.

Schwartzburg-Sondershausen, a principality of the German Empire, Lat. 51° 12' and 51° 26' N., Lon. 11° E., inclosed by Prussian territory, except on the W., where it joins a detached portion of Saxe-Gotha; area, 319 sq. m. The surface is undulating and fertile. *Rivers*. Ilbe and Wipper rivers. *Prod.* The usual cerealia. *Min.* Iron. *Manuf.* Woollen and linen goods, and hardware. *Chief towns*. Sondershausen, the cap., and Arnstadt.

Schwatz, (*shwaz*), a town of Austria, in the Tyrol, on the Inn, 16 m. E.N.E. of Innspruck; *pop.* 5,000.

Schwedt, (*shwet*), a town of Prussia, prov. of Brandenburg, on the Oder, 25 m. S.S.W. of Stettin. *Manuf.* Tobacco, leather, and starch. *Pop.* 7,600.

Schweidnitz, a fortified town of Prussian Silesia, on the Weistritz, 42 m. S.E. of Leignitz. *Manuf.* Linen and woollen goods, leather, tobacco, and starch.

Schweinfurt, (*shwine'fort*), a town of Bavaria, in Lower Franconia, on the Main, 29 m. N.E. of Würzburg. *Manuf.* Woollens, chemicals, and leather. *Pop.* 7,800.

Schwein'furt's-green, *n.* (*Painting.*) A pigment of a brilliant sea-green color, prepared by boiling together solutions of arsenious acid and acetate of copper, adding its own weight and quantity of water, and allowing the whole to rest for a few days.

Schwerin, (*shvee'rín*), a town of N. Germany, cap. of the Grand-duchy of Mecklenburg-Schwerin, on the Lake of Schwerin, 35 m. S.E. of Lubeck. *Manuf.* Woollen cloth, tobacco, and vinegar.

Schwerin, or **Schwierzyna**, a town of Prussian Poland, 55 m. W. of Posen. *Manuf.* Woollen goods, leather, and beer. *Pop.* 5,500.

Schwiebus, (*shwe-ai-boss*), a town of Prussia, prov. of Brandenburg, 41 m. S.E. of Frankfurt. *Manuf.* Woollen cloths. *Pop.* 12,000.

Schwytz, or **Schweitz**, (*Canton of*), (*shwitze*), a cant. of Switzerland, between Lat. 46° 50' and 47° 20' N., Lon. 8° 30' and 9° E., having N. and N.E. the cant. of Zurich and St. Gall, E. Glarus, S. Uri and Unterwalden, and W. Zug and Lucerne; area, 339 sq. m. The surface is mountainous and well wooded, and the soil adapted to cattle raising. *Rivers*. Sihl, and Motta. The principal exports are cattle, cheese, and timber. *Cap.* Schwytz. *Pop.* 45,039.

Sciaccia, (*shak'ka*), a seaport-town of S. Italy, in Sicily, prov. of Girgenti, 30 m. N.W. of Girgenti.

Sciagraphy, **Sciography**, *n.* [Gr. *skiagraphia*, painting in chiaro-scuro—*skia*, a shadow, and *graphein*, to describe.] The art or science of projecting or delineating shadows as they fall in nature.

(*Arch.*) The profile or section of a building, to show the inside thereof; a sciagraph.

(*Astron.*) The art of finding the hour of the day or night by the shadow of the sun, moon, or stars.

Sciatic, *a.* [Fr. *sciatique*; L. Lat. *sciatica*.] Belonging

to, or having connection with, the hip; as, the *sciatic* nerve. —Affecting the hip; as, *sciatic* gout.

—*n.* **Sciatic artery**. (*Anat.*) One of the largest branches of the interior trunk of the internal iliac artery; it supplies the deep-seated muscles at the back of the hip. —*Sciatic nerve*, the largest nervous cord in the human body; it supplies nearly the whole of the integuments of the leg, the muscles of the back of the thigh, and those of the leg and foot.

Sciatic stay. (*Naut.*) A rope passing between the main and fore tops, and sustaining a pulley used in loading or lashing a ship's hold. The pulley can move upon this stay.

Sciatica, *n.* [Lat.; Gr. *ischias*, pain in the loins and hips.] (*Med.*) A name often applied to all rheumatic affections about the hip-joint and back of the thigh, but in strictness it is applied only to a disease of the sciatic nerve. This is sometimes an inflammatory complaint, requiring for its treatment cupping and blistering; sometimes it is clearly rheumatic, and then requires the mode of treatment adapted for such cases; sometimes it results from irritation within the pelvis, affecting the nerve before it emerges externally; and sometimes it is purely nervous and neuralgic.

Sciatical, *a.* Sciatic.

Sciatically, *adv.* With sciatica; after the manner, or by means of, sciatica.

Scieli, (*she-kle*), a town of S. Italy, in Sicily, prov. of Syracuse, 8 m. S.W. of Noto. *Manuf.* Woollen goods. *Pop.* 9,700.

Science, (*si'ens*), *n.* [Fr.; Lat. *scientia*, from *scio*, to know.] In its strictly literal sense, the word *science* means simply *knowledge*. This was probably the only sense in which it was at first used; but we are told that by the middle of the 16th cent. the word *S.* had begun to appear as denoting connected and demonstrated knowledge, in opposition to *art*, which signified digested rules of operation, not connected with each other by deduction from common first principles; and by the middle of the 17th cent. the term *S.* was freely used in the sense which it has never since lost, namely, that in which it is opposed to *literature*. *S.*, as distinguished from *art*, is a body of organized knowledge, whose phenomena are arranged so as to exhibit the reasons or causes by which they are influenced in their legitimate connection and independence. A *S.* which deals with the succession of reason and consequence is entitled an *abstract S.*; while that which deals with causes and effects is called, for the most part, a *natural* or *physical S.* Those *S.* which are supposed to be complete are called *exact S.*; as, geometry. The great majority of what are commonly known as *S.* hardly deserve the name, being mere bundles of theories or facts, connected with more or less of exactness, but which a fresh discovery may any day untie. *S.*, as opposed to literature, has for its business the discovery and application of first principles.

—*v. a.* To ground, or cause to become skilled in science; to instruct. (*R.*)

Sci'enceville, in *New York*, a village of Green co., 44 m. S.W. of Albany.

Scienter, (*si'en'ter*), *adv.* [Lat., from *sciens*.] With knowledge.

Sciential, (*si'en'shal*), *a.* Producing science. (*R.*)

Scientific, **Scientifical**, *a.* [Fr. *scientifique*.] According to the rules or principles of science; producing certain knowledge or demonstration; well versed in science; used in science; in accord with, or dependent on, the rules or principles of science; exhibiting profound and practical knowledge; as, a *scientific* treatise, a *scientific* man, *scientific* knowledge or evidence.

Scientific Societies. See SOCIETIES (LITERARY AND SCIENTIFIC).

Scientifically, *adv.* In such a manner as to produce knowledge; according to the rules or principles of science.

Scientist, (*si'en-tist*), *n.* One deeply versed in science; a savant; as, a zealous *scientist*.

Scilicet, (*sil'i-sét*), *n.* [A contraction from Lat. *scire licet*, you may know.] Namely; videlicet; to wit; as follows;—sometimes abbreviated to *sc.* or *ss.*

Scilla, *n.* (*Bot.*) A genus of plants, order *Liliaceæ*. They are ornamental bulbous plants, related to hyacinths, and known under the common names of Squill, Blue-bell, &c. They are chiefly interesting as flower-garden plants, some of them being among the most lovely of early spring flowers. The medical squill is now referred to the genus *Urginea*.

Scilla, (*sil'la*), a seaport-town of S. Italy, prov. of Calabria-Ulteriore, at the entrance of the Strait of Messina, 5 m. N. of Reggio; *pop.* 5,000.

Scil'litine, *n.* (*Chem.*) The bitter principle of the squill (the bulb of the *Urginea scilla*, formerly *maritima*), to which its medical properties of an expectorant and diuretic are referable. It is a white substance, of a resinous appearance.

Scilly Islands, (*The*), (*sil'le*), a group, belonging to England, at the W. extremity of the English Channel, 30 m. S.W. of the Land's End. They consist of 150 islands and rocks, the principal of the former being St. Mary's, Treco, St. Martiu's, St. Agnes, Sampson, and Brechar. The soil is generally fertile, and the climate mild and healthy. *Prod.* Wheat, barley, oats, rye, and potatoes. *Cap.* Hugh-town, on the W. side of St. Mary's Island. *Pop.* 2,431.

—Also, a group in the S. Pacific Ocean; Lat. 16° 28' S., Lon. 156° 10' W.

Scimeter, **Scimeter**, **Scymetar**, (*sim'-*), *n.* A short, curved sword, with a convex edge, much used by Oriental nations, and frequently found in Europe in the latter half of the 15th century.

Scinde, a country of Asia. See SINDE.

Scintilla, (*sin-til-lá*), *n.* [Lat.] A spark; the smallest particle; a tittle; an iota; as, there is not a *scintilla* of wit in his nature. (R.)

Scintillant, (*sin-lá*), *a.* [From Lat. *scintillare*, to sparkle.] Sparkling; emitting fine, igneous particles.

Scintillate, *v. n.* [Lat. *scintillo*, *scintillatum*, from *scintilla*, a spark.] To emit sparks, or fine, igneous particles. — To sparkle, as the fixed stars.

Scintillation, (*sin-til-lá-shun*), *n.* [Fr.; Lat. *scintillatio*.] Act of emitting sparks or igneous particles; act of sparkling or coruscating. — Hence, intellectual radiance; as, *scintillations* of wit or fancy.

(Astron.) The twinkling, or tremulous motion, of the light of the larger fixed stars, by which they appear as if the rays of light coming from them were not continuous, but produced by particles succeeding each other at intervals with a sort of vibratory movement. The planets, excepting when very near the horizon, have not this twinkling appearance; and they are thus readily distinguished from stars of the first magnitude. It arises from the extreme smallness of the apparent diameters of the fixed stars, and the unequal refracting power of our atmosphere at the different temperatures and pressures of the layers of air through which a star is seen. This unequal refraction causes the apparent displacement of the star to a small extent. The twinkling of the stars is therefore greatest when they are near the horizon, and when the air is disturbed by currents of unequal temperature. The stars near the zenith rarely twinkle, and when seen from the summit of a lofty mountain the phenomenon is also, for obvious reasons, greatly diminished.

Scintillous, *a.* Scintillant; sparkling; coruscant. (R.)

Scio, **Chio**, or **Khio**, (*si-ó*), [Anc. *Chios*.] An island of the Aegean Sea, belonging to the Turks, 5 m. W. of Cape Blanco, Asia Minor; Lat. of Scio, its cap., 38° 22' 30" N., Lon. 26° 9' E. Ext. 32 m. long from N. to S., and 18 m. in its greatest breadth. The surface is diversified, and the soil generally fertile. The climate is mild and agreeable. *Prod.* Corn, wheat, cotton, wine, and fruits. *Min.* Marble and jasper. *Chief towns.* Chio, or Scio, the cap., and Mastico. S. was the scene of a terrific earthquake on April 3, 1881. The loss of lives officially reported amounted to 8,000 killed, and 10,000 wounded, with a vast destruction to property. *Pop.* abt. 70,000.

Scio, in *Mich.*, a p. v. and twp. of Washtenaw co., abt. 6 m. W.N.W. of Ann Arbor. — In *N. Y.*, a p. v. and twp. of Alleghany co. — In *Oregon*, a p. v. of Linn co.

Sciola, or **Sciota**, (*si-ó-lá*), in *Iowa*, a post-village of Montgomery co., 8 m. E. of Frankford.

Sciolism, (*si-ó-lizm*), *n.* Superficial science or knowledge.

Sciolist, *n.* [Lat. *sciolus*, a smatterer, dimin. of *scius*, from *scio*, to know.] One who knows little thoroughly, or who knows many things superficially; a pretentious savant; a smatterer; a superficial pedant.

Sciolistic, *a.* Pertaining, or relating, to sciolism; resembling, or partaking of, the characteristics of a sciolist.

Sciol'ti, *n.* [It.] (*Mus.*) A term which, applied to counterpoint, signifies that it is free, and not constrained by general rules. When applied to notes, it signifies that they are not tied together; thus,

Sciol'ti. Legati.

Sciom'achy, **Sciám'achy**, *n.* [From Gr. *skia*, a shadow, and *machē*, battle.] An imaginary contest with one's shadow; — hence, any mock or incorporeal combat; as, "*sciomachy*, or imaginary combat of words." — *Cowley*.

Scioman'cy, *n.* [From Gr. *skia*, and *man'ia*, prophecy.] Divination by means of shadows, as practised by the ancients.

Sci'on, *n.* [Fr., from Lat. *scindo*, *scissum*, to cut off.] (*Hort.*) A cutting or slip prepared for the purpose of being grafted upon some other tree; a scion; a small twig or young shoot. — Hence, a descendant; an offshoot; a member — as, a *scion* of a noble race.

Sci'optic-ball, *n.* [From Gr. *skia*, shadow, and *optikos*, relating to sight.] (*Optics*.) A name sometimes given to a mechanical contrivance used in the camera obscura, for the purpose, of giving motion to a lens in every direction.

Sciota, in *Illinois*, a prosperous township of McDonough co. *Pop.* (1897) 1,422.

Sciota, in *Minnesota*, a flourishing township of Dakota co. *Pop.* (1897) 310.

Sciota, or **Scioto**, in *New York*, a post-village of Clinton co., 15 m. N.N.W. of Plattsburg.

Scioto, in *Michigan*, a township of Shiawassee co. *Pop.* (1897) 1,492.

Scioto, in *Ohio*, a river which rises in Hardin co., and after a S.E. course of 200 m., enters the Ohio River at Portsmouth. — A S. co., bordering on the Ohio River; area, 630 sq. m. *Rivers.* Scioto and Little Scioto rivers, and Brush Creek. *Surface*, hilly; *soil*, fertile. *Min.* Iron and sandstone. *Cap.* Portsmouth. *Pop.* (1897) 39,950. — A township of Pike co. *Pop.* abt. 1,100.

— A township of Delaware co. *Pop.* abt. 2,200.

— A township of Pickaway co. *Pop.* abt. 2,500.

— A township of Ross co. *Pop.* (1897) abt. 2,980.

— A post-village of Scioto county, 100 miles south of Columbus.

Scioto'ville, in *Ohio*, a post-village of Scioto co., N.E. of Portsmouth.

Scipio, (*si-pe-ó*), the name of an illustrious Roman family, the most celebrated members of which were:

Scipio, **AFRICANUS** (*the Elder*), **Publius Cornelius**, one of the greatest of the Romans, born B. C. 234. He is said to have saved his father's life at the battle of the Ticinus, and by his courage and decision prevented the desertion of the young nobles after the defeat at Cannæ. At

the age of 24 he was chosen to command, as proconsul, in Spain, where, instead of risking a battle with the superior forces of the Carthaginians, he laid siege to the city of Carthago Nova, and took it the same year. His humane and generous conduct on becoming master of the city, and especially his liberation of the Spanish hostages and prisoners found there, among them a very beautiful girl, excited the most enthusiastic admiration. He was even offered the sovereignty of Spain, but declined to be more than general of the Roman people. During the next three years S. made himself master of all Spain, except the town of Gades. In order to prepare the way for the invasion of the Carthaginian territory, he made a secret visit to the court of Syphax, King of Numidia, and won his alliance. In 206 he returned to Rome, and was chosen consul for the next year. Sicily was given to him as his province, and having attracted by his character and success an army of volunteers, he crossed, in 204, into Africa, and began the siege of Utica, but on the approach of Hasdrubal retired into winter-quarters. In the spring he burnt, by stratagem, the double camp of the enemy, and destroyed the fugitive forces. Syphax, who had joined Hasdrubal, was captured, and Cirta surrendered to the conquerors. Hannibal was called to oppose S. in Africa, and the second Punic War was terminated by the total defeat of Hannibal at the battle of Zama, October 19th, 202. Peace was signed the next year, and S., on his return home, had the most splendid triumph which had yet been seen, and received the surname **AFRICANUS**. He declined other honors which were offered him; was subsequently censor, consul a second time, and in 193 ambassador to Antiochus, King of Syria, at whose court he is said to have met Hannibal. Having accompanied his brother Lucius to the Syrian war as lieutenant, in 190, they were accused of misappropriation of moneys received from Antiochus. Cato was the leader of the party opposed to S., and the prosecution of Lucius was successful, but that of Africanus was dropped by the advice of Tib. Gracchus. The popularity of S. had waned, and he left Rome never to return. D. at his villa, at Liternum, B. C. 183, the same year in which Hannibal died. S. married the daughter of Æmilius Paulus; and his youngest daughter became the wife of Tib. Gracchus, and the mother of the tribunes Tiberius and Caius. Throughout his career S. was distinguished by extraordinary self-confidence and decisiveness in action, and no less by a profound sense of religion. He professed, and it was believed by the people, that he was favored with intercourse with the gods; and on all occasions he devotedly awaited divine direction before acting. The stately pride with which, in his later years, he disregarded the laws of his country obscured the lustre of the immense services he had earlier rendered.

Scipio, **LUCIUS CORNELIUS**, surnamed *Asiaticus*, was brother of the preceding, with whom he served in Spain and Africa. He obtained the consulate in 190.

Scipio, **ÆMILIANUS AFRICANUS** (*the Younger*), **Publius Cornelius**, conqueror of Carthage, B. about B. C. 185. He was the youngest son of Æmilius Paulus, and the adopted son of P. Scipio, son of Africanus the elder. In his youth he had the advantage of the instructions and friendship of Polybius, who, exiled from Greece, was permitted to live in the house of Æmilius Paulus. He was an industrious student of literature, and early proved himself singularly free from the common vices of sensuality and covetousness. He began his military service in Spain in 151; gained great reputation soon after in Africa, in the third Punic War; and in 148, although not of fit age, was chosen consul. The next year, accompanied by Polybius and C. Lælius, he went to Africa, and at once commenced the siege of Carthage, which was heroically defended. It was entered by the Romans in the spring of 146; desperate fighting took place from street to street, and from house to house, with awful bloodshed; and at last a fire broke out, that raged nearly a week. S. mused mournfully over these horrors, and foreboded like ruin for Rome. By order of the Senate, the wall and houses were totally destroyed, and a curse pronounced against whoever should rebuild the city. S. had a magnificent triumph on his return. He led a simple and frugal life, and during his censorship, 142-1, tried to effect reforms in the manner of his countrymen, but without success. In 134 he was again consul, with Spain for his province; and his great achievement there was the siege and capture of Numantia, for which he had the surname *Numantinus*. His marriage with Sempronia, sister of the Gracchi, was not a happy one. By his bold resistance to the proposed reforms, he lost the favor of the popular party; and at last, in 129, he was found dead in his bed. Suspicion of murder fell on various persons, but chiefly on Carbo, one of the most rash advocates of the Agrarian reforms. S. was the friend of Terence, Panætius, and especially of Lælius, whose name is affixed to Cicero's discourse, *De Amicitia*.

Scipio, in *Indiana*, a township of Allen co.; *pop.* abt. 600. — A township of La Porte co.

A post-village of Jennings co., 31 m. N.W. of Madison. — A village of Franklin co., 11 m. E. of Brookville.

Scipio, in *Michigan*, a township of Hillsdale co.; *pop.* abt. 1,600.

Scipio, in *New York*, a post-township of Cayuga co., 10 m. S. of Auburn.

Scipio, in *Ohio*, a township of Meigs co.

— A township of Seneca co.

Scipio Centre, in *New York*, a village of Cayuga co.

Scipio'ville, in *New York*, a post-village of Cayuga co., 12 m. S.S.W. of Auburn.

Scire-facias, (*si're-fā-shi-as*), *n.* [Lat., cause you to know.] (*Law*.) A judicial writ, which lies in various cases, as for instance to call on a party to show cause to

the court whence it issues, why letters-patent should not be repealed.

Scirpus, *n.* [Lat., a bulrush.] (*Bol.*) A genus of plants, order *Cyperaceæ*. Various species, commonly known as Club-rushes, or Bulrushes, are much employed for mats, chair-bottoms, baskets, &c., and by coopers for filling up intervals in the seams of casks.

Scirr'roid, (*skir'roid*), *a.* [Gr. *skirros*, scirrhus, and *eidos*, shape.] Having resemblance to scirrhus.

Scirr'rhosity, *n.* (*Med.*) A morbid induration, as of a gland.

Scirr'rhous, **Skirr'rhous**, *a.* Pertaining to, or proceeding from, a scirrhus; hard; indurate; as, *scirr'rhous* disease of the glands.

Scirr'rhous, **Skirr'rhous**, *n.*; Lat. *pl.* **SCIRRHI**; Eng. *pl.* **SCIRRHUSES**. [Fr. *squirre*; Lat. *scirrus*; Gr. *skirros*.] (*Med.*) A hardened or indurated tumor; the first stage of cancer, or carcinoma.

Scissel, **Scissil**, (*sis'sel*), *n.* [See **SCISSILE**.] The clippings of various metals produced by several mechanical operations concerned in their manufacture.

— The slips or plates of metal out of which circular blanks have been cut for the purpose of coinage.

Scissile, (*sis'sil*), *a.* [From Lat. *scindere*, *scissum*, to cut.] That may be cut by a sharp instrument.

Scission, (*siz'hun*), *n.* [Fr., from Lat. *scissio* — *scindere*, *scissum*, to cut, split.] Act of cutting or dividing by a sharp instrument.

Scissor, (*siz'zur*), *v. a.* To cut with scissors or shears.

Scis'sor-bill, or **Skim'mer**, *n.* (*Zool.*) The popular name of the genus *Rhynchops*, family *Laridae*, including

birds closely allied to the Tereus, but easily distinguished by their singular bill, which is compressed like a knife, and has the lower mandible longer than the upper, and broken off, as it were, at the tip. The American species, *R. nigra* (the Black-skimmer) (Fig. 2319), is 19 inches long; wing 14. It skims its food from the surface of the water.

Fig. 2319.

SCISSOR-BILL, OR BLACK-SKIMMER.
(*Rhynchops nigra*.)

Scissors, (*siz'zur*), *n. pl.* [Fr. *ciseaux*; Lat. *scissor* — *scindo*, to cut, divide; Gr. *schizō*.] A two-bladed cutting instrument resembling shears, but smaller.

Scissor-tail, *n.* (*Zool.*) The name given by the Spaniards to *Milvulus forficatus*, a bird of the family *Laridae*, which has a forked tail, terminated by two long feathers.

Scissure, (*siz'hur*), *n.* [Lat. *scissura*.] A longitudinal aperture made by cutting; a fissure; a cleft; as, the *scissures* made by an earthquake.

Scituate, (*si'u-āt*), in *Massachusetts*, a post-village, seaport, and township of Plymouth co., on Massachusetts Bay, 25 m. S.S.E. of Boston.

Scituate, in *Rhode Island*, a township of Providence co.

Scin'rean, **Sciu'rine**, *n.* (*Zool.*) One of the **SCIURIDE**, *q. v.*

Scin'ridæ, *n. pl.* (*Zool.*) A family of *Rodentia*, comprising the squirrels and their allies, which have the

tibia and fibula distinct, and the molars $\frac{5-5}{4-4}$ or $\frac{4-4}{4-4}$.

The genus *Sciurus*, comprising the True Squirrels, is characterized by compressed incisors, long ears, divided snout and upper lip, long tail, with the hairs arranged mainly on the sides, absence of cheek pouches, and inner lines of the upper molars parallel. Squirrels are lightly built, agile, live upon trees, and feed on fruit and nuts. There are about 50 American species, of which 12 or more belong to the U. States. — The Gray and the Black Squirrel, *S. Carolinensis*, of the U. States east of the Missouri, is 9 to 11 inches long to the tail, which is about an inch longer than the head and body; the color in the gray variety, grizzled light yellowish-gray above, pure white beneath. The Southern Gray Squirrel and the Northern Gray Squirrel are generally regarded as distinct species; but Baird considers them as varieties of one species, for which he retains the name given above. The Southern variety is smaller than the Northern, and, according to Audubon, has different habits. The Gray Squirrel occurs in every shade from gray to jet-black; and the black and dusky varieties have also been regarded by some as a species distinct from the gray. Gray squirrels are re-

Fig. 2320.

RED SQUIRREL, OR CHICKAREE.
(*Sciurus hudsonus*.)

markable for their occasional extensive migrations. Assembling in immense numbers, they make their way across the country, swimming streams, and turning aside for no obstacle. The Red Squirrel, or Chickaree, *S. hudsonius* (Fig. 2320), of the U. States, E. of the Missouri, and N. to Hudson's Bay, is 7 to 8 inches long to the tail, which is abt. 6 inches; the color above and on the sides mixed black and grayish-rusty, with a broad band of bright ferruginous along the back and upper surface of the tail; beneath, dingy-white. These squirrels are seen at all seasons of the year, and in all kinds of weather. In the Northern forests the deepest snows of winter are soon covered with their tracks, and penetrated by holes bored to find the cones of spruce, pine, and the nuts scattered beneath, or which they had hidden the previous autumn. They often sit for hours upon a stump, or limb of a tree close to the trunk, and, holding a cone or a nut in their fore paws, gnaw it briskly till they get all the food it contains. Disturbed while upon the ground, the Chickaree ascends the nearest tree, and making for the outer branches, leaps from these to another tree, and passing thus from tree to tree, is soon out of sight. Sometimes, however, when suddenly startled, it ascends a tree a short distance, and commences chattering with great fury, and leaping about as if in defiance of its intruder. (Tenney.)—See PTEROMYS, STRIPED SQUIRREL, SPERMOPHILUS, PRAIRIE-DOG, &c.

Sclavo'nia. See SLAVONIA.

Sclerantha'ceæ, n. pl. [Gr. *skleros*, hard, *anthos*, a flower.] (Bot.) A small order of plants, alliance *Picrodiales*. DIAG. No petals, a tubular calyx becoming hardened and covering the fruit, consisting of a single solitary carpel.—The order is composed of 4 genera, including the species of inconspicuous plants found in barren places in temperate regions. *Scleranthus annuus*, the Knawel, is common in the Middle States.

Scler'ia, n. [Gr. *skleros*, hard, alluding to the indurate shell of the fruit.] (Bot.) A genus of plants, order *Cyperaceæ*, comprising herbs having leafy stems, and spikelets in spikes, fascicles, or panicles. *S. triglomerata*, the Whip-grass, 3-4 feet high, is common in swamps in almost all the States.

Scler'ogen, n. [Gr. *skleros*, hard, and *gennô*, to produce.] Same as LIGNIN, *q. v.*

Sclero'tic, a. [Fr. *sclérotique*, from Lat. *sclerotica*.] Hard; rigid; firm; as, the sclerotic membrane of the eye.—*n.* (Anat.) The outer tunic of the eye (Fig. 980). In man it is opaque, and forms the posterior five-sixths of the globe of the eye. It is white externally, brown internally, and is much thicker behind than in front. In many birds, and some fossil reptiles, it develops a circular series of bony plates around the eyeball.

(Med.) A medicine which indurates and solidifies the parts to which it is applied.

Scot, v. a. To scotch. See SCOTCH.

Scobs, n. sing. and pl. [From Lat. *scabere*, to scrape.] The dross or rust of metals.—Rasings of ivory, horn, metals, or other hard substances. (Chambers.)—An alkali.

Scoff, v. n. [Icel. *skopaz*, to speak jestingly; M. H. Ger. *mit schophlichen Worten*, with scoffing words; allied to Gr. *skopto*, to mock.] To exhibit or express insolent ridicule, mockery, or contumelious language; to manifest contempt by expressions of derision;—followed by *at*.—*v. a.* To treat with derision, contumely, or scorn; to flout; to mock at; to address with contemptuous language.

—*n.* Contemptuous ridicule; derision, ridicule, mockery, or reproach, couched in contumelious language; expression of scorn; as, to make a *scoff* of religion.

Scoffer, n. One who scoffs; a scorner; one who mocks, ridicules, derides, or reproaches in contumelious language; as, a profane *scoffer*.

Scoffery, n. Act of scoffing; derision; mockery.

Scoffing, n. The act of treating with contempt or scorn.

Scoffingly, adv. In a scoffing manner.

Scoke, n. (Bot.) The poke or pocan plant. See PHYTOLACCACEÆ.

Scola'zon, n. A peculiar kind of manure or compost.

Scold, (sköld,) v. n. [A. S. *scylðan*.] To find fault or reprove with rude clamor; to utter railing, or harsh, rude, boisterous rebuke; to brawl; to chide or admonish in a sharp, coarse, termagant manner;—generally preceding *at*.—*v. a.* To give a chiding to with rudeness and boisterous clamor; to rate; to reprimand, rebuke, or reprove sharply or coarsely; as, she *scolded* her husband for coming home late.

—*n.* A rude, boisterous, clamorous, foul-mouthed woman; a shrew; a vixen; a termagant; a virago; a woman whose tongue gets the better of her temper.

"A shrew in domestic life is now become a *scold* in politics." Addison.

—A brawl; a scolding; a rating.

Scold'er, n. One who scolds, rates, rails, or clamors.

Scold'ing, n. The uttering of rude, clamorous language by way of rebuke or reproof; rating or railing language; as, to give one a *scolding*.

Scold'ingly, adv. In a scolding, rating manner.

Scolecite, Skolecite, (sköl'e-sit,) n. [From Gr. *skölêk*, earth-worm.] (Min.) A hydrated silicate of alumina and lime, which occurs in prismatic and acicular crystals, and also massive with a fibrous and radiating structure. It is colorless, snow-white, grayish, yellowish, and reddish, and transparent to translucent at the edges.

Scol'lex, n. [Gr., a worm.] (Zool.) The first or primitive segment of a tapeworm (*tenin*), which originates itself from a cysticercus, and develops proglottides, who in their turn become free and independent from the parent organism.

Scol'lop, n. and v. a. Same as SCALLOP, *q. v.*

Scolopa'ceæ, n. pl. (Zool.) The Snipe family, order *Grallatores*, comprising birds which have the bill generally longer than the head, and the hind toe generally present.

Scolopen'dridæ, n. pl. (Zool.) The Centipede family. See CENTIPEDE.

Scolopen'drium, n. (Bot.) A genus of Ferns. *S. officinarum*, the Hart's-tongue (Fig. 2321), a species

Fig. 2321. — HART'S-TONGUE, (*Scolopendrium vulgare*.)

a, Sporangium, or Spore-capsule;
b, the same, opened, showing its elastic ring.

common in Europe, has been found at Chittenango, N. Y., and in Kentucky.

Scolymus, n. (Bot.) A genus of plants, order *Asteraceæ*, including the Golden-thistle.

Scol'ytidæ, n. (Zool.) The Bark-beetle family, comprising coleopterous insects, the type of which, *Scolytus destructor*, is very obnoxious in certain countries, as England, by destroying large numbers of elm trees.

Scom'bridæ, Scom'beridæ, n. pl. (Zool.) The Mackerel family, comprising acanthopterygious fishes with a smooth body and small scales, and whose tail and caudal fin are extremely powerful. Over 50 genera and more than 400 species are known, many of which are of the highest utility to man. The typical genus *Scomber* is the true MACKEREL, *q. v.*

Sconce, (sköns,) n. [It. *scancia*, a shelf.] An English provincialism for a fixed shelf or plate-rack.

—[D. *schans*; Ger. *schanze*; Dan. *skandse*; Icel. *skans*.] A fort, bulwark, or defensive fortification.—A piece of protective armor for the head; a head-piece.—Hence, the head; the skull; the occiput; also, by implication, as being in the head, brains; gumption; ideas; sense; as, to knock one over the *sconce*, he has not much in his *sconce*, &c. (Colloq.)—A lantern, or cased support or protection for a light; hence, a candle-stick which usually takes the form of a projecting, bracketted support, in wood or metal; as, "Golden *sconces* hang upon the wall." (Dryden.)—Hence, the cylindrical tube with a circular brim, forming part of a candlestick, and serving to hold or support the candle; as, "put candles into *sconces*." (Swift.)—A mulct or fine; a poll-tax.

—*v. a.* To mulct; to fine.

Seonondo'a, or Skanando'a, in New York, a village of Oneida co., 22 m. W. of Utica.

Scoop, n. [Fr. *écopé*; allied to Lat. *scopha*; Gr. *skaphe*, anything hollowed out, from *skapto*, to dig, delve.] A kind of hollow shovel or ladle, of various sizes, and generally of an elongated form, used for dipping liquors; also, a vessel for bailing boats.—A hollow, or hollowed, place; a basin-like cavity; as, a *scoop* in a rock.

(Surg.) A spoon-shaped vessel, used to extract balls impacted in the soft parts, or other foreign bodies.

—*v. a.* To take out with a scoop; to lade out; as, to *scoop* water from a well.—To empty by lading; as, to *scoop* a fountain dry.—To dig out; to excavate; to make hollow, or in basin-like form; as, to *scoop* one's eyes out.

Scooper, n. One who scoops or excavates.

(Zool.) Same as AVOSSET, *q. v.*

Scoop-net, n. A hand-net used in fishing.

Scoop-wheel, n. A wheel having scoops or buckets attached to its periphery.

Scope, n. [Gr. *skopos*, from *skeptomai*, to view, to observe.] Limit of intellectual view; the end or thing to which the mind directs its view; that which is purposed to be reached or accomplished;—hence, ultimate design, aim, or intention; drift; object; as, the *scope* of ambition.—Space or extent viewed; room; amplitude of intellectual view; fulness of opportunity; freedom from restraint; room to move in; as, to allow free *scope* to the imagination.—Length; stretch; sweep; extent; as, *scope* of cable.

Scopia, a town of European Turkey. See USKUP.

Sco'piform, a. [Lat. *scopæ*, a broom, and *forma*, form.] Broom- or besom-shaped.

Sco'piped, n. [Fr. *scopipède*, from Lat. *scopæ*, a broom, and *pes*, *pedis*, a foot.] (Zool.) One of a tribe of melliferous insects, including those which have the tarsi of the posterior feet furnished with a brush of hairs.

Sco'pulipedes, n. pl. (Zool.) See APIDÆ.

Scorbu'tic, Scorbu'tical, a. [Fr. *scorbutique*,

from L. Lat. *scorbutus*. See SCURVY.] Affected or diseased with scurvy; pertaining to scurvy, or partaking of its nature; subject to scurvy; as, a *scorbutic* skin, a *scorbutic* complaint.

Scorbu'tically, adv. In a scorbutic manner.

Scorch, v. a. [Fr. *écorcher*, from Lat. *excoriare*, to strip off the skin.] To cause to feel by heat, as the skin; to burn superficially; to subject to a degree of heat so as to change the color of a thing, or both the color and texture of the surface without combustion; as, to *scorch* one's hands or face.—To affect, as by heat; to dry up with heat; to cause to suffer, as by the effects of heat; as, "*scorched* with beauty's beam."—Fairfax.

—*v. n.* To be parched or dried up; to be burned on the surface; as, a *scorched* country.

Scorch'ingly, adv. In a scorching manner.

Scorch'ingness, n. Quality of scorching, or burning superficially.

Score, (skör,) n. [A. S. *scor*.] A cut, notch, or incision; a line drawn;—especially, a tally-mark, or notch made for keeping account of something.

"Our forefathers had no other books but the *score* and the tally."—Shaks.

—An account or reckoning kept by lines, notches, or marks;—hence, indebtedness; as, to pay off an old *score*, to keep the *score* in cricket, &c.—Account; reason; motive; ground; sake; as, we shall not quarrel on that *score*, he did me a service on the *score* of old friendship.—The number *twenty*, because such number was formerly signified by a notch or special tally; as, *scores* of people visited the show.—In some parts of England, a weight of twenty pounds.

(Mus.) The original and entire draught of any composition in parts, in which all the parts are arranged upon staves one above the other, so as to present to the eye of a skilful musician the effect of the entire band during performance. The term *S.* originated from a bar or line, which was formerly drawn through all the parts.

To *quit scores*. To balance accounts; to make even reckoning; to give satisfaction or make liquidation.

"Does not the earth *quit scores* with all the elements?"—South.

—*v. a.* To mark by incisions; to cut; to notch; to cut furrows in; as, to *score* a man's back with the lash, to *score* a leg of pork before roasting.—To chip for the purpose of preparing for hewing; as, to *score* timber.—To mark with specific lines or notches, for keeping account of something; as, to *score* a tally.—To set down or charge, as a debt or an account; to keep record or note of; as, I *scored* it against him.—To note down in proper order and arrangement; as, to *score* music.

(Geol.) To mark with parallel lines or scratches; as, the rocks of New England were *scored* in the Drift epoch.

Scor'er, n. One who, or that which, scores or notches; one who keeps tally, as in cricket or other games.—An instrument used by woodmen in marking numbers on timber trees.

Scor'ia, n.; pl. SCORLÆ. [Lat.; Gr. *skōria*, from *skor*, the ore.] Dross; the recement of metals in fusion, or the slag rejected after the reduction of metallic ores.—Volcanic ash of a reddish-brown and black color, being the cinder and slag of a particular kind of lava. In appearance, volcanic scoræ greatly resembles the slags of an iron furnace, and are in fact stony or imperfectly vitrified glassy products.

Scor'iac, a. Relating or belonging to scoræ; scoræaceous.

Scor'iacous, (skō-ri-ā'shus,) a. Pertaining, or having reference, to dross, or the recement of metallic ores; partaking of the nature or characteristics of scoræ.

Scorifica'tion, n. [Fr.] (Metal.) Act, operation, or process of either wholly or partially reducing a body into scoræ.

Scor'iform, a. Resembling scoræ.

Scor'ify, v. a. (imp. and pp. SCORIFIED.) [Fr. *scorifier*.] To reduce to scoræ or drossy debris.

Scor'ious, a. Drossy; sluggy; recementitious. (r.)

Scorn, n. [A. S. *scearn*, dung; It. *scherno*.] Disdain; extreme or superlative contempt; that disdainful feeling or treatment which springs from a person's opinion or conviction of the meanness of another person or object, and a consciousness or belief of his own superiority or worth; as, his attentions were received with *scorn*.—That which is treated with sublime contempt; subject of superb contempt, disdain, or derision; as, his name was a *scorn* and a byword.—To *think scorn*, to disdain; to hold as unworthy of attention, notice, or esteem; as, "I know no reason why you should *think scorn* of him."—Sidney.

To *laugh to scorn*, to deride as contemptible; to ridicule; to make a mock of.

—*v. a.* To hold in the highest degree of contempt; to despise; to contemn; to disdain; to think altogether unworthy of one; to slight; to disregard; to neglect; as, his former friends *scorned* him.

Scorn'er, n. One who scorns; a contemner; a despiser, as, a *scorner* of danger.—A derider; one who scoffs or mocks, as at religion or moral ordinances.

Scorn'ful, a. Filled with scorn; entertaining or expressing scorn; superbly contemptuous; disdainful; acting in defiance or disregard; insolent; neglectful; as, a *scornful* glance, a *scornful* air, a *scornful* reply, &c.

Scorn'fully, adv. With superlative contempt; in a scornful manner; disdainfully; insolently.

Scorn'fulness, n. Quality of being scornful.

Scor'odite, Skor'odite, n. [From Gr. *skorodon*, garlic.] (Min.) A hydrated arseniate of iron.

Scor'pio, n. [Lat., a scorpion.] (Astron.) The eighth sign and ninth constellation of the zodiac. It is situated southward and eastward of Libra, and is on the meridian the 10th of July. It contains 44 stars,

including one of the first magnitude (*Antares*), one of the second, and eleven of the third. When this constellation rises, Orion sets; hence the mythological fable of the death of Oriou, who perished by the sting of a scorpion.

Scorpioid, Scorpioid'al, a. (*Bot.*) Noting that form of inflorescence in which the main axis is curved in a cinate manner like the tail of a scorpion, as in the Forget-me-not.

Scorpion, n. [*Fr.*; *Lat. scorpio.*] (*Zoöl.*) The *Pedipalpi*, a family of *Arachnida*, comprising formidable insects, distinguished from other spiders by having the abdomen articulated with a curved spur at the extremity, under the point of which are two small orifices, which serve to give passage to a poisonous fluid. The anterior pair of feet or palpi are very large, resembling those of the lobster in form. The other feet do not differ essentially in form from those of spiders. On the under side of the thorax are two comb-like appendages, the use of which is not well understood. Scorpions inhabit the hot countries of both hemispheres, live on the ground, conceal themselves under stones and other bodies, and not unfrequently take up their abode in houses. When disturbed, they run rapidly, with the tail over the back, ready to turn it in any direction, either

Fig. 2322. — SCORPION.

for attack or defence. They feed on insects and their eggs. The species of the *S.* of Europe are little more than an inch in length, while some of the tropical species exceed five inches; and the sting of the latter produces serious symptoms, which are said frequently to result in death. The young scorpions are produced at various intervals, and are carried for several days upon the back of the parent, during which time she never leaves her retreat. The genus is divided by naturalists into sub-genera, depending upon the number of the creature's eyes, whether six or eight.

(*Astron.*) The SCORPIO, *q. v.*

(*Script.*) A kind of scourge, or whip, having points like a scorpion's tail.

"I will chastise you with scorpions." — 1 Kings xii. 11.

(*Archæol.*) An ancient military engine for hurling missiles.

Scorpion-grass, n. (*Bot.*) See MYOSOTIS.

Scorpion-senna, n. (*Bot.*) See CORONILLA.

Scortatory, a. [*From Lat. scortari, to fornicate.*]

Pertaining or having reference to, or consisting in, fornication or libidinous enjoyment; as, *scortatory* practices.

Scorzoner'a, n. [*Sp. escorza, a serpent.*] (*Bot.* and

Hort.) A genus of plants, order *Asteraceæ*. The species *S. Hispanica* of botanists, and the *S.* or Vipers' grass of gardeners, is a native of Spain, but is cultivated in all parts of Europe for its roots, which are sold in the markets. They are of very easy cultivation, growing vigorously in good ground, and bearing our hardest winters without injury. The root is nearly the shape of a carrot, but smaller and dark-colored, while internally it is pure white. The taste is sweet and agreeable, something like that of the roots of certain umbelliferous plants or the common hazel-nut. Its effects on the digestive organs are to increase the flow of gastric juice and bile, and as it acts as a deobstruent on the alimentary organs generally, it is slightly aperient. Its anti-bilious power is scarcely, if at all, inferior to that of dandelion. It is usually eaten in the same way as asparagus, which is the preferable mode for the invalid. As it is one of the most agreeable of vegetables as regards flavor, it undoubtedly deserves to be much more cultivated than it is in this country, being almost unknown in many of the States.

Scot, n. [*A. S.*; *Fr. écot.*] A tax or contribution; a mulct; a fine; a shot; a sum of money assessed or paid. (*o.*)

[*A. S. Scotta.*] (*Geog.*) A native or inhabitant of Scotland; a Scotsman or Scotchman.

—*v. a.* Same as SCOTCH, *q. v.*

Scotch, (skotch,) a. (*Geog.*) Scottish; Scots; pertaining to Scotland or to its people.

Scotch fiddle, a cant Scottishism for the itch. — *Scotch mist*, a dense mist or pizzle, resembling fine rain. — *Scotch pine.* (*Bot.*) See PINUS. — *Scotch thistle*, a variety of thistle; — so termed from its being the national emblem of the Scottish people. — *Scotch broth.* (*Cookery.*) A broth made of sheep's head, boiled with pot-herbs and pearl barley.

—*v. a.* [*W. ysgwydd, a shoulder.*] To shoulder up; — hence, to support; to prop, as a wheel, by placing a wedge under it to prevent its rolling. — To pack, as hemp. — To shave or cut off a piece of the bark, cuticle, or surface of; to scotch; to make a superficial incision in; as, "he scotched and notched him like a carbonado."

Shaks.

—*n.* A slight cut or shallow incision; a score. — A line drawn on the ground, as in the childish game of hop-scotch.

Scotch-collops, n. pl. (*Cookery.*) A familiar colloquialism for minced veal.

Scotch Grove, in Iowa, a post-township of Jones co., 34 m. S.W. of Dubuque.

Scotch-hopper, or HOP-SCOTCH, n. A childish game, in which jumps are taken over certain scotches or lines marked on the ground.

Scotchman, n.; pl. SCOTCHMEN. A Scot; a Scotsman; a native or inhabitant of Scotland.

Scotch Pebbles, n. pl. (Min.) A name given to the agates found in Scotland, where they occur abundantly, as irregularly shaped nodules in the amygdaloid series.

Scotch Plains, in New Jersey, a post-village of Union co., 40 m. N.E. of Trenton.

Scotch town, in New York, a post-village of Orange co., 107 m. S. of Albany.

Scot'er, n. (Zoöl.) The Black Duck, or Black Dove, *Anas nigra* or *Anas obscura*, forming in some classifications a sub-genus, *Oidemia*.

Scotforth, (skot'forth,) a town of England, co. of Lancaster, 2 m. from Lancaster; pop. 7,000.

Scot-free, a. [*A. S., scot-free.*] Free from payment, tax, or tribute; untaxed; exempt from scot or mulct. — Hence, clear; free; whole; unharmed; safe and sound; as, he came out of the affair *scot-free*.

Scotia, (skō'shī-a,) n. [*Lat.*; *Gr. skotia, gloom.*] (*Arch.*) A hollow moulding, chiefly used in the tori between the bases of columns; it takes its name from the shadow formed by it, which seems to envelop it in darkness. — Also, a groove or channel cut in the projecting angle of the Doric corona.

Scotia, in New York, a post-village of Schenectady co., 18 m. N.W. of Albany.

Scotist, n. (Ecc. Hist.) One of an old scholastic sect who followed the doctrines advanced by Duns Scotus, a Scottish cordeher, and one of the leading champions of Realism in the 13th century; — opposed to a *Thomist*, or follower of Thomas Aquinas.

Scot'land, the northern and smaller portion of the island of Great Britain, and one of the three great divisions of the United Kingdom of Great Britain and Ireland, between Lat. 54° 38' and 58° 40' 30" N., and Lon. 1° 46' 30" and 6° 3' 30" W., or, including the Hebrides, 7° 44' W. It is surrounded by the ocean on all sides, except on the S., where it is separated from England by the Solway Frith, the Cheviot Hills, and the Tweed. Its greatest length, N. to S. from Dunnet Head to the Mull of Galloway, is about 280 m.; its breadth is very unequal, varying from 32 m. between Alloa on the Frith of Forth and Dumbarton on the Clyde, to 146 m. between Buchan Ness in Aberdeenshire and Rowanmoan Point in Ross-shire; area, 30,328 square miles, having about 101 inhabitants to the sq. m. *Coast-line.* Few countries of equivalent magnitude display so great an extent of sea-coast, its aggregate length being about 2,506 m. *Inlets, Friths, Bays.* These are, on the E., the Friths of Forth, Tay, Murray, Dornoch, and Cromarty; on the W. is the Frith of Clyde and Loch Ryan; on the N., the Pentland Frith, and Lochs Broom, Eil, Fyne, and Linnhe; on the S., the Solway Frith, Luce Bay, and Wigtown Bay. Besides these, there are the Minch, the Little Minch, and the North Channel. *Capes.* Numerous: the principal are St. Abb's Head, Fife Ness, Buchan Ness, Kinnaird's Head, Tarbet Ness, Duncansby Head, Dunnet Head, and Cape Wrath; the Mull of Cantire, the Mull of Galloway, and Burrow Head. These are all on the mainland. *Islands.* The principal groups are the Orkneys, the Shetlands, and the Hebrides, besides Arran and Bute. *Divisions.* Scotland is divided into the following 33 counties:

NORTH:—	EAST MIDDLE:—	Lanark.
Orkney,	Forfar,	SOUTH-EAST:—
Shetland,	Perth,	Linlithgow,
Caithness,	Fife,	Edinburgh,
Sutherland,	Kinross,	Haddington,
	Clackmannan,	Berwick,
NORTH-WEST:—	West Middle:—	Peebles,
Inverness,	Stirling,	Selkirk,
Ross and Cromarty,	Dumbarton,	
	Argyle,	SOUTH:—
NORTH-EAST:—	Bute,	Roxburgh,
Nairn,		Dumfries,
Elgin or Moray,		Kirkcudbright,
Banff,	SOUTH-WEST:—	Wigtown.
Aberdeen,	Renfrew,	
Kincardine,	Ayr,	

Chief towns. Edinburgh is the metropolis, but Glasgow is the largest city. There are besides, with pop. of upwards of 10,000, Dundee, Aberdeen, Paisley, Greenock, Leith, Perth, Kilmarnock, Ayr, Arbroath, Montrose, Airdrie, Dunfermline, Dumfries, Stirling, and Kirkcaldy. *S.* is extremely irregular in its surface and outline, and, compared with England, may be said to be sterile, rugged, and mountainous. With the exception of a few rich alluvial tracts, there are no extensive vales in *S.*; its surface, even when least mountainous, being generally varied with hill and dale. It has been separated into the two great divisions of the *Highlands* and the *Lowlands*, and also into the Northern, the Middle, and the Southern. The first, or Northern division, is cut off from the Middle by the chain of lakes which stretch from the Moray Frith to Loch Linnhe. The second, or Middle division, is separated from the Southern by the friths of Forth and Clyde, and the Great Canal. The Northern division consists generally of an assemblage of vast mountains, here and there intersected by fertile valleys, chiefly towards the south and east coasts. A portion of them are clothed with green herbage, more especially where sheep-farming prevails; but, in general, they are covered with heath, growing upon peat, rock, or gravel; and they frequently terminate in mountain-caps of solid rock, or in vast heaps or cairns of bare and weather-beaten stones. The Middle division is also mountainous, the Grampian range intersecting this district, and extending from the eastern to the western sea, and occupying a breadth of from 40 to 60 miles. The western parts of Argyleshire, which are also included in

this district, are rugged, mountainous, and deeply indented by inlets of the ocean. In these two divisions, which comprehend more than two-thirds of Scotland, the arable ground consists of but a small proportion to the mountainous regions. On the eastern coasts, however, the proportion of the cultivated to the uncultivated land is much greater. In the Southern division every variety of aspect is found; verdant plains, watered by copious streams, and covered with innumerable cattle; gently-rising hills and bending vales, fertile in corn, waving with wood, and interspersed with meadows; lofty mountains, craggy rocks, deep narrow dells, and tumbling torrents; nor are there wanting, as a contrast, barren moors and wild uncultivated heaths. In this district are the different ranges of the Cheviot Hills; the Sidlaw Hills, terminating at Perth; the Ochil Hills, forming the middle division; and the hills of Kilsyth and Campsie. Between the Sidlaw ridge and the Grampian Mountains lies the extensive and fruitful valley of *Strathmore*, stretching from Stirling to Stonehaven. Another strath or valley, called *Glenmore*, runs across the country from Loch Eil to the Murray Frith. This strath, in different parts, has particular names. *Rivers.* Numerous. In the Northern division, the principal are the Beaully, Naver, Thurso, &c.; in the Middle division, the Spey, the Dee, the Don, and the North and South Esk; about 30 m. farther south is the Tay, one of the largest rivers in Britain. In the Southern district are the Forth, the Clyde, and the Tweed, and the numerous rivers which empty themselves into the Irish Sea and the Solway Frith; the Ayr, the Girvan, the Southern Dec, the Nith, the Anan, and the Liddel. *Lakes or Lochs.* Numerous and extensive. The principal are Lochs Lomond, Awe, Ness, Shin, Maree, Tay, Erich, Shiel, Lochy, and Katrine. *Climate.* Extremely variable. From its insular situation, however, the cold in winter is not so intense, nor the heat in summer so great, as in similar latitudes on the continent; and although the range of the thermometer is considerable, it seldom maintains an extreme for any length of time. The annual average temperature may be estimated at from 45° to 47°. *Zoölogy.* The wild animals are the fox, the badger, the otter, the wild cat, the hedgehog (these are now becoming scarce), the stag, the wild roe, the hare, the rabbit, the weasel, the mole, and other small quadrupeds. The domestic animals are the same as those of England; but the native breed of black cattle and sheep is smaller in size, but reputed to afford more delicious food. Of the feathered tribes, pheasants are to be found in the woods, though scarce, also ptarmigan, black game, and grouse; and in the low grounds, partridges, snipes, and plovers. Scotland has also most of the English singing-birds, except the nightingale. The aquatic fowls are numerous in the islands. *Prod.* Wheat, rye, barley, oats, peas, beans, hay, potatoes, turnips, flax, and hemp, and, in general, all the kinds of crops which are raised in the southern part of the island. Horticulture has made rapid progress in every part. Apples and other fruits are produced in abundance. Many extensive tracts of waste land have been planted with wood, and the *Alga marina*, or sea-weed, which grows in great luxuriance on the rocky coasts, constitute a valuable article of commerce, from the burning of it into kelp. *Minerals.* Iron-stone, iron-ore, lead, and septaria iron-stone, are abundant. Copper has been discovered in many places. The other metallic substances are cobalt, bismuth, manganese, wolfram, plumbago, and mercury; the latter in very small quantities. Coal is abundant in the Southern and Middle districts. Limestone, free-stone, or sandstone, and slate, are found in every district. Marbles are also found. Most of the gems and precious stones have been found among the mountains of Scotland, the diamond excepted. Jasper is found in great variety, and rock-crystal, commonly denominated *cairn-gorm*, from the mountain of that name in Banffshire. Chalcedony is also found. *Manuf.* Flax and hemp are made into a variety of fabrics; such as sheetings, osnaburges, bagging, and canvas. The cotton manufacture has been carried, by means of machinery, to an astonishing degree of extent and perfection. Muslins and other fabrics are executed in great perfection. To these may be added brocades, lappets of all sorts, imitation shawls, gauzes, cambrics, shirtings, sheetings, twills, stripes, checks, pulicates, ginghams, shawls, and thread; calico-printing is pursued in all its branches. Iron goods of every description, such as anchors, bolts, wagon-axes, sugar-mill gudgeons, wedges, and various articles of mill and steam-engine work, with domestic utensils of every kind, as well as hoes, axes, adzes, hammers, and similar tools. Almost all kinds of articles into which timber is manufactured are produced in great plenty and perfection. Coach-making, musical-instrument making, &c., are carried on in all the principal towns; ship-building also forms a most important branch of national industry, and dock-yards for building and repairing vessels are established in the different seaports. There are, besides, manufactories of glass for all the different sorts of bottle, window, and flint-glass; also of soap, candles, and starch; salt, tanning, brewing, distilling, and almost all articles of ordinary use, are manufactured in Scotland. The different fisheries have been prosecuted with great industry and success. The whale-fishery to Davis' Straits and Greenland employs a great number of ships, and the white fishery is also prosecuted with great industry along the Moray Frith, Shetland, and the Western Islands, which bring profitable returns. The herring-fishery is carried on along the whole coast of the kingdom, as also the salmon-fishery in all the different rivers. *Imp.* These principally consist of woollen cloth, cotton, flax, hemp, yarn, linen, iron, corn, wood, tallow, timber, tea, sugar, and other colonial produce.

Exp. Cotton and linen goods, sail-cloth, sheep, black-cattle, coal, iron, and fish. The chief shipping ports are Glasgow, Greenock, Leith, Dundee, Arbroath, Montrose, Aberdeen, Peterhead, Banff, and Inverness. **Inhabitants.** These may be divided into two great classes, viz., *Highlanders* and *Lowlanders*. The language, dress, and customs of these two classes are very different. The language of the Highlanders is that species of the Celtic called in Scotland Gaelic, or *Erse*. The ancient dress of the Highlanders (Fig. 2123) is fast giving way to a more modern costume, although it is still retained in many places, and often worn by gentlemen on particular occasions. The language of the low country is English, with a mixture of the Scottish, which, however, in the ordinary dialect of the better classes, is fast giving place to the English. **Education.** An act, passed in the reign of William and Mary, ordains that there shall be a school and a school-master in every parish. These establishments, in which are taught reading, writing, arithmetic, and also Latin and Greek, have been attended with the happiest results. There are four universities; namely, at Edinburgh, St. Andrew's, Glasgow, and Aberdeen. **Religion.** Presbyterianism, established by act of Parliament in 1696, and afterwards secured in the treaty of Union. The system is founded on a parity of ecclesiastical authority among all its presbyters, excluding all preëminence of order, all its ministers being held equal in rank and power. Besides the Established Church, there are numerous dissenters; such as Free Churchmen, United Presbyterians, Independents, Quakers, Brethren, and Baptists. There are Catholic churches in the principal towns, and in the northern parts this religion has not been entirely superseded by that of the Reformation. **Govt.** The ancient constitution of S. was superseded at the time of the union with England. In the Parliament of England, the Scots nobility are represented by 16 peers. **History.** S. was first visited by the Roman troops under Agricola, who penetrated to the foot of the Grampian Mountains. It was afterwards exposed to the ravages of the Norwegians and Danes, with whom many bloody battles were fought. Various contests were also maintained with the kings of England. Robert Bruce, however, secured the independence of the country and his title to the throne, by the decisive battle of Bannockburn, in 1314. He was succeeded by his nephew, Robert Stewart, and he by his eldest son, Robert. He being a weak prince, the reins of government were seized by the Duke of Albany, who stoned to death the eldest son of the king. James, his second son, to escape a similar fate, fled to France; in the year 1424 he returned to S., and having excited the jealousy of the nobility, he was assassinated in a monastery near Perth. James II., his son, an infant prince, succeeded him in 1437. He was killed by the bursting of a cannon at the siege of the castle of Roxburgh. James III. ascended the throne at the age of seven years. His reign was weak and inglorious, and he was murdered in the house of a miller, whither he had fled for protection. James IV., a generous and brave prince, began his reign in 1488. He was slain at the battle of Flodden. James V., an infant of less than two years of age, succeeded to the crown. He died in 1542, and was succeeded by his daughter, the celebrated Queen Mary, whose history and tragical end are well known. She was succeeded by her son James, who, in 1603, ascended the throne of England, vacant by the death of Queen Elizabeth, when the two kingdoms were united into one great monarchy, which was legislatively united in 1707. In 1715 and 1745, unsuccessful attempts were made for the restoration of the exiled Stuarts. In 1877 the Roman Catholic hierarchy was re-established in Scotland. **Pop.** (1897) est. 4,210,500.

Scotland, in Canada, a village of Oxford co.

Scotland, in Connecticut, a post-twp. of Windham co.

Scotland, in Illinois, a township of McDonough co.

Scotland, in Indiana, a post-village of Greene co., 10 m. S. of Bloomfield.

Scotland, in Massachusetts, a post-village of Plymouth co., 31 m. S. of Boston.

Scotland, in Missouri, a N.N.E. co., bordering on Iowa; area, 450 sq. m. **Rivers.** Wyaconda, N. Fabius, and Middle Fabius. **Surface.** undulating; **soil,** fertile. **Cap.** Memphis.

Scotodinia, Scotomy, *n.* [Gr. *skotos*, darkness, and *dinos*, dizziness.] (*Med.*) Giddiness with imperfect vision; scotomy; — a symptom occasionally observed in dyspepsia, especially in that of gouty persons.

Scotograph, (*-gräf.*) *n.* [Gr. *skotos*, darkness, and *graphein*, to write.] An instrument for writing in the dark.

Scotoscope, *n.* [Gr. *skotos*, darkness, and *skopein*, to observe.] (*Optics.*) An instrument by means of which objects may be observed in the dark.

Scots, *a.* Scottish; Scotch; pertaining, or relating, to the people of Scotland; as, a pound *Scots*, *Scots* law.

Scots'man, *n.* A Scotchman; a native of Scotland; a Scot.

Scott, Sir Walter, a celebrated novelist and poet, b. at Edinburgh, 1771. He passed his youth in the pleasures of hunting, in the study of law, and in reading old plays, romances, travels, and marvellous adventures. The antiquities and ancient poetry of Scotland early inflamed his imagination; he read the old chronicles, and made himself acquainted with the customs, obsolete laws, traditions of families, and the superstitious beliefs of his countrymen. He made his debut as an author in *Minstrelsy of the Scottish Border*, which had great success. His next work, the *Lay of the Last Minstrel*, was received with still greater favor. *Marmion*, *The Lady of the Lake*, and *Rokeby*, followed; but his poetical reputation was soon afterwards eclipsed by that of Lord Byron. Subsequently appeared *Paul's Letters to his*

Kinsfolk, and the *Battle of Waterloo*, the first successful, the latter a failure. His novels, however, are his great passport to fame. Those masterly productions, on which criticism would be out of place, need only be enumerated; *Waverley*; *Tales of my Landlord*; *Ivanhoe*; *The Monastery*; *The Abbot*; *Quentin Durward*; *Peveril of the Peak*; *Woodstock*; *Rob Roy*; *The Heart of Mid-Lothian*; *Chronicles of the Canongate*, &c. S. was made a baronet by George IV., in 1821. Our limits prevent us from detailing the numerous engagements of this highly-gifted and industrious man; suffice it, therefore, to say, that from the commencement of his literary career in 1796, when he published his translations of Burger's *Lenore* and *Wild Huntsman*, to the year of his decease, he was constantly producing some literary work, and that he reaped an abundant harvest. His patrimonial estate was considerable; and, in 1800, he obtained the preferment of sheriff of Selkirkshire, with abt. £300 (\$1,500) a year, which sum was considerably increased in 1806, by his being appointed one of the principal clerks of the session in Scotland. He accordingly, in 1811, removed 6 or 7 miles below his former residence on the Tweed, where he purchased a farm of about 100 acres, and built a mansion, to which he gave the name of *Abbotsford* (Fig. 6). Here he continued to reside, exercising the most open hospitality, and receiving the homage of admiration from all parts of the world, while he pursued his literary labors with unremitting activity. At length, in 1825, the firm of Constable & Co., at Edinburgh, having projected a cheap series of original and selected works, engaged S. to compose a *Life of Bonaparte*. It was in progress when these publishers became bankrupts, and by that unhappy failure S. found himself involved, on their behalf, for accommodation bills to the enormous amount of \$600,000. The estate of Abbotsford had been settled on S.'s eldest son on his marriage, and it was therefore beyond the reach of the creditors; but though he had very little property to answer the immense amount of his debts, there was still a vast source of profit remaining—his literary talents. "Gentlemen," said he to his creditors, "time and I against any two. Let me take this good ally into company, and I believe I shall be able to pay you every farthing." He further proposed, in their behalf, to insure the sum of \$110,000 upon his life, which proposal was accepted; and he then sat down, at the age of 55, to the task of redeeming, by the exertion of his talents as a public writer, a debt exceeding \$500,000! In the autumn of 1826 he visited Paris, in order to prosecute researches into several local and other details relating to the subject of his work, which appeared during the summer of 1827, in 9 vols. 8vo; and realized the sum of \$60,000, being at the rate of \$165 a day for the time he had devoted to it. Though from the time of the publication of *Waverley*, S. had been generally considered the author of the *Scotch Novels*, yet he had managed to preserve his incognito by various modes of evasion and half-denials whenever the subject was publicly mooted; and the author, whoever he might prove to be, was fancifully styled the "Great Unknown." At length the mystery was solved. At the annual dinner of the Theatrical Fund Association in 1827, S., in returning thanks for the honor which the company had done him by drinking his health, unreservedly declared that they

Fig. 2323. — SIR WALTER SCOTT.

were wholly and solely his own compositions. By the republication of the former novels, in a cheap form, with new notes and prefaces, and by new works, viz.: *Tales of a Grandfather*; a *History of Scotland*, in Dr. Lardner's Encyclopædia; *Letters on Demonology and Witchcraft*, in the Family Library, &c., he had paid, in part of his liabilities, \$270,000; and his creditors presented to him, personally, the library, and manuscripts, curiosities, and plate, which had once been his own, as a token of their gratified feelings. Early in 1831, symptoms of paralysis began to appear, and in the autumn his physicians recommended an excursion to Italy as the means of delaying that illness which too obviously approached. A passage to Malta, in the frigate "Barham," was obtained for him, and he reached Naples by that route, Dec. 27. In April, 1832, he went to Rome, inspected the classical antiquities of that city with great interest, and visited Tivoli, Albani, and Frascati. Feeling, however, that his strength was rapidly decreasing, he determined upon returning, with all possible speed, wishing to die

in his native country. On his arrival in London, it was found that medical assistance was now useless; all hope of his recovery had fled; and at his own anxious desire he was conveyed by sea to Newhaven, where he landed on the 9th of July, reached Abbotsford on the 11th, and, after lingering for two months in a state of almost total insensibility, he d. on the 21st of September, 1832, and was buried in Dryburgh Abbey, which had belonged to one of his ancestors. The *Life of Sir Walter Scott* was written by his son-in-law, J. G. Lockhart.

Scott, Winfield, an American general, b. in Petersburg, Va., 1786. He was left an orphan in his boyhood, was educated at William and Mary College, and studied the profession of law; but in 1808, having a genius for military pursuits, he was appointed captain of light artillery in General Wilkinson's division, stationed at Baton Rouge, Louisiana, but was suspended for having accused his general of complicity with the conspiracy of Aaron Burr. At the commencement of the war of 1812, he was appointed lieutenant-colonel, and sent to the Canadian frontier. He crossed with his regiment at Queenston Heights, where the American troops were at first successful; but on the British receiving reinforcements, they were repulsed with heavy loss, and S. was

Fig. 2324. — GEN. SCOTT.

taken prisoner. The following year, having been exchanged, he was appointed adjutant-general, and was wounded by the explosion which followed the assault on Fort George. In 1814, as brigadier-general, he established a camp of instruction, and from April to July drilled his raw levies in the French tactics with such effect, that on the 3d of July he took Fort Erie, opposite Buffalo, by assault; and on the 5th fought the battle of Chippewa, resulting in the defeat and repulse of the enemy beyond the river of that name. Twenty days after the battle of Chippewa was fought that of Lundy's Lane, or Bridgewater, in which he had two horses killed under him, and was twice wounded, the last time severely. He was raised to the rank of major-general, and compiled the *General Regulations of the Army*, and translated and adapted from the French the system of *Infantry Tactics*, which was until lately the text-book of the American army. In the Indian hostilities of the American frontier, in the excitement attending the threat of Nullification in South Carolina, and in the Seminole War, General S. manifested those qualities of wisdom and moderation which made him rather a pacificator than a warrior. During the Canadian revolt of 1837-1838, he displayed great tact in allaying the excited passions of the frontier. In 1841 he was appointed commander-in-chief of the U. S. army, and in 1846 directed the military operations in the war against Mexico. Taking the field in person, he, March 9, 1847, lauded 12,000 men at Vera Cruz, and invested and bombarded the city, which capitulated on the 26th. April 18th he carried the heights of Cerro Gordo, on the 19th he took Jalapa, on the 22d Perote, and on May 15th Puebla, where, owing to his heavy losses, chiefly by diseases incident to the climate, he was obliged to wait for reinforcements. On the 10th of August he advanced, with 10,780 men, to encounter the larger forces and strong positions of Gen. Santa Anna. He turned El Penon, and won the brilliant victories of Contreras and Churubusco. Santa Anna entered upon negotiations only to gain time and strengthen his defences. These were followed by the sharp and sanguinary battles of Molino del Rey and Churubusco, September 8th, strong positions skillfully and bravely defended by snipier numbers; and on the 14th S. entered the city of Mexico at the head of less than 8,000 soldiers. Peace was negotiated with the cession of New Mexico and California to the United States, and the victorious general was welcomed home with the liveliest demonstrations. In 1852 Gen. S. was the candidate of the Whig party for the presidency, but was defeated by one of his subordinate officers, Gen. Franklin Pierce. In 1855, was created for him the office of lieutenant-general. During the early part of the Civil War Gen. S. did his best to perform his official duties as general-in-chief; but he had become too infirm for such a charge, and on Oct. 31, 1861, he retired from office, retaining, by special act of Congress, his pay and allowance. He then sailed for Europe, in a tour for his health. In 1864 he published his *Autobiography*, 2 vols. 8vo, New York, and d. at West Point, May 29, 1866. **Scott,** in Arkansas, a W. co.; area, 870 sq. m. **Rivers.** Fourche La Pave, and Petit Jean. **Surface,** diversified;

Scott, in *Indiana*, a S.E. co.; area, 190 sq. m. Drained by Graham's Fork of White river. *Surface*, hilly in the W., elsewhere level; *soil*, generally fertile. *Cap.* Scottsburg. *Pop.* (1897) 8,360.—A township of Kosciusko co.—A township of Montgomery co.—A township of Vanderburg co.—A township of Harrison co.

Scott, in *Iowa*, an E. co., bordering on the Mississippi; area, 445 sq. m. *Surface*, undulating; *soil*, fertile. *Min.* Coal and limestone. *Cap.* Davenport. *Pop.* (1895) 45,869.—A township of Fayette co.—A township of Fremont co.—A township of Henry co.—A township of Johnson co.—A township of Mahaska co., 7 m. W. of Oskaloosa.

Scott, in *Kansas*, a W. co.; area, about 720 sq. m. *Surface*, chiefly undulating. *Cap.* Scott. *Pop.* (1895) 1,088.—A township of Linn co.

Scott, in *Kentucky*, a N. co.; area, 272 sq. m. *Rivers*, North Elkhorn, South Elkhorn, and Eagle creek. *Surface*, diversified; *soil*, very fertile. *Cap.* Georgetown. *Pop.* (1897) 17,170.

Scott, in *Minnesota*, a S.E. co.; area, 355 sq. m. *Rivers*, Vermilion and Cannon. *Surface*, undulating; *soil*, fertile. *Cap.* Shakopee. *Pop.* (1895) 15,035.

Scott, in *Mississippi*, a S. central co.; area, 600 sq. m. Drained by Tuscumulo creek. *Surface*, diversified; *soil*, sandy. Drained by the Young Warrior and Strong rivers. *Cap.* Forest. *Pop.* (1897) 12,450.

Scott, in *Missouri*, an E.S.E. co., bordering on the Mississippi; area, 434 sq. m. *Surface*, flat; *soil*, fertile. The co. is intersected by the St. Louis, Iron Mountain, and S. R. R. *Cap.* Benton. *Pop.* (1897) 12,220.

Scott, in *New York*, a post-township of Cortland co., 145 m. W. of Albany.

Scott, in *Ohio*, a township of Adams co.—A township of Brown co.—A township of Marion co.—A township of Sandusky co.

Scott, in *Pennsylvania*, a post-township of Lackawanna county.—A township of Wayne co.—A township of Columbia co.—A township of Lawrence co.

Scott, in *Tennessee*, a N.N.E. co., bordering on Kentucky; area, 620 sq. m. *Rivers*, Powell's river, and Clear Fork of Cumberland river. *Surface*, mountainous in the S. E., and partly covered with forests; *soil*, generally fertile. *Cap.* Huntsville. *Pop.* (1897) 10,385.

Scott, in *Virginia*, a S.S.W. co., bordering on Tennessee; area, 528 sq. m. *Rivers*, Clinch, and the N. Forks of Holston river. *Surface*, traversed by several mountain ridges; *soil*, generally fertile. *Min.* Iron and coal. Among the remarkable natural objects, is the "Natural Tunnel," 3 m. from Clinch river, 300 ft. high, the arch of which is about 80 ft. high. *Cap.* Gate City. *Pop.* (1897) 22,540.

Scott, in *Wisconsin*, a post-village and township of Sheboygan county, 44 miles north-west of Milwaukee.—A township of Columbia county.—A township of Brown county.—A township of Crawford county.

Scott Bar, or **SCOTT RIVER**, in *California*, a post-village of Siskiyou co., 30 m. W. of Yreka.

Scotticism, (-sizm.) *n.* An idiom or lingual expression peculiar to the Scottish people.

Scotticize, *v. a.* To make Scottish; to cause to resemble the Scottish character or idioms.

Scottish, *a.* [A. S. *scyttisc.*] (*Geog.*) Pertaining, or having reference, to the inhabitants of Scotland, or to their country or language; Scots; Scotch; as, the *Scottish* dialect, the *Scottish* Highlanders.

Scott River, or **SCOTT'S RIVER**, in *California*, rises in Siskiyou co., and flows N.W. into Klamath River.

Scottsborough, in *Georgia*, a village of Baldwin co., 4 m. S. of Milledgeville.

Scottsburg, in *California*, a village of Fresno co., 25 m. S.E. of Millerton.

Scottsburg, in *Oregon*, a post-village of Douglas co., 50 m. N.W. of Roseburg.

Scottsburg, in *Virginia*, a post-village of Halifax co., 40 m. E.N.E. of Danville.

Scott's Mills, in *Iowa*, a village of Linn co., 25 m. N. of Iowa city.

Scott's Mountain, in *New Jersey*, in Warren co., forms a part of South Mountain, and is 700 to 800 feet high. It abounds in iron-ore.

Scotts'ville, in *Alabama*, a post-village of Bibb co., 30 m. E.S.E. of Tuscaloosa.

Scottsville, in *Illinois*, a post-village of Maconpin co., 78 m. S.E. of Galena.—A village of Lee co., 140 m. N.E. of Springfield.

Scottsville, in *Kentucky*, a post-village, cap. of Allen co., 148 m. S.W. of Frankfort.

Scottsville, in *Louisiana*, a village of Claiborne parish, 25 m. N.E. of Homer.

Scottsville, in *Missouri*, a post-village of Sullivan co., 130 m. N.W. of Jefferson city.—A village of Nodaway co., 30 m. N. of St. Joseph.

Scottsville, in *N. Carolina*, a post-village of Ashe co., 80 m. N.W. of Salisbury.

Scottsville, in *New York*, a post-village of Monroe co., 13 m. S.W. of Rochester.

Scottsville, in *Pennsylvania*, a post-village of Wyoming co., 32 m. W.N.W. of Scranton.—A village of Huntington co., 87 m. W. of Harrisburg.

Scotts'ville, in *Virginia*, a post-village of Albemarle co., 79 m. W. of Richmond. *Pop.* 1,400.—A village, former cap. of Powhatan co., 32 m. W. of Richmond.

Scoundrel, *n.* [Perhaps from Lat. *abscondo*, to conceal carefully.] A base villain; a man destitute of honor and virtue; a rascal fit for the gallows.

"A scoundrel may be defined as one who would sharpen a knife on his father's tombstone to cut his mother's throat."—*Jerrold*.

—*a.* Low; base; mean; unprincipled; as, a *scoundrel* maxim.

Scoundrelism, *n.* Quality of a scoundrel; base villainy; extreme rascality; turpitude.

Scour, *v. a.* [Ger. *scheuern*.] To make clear and bright by rubbing; to rub hard with something rough for the purpose of cleaning; to clean by friction; to cleanse from grease, stains, &c., as articles of personal attire; to make clean or bright; to restore; as, to *scour* a floor, to *scour* a dress.—To purge violently.—To remove by rubbing or cleansing; to sweep off; to carry away.—To range or search for the purpose of seizing; to brush along; to pass swiftly over; as, to *scour* the seas, to *scour* the streets.

Scouring-barrel, a machine in which scrap-iron, small metallic articles, &c., are divested of rust by means of friction.—*Scouring-power*, force of a stream of water to carry away mud, as from the mouth of a river.—*Scouring-rush*, or *Dutch-rush*. (*Bot.*) See *EQUISETACEÆ*.

—*v. n.* To perform the operation of cleaning by friction.—To make clean; to cleanse.—To be purged violently; as, *scouring* of the bowels.—To rove or range for sweeping or taking something; to scamper; to run with rapidity; as, thieves *scour* off with their booty.

Scour'er, *n.* One who, or that which, scours or cleans by rubbing; a cleanser.—A violent purgative.—One who, or that which, runs swiftly.—A footpad; a robber; one who roves by night in search of plunder.

Scourge, (*skūrj*), *n.* [Fr. *escourgee*; Lat. *corrigia*, a shoe-tie—*con*, and *rego*, to set right.] A whip made of strips of leather, cords, &c.; a lash; a thong; an instrument of punishment or discipline.—Hence, a punishment; a vindictive infliction; he, or that which, greatly afflicts, harasses, or destroys;—particularly, any continued evil or calamity; as, the *scourges* of disease and famine.

—*v. a.* To flog with a scourge or whip; to lash; to whip severely; to flagellate; to punish with severity.—To afflict for sins or faults, and with the purpose of correction; to harass, torment, or injure.

Scourger, (*skūrjer*), *n.* One who scourges or flagellates; one who afflicts or torments cruelly; a chastiser.

Scout, *n.* [Lat. *ausculto*, to listen to.] One sent out to watch or to listen clandestinely;—specifically, a person sent to gain and bring in news; one who reconnoitres; a spy; in military parlance, a person, commonly a horseman, sent before an army, or to a distance, for the purpose of observing the motions of an enemy, or discovering any danger, and giving notice thereof to the commanding officer.—At Oxford University, England, a colloquialism for a college servant;—corresponding with the term *gyp*, as employed at Cambridge, the sister university.

—*v. a.* To watch for; to espy; to reconnoitre; to pass over or through for the purpose of discovering danger or watching the motions of an enemy; as, to *scout* a country.—To sneer at; to flout; to treat with derision, disdain, or contempt; as, to *scout* a base proposition.

—*v. n.* To act as a scout; to play the spy; to go on the business of watching the motions of an enemy.

Seovel, (*skūv'l*), *n.* [From W. *ysgwel*, a broom.] Same as *MALPIN*, *q. v.*

Scow, (*skou*), *n.* [Du. *schouw*.] (*Naut.*) A large flat-bottomed boat.

—*v. a.* To convey or carry in a scow; as, to *scow* lumber.

Sowl, *v. n.* [Icel. *skíldgr*, squint-eyed, from *skela*, to twist.] To wrinkle the brows, as in frowning or displeasure; to put on a frowning, corrugated look; to look angry, sour, or sullen; as, a *sowling* face.—Hence, to look gloomy, threatening, frowning, dark, or tempestuous; as, a *sowling* sky.

—*v. a.* To glance at or repel with a sowl or frown.

—*n.* The corrugation or wrinkling of the brows, as in frowning; an expression of displeasure, sullenness, discontent, or animosity in the countenance.—Hence, gloom; dismal or threatening aspect; as, the *sowl* of an approaching storm.

Sowlingly, *adv.* In a sowling manner.

Scrab'bed Eggs, *n. pl.* (*Cookery*.) A lenten dish, composed of eggs boiled hard, chopped, and mixed with a seasoning of butter, salt, and pepper.

Scrabble, (*skræb'bl*), *v. a.* [Dim. of *scrape*.] To scrape, scratch, or paw with the hands; to scramble; to clamber by the hands and knees; as, to *scrabble* up a tree.—To scribble; to scrawl; as, *scrabbled* chirography.

—*n.* Act of scrabbling; a scramble.

Scrab'bletown, in *New Jersey*, a village of Burlington co., 12 m. E. of Mount Holly.

Scrag, *n.* [Gael. *sgreag*, to parch, to dry.] Something dry, thin, or lean, with roughness or raggedness; a raw-boned piece;—particularly, a neck-joint of meat; as, a *scrag* of mutton;—hence, facetiously or contemptuously, the neck.—A raw-boned person. (*Low*.)

Scrag'ged, *a.* Rough with irregular points or broken surface; scraggy; as, a *scragged* bone.—Lean with raggedness.

Scrag'gedness, **Scrag'guiness**, *n.* State of being scraggy; leanness, or leanness with roughness; roughness; asperity occasioned by broken, irregular, jagged points.

Scrag'gily, *adv.* In a scraggy manner; with leanness or roughness.

Scrag'guiness, *n.* See *SCRAGGEDNESS*.

Scrag'gy, *n.* (*comp.* *SCRAGGIER*; *superl.* *SCRAGGIEST*.) Scragged; rough with irregular or jagged points; as, a *scraggy* rock.—Lean and corrugated; as, a *scraggy* neck.

Scrag-necked, (-nēkt), *a.* Having a long, sinewy neck.

Scram'ble, *v. n.* [Armor. *skrampa*, to crawl, to move in the manner of serpents.] To scramble; to crawl on all-fours; to clamber with hands and knees; as, to *scramble* up a precipice.—To seize or catch eagerly at anything that is desired; to catch with haste preventive of another; to catch at without ceremony; as, to *scramble* for pennies.

—*v. a.* To mix and cook in a conglomerate manner; as, to *scramble* eggs.

—*n.* Act of scrambling; act of climbing or clambering by the help of the hands and feet, or on all-fours.—Act of jostling or pushing for the acquisition of something; an eager contest for some object of desire, in which one endeavors to get beforehand with another; as, the *scramble* of politicians for place.

Scram'bler, *n.* One who scrambles; one who crawls on all-fours; one who clambers by the help of hands and feet.—A greedy, unceremonious seeker or contestant.

Scram'bling, *n.* Act of climbing by the aid of the hands.—Act of seizing or catching at with eager haste and without ceremony.

—*p. a.* Awkward; confused; irregular; as, a *scrambling* course of procedure.

Scram'blingly, *adv.* In a scrambling way; awkwardly.

Scraunch, *v. a.* [Ger. *schrangen*.] To grind or cranch with the teeth so as to cause a crackling sound. (*Local Eng.*)

Scraw'ky, *a.* A Scotticism for long, thin lanky, scraggy.

Scranton, in *Penn.*, a city, and cap. of Lackawanna co., pleasantly situated in a valley on the Lackawanna river, 149 m. W. N. W. from N. Y. and 167 m. N. of Philadelphia, and the terminus of several R.R.'s. It has extensive manuf. interests, large rolling mills, steel and iron works, car and machine shops of various kinds, &c. Its streets are wide and its buildings, many of them, handsome and costly. *S.* is the centre of an immense coal trade. Settled in 1840, it has steadily grown. *Pop.* (1890) 75,215; (1897) 105,500.

Scrap, *n.* [From *scrape*.] Something scraped or rubbed off;—hence, a morsel; a small piece; a fragment; a mite; a crumb; also, a detached, incomplete portion; as, a *scrap* of meat, a *scrap* of paper, a *scrap* of intelligence.—Specifically, a fragment of something written or printed; a brief or unconnected excerpt or extract.

"They have been at a great feast of languages, and stolen the scraps."—*Shaks.*

—*pl.* The stringy or skinny substance that is left after the rendering of animal fat.

Scrap-book, *n.* A book consisting of blank pages (sometimes of various tints), in which printed extracts, engravings, &c., may be pasted and kept for reference or amusement.

Scrape, (*skrāp*), *v. a.* [A. S. *scrapian*.] To draw something, usually edged, over the surface of; to rub the surface of with a sharp or rough instrument, or with something hard; to clean by scraping; to grate harshly over; to abrade; as, to *scrape* the tongue.—To remove or take off by rubbing or grating; as, to *scrape* off the charred parts of a loaf.—To act upon the surface of, with a harsh, grating noise; as, to *scrape* one's feet on the floor.—To gather or accumulate by hard, coarse, and continuous labor or effort;—hence, to hoard; to acquire or save in a penurious or avaricious manner; as, to *scrape* money together.

To *scrape acquaintance*, to curry favor, or insinuate one's self into acquaintance with another;—an expression derived from the custom of scraping in bowling.

—*v. n.* To make the sound of the foot drawn over the floor; to make a grating, rasping noise; to rub harshly or noisily over the surface of anything.—Hence, to play awkwardly on a violin or other stringed instrument of music; as, he *scrapes* the fiddle occasionally.—To make an inelegant obeisance with a recession of the foot; as, he bows and *scrapes* like a dancing-master.

—*n.* A drawing of something edged or rough over the surface of another thing; a rubbing;—hence, the effect occasioned by rubbing; as, the sound of the feet drawn along the floor, or of any scraping instrument; as, a *scrape* of a pen.—An obeisance; an inelegant, obsequious bow.—A disagreeable and awkward predicament; an unfortunate or embarrassing dilemma; perplexity; distress; difficulty; as, to get one's self into a *scrape*.

Scrap'er, *n.* An instrument with which anything is scraped; as, (1.) Among engravers, a tool with a triline blade, each edge of which is sharpened, to remove the burr or ridge which rises on a copper-plate by the use of the graver or dry point. (2.) In mining, quarrying, &c., a piece of iron used to take out the pulverized matter which remains in a hole when bored previous to blasting. (3.) An iron instrument, affixed to a door-step, by which the soles of shoes, &c., are freed from mud and the like, by drawing them across it. (4.) An instrument used in making and repairing roads, digging canals, trenches, &c. (5.) On shipboard, a triangular iron tool, with sharp edges, used for scraping the masts, spars, decks, &c.; also, an instrument used by calkers.

—A person who scrapes, as an awkward performer, or tyro, on the violin; also, one who hears money little by little, or penuriously; a miser; as, "Never was *scrapper* a brave man."—*Herbert*.

Scrap-forging, (-fōr'jng), *n.* See *SCRAP-IRON*.

Scrap'ing, *n.* Act of one who scrapes.—(*pl.*) Matter scraped off, or that which is collected by scraping, rasping, raking, or rubbing; as, the *scrapings* of the dinner-table.

Scrap'ingly, *adv.* In a scraping manner; by scraping.

Scrap-iron, (-i'urn), *n.* Waste cuttings and pieces of

wrought-iron:—generally used in the abbreviated form, *scrap*. After being piled, heated, and drawn into bars, they are called *scrap-forgings*.

Scratch, (*skratch*), *v. a.* To tear, mark, or score with slight incisions, ragged and uneven; to rub and tear the surface of with something sharp or ragged; to wound or lacerate slightly; to cut with the nails; as, to *scratch* one's head, to *scratch* glass with a diamond, to *scratch* garden-mould with a rake, she *scratched* his face with her nails, &c.

—To dig or excavate with the claws; as, a mole *scratches* a burrow. —To write or draw hurriedly or awkwardly; as, to *scratch* out a pamphlet. *Swift*. (*R.*)—To mark with erasures; as, to *scratch* a ticket. (*American.*)

(*Sports.*) In horse-racing, to withdraw a horse from a race after its being entered for running; as, the Oaks favorite was *scratched* at four o'clock to-day.

—*a.* Drawn together hastily or without selection, to accomplish a certain purpose, in place of the regular performers; as, a *scratch* crew of oarsmen, a *scratch* eleven at cricket, a *scratch* team of horses, &c.

—*n.* A rent; a break in the surface of anything made by scratching, or by rubbing with anything edged, pointed, or ragged; a laceration with the nails or claws.

(*Sports.*) In boxing, a line drawn across the ring, up to which pugilists are brought by their seconds, when they commence to exchange blows; — hence, test, trial, or proof of pluck or courage; as, he came up to the *scratch* like a man. (*Colloq.*)—A kind of wig which only partially covers the head; — also, called *scratch-wig*.

—*pl.* (*Fur.*) A disease in horses consisting of dry chaps, rifts, or scabs, which appear between the heel and pastern joint.

Scratch-cradle. Same as CAT'S-CRADLE, *q. v.* — *Old Scratch*, a cant term for the Devil.

Scratch-back, *n.* A kind of plaything used at certain English fairs, which, when drawn quickly along the back of a person, makes a noise like that of tearing cloth, as if his coat were torn.

Scratch-brush, *n.* A cylindrical bundle of fine steel or brass wires, bound tightly in the centre, with the ends projecting on each side, so as to form a stiff brush for scratching and cleaning metals preparatory to gilding or silvering.

Scratch'er, *n.* One who, or that which, scratches.

(*Zoöl.*) An order of birds, comprising those which scratch when seeking food, as the common hen, &c. It is identical with the order RASORES, *q. v.*

Scratch'ingly, *adv.* After the manner, or with the action of, scratching.

Scratch-weed, *n.* (*Bot.*) The cleavers. See GALIUM.

Scrawl, *v. a.* (Another form of SCROLL, *q. v.*) To write or draw carelessly, awkwardly, or irregularly; to write inelegantly or unevenly; to scribble; to scratch; as, to *scrawl* a letter.

—*v. n.* To write unskillfully, unevenly, or inelegantly; he *scrawls* his writing so that it is barely legible.

—*n.* A scrawl, unskillful, or inelegant penmanship or chirography; also, a piece of writing hastily and badly penned; as, excuse this hurried *scrawl*. — An American localism for a broken branch or piece of brushwood.

Scrawler, *n.* One who scrawls; a hasty, off-hand, or inelegant writer.

Scraw'ny, *a.* See SCRANNY.

Seray, *n.* (*Zoöl.*) The common Tern, *Sterna hirundo*.

Scream, (*skrēk*), *v. n.* [*Swed. skrika*; *Dan. skrige*.] To utter a sharp, shrill, sudden outcry or scream; to screech; to creak, as a door, wheel, &c.

—*n.* A screech; a screeking.

Scream, (*skrēm*), *v. n.* [*A. S. hryman, hreman*; *Ger. röhmen*.] To shriek; to utter a sudden, sharp outcry, as in terror or acute pain; to utter a shrill, harsh cry, often long continued, with momentary intermissions; as, a *screaming* child.

—*n.* A shriek, or sharp, shrill cry, uttered in acute pain, or in a sudden fright; a screech; a harsh, strident cry; as, the *scream* of a woman in agony, the *scream* of certain sea-birds, &c.

Scream'er, *n.* (*Zoöl.*) The common name of the genus *Palamedea*, order *Insectores*, closely allied to the Jacanas, and so called from their loud and harsh cry. *P. cornuta*, the Horned Screamer, or Kamichi, inhabits swamps in Brazil and Guiana, and feeds on the leaves and seeds of aquatic plants.

Scree, *n.* An English provincialism for a small stone or pebble.

Screech, *v. a.* [*Ir. sgreach*.] To cry out with a sharp, shrill voice; to utter a sudden, shrill cry, as in affright, or severe pain or distress; to scream; to shriek; to utter a sharp cry, as an owl.

—*n.* A sharp, shrill cry, uttered in acute pain or in terror; a harsh, shrill cry, as of an owl or other bird; a screech.

Screech-owl, *n.* An owl that sends forth a harsh, discordant cry at night; as, "the *screech-owl's* dismal note." — *Drayton*.

Screech'y, *a.* Like a screech.

Screed, *n.* [*A. S. screde*, a shred.] (*Arch.*) A wooden rule for running mouldings; also, one of the extreme guides on the margins of walls and ceilings for floating to, by the aid of the rules. They are always necessary as aids in running a cornice when the ceiling is not floated.

[*Gael. scread*, an outcry.] A breaking forth into a sharp, shrill sound; as, the *scree* of a bagpipe. — A long harangue, homily, or tirade on any subject; as, a *scree* of doctrine.

Screen, *n.* [*Fr. écran*; *L. Lat. screeo, screona, screma*, an edifice of some sort, with or without a key, from *Ger. schrein*.] Anything that separates or cuts off inconvenience or injury; — hence, that which shelters or protects from danger, or prevents inconvenience, hides

from view, &c.; as, the leafy *screen* of a forest, her beauty served as a *screen* to her errors.

(*Arch.*) An open partition (Fig. 2325) between the nave and choir of a church or cathedral, to divide the officiating priests from the congregation. Such screens are generally highly enriched by carving and gilding,

Fig. 2325. — PARCLOSE SCREEN,
(Fyfield, Berks, England, A. D. 1480.)

and the lower panels decorated with painting. Above their summit the rood was formerly placed. They also, in many cases, rail off altars, chapels, and tombs from the rest of the building. — Also, in modern architecture, a single open colonnade, admitting a view through it, is called a *screen of columns*.

(*Building.*) An oblong, coarse sieve or riddle, set in a wooden framework, and used to separate the coarser from the finer parts, as of coal, sand, lime, and the like.

Screen bulk-head, (*Ship-building.*) The bulk-head under a ship's round-house.

—*v. a.* To separate or cut off from inconvenience, injury, or danger; to afford protection to by hiding; to shield; to hide; to conceal; as, a hill *screens* the house from the north winds, his mother *screens* his faults. — To pass through a screen; to separate the coarse part of from the fine, or the worthless from the valuable; as, to *screen* coal or lime.

Screen'ing, *n.* Act of sheltering or protecting from inconvenience, injury, or danger. — Act of sifting earth, seeds, sand, coals, &c., through a large oblong sieve or screen.

Screen'ings, *n. pl.* The drossy matter left after sifting coal, lime, ashes, &c.

Screw (*skru*), *n.* [*Lapp. skruwa*, a snail; *Icel. skrufa*, to twist.] A cylinder, as of metal, having a groove cut in an advancing spiral on its surface—specifically, a *male screw*; also, a hollow cylinder with a similar interior thread—specifically, a *female screw*. When used without qualification, the male or externally threaded screw is the form understood. Regarded as a mechanical movement, the male and female screw used together, as in a screw and nut, are a form of the inclined plane. When so used with a fine pitch, a great deal of power may be developed at the expense of motion, as in the screw-jack. The spiral groove cut in the surface of a screw is technically called the *thread*, and the distance apart of the threads determines the *pitch*, being *coarse pitch* if they are widely separated, or *fine pitch* if the screw-threads are closely placed. The body part of a screw is termed the stem or barrel. Screws for use in wood have a thread of coarse pitch, a tapering and pointed end, and a slit in the head for affording a grip to the screw-driver. Machine-screws are usually made without taper, and with threads of certain standard pitch, named according to the number of threads to the inch. If the head is squared, so that it may be turned by a wrench, it is more properly termed a bolt, or a screw-bolt, or tap-bolt. The *differential screw* is one having threads of different pitch on its body. For instance, if a screw have a screw-thread of ten threads to the inch for half its length, and five threads to the inch for the other half of its length, then a female screw placed on one half would travel twice as fast as a female screw on the other half, when the male screw was turned or driven. A *double screw* is one having two parallel threads spiralled around it, and a *triple screw* one with three such parallel threads. An *endless* or *perpetual screw* is properly called a worm, being a male screw, rotating in fixed bearings, and turning a worm-gear or toothed wheel, that meshes with it and receives a slow motion, that is continuous. A *right-hand screw* is one that is turned in with a clockwise motion, and a *left-hand screw* one that is inserted with a motion the reverse of this. A *winged screw*, or *thumb-screw*, is one having a broad flat head, which may be turned easily with the thumb and forefinger.

—Anything shaped or acting after the manner of a screw; particularly, a screw-propeller. See PROPELLER.

—In English cant, salary; pay; wages; hire; as, he gets a good *screw*. — An extortioner; a miser; a skinflint; a mean, parsimonious, close-fisted, good-for-nothing wretch; a sharp or close bargainer; — also, an interviewer; a persistent questioner; a clamorous mendicant; a harsh, inexorable instructor. — A corkscrew. (*Colloq.*) — A twist or turn of something; as, the *screw* of a billiard ball. — A weedy or unsound horse.

(*Naut.*) A screw steamer; a propeller; a steamer propelled by a screw instead of paddle-wheels.

—In American university cant, a searching or strict examination of a student by an instructor.

Archimedean screw. See ARCHIMEDES' SCREW.

To *put under the screw*, to subject to a severe test, ordeal, or experience; to tyrannize over.

Screw, *v.* To turn, or apply a screw to; to press, fasten, or make firm by a screw; as, to *screw* a hinge to a door-jamb. — To squeeze; to subject to strong pressure or force, as by the action of a screw; as, to *screw* one's courage up. — To oppress by exaction; to use stringent measures toward; as, to *screw* a tenant. — To deform by contortions; to distort; as, to *screw* one's face into a hypocritical smile.

—In American university cant, to examine rigidly or minutely, as a student.

To *screw out*, to squeeze or force out; to extort; as, the admission was *screwed* out of him with reluctance.

—To *screw up*, to force; to bring to bear by severe pressure. — To *screw in*, to force in by turning or twisting.

—To be oppressive or exacting; to enforce exorbitant demands; as, a *screwing* landlord. — To become intoxicated by liquor; as, he came home *screwed*.

Screw'-alley, *n.* The passageway in a screw-steamer for containing the shaft that drives the screw-propeller.

Screw'-bean, *n.* The spirally twisted mesquit bean; the screw-pod mesquit (*Prosopis pubescens*), by Mexicans called the tornilla, much esteemed as fodder.

Screw'-coupling, *n.* A pipe-coupling made in the form of a collar, with internal or female screw-threads.

Screw'-cut'ting, *n.* The formation of screw-threads, whether on a screw or bolt, or in a nut. The lathe is the original tool used in screw-cutting, but has been largely replaced by special machines devised for the purpose. The lathe is still used for odd or very large screws. By mounting a cylindrical piece of metal in the lathe and turning it between the centers, and at the same time bringing a cutting tool against it with an advancing motion, a thread may be cut, whose pitch is determined by the relative speed with which the screw-stem is turned and the center advanced.

Screw'-die, *n.* A die, resembling a nut, but having the internal threads partially cut away, so as to form cutting surfaces, which, being hardened, may be used to cut a thread on a stem or rod which is forced into it with rotary motion.

Screw'-dock, *n.* A form of graving-dock in which large screws form an important part of the machinery for raising and lowering vessels.

Screw'er, *n.* The person who, or thing which, screws.

Screw'-eye, *n.* A screw having a head formed in an eye or loop; much used in the back of picture frames.

Screw'-hook, *n.* A screw with a hooked head. — A form of instrument used by surgeons in removing foreign bodies from the ears or nostrils.

Screw'-jack, *n.* See JACK.

Screw'-key, *n.* A form of socket-wrench.

Screw'-machine, *n.* A machine for cutting screws; a screwing-machine. The latest forms of these machines are made with self-opening dies, which cut only in one direction, and open for the return motion. They are usually made for cutting both bolts and nuts.

Screw'-pile, *n.* A pile having a screw-like flange at its base. See LIGHTHOUSE.

Screw'-pine, *n.* (*Bot.*) See PANDANACEÆ.

Screw'-plate, *n.* A thin plate of steel perforated with a number of holes with internal screw-dies, to be employed in forming external screws.

Screw'-press, *n.* See PRESSER.

Screw'-propel'ler, *n.* See PROPELLER.

Screw'-rod, *n.* A rod having a screw-thread cut at one or both ends, for use as a tie-rod.

Screw'-rud'der, *n.* A screw-propeller, so hinged on the stern-post of a vessel that it may be used as a rudder.

Screw'-shell, *n.* The shell of the Wreathshell (*q. v.*).

Screw'-steam'er, *n.* A steamer propelled by a screw.

Screw'-stem, *n.* (*Bot.*) See CENTAURELLA.

Screw'-tool, *n.* A cutting-tool for forming screw-threads, as in a lathe.

Screw'-ven'tilator, *n.* A rotary ventilating fan, built in the form of a screw-propeller.

Screw'-well, *n.* The larva of well of a steamship.

Screw'-worm, *n.* The larva of *Lucilia macellaria*, an American blow-fly, that infests the sores and open passages of animals.

Scri'ba, in New York, a post-village of Oswego co.

Scrib'bet, *n.* A painter's pencil.

Scribble, (*skrib'bl*), *v. a.* [Formerly *scrabble*, dimin. of *scrape*; *Dn. schraben*, to scratch, *krabbeln*, to scribble.] To write carelessly; to write with haste or without care or regard to correctness or elegance; as, to *scribble* a note. — To fill with artless or valueless writing. — In the woollen manufacture, to run through the scribbling-machine.

—*v. n.* To scrawl; to write without care or elegance.

—*n.* Hasty, careless, or inelegant penmanship or handwriting; a writing of little importance or value; as, a hasty *scribble*.

Scrib'bler, *n.* One who scribbles, or writes carelessly or inelegantly. — A petty author; a writer of no reputation.

a publisher's hack; a penny-a-liner; as, "The most copious writers are the arrantest scribblers."—*L'Espresso*. (*Manuf.*) A scribbling-machine.

Scribbling, *n.* Act of scribbling, or writing hastily or carelessly.—In the woollen manufacture, the first coarse carding of wool preparatory to the final carding.

Scribblingly, *adv.* In a scribbling way.

Scribbling-machine, *n.* (*Mach.*) The machine used for the first carding of wool.

Scribe, *n.* [Fr.; Lat. *scriba*—*scribo*: W. *ysgrifwr*, to notch, to write.] A writer;—particularly, a public writer; a notary; a secretary; an amanuensis; a clerk.

(*Script.*) A word frequently used, and in various significations. In its original signification it denotes a writer, and was first applied to an officer of the king answering to our Secretary of State. It came afterwards to be applied to such as were skilled in the use of the pen, and then simply a learned man, or one learned in the Jewish Scriptures. In the New Testament times the *S.* were a numerous class, and were generally of the tribe of Levi. They were the "doctors of the law," whose office was to explain the law; and a number of them bad seats in the Sanhedrim.

—*v. a.* (*Joinery*.) To fit, as one edge of a board or plank to another edge, or to a surface; to fit, as one piece to another, in such a manner as to bring the fibres of the two pieces into perpendicularity with each other.

Scribe, (*skreeb*.) AUGUSTIN EUGÈNE, a French dramatic writer, b. at Paris, 1791. He was educated for the law, but soon abandoned it for the stage. His first play, *Le Dervis*, was produced in 1811, and at once made him a name. From that time till his death he was a most prolific writer, frequently employing assistants; and his influence remained unshaken through all the political changes of France. He has been called the greatest wholesale manufacturer of *bon-mots*, the Rothschild of epigrams, and the autocrat of vaudevilles. A sly political satire pervades some of his plays, and had considerable influence at one time on the course of public opinion. The first of his five-act prose plays was *Bertrand and Raton*, which appeared soon after the accession of Louis Philippe, and set forth some great persons in a very contemptible light. Scribe sought only to amuse, and very clearly adapted his productions to the spirit of the times and the tastes of various audiences. He wrote about 400 pieces of various kinds. Among the numerous *libretti* composed by him are *Robert le Diable*, *Fra Diavolo*, *Les Diamans de la Couronne*, *Les Huguenots*, and *La Juive*. Among his other most celebrated pieces are *La Camaraderie*, *Le Comte Ory*, *Une Chaîne*, and *Le Verre d'Eau*. He was a member of the French Academy. D. 1861.

Scriber, *n.* A sharp-pointed tool, or marking awl, used by joiners for drawing lines on boards, &c.

Scribing, *n.* (*Joinery*.) Act of fitting one piece of wood upon another, so that the fibres of both may be perpendicular to each other, and the end cut away across the fibres, so as to fit upon the slide of the other; also, the edge of a board when fitted upon any surface.

Scribing-iron, (*ivurn*.) *n.* An iron-pointed implement for scoring casks and logs.

Scrid, *n.* Same as SCREED, *q. v.*

Scriggle, (*skriggl*.) *v. a.* To wriggle;—an English provincialism.

Scrimmage, (*skrimmaj*.) *n.* [From *skirmish*.] A mêlée; a free fight; a general row; as, fists and fire-arms were alike used in the *scrimmage*.

Scrimp, *v. a.* [Du. *krinpen*, to shrivel, to shrink.] To limit; to confine; to cut down; to shorten; to contract; as, to *scrimp* a garment;—an English provincialism.

—*a.* Short; contracted; straitened; scanty;—used as an American localism.

—*n.* A niggard; a screw; a close-fisted, parsimonious person. (Local American.)

Scrimpingly, *adv.* In a scrimping or scanty manner.

Scrimpuess, *n.* State or condition of being scrimp.

Scrimption, (*skrimshun*.) *n.* A trifling quantity; a little bit; a narrow pittance;—an English provincialism.

Seringe, (*skrinj*.) *v. a.* To cringe;—an American localism.

Scrip, *n.* [Icel. *skreppa*, a purse; L. Lat. *scrippum*.] A wallet; a satchel; a reticule; a small bag; as, a leathern *scrip*.

—*n.* [Lat. *scriptum*.] A small writing, certificate, register, or schedule; any piece of paper written on; as, "Call them man by man, according to the *scrip*."—*Shaks*.

(*Finance*.) An interim-writing entitling a party to a share, or shares, in any company, or to an allocation of stock in general, which interim-writing or scrip is exchanged after registration in a formal certificate; as, bank *scrip*, railroad *scrip*, &c.

Script, *n.* (*Law*.) An original instrument or document.

(*Print*.) A kind of type cast in imitation of writing;—called by the French *Anglaise*.

This line is printed in Script.

Scriptory, *a.* [From Lat. *scribere*, *scriptum*, to write.] Expressed or conveyed in writing.

Scriptural, (*skript'jur-al*.) *a.* [From *scripture*.] Contained in the Scriptures, that is, in the Bible; according to the Scriptures or sacred oracles; biblical; as, a *Scriptural* passage.

Scripturalism, *n.* State or quality of being scriptural; literal.

Scripturalist, *n.* One who adheres to the literal interpretation of the Scriptures as the basis of all knowledge.

Scripturally, *adv.* In a scriptural manner.

Scripturalness, *n.* State or quality of being scriptural.

Scripture, (*skript'yur*.) *n.* [Lat. *scriptura*, a writing.] In the literal sense, anything written; appropriately, and by way of eminence, the Books of the Old and New Testaments, as being the most important of all writings. They are frequently called the *Sacred* or *Holy Scriptures*, from the character of the doctrines which they teach. See BIBLE.

Scripturist, *n.* One well versed in the Scriptures.

Seritch, *n.* Same as SCREECH, *q. v.* (R.)

Seriv'en, or **Serev'en**, in Georgia, an E. co., bordering on South Carolina; area, 786 sq. m. Rivers, Savannah and Ogeechee rivers. Surface, level; soil, sandy. Cap. Sylvania. Pop. (1897) 15,150.

Seriv'ener, *n.* [Fr. *écrivain*; W. *ysgrifwr*, a writer.] A scribe; a writer; formerly, one whose occupation was to draw contracts or other writings.—One whose business is to place money at interest; a money-lender; a usurer; as, a gripping *serivener*.—A writing-master. (R.)

Scrobiculate, **Scrobiculated**, *a.* [From Lat. *scrobiculus*, dimin. of *scrobis*, a ditch.] (*Bot.*) Pitted, as certain leaves.

Scrofula, (*skrof'yul-a*.) *n.* (*Med.*) "A tedious and multiform disease, hereditary in its nature, and one of the most characteristic marks of which is a tendency to swelling of the glandular parts, which sometimes suppurate, and discharge a curdy, mixed matter, and are very difficult to heal. The name is said to be derived from Lat. *scrofa*, or *scropha*, a sow; but why it is so called must be left to fancy or conjecture. The persons in whom scrofulous disease is most apt to manifest itself are marked during childhood by pale and pasty complexions, large heads, narrow chests, protuberant bellies, soft and flabby muscles, and a languid and feeble circulation. It, however, often accompanies a variety of the sanguineous temperament also, and is indicated by light or red hair, gray or blue eyes, with large and sluggish pupils, and long, silky lashes, a fair, transparent brilliancy of skin, and rosy cheeks. This red color is, however, easily changed by cold to purple or livid, and the extremities are subject to chilblains. Such children are often extremely clever, and ready of apprehension, of eager tempers and warm affections, lively, ardent, imaginative, and susceptible. It is frequent, also, though less common, in what is called the melancholic or bilious temperament, *i. e.*, in persons of dark, muddy complexion and harsh skin, in whom the mental and bodily energies are more sluggish and dull. The disease, however, frequently occurs in persons who do not exhibit any of these symptoms. It is one of those diseases that are in a very marked degree hereditary. Like other hereditary tendencies, it may sometimes skip over a generation or two, and reappear, just as family likenesses do. The tendency may be so strong that no care will prevent its manifestation, or so faint as never to break out into actual mischief, if the exciting causes be warded off. Among the exciting causes are insufficient nutriment, exposure to wet and cold, impurity of the atmosphere, the want of natural exercise, and mental disquietude. Climate exercises a very marked influence upon it, and there is none more favorable for its development than our own. A moist, cold, and variable climate is particularly favorable to its development, while on the other hand, a hot or a very cold climate protects against it. *S.* usually manifests itself in indolent glandular tumors, frequently in the neck, at first free from pain and inflammation, but proceeding slowly to an inflammatory state, and gradually and generally, after a long time, forming an ulcer, which is extremely difficult to heal. In some cases the eyes and eyelids are the principal seat of the disease, having constantly a very inflamed aspect. The bones of scrofulous persons are also liable to disease, especially those of the spine; and generally, the diseases and accidents that happen with comparatively little inconvenience to others, are productive of very troublesome and alarming consequences in scrofulous constitutions. The lungs are particularly liable to attack in such cases, giving rise to the formation of tubercles in that organ, which are so marked a feature in PHTHISIS, *q. v.* The treatment consists chiefly in raising the tone of the system by moderate exercise in the open air, with suitable nourishment, sufficient clothing, and attention to the state of the bowels. Sea-bathing, if it can be borne, or sponging the skin with tepid salt and water, followed by diligent rubbing with coarse towels and the flesh-brush, are very beneficial. Much good is frequently derived from the use of cod-liver oil; and iodine is often found to be of benefit. See KING'S-EVIL.

Scrofulous, *a.* [Fr. *scrofuloux*.] Pertaining or relating to scrofula, or partaking of its nature; as, a *scrofulous* habit of body.

—Diseased or affected with scrofula; as, a *scrofulous* person.

Scrofulously, *adv.* In a scrofulous manner.

Scroll, (*skrol*.) *n.* [Corrupted from *roll*.] A roll of paper or parchment, or a writing formed into a roll; a first copy or rough draught of anything; a schedule; as, an epistolary *scroll*.—A mark or flourish appended to a person's signature to a writing, and intended to take the place of a seal.

(*Arch.*) A name given to a kind of ornamentation which resembles a band arranged in undulations or convolutions; also, the volute of the Ionic and Corinthian capitals.

(*Her.*) That part of the outward ornamentation of a shield or achievement on which the motto is inscribed.

(*Ship-building*.) A curved piece of timber bolted to the knee of the head by way of ornament.

Scrolled, (*skröld*.) *a.* Inclosed in a scroll or roll; formed into a scroll.

Scrophularia, *n.* (*Bot.*) The Fig-wort, the typical genus of the order *Scrophulariaceæ*, *q. v.*

Scrophulariaceæ, *n. pl.* (*Bot.*) The Fig-wort family, an order of plants, alliance *Bignoniales*. DIAO

Axile placentæ, albuminous seeds, and cotyledons scarcely larger, or not so large, as the radicle. — They are herbs, or rarely shrubby plants, with opposite leaves (generally). Inflorescence axillary. Flowers anisomerous, irregular. Calyx persistent, 4-5-partite; aestivation imbricate. Stamens 2, or 4 didynamous, rarely 5, with introrse anthers. Ovary usually 2-celled, its component carpels being placed anterior and posterior; style 1. Fruit usually capsular, rarely baccate, generally 2-celled; embryo straight or slightly curved. The plants of this order are found in all parts of the globe, and a great number are cultivated in our gardens on account of the beauty of their flowers. (See ANTIRRHINUM, CALCEOLARIA, GERARDIA, MIMULUS, VERONICA.) Some are powerful poisons, and all must be regarded with suspicion. The most important medicinal plant of the order is the Foxglove. See DIGITALIS.

Fig. 2328. — GERARDIA PURPUREA. (1, Calyx and style.)

Scro'tal, *a.* (*Med.*) Pertaining, or relating, to the scrotum; as, *scro'tal* hernia.

Scro'tiform, *a.* Pouch-shaped.

Scrotocèle, (*skrō'to-sēl*.) *n.* [Fr., from Lat. *scrotum*, and Gr. *kēlē*, a tumor.] (*Med.*) Hernia in the scrotum.

Scro'tum, *n.* [Lat.] (*Anat.*) The membranous bag in which the testicles, or chief male organs of generation, are suspended in the higher vertebrate animals: the cod.

Scro'ge, (*skrooj*.) *v. a.* To crowd; to squeeze;—an American colloquialism.

Scrow, *n.* A clipping from a leathern skin.

Scrub, *v. a.* (*imp.* and *pp.* SCRUBBED,) (*skrūbd*.) [Ger. *scrubben*; Du. *scrubben*.] To rub hard, either with the hand, or with a cloth or an instrument; usually, to rub hard with a brush, or with something coarse or rough, for the purpose of cleaning, scouring, or marking; as, to *scrub* a floor or deck, to *scrub* kitchen utensils, to *scrub* one's face with a towel.

—*v. n.* To labor hard or steadily; to be diligent and penurious; as, to *scrub* for a living.

—*n.* One who works hard, and lives sparingly or meanly; a drudge; as, a publisher's *scrub*.—Anything small, mean, or despicable.

—A worn-out brush or broom.—Low underwood; brush; undergrowth; stunted boscage; as, the Papuan *scrub*. —*a.* Mean; scrubby; paltry; despicable; contemptible; as, a *scrub* joint of meat.

Scrub'bed, **Scrub'by**, *a.* Small, mean, and contemptible; stunted in growth; niggardly; shabby; paltry; as, a *scrubbed* boy, a *scrubby* cur, a *scrubby* dinner.

Scrub'grass, in Pennsylvania, a township of Venango co.

Scrub Island, in the W. Indies, 3½ m. N.E. of Tortola.

Scrub'race, *n.* A running-match between mean animals, got up for diversion.

Scrub'stone, *n.* An English provincialism for a species of calciferous sandstone.

Scriff, *n.* The nape of the neck; as, I took him by the *scruff* of the neck and kicked him out of doors.

Scrum'nage, *n.* An infrequent orthography of SCRIMMAGE, *q. v.*

Scrumptions, (*skrūm'shus*.) *a.* Choice; fine; select; fastidious; luxurious; as, a *scrumption* fellow. (U. S.)

Scrunch, *v. a.* To crunch; to scranch.

Scruple, (*skrūpl*.) *n.* [Fr. *scrupule*; Lat. *scrupulus*, *scrupulum*, from *scrupus*, solicitude.] In apothecaries' weight, the third part of a drachm, or twenty grains.—Hence, a minute or infinitesimal quantity; as, "the smallest *scruple* of her excellence."—*Shaks*.

—Anxiety; solicitude; uneasiness; difficulty; trouble; doubt; hesitation from the difficulty of determining what action is right or expedient; backwardness; reluctance to decide or to act; perplexity; as, a *scruple* of conscience.

To make *scruple*, to hesitate from conscientious motives.

—*v. n.* To have hesitation about doing anything; to doubt; to be restrained by motives or considerations of conscience or expedience; to be reluctant to take decision or action; as, he does not *scruple* to help himself to other people's money.

—*v. a.* To question; to hesitate, or be reluctant, to believe; as, to *scruple* the correctness of an assertion.

Scrup'ler, *n.* One who scruples, hesitates, or doubts.

Scrupulos'ity, *n.* [L. Lat. *scrupulositas*.] Quality or state of being scrupulous; doubtfulness; the caution or tenderness springing from the fear of doing wrong or offending; nicety of doubt, or punctilious regard to exactness, propriety, or etiquette; overnicety; fastidiousness; preciseness; squeamish or overstrained delicacy; as, he is careful to a degree of *scrupulosity*.

Scr'upulous, *a.* [Fr. *scrupuleux*.] Having scruples or doubts; inclined to scruple; nicely dubious; exercising caution in decision or action, from a fear of offending or wrong-doing; as, a man of *scrupulous* honesty, a woman of *scrupulous* delicacy. — Exact in regarding facts; nice; careful; cautious; vigilant; as, *scrupulous* observance of the Sabbath.

Scr'upulously, *adv.* In a scrupulous manner.

Scr'upulousness, *n.* State or quality of being scrupulous; niceness, exactness, or carefulness in determining or in acting, from a regard to truth, propriety, or expedience.

Scrut'able, *a.* That may be discovered by inquiry, scrutiny, or close examination.

Scrut'ineer', *n.* One who scrutinizes; — especially, a person who examines electoral votes to determine their legality.

Scrut'inize', *v. a.* (*imp. and pp.* SCRUTINIZED,) (*skrū-ti-nīz*.) [From *scrutiny*.] To search closely or minutely; to examine or inquire into critically; to investigate narrowly; to pry into; as, his affairs were strictly *scrutinized*.

Scrut'inizer, *n.* One who scrutinizes or examines with critical care.

Scrut'inizingly, *adv.* In a scrutinizing manner; by employing close research; scrutiniously.

Scrut'inously, *adv.* With close observation or critical regard.

Scrut'iny, *n.* [Fr. *scrutin*; L. Lat. *scrutinium*.] Close or careful search, as into things cast aside, for something useful or desirable; minute inquiry; careful investigation; close research; critical examination; as, his character will bear *scrutiny*.

(*Pol.*) In parliamentary language, an examination of the votes given at an election by an election committee, at which the bad given on both sides are rejected, and the poll corrected accordingly.

(*Canon Law*.) A ticket, or little paper billet, on which a vote is written.

Scrutoire, (*skrū-twōr'*), *n.* Same as ESCRITOIRE, *q. v.*

Sery', *n.* [From *desery*.] A covey of wild fowl.

Scud', *v. n.* [Icel. *skíðs*, quick, rapid.] To flee or be driven with haste or celerity; as, he *scudded* off before I could accost him.

(*Naut.*) To run before the wind in a gale; as, the ship *scudded* under bare poles.

—*v. a.* To pass over rapidly.

—*n.* Act of scudding; a driving along; a rushing or fleeing with precipitation. — Detached, vapory clouds hurried along rapidly by the wind; as, flying *scud*. — An English provincialism for a sudden, slight, quick shower; as, a *scud* of rain; also, a covey of larks.

Scud'die, *v. n.* [Dim. of *scud*.] Same as SCUTTLE, *q. v.*

Seude'ri, MADELEINE DE, a French romancist, b. 1607, was the sister of Georges de Seuderi, a poet once celebrated, now forgotten. She wrote a large number of works, which were once highly popular, notwithstanding their great length. The chief of these were *Olelia*, in 10 vols., and *Artamenes*, or *The Grand Cyrus*, also in 10 vols. She had pensions from Cardinal Mazarin and Louis XIV. D. 1701.

Scudo, (*skōō'do*), *n.*; *pl.* SCUDI, (*skōō'dee*.) [It., a shield; Fr. *écu*.] Formerly a Roman gold coin, in value about \$15.70. — A silver money of account in Italy, equivalent (at par of exchange) to about \$1.02.

Scufe, *n.* A Scottishism for the racket used in the game of tennis.

Scuff, *n.* Same as SCRUFF, *q. v.*

Scuffle, (*skūf'fl*), *n.* [A. S. *scufan*, to push, shove, thrust; Dan. *skuffe*, to cheat.] A confused contest or quarrel, in which the parties push or shove violently against each other; a tumultuous struggle for victory or superiority; a fight; as, in the *scuffle* he lost his hat. — A garden hoe. — A child's pinafore; — (an English prov.)

—*v. n.* To enter into a close grapple, as two persons; — hence, to strive or contend confusedly and tumultuously, as small parties.

Scuffer, *n.* One who scuffles. — (*Agric.*) A field or garden implement for cutting up weeds and stirring the surface of the ground; a scuffle.

Seug, *v. a.* [Swed. *skugga*, to shade.] To hide; to be in ambush. (Prov. Eng.)

—*n.* A place of shelter. (Prov. Eng.)

Sculk', *v. n.* See SKULK.

Sculk'er, *n.* Same as SKULKER, *q. v.*

Skull', *n.* Same as SKULL, *q. v.*

—[Swed., Goth. *skal*, a drinking-vessel. See SKULL.] (*Naut.*) A cock-boat; a sculler; also, an oar so short that one man can work a pair; — particularly, an oar placed over the taffrail of a boat and plied from side to side; as, a pair of *skulls*.

—*v. a.* To impel, as a boat by moving and turning an oar over the stern from side to side.

Sculler, *n.* One who sculls or rows with sculls; one who impels a boat by an oar over the stern. — A boat impelled by one man with two sculls or short oars.

Scull'ery, *n.* [Fr. *écuelle*, a porringer.] A place where dishes, pots, pans, and other culinary utensils are kept; — also, a back-kitchen, or place in which the dirtier kinds of kitchen work are done.

Scull'ery-maid, *n.* A domestic who has charge of a scullery; a scullion.

Scullion, (*skūl'yūn*), *n.* [O. Fr. *sculiér*.] A servant who cleans pots, kettles, and other utensils, and performs other menial services about the kitchen and scullery.

Scull's Creek, in Georgia, enters the Ogeechee from Emanuel co.

Scull'towu, formerly LOCKERTON, in New Jersey, a village of Salem co., abt. 15 m. E. of Salem.

Sculp'pin, *n.* (*Zoöl.*) An American fish of the genus *COTTUS*, *q. v.*

Sculp'tor, *n.* [Lat.] One whose occupation is to carve wood or stone into images or figures; a carver; a statuary; as, the *sculptor's* art.

Sculp'tress, *n.* A female sculptor.

Sculp'tural, *a.* Pertaining, or relating, to sculpture; — hence, finely wrought or chiselled; as, *sculptural* finish.

Sculpture, (*skūlp'yūr*), *n.* [Fr.; Lat. *sculptura*, from *sculpo*, *sculptum*, to carve, cut, grave.] The art of carving wood, stone, or other material, into images or statues. — Carved work; as, living *sculpture*. (*Dryden*.)

Strictly speaking, *S.* is the art of cutting or carving any material, so as to represent form. If taken in a broad acceptation, the term might be applied to gem-engraving, casting in metal or otherwise, modelling, and carving generally. Sculpture may be broadly divided into *Relievo* and *Round*. In the former, single figures or groups are represented as more or less raised, but without being entirely detached from a back-ground. According to the latter method, insulated figures, such as statues, or collections, or groups, are made, so as to be entirely independent of a back-ground. There are various opinions as to which is the most ancient of the arts of painting and *S.* If we place credence in Pliny's story, as recorded in his *Natural History*, relating how the daughter of Dibutades formed the outline of her lover's profile from its shadow thrown upon a wall, an outline which was subsequently filled in with clay by the lady's father, we must allow that drawing is the elder art. Indeed, it is more reasonable to suppose that the drawn design, from which *S.* is worked, must have been the prior process. It is clear, however, that attempts at forming the representation of natural forms, by means of clay or other plastic substance, must have been among the earliest efforts of man's ingenuity. Pliny and Pausanias both tell us that clay, stucco, wax, and plaster, were employed by the ancients to form works in *S.* Clay was used for architectural ornaments, figures, tiles, lamps, which, when baked, were called *terra-cotta*, or baked earth. For carved works, granite, porphyry, basalt, ivory, bone, alabaster, and wood of many kinds were used. In short, nearly every material, hard or soft, was employed to perpetuate the memory of great events, or to do honor to the actions of heroes. Scattered through even the most ancient records, we may glean that men from the earliest times venerated blocks and carved stones. In the 23d century B. C., Sabaoth possessed images of his domestic gods (in Hebrew *Seraphim*). Sculptured works have been found in the most ancient Hindoo caverns and grotto-temples. It has been declared that the history of sculpture is almost the history of religion. In the inspired writings, the Israelites are repeatedly exhorted to turn away from the worship of images, the sculptured works of their own hands. The idols of Egypt, the monstrosities of Hindooism and of Buddhism, owe their origin to the superstition of the people of India, China, and of Egypt, striving as they did to give to sculptured forms the symbolical attributes of divinity. This superstitious feeling was the force that actuated those ancient sculptors to exhibit in the human form, combined with the brute, the symbols of intelligence and strength. As to the Hindoos, although their fancy was exuberant, they never reached a standard of pure art. In the ruins of Persepolis there are many examples attesting to the fact that the Persians possessed many works of sculpture. Yet, as this ancient people never carved the semblance of the human form, they never gained a just conception of the majesty of nude humanity. *S.* flourished in Assyria. The researches of Messrs. Layard and Botta have stocked the museums of London and Paris with a number of colossal slabs, the dates of which range from the time of Sardanapalus, B. C. 930, to the destruction of Nineveh, B. C. 625. In these colossal emblems of the sculptured arts of a great and ancient people, we find human-headed, winged bulls and lions, and representations of battles, sieges, and the chase. Probably because their creators were bound by rigid conventional rules, these slabs show a total ignorance of perspective, together with exaggerated and inaccurate drawing. The Egyptians were the first who elevated sculpture almost to pure art. This ingenious, wealthy, and wise people, nevertheless, were never able to shake off a heavy uniformity and stiff ugliness which characterized all their works, and rendered them vastly inferior to the Greeks. This inferiority is held by some writers to arise from the want of beauty in the natives of Egypt; others declare that it was owing to the absence, among this nation, of any public games, where the human form in its proper development might be studied. The true cause would appear to be, that the Egyptian sculptors always wrought under the direction of the priests, who, according to Plato, never suffered them to innovate anything in their art, or to invent any new subjects or any new habits. Hence, the art remained at a stand-still — the rules of it at a stand-still. Stiff, limited action, drapery without folds, flat eyebrows, thick lips, and projecting eyeballs, are the prevailing characteristics in all Egyptian sculpture, albeit there is a peculiar sweetness of expression in many of their heads. Some authorities hold that the Etrurians taught the Greeks, while others declare that the Greeks were the instructors of the Etrurians. Certain it is that the sculptured remains of the Etrurians were closely connected in style with the Greek, pointing to the fact that there must have been some connection between the two nations. The distinguishing signs of Etruscan sculptural art are — exaggeration of attitude, meagreness in dealing with details, and an unnatural position of the hands. They were mostly skilled in the making of vases. Their sculptured works were chiefly in bronze, stone, and terra-cotta. To turn to Greece, a land where the art of sculpture soon rose

superior to all those impediments which trammelled and restricted its advancement in other countries. It was here that the conceptions of sublime and glowing faucies were embodied in the productions of what may be truly termed a race of poet-artists. Writers have endeavored to account, in various ways, for this universally admitted superiority of the Greeks over every other nation by whom the fine arts had been practised, and usually have attributed their success to such physical causes as a fine climate, or the prevalence of beautiful forms, or to the public exercises so general in that country. Nevertheless, these accidents alone will not account for their excellence as sculptors. Rather may we attribute the perfection of Greek art to her sculptors having made nature, in her best and most happy forms, their model. Still, it must never be forgotten that the Greeks had an intuitive sympathy with beauty, either in poetry, painting, or sculpture. Did the Greek sculptor desire to typify brawny strength, he sought in the gymnasium for the deep, spacious chest, the well-knit joints, the broad shoulders, the massy muscles of the wrestler, for the elements that should be combined together to form his mighty Hercules. Did he wish to carve the semblance of the messenger of the gods, he selected from the victor in the foot-race the clean limbs and the elegant proportions, and from many well-selected athletes, made up a form of ideal beauty combining the strength and agility we see personified in the statue of Mercury. Sculpture in Greece, as elsewhere, had its beginning in very rude forms. At first, the symbols of divinity were little more than rude quadrangular blocks of stone. Between the 9th and 7th centuries B. C., the Greeks had frequent intercourse with the commercial Phœnicians. From this nation the Greeks borrowed their *Hermæ*, or god of roads and travellers; at first mere stone pillars. Upon these pillars a head was afterwards placed, thus forming the origin of busts. Progressing still further, *S.* was called upon to assist in the decoration of temples. Hands and feet were next added, a shield and spear were placed in the hands of the statues; and thus the first semblance of Pallas originated. Until the time of Dædalus of Athens, the bodies or trunks of large statues were a mere cylindrical pillar, as in the Colossus of the Amyclean Apollo. Dædalus inaugurated a new æra; and of his divine genius the Greek said — that he made statues walk, see, and speak. After this great master it was that all artists were symbolically termed *Dædalides*, the sons of Dædalus. Henceforth, ancient Greek art may be divided into three styles: the *Old Attic*, the *Æginetic*, and the *Etrurian*. Statues, thrones embellished with figures, shields, vases, and coffers, were the productions of the art. Smilis, the father of statuary, lived at Ægina about 1400 B. C.; and in 700 B. C., Rhæcus of Samos invented the art of moulding and casting in brass. The famous Brazen Bull was made by Perillus, for Phalaris, who reigned in Sicily 564 B. C. But the true ideal style of Greek art was not inaugurated until the time of Phidias of Athens. This great genius lived in the time of Pericles, the age of classic models. For the Parthenon at Athens, Phidias wrought the statue of Minerva, and at Elis he set up his other great masterpiece, the famous Olympian Jupiter (Fig. 1900). Both were executed in ivory and gold. The god Jupiter was forty feet high; his face bore the expression of power, wisdom, and benevolence; and an epigrammatist, speaking of his majestic proportions, said: "The statue of Jupiter would have thrust off the roof of the temple like a thin shell, if it had ever risen from its golden throne." This statue of the Olympic Jupiter existed till the year 475 of our æra, when it was destroyed by fire at Constantinople. Besides these great works, he made a statue of Pallas, in brass, for Athens, the Venus Urania, the Nemesis in the temple at Marathon, and an Amazon, famed throughout Greece for the beauty of her limbs. Alcámenes of Attica, and Agoracritus of Paros, were his favorite disciples. The most famous works of Alcámenes were his Mars, Cupid, Venus, and Vulcan. It was said that Agoracritus was even superior to Alcámenes, and when he contended with the latter in the execution of a statue of Venus, the Athenians only adjudged the prize to Alcámenes out of partiality for their fellow-citizen. According to Varro, the Venus of Agoracritus was the finest ever wrought. Polyceletus of Argos was the author of the work deemed worthy of being ranked as the companion to the Jupiter of Phidias. This was the celebrated statue of Juno. Tenderness and softness were the characteristics of this master. He excelled in portraying the beautiful positions of the boys of the gymnasium, and of the sports of youth. His works were chiefly in metal, and he was the author of the celebrated ideals of youthful beauty — the Diadymenus, a placid youth, who winds the wreath of victory round his brow; and the warlike Doryphorus, holding the lance. Myron of Eleuthera, in Boeotia, was the great rival of Polyceletus. Despising the soft and graceful forms which his contemporary sculptor loved to represent, Myron sought his models in the brawny athlete. He sculptured the ideal Hercules, the Discobolus throwing the Discus. He was no less famous for his animal forms, the most celebrated of which were the Iæifer and the Sea Monster. In one quality, however, he was surpassed by Pythagoras of Rhegium, who executed the ideal of Apollo, who, as an archer, has just shot the serpent Python. The finest statue possessed by the moderns is an imitation of this great work — the Apollo Belvidere (Fig. 157). With all its beauty and simplicity, Greek sculpture made use of devices which, perhaps, from insufficient knowledge of the subjects, the best of modern fine art critics have condemned as being derogatory to the essential qualities of art. From an early period, and even during the best æra of Greek art — the age of Phidias — the Greeks were

accustomed to combine different marbles in the same work. This was called *polythitic S.* Frequently, head, hands, and feet, were formed of different stones, while wood and metal were employed for the draperies and accessories. The Greeks also painted their statues. The hair was often gilt, and even colored sometimes; the backgrounds of alti-relievi were painted, in order to heighten the effect, and occasionally eyes of glass or silver were introduced. With Socrates, the sculptor of the Draped Graces, and Athenodorus and Nanydes, commenced the third epoch of Greek sculpture. It is generally known as the *beautiful style*, and Scopas, Lysippus, and Praxiteles, because they united beauty and grace, brought the art to its highest perfection. The finest works of Scopas were the Furious Bacchante, his Venus (the original, perhaps, from which the Venus de Medici was copied), and the Triumph of Achilles, together with a number of charming combinations of Nereids and sea monsters. Forsaking the severe, grand, and sublime, for the tender, flowing, and graceful, Praxiteles wrought in bronze and marble. Until this sculptor ventured to carve a Venus nude, all statues of female divinities had been draped. It is supposed that the Sleeping Faun at Munich, the Cupid contained in the Vatican at Rome, the Apollo Sauroctonus, and the celebrated Venus of Cnidus, together with the group of Niobe, are imitations of some of the great works of this master. The rival and contemporary of Praxiteles was Lysippus of Sicyon, who was the great master of portrait-sculpture. He is said to have executed in bronze exclusively. Alexander the Great would permit no other artist to carve his likeness. He represented Alexander from his childhood to his manhood. Pliny declares that Lysippus executed as many as six hundred and ten works. His horses were very beautiful. The other great sculptors of this period were Euthycrates and Bedas, sons of Lysippus; Xenocrates, who wrote a treatise on sculpture; Chares of Lindus, who cast the famous Colossus of Rhodes; Agesander of Rhodes, and his three sons, who executed the celebrated group of Laocoon (Fig. 225); Glycon of Athens, who formed the Farnese Hercules at Naples; and Appollonius and Tauriscus, who made the Farnese Bull, also at Naples. The beautiful fragment known as the Torso of the Belvidere, at Rome, and the Hermaphrodite at Paris, also belong to this era of Greek art. The victorious Romans destroyed the existence of the arts in Greece; but, as if in revenge, all the sculptors of Rome were Greeks; all the great works in painting and sculpture were taken to Rome, and with these masterpieces the artists emigrated to the capital of their conquerors. The celebrated reclining statue of the Dying Cleopatra was executed in the reign of Augustus, and a son of Cleomenes the Athenian made a statue which is held by some to be a figure of Germanicus. This work is now in the Louvre at Paris. Visconti is of opinion that it is intended to represent some distinguished Roman orator. Julius Cæsar was devoted to the fine arts, and even the most remote provinces of the Roman empire reaped the fruits of his refined taste. He embellished the cities of Gaul, Spain, and Greece, as well as Rome. Augustus embellished all the public places of Rome with statuary, and Agrippa employed an Athenian sculptor to decorate the Pantheon, as well as causing an aqueduct to be embellished with three hundred pieces of statuary in bronze and marble. Nero invited from Cisalpine Gaul, Zenodorus, who executed a colossal bronze statue of his patron, 110 feet high. It was during the reign of the last-mentioned emperor that the Romans began to introduce the practice of making statues in different-colored marbles. They went so far as to imitate, by means of white and black stones, the colors of the eyes in a statue of an Ethiopian. The times now became too disturbed for sculpture to flourish; but it revived under Trajan, in whom, as well as in his successors, Adrian and the Antonines, the art found a munificent patron. Adrian was especially conspicuous for his fine taste. He caused to be restored all the old public edifices that had fallen into decay, besides erecting many new and magnificent buildings. The remains of one fine work remain to this day to attest to his munificence—the grand villa near Tivoli, about 18 m. from Rome. After this prince, sculpture began to decline, and when the seat of imperial government was established at Constantinople, Constantine could find no artists worthy to decorate his new imperial residence. After Rome had been destroyed by the several inroads of the Northern nations, the finest productions of ancient art were demolished, and this work of destruction was consummated by the religious zeal of the primitive Christians, who swept away what remains there were of the statues of the Greek and Roman divinities. *S.* awoke to renewed life about the 10th or 11th century, in Italy. In the 11th century mention is made of a sculptor named Buono; Bonanno, of Pisa, lived during the 12th; while Niccolò Pisano, who died 1270, is esteemed the "father of modern sculpture." Two of his finest compositions are the "Taking down from the Cross," in front of the Duomo of Lucca, and the "Last Judgment and Punishment of the Wicked," in the cathedral of Sienna. Both these masterly works are bassi-relievi. Andrea Orcagna, poet, painter, and sculptor, died in 1359. Lucca della Robbia covered his beautiful *terracotta* models with a varnish which gave them the hardness of stone. He never disclosed the secret of his process; but there is a tradition which declares that he inclosed an account of the mystery in some of his models before they were baked; so that it could never be known until many of his beautiful works were destroyed. Lorenzo Ghiberti and Donato di Betto Bardi were distinguished masters of *S.* Michael Angelo declared that the brazen gates made by the former were worthy of being

placed at the entrance to Paradise. Donatello, who died in 1466, enriched Florence, Genoa, and Venice with his works. During the 15th century, Andrea Verocchio, Andrea Ferracci, the two Pollajoli, and Mina di Fiesole, were great masters. Michael Angelo Buonarrotti, born in 1474, exhibited at an early age the forecast of his wonderful genius. He became the protégé of Lorenzo de Medici, who assigned him apartments in his own palace. His colossal statue of "Moses" is a great effort of genius, as are also the allegorical figures of "Day and Night," and of "Dawn," "Morning," and "Evening," in the chapel of the Medici at Florence. Others of the masterpieces of this great and powerful master are, the statue of "Christ" at Rome, the statue of "David" at Florence, and "the half-drunken Bacchus" in the same city. A profound knowledge of anatomy, mastery of execution, originality, combined with a vast store of energy, are the principal characteristics of Michael Angelo. Jacopo Catti, or Sansovino, as he is more commonly termed, was more distinguished as an architect than as a sculptor. Baccio Bandinelli, born at Florence in 1487, attempted to become the rival of Michael Angelo. A great anatomist, his style was rude and energetic. He restored the right arm of the Laocoon. Benvenuto Cellini was a painter, goldsmith, and sculptor. He was born at Florence in 1500. Most of his finest large works, which were cast in bronze, are preserved in his native city. The one celebrated female sculptor is Dropezia di Rossi, of Bologna, who died at an early age, in 1530. An accomplished painter, a musician as well as sculptor, she is said to have become inspired with an affection for a young artist who did not return her love. Her last work was a basso-relievo, representing the story of "Potiphar and Joseph," in which she depicted herself as the wife of Potiphar, with the object of her affection flying from her. Guglielmo della Porta, Bernini, Alessandro Algardi, of Bologna, Il Fiammingo, a native of Brussels, who excelled in portraying the forms of childhood, Francesco Mocchi Faggini, and other names, mark the different æras of Italian *S.* down to the present century. To Flaxman, in this century, the English are indebted for founding upon true principles the British school of *S.* This great sculptor has had worthy followers in Sir R. Westmacott, Sir F. Chantrey, Baily, Carew, Lough, and Foley. In France, Jean Goujon, of Paris, is the first distinguished sculptor. The brothers Marsy, who cast the statues of Bacchus and of Latona, and the famous group of horses at the Bath of Apollo, at Versailles, were distinguished in the 17th century. Baptist Pigalle executed a Mercury and a Venus for the King of Prussia. In this cent. David (d'Angers) and Pradier were the most distinguished of the French school; and, among contemporary sculptors, Guillaume, Carpeaux, and Bartholdi. Albert Dürer, whose genius embraced various departments of the fine arts, was among the first great German sculptors, his genius having been transmitted through many worthy followers to the greatest among modern German sculptors, Christian Rauch and Dannecker. As Canova emancipated modern Italy from those false perceptions which had so long divested the current of pure taste, so Thorwaldsen, the Danish sculptor, was superior to all his contemporaries in the grandeur of his forms and in strength of expression, besides placing his native land among the list of those countries that have given rise to artistic genius. John Gibson (*q. v.*) was the most distinguished pupil of both Canova and Thorwaldsen. Few American sculptures worthy of note were executed previous to Greenough's time, but within the last 30 years the works of Hiram Powers, Crawford, Brown, Clevenger, Rogers, Palmer, Miss Hosmer, Viunie Ream, and others, have brought American talent in this department of art to a pinnacle of reputation not inferior to that of contemporary European sculptors. — To describe the mechanical process of *S.*, the artist having conceived and well-ordered his subject, he either makes a preliminary sketch of it upon paper, or else proceeds at once to model it on a small scale, in clay or wax. By this means he is enabled to improve the general arrangement of his figure, or group of figures. The genius of the artist is altogether displayed in the perfected original model, for the subsequent process of copying it in stone is chiefly mechanical. When a large clay model is made, a skeleton or frame of wood or iron is constructed whereon to place a proper quantity of wet clay. This clay is moulded by the hand, and by tools of wood and ivory. The figure is thus built up in clay, and whether it is subsequently to be draped or otherwise, it should always be modelled naked, so that the true proportions of the form may be attained, also that the drapery may have a natural curve and fall. If the design be in rilievo, a plaque is prepared upon which the design is drawn. Upon this sketch, bounded by the outlines, the wet clay is laid; afterwards the clay is modelled by the sculptor. In either case, whether in the "round" or in "relievo," the clay must be kept damp by wet cloths, in order to prevent the shrinking or cracking of the model. To obtain a "cast" of this model is the next process. The model is covered with a mixture of plaster of Paris and water, and when this has become hardened, the clay model within is carefully picked out. The plaster of Paris matrix is then washed; the interior is brushed over with a composition of oil and soap, and a fresh supply of plaster of Paris poured in. When this sets, the matrix is struck off, piece by piece, with chisels, and a cast of the model, which has not adhered to the mould by reason of the oily compound with which the latter had been smeared, is obtained. This cast is the exact fac-simile of the original model, and if it is intended to execute the work in bronze, another mould is taken from it by the founder. (See FOUNDRY.) If it is intended to copy the

work in marble, a block of marble is marked with a number of pencil-points, to correspond to the chief elevations and cavities in the figure to be imitated; these forming a series of guides to the workmen engaged in carving a rough outline of the original work. A superior workman next copies the nicer details of the work by means of chisels, rasps, and files, the pencil-points acting as his guide. Finally, the sculptor himself gives the finishing touches, and goes entirely over his work, improving each detail, until the realization of his idea is obtained. When required, the surface is polished with pumice-stone and putty-powder.

Sculpture, *v. a.* To carve; to grave; to form, as images or figures, with a chisel, on wood, stone, or metal; as, a *sculptured* vase.

Sculpturesque, (*-esk*), *a.* After the manner of, or resembling, sculpture.

—*n.* High relief, possessing the character of sculpture.

Scum, *n.* [*Ice.* *skum*; *Ger.* *schaum*; *Fr.* *écume*.] That which rises to the surface of any liquor; extraneous matter or impurities which rise to the top of liquors in process of boiling or fermentation, or which form on the surface by other means; also, the scoria of metals in a molten state. — Hence, that which is vile or worthless; the recrement; the refuse; as, the *scum* of the people.

—*v. n.* (*imp.* and *pp.* SCUMMED.) To form a scum; to be mantled or covered with scum; as, the soup *scums* over.

—*v. a.* To remove the scum from; to clean off the impurities from the surface of; to skim; as, to *scum* molten lead.

Scumble, *v. a.* [*Dim.* of *scum*.] To spread thinly, as a painting, &c., with opaque or semi-opaque tints, to produce a softened effect.

Scumbling, *n.* (*Paint.*) A mode of obtaining a softened effect in painting, by blending tints with a neutral color of a semi-transparent character, forming a sort of glazing when lightly rubbed with a nearly dry brush over that portion of a picture which is too bright in color, or which requires harmonizing; but, unlike regular glazing, it does not entirely, but only partially, cover the ground-tint, the brush never being used charged with color, and thus by its partial dryness depositing minute granular portions of color over the surface. In chalk- and pencil-drawing, it is produced by lightly rubbing the blunt point of the chalk over the surface, or spreading the harder lines by the aid of the stump, which produces a peculiarly soft effect. *S.* is, however, used sometimes to an objectionable extent, and may frequently have the ill effect of destroying clearness of tint and decision of drawing.

Scummer, *n.* Excrement; dung.

—*v. n.* To dung; to void excrement.

Scummer, *n.* An instrument used for scumming liquor; a skimmer.

Scummings, *n. pl.* The matter skimmed from boiling liquors; scum.

Scummy, *a.* Covered with scum.

Scup, *n.* [*Du.* *schop*.] A swing; — a term still retained among the Dutch settlers of New York.

Scup, Scup'pang, *n.* (*Zoöl.*) See SPARIDE.

Scuppernong, *Creek*, in Wisconsin, enters Bark River from Jefferson co.

Scupper, **Scupper-hole**, *n.* [*From* *scoop*; *Sp.* *escupir*.] (*Naut.*) One of the holes or channels cut in the waterways of a ship for discharging or carrying off the water from the deck; as, the lee *scuppers*.

Scupper-hose, *n.* (*Naut.*) A pipe of canvas or leather, attached to the mouth of the scuppers, on the outside of a ship, to prevent the water from getting entrance.

Scupper-nail, *n.* (*Naut.*) A broad-headed nail, used for securing the edge of the hose to the scupper.

Scup'pernong, *n.* (*Bot.*) See VIRIS.

Scupper-plug, *n.* (*Naut.*) A plug or stopple for a scupper-hole.

Scurf, *n.* [*A. S.*, from *scorrian*, to scrape, shave; *Ice.* *skurfur*.] A dry sort of scab or mealy crust formed on the skin of an animal; an exfoliation from the surface of the body. — Hence, the soil or stain of anything adherent; as, the *scurf* of crime. (*Dryden*.) — Anything adhering to the surface; as, flakes of *scurf* on water.

(*Bot.*) A minute membranous scale on the surface of some leaves.

Scurfiness, *n.* State or quality of being scurfy.

Scurfy, *a.* (*comp.* SCURFIER; *superl.* SCURFIEST.) Having scurf; covered with scurf; resembling scurf; as, a *scurfy* skin.

Scurrile, (*skür'ril*), *a.* [*Fr.*; *Lat.* *scurra*, a buffoon.] Such as besemes a buffoon or coarse jester; low; mean; grossly indelicate or opprobrious in language; scurrilous; as, a *scurrile* taunt, a *scurrile* witticism.

Scurrility, *n.* [*Fr.* *scurrilité*; *Lat.* *scurrilitas*.] State of being scurrile or scurrilous; mean, vulgar, or obscene jocularity. — Such low, vulgar, indecent, or abusive language as is used by buffoons and the like; grossness of innuendo, reproach, or invective; coarse abuse; as, the *scurrility* of a lampoon.

Scur'rilous, *a.* Employing the low and obscene language of buffoons, or of the meanest sort of people; opprobrious; abusive; coarse; vulgar; vile; foul-mouthed; as, a *scurrilous* jester. — Containing low obscenity or mean abuse; indecently jocular; foul; as, a *scurrilous* remark, a *scurrilous* pamphlet, &c.

Scur'rilously, *adv.* In a scurrilous manner.

Scur'rilousness, *n.* Quality of being scurrilous.

Scurry, *v. n.* To hurry; to scour or scud along. (*Eng. prov.*)

Scurvily, *adv.* In a scurvy manner; basely; meanly; shabbily; with coarse and vulgar discourtesy or injustice; as, to be *scurvily* treated.

Scurviness, *n.* Quality or state of being scurvy; baseness; vileness; meanness; shabbiness.

Scur'vy, n. [From *scurf*; L. Lat. *scorbutus*.] (*Med.*)

A disease once common on shipboard, but now of very rare occurrence. It is still a disputed point whether this disease was known at all to the ancients; but of its prevalence in the Middle Ages there is abundant testimony. It appears to have existed in the north of Europe from the most remote antiquity, resulting from the imperfect state of agriculture and the frequent famines that prevailed. It was, however, more particularly at sea that the fearful ravages of this scourge prevailed. The first indication of *S.* is usually a change in the complexion, from its naturally healthy hue to a pale, slightly sallow, and dusky appearance, and aversion to every kind of exercise. The patient is readily fatigued, and complains of pain in the muscles, especially of the legs and loins, similar to those produced by over-exertion. The gums soon become sore, and apt to bleed on the slightest touch, and on examination are found to be swelled and spongy, and of livid redness. As the disease advances, all these symptoms become more marked; the complexion acquires a more dingy and somewhat brownish hue; the debility increases, so that the least exertion causes breathlessness and palpitation, and not unfrequently an alarming syncope; the gums become more swelled and more livid, forming, in some cases, a black spongy mass, completely concealing the teeth, which frequently become loose, and drop out without undergoing decay; and the breath is remarkably offensive. The patient is also subject to hemorrhages, more particularly from the gums and nose, but often from the intestines, lungs, or stomach. Ecchymoses also appear on the skin, in the form of petechial spots, particularly on the lower extremities, but frequently occurring on the arms and trunk. In many cases, effusions of blood take place under the skin in various parts, especially in the lower extremities, and around the seat of an old injury. These parts are painful when pressed or moved, and are much swollen. Their most common seat is the ham, where the swelling is often considerable, and always attended with stiffness and contraction of the knee-joint. Sometimes old wounds break out afresh, and a broken bone will become disunited, though it has been consolidated for some time. The natural secretions are scanty, the skin is dry and rough, and there is a suppression of perspiration. The appetite, however, continues good, and the powers of digestion are unimpaired; the intellect is unaffected, and in early stages the patients generally sleep well. The tendency to swoon, however, is very great, and sometimes even the slightest motion produces fainting, which sometimes proves fatal. *S.* is most common in winter or the beginning of spring; is not contagious, neither is it caused by cold weather, by impurity of air, nor by the continued use of salt provisions, all of which have frequently been alleged. It is owing solely to the privation, for a considerable length of time, of fresh, succulent vegetables, and is infallibly and rapidly cured by the administration of these, or of lemon-juice. The latter is really a specific against *S.*, whether it be employed as a preventative or as a remedy. It supplies something to the blood which is essential to its healthy properties. As for the rest, fresh animal food, with wine, porter, or ale, is of advantage; but bleeding, blistering, or mercury in any form, should be religiously avoided.

—*a.* (*comp.* SCURVIER; *superl.* SCURVIEST.) Scurfy; diseased with scurvy; covered or affected by scurf or scabs; scabby.

—Hence, by analogy, low; mean; vulgar; vile; worthless; contemptible; as, he played me a *scurvy* trick.

Scur'vy-grass, n. (*Bot.*) See COCHLEARIA.

Scut, n. The tail of an animal whose caudal extremity is short; as, the *scut* of a hare.

Scutari, (skoo-ta're.) [*Turk.* *Uskudar*; *anc.* *Chrysopolis*.] A town of Asiatic Turkey, situate opposite Constantinople, on the banks of the Bosphorus, in Asia Minor. Its site is one of the most beautiful imaginable, and the most brilliant views of Constantinople and the surrounding scenery are obtained from the hills above it. It has a palace and gardens belonging to the Sultan, a college of dervishes, barracks, public baths, and an extensive cemetery. It carries on a considerable trade, being a rendezvous for the caravans which come from the interior of Asia.

Scutari, in European Turkey, a lake in the N.W. of Albania, 25 m. E. of the Adriatic Sea. Ext. 20 m. long, with an average breadth of 6 m.

—A fortified town at the S. of the above lake, on the Bojana, 45 m. S.E. of Cattaro. *Manuf.* Cotton fabrics, arms, and ship-building.

Scut'ate, a. [From Lat. *scutum*, a shield.] (*Bot.*) Buckle-shaped.

(*Zoöl.*) Protected by large scales, as a surface.

Scutell, (skutch'), v. a. To switch or whip gently. — To swing; as, to *scutch* flax.

(*Manuf.*) In cotton-spinning, to beat and loosen the filaments of the fibre; to free from dust by blowing.

Scutching-machine, a machine for scutching cotton.

—*n.* An instrument employed in the dressing of flax and hemp; a scutcher.

Scutcheon, (skutch'un,) n. Same as ESCUTCHEON, *q. v.*

Scutcher, n. Same as SCUTCH, *q. v.*

Scute, n. (*Zoöl.*) A scale, as of a reptile.

Scutella'ria, n. (*Bot.*) The Skull-cap, a genus of plants, order *Lamiaceæ*. It contains about 10 unimportant American species.

Scutellate, Scutellated, Scuteliform, a. [From Lat. *scutella* — *scutra*, a salver.] Salver-shaped; as, the *scutellated* bone of a sturgeon.

Scutelium, n. [*Dim.* of Lat. *scutum*, a shield.] (*Bot.*) A shield-like disc, containing the fructification found in some lichens.

Sentibranch'iaus, n. pl. [Lat. *scutum*, and *branchia*, gills.] (*Zoöl.*) A name given by Cuvier to an order of hermaphrodite, gastropodous Molluscs, including those which have the gills covered with a shell in the form of a shield.

Scuttle, (sküt'tl,) n. [A. S. *scyttel*, a lock, bar, bolt; Fr. *écouille*.] A small opening in a flooring or covering; — specifically, a square hole in the roof of a house, with a movable lid.

(*Naut.*) A small hatchway, or man-hole, in the deck of a ship, with a lid for covering it; — also, a like hole in the side or bottom of a ship, and through the coverings of her hatchways, &c.; — used to admit light or air, or for communication. — The hatch, lid, or door which covers or closes an opening in the roof or wall of a building, &c.

Scut'le, Scud'le, n. [From *scud*.] A short run; a quick pace; a running with affected haste.

—*v. n.* To hurry; to scurry; to hurry or run with assumed precipitation; to bustle along; as, the old fellow *scuttled* off about his business.

Scut'le, v. a. To cut, as large holes through the bottom, decks, or sides of a ship, for any purpose. — To sink by cutting holes through the bottom; as, to *scuttle* a ship. — To *scuttle* the decks, to cut holes in them, in order to pour water down into the hold in case of fire.

—*n.* [A. S. *scuttel*; Du. *schotel*; Fr. *écuelle*, from Lat. *scutella*, a platter.] A broad, shallow basket, so called from its resemblance to a dish or platter; — specifically, a metal pan or pail for holding coals.

Scut'le-butt, n. (*Naut.*) A cask of water with a large hole in it, placed for daily use on shipboard.

Scut'le-fish, n. (*Zoöl.*) A cuttle-fish. See SEPIADÆ.

Scutum, n. [Lat., the name of the oval or door-shaped shield worn by the heavy-armed infantry.] (*Zoöl.*) The second section of the upper surface of each segment in insects.

Scylla, (sil'la.) (*Myth.*) A daughter of Nisus, King of Megara. When Minos came from Crete to take vengeance for the death of his son Androgeos, his efforts to take the city were fruitless as long as the purple lock on the head of Nisus remained unshorn. Urged by her love for Minos, *S.* cut off the fatal lock, and with it destroyed the life of her father and the safety of the city. According to one version, Minos tied *S.* to the stern of his ship and drowned her; but another tale says that she was changed into a fish, which Nisus transformed into an eagle, constantly pursued. The myth was localized in the names of the port of Nisæa and the promontory Scyllæum. — The *Odyssey* (xii. 73, &c.) speaks of another *S.*, a daughter of Cræteis, as a monster with twelve feet, six necks, and six mouths, each containing three rows of teeth. This being haunted a rock on the Italian coast; a neighboring rock being tenanted by Charybdis, who thrice every day swallowed the waters of the sea, and thrice threw them up again. Like Medusa, *S.* is represented in some legends as having been beautiful, and as having been changed into a monster through the jealousy of Circe or Amphitrite.

Scylla, and Charybdis, the former a famous promontory and town of S. Italy, at the entrance to the narrow straight separating Italy from Sicily; Lat. 38° 14' 15" N., Lon. 15° 44' E. The promontory is 200 ft. high, projecting into the sea, and at its base is the town, with a pop. of 5,000. The navigation at this place was looked upon by the ancients as attended with immense danger, which, however, seems to have been much exaggerated, for at the present day the risk is not more than attends the doubling of an ordinary cape. — *Charybdis* (modern name *Galofaro*), is a celebrated whirlpool in the Straits of Messina, nearly opposite the entrance to the harbor of Messina in Sicily, and in ancient writings always mentioned in conjunction with Scylla. The navigation of this whirlpool is, even at the present day, considered to be very dangerous, and must have been exceedingly so to the open ships of the ancients. A modern writer describes it as being "an agitated water of from 70 to 90 fathoms in depth, circling in quick eddies." Homer places it immediately opposite to Scylla, probably taking advantage of poetic license to exaggerate the danger of the navigation.

Seym'etar, n. An infrequent spelling of SCIMETAR, *q. v.*

Seyplus, (si'fus,) n. [Gr. *skyphos*, cup.] (*Bot.*) The cup or coronet, as in the Narcissus and allied plants; — also, a cup-like dilatation of the podetium in lichens, bearing shields upon its margin.

(*Archæol.*) A capacious drinking-cup, used by the lower orders of the ancient Etrurians and Greeks.

Seythe, or Sythe, (sith,) n. [A. S. *sithe*.] (*Agricul.*) An implement which has been known from the earliest ages. It consists of a curved steel blade fixed at right angles to a long, crooked handle, to which are fastened two other smaller handles. *S.* are used for cutting grass and corn; when for the latter purpose, a piece of wicker-work, called a *cradle*, is generally attached. — See MOWING AND REAPING.

(*Antiq.*) The curved, cutting blade (Fig. 567) which was affixed to the wheels of war-chariots.

Seythe-stone, n. A whetstone, or rifle, for sharpening scythes.

Seythia, (sith'i-a.) (*Anc. Geog.*) A territory in the eastern half of northern Europe, and in western and central Asia, but of very uncertain extent, was inhabited by the Scythæ, or Scoloti, who invaded Media, and defeated Cyaxares B. C. 632, and were driven out soon after Darius I. invaded the country, B. C. 507. Xenophon and the 10,000 Greeks, in their retreat, had to march four days through it, B. C. 400. Alexander III. gained a success over the people dwelling between the Oxus and the Jaxartes, B. C. 329. They merged into tribes of various names soon after their attack upon the King of Bosphorus, about B. C. 63.

Scythopolis. See BETHSHEAN.

Sea, (see,) n. [A. S. *sæ*; Du. *zee*; Ger. *see*; Icel. *sær*.] (*Geog.*) One of the more considerable expanses of salt water, less than an ocean, found on the surface of the globe; a body of salt water of the second rank, commonly forming a component of, or connecting with, a larger sea or an ocean; as, the Mediterranean *Sea*, the Baltic *Sea*, the Black *Sea*. — A large inland lake or body of water; as, the Caspian *Sea*. — The ocean; the main; that portion of the earth's surface which is covered with water. See OCEAN.

(*Naut.*) The expression employed by sailors to describe the condition of the waters they are traversing. A *long sea* is one in which the crests of successive waves are distant from each other, and in which the effect upon the ship is a heavy rolling motion. A *short sea*, on the other hand, is when the waves are frequent, irregular, and crowned by foam. They produce a pitching motion. A *cross sea*, the most irregular, is when a change of wind or a current drives one succession of waves in a direction different from that of another series resulting from the swell caused by a former storm. — The term is also applied to a wave; a surge; a billow; as, the vessel shipped a *sea* over her quarter. — The swell of the ocean in a tempest, or the motion, agitation, or direction of a temper.

—Hence, a rough or ruffled place or element; as, a *sea* of troubles. — Proverbially, a large quantity of liquid; as, a *sea* of blood, *seas* of wine.

(NOTE. *Sea* forms the prefix of many words of sufficiently self-explaining signification; as, *sea*-bathing, *sea*-bat, *sea*-bird, *sea*-current, *sea*-life, *sea*-service, *sea*-tossed, *sea*-voyage, *sea*-water, &c.)

At *sea*, upon the main, or ocean; out of sight of land; as, friends at *sea*; — hence, absent from home or regular location; as, his wits are at *sea*. — At *full sea*, at the height of flood-tide; — hence, at the full. — Beyond the *sea* or *seas*, out of the state, territory, realm, or country; as, a convict sent beyond the *seas*. — Half *seas* over, in a state of semi-intoxication; half drunk. (Colloq.) — Heavy *sea*, a sea with high, rolling billows. — Long *sea*, a sea presenting a succession of long and extensive waves. — On the high *seas*, on the open sea, the common highway of nations; as, murder committed on the high *seas*. — To go to *sea*, to follow the occupation of a mariner; to adopt a sea life.

Sea-anemone, n. (*Zoöl.*) See ACTINIE.

Sea-ape, n. (*Zoöl.*) See SQUALIDÆ.

Sea-bank, n. The strand; the sea-shore. — A mole, causeway, or embankment against encroachments of the sea.

Sea-bar, n. The sea-swallow.

Sea-bar'row, Sea-pincushion, (-kūsh'un,) n. The egg of the Skate, a fish of the genus *Raja*.

Sea-bear, n. (*Zoöl.*) A name vulgarly applied to several large species of seals.

Sea'beck, in Washington, a post-village of Kitsap co., 50 m. N. of Olympia.

Sea-blub'ber, n. A certain marine insect.

Sea-board, a. [Sea, and Fr. *bord*, side.] Impinging or bordering on the sea; as, a *sea-board* city.

—*n.* The coast; the sea-shore.

—*adv.* Toward, or in the direction of, the sea.

Sea'-boat, n. A term applied by seamen to a vessel with respect to her qualities in bad weather; as, a good, or bad, *sea-boat*.

Sea'-boy, n. A cabin-boy.

Sea'-breach, n. Irruption of the sea by breaking the banks.

Sea'-brook, in New Hampshire, a post-village and township of Rockingham co., 45 m. S.E. of Concord; pop. 1,609.

Sea-breeze, n. A wind, or current of air, blowing from the sea upon land.

Sea'-buck-thorn, n. (*Bot.*) See SALLOW-THORN.

Sea'-built, (-bilt,) a. Built for the sea; as, *sea-built* forts (ships).

Sea'-calf, (-kāv,) n.; pl. SEA-CALVES. (*Zoöl.*) The common seal. See SEAL.

Sea'-card, n. The mariner's compass. See COMPASS.

Sea'-change, n. A change brought about by the sea.

Sea'-chart, n. See CHART.

Sea'-coast, n. The shore or verge of the land contiguous to the sea or ocean.

Sea'-coot, or Surf-duck, n. (*Zoöl.*) An American species of Coot, *Fulica perspicillata*. It is 19 inches long, and the wing nearly 10 inches; color black, a triangular white patch on the top of the head, and one on the nape; bill red. The female is brown, sides and under parts whitish.

Sea'-cow, n. (*Zoöl.*) The Sea-horse. See HIPPOCAMPUS. — Also, the MANATUS, *q. v.*

Sea'-cray'fish, n. (*Zoöl.*) The SPINY-LOBSTER, *q. v.*

Sea'-daf'fodil, n. (*Bot.*) A bulbous plant, *Pancratium maritimum*.

Sea'-devil, n. (*Zoöl.*) A name of the Angler. See LOPHIDE.

Sea'-dog, n. (*Zoöl.*) The SEAL, *q. v.*

—An old seaman; a weather-beaten tar; a salt; as, a jolly *sea-dog*.

Sea'-eagle, n. (*Zoöl.*) The Osprey.

Sea'-egg, n. (*Zoöl.*) The SEA-URCHIN, *q. v.*

Sea'-elephant, n. (*Zoöl.*) The Elephant-seal. See SEAL.

Sea'-farer, n. One who travels by sea; — especially, a seaman; a mariner.

Sea'-faring, a. Following the vocation of a seaman; customarily employed in navigation or seamanship; as, a *seafaring* man, a *seafaring* life.

Sea'-fern, n. (*Zoöl.*) A kind of coral resembling a fern.

Sea-field, in *Indiana*, a post-village of White co., 32 m. W. of Logansport.

Sea-fight, (*fit*), *n.* An engagement between ships at sea; a naval action.

Sea-fish, *n.* Any fish that has its habitat in salt water.

Sea-fisheries, *n. pl.* The great sea-fisheries of the U. S. are mostly carried on from New England. They date from the earliest settlement of the country, it being probable that, among the motives that led to the colonization of Massachusetts, was the hope of profit from the fisheries on the coast, which Smith, Archer, Brereton, and other writers of that day represented as surpassing even those of Newfoundland. Edward Winslow, in his *Narrative of the True Grounds and Causes of the First Planting of New England*, relates an interview between James I. and the agent of the Puritans who went over to England from Leyden in 1618 to solicit his consent to their going to America. The King asked them: "What profit might arise?" They answered: "Fishing." Upon which James replied: "So God have my soul, 'tis an honest trade; 't was the Apostle's own calling." Very soon after their arrival at Plymouth the pilgrims engaged in the fisheries. In 1624 they sent to England a ship laden with fish, and in the next year two others with fish and furs. In 1628 they were selling fish to the Dutch at New Amsterdam. About 1670 the profits of the mackerel, bass, and herring fisheries at Cape Cod were granted to found a free school, which was opened in 1671. From Boston fish began to be exported as early as 1633. In 1639 the general court of Massachusetts passed an act to encourage the fisheries by exempting fishing vessels, and all property connected with them from taxes and duties for 7 years. At the close of the 17th century, the merchants of Massachusetts exported annually about 100,000 quintals of cod-fish, worth \$400,000, to Portugal, Spain, and Italy. In 1731 the fisheries of the colony employed 5,000 or 6,000 men. Ten years later the number of fishing vessels belonging to Massachusetts was 400, besides as many shallops and undecked boats. The annual produce of the cod-fishery was about 230,000 quintals, of which \$700,000 worth was exported. At the outbreak of the revolutionary contest the fishing towns were rich and populous. Marblehead was second only to Boston in population and property. In 1755, in the hope of starving New England into submission, the British Parliament passed an act to deprive the colonies of the right of fishing on the banks of Newfoundland; and the breaking out of hostilities, which soon followed, nearly destroyed the fisheries for a time. In the negotiation of the treaty of peace at the end of the war, the right of the Americans to a share in the fisheries was secured by the firmness of John Adams, who made the concession of that right an ultimatum in the discussions with the British Commissioners. By the treaty it was agreed "that the people of the U. S. shall continue to enjoy unmolested the right to take fish of every kind on the Grand Bank, and on all the other banks of Newfoundland; also in the Gulf of St. Lawrence, and at all other places in the sea where the inhabitants of both countries used at any time heretofore to fish; and also, that the inhabitants of the U. S. shall have liberty to take fish of every kind on such part of the coast of Newfoundland as British fishermen shall use, and also on the coasts, bays, and creeks of all other of his Britannic majesty's dominion in America." The Federal Government early recognized the importance of the fisheries, and the necessity of encouraging them by legislative action. In 1789 Congress passed an act granting a bounty of 5 cents per quintal of dried and pickled fish exported from the U. S., and imposing a duty of 50 cents per quintal on foreign fish. After the War of 1812-15 with England, discussions on the use of the fishing-grounds arose between the two governments, which resulted, in 1818, in a convention, by which it was agreed that the Americans should have the liberty of taking fish on the southern coast of Newfoundland between Cape Race and the Rameau Islands, from Cape Race to the Guirpon Islands; on the shores of the Magdalen Islands; and also on the southern coast of Labrador from Mount Joly to and through the Straits of Belleisle, and thence northwardly indefinitely along the coast. The U. S., on their part, renounced formally the right of fishing on or within 3 marine miles of the British dominions in America not included in the above specified limits. In 1852 serious troubles broke out in the fishing-grounds of British America between the American fishermen and the British authorities, who claimed the right to exclude the former from the bays and inlets of the British possessions. This claim, which was supported by an armed naval force, was regarded by the U. S. as illegal, and the war steamers *Princeton* and *Puller* were sent to the coast of Nova Scotia to protect the rights of the fishermen. The dispute was temporarily settled by mutual concessions, and in 1854 a reciprocity treaty was agreed upon by the two countries, containing the following stipulations concerning the fisheries: "The inhabitants of the U. S. shall have, in common with the subjects of her Britannic majesty, the liberty to take fish of every kind, except shell-fish, on the sea-coasts and shores, and in the bays, harbors, and creeks of Canada, New Brunswick, Nova Scotia, Prince Edward Island, and of the several islands thereunto adjacent, without being restricted to any distance from the shore, with permission to land upon the coast and shores of those colonies, and the islands thereof, and also upon the Magdalen Islands, for the purpose of drying their nets and curing their fish." It was specified that the liberty thus granted should apply solely to sea-fisheries, and not to salmon, shad, or other river fisheries; and that the fishermen should not interfere with the rights of private property, or trespass on parts of the shore oc-

cupied by British fishermen. Similar rights, with similar reservations, were granted to British fishermen on the coast of the U. S. north of Lat. 36°. In 1871, the stipulations of the treaty of 1854 were revived by the treaty of Washington, which also provided that "fish oil, and fish of all kinds, except fish of the inland lakes and fish preserved in oil, shall be admitted into each country, respectively, free of duty." Extended to Newfoundland in 1874. But Great Britain claimed that the concession was of little importance to her, on account of the inferior value of the United States' fisheries, and that she ought to be compensated for the difference in value. She claimed \$14,280,000 as a just equivalent for the period of the treaty. The question was submitted to arbitration, and the sum of \$5,500,000 awarded in 1878. In 1888, the treaty having expired, a new one was signed. This fixed a three-mile limit from the Canadian coast, within which American fishermen were forbidden to enter, and also reserved all bays of ten miles or less in width. It also provided that American vessels could land, sell, or otherwise dispose of their cargoes in Canadian ports only in case of distress. See WHALE, SEAL, COD, HERRING, MACKEREL.

Sea-ford, in *Delaware*, a post-village of Sussex co., 40 m. S.W. of Dover. Pop. 1,462.

Sea-fox, *n.* (*Zool.*) See SQUALIDÆ.

Sea-gage, *n.* (*Zool.*) See *SEA* and *gage*. The depth that a ship sinks in the water.

Sea-girt, *a.* Surrounded by the sea or ocean; as, "Britain's sea-girt isle." — Thomson.

Sea-god, *n.* A marine deity, as Neptune.

Sea-goddess, *n.* A female deity of the ocean, as Amphitrite.

Sea-going, *a.* Travelling by sea;—especially, sailing on the high sea; as, a sea-going vessel, in distinction from a coaster or river craft.

Sea-grape, *n.* (*Bot.*) The Gulf-weed. See SARGASSUM.

Sea-grave's Mills, in *Rhode Island*, a village of Providence co., 25 m. N.W. of Providence; pop. abt. 150.

Sea-green, *a.* [*sea* and *green*.] Having the color of sea-water; being of a faint, bluish-green tint.

Se'ah, *n.* A Jewish dry measure containing nearly 14 pints.

Sea-ham Harbor, a seaport-town of England, co. of Durham, 6 m. S. of Sunderland; pop. 7,827.

Sea-hedgehog, (*-hēj*), *n.* (*Zool.*) Same as SEA-URCHIN, *q. v.*

Sea-hen, *n.* (*Zool.*) The guillemot. See URINÆ.

Sea-holly, *n.* (*Zool.*) The porpoise.

Sea-holly, *n.* (*Bot.*) See ERINGO.

Sea-home, or **Se'home**, in *Washington*, a village of Whatcom co., 5 m. S. of Whatcom.

Sea-horse, *n.* (*Zool.*) A popular name of the morse or walrus. See MORSE.—Also, the common name of the HIPPOCAMPUS, *q. v.*

(*Anat.*) See HIPPOCAMPI.

Sea-horse Island, a group in the Arctic Ocean, off the coast of Alaska; Lat. 71° N., Lon. 159° W.

Sea-horse Point, in *British America*, a promontory in the E. of Southampton Island, in Hudson Bay; Lat. 63° 40' N., Lon. 80° 10' W.

Sea-kale, *n.* (*Bot.*) See CRAMBE.

Sea-kings, *n. pl.* A name given to the Scandinavian sea-rovers, or Norse pirate-chiefs, who infested the European coasts in the 8th and 9th centuries; the VIKINGS, *q. v.*

Seal, *n.* [*A. S. sigel, sigl*, from Lat. *sigilla*, dimin. of *signum*, token.] An impression made on paper, clay, wax, or other substance, by means of a die of metal, stone, or other hard material. The stamp which yields the impression is frequently itself called the seal. The use of seals may be traced to the remotest antiquity. The Bible contains frequent allusions to them, and their use has been common in all the European states from the earliest historical periods. In modern times the seal has lost the power of acting as a substitute for signatures, and is now only affixed to legal instruments so as to furnish evidence of their authenticity.

[*A. S. seol, seoll*.] (*Zool.*) The family Phocidæ, or Seal tribe, are, of all four-limbed mammiferous animals, those which display the most complete adaptation to residence in the water. The seal has considerable resemblance to a quadruped in some respects, and to a fish in others. The head is round, and the nose, which is broad, resembles that of a dog, with the same look of intelligence and mild and expressive physiognomy. It has large whiskers, oblong nostrils, and great black sparkling eyes. It has no external ears, but a valve exists in the orifices, which can be closed at will, so as to keep out the water; the nostrils have a similar valve; and the clothing of the body consists of stiff glossy hairs, very closely set against the skin. The body is elongated and conical, gradually tapering from the shoulders to the tail. The spine is provided with strong muscles, which bend it with considerable force; and this movement is of great assistance to the propulsion of the body. Although in most of the foregoing particulars the seal resembles the quadruped kind, it greatly differs from all of them with respect to its feet; for, though furnished with the same number of bones as in quadrupeds, they are united to the body in such a singular manner, and so covered with a membrane, that they would rather resemble fins than feet, did not the sharp strong claws with which they are pointed show their proper analogy. The limbs, in fact, are converted into oars and paddles. The anterior pair have the arm and fore-arm so short, that little more than the paw advances from the body. The hinder limbs are directed backwards, so as almost to seem like a continuation of the body; the thigh and leg are very short, and the foot is formed on the same plan as the

fore-paw,—the toes being in contact, however, and the web folded, when it is not in use as a paddle, but being spread out when the animal is swimming. When on land, or on masses of ice, the movements of the seal are particularly awkward, its body being forced onward by the action of the fore-limbs only, and the wriggling motion of the abdominal muscles; they accordingly seldom venture from the shore, but usually bask on the rocks; and when disturbed, plunge immediately to the

Fig. 2329. — COMMON SEAL, (*Phoca vitulina*.)

bottom of the water. The seals live in herds, more or less numerous, along the shores of the sea; and upon uninhabited coasts they bring forth and suckle their young, and exhibit the most tender solicitude for their welfare. They are easily tamed, become strongly attached to their keepers, recognize them at a distance, and seem to be endowed with a very considerable share of intelligence. The form of their teeth and jaws shows them to be carnivorous; and their food consists of fish, crabs, and sea-birds, which they are enabled to surprise while swimming. Seals swim with great rapidity and ease; and by a peculiar arrangement of their blood-vessels, nearly similar to that which exists in the whale tribe, they can remain under water for a considerable time. There are many species of these animals; some are found in almost every quarter of the globe, but chiefly in the frigid or temperate regions. These animals produce two or three young at a time; and they suckle them for six or seven weeks, generally in the cavernous recesses of rocks, after which they take to the sea. The young are remarkably docile; they recognize and are obedient to the voice of their dams amidst the numerous clamors of the flock, and mutually assist each other when in danger or distress. Thus early accustomed to subjection, they continue to live in society, hunt and herd together, and have a variety of cries by which they encourage or pursue, express apprehension or success. When incited by natural desire, however, their social spirit seems to forsake them; they then fight most desperately; and the victorious male always keeps a watchful eye over those females whom his prowess has secured. In some of the species there is a remarkable disproportion in the sexes; and some also are far more pugnacious than others. The common seal, *Phoca vitulina* (Fig. 2329), abundant in the cool and frigid regions, is 3 to 5 feet long, and is much hunted for its skins, and for its oil and flesh. The skins, though their covering is hair, not fur, are much valued. The harp-seal (*P. groenlandica*) is abundant on the Arctic coasts of Europe and America, and is killed in great numbers for its oil and skins. It is a very gregarious species, breeding on ice floes in the spring. There are several other species in the North Atlantic, while some species extend to the tropics. The sea-elephant, or elephant-seal (*Macrorhinus leonina*), occurs in the Antarctic seas. It is of great size, from 20 to 25 feet long, and yields a large quantity of oil. There is another species of sea-elephant, formerly abundant on the coasts of California and Mexico, while two species of Antarctic seals are known as sea-leopards. There is a second family of the Pinnipedia known as the Otariidæ, or sea-lions and sea-bears, the former having only long coarse hair, while the latter have in addition a short, soft and delicate fur, which, under the name of seal-skin, is highly valued in commerce. The sea-lions are found on both coasts of the Pacific from California and Japan northward, and there is an Antarctic species. The southern fur seals have been nearly exterminated. The celebrated northern species (*Callorhinus ursinus*), which yields the valuable seal-skin of commerce, is confined to the North Pacific, breeding only on two of the Pribylov Islands, in Bering Sea, and two of the Commander Islands, further west. See FURRIERY.

v. a. (*imp.* and *pp.* SEALED.) (*seal*). To fasten with a seal; to attach together with a wafer or with wax; as, to seal a letter.—To set or affix a seal to, as a mark of authenticity; to ratify; to confirm; to establish; as, to seal a deed or proclamation.

"This hand, by thee to Romeo seal'd." — Shaks.

—To mark with a stamp, as an evidence of standard exactness, legal size, or merchantable quality; as, to seal weights or measures.—To shut or keep close; to secure; to make fast; as, to seal one's tongue to silence.

(*Arch.*) To fix, as a piece of wood or iron in a wall, with cement, plaster, or other binding, for staples, hinges, or the like.

Seal, in *Ohio*, a township of Pike co.

Sea-language, *n.* The peculiar language or phraseology current among seamen.

Sealed, (*seald*), *p. a.* Confirmed; ratified; closed; as, among the Mormons, a woman sealed as wife to an elder.

Sea-legs, *n. pl.* Legs able to maintain the equilibrium of the body they support, during the rolling or pitching of a ship in a heavy sea; as, to bring one's sea-legs into service.

Seal-engrav'ing, *n.* (*Fine Arts.*) The art of engraving gems for seals.

Sea-leopard, (-lěp'ard,) *n.* (Zool.) A spotted seal found in the South Orkneys, and other very southern islands.

Sealer, *n.* One who seals.

Sea-letter, **Sea-brief**, *n.* The customary certificate of national character which neutral merchant-vessels are bound to carry in time of war; a passport.

Sea-level, *n.* The level of the surface of the sea.

Sea-life, *n.* A nautical or naval life or career.

Sea-light, *n.* The light proceeding from the lantern of a light-house, which enables the mariner to judge of his position during the night, when sailing near a coast.

Sealing, *n.* Act of affixing a seal, as to a deed or document.

—[From *seal*, the animal.] Operation of taking seals, and curing their skins.

Sealing-wax, *n.* The wax used for sealing letters, legal instruments, &c.—The best receipt for the manufacture of this substance is that given by Lowig, and consists in melting, at a gentle heat, 48 parts of shellac, 12 of Venice turpentine, and 1 part of balsam of Peru, and incorporating with them 36 parts of the best vermilion. The introduction of gummed envelopes has to a great extent superseded the use of sealing-wax.

Sea-lion, *n.* (Zool.) A name given to several species of seals, especially to those which have a mane on the neck of the male, as the *Phoca jubata* of the Pacific.

Seal Island, in British America, 18 m. W. of Cape Sable in Nova Scotia.

Seal Islands, or **LOBOS ISLANDS**, a group in the Pacific, 12 m. W. of Peru; Lat. 6° 29' S., Lon. 80° 53' W.

Seal Islands, a group in the Atlantic, off the coast of Maine, S.W. of Grand Menan Island; Lat. 44° 29' N., Lon. 67° 5' 30" W. One of the W. islands has 2 fixed lights, 140 feet apart, and 59 feet above high-water.

Seal River, in British America, flows into the Hudson from the W., abt. 40 m. N.W. of Churchill River, after a N.E. course of 200 m.

Seam, (*seem*), *n.* [A. S., from *siwian*, to sew, to patch; Icel. *saumr*; Ger. *saum*.] The suture or uniting of two edges of cloth by the needle; as, to rip a *seam*.—Hence, the suture, joint, or line of juncture of planks in a ship's sides or deck;—also, the interstices between the edges of boards or planks in a floor; as, to caulk the *seams* of a ship.

(*Geol. and Mining*.) A thin layer which separates thicker strata; as, *seam* of coal.—A cicatrix or scar; as, a *seam* across one's cheek.

—*v. a.* To unite by a seam; to sew together or otherwise unite; as, to *seam* a shirt.—To *sear*; to mark with a cicatrix.

"Say, has the small-pox *seam'd* her face?"—*Swift*.

—To make to resemble a seam, as in knitting a stocking;—hence, to knit with a certain stitch, like that in such knitting.

—*n.* [A. S.; Fr. *somme*, from Gr. *sagma*.] A denomination of weight or measurement; as, a horse-load of timber, usually about 3 cwt.; the quantity of 8 bushels of grain; the quantity of 120 lbs. of glass.

Sea-maid, *n.* A sea-nymph. See **MERMAID**.

Seaman, *n.*; *pl.* **SEAMEN**. [A. S. *seamann*.] A sailor; a mariner; one who follows the sea as a profession or for a livelihood; one skilled in navigation or seamanship; as, an able *seaman*, an ordinary *seaman*.

—A **MERMAN**, *q. v.*

Seamanship, *n.* Art, or skill in the art, of working, managing, or sailing a ship; art or skill practised by a good seaman; as, to pass an examination in *seamanship* before being rated as an officer.

Sea-mark, *n.* An elevated object on land which serves as a direction to mariners in entering a harbor, or in sailing along or approaching a coast; a beacon; a land-mark visible from the sea.

Seam-blast, *n.* A blast caused by putting gunpowder into seams of rocks or strata.

Seamed, (*seemd*), *a.* (*Falconry*.) Not in good condition; as, a *seamed* hawk.

Sea-mew, (-mū,) *n.* (Zool.) A name for the gull, derived from the French *Monetta*. See **LAVIDÉ**.

Sea-mile, *n.* A nautical or geographical mile. See **MILE**.

Sea-lace, **Seam'ing-lace**, *n.* A lace used by carriage-makers to cover seams or edges.

Seamless, *a.* Destitute of a seam; as, a *seamless* garment.

Sea-mouse, *n.* (Zool.) See **APHRODITA**.

Seam'presser, *n.* (*Agric.*) A heavy roller to press down newly-ploughed furrows.

Seam'rent, *n.* The rent or separation of a seam or suture.

Seamstress, **Semp'stress**, *n.* (For *semstress*.) [A. S. *seamestre*.] A woman who follows the occupation of sewing; a needle-woman; as, a hard-worked and miserably-paid *seamstress*.

Seamstressy, **Semp'stressy**, *n.* The business or occupation of a *seamstress*.

Sea-mussel, *n.* (Zool.) The *Mytilidae*, a family of molluscs, order *Lamellibranchiata*, comprising aculepha which have the shell equivalved, oval or elongated, and the epidermis thick and dark. They seek concealment, and spin a nest of sand, or burrow in mud-banks. There are more than 100 living, and 250 fossil, species.

Seam'y, *a.* Having a seam, or containing or exhibiting seams; as, the *seamy* side of a coat.

Seam, (*sen*), *n.* A **SEINE**, *q. v.*

Séance, (*sā'ōngs*), *n.* [Fr. from *seoir*; Lat. *sedere*, to sit.] Session; a sitting, as of some public or legislative body.—Operation of undergoing clairvoyance.

Sea-needle, *n.* (Zool.) Same as **GAR-FISH**, *q. v.*

Sea-nettle, *n.* (Zool.) Any medusa which has the property of stinging when touched.

Sean'achie, **Sen'achie**, **Sen'uachy**, *n.*

[Gael.] A bard belonging to a clan among the Scots Highlanders, who preserved and recited on grand occasions the traditions of the former prowess of the sept.

Sea-nymph, (-nīm'f,) *n.* A nymph or goddess of the sea.

Sea-ooze, *n.* The soft mud on, or adjacent to, the sea-shore.

Sea-otter, *n.* (Zool.) See **OTTER**.

Sea-owl, *n.* (Zool.) Same as **LUMP-FISH**, *q. v.*

Sea-pad, *n.* (Zool.) The star-fish.

Sea-pass, *n.* Same as **SEA-LETTER**, *q. v.*

Sea-pie, *n.* (*Cookery*.) A dish made on ship-board, consisting of dough and meat boiled together.

Sea-piece, (-pēs,) *n.* (*Paint.*) A marine picture; a painting representing a scene at sea; as, a *sea-piece* by Stanfield.

Sea-pike, *n.* (Zool.) See **CENTROPOMUS**.

Sea-pincushion, *n.* See **SEA-BARROW**.

Sea-pink, *n.* (*Bot.*) A popular name of the species *Plumbago* growing on the sea-shore.

Sea-plant, *n.* A plant that flourishes in salt water.

Sea-pool, *n.* A pool or small expanse of salt water.

Sea-porcupine, *n.* (Zool.) See **DRODON**.

Sea-port, *n.* A port or harbor near the sea, formed by an arm of the sea, or by a bay or river; a city or town situated on a harbor or haven, by or near the sea.

Sea-poy, *n.* An infrequent orthography of **SEPOY**, *q. v.*

Sea-pye, *n.* Same as **OYSTER-CATCHER**, *q. v.*

Sea-quake, (-kwāk,) *n.* A concussion or upheaval of the sea.

Sear, (*sēr*), *v. a.* [A. S. *searian*; Ger. *verschren*.] To burn to dryness and hardness, as the surface of anything; to expose to a degree of heat that changes the color of the surface, or makes it hard; to cauterize; to make callous or insensible; as, to *sear* flesh with a hot iron.—To dry; to wither.

To *sear up*. To close by cauterizing; to stop by searing; as, "*sear up* those veins of ill humor."—*Temple*.

Sear, **Sere**, *a.* Dry; withered; as, "*meadows dry and sear*."—*Bryant*.

Sear, *n.* The catch in the lock of a gun, by which the piece is held at cock, or half-cock.

Sear-spring. The spring by which the sear catches the cock.

Sea-ra, in Brazil. See **CEARA**.

Searce, (*sērs*), *v. a.* To sift or bolt, as meal. (*R.*)

Search, (*sērch*), *v. a.* [Fr. *chercher*.] To look over, or through, for the purpose of finding something; to explore; to examine by inspection; as, to *search* a house.—To seek; to inquire after, or look for; as, we *searched* for her everywhere.—To probe; to seek the knowledge of by feeling with an instrument; as, to *search* a wound.—To try or put to the test; to examine crucially.—To *search out*. To find by seeking; to seek till discovered; as, to *search out* a citation.

—*v. n.* To make search; to seek diligently; to inquire; to look for; to make inquiry; as, we have *searched* everywhere for it.

—*n.* Act of searching; a seeking or looking for something that is lost, or the place of which is unknown; pursuit for finding; examination; investigation; scrutiny; research; quest; inquiry.

Right of search. (*International Law*.) The right of belligerents, during war, to visit and search the vessels of neutrals for contraband of war. Some powerful nations have, at different times, refused to submit to this search; but all the highest authorities upon the law of nations acknowledge the right in time of war as resting upon sound principles of public jurisprudence, and upon the institutes and practices of all great maritime powers. The duty of self-preservation gives belligerent nations this right; and as the law now stands, a neutral vessel refusing to be searched would from that proceeding alone be condemned as a lawful prize. The right of search, however, is confined to private merchant vessels, and does not apply to public ships of war. The exercise of this right must also be conducted with due care and regard to the rights and safety of the vessels. A neutral is bound not only to submit to search, but to have his vessel duly furnished with the necessary documents to support her neutral character, the want of which is a strong presumptive evidence against the ship's neutrality, and the spoliation of them a still stronger presumption. There may be cases in which the master of a neutral ship may be warranted in defending himself against extreme violence threatened by a cruiser grossly abusing his commission; but, except in extreme cases, no merchant vessel has a right to say for itself, nor any armed vessel for it, that it will not submit to visitation or search, or be carried into a proximate court for judicial inquiry. If, upon making the search, the vessel be found employed in contraband trade, or in carrying enemies' property, or troops or despatches, she is liable to be taken and brought in for adjudication before a prize-court.—The above doctrine has been fully admitted in this country; but the government of the U. States has energetically refused to submit to the right assumed by the English of searching neutral vessels on the high seas for deserters, and other persons liable to military and naval service. This question, yet not specifically settled, was one of the chief causes of the War of 1812. See **PRIZE**.

Searchable, *a.* That may be searched, looked for, or explored.

Searchableness, *n.* State of being searchable.

Searcher, (*sērcher*), *n.* One who, or that which, searches, explores, investigates, or examines; a seeker; an inquirer; a trier.—In the U. States, an instrument employed in the inspection of the quality of butter packed in firkins.—An instrument for probing ordnance in order to discover cavities (if any) in the bore of a gun.

Search'ing, *a.* Penetrating; crucial; trying; close; as, a *searching* cross-examination.

Search'ingly, *adv.* In a searching manner; by close examination.

Search'ingness, *n.* Quality of being searching, close, or inquisitorial.

Search'less, *a.* Inscrutable; eluding search, inquiry, or investigation.

Search'-warrant, *n.* (*Law*.) A warrant granted by a justice of the peace to search for goods stolen, or respecting which other offences have been committed. The warrant is granted on the oath of a credible witness, that he has reasonable cause to suspect the goods to be in the possession and on the premises of a certain individual.

Sear'-cloth, *n.* [A. S. *sār-cládh*.] A cloth or plaster to cover a wound.

Searey (*ser'see*), in *Arkansas*, a N. co.; area, 768 sq. m. It is traversed by the Buffalo Fork of White river. *Surface*, undulating; *soil*, fertile. *Cap.* Marshall. *Pop.* (1897) 10,500.—A township of Phillips co.—A post-village, cap. of White co., 50 m. N.E. of Little Rock. *Pop.* (1897) 1,295.

Searedness, (*sērd'nes*), *n.* State of being seared, cauterized, or hardened; hardness; callousness; insensibility.

Sea-reed, *n.* (*Bot.*) The *Calamagrostis arenaria*, a grass found on sandy sea-shores.

Sea-risk, *n.* Hazard or risk incurred at sea; chance of danger or destruction by sea, or on the sea. See **INSURANCE**.

Sea-robber, **Sea-rover**, *n.* One who robs or plunders on the high seas; a pirate; a sea-rover; a buccaner; a corsair.

Sea-robin, *n.* (Zool.) The Gurnard. See **TRIGLIDÆ**.

Sea-rocket, *n.* (*Bot.*) Same as **CAKILE**, *q. v.*

Sea-room, *n.* Ample space or distance from land, shoals, or reefs, for a vessel at sea to encounter and ride out a gale with safety.

Sea-roving, *n.* Wandering here and there upon the ocean.

Sea-salt, *n.* Common salt evaporated from sea-water.

Searsburg, in *New York*, a post-village of Schuyler co.

Searsburg, in *Vermont*, a post-township of Bennington co., 112 m. S.W. of Montpelier.

Sears'mont, in *Maine*, a post-village and township of Waldo co., 30 m. S.E. of Augusta.

Sears'port, in *Maine*, a post-village and township of Waldo co., 50 m. S.E. of Augusta.

Sears'ville, in *California*, a post-village of San Mateo co., 20 m. W. of San Jose.

Searsville, in *Georgia*, a village of Stewart co., 110 m. S.W. of Milledgeville.

Sea-serpent, *n.* (Zool.) A kind of eel found in the Mediterranean; the snake-eel.—An enormous marine animal, resembling a serpent, said to have been repeatedly seen off the coasts of America and Africa, but generally esteemed to be fabulous.

Sea-service, *n.* Service in the navy, or in ships of war, in distinction from the *land-service*, or military duty on shore or in the field.

Sea-shell, *n.* Any marine shell.

Sea-shore, *n.* The shore or coast of the sea; the strand; the sea-beach; the land that lies immediately adjacent to the sea or ocean.

(*Law*.) All the ground lying between the ordinary limits of high-water and low-water marks.

Sea-sick, *a.* Affected with sickness or nausea caused by the pitching or rolling of a vessel at sea.

Sea-sick'ness, *n.* (*Med.*) A nausea, or tendency to vomit, which varies, in respect of duration, in different persons upon their first going to sea. With some it continues only for a day or two; while with others it remains throughout the voyage. In some persons its violence is prevented by small doses of opium, or by soda-water, or saline draughts in the effervescent state. Liniments and plasters containing opium applied to the pit of the stomach have also been recommended, as mitigating, or even preventing, this most annoying malady. The violence of the attacks not only varies in different individuals at different times, but the same person who escapes in one voyage may suffer severely in another. It almost always ceases on landing, although more or less giddiness may prevail for some hours, the patient when walking feeling as if the earth were rising up under his feet. Infants and aged persons are supposed to possess a comparative immunity from sea-sickness, while as a general rule, women suffer more than men. The immediate or exciting cause of S.-S. is variably attributed to the motion of the vessel, or to the effect produced on the eye by moving objects, and by that sense conveyed to the brain. The use of the bromides, especially bromide of sodium, and hydro-chlorate of cocaine, solution 1 to 1000, are recommended by some.

Sea'side, *n.* The land bordering on the sea; the country adjacent to the sea, or near it.

Sea'side Grape, *n.* (*Bot.*) See **COCCOLOBA**.

Sea-slug, *n.* (Zool.) The *Trochop*.

Sea-snake, *n.* (Zool.) See **HYDROPHIDÆ**.

Sea-snipe, *n.* (Zool.) See **CENTRISCUS**.

Season, (*sē'zn*), *n.* [Fr. *saison*; It. *stagione*, from Lat. *statio*, a standing.] One of the four quarters of the year, viz: Spring, summer, autumn, winter. The seasons are considered as beginning respectively when the sun enters the signs Aries, Cancer, Libra, and Capricorn; so that the *spring* season commences about the 21st of March, *summer* about the 22d of June, *autumn* about the 23d of Sept., and *winter* about the 23d of Dec.

—Hence, a period of the year, as marked by its characteristics of temperature, moisture, natural condition, &c.—Hence, also, a fit, suitable, or proper time; the conve-

nient time; any time, as distinguished from others; as, it was at the height of the London *season*, oysters are in *season*, &c.

—A time of some continuance, but not long; a while; as, I shall not see you for a *season*.

In *season*, in vogue; in good time, or early enough for the purpose.

"The best is but in *season* best."—*Dryden*.

Out of *season*, beyond or not in the proper time, or the usual or appointed time; as, pork is out of *season*; "her grief is out of *season*."—*Phillips*.

—v. a. [*Fr. assaisonner*.] To fit for any use by time or habit; to accustom; to mature; to inure; as, to *season* one's self to a change of climate. —To fit; to prepare; to make suitable or appropriate.

"How many things by *season* *season'd* are."—*Shaks*.

—To prepare for use by drying or hardening; as, to *season* timber. —To render palatable, or to give a higher flavor or relish to, by the addition or mixture of another substance more pungent or pleasant; to spice; as, to *season* meat with herbs and condiments. —Hence, to adapt for enjoyment; to render more agreeable, pleasant, piquant, or delightful. —To give a relish or zest to by something that excites, exhilarates, or animates; to make less dull, rigorous, or severe.

"The proper use of wit is to *season* conversation."—*Tillotson*.

—To temper; to moderate; to qualify by admixture; as, "When mercy *seasons* justice." (*Shaks*.) —To imbue; to tinge; to tincture; to taint; —hence, to impart rudimentary instruction to.

—v. n. To become seasoned or mature; to grow fit for use; to become acclimatized, as the human body. —To become dry or hard by the evaporation of the natural juices, or by being penetrated with other substances; as, well-seasoned timber.

Seasonable, (*se'zn-a-bl*.) a. That comes, happens, or is done in due *season*, in good time, or in proper time for the purpose; opportune; timely; fit; convenient; as, *seasonable* weather, *seasonable* relief, a *seasonable* compliment.

Seasonableness, n. State or quality of being *seasonable*; opportuneness of occurrence; the state of being in good time, or in time convenient or appropriate to the purpose, or sufficiently early; as, *seasonableness* of advice.

Seasonably, adv. In a *seasonable* manner; with due time; in time appropriate or convenient; sufficiently early; as, to tender assistance *seasonably*.

Seasonal, a. Pertaining, or having reference, to the seasons. (R.)

Seasoned, (*se'znd*.) a. Matured; fitted by habit or experience. —Mixed or impregnated with something that gives it relish, zest, or savor; as, *seasoned* meats. —Dried and hardened; as, "*seasoned* timber never gives." (*Herbert*.) —Qualified; tempered; moderated; as, *seasoned* expectations.

Seasoner, n. One who, or that which, seasons, matures, moderates, or imparts a zest or relish; as, content is the best *seasoner* of the mind.

Seasoning, n. That which is added to any kind of food to give it a higher flavor or relish; any piquant or pungent concomitant, as salt, spices, acids, aromatic herbs, &c., served or intermixed with food; stuffing; as, roast goose without *seasoning* loses half of its savor; —hence, something added or mixed to enhance appreciation or enjoyment; as, humor gives a *seasoning* to eloquence.

Seasonless, a. Lacking succession of the seasons.

Sea-star, n. (*Zool.*) Same as STAR-FISH, q. v.

Sea-surgeon, (*-sür'jn*.) n. A surgeon engaged on board ship.

Sea-swallow, n. (*Zool.*) The common Tern (*Sterna hirundo*).

Seat, (*sēt*.) n. [*Lat. sedes*, from *sedeo*, to sit.] That on which one sits; place of sitting; as, a *seat* on the ground. —The place filled by anything, or where anything is situated, resides, or abides; site; situation; station; post of authority; any place where a thing is settled or established; as, "this castle hath a pleasant *seat*." (*Shaks*.) —Something constructed to be sat in or upon, as a chair, bench, stool, sofa, step, &c.; as, a garden *seat*. —That part of a thing giving sitting room for a person or persons; as, the *seat* of a saddle, the *seat* of a sofa, the *seat* of a pair of pantaloons. —A sitting; customary or appropriate place of sitting; as, a *seat* in Congress, a *seat* in a church, a *seat* in a railroad car, &c. —Manner or mode of sitting of a person mounted on horseback; as, he has a loose *seat* in the saddle.

(*Mach.*) A part on which another part rests; as, a valve-*seat*.

—v. a. To place on or in a *seat*; to cause to sit down; as, to *seat* one's visitors. —To place in office, in a post of authority, or a place of distinction; to fix in a particular place, station, or country; to locate; to establish; as, my ancestors were *seated* in Cheshire before the Norman Conquest. —To give a sitting to; to assign a *seat* to; as, to *seat* the members of a church congregation. —To fix; to set firm; to consolidate; as, a *seated* heart. (*Shaks*.) —To repair by giving a new *seat* or bottom to; as, to *seat* a pair of breeches.

Sea-term, n. A nautical phrase; a word or term peculiar to seamen, or smacking of sea-life.

Seating, n. Act of furnishing with a *seat*, or seats; fixing or settling; also materials for seats, as, hair-seating.

Seaside, in Washington, a city on Elliott Bay, on eastern shore of Puget Sound, 150 m. N. of Portland. It has a most excellent harbor, and occupies a position of great beauty. S. was almost destroyed by fire, June 6, 1889, with loss of many millions, and over 60 acres in ruins.

It was promptly rebuilt, and has enjoyed great prosperity. Pop. (1897) about 60,000.

Sea-micorn, n. (*Zool.*) Same as NARWHAL, q. v.

Sea-urchin, n. (*Zool.*) One of the *Echinoids*, or *Echinidae*, an order of *Echinodermata*. They have the body covered with a calcareous crust or shell, of an extremely porous structure, in polygonal plates nicely adapted to each other, and increasing by additions to the edges of each plate, so that the shell may enlarge with the enlargement of the animal, while new plates are also added around the superior orifice. The shell is pierced with rows of holes for the ambulacra, and is externally covered in a living state with a membrane — sometimes very delicate, sometimes thick and spongy — which communicates by many delicate processes with the interior, and unites the bases of all the spines. The spines differ very much in the different genera and species, in their length, strength, number, and arrangement; they are attached to tubercles on the surface of the shell by cup-like bases, capable of working upon the

Fig. 2330.

a, Edible sea-urchin (*Echinus esculentus*); b, portion with spines removed; c, mouth.

tubercles, in the manner of a ball-and-socket joint; and they are moved by means of the connecting membrane so as to be employed in locomotion. In some species, they seem to be the principal organs of locomotion; in others, the ambulacra are so. By means of the spines, some, in which they are few and strong, can walk even on dry ground; others, in which they are minute and very numerous, employ them in burying themselves in the sand. The mouth of the *E.* is situated at the lower orifice of the shell, and is generally furnished with five flat calcareous teeth, moved by a very complex apparatus of bony sockets and muscles. Their food is supposed to consist of small crustaceans and molluscs. They abound in all seas, and seem to have abounded still more in former geological periods.

Sea-ville, in Maine, a former township of Hancock co., 77 m. S.E. of Augusta.

Sea-wall, n. A wall erected to resist encroachments of the sea.

Sea-ward, a. Directed toward the sea.

—adv. Toward, or in the direction of, the sea.

Sea-ware, n. That which is washed ashore by the action of the sea, as sea-weed, &c.

Sea-weed, n. (*Bot.*) The common name of the species comprising the order *Fucaceæ*, q. v.

Sea-worthiness, n. State or quality of being seaworthy, or able to resist the ordinary violence of wind and weather.

Sea-worthy, (*-wur'thŭ*.) a. Fit for a sea-voyage; worthy of being trusted to transport a cargo with safety; as, a *sea-worthy* ship.

Sea-wrack, n. (*Bot.*) See ZOSTERACEÆ.

Sebacæons, (*-bā'shŭs*.) a. [*Lat. sebacæus*, from *sebum*, tallow.] Made, or consisting, of tallow or fat; pertaining or relating to fat.

(*Bot.*) Having the appearance of waxy, tallowy, or greasy substance; as, the *sebaceous* secretions of certain plants.

S. glands or follicles. (*Med.*) A system of minute glands situated under the skin, the object of which is to secrete an oily fluid to lubricate that organ; these glands, though diffused over the whole body, are most abundant about the face and neck. In young people, and particularly among those who pay little or no attention to the state of their digestive organs, the ducts of these sebaceous glands situated on the face frequently become obstructed, from the thick nature of the secretion blocking up their channels, when small red pimples with hard bases and black points form over the face, giving a dissipated and unpleasant appearance to the youthful visage. When one of these pimples is pressed, a little hardened pus is forced out, which being of a spiral shape, with a black or discolored point, has been popularly called a *worm*; the first part exuded, having become dark from exposure, has been supposed to be the head of the animal. As this disfigurement of the countenance proceeds from the secretion of the cuticular follicles becoming too thick and waxy to be exuded, thereby resulting in a crop of hard red pimples, the best, the quickest, and the most effectual remedy is the use of the hot bath, and friction with a rough towel, or what is still better, the employment of the Turkish bath, and shampooing afterwards.

Sebacic Acid, n. [*Lat. sebum*.] (*Chem.*) One of the acids produced during the destructive distillation of fat.

Sebagö, in Maine, a lake of Cumberland co., 12 m. long, and 8 m. in its greatest breadth.

—A post-township of Cumberland co., 55 m. W.S.W. of Augusta.

Sebastian, Dom, King of Portugal, was b. in 1554, and ascended the throne at three years of age, on the death

of his grandfather, John III. Possessed of a romantic disposition and an extravagant admiration of the glories of chivalry, he rashly determined to carry on war against the Moors in Africa, hoping thereby to effect something for Christianity and the fame of Portugal. He accordingly equipped a fleet and an army, which comprised the flower of the Portuguese nobility, and sailed for Africa in 1578, at the age of 23 years. A general engagement soon took place, at Alcacer-el-Xebir, and the ardor of the young king bore him into the midst of the enemy, who were already pouring on the rear of his troops. S. fought with the most determined bravery, while most of his attendants were slain by his side. He at length disappeared; and so complete was the slaughter, that not more than 50 Portuguese are said to have survived this wild and ill-fated expedition. The mystery which involved the fate of this royal warrior led several adventurers to assume his person and his claims, but there seems to be no doubt that he died on the field of battle.

Sebastian (*se-bast'yan*), in Arkansas, a W. co., bordering on the Indian Territory; area, 600 sq. m. Rivers, Arkansas and Poteau. Surface, mountainous in the N.W., elsewhere diversified; soil, generally fertile. Min. Coal. Caps. Greenwood and Fort Smith. Pop. (1897) 41,650.

Sebastian, (*St.*) a celebrated Roman martyr, b. at Narbonne abt. 255. According to the anonymous "Acts" by which his history is preserved (supposed to have been written in the 4th cent., and by some attributed to St. Ambrose), he was a captain in the praetorian guard under Diocletian, and used the facilities afforded by his station to propagate the Christian faith and to succor its persecuted professors. Having refused to abjure his religion, he was tied to a tree, shot with arrows, and left for dead. A Christian woman, seeking his body by night, found him still alive, and cared for him till he was restored; but, having ventured to appear before Diocletian to remonstrate against his cruelty, he was beaten to death with clubs, and his body thrown into a sewer, but afterwards recovered and interred. In the 9th cent. his relics were distributed throughout Christendom as a remedy against the plague. His martyrdom was the subject of many poems and paintings in the Middle Ages; in the latter he is generally represented tied to a tree and pierced with arrows. D. in Rome, Jan. 20, 288.

Sebastian, (*St.*) a fortified frontier city and seaport of Spain, cap. of the prov. of Guipuscoa in Biscay, at the extremity of a low sandy tongue of land, projecting into the Bay of Biscay, 10 m. W. by S. of Fontarabia, and 40 m.

Fig. 2331. — SAINT SEBASTIAN.

E.N.E. of Bilbao. It is defended on the N. by the Castle of Mota, or Monte Urgullo, a rugged cone nearly 400 ft. in height. From its being one of the keys of Spain, its possession has ever been an object of great importance in the contests between the French and Spaniards. Pop. 9,047.

Sebas'tieook River, in Maine, rises in Penobscot co., and falls into the Kennebec River, in Kennebec co., after a S.W. course of 50 m.

Sebas'topol, or SEVASTOPOL, a fortified town and seaport of European Russia, on the W. coast of the Crimea; Lat. 44° 36' N., Lon. 33° 30' E. It stands on a creek, on the S. side of one of the finest bays in the world, the *Etenus* of Strabo, which is defended by strong forts on both sides. Pop. (1897) about 35,400. In 1853 Russia demanded from the Turkish govt. guarantees for the rights of the Greek Christians of Turkey, which the Porte believed to involve an actual abdication of its sovereign rights, and which it therefore refused to concede. This led, in the same year, to the beginning of the *Eastern or Crimean War*, in which France, England, and Sardinia took sides with Turkey, on the ground that the existence of the latter empire, and the equilibrium of political power in Europe, were endangered by Russia. The armies of the Allies effected a landing at the Bay of Eupatoria, Sept. 14, 1854. On their southward march toward S. they encountered the Russian forces, commanded by Prince Menzikoff, on the banks of the Alma. A bloody battle was fought (Sept. 20), in which the Russians were compelled to retreat. On Sept. 25 the British forces seized Balaklava, and on Oct. 9 the regular siege of the southern portion of S. commenced, the Russians having sunk vessels in the entrance to the harbor, and thus rendered the city unassailable by maritime force. On Oct. 25 and Nov. 5, the Russians vainly attempted to annihilate the be-

ing forces in the battles of Balaklava and Inkermann, but afterward confined themselves mainly to the defensive, their frequent sorties being intended more to harass and retard the siege than to relieve the place definitively. Among these conflicts some assumed almost the character of regular field battles; for instance, an unsuccessful attack of the French upon a new redoubt (Feb. 23, 1855), their first assault upon the Malakoff and Redan (June 18), and the battle of the Tchernaya (Aug. 16), in which the Russians, numbering 50,000 infantry and 6,000 cavalry, made a last effort to break the aggressive force of the enemy. The trenches having been driven so near the Russian defensive works that another assault could be ventured, the final bombardment was opened Sept. 5, and lasted for three days. On Sept. 8 the Malakoff and Redan were stormed and taken by the Allies, after a desperate struggle. The Russians, after having blown up their extensive fortifications on the southern shore of the harbor, retreated to the north side, which the Allies never seriously attempted to conquer. The latter, having destroyed the costly docks, arsenals, and ship-yards of *S.*, remained inactive in their camps, and, with the exception of the capture and sack of Kertch, on the Strait of Yenikale, no further feats of arms were accomplished. The forces of the Allies were withdrawn in the summer and autumn of 1856. Though the Allies did not obtain any decided success, Russia suffered immense loss of military prestige, and any further aggression on her part in southern Europe was for a time prevented. By the Peace of Paris (1856) Russia lost the right of navigation on the Danube, besides a strip of territory to the N. of that river, and, also, the unrestricted navigation of the Black Sea. In Nov., 1870, Russia, availing herself of the Franco-Prussian imbroglio, demanded of the Western Powers a revision of the Treaty of Paris, in so far as affects the restrictions placed upon her in the Black Sea.

Sebas'topol, in California, a village of Sierra co., 55 m. N.E. of Marysville. — A village of Sonoma co., 9 m. N.W. of Napa City.

Sebastopol, in Texas, a post-village of Trinity co., 22 m. N.E. of Huntsville.

Se'bat, *n.* The first month of the Jewish civil year, and the eleventh of the ecclesiastical year — from the new moon of February to that of March.

Sebec, in Maine, a post-township of Piscataquis co., 70 m. N.N.E. of Augusta.

Seben'ico, a fortified seaport-town of Austrian Dalmatia, 42 m. S.E. of Zara.

Seb'ewa, in Michigan, a post-township of Ionia co.

Sebewa Creek, in Michigan, enters Grand River from Ionia co.

Sebewa'ing, SIBBEWAING, or SEBAWANING, in Michigan, a post-village and township of Huron co., 28 m. E.N.E. of Bay City.

Se'besten, *n.* (*Bot.*) See CORDIACEÆ.

Sebiferous, *a.* [*Lat. sebum*, tallow, wax, and *ferre*, to produce.] (*Bot.*) Yielding vegetable wax.

Sebnitz, a town of Germany, in Saxony, 22 m. E.S.E. of Dresden. *Manuf.* Linen and paper. *Pop.* 4,000.

Sebo'o, a river of Morocco, rising in the Atlas Mountains, in Fez, and after a W.N.W. course of 160 m., flows into the Atlantic Ocean at Mehadiah.

Sebus'tieh, a village of Palestine, which occupies the place of the ancient SAMARIA, *q. v.*

Secale, (*se-kai'le*), *n.* [*Lat.*] (*Bot.*) A gen. of plants, ord. Gramineæ, allied to Wheat and Barley, and having spikes which generally consist of 2-flowered, rarely of 3-flowered, spikelets. One species, *S. cereale*, is a well-known grain. It has, when in fruit, a roundish-quadrangular spike, with a tough rachis. Its native country, as in the case of the other most important cereals, is doubtful. It has long been cultivated as a cereal plant; and may be considered as naturalized in this country. Its cultivation does not extend so far north as that of barley; but it grows in regions too cold for wheat, and on soils too poor and sandy for any other grain. Its ripening can also be more confidently reckoned upon in cold regions than that of any other grain. But rye succeeds best, and is most productive, in a climate where wheat will ripen. It delights in sandy soils. The varieties of rye are numerous, although much less so than those of other important cereals. Some are best fitted for sowing in autumn, others for sowing in spring. The former kinds (*Winter Rye*) are most extensively cultivated, being generally the most productive. In some places, rye is sown at midsummer, mowed for green fodder in autumn, and left to shoot in spring, which it does at the same time with autumn-sown rye, producing a good crop of small but very mealy grain. Bread made of rye is of a dark color, more laxative than that made of wheat-flour, and, perhaps, rather less nutritious. Rye is much used for fermentation and distillation. Rye affected with Ergot (*q. v.*) is a very dangerous article of food. The straw of rye is tougher than that of any other corn-plant, and is much valued for straw-plait.

Seeaney, (*sē'can-sy*), *n.* A cutting; an intersection, as by a secant.

Se'cant, *a.* [*Lat. secans*, from *seco*, to cut.] Cutting; dividing into two parts; as, a secant line. — *Secant plane*, a plane cutting a surface or solid.

— *n.* [*Fr. sécante*, from *Lat. secans*, *seco*, to cut.] (*Geom.*) A line that cuts another line, whether right or curved, or divides it into parts. In Fig. 2332 the line A B is a secant cutting the curved line C D, and meeting the tangent D B. (*Trigon.*) The line drawn from the centre of a circle through one of the extremities of an arc to meet the tan-

Fig. 2332.
SECANT.

gent at the other extremity; also, the reciprocal of a cosine; as, the secant of an angle.

Secede, (*se-seed'*), *v. n.* [*Lat. secedo* — *se*, apart, and *cedo*, to go.] To go apart; to separate one's self from; to withdraw from fellowship, communion, or association; as, to secede from a religious body; — also, in the U. States, to withdraw, as a State, from the Federal Union.

Seced'er, *n.* One who, or that which, secedes.

(*Ecol. Hist.*) Same as BURGER, *q. v.*

Secern, (*se-sérn*), *v. a.* To distinguish; to separate, as fine from grosser matter.

(*Physiol.*) To secrete; as, to secrete mucus.

Secern'ent, *a.* [*From Lat. secernere.*] (*Med.*) Serving to separate; secreting.

— *n.* (*Med.*) That which tends to secretion. — (*Anat.*) A secreting vessel.

Secern'ment, *n.* Act or process of secreting.

Secesh, (*se-sesh'*), *n.* A cant colloquialism often used collectively in the U. States for those States, or inhabitants of States, who sought to secede from the Federal Union.

Secession, (*se-sesh'un*), *n.* [*Lat. secessio*, from *secedo*.] Act of seceding or withdrawing, particularly from fellowship or communion with; act of departing; departure.

(*Pol.*) The act of a portion of a community (or, in common parlance, of a party in deliberative assemblies,) who separated from connection with the remainder, and endeavored to form a body apart; — especially, in American politics, the act of the so-called *Confederate States* in seceding from the Federal Union. The main argument used in favor of this proceeding was, that the Constitution of 1787, while declaring that "each state retains its sovereignty, freedom, and independence," contains no provision directly qualifying this doctrine by maintaining the inviolability of the Union: and that, consequently, the right of secession is implied in the term *sovereignty*; while the previous articles of Confederation, superseded by the Constitution, had contained the words, "the union shall be perpetual," which it was reasonable to infer had been purposely abandoned. The answer ordinarily made was that the Union was in the nature of a league, implying mutual abandonment of rights in their very nature inconsistent with the nature of such union; and that there was no more occasion to prohibit, expressly, the repudiation by a State of the compact, than to prohibit the secession of a county, a township, or an individual. Threats of secession from the Union had been several times made by the people of States who were dissatisfied with the course of the general government, though the only decided early step in that direction was that taken by South Carolina in 1832, through opposition to the tariff of that year. John C. Calhoun had maintained the right of any State to decide for itself whether an act of Congress was unconstitutional or not, and in 1830 Senator Hayne, of South Carolina, made a powerful speech in favor of the right of a State to nullify an act of Congress. He was replied to by Daniel Webster in the greatest of his speeches. In December, 1832, a State convention in South Carolina declared the tariff recently enacted to be null and void, forbade the collection of duties within the State, and threatened, if interfered with, to secede from the Union. President Jackson's proclamation and vigorous actions put an end to all danger of secession at that time, but the subsequent irritation in the South, in consequence of the anti-slavery agitation, gave rise to renewed threats of secession, particularly after the formation of the Republican party, in 1856, and the evident rapid growth of the abolition sentiment. By 1860 the irritation had enormously increased, and a climax was reached in the election of Abraham Lincoln in that year. South Carolina, determined not to submit to the result of a vote of the people at large which had not been supported by the vote or the sentiment of the people of that State, called a convention at Charleston, and on Dec. 20, 1860, it was declared that "the union before existing between South Carolina and other States, under the name of the United States of America, is dissolved." This act of secession was soon followed by similar acts in other States, Mississippi passing an ordinance of secession Jan. 9, Florida Jan. 10, Alabama Jan. 11, Georgia Jan. 19, Louisiana Jan. 26, and Texas Feb. 1, 1861. Thus, all the southern belt of States had voted to withdraw from the Union. The more northerly belt of slave States were less prompt to act, public opinion concerning the desirability of secession being much less unanimous within their borders. The actual outbreak of war, however, incited them to similar action, Virginia seceding on April 17, Arkansas on May 6, North Carolina on May 21, and Tennessee on June 8. Popular votes were taken on the question of secession in Virginia and Tennessee, the result in the former State being 128,884 for, 32,134 against; in the latter State, 104,019 for, 47,238 against. The border slave-holding States, Missouri, Kentucky, Maryland, and Delaware, failed to join the seceding States, though active efforts were made to carry out Missouri and Kentucky. The first seven of the seceding States called a convention at Montgomery, Ala., and formed a new union under the title of the Confederate States of America, electing as their president Jefferson Davis, of Mississippi, and forming a constitution, based largely on that of the United States. The results of this somewhat precipitate action on the part of the Southern States were hardly what the advocates of secession anticipated. They took the initiative in measures of violence by firing on Fort Sumter, a government work under the protection of the U. S. flag. This insult to the flag, as it was considered in the North, aroused a wave of

indignation that could have but one result. Men sprang to arms in all directions, armies were quickly in the field, and a war began which has scarcely had its equal in the century. It is not our purpose to describe what may, in this connection, be designated the War of Secession. It will suffice to say that the great majority in the North looked upon the action of the South as one of rebellion, the right of secession not being admitted, and a determination to restore the Union in its integrity being the dominant feeling. The superior strength of the North in men and money, its command of the sea, and its almost unlimited resources, could scarcely fail to have but one result — the subjugation of the seceded States. The war was bitter and protracted, both sides fighting with the greatest bravery, but the superior weight of the North gradually told, and step by step its armies made their way into the heart of the seceded States, the South yielding, through utter exhaustion, after four years of war. A new question now arose in the field of American politics. The question of the right to secede had been fought for and decided in the negative. How, and under what regulations, should the seceded States be restored to their places in the Union? This question took as many years for its decision as the war had taken, largely through the opposition that existed between the President and Congress — a condition of affairs which led to more stringent measures than might otherwise have been taken. The final outcome was the adoption of three amendments to the Constitution. The slaves of the States in secession had been emancipated by proclamation of President Lincoln on the 1st of January, 1863. This action was sustained in the thirteenth amendment, which forbade slavery within the limits of the U. S. The fourteenth amendment raised the manumitted slaves to the rank of citizens, and the fifteenth conferred upon them the privilege of the suffrage. Readmission was made dependent upon the acceptance by the seceded States of these several amendments, and they were taken again into the Union on the following dates: Tennessee, July 24, 1866; Arkansas, June 22, 1868; Alabama, Florida, Louisiana, North and South Carolina, June 25, 1868; Virginia, Jan. 26, 1870; Mississippi, Feb. 23, 1870; Texas, March 30, 1870; and Georgia, July 15, 1870.

Seces'sionist, *n.* An advocate of secession.

(*Amer. Hist.*) One who advocates, upholds, or defends the doctrine of State Rights, in respect to withdrawing at will from the Federal Union of States.

Sech'um, *n.* [*From Gr. sekizo*, to fatten in a fold.] (*Bot.*) A genus of plants, order Cucurbitaceæ, represented by *S. edule*, the Chocho or Chayote, commonly cultivated in the West Indian Islands for the sake of its fruit, which is reckoned extremely wholesome, and is commonly used as an article of food by all classes. It has also the reputation of being a very fattening food for hogs and other animals. It is a climbing plant, with smooth stems rising from a very large fleshy root, which sometimes weighs as much as twenty pounds, and resembles a yam both in appearance and its eatable qualities when cooked. The fruit is about four inches in length, oblong, between fleshy and succulent, sometimes furnished with small innocuous prickles, and either green or cream-colored.

Seckel, (*sék'l*), *n.* A small, delicious variety of pear, first noticed near Philadelphia, about 1770.

Seclude, *v. a.* [*Lat. secludo* — *se*, and *claudo*, to shut.] To shut off or out; to shut up apart; to separate, as from company or society, and usually, to keep apart for some length of time, or to confine in a separate state; as, to seclude one's self from the world. — To exclude; to prevent from entering; as, to seclude the entrance of cold.

Seclud'edly, *adv.* In a secluded or retired manner; as, he lives secludedly.

Seclusion'ness, *n.* State of being secluded from society.

Seclusion, (*se-kloo'zhun*), *n.* Act of secluding or of separating from society or connection; state of being secluded, or of being separate or apart; a shutting out; separation; retirement; privacy; as, to dwell in seclusion.

Seclus'ive, *a.* Tending to, or promoting, seclusion; secluding; retiring; sequestering.

Second, (*sék'ond*), *a.* [*Fr.*, from *Lat. secundus* — *sequor*, *secutus*, to follow.] That immediately follows the first; the next following the first in order of place or time; the ordinal of two; as, he shall not insult me a second time. — Next in value, distinction, power, excellence, dignity, or rank; as, a nation second to none. — *Second cousin*, the offspring of a cousin. — *Second Estate*, in England, a denomination given to the House of Peers. — *Second story*, in the U. States, the second tier of rooms from the level of the street; — called in England the *first floor*. — *Second distance*, (*Painting*.) That part of a picture between the fore-ground and back-ground.

— *n.* One who follows or comes immediately after; one next and subordinate in place, time, dignity, &c. — One who supports or maintains another; an assistant; a backer; — especially, one who attends another in a duel to aid him, and see that all proceedings between the parties are fair. — The sixtieth part of a minute of time, or of a degree; as, I will be with you in a second.

Second coat, (*Building*.) The finishing coat of plaster, as inlaid or set, or in rendered or set; or the floating, when the plaster is roughed-in, floated, and set for paper.

(*Mus.*) A musical interval; or, in other words, the distance between any note and the next nearest, whether above or below it. A second may be either *major* or *minor*; — also, the second part, or alto, of a concerted piece; as, to sing a second.

See'ond, *v. a.* [Fr. *second*; Lat. *secundo*, from *secundus*.] To follow in the next place; to succeed; as, "sin is *seconded* with sin." *South*. (R.)—To support; to lend aid to the attempt of; to assist; to forward; to promote; to encourage; to act as the maintainer of; as, he was *seconded* in his efforts.—To express approval; to unite with, or act as a second to, in proposing some measure; as, I beg to *second* the motion.

See'ondarily, *a.* [From *secondary*.] In the second degree or order; not primarily or originally; not in the first intention.

See'ondary, *a.* [Fr. *secondaire*; Lat. *secundarius*.] Following or succeeding next in order to the first; coming after the first; subordinate; inferior; not primary; not of the first order or rate; as, a *secondary* thought, a *secondary* difference.—Acting by deputation or delegated authority; acting in subordination, or as second to another; as, *secondary* power, the work of *secondary* hands, &c.

(*Astron.*) Denoting the satellites with regard to planets, and the planets with regard to the sun, to distinguish them from their respective primaries.

(*Geol.*) A term synonymous with *mesozoic*, and used to designate that large section of the fossiliferous strata which includes the triassic, oolitic, and cretaceous rocks. The appearance of the great types of all subsequent organisms in the secondary rocks, has suggested the grouping of the fossiliferous strata in respect of their fossils into only two great divisions—viz., the Palaeozoic and the Neozoic—this last term including the secondary and tertiary periods.

S. circle. (*Astron.*) A great circle of the sphere perpendicular to another great circle, which is regarded as the *primary*, and they consequently pass through the poles of the sphere.—**S. of the ecliptic**, a circle on which the latitude of a celestial object is measured.—**S. colors**, a color consisting of two primary colors united in equal proportions; thus, blue and yellow produce *green*; blue and red, *violet*; and yellow and red, *orange*; if, however, either primary is in excess, a *gray* tone is produced partaking of the quality of that primary. Thus, blue added in excess to orange, yields *blue-gray* or *olive*; red added to green produces *red-gray* or *russet*; yellow added to violet gives *yellow-gray* or *citrine*. The opposite of the secondary colors are the primaries absent from their composition; thus *blue* is the opposite of *orange* (red and yellow); *red of green* (blue and yellow), and *yellow of violet* (red and blue).—**S. crystal**. (*Min.*) A crystal obtained from one of the primary forms.—**S. evidence**, that which is admitted in default of *prima facie* evidence.—**S. plane**. (*Crystallog.*) Any plane on a crystal other than a primary plane.—**S. planet**. (*Astron.*) A planet revolving about a primary planet.—**S. qualities**, those qualities of substances which are not inseparable from them as such, but rely for their development and intensity on the organism of the perceiver, such as color, odor, &c.—**S. quill**, a quill on a bird's wing arising from the bones of the ulna.

—*n.* One who acts in subordination to another; an auxiliary; a delegate or deputy.

(*Astron.*) A secondary circle; also, a satellite.

(*Zool.*) A quill or large feather on the second bone of the wing of birds.

See'ond-class, *a.* Of second, or inferior, rank or quality; intermediate; as, a *second-class* passenger.

See'onder, *n.* One who seconds or supports what another attempts, affirms, moves, or proposes; as, in the English Parliament, a *second* of an address to the Crown.

Second Fork, in *Pennsylvania*, a post-village of Cameron co., 157 m. N.W. of Harrisburg.

See'ond-hand, *a.* Received from another, or from the first possessor; not new, original, or primary; that has been used by another; as, a *second-hand* article.

—*n.* Possession obtained by transfer from a previous owner.—*At second-hand*, after having been owned, used, or worn; not primarily or originally; as, a story told *at second-hand*.

Secondigliano, (*sa-kon-deel-ya'no*), a town of S. Italy, prov. of Naples, 3 m. N. of Naples; pop. 5,000.

See'ondly, *adv.* In the second place.

Sec'on do, *n.* [It.] (*Mus.*) The second part in a concerted piece.

See'ond-rate, *a.* Of the second order or class; second in size, rank, quality, or value; as, a *second-rate* ship, a *second-rate* scholar.

—*n.* The second order in size, dignity, or value; as, "they call it thunder of the *second-rate*."—*Addison*.

See'onds, *n. pl.* A coarse kind of flour.

See'ond-sight, *n.* The power of intellectual vision; the faculty of seeing things future or distant.

See'ond-sight'ed, *a.* Possessing the faculty of second-sight. (R.)

Se'eor, in *Illinois*, a post-village of Woodford co., 27 m. E. of Peoria.

Se'crecy, (sometimes written *SECRECY*) *n.* State of being secret or hidden; a state of separation; concealment from the observation of others, or from the notice of any persons not concerned; privacy; a state of being hid from view; solitude; seclusion; as, to act with *secrecy*.—Quality of being secret or secretive; act or habit of keeping secrets; forbearance of disclosure or discovery; fidelity to a secret; as, he was pledged to *secrecy*.

Se'cret, *a.* [Fr.; Lat. *secretus*, from *secerno*—*se*, and *cerno*, to discern, perceive.] Separate; put apart; removed or kept apart from the notice or knowledge of all persons except the individual or individuals concerned; secluded; retired; private; not apparent; unseen; as, he was sent on a *secret* embassy.—Hidden; concealed; kept, or such as ought to be kept, from general knowledge or solution; occult; not revealed; as, a

secret understanding.—Not disposed to divulge or betray confidence; reticent; secretive. (R.)

—*n.* [Fr.; Lat. *secretum*.] Something studiously hidden or concealed; something kept from general knowledge; as, to tell a *secret* to a woman is to publish it abroad.—Something not discovered, and therefore unknown; as, the *secrets* of the deep.

—*pl.* The parts which modesty and propriety require to be concealed; the genital organs.

(*Ecc.*) In the Roman Catholic Church, one of the prayers of the Mass (*q. v.*) of the same general form with the "Collect," but recited by the priest in so low a voice as not to be heard by the people, whence the name *secreta* is derived. It follows immediately after the obliteration of the Eucharistic bread and wine.

In *secret*, in privacy, or secrecy; in a state or place not seen or noticed; privately; as, she had long loved him *in secret*.

Secreta'rial, *a.* Pertaining, or relating, to a secretary, or to his duties; as, *secretarial* training.

Carlyle.

Secreta'riat, **Secreta'riate**, *n.* The office or place wherein a secretary pursues business.

See'retary, *n.* [Fr. *secrétaire*; It. *segretario*; L. Lat. *secretarius*—*secretus*.] One who keeps, or is intrusted with, secrets. (R.)—A person employed by a public body, a company, or an individual, to write orders, letters, despatches, records, public or private papers, or the like; an official writer; an amanuensis; as, a private *secretary*.—A public official whose business it is to superintend and manage the affairs of a particular department of government; as, a *secretary* of state, the *secretary* of the treasury, &c.—An *escritore*.

See'retary-bird, or SERPENT-EATER, *n.* (*Zoöl.*) A bird of prey, genus *Gypogonyx*, variously placed by naturalists among the *Falconidae* and the *Vulturidae*. The best-known species is an inhabitant of the arid plains of South Africa. It is about three feet in length; the plumage bluish-gray. It has an occipital crest of feathers without barbs at the base, which can be raised or depressed at pleasure, and the name *Secretary* was given to it by the colonists at the Cape of Good Hope from their fancied resemblance to pens stuck behind the ear. It feeds chiefly on reptiles of all kinds, which it devours in great numbers, and is so highly valued on account of the constant war which it wages against serpents, that a fine is inflicted in the Cape Colony for shooting it.

See'retaryship, *n.* Office or employment of a secretary.

Secrete', *v. a.* [Lat. *secerno*, *secretus*.] To put aside or apart; to hide; to conceal; to remove from observation, or the knowledge of others; as, to *secrete* stolen goods.

(*Physiol.*) To separate, as substances from the blood in animals, or from the sap in vegetables; to secrete.

Secretion, (*se-kre'shun*), *n.* [Lat. *secretio*.] The act or process of secreting.—The matter secreted.

(*Physiol.*) The process by which materials are separated from the blood, and from the organs in which they are formed, for the purpose either of serving some ulterior office in the animal economy, or of being discharged from the body as excrement. *S.* is one of the natural functions of the living body, and is as necessary to health as nutrition. Where the secreted materials have some ulterior purpose to serve, they are known as *secretions*; where they are discharged from the body, *excretions*. Most of the *S.* seem to consist of substances not preëxisting in the same form in the blood, but requiring special organs and process of elaboration for their formation. Excretions, on the other hand, commonly or chiefly consist of substances existing ready formed in the blood, and are merely extracted therefrom. In general, however, the structure of the parts engaged in eliminating excretions is as complex as that of the parts concerned in the formation of *S.* The *S.* may be arranged into three sorts:—1, exhalations; 2, follicular *S.*; and 3, glandular *S.* The exhalations take place as well within the body as at the skin, or in the mucous membranes, and are thus divided into *external* and *internal*. The follicles are divided into mucous and cutaneous, and into simple and compound. In almost all the points of the skin little openings exist which are the orifices of small hollow organs with membranous sides, generally filled with an albuminous and fatty matter. The consistence, color, odor, &c., are variable, according to the different parts of the body, and which is continually spread upon the surface of the skin, rendering it less impervious to moisture, &c. The small organs are called the *follicles of the skin*. The glands, however, are the principal organs to which the office of secreting is more especially ascribed, and the number of them is considerable. The glandular *S.* are of seven different sorts, namely, *tears*, *saliva*, *bile*, *pancreatic fluid*, *urine*, *semen*, and *milk*.

(*Bot.*) In consequence of the action of air and light upon the watery contents of the green leaves of plants, the materials within them are subjected to a very active chemical condition, by which various substances are formed,—as protein matters, gum, sugar, starch, &c., all of which are essentially necessary to the growth of the plant. Besides these are other matters, such as coloring substances, numerous acids, various alkaloids, &c., which, after their production, perform no further active part in the plant, and are hence removed from the young and vitally active parts to be stored up in the older tissues of the plants as *secretions*, or removed altogether from them as *excretions*.

Secretitious, (*-tish'us*), *a.* Separated by animal or vegetable secretion.

Secretive, *a.* Having a tendency to secrete, or to

keep hidden or private; as, a person of *secretive* disposition.

Secretiveness, *n.* Quality of being secretive; disposition to keep secret or conceal.

Se'cretly, *adv.* In a secret manner; privately; privily; not openly or overtly; without the knowledge of others; inwardly; innately; latently; not apparently or visibly; as, give him this letter *secretly*, I have a grudge *secretly* against him.

Se'cretness, *n.* State of being secret, or of being hid or concealed.—Quality of keeping a secret; secretiveness.

Se'cretory, *a.* Secreting; performing the function of secretion; as, the *secretory* vessels.

Seet, *n.* [Fr. *secte*; Lat. *secta*, from *seco*, *sectus*, to cut.] A cutting; a section. (R.)—Hence, a body of persons separated or cut off from the established religion of a country; or a body or number of persons united in tenets, chiefly in philosophy or religion, but constituting a distinct party by holding sentiments different from those of other men.

Seeta'rian, *a.* Pertaining, or relating, to a sect, or to sects; peculiar to, or characteristic of, a sect or sects; as, *sectarian* theology.

—*n.* A member of a sect; one of a party in religion which has separated itself from an established church, or which holds tenets different from those of the prevailing denomination in a kingdom or state; also, a member or adherent of a special school of philosophy.

Secta'rianism, *n.* State or quality of being sectarian; disposition to dissent from an established church or predominant school of philosophy, and to form new sects; excess of partisan or denominational enthusiasm.

Secta'rianize, *v. a.* To imbue with sectarian zeal.

Seet'arist, *n.* A secretary. (R.)

Seet'ary, *n.* [Fr. *seculaire*.] A sectarian; a follower, adherent, or disciple of some particular teacher in religion or philosophy;—hence, one who dissents from an established religion; as, "anabaptists, separatists, and *seet'arists*."—*Bacon*.

Seet'ile, *a.* [Lat. *sectilis*.] That may be cut or divided. (*Min.*) Capable of being cut in slices with a knife, as certain mineral bodies.

Seet'inole, *a.* A small or petty sect. (R.)

Section, (*sek'shun*), *n.* [Fr.; Lat. *sectio*—*seco*, *sectus*, to cut off.] Act of cutting or dividing, or separating by cutting; as, the *section* of bodies.—A part kept aside from the rest; a division; a separate portion; as, specifically, a distinct part or portion of a book or writing; an article; a sub-division of a chapter; a paragraph;—hence, the character $\frac{1}{2}$, frequently employed to point out such division.—A distinct part of a city, town, country, or people; a part of territory separated by geographical lines or physical peculiarities, or of a people considered as distinct.—One of the portions, of one square mile each, into which the U. S. public lands are divided; the one thirty-sixth part of a township.—The representation of an object, as a building, ship, machine, stratum, &c., cut asunder vertically, so as to show the interior or profile; the projection or geometrical representation of a building or other object, supposed to be cut through, so as to exhibit its internal configuration.

(*Geom.*) In applied geometry, the surface formed when a solid is cut by a plane. In the theory of surfaces, the curve in which one surface is cut by another.

(*Mil.*) Half a platoon of infantry.

(*Mus.*) A division of a musical period, composed of one or more phrases.

—*pl.* (*Ship-building*.) Vertical planes at right angles to the keel, taken at any part of a vessel's length to assist the builder. The *body-plan* represents a collection of these sections developed on the largest of them all, the *midship section*.

Sectional, *a.* Pertaining, or relating, to a section, or distinct part of a larger body or territory.

Sectionalism, *n.* An American term, denoting a feeling of peculiar interest in some one section of a country, &c.

Sectionality, *n.* State or quality of being sectional.

Sectionally, *adv.* In a sectional manner.

Sectionize, *v. a.* To divide or form into sections. (R.)

Section Ten, in *Ohio*, a township of Van Wert co.

Sect'ism, *n.* The spirit or ruling principle of sectarianism. (R.)

See'tor, *n.* [Fr. *secteur*; Lat. *sector*, from *seco*, *sectus*.] (*Math.*) An instrument so marked with lines of sines, tangents, secants, chords, &c., as to adapt itself to all radii and scales. Its principal advantage consists in the facility with which it gives a graphical determination of proportional quantities;—hence, it is called by the French the *compass of proportion*.

(*Astron.*) An instrument constructed for the purpose of determining with great accuracy the zenith distances of stars passing within a few degrees of the zenith, where the effect of refraction is small.

(*Geom.*) The figure bounded by two radii and the intercepted arc;—otherwise called the *sector of a circle*. Sectors of different circles are said to be *similar* when the sides or radii include equal angles. The area of a sector is equal to that of a triangle whose base is equal to the length of the contained arc, and whose altitude is equal to the radius of the circle. In Fig. 606 the radii OD and OE, with the arc CE, form a sector.

Dip sector, an instrument which serves to measure the dip of the horizon.—*Spherical sector*, the solid generated by the revolution of the sector of a circle about one of its radii, or about a straight line drawn in the plane of the sector through its vertex.

See'toral, *a.* Pertaining, or relating, to a sector; as, a *see'toral* circle.

Secto'rial, *a.* Incisory; adapted for cutting;—*said* of a certain form of teeth.

Secular, *a.* [Fr. *seculaire*; Lat. *secularis*—*seculum*, an age or generation.] Occurring or observed once in an age, century, or cycle; as, a *secular* year.—Pertaining, or relating, to an age, generation, or period of time; as, *secular* inequality.—Pertaining, or having reference, to this present world, or to things not spiritual or holy; relating to things not primarily or immediately affecting the soul; worldly; temporal; as, *secular* power, *secular* affairs.

(*Eccl.*) In the Roman Catholic Church, not regular; not bound by monastic vows or rules; not confined to a religious house, or subject to the rules of a clerical community; as, a *secular* priest.

—*n.* An ecclesiastic not bound by monastic rules;—hence, a layman.

Secularism, **Secularity**, *n.* [Fr. *secularité*.] State of being secular; worldliness; supreme attention to the things of the present life; a secular spirit.

Secularization, *n.* [Fr. *secularisation*.] Act of secularizing, or the state of being secularized; conversion from spiritual appropriation to common or secular use, as of a church or church property; converting a religious person, place, or benefice, into a secular one.

Secularize, *v. a.* [Fr. *seculariser*.] To convert from regular or monastic into secular or lay; as, to *secularize* a priest.—To convert from spiritual appropriation to secular or common uses; as, to *secularize* church property.—To make worldly or unspiritual.

Secularly, *adv.* In a secular or worldly manner.

Secularness, *n.* Quality of being secular; worldliness.

Secund, *a.* [From Lat. *secundus*.] (*Bot.*) Arranged on one side of a stalk only, as leaves.

Secundate, *v. a.* To give prosperity or success to. (*R.*) **Secunderabad**, a town of India, an important British military station in the Deccan, 3 m. N. of Hyderabad, and 358 N.N.W. of Madras; Lat. 17° 36' N., Lon. 78° 33' E. Pop. 35,000.

Secundine, *n.* [Fr. *secondine*.] (*Bot.*) The outermost but one of the enclosing sacs of the ovulum, immediately reposing on the primine.

(*Obstet.*) The after-birth;—generally used in the plural.

Securable, *a.* That may be secured.

Secure, *a.* [Lat. *securus*—*se*, or *sine*, and *cura*, cure; Fr. *sûr*.] Free from care or solicitude; free from fear or apprehension; having confidence of safety; not alarmed or disturbed; easy in mind; without feeling suspicion or distrust; as, *secure* of soul.—Careless; heedless; without caution or vigilance; over-confident;—used in a bad sense.—Confident in opinion; sure; certain; not doubtful or doubting;—frequently with *of*; as, *secure* of a discharge.—Free from danger; safe;—expressed in relation to persons or things, and preceding *from* or *against*; as, *secure* from poverty.

—*v. a.* To free from solicitude, fear, or danger; to guard or protect effectually from jeopardy; to make safe; as, to *secure* from conquest.—To make certain; to put beyond hazard of loss or non-appropriation; to guarantee, assure, or insure; as, he is *secured* against accidents.

—To inclose or confine effectually; to guard effectually from escape; to make fast; to fasten;—sometimes, to seize and confine; as, to *secure* a prisoner, to *secure* one's door by bolts or bars.

—To make one's self master of; to acquire or get possession of; as, to *secure* a property.

To *secure* arms. (*Mil.*) To hold a musket or rifle muzzle down, the lock being well up under the arm, and the barrel toward the ground, the object being to guard the piece from getting wet.

Securely, *adv.* In a secure manner; without hazard or danger; safely; without fear or apprehension; carelessly; in an unguarded manner; in confidence of safety.

Secureness, *n.* State of being secure; security;—also, want of vigilance or caution; over-confidence.

Securer, *n.* One who, or that which, secures, defends, or protects.

Securidaca, *n.* [Lat. *securis*, a hatchet.] (*Bot.*) A genus of plants, order *Polygalaceae*, chiefly inhabiting tropical America, where many species ramble to a great height over other trees, and are beautiful objects when in flower. The Buaze fibre-plant, spoken of by Dr. Livingstone, is the *S. pallida*.

Securiform, *a.* [Fr. *securiforme*.] Hatchet-shaped.

Security, *n.* [Fr. *sécurité*; Lat. *securitas*; Span. *seguridad*.] State or condition of being secure; as, (1.) Freedom from solicitude, apprehension, danger, or care; a being confident of safety.—(2.) Hence, occasionally, carelessness; negligence; over-confidence; want of vigilance.—(3.) Freedom from risk; safety; as, the *security* of a country from invasion.—That which secures, guards, protects, or defends;—hence, specifically, anything given or deposited to secure the payment of a debt, the performance of a contract, or the fulfilment of an obligation; surety; guarantee; a pledge; something given or done to secure peace or good behavior.—Also, one who becomes bond or surety for another's debt or obligation; as, they fell back on his *security*.—An evidence of debt or proof of property, as a bond, coupon, dehenture, certificate of stock, &c.;—generally in the plural; as, government *securities*.

Sedaia, in *Missouri*, an important city, cap. of Pettis co., 64 m. W. of Jefferson City. Pop. (1897) 22,500.

Sedan, (*se-da'*) a fortified town of France, dept. of Ardennes, on the Meuse, 10 m. E.S.E. of Mézières. *S.* has been long celebrated for its woollen manufactures, consisting principally of fine black cloths and cassimeres. Pop. 15,500.—Here, Sept. 1–2, 1870, a battle was fought between the French, under Napoleon III., and the Prussians, under King William and the Crown-Prince, in which the former being defeated, the Emperor, while

still at the head of an army of more than 100,000 men, surrendered himself and his troops, along with the strong and well-appointed fortress of *S.*, to the Prussians. On the occasion of this act, happily unparalleled in modern history, the French people stigmatized Napoleon III. by this parody of the famous and noble words of Francis I.: *Nothing lost, but honor!*

Sedan, *n.* [From *Sedan*, in France, whence it first originated.] A kind of litter, or palanquin, for carrying a single person, borne on poles, and carried by two men;—also called *Sedan-chair*.

Sedate, *a.* [Lat. *sedatus*, from *sedo*, *sedeo*.] Composed; calm; quiet; tranquil; still; serene; unruffled; undisturbed; free from agitation, disturbance, or passion; sober; serious; grave; contemplative; as, a *sedate* mind, *sedate* manners.

Sedately, *adv.* Calmly; in a sedate manner; without mental agitation.

Sedateness, *n.* State or quality of being sedate; calmness of mind, manner, or countenance; freedom from agitation, disturbance, or passion; a settled state; composure; serenity; tranquillity; as, *sedateness* of temper, *sedateness* of conversation.

Sedative, *a.* [Fr. *sédatif*, from Lat. *sedo*.] Tending to settle, allay, or assuage; moderating; mollifying irritability; deadening pain; as, a *sedative* draught.

(*Med.*) An agent which produces a direct depression of the action of the vascular system with little sensible evacuation. Inasmuch as their depressing effects are not preceded by any obvious excitement or increased movement of the heart or arteries they differ from narcotics. It is not clearly ascertained whether they act primarily on the heart itself, or by a previous influence on the nervous system. The medical employment of sedatives should be had recourse to under competent medical authority and superintendence.

Sedburgh, (*sed'burg*), a town of England, co. of York, 65 m. W. of York. Manuf. Cotton goods. Pop. 5,000.

Sedent, *a.* [Lat. *sedens*, from *sedere*, to sit.] Sitting; inactive; in repose; quiet. (*R.*)

Sedentarily, *adv.* In a sedentary manner.

Sedentarieness, *n.* State or quality of being sedentary.

Sedentary, *a.* [Fr. *sédentaire*, from Lat. *sedeo*, to sit.] Accustomed to sit much, or to pass most of the time in a sitting posture; as, a *sedentary* individual.—Necessitating much sitting; as, a *sedentary* occupation.—Passed for the most part in sitting; as, a *sedentary* life.—Inactive; motionless; torpid; sluggish; as, *sedentary* passions.

Sederunt, *n.* [Lat., they sat.] A sitting, as of a court or legislative assembly.

Sedge, (*sej*), *n.* [A. S. *secg*.] (*Bot.*) See *CAREX*.

Sedger, or **SAN JUAN**, a river of Patagonia, which flows into Port Famine in the Strait of Magellan.

Sedgwick, in *Maine*, a post-township of Hancock co., 60 m. S.E. of Augusta.

Sedilium, *n.*; *pl.* *SEDILIA*. [Lat., a seat.] (*Antiq.*) One of a tier of seats in a Roman amphitheatre.—Hence, one of the stone seats on the S. side of the altar in Catholic churches, and which are used by the priest, deacon, and sub-deacon in the interval of church service. The sedilia of the Middle Ages, if designed for important uses, were generally highly enriched with painting and gilding, particularly such as were designed for high clerical dignitaries. Fig. 2334 represents a beautiful example of the 15th century, which was made for the use of the burgomaster in the old town hall at Erfurt.

Sediment, *n.* [Fr.; Lat. *sedimentum*, from *sedeo*, to settle down.] That which subsides and settles at the bottom of liquor; settlings; lees; dregs.

Sedimentary, *a.* Pertaining to sediment; formed by lees; consisting of matter that has subsided.

Sedimentary rocks. (*Geol.*) Rocks formed of materials thrown down from a state of suspension or solution in water.

Sedition, (*se-dish'un*), *n.* [Fr.; Lat. *seditio*—*se*, and *itio*, from *eo*, *itum*.] A factious commotion of the people, or a tumultuous assembly of men rising in opposition to law, or the administration of justice; a local or limited insurrection in opposition to civil authority; treason without overt action.

Seditious, *a.* One who incites or promotes sedition.

Seditious, (*-dish'us*), *a.* [Fr. *séditieux*.] Pertaining or relating to, or partaking of the nature of, sedition; as, *seditious* proceedings.—Having tendency to incite or arouse sedition; as, *seditious* language, *seditious* writings.—Factions; turbulent; rebellious; tumultuous; riotous; disposed to excite violent or irregular opposition to law or lawful authority; guilty of sedition; as, a *seditious* demagogue.

Seditiously, *adv.* In a seditious manner.

Seditiousness, *n.* Quality of being seditious; disposition to excite popular commotion in opposition to law or lawful authority; factious turbulence.

Sedlitz, *n.* See *SEIDLITZ*.

Seduce, *v. a.* [Lat. *seduco*—*se*, and *duco*, to lead; Fr. *séduire*.] To lead or draw aside from the path of duty or rectitude in any manner, by flattery, promises, bribes, or otherwise: to present temptations to, and lead to iniquity; to entice; to allure; to attract; to inveigle; to mislead; to decoy; to corrupt.—To present temptations to, and lead to a surrender of chastity; as, to *seduce* a woman.

Seduce'ment, *n.* Act of seducing; seduction; the means employed to seduce; the arts of flattery, falsehood, and deception.

Seducer, (*-ser*), *n.* One who seduces; one who entices another to depart from the path of rectitude and duty; a corrupter;—specifically, one who leads a woman astray, or who triumphs over female chastity by artifice, blandishments, or temptation.—That which leads astray, or entices to evil.

Seducible, *a.* That may be seduced, corrupted, or led astray.

Seducingly, *adv.* In a seducing manner.

Seduction, (*-dūk'shun*), *n.* [Fr.; Lat. *seductio*.] Act of seducing, or of enticing from the path of duty;—appropriately, the act or crime of inducing a female, by temptation or deception, to surrender her chastity.—That which seduces or serves to lead astray; means of corruption; instrumentality to evil; as, the *seductions* afforded by wealth or power.

Seductive, *a.* [Sp. *seductivo*.] Tending to seduce or lead astray; apt to mislead by flattering appearances; as, a *seductive* woman.

Seductively, *adv.* In a seductive manner; by seduction.

Seductress, *n.* A woman who seduces, misleads, or corrupts.

Sedulity, *n.* [Lat. *sedulitas*.] State or quality of being sedulous; diligent and assiduous application to business; constant attention; unremitting industry in any pursuit.

Sedulous, *a.* [Lat. *sedulus*, from *sedeo*, to sit.] Assiduous; industrious; diligent; characterized by close and unremitting attention in application or pursuit; constant, steady, and persevering in business or in endeavors to effect an object; as, *sedulous* efforts.

Sedulously, *adv.* In a sedulous manner; assiduously.

Sedulousness, *n.* State or quality of being sedulous; sedulity.

Sedum, *n.* (*Bot.*) A genus of plants, order *Crossulaceae*, remarkable for its succulent leaves and terminal cymes of yellow, white, or purple flowers. The structure of *Sedums* is such as to enable them to vegetate for a long time without absorbing moisture from the earth. *S. acre*, the Stone-crop, is a native of England. *S. telephium*, the Orpine, Live-long, or Live-forever, also native of Europe, is cultivated and now naturalized in this country. *S. telephoides* is an American species, found on rocks, lake and river shores, from N. Y. to Va.

See, *n.* [Fr. *siège*; Lat. *sedes*, from *sedeo*, to sit.] (*Eccl.*) A diocese; the seat of episcopal authority; the jurisdiction; as, an episcopal *see*; the province or jurisdiction of an archbishop; as, an archiepiscopal *see*; the seat, place, or office of the Pope or Roman pontiff; as, the Papal *See*; the authority of the Pope or court of Rome; as, he was delegated by the *See* of Rome.

See, *v. a.* (*imp.* *SAW*; *pp.* *SEEN*.) [A. S. *seon*; Ger. *sehen*.] To perceive by the eye; to have knowledge of the existence and apparent qualities of by ocular observation; to behold; to view; to descry; as, I *saw* it with my own eyes.—To perceive by the mental eye; to understand; to observe; to note or notice; to discern; to distinguish; to comprehend; as, I *saw* his meaning at once.—To attend, regard, or look to; to attend to, as the performance of something; to beware; as, I will *see* to its being done.—To visit; to make a call upon; to interview; as, I called to *see* her yesterday.—To fall in with; to meet or associate with; to have converse or intercourse with; as, when did you *see* him last?—To experience; to understand experimentally; to feel; to make acquaintance with; as, he has *seen* many troubles.

—*v. n.* To have the power of sight; to have ocular perception of things; to possess or employ the faculty of vision; as, cats *see* in the dark.—To discern; to have intellectual sight or apprehension; to penetrate; to understand;—frequently used before a preposition, as *into* or *through*; as, I *saw through* him at a glance.—To be heedful or attentive; to take care or precaution;—generally with *to*; as, *see to* it that you do not fail.—*Let me see, let us see*, are employed to denote consideration, or to bring forward the particular deliberation of any subject or object.—*See* is occasionally used imperatively for *look!* *to!* *observe!* *behold!*—*To see about a thing*, to pay attention or consideration to it; as, I will *see about* your business shortly.

Seed, *n.* [A. S. *sæd*, from *sawan*, to sow.] That from which anything springs; original; germ; first principle; as, the *seeds* of vice were early implanted in his nature.—The principle of production.—Progeny; offspring; children; descendants; as, the *seed* of Abraham.—Race; birth; generation; lineage; as, "Of mortal *seed* they were not held."—*Waller*.

(*Physiol.*) That which nature prepares for the reproduction and conservation of the animal species; semen; sperm; the generative fluid emitted by the male.

(*Bot.*) The nature of a fecundated ovule. It consists essentially of the young plant or embryo, inclosed in integuments, of which there are usually two. It varies much in form; thus it may be *rounded*, as in the water-cress; *reniform*, as in the poppy; *obovate*, as in the larkspur, &c.; similar terms being employed in describing these forms to those applied to like modifications of other organs. The outer integument, or seed-coat, is termed the *testa* or *episperma*. It is usually of a brown

Fig. 2334. — SEDILIUM,
(15th century.)

or somewhat similar hue, as in the almond; but it frequently assumes other colors. It varies in texture, being soft, fleshy, membranous, coriaceous, &c. It is sometimes curiously marked with furrows, ridges, &c., and often furnished with hairs, spines, wings, and other appendages. The inner integument is called the *tegmen*, or *endopleura*; it is generally of a soft and delicate nature. A third integument, more or less complete, is occasionally found on the surface of the others. (See ARILLUS.) The inner portion of the *S.*, called the *nucleus*, or *kernel*, may either consist of the embryo alone, as in the Wall-flower and the Bean, or of the embryo inclosed in *albumen* or *perisperm*, as in the Pansy. When the nourishing matter, called the *albumen*, is present, the *S.* is said to be *albuminous*; when it is absent, to be *exalbuminous*. See ALBUMEN, EMBRYO, OVARY, OVULE, PLACENTA.

Seed, v. n. To grow to maturity, so as to produce seed; also, to shed the seed.

—*v. a.* To sow; to sprinkle with seed, which germinates and takes root; to supply with seed; to decorate with seed-like adornments; as, Prince Esterhazy's boots were seeded with pearls.

To seed down, to sow with grass-seed.

Seed-box, n. (Bot.) See LUDWIGIA.

Seed-bud, n. (Bot.) The germ or rudiment of the fruit in embryo; the ovule.

Seed-cake, n. A sweet cake spiced with aromatic seeds.

Seed-coat, n. (Bot.) The integument or covering of a seed.

Seed-cod, Seed-lip, n. [A. S. *sædlep*.] A basket or vessel in which a sower carries seed to be scattered.

Seed-corn, n. Corn or grain for sowing.

Seed-down, n. The down or flocculence on vegetable seeds.

Seed'er, n. One who plants seeds; a sower.

Seed-field, Seed-garden, n. A field or garden for raising seed.

Seed-grain, n. Grain used for seed.

Seed-lac, n. A kind of lac. See LAC.

Seed-leaf, Seed-lobe, n. (Bot.) A cotyledon.

Seed'ling, n. A plant reared from the seed, as distinguished from one propagated by layers, buds, &c.

Seed-lip, n. See SEED-COD.

Seed-lobe, n. Same as SEED-LEAF, *q. v.*

Seed-oil, n. Oil expressed from the seeds of plants.

Seed-pearl, n. Small pearls, resembling seeds in size and form.

Seed-plat, Seed-plot, n. The ground on which seeds are sown to produce shrubs for transplanting. — Hence, a nursery, or place where anything is sown for cultivation.

Seeds'man, n; pl. SEEDSMEN. A vender of, or dealer in, seeds; also a sower.

Seed-time, n. The proper season for sowing.

Seed-vessel, n. (Bot.) The pod, or pericarp, containing the seeds.

Seed-wool, n. Cotton-wool uncleaned of its seeds.

Seed'y, a. (comp. SEEDIER; superl. SEEDIEST.) Abounding with seeds; having run to seeds; bearing seeds. — Hence, possessing a peculiar flavor, supposed to be derived from the weeds growing among the vines; — applied to Cognac or French brandy. — Run to seed; — hence, exhausted; worn out; shabby; poor and miserable-looking; as, a *seedy* hat, a *seedy* bumper; also, jaded; suffering from the effects of a debauch; as, I feel *seedy* this morning.

See'ing, conj. Since; inasmuch; it being so; because that; — often with *that*; as, no good can be done, *seeing that* the man is a fool.

—*n.* Vision; perception; act of perceiving objects by the organs of sight, or the sense which we have of external objects by means of the eye.

Seek, v. a. (imp. and pp. SOUGHT,) (sawt.) [A. S. *secan*; allied to Lat. *sagor*, to follow.] To run after with a view to find; to go in search or quest of; to search for by going from place to place; as, to *seek* a situation. — To inquire or ask for; to solicit; to endeavor to find or gain by any means; to look for or after; — often with *out*; as, he *sought me out*, to *seek* a favor, &c.

—*v. n.* To make search or inquiry; to strive to make discovery; as, to *seek* after a better reason. — To try; to strive; to endeavor; as, why should he *seek* to harm me?

To *seek after*, to attempt to find or take; as, the lady was much *sought after*. — To *seek for*, to endeavor to find or discover; as, to *seek for* a needle in a hay-stack. — To *seek* (used adverbially), at a loss; requiring to seek or search; without knowledge or experience; as, "Unpractised, unprepared, and still to *seek*." (Milton.) — To be desiderated; as, a person of his mental powers is yet to *seek*.

Seek'er, n. One who seeks; an inquirer; as, a *seeker* of facts, a *seeker* of gold. — An adherent of a sect who professes no determinate religion.

Seek'ing, n. Act of attempting to find or procure.

See'konk, n. in Massachusetts, a village and township of Bristol county, 6 miles north-east of Providence, Rhode Island.

Seel, v. a. To close the eyes of by sewing the eyelids together; — said of a hawk or other bird. — Hence, to blind; to shut the eyes of.

—*n.* [A. S. *sæl*, prosperity.] Opportunity; fitting period of time; season; — applied particularly to crops; as, clover-*seel*. (An English provincialism.)

See'land, n. an island of Denmark. See ZEALAND.

See'lysburg, n. in New York, a village of Cattaraugus co., 50 m. S. of Buffalo.

See'lyville, n. in Pennsylvania, a village of Wayne co., 1 m. from Honesdale.

Seem, v. n. [Ger. *ziemen*.] To be in unison or harmony; to be fit to see or be seen; to look or appear fit, proper, or becoming; to be agreeable to see or look at;

to make a show; to be plausible in appearance at first sight; to make or have a semblance; to have the aspect of truth or fact; to be understood as true; — often used impersonally; as, he *seems* worthy of his good fortune.

It *seems*, it has the semblance of truth or fact; it is said; it is given as true; as, it *seems* to me that you are wrong.

Seem'er, n. One who carries an appearance or semblance.

Seem'ing, p. a. Presenting the appearance or semblance of; apparent; specious; plausible; as, *seeming* delicacy.

—*n.* Appearance; show; semblance; fair or specious aspect.

Seem'ingly, adv. In appearance, show, or semblance.

Seem'ingness, n. Fair appearance or semblance; plausibility.

Seem'liness, n. Quality of being seemly; comeliness; grace; fitness; appropriateness; propriety; decorum; and, *seemliness* of appearance or manners.

Seem'ly, a. (comp. SEEMLIER; superl. SEEMLIEST.) [Dau. *sinnelig*.] Beseeming; suited to the object, occasion, purpose, or character; becoming; fit; suitable; proper; appropriate; meet; decent; decorous; as, a *seemly* answer.

—*adv.* In a becoming, decent, or suitable manner; as, ranged in *seemly* order.

Seen, pp. of SEE, *q. v.*

Seep, v. a. To ooze; to seep; to filter through fine pores. (U. S.)

Seep'y, a. Oozing; filtering; flowing gently or slowly; — applied to land under cultivation that is not well drained; — a local Americanism.

Se'er, n. One who sees; — specifically, a *seer* of visions.

— [From *see*.] One who sees into futurity; a prophet; a person who foresees future events.

Seer'ess, n. A female seer or diviner; a prophetess.

Seer'hand, n. A kind of East Indian muslin, particularly adapted for dresses, as retaining its clearness after being washed.

Seer'ship, n. Quality or office of a seer.

Seer'sneker, n. A thin linen fabric, made in the E. Indies, having white stripes alternating with blue ones.

Seer'wood, Sear'wood, n. Dry wood.

See'saw, n. [Perhaps from *saw-saw*, and intended to express the motions made in the act of sawing.] A vibratory or reciprocatory motion. — A play among children. — In whist-playing, a mutual support given by partners.

—*v. n.* To move with a reciprocating motion; to move backward and forward, or upward and downward.

—*a.* Undulating with reciprocal motion.

Seethe, v. a. [A. S. *seothan*; Ger. *sieden*.] (Written also *seeth*.) To decoct or prepare for food in hot liquor; to boil; as, "to *seethe* the flesh." — *Spenser*.

—*v. n.* To be in a state of ebullition; to be hot.

Seeth'er, n. A boiler; a pot.

Seetz, (sai'ez), a town of France, dept. of Orne, 13 m. N. E. of Alençon; pop. 5,000.

Segar, n. See CIGAR.

Segment, n. [Lat. *segmentum*.] (Geom.) A term applied to a part of a figure cut off by a line or plane. The term is, however, more particularly applied to that part of a circle which is comprised between a chord and an arc of that circle, or so much of that circle as is cut off by the chord. A *segment of a sphere* is that portion of it which is cut off by a plane.

Segment'al, a. Relating to, or resembling, a segment.

Segmenta'tion, n. The act of dividing or separating into segments.

Segno, (san'yo), n. [It., a mask.] (Mus.) See AL SEGNO.

Sego, a town of Central Africa, in Soudan, cap. of the state of Bambarra, on the Joliba; Lat. 13° 5' N., Lon. 5° W.; pop. 30,000.

Segorbe, (sa-gor'ba), a town of Spain, prov. of Castellon-de-la-Plaña, on the Palencia, 18 m. N.W. of Murviedro; Lat. 39° 54' N., Lon. 0° 30' W.; pop. 6,000.

Segovia, (sai-go've-a), a city of Spain, cap. of the prov. of Segovia, 45 m. N.W. of Madrid; Lat. 41° N., Lon. 4° 17' W. It is built on two hills and an intervening valley, and is surrounded by a wall in the Moorish style. Its most remarkable monument is the Roman aqueduct, supposed to be of the time of Trajan. The cathedral, begun in 1525, is one of the finest in Spain. Manuf. Woollen goods, paper, glass, and earthenware. Pop. 12,000.

Seg'regate, v. a. [Lat. *segregare*, from *se*, and *grego*, to gather into a flock or herd.] To set apart; to separate from others.

Seg'regated, p. a. Set or placed apart; separated from others.

Segrega'tion, n. [Fr., from Lat. *segregatio*.] Separation from others; a parting.

(Geol.) That process in nature by which, when a mixed mineral mass has been deposited or accumulated, and left to the influence of the chemical forces always operating, certain minerals tend to separate themselves from the mass, and collect into natural cracks or blisters, either previously existing or formed during the operation. **Se'gue.** [It., it follows.] (Mus.) A word which, prefixed to a part, denotes that it is immediately to follow the last note of the preceding movement. When minims, crotchets, &c., are sub-divided by a stroke drawn through their tails, so as to bring them into abbreviated groups, the term indicates that the following notes are divided similarly to those first marked.

Segniera, (seg'e-ai-ra), n. (Bot.) A genus of plants, order *Petiveriaceae*, comprising a few South American shrubs, smelling more or less strongly of garlic or asafœtida — the whole plant, root, wood, and herbaceous parts, having this powerful odor. On this account, baths impregnated with *S. alliacea* are in repute in Brazil in

cases of rheumatism, dropsy, and hæmorrhoidal affections. The wood abounds in potash; and the ashes are employed in clarifying sugar, and in soap-making in Brazil.

Se'guin, an island in Maine, off the mouth of the Kennebec River, with a light-house and fixed light, 200 feet above the sea; Lat. 43° 41' 40" N., Lon. 69° 44' W.

Seguin, in Texas, a post-town, cap. of Guadalupe co., 70 m. S. of Austin City.

Segun'do, a river of the Argentine Republic, rises 27 m. W.S.W. of Cordova, and flows into a marshy lake 90 m. W. of Santa Fé, after an E. course of 130 m.

Ségnr, (sai'goor), a noble French family of Guienne, of which the most distinguished members were: — HENRI FRANÇOIS, Count de Ségur, and lieutenant-general, 1689–1751. — PHILIPPE HENRI, his son, Marquis, a marshal of France, minister of war in 1780, before Brienne; 1724–1801. — LOUIS PHILIPPE, son of the latter, companion-in-arms of Lafayette in America, known also as a diplomatist and historian, 1753–1832. — JOSEPH ALEXANDRE, second son of Philippe Henri, a dramatic and miscellaneous writer, 1756–1805.

Segura, (zai-goo'ra), a river of Spain, in Murcia, which, after an E. course of 180 m., flows into the Mediterranean at Guardamar.

Seg'win, or Seg'wun, in Michigan, a village of Kent co., 18 m. E. of Grand Rapids.

Selimi'no, a town of European Turkey, at the S. base of the Balkan Mountains, 65 m. N. of Adrianople. Manuf. Woollen goods, gun-locks, and attar of roses. Pop. 15,000.

Selwan, (sai-wan'), a town of British India, in Sind, on the Arul, near the Indus, 75 m. N.N.W. of Hyderabad; Lat. 26° 21' N., Lon. 67° 55' E.; pop. 10,000.

Seid, n. A descendant of Mohammed.

Seid litz, or Sed'litz, (MINERAL WATERS OF.) Springs in Bohemia, near Prague, which are simple salines. They contain sulphate and carbonate of magnesia, chloride of magnesium, sulphates of potassa, soda, and lime, carbonic acid, and carbonate of lime. They are employed as purgatives in a multitude of diseases. — *Artificial Seidlitz Powders, or Rochelle Powders*, differ essentially from the natural water. They are composed of 120 grains of tartrate of soda and potash, and 40 grains of bicarbonate of soda reduced to powder, mixed and enclosed in a blue paper, and 35 grains of powdered tartaric acid in a white paper. The contents of the blue paper are dissolved in from half a tumbler to a tumbler of water, and those of the white paper are then stirred in. The mixture should be taken while the effervescence from the liberation of the carbonic acid is still going on. These powders act as an agreeable and mild cooling aperient. If a stronger dose is required, either an increased quantity of the powder may be used, or a little sulphate of magnesia (about a drachm) may be added.

Seigneurial, Seigniorial, (seen-yu're-al), a. [Fr., from *seigneur*.] Relating to the lord of a manor; manorial. — Invested with large powers; independent.

Seignior, (seen'yur), n. [Fr. *seigneur*; It. *signore*; Sp. *senor*, from Lat. *senior*, an elder.] A lord; the lord of the manor; — used, also, as a title of honor. — The Sultan of Turkey is sometimes styled the *Grand Seignior*.

Seign'iorial, a. Relating to a seignior or lord; as, *seigniorial* rights.

Seign'iorialty, n. The jurisdiction of a seignior or lord.

—*a.* Same as SEIGNEURIAL, *q. v.*

Seign'iory, (seen'yur-y), n. [Fr. *seigneurie*.] A lordship; a manor. — The power or authority of a lord; jurisdiction; dominion.

Saïlle, (sail), a river of France, rising in the dept. of Jura, and, after a S.W. course of 60 m., joining the Saône, 15 m. N. of Macon. It is navigable 24 m.

Saïlle, (Grande), (grond'sail), a river of France, rising in the dept. of Meurthe, and, after a N. course of 60 m., joining the Moselle at Metz.

Saïlle, (Petite), (peh-teel'), an affluent of the above, which it joins at Chateau-Salins.

Seine, (seen), n. [Fr.; A. S. *segne*.] A net used in fishing.

Seine, (sain), a river of France, rising in the dept. of Côte d'Or; Lat. 47° 30' N., Lon. 5° E., 20 m. N.W. of Dijon, running northwards through Champagne to Troyes, where it receives the Aube, and, turning to the west, is joined by the Yonne, and before reaching Paris, by the Marne, a larger stream, flowing from the west. At Paris the Seine varies from 300 to 500 feet in width, and it soon after receives an addition by the influx of the Oise, when, pursuing a winding course to the N.W., it passes Rouen, and discharges itself into the sea at Havre-de-Grace. Length, 414 m., for 350 of which it is navigable.

Seine, the smallest, but most important dept. of France, between Lat. 48° 43' and 48° 58' N., Lon. 2° 10' and 2° 35' E., being entirely surrounded by the dept. Seine-et-Oise; area, 181 sq. m. The surface is generally level, with few hills — Mount Valerien, 450 feet (strongly fortified), and Montmartre, 344 feet, being the highest. The soil is calcareous, but rendered productive by manure supplied from the capital. It is traversed by the river Seine. Prod. Principally vegetables and fruits for the Paris markets. Cap. Paris.

Seine-et-Marne, a dept. in the N.E. of France, comprising a part of the old prov. of Ile-de-France, between Lat. 48° and 49° N., Lon. 2° 30' and 3° 30' E., having N. the depts. Oise and Aisne, E. Aube and Marne, S. Yonne and Loiret, and W. Loiret and Seine-et-Oise; area, 2,335 sq. m. The surface is undulating, and the soil fertile. Rivers. Seine, Marne, Yonne, and Oureq. Prod. Wheat, oats, rye, barley, potatoes, &c. Numerous cattle and

sheep are raised. *Manuf.* Cotton and linen fabrics, hardware and cutlery, earthenware, leather, and paper. *Chief towns.* Melun, the cap., Conlommiers, Fontainebleau, Meaux, and Provins. *Pop.* 354,400.

Seine-et-Oise, a dept. of the N. of France, between Lat. 48° and 49° N., Lon. 1° 30' and 2° 30' E., having N. the dept. of Oise, E. Seine-et-Marne, S. Loiret, and W. Eure and Eure-et-Loire; *area*, 2,253 sq. m. The surface is undulating, and the soil generally fertile. *Rivers.* Seine, Marne, and Oise. *Prod.* Wheat, oats, fruit, vegetables, and cattle. *Manuf.* Woollens and printed fabrics, Sèvres porcelain, leather, chemicals, and hardware. *Chief towns.* Versailles, the cap., Mantes, Pontoise, Rambouillet, Etampes, and Corbeil. *Pop.* 533,727.

Seine-Inférieure, a marit. dept. of the N. of France, formerly comprising the most of the prov. of Normandy, having N. and W. the British Channel, E. the depts. of Somme and Oise, S. Eure and Calvados; *area*, 2,330 sq. m. The surface is hilly and well wooded. The soil is generally fertile. *Rivers.* The Seine and its affluents. *Prod.* Wheat, oats, barley, rye, flax, hemp, hops, and fruits. *Manuf.* Woollens and cottons. *Chief towns.* Rouen (the cap.), Dieppe, Havre, Neufchâtel, Yvetot. *Pop.* (1897) 848,480.

Seisin, Seizin, (*se'zin*), *n.* [Fr. *seisine*; Lat. *seisina*.] (*Law.*) A right to lands and tenements. In common law, *S.* signifies possession, as to seize is to take possession of a thing. *S.* is properly applied to estates of freehold only, so that a man is said to be seized of an estate of inheritance, but to be possessed of a chattel interest. There is a *S. in deed*, or *in fact*, when an actual possession is taken, and a *S. in law* where the lands have descended to a person but he has not yet actually taken possession of them. *S. in deed* is obtained by actually entering into the lands. In some of the States, as Pennsylvania, Massachusetts, Ohio, and Connecticut, *S.* means merely ownership; and the distinction between *S. in deed* or *in law* is not known in practice.

Seis'mal, Seis'mic, *a.* [Gr. *seismos*, earthquake.] Relating to an earthquake.

Seismology, (*sis-mol'o-jy*), *n.* [Gr. *seismos*, and *logos*, a discourse.] A branch of knowledge which has for its object to discover the laws which regulate the occurrence of earthquakes.

Seismometer, *n.* [Gr. *seismos*, and *metron*, measure.] An instrument for measuring the shock of earthquakes and other convulsions.

Seistan', or Segestan, (*seg-es-tan'*), a prov. of Afghanistan, E. of Persia, between Lat. 30° 30' and 32° N., Lon. 61° and 62° 30' E. It is a mountain basin, surrounded by deserts, and only fertile on the banks of the rivers, the principal of which is the Helmand. *Pop.* 50,000.

Se'ity, *n.* [Lat. *se*, one's self.] Something peculiar to one's self. (*R.*)

Seiwah, or Seewah, (*se-wa'*), an oasis in the Libyan desert, on the route from Egypt to Fezzan; Lat. of its cap. 29° N., Lon. 26° E. It is 50 m. in circumference, and produces figs, dates, grapes, and pomegranates. *Cap.* Seewah-el-Keber, near which are the ruins of the temple of Jupiter Ammon.

Seizable, (*se'z-a-bl'*), *a.* Capable of being seized; liable to be taken.

Seize, *v. a.* [Fr. *saisir*; O. Ger. *zeisan*, to pluck.] To fall or rush upon suddenly and lay hold on; to gripe or lay hold on suddenly. — To take possession of by force. — To invade suddenly; to lay hold on.

"Hope and doubt alternate seize her soul." — Pope.

— To take possession of by virtue of a warrant or legal authority; to apprehend; to arrest. — To fix; to fasten. — To attain to.

(*Naut.*) To bind or fasten together, as any two ropes, or the different parts of a single rope, with a small line or cord.

To be seized of, to obtain possession of, as an estate.

To seize on or upon, to grasp, or take possession of.

Seiz'er, *n.* One who seizes.

Seiz'in, *n.* (*Law.*) See SEISIN.

Seiz'ing, *n.* Act of taking or grasping suddenly.

Seiz'or, *n.* (*Law.*) A person who seizes, or takes possession.

Seizure, (*see'zur*), *n.* Act of taking possession of suddenly; state of being seized, as with disease. — The thing taken or seized. — Possession; gripe; grasp.

Se'jant, Se'jeant, *a.* [Fr. *séant*, from O. Fr. *seoir*; Lat. *sedere*, to sit.] (*Her.*) Applied to a beast when represented in a sitting posture. — *Se'jant-rampant*, sitting with the two fore-feet lifted up, &c.

Sejanns, LUCIUS ÆLIUS, (*se-ja'nus*), a praetorian general of Rome, a favorite of the Emperor Tiberius, put to death for aiming at the supreme authority, B. C. 31.

Sej'gous, *a.* [Lat. *sejugis*.] (*Bot.*) Having leaflets in six pairs, as some pinnate leaves.

Se'la, (*Anc. Geog.*) See PETRA.

Sela'chians, *n. pl.* [Gr. *selachos*.] (*Zoöl.*) An order of fishes, also called *Plagiostomi*, comprising cartilaginous fishes of the group called *Fixed-gilled chondropterygians*. Their gills adhere by the external edge in such a manner that the water escapes through as many holes in the skin as there are intervals between the gills; or else the holes terminate in a common duct, through which the water passes out. The order is divided into two families, *SQUALIDE* and *RAIIDE*, *q. v.*

Selagina'ceæ, *n. pl.* (*Bot.*) The *Selago* family, an order of plants, alliance *Echiales*, consisting of herbs or shrubs, with alternate extipulate leaves, and irregular, sessile, bracteate flowers. They are chiefly natives of the Cape of Good Hope; the most interesting genus, however, is the European. See GLOBULARIA.

Se'lah, *n.* [Heb., from *salah*, to repose.] (*Script.*) In the Psalms, a word supposed to signify silence, or a pause in the musical performance of a song.

Selboe, (*sel-be(r)*), an island off the W. coast of Norway, 28 m. S. of Bergen. — Also, a lake, 25 m. S. of Trondheim, which receives the river Nea, and communicates with Trondhjem-fiord. *Extent*, 20 m. long and 3 broad.

Sel'by, a town of England, co. of York, on the Ouse, 11 m. S.E. of York; *pop.* 5,400.

Sel'by, or Shel'by, in Illinois, a township of Bureau co.

Sel'bysport, in Maryland, a post-village of Garrett co., 40 m. N.W. of Cumberland.

Sel'dom, *a.* Unfrequent. (*R.*)

— *adv.* [A. S. *seldan*; Ger. *selten*.] Rarely; not often; not frequently.

Sel'domness, *n.* Uncommonness; infrequency; rareness. (*R.*)

Sel d'Or, *n.* [Fr., salt of gold.] (*Chem. and Photog.*) A double hyposulphite of gold and sodium, used in photography for toning positive paper-proofs. It is formed when 1 part of chloride of gold in solution is added to 3 parts of hyposulphite of soda, also in solution. The hyposulphite of soda should always be in excess during the mixture, a condition which is secured by adding the chloride of gold to the hyposulphite of soda, and not *vice versa*. The salt so formed is precipitated in fine, white, crystalline needles, on the addition of alcohol to the above mixed solutions; these are collected on bibulous paper, and gently dried for use. Adulterations in the commercial article — which are, unfortunately, only too common — may be ascertained by precipitating, igniting, and weighing the gold contained in the sample it is desired to test. This may be done by the aid of nitric acid free from chlorine, which will decompose this salt, and precipitate its contained gold in the metallic form.

Sele, (*sai'lai*), a river of S. Italy, rising 12 m. N.E. of Policastro, and, after a W. course of 60 m., flowing into the Gulf of Salerno.

Select', *v. a.* [Lat. *selegere*, from *se*, and *legere*, to gather, from Gr. *lego*, to gather.] To choose and take from a number; to take by preference from among others; to pick out; to cull; as, to select a book.

— *a.* Chosen or taken from a number by preference; selected; nicely chosen; preferable; more valuable or excellent than others.

Select'edly, *adv.* With careful selection. (*R.*)

Selection, *n.* [Lat. *selectio*.] Act of selecting, or of choosing and taking from among a number; a taking from a number by preference. — A number of things selected or taken from others by preference.

Select'ive, *a.* Inclined to select; tending to select. (*R.*)

Select'man, *n.*; *pl.* SELECTMEN. One of a certain number of magistrates, commonly from three to seven in all, annually elected by the freemen of a town or township in some of the states of New England, to superintend and manage the affairs and government of the town.

Select'ness, *n.* State of being select or well chosen.

Select'or, *n.* [Lat.] One who selects.

Selené, (*Myth.*) The Greek name of the goddess of the moon; called also *Mene*, and in Latin *Luna*. Her myth is differently told, but the most common account makes her a daughter of Hyperion and Theia, and sister of Helios (the Sun) and Eos (the Dawn); as sister of Helios, also called *Phoebos* (the Shining One), she had the name of *Phæbe*, and latterly was identified with Artemis (see DIANA), though the identification was never quite exact, as Artemis always retained her reputation for chastity, while *S.* had 50 daughters by her lover Endymion, and several by Zeus, one of whom was called *Erse* ("the Dew"), indicating the original physical character of the myth. In art, the two are always distinct. *S.* is represented by the poets with long wings and a golden diadem, riding across the heavens in a chariot drawn by two white horses, cows, or mules.

Selen'ga, a river of Siberia, rising in the Tang-nou Mountains in Mongolia, and, after a N.E. course of 500 m., falling by three mouths into Lake Baikal, 30 m. W. of Irkutsk.

Selen'iate, *n.* (*Chem.*) A compound of selenic acid and a salifiable base.

Selen'ic Acid, *n.* (*Chem.*) See SELENIUM.

Seleni'etted Hydrogen, HYDROSELENIC ACID, *n.* (*Chem.*) A substance which is the exact parallel of sulphuretted hydrogen, and is produced by a similar process. It is even more offensive and poisonous than that gas, and acts in a similar way upon metallic solutions, precipitating the *selenides*.

Selen'ions acid, *n.* (*Chem.*) See SELENIUM.

Selen'ite, *n.* [Gr.] (*Min.*) Crystallized sulphate of lime, occurring in numerous localities in transparent rhomboidal crystals, is known to mineralogists under this name.

Selen'ium, *n.* [Gr. *selene*, the moon.] (*Chem.*) This rare elementary body was first discovered by Berzelius in the refuse of a sulphuric-acid factory at Fuhlen, in Sweden. Since then it has been found in various other localities. It is chiefly interesting from its great resemblance to sulphur in many of its physical and chemical characteristics. It is a dark metallic-looking brittle solid, with a glassy fracture. It has neither taste nor smell, is insoluble in water, and is a nonconductor of heat and electricity. It may be obtained like sulphur both in an amorphous and a crystalline form. Heated in the air it takes fire with difficulty. It burns with a blue flame, but part of it volatilizes. It forms with oxygen two compounds: SeO_2 , selenious anhydride, and $\text{H}_2\text{SeO}_4 + x\text{Aq.}$, selenic acid. Selenious anhydride forms selenites with the bases, which are all insoluble in water, with the exception of those formed with the alkalis. Selenic acid is very similar in character to sulphuric acid, its salts being isomorphous with the

sulphates of the same base. Seleni'etted hydrogen resembles its sulphur analogue, but is more offensive. Berzelius found that the inhalation of a bubble the size of a pea deprived him of the sense of smell for several hours. Selenium, like sulphur, forms a compound with cyanogen. *Equiv.* 79; *sp. gr.* 4.28; *symbol*, Se.

Selenog'raphy, *n.* [Gr. *selene*, the moon, and *graph-ein*, to describe.] A description of the moon.

Selenicia, (*Anc. Geog.*) The name of several cities of Asia, situated in Assyria, Margiana, Syria, Mesopotamia, Cilicia, Pamphylia, Pisidia, Caria, and other countries, of which the following are the most important. I. SELEUCIA ON THE TIGRIS, was founded by Seleucus I. of Syria, on the left bank of that river, near its junction with the royal canal of Babylonia, and opposite to the mouth of the Delas (now Diala) River, a little S. of the modern city of Bagdad. Commanding the plains of the Tigris and Euphrates, and the principal caravan roads of Assyria and Babylonia, on the confines of which it was situated, and peopled by settlers from various countries of western Asia, it rapidly rose in wealth and splendor, and eclipsing Babylon, became the capital of that part of Asia, until it was in its turn eclipsed by Ctesiphon, built by the Parthians on the opposite bank of the Tigris. The later wars of the Romans against that people proved destructive to Selenicia. A city of upwards of half a million inhabitants in the 1st century, in the following it was burned by Trajan and Lucius Aurelius Verus, and captured by Septimius Severus, and in the expedition of Julian against the Persians, in the 4th century, was found deserted. — II. SELEUCIA PIERIA, a strong fortress of northern Syria, also founded by Seleucus I., whose remains were preserved there in a mausoleum, was built at the foot of Mt. Pieria, on a rock overhanging the Mediterranean, a few miles N. of the mouth of the Orontes, and W. of Antioch, with which it was simultaneously founded, and of which it formed the seaport. It surrendered to Ptolemy III. of Egypt, was recovered by Antiochus the Great, and in the latter period of the Syrian kingdom became independent. Under the Romans it rapidly decayed. Considerable ruins of its harbor, fortifications, and necropolis are still to be seen.

Selenic'ide, (*se-lu'si-de*), (*Anc. Hist.*) The name of a Greek dynasty in Asia, founded, after the death of Alexander the Great, by Seleucus, one of the most distinguished generals of the Macedonian king. The era of the Selenic'ide begins with the taking of Babylon by Seleucus, B. C. 312, and ends with the conquest of Syria by Pompey, B. C. 65.

Selen'ens Nicator, founder of the dynasty of the Selenic'ide, was the son of a Macedonian general, and was born abt. B. C. 358. He greatly distinguished himself as a general in the campaigns of Alexander the Great in Persia and India. The satrapy of Babylonia was assigned to him after the death of Perdiccas, in 322; but five years later, in consequence of the growing power of Antigonus, he fled to Egypt, joined the league formed against him, and after the victory of Gaza, in 312, recovered Babylonia. *S.* extended his dominions by conquest, and in 306 took the title of *king*. He took part in a second war with Antigonus, who was defeated and killed at the battle of Ipsus, in 301. By the acquisitions of territory made after this battle, *S.* made his empire the greatest of those ruled by the successors of Alexander. He founded the cities of Antioch in Syria, and Selenicia near Babylon, besides a great number of other cities, thus continuing the work which Alexander had begun. He married Stratonice, daughter of Demetrius Poliorcetes, but resigned her to his son, Antiochus, to whom also he gave up a large part of his empire. *S.* was afterwards engaged in war with Demetrius, made him prisoner in 286, and kept him so till his death, three years later. A war with Lysimachus ended in his defeat and death in 281, and *S.* advancing to the conquest of Macedonia, was murdered by Ptolemy Ceraunus, 280. SELEUCUS II., surnamed *Callinicus*, succeeded Antiochus II. 247 B. C., and after losing many of his provinces by the invasion of Ptolemy III., 242, was taken prisoner by the Parthians. He died in captivity B. C. 225. — SELEUCUS III., surnamed *Ceraunus*, son and successor of the preceding, was assassinated B. C. 222. — SELEUCUS IV., surnamed *Philopator*, was son of Antiochus the Great, to whom he succeeded B. C. 186, poisoned by his minister Heliodorus, 174. — SELEUCUS V. was son of Demetrius II., and was proclaimed king with Antiochus Grypus B. C. 125. He was killed by order of his mother, Cleopatra, 122. — SELEUCUS VI., son of Antiochus Grypus, became king over a part of Syria in 97 B. C., and took the remainder from his uncle, Antiochus Cyric 94. He was killed in 95 in the contest which ensued with the son of the latter. See ANTIOCHUS.

Self, *n.*; *pl.* SELVES. [A. S. *self*, *sylf*; Du. *zelf*; *selbst*.] The individual, as subject to his own contemplation or action; one's individual person; personality; personal identity; individuality. — Selfishness; person's interest; love of private interest.

Self is united to certain personal pronouns and pronominal adjectives, to express emphasis or distinction; also when the pronoun is used reciprocally; as, *I myself*. (*Self* is much used as a prefix in composition.)

Self-abased, (*-a-bäz'*), *a.* Humbled, or abased, from consciousness of guilt.

Self-abasement, *n.* Humiliation or abasement proceeding from consciousness of one's inferiority or guilt.

Self-abas'ing, *a.* Humbling or abasing by the consciousness of guilt.

Self-abbor'rence, *n.* Abhorrence of self.

Self-abuse', *n.* Abuse of one's self.

(*Med.*) Masturbation; onanism.

Self-act'ing, *a.* Acting by itself; said of a machine or press.

Self-action, *n.* Action by one's self.
Self-active, *a.* Acting without any external assistance or agents.
Self-activity, *n.* The quality or power of moving or acting without foreign or external aid.
Self-admiration, *n.* Act of admiring one's self.
Self-affairs, *n. pl.* One's own private affairs.
Self-affrighted, *a.* Seized with fear at one's self.
Self-aggrandizement, *n.* The aggrandizement of one's self.
Self-annihilated, *a.* Annihilated by one's own acts.
Self-annihilation, *n.* The act of being annihilated by one's own act.
Self-applause, *n.* Approbation of one's self.
Self-apply, *a.* Applying to one's self.
Self-approving, *a.* Approving one's self, or action.
Self-asserting, *a.* Advancing, or asserting, one's rights or claims.
Self-assertion, *n.* The asserting of one's rights or claims.
Self-assumed, *a.* Assumed without authority, or by one's self.
Self-assured, *a.* Assured by one's self.
Self-attractive, *a.* Attractive by one's self or powers.
Self-banished, *a.* Banished by one's own will.
Self-begotten, *a.* Begotten by one's own power.
Self-born, *a.* Born by one's self.
Self-centration, *n.* The state of being centred in self.
Self-centred, *a.* Centred in one's self.
Self-centring, *a.* Centring in one's self.
Self-charity, *n.* Love of self.
Self-command, *n.* Control over one's self.
Self-commune, *n.* Communion with one's self.
Self-communicative, *a.* Communicating by one's own powers.
Self-communion, *n.* Thoughts with or about one's self.
Self-complacency, *n.* Satisfaction in one's abilities.
Self-conceit, *n.* A high opinion of one's self; vanity; self-sufficiency.
Self-conceited, *a.* Having a high or overweening opinion of one's own person or merits; vain.
Self-conceitedness, *n.* A high opinion of one's merits or person.
Self-concern, *n.* Care for one's self.
Self-condemnation, *n.* Condemnation by one's own self.
Self-confidence, *n.* Reliance upon one's own powers or opinion.
Self-confident, *a.* Confident of one's own ability.
Self-confidently, *adv.* With self-reliance.
Self-conscious, *a.* Conscious of one's own acts. — Conscious of the notice or observation of others. — Esteem of one's own powers or abilities.
Self-consciousness, *n.* Act of being self-conscious. — Consciousness of observation by others.
Self-considering, *a.* Deliberating with one's self.
Self-consistency, *n.* The state or quality of being consistent with one's self.
Self-consistent, *a.* Consistent with one's self.
Self-consuming, *a.* Consuming one's self.
Self-contradiction, *n.* Act of contradicting itself; repugnancy in terms.
Self-contradictory, *a.* Contradicting itself.
Self-control, *n.* Self-command.
Self-convicted, *a.* Convicted by one's own actions or acknowledgments.
Self-conviction, *n.* Conviction by one's self.
Self-created, *a.* Formed or constituted by one's self.
Self-education, *n.* Education of one's self.
Self-deceit, *n.* Deception respecting one's self, or that originates from one's own mistake; self-deception.
Self-deceived, *a.* Deceived by one's own mistake or error.
Self-deception, *n.* Deception concerning one's self.
Self-defence, *n.* Act of defending or protecting one's own person, property, or reputation.
Self-denial, *n.* The act of denying one's self; the forbearing to gratify one's own appetites or desires.
Self-denying, *a.* Denying one's self; forbearing to indulge one's own appetites or desires.
Self-dependent, *a.* Depending on one's self.
Self-destroyer, *n.* One who destroys or ruins himself; a suicide.
Self-destruction, *n.* Destruction of one's self; suicide.
Self-determination, *n.* Determinating by one's own mind.
Self-devoting, *n.* Voluntary devotion of one's self to something hazardous.
Self-educated, *a.* Educated without the help of teachers or schools.
Self-elective, *a.* That has the right to elect one's self or one's own members.
Self-esteem, *n.* The esteem or good opinion of one's self; vanity.
Self-evident, *a.* Evident in its own nature; evident without proof or reasoning; that produces certainty or clear conviction upon a bare presentation to the mind.
Self-exaltation, *n.* Exaltation or ennobling of one's self.
Self-examination, *n.* Examination of one's self; an examination or scrutiny into one's own state, conduct, and motives, particularly in regard to religious affections and duties.
Self-existence, *n.* Existence of one's self, inde-

pendent of any other being or cause; inherent and undervived existence; an attribute peculiar to God.
Self-existent, *a.* Existing by one's self, own nature, or essence, independent of any other cause.
Self-explaining, *a.* That may be understood without explanation.
Self-government, *n.* Self-control; government of one's self. — Government by the people; democracy.
Self-homicide, *n.* The act of killing one's self; suicide.
Self-importance, *n.* High importance of one's self; pride; vanity.
Self-imposition, *n.* Imposition practised on one's self; self-deception; self-delusion.
Self-interest, *n.* One's own interest; private interest; the interest or advantage of one's self.
Selfish, *a.* Devoted wholly or unduly to self; regarding one's own interest chiefly or solely; influenced in actions by a view to private advantage.
Selfishly, *adv.* In a selfish manner; with regard to private interest only, or chiefly.
Selfishness, *n.* Quality or state of being selfish; undue love of self; subserviency to self; the exclusive regard of a person to his own interest or happiness.
Selfist, *n.* One devoted to self; a selfish person. (*R.*)
Selfless, *a.* Devoid of selfishness.
Self-limited, *a. (Med.)* Applied to diseases which appear to run a definite course, but little modified by treatment, as small-pox.
Self-love, *n. [Self and love.]* The love of self; the love of one's own person or happiness.
Self-luminous, *a.* Luminous by itself; emitting light, as a star, the flame, or a substance shining when heated or rubbed.
Self-made, *a.* Made or constituted by one's self.
Self-mastery, *n.* Mastery of one's self; self-command.
Self-mettle, *n.* Natural mettle.
Self-murder, *n.* The murder of one's self; suicide.
Self-opinion, *n.* A high opinion of one's self.
Self-pollution, *n.* Masturbation; onanism.
Self-possession, *n.* The possession of one's powers or faculties; calmness; self-command.
Self-preservation, *n.* The preservation of one's self from destruction or injury.
Self-reliance, *n.* Reliance on one's own powers.
Self-relying, *a.* Depending on one's self.
Self-reproof, *n.* Reproof of conscience.
Self-restraint, *n.* A restraint over one's self.
Self-righteous, *a.* Righteous in one's own esteem.
Self-righteousness, *n.* Righteousness which one arrogates to one's self; reliance on one's own righteousness.
Self-sacrifice, *n.* Sacrifice of one's self, or of self-interest.
Self-same, *a. [Self and same.]* Exactly the same; the very same; identical.
Self-seeker, *n.* One who seeks only his own interest; a selfish person.
Self-slaughter, *(-slaw'ter,)* *n.* The slaughter of one's self; suicide.
Self-sufficiency, *n.* Quality of being self-sufficient; an overweening opinion of one's own strength or worth; excessive confidence in one's own competence or sufficiency.
Self-sufficient, *a.* Having too much confidence in one's own strength, abilities, or endowments; haughty; assuming; overbearing.
Self-will, *n.* One's own will; obstinacy.
Self-willed, *a.* Governed by one's own will; not yielding to the will or wishes of others; not accommodating or compliant; obstinate.
Self-worship, *n.* Worship or idolizing of one's self.
Seligher, *(sel'i-ger,)* *n.* A lake of Russia, govts. of Tver and Novgorod. *Ext.* 30 m. long, and 10 broad.
Sel'lim, the name of three emperors of the Turks: — SELIM I., son of Bajazet II., b. 1467; dethroned his father and killed his two brothers 1512; defeated the shah of Persia 1514; conquered Syria and Egypt 1516-1517; d. 1520. — SELIM II., succeeded his father, Soliman II., in 1566; took Cyprus from the Venetians 1570, and Tunis from the Spaniards in 1571. In the same year he lost the great naval battle of Lepanto; d. 1574. — SELIM III., son of Mustapha III., b. 1761, succeeded his uncle, Abdul-hamed, 1789. The studies which he had diligently pursued, and the intercourse which he had held with eminent statesmen, made him ambitious of being a reformer; but the ill-fortune of the Turks in the wars with Russia and Austria, and the numerous rebellions and insurrections in the various provinces of the empire, long prevented his attempting the task. War with France followed, and Egypt was conquered, but it was recovered by the English and restored to S. In 1800 he became protector to the Ionian Islands, and peace being established, he applied himself to the difficult work of internal reform. The organization and discipline of the army, the constitution of the divan, and the system of taxation were the matters which he sought to regulate. War with Russia again broke out in 1806, the new army organization, *Nizam Jedid*, excited immense dissatisfaction, and in May, 1807, the janissaries revolted, and Selim was deposed, imprisoned, and in the following year strangled, July 28, 1808.
Sel'insgrove, in Pennsylvania, a post-borough or Snyder co., 50 m. N. of Harrisburg.
Sel'kirk, ALEXANDER, a Scottish adventurer, b. at Largo, Fife, 1676. He was a skilful seaman, and made several voyages to the South Sea, in one of which, having quarrelled with his commander, he was put ashore on the Island of Juan Fernandez, with a few necessaries, a fowling-piece, gunpowder, and shot. Here he lived alone

during four years and four months, and was then rescued by Captain Woods Rogers. During the time of his remaining on the island he had nearly forgotten his native language. He returned to England in 1711, and is said to have given his papers to Defoe, who took from them his story of *Robinson Crusoe*; but there is little doubt that the latter was indebted to Selkirk for little more than the main idea of the work.
Sel'kirk, a town of Scotland, cap. of a small co. of same name, situated on a commanding eminence below the confluence of Yarrow and the Ettrick, near the borders of Roxburghshire, 38 m. from Edinburgh. *Manuf.* Woollen goods. *Pop.* 4,000.
Selkirk, in S. Carolina, a post-village of Mariou, dist., 48 m. S.E. of Cheraw.
Sell, *n.; pl. SELLS.* Self. (*A Scotticism.*)
Sell, *n. [Fr. selle; Lat. sella, for sedula, from sedes, a seat.]* An elevated seat or throne.
Sell, *v. a. [A. S. syllan, to give, to deliver up.]* To give or deliver in exchange for money, or security for money; to exchange for money; to yield or give for a consideration; the word correlative to *buy*. — To betray for money; as, he *sold* his country. — To impose upon; to trick. (*Colloq.*)
To sell one's life dearly, to cause as much loss as possible before the taking of one's life.
—v. n. To practice selling; to have commerce. — To be sold.
—n. A trick; the act of making a fool of one. (*Colloq.*)
Sel'lenders, Sel'landers, *n. pl. [Fr. solandres.]* (*Far.*) A disease in a horse's hock, similar to MALANDERS.
Seller, *n.* The person who sells; a vender.
Sellersburg, in Indiana, a post-village of Clarke co., 9 m. N. of Jeffersonville.
Sellersville, in Pennsylvania, a post-borough of Bucks co.
Sel'ma, in Alabama, a flourishing city, cap. of Dallas co., 70 m. W. of Montgomery. *Pop.* (1897) 10,200.
Selma, in Missouri, a village of Jefferson co., 35 m. S.W. of St. Louis.
Selma, in Ohio, a post-village of Clark co., 14 m. E.N.E. of Xenia.
Sel'ters, and Lower Sel'ters, two villages in Germany, abt. 10 m. from Frankfort-on-the-Main, noted for their most celebrated mineral springs.
Selvage, Selvedge, *(sel'vij,)* *n. [Ger. sahl, sal, signifying extension, especially in length, and edge.]* The edge of cloth, where it is closed by complicating the threads; a woven border, or border of close work.
Selvagee, *(-jee'), n. (Naut.)* A skein of rope-yarns or spun-yarn marled together.
Selves, *pl. of SELF, q. v.*
Sem'ao, an island of the Eastern Archipelago, separated by a narrow strait from the island of Timor. *Ext.* 20 m. long, and 8 m. in average breadth.
Semaphore, *(-fôr,)* *n. [Fr. sema, a sign, and pherein, to bear.]* A term used synonymously with *telegraph*; but which may be applied to any system of communicating intelligence by signals.
Sematology, *n. [Gr. sema, sematos, a sign, and logos, a discourse.]* The doctrine of the use of signs, particularly of verbal signs, in the operation of thinking and reasoning, comprehending the theory of grammar, logic, and rhetoric.
Sem'blance, *n. [Fr., from Lat. similis, like.]* Likeness; resemblance; actual similitude. — Appearance; show; figure; form.
Sem'ble, *v. n. [Fr. sembler.]* (*Law.*) A term frequently used before the statement of a point of law which has not been directly settled, but about which the court have expressed an opinion, and intimated what a decision should be.
Semé, *(sâ-mâ'), a. [Fr. sown.] (Her.)* Applied to a shield covered with small charges over its entire surface.
Semecarp'pus, *n. [Gr. samikoo, to mark; karpos, fruit.] (Bot.)* A genus of plants, order *Anacardiaceae*. *S. anacardium* yields the *marking-nuts* of India, which are employed, with the fruits of *Holigarna longifolia*, in preparing the celebrated *black varnish of Sylhet*. This is extensively used for lacquer-work, and for marking linen. The seeds are edible, like those of the cashew. See ANACARDIUM.
Sem'ele, *(Myth.)* A daughter of Cadmus by Hermoine, was beloved by Jupiter; but Juno, determining to punish her rival, visited the house of Semele in the guise of her nurse, and persuaded her to entreat her lover to come to her with the same majesty as he approached Juno. Jupiter had sworn by the Styx to grant Semele whatever she required; he therefore came attended by the clouds, the lightning, and thunder-bolts. Semele, unable to endure so much majesty, was instantly consumed with fire. Her child was, however, saved from the flames by Mercury. This child was called Bacchus, or Dionysius.
Semen, *n. [Lat.] (Anat.)* The spermatic secretion of the male.
S. contra. (Med.) The pharmaceutical name for a drug composed of the dried leaves and flower-heads of *Artemisia sieberi*, and some allied species. It is a celebrated vermifuge.
Semen'dria, a town of European Turkey, in Servia, on the Danube, 20 m. S.E. of Belgrade; *pop.* 10,000.
Semerone, or CIMARRON, *(see'me-ron,)* a river of the Indian Territory, rises in the Rocky Mountains; Lat. 37° N., Lon. 104° 35' W., and after a S.E. course of abt. 600 m. falls into the Arkansas in Lat. 36° 10' N., Lon. 96° 15' W.
Semes'ter, *n. [Ger.; Fr. semestre, from Lat. sex, six, and mensis, a month.]* A term of six months.
Semi, *[Lat.]* A prefix which, used in composition, signifies half; as, *semicircle*, half a circle.

Semiamplex'icaul, *a.* [Lat. *semi*, *amplexus*, to embrace, and *caulis*, a stem.] (*Bot.*) Half clasping the stem, as a leaf.

Semi-an'nual, *a.* Half yearly.

Semi-Arianism, *n.* The belief of the Semi-Arians. **Semi-Arians**, *n. pl.* (*Ecl. Hist.*) A branch of the Arians, who denied the *consubstantiality* of the Son with the Father, but admitted the *similarity of substance*.

—*a.* Relating to the Semi-Arians, or to their doctrines.

Semi-breve, *n.* (*Mus.*) A note whose length is half that of a breve. It is the longest note generally used in modern music, and is the integer whose fractions are usually adopted to express the length of other notes.

Semi-chorus, *n.* (*Mus.*) A chorus sung by a part of the choir.

Semi-circle, (*-sir'kl*) *n.* The part of a circle comprehended between its diameter and half its circumference.

—Any body in the form of a half circle.

Semi-circled, (*-sir'kld*) *a.* Half round.

Semicircular, *a.* Having the form of half a circle.

Semicircumference, *n.* Half of the circumference.

Semicolon, *n.* (*Punctuation.*) The point (;) marking a greater distinction of sense than a comma, but less than a colon.

Semi-column, *n.* Half of a column.

Semi-columnar, *a.* Resembling half a column; especially applied to botanical objects.

Semi-compact, *a.* Half compact.

Semi-entical, *a.* (*Math.*) Applied to a parabola which may be referred to coordinate axes such that the squares of the ordinates of its points shall be to each other as the cubes of the abscisses of the same points.

Semi-en'binn, **Semi-en'pium**, *n.* [L. Lat., from Lat. *semi*, and *cupa*, a tub.] (*Med.*) A half-bath, or such as receive only the hips or extremities.

Semi-demi-semiquaver, (*Mus.*) A note, of which 8 are equivalent to a quaver, 32 to a minim, and 64 to a semibreve. It is represented thus:

Semi-diameter, *n.* (*Geom.*) Half the diameter; the radius of a circle or sphere.

Semi-diapason, (*-pa'zn*) *n.* (*Mus.*) An octave diminished by a minor semitone.

Semi-diapente, *n.* (*Mus.*) An imperfect or false fifth. — *Moore.*

Semi-diaphane'ity, *n.* Half-transparency; imperfect transparency.

Semi-diaph'aneous, *a.* Half-transparent; imperfectly transparent.

Semi-diatessaron, *n.* (*Mus.*) A defective or false fourth.

Semi-dit'one, *n.* (*Mus.*) A lesser third having its terms at 6 to 5; a hemiditone. (*R.*)

Semi-diur'nal, *a.* Relating to half a day.

Semi-double, *n.* (*Bot.*) Having the innermost stamens perfect, while the outermost stamens have become petaloid.

Semi-florescent, **Semi-floret**, *n.* (*Bot.*) A ligulate floret.

Semi-flores'entous, **Semi-flores'entular**, *a.* (*Bot.*) Noting that the flowers of a head are ligulate.

Semi-fluid, *a.* Half-fluid; imperfectly fluid.

Semi-form, *n.* An imperfect form.

Semi-formed, *a.* Half-formed.

Semi-hourly, *a.* Half-hourly.

Semi-in'durated, *a.* Imperfectly hardened.

Semi-lapid'ified, (*-fid*) *a.* Half-changed into stone.

Semi-lenticular, *a.* Half, or imperfectly, resembling a lens.

Semi-liquid, *a.* Half-liquid.

Semi-liquid'ity, *n.* The state of partial liquidity.

Semi-lun'ar, **Semi-lun'ary**, or **Semi-lun'ate**, *a.* Resembling in form a half-moon.

Semi-metal'lic, *a.* Relating to a semi-metal.

Seminal, *a.* [Lat. *seminalis*, from *semen*, seed.] Pertaining to seed, or to the elements of production. — Contained in seed; radical; rudimental; original.

Seminal leaf, (*Bot.*) The first leaf of a plant, directly developed from the cotyledon.

Seminar'ian, **Seminar'ist**, *n.* [Fr. *seminariste*.] A person educated in a seminary; — especially, one educated for the Roman Catholic priesthood.

Seminary, *n.* [Lat. *seminarium*, from *semen*, a seed.] Any school, academy, college, or university in which young men are instructed in the several branches of learning.

(*Roman Catholic Church.*) A college appointed for the instruction and education of young men destined for the priesthood.

Seminary, in *Illinois*, a township of Fayette co.

Seminat'ion, *n.* [Lat. *seminatio*.] The act of sowing or spreading; dissemination.

(*Bot.*) The natural dispersion of seeds.

Seminiferous, *a.* [Fr. *seminifère*, from Lat. *semen*, seed, and *ferro*, to bear.] Producing seed.

Seminific, **Seminifical**, *a.* [Lat. *semen*, seed, and *facere*, to make.] Productive of seeds or semen.

Seminoles, a tribe of American Indians, originally a vagrant branch of the Creeks, whose name, *Seminole*, signifies "wild" or "reckless." In 1805, they aided in driving the Appalaches from Florida; and in 1817, they joined with the Creeks and some negroes who had taken refuge with them, ravaged the white settlements in Georgia, plundering plantations, and carrying off slaves, whom

they refused to surrender. General Jackson, sent to punish them, took at the same time several Spanish forts, and hastened the negotiations which ended in the cession of Florida to the U. States. By this cession, in 1823, the S. engaged to retire into the interior, and not molest the settlers; but as the negroes continued to take refuge with them, a treaty was made with some of the chiefs, in 1832, for the removal of the whole tribe W. of the Mississippi. This treaty was repudiated by the tribe, at the instigation of Osceola (*q. v.*), one of their chiefs. A war commenced, in which battles and skirmishes were of constant occurrence, and with various results. This war, which lasted seven years, and cost the government about \$10,000,000, and the loss of 1,466 lives, ended in 1842, when the S., except some 200 who took refuge in remote places, were removed to the Indian Territory, where nearly all the members of the tribe are now settled. They number about 3,000, receive an annuity of \$25,000, have churches and government schools, and are under the training of missionaries of the Presbyterian denomination.

Semiography, *n.* [Gr. *semeion*, sign, and *graphein*, to describe.] (*Med.*) A description of symptoms or signs of disease.

Semiology, *n.* [Fr. *semeiologie*, from Gr. *semeion*, a sign, and *logos*, discourse.] (*Med.*) The branch of pathology which treats of the symptoms or signs of disease.

Semiopal, *n.* (*Min.*) A silicious mineral, nearly resembling the common opal, but differing from it in being harder and more opaque, in exhibiting a less perfect conchoidal fracture, and in the muddiness of its colors. It is found at Okehampton in Devonshire, and in Cornwall, Eng., at Wheal Buller, and near St. Ives and St. Just.

Semi-orbicular, *a.* Having the shape of half a sphere.

Semi-osseous, (*-osh'us*) *a.* Half as hard as bone; partially bony.

Semipalatinsk', ("the seven palaces,") a fortified town of Siberia, govt. of Tomsk, on the Irtysh, 250 m. S.W. of Barnaul; Lat. 50° 15' N., Lon. 79° 30' E.; pop. 7,000.

Semipalmate, **Semipalmated**, *a.* (*Zool.*) Having the toes connected together by a web extending along only their proximal half.

Semiped, *n.* [Lat. *semipes*, from *semi*, half, and *pes*, a foot.] (*Prosody*) Half a foot.

Semipedal, *a.* Containing half a foot.

Semi-Pelagianism, *n.* (*Ecl. Hist.*) A modification of the doctrines of the Pelagians, consisting chiefly in maintaining the sufficiency of man's natural power, only so far as regards the first act of conversion to God, and the initial act of man's repentance for sin. *S.-P.* took its rise in 428, from John Cassian, a pupil of Chrysostom at Marseilles. The Council of Orange, July 3, 529, established the Augustinian doctrines in opposition to those of the Pelagians and Semi-Pelagians, as did that of Valence, in July or Aug., 530; and Pope Boniface II. confirmed the decree in 530.

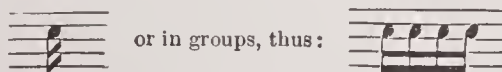

Semi-pellucid, *a.* Half-clear; imperfectly transparent.

Semi-pellucid'ity, *n.* State or quality of being imperfectly transparent.

Semi-perspic'uous, *a.* Half-transparent; imperfectly clear.

Semi-proof, *n.* The proof of a single evidence. (*R.*)

Semi-quaver, *n.* (*Mus.*) A note of half the duration of the quaver; the sixteenth of the semi-breve. It is represented thus:

—*v. a.* To sing in semi-quavers.

Semiram'is, a queen of Assyria, of whom we have little certain historical knowledge. She is generally regarded as the wife of Ninus, and is said to have put him to death. The traditions agree that she reigned forty-two years after Ninus; she was called *Rea*, on account of her atrocities. See *NINUS*.

Semisopoch'no, or **ISLE OF THE SEVEN MOUNTAINS**, an island of the Aleutian Archipelago; Lat. 51° 59' N., Lon. 179° 45' 57" W.

Semi-sosp'iro, *n.* [It.] (*Mus.*) A pause equal to an eighth of a bar in common time.

Semitch Islands, (*sa-mitch'*) a group of the Aleutian Archipelago, N.E. of the island of Attou.

Semi-tertian, (*-ter'shan*) *n.* (*Med.*) An intermittent fever possessing the characteristics of the tertian and quotidian.

—*a.* (*Med.*) Possessing the characteristics of the tertian and quotidian intermittent fevers.

Semitic, *a.* Relating to Shem, or to his descendants; as, the *Semitic languages*.

Semitic languages (*Philology.*) The name of a family of languages which is divided into three branches, — the *Aramaic*, the *Hebraic*, and the *Arabic*. The *Aramaic* occupied the north, including Syria, Mesopotamia, and a portion of the ancient kingdoms of Babylonia and Assyria. It is known to us chiefly in two dialects, the *Syriac* and the *Chaldee*. A translation of the Bible was made in this dialect in the 2d century. Christian literature dating from the 4th century is rich in it, and it is still spoken, albeit in a very corrupt form, by the Nestorians of Kurdistan, as well as by some Christian tribes in Mesopotamia. The language adopted by the Jews during the Babylonian captivity had the name of *Chaldee* given to it. The Jews adopted this language of their conquerors, both for conversation and for literary purposes; yet they always retained a knowledge of their sacred language. The *Aramaic* was a dialect trans-

planted from Babylonia to Palestine. It was the dialect spoken by Christ and his disciples. Later, the Jews adopted the Arabic as their literary language, retaining it till the 13th century, after which they returned to a form of modernized Hebrew, which they still continue to make use of for learned discussions. The Arabic, or Southern class of the Semitic, includes the Ethiopic and the Illyralitic inscriptions, both being dead languages, while the living languages belonging to this class are the Arabic and the Aramaic. The Hebraic, or middle class of the same family, includes Biblical Hebrew, the Samaritan of the 3d century, the Carthaginian, and the Phœnician inscriptions, among its dead languages; its living dialects being represented by the modernized Hebrew of the Jews. The Aramaic, or Northern class, of the Semitic family of tongues, has only one living representative, the Neosyriac; the Chaldee, the Syriac of the 2d century, and the cuneiform inscriptions of Babylon and Nineveh being all dead languages.

Semitone, *n.* (*Mus.*) The half of a tone. Strictly speaking, this is not a proper definition of it, inasmuch as semitones are of different lengths, according to their nature. A *diatonic semitone* is when the name of the note changes, as, for example from C to D \flat , or from B to C. A *chromatic semitone* is when the note is merely altered by a sharp or a flat, as from C to C \sharp , or from D to D \flat .

Semitone'ic, *a.* Pertaining to a semitone; consisting of a semitone, or of semitones.

Semi-vocal, *a.* Half vocal; pertaining to a semi-vowel; imperfectly sounding.

Semi-vowel, *n.* (*Gram.*) One of those consonants which, like vowels, can be pronounced independently, or without the aid of any other letter. To this class belong *b, c, d, g, k, p, s, t, v, x, and z*.

Semlin, a fortified town of Austria, in Slavonia, on the Danube, 3 m. N.W. of Belgrade, and 40 m. S.E. of Peterwardein. It is the principal entrepôt of the trade between Austria and Turkey.

Semmes, RAPHAEL, (*sems*) the commander of the Confederate privateer *Alabama*, b. in Maryland, about 1810, was appointed, 1828, a midshipman on board the *Lexington*, and rose by successive steps to the rank of commander in 1855. He was nominated, in 1858, secretary to the Lighthouse Board, which situation he held when the war broke out. He then joined the Confederate service, March 26, 1861, and was made commander of the war-steamer *Sumter*. With this vessel he caused considerable damage to the U. States merchant navy, and having been driven into the port of Gibraltar by stress of weather, sold her to a "neutral." He was then ordered to take the command of a vessel built in England, and known at first as "290," which afterward became famous as the *Alabama*. His exploits, while commander of this vessel, although not so dashing as those of Paul Jones during the first American war, were far more destructive. After having inflicted an enormous amount of loss on our national commerce, the *Alabama*, which had been into Cherbourg for repairs, encountered outside the harbor a U. States war-steamer, the *Kearsarge*, Capt. John A. Winslow, June 10, 1864. A French man-of-war followed her to prevent any violation of international law. The fight took place about 9 miles from Cherbourg, and was both short and decisive. The *Kearsarge*, a powerful ship, was defended by iron chains slung over the bulwarks, upon which the shot of the *Alabama* could make but little impression; and in rather more than an hour from the beginning of the fight the *Alabama* was completely disabled. The crew tried to reach the French coast with her, but failed in the attempt, and she began to sink. S., and some of the sailors, including 13 officers, were saved by the boats of an English steam-yacht, the *Dovermouth*, which had accompanied the *Alabama* from Cherbourg to be a spectator of the fight. S. succeeded, after some difficulty, in making his way back to the Southern States; but the effectual blockade of their ports deprived him of any further chance of continuing his adventurous career. He wrote the *Cruise of the Alabama and Sumter*, and the *Log of the Alabama*, published in London in 1864; also, *Memoirs of Service Afloat*, published in Baltimore in 1868. D. near Mobile, Ala., Aug. 30, 1877.

Semola, **Semolino**, *n.* [Fr. *semoule*; It. *semolino*.] A light and wholesome food formed from wheaten flour into small grains. By the mode of preparation, all the gluten of the flour is preserved, and only the starch and carbonaceous matters removed.

Sempach, a small town of Switzerland, cant. of Lucerne, on Lake Sempach, 7 m. N.W. of Lucerne. It is noted for the defeat of the Austrians by the Swiss in 1386, when Arnold von Winkelried was killed. Pop. 1,000. The lake is 4 m. long and 1 m. broad.

Sempervivum, *n.* [Lat., from *semper*, always, and *vivere*, to live.] (*Bot.*) A genus of succulent or herbaceous plants, order *Crassalaceae*. *S. tectorum*, the common Houseleek, is a well-known plant, with thick fleshy leaves, arranged in the form of a double rose. It is commonly to be met with on the tops of outhouses and cottages, and is considered to possess cooling properties. *S. cæspitosum* has been known to remain alive in a herbarium for eighteen months, and, when subsequently planted, to grow.

Sempiternal, *a.* [Fr. *sempiternel*; Lat. *sempiternus*, from *semper*, and *æternus*, eternal.] Everlasting; eternal in futurity; endless.

Sempiternity, *n.* [Lat. *sempiternitas*.] Future duration without end.

Sempronius, a name of frequent occurrence in Roman history. The principals who have borne it were the GRACCHI, *q. v.* Besides these may be mentioned—

SEMPRONIUS ASELLIO, a military tribune of Rome, distinguished in Spain B. C. 137. — **SEMPRONIUS LONGUS**, consul of Rome B. C. 217, distinguished in the field against Hannibal. — **SEMPRONIUS TUDITANUS**, a Roman tribune and commander, who was consul B. C. 203, and defeated Hannibal at Crotona. The others of the name are of less mark.

Sempronius, in *New York*, a post-township of Cayuga co., 13 m. S.E. of Auburn.

Semur, (*sai'moor*), a town of France, dept. of Côte d'Or, 34 m. N.W. of Dijon; *pop.* 4,000.

Se'na, or **Sen'na**, a Portuguese settlement, in S.E. Africa, in Mozambique, on the river Zamhesi, 110 m. N.W. of Quilimane.

Se'nary, *a.* [Lat. *senarius*, from *seni*, six each.] Of six; belonging to six; containing six.

Sen'ate, *n.* [Fr. *sénat*; Lat. *senatus*, an assembly of elders.] (*Anc. Hist.*) The deliberative assembly of the Roman people; but the term has been applied to very different powers and constitutions in different countries. In the Greek republics, as well as among the Romans, the number of senators was regulated by the number of tribes into which the state was divided. Accordingly, while Attica was divided into four tribes, the number of senators was 400; and when the number of tribes was increased to ten, the number of senators was also enlarged to 500. The Roman Senate, during the primitive days of the city, participated in the judicial and executive powers of the king, and even in the management of military affairs. Romulus was said to have originated the Senate; but in doing this, he only imitated all the civilized nations dwelling on the shores of the Mediterranean, who all deemed it necessary to have an assembly of the elder citizens of the state, besides a popular assembly. Under Tarquinius Priscus, the number of senators was increased to 300, each of the 300 houses (*gentes*), which composed the three tribes, having its *decurio*, or representative head, in the Senate. Subsequently, the election of the senators was made by the censor reading aloud once in every lustre (five years) the names of the senators, the worthiest first, the one first named being styled *princeps senatus*. Those who were deemed unworthy of the dignity were degraded by the omission of their names. The senators were chiefly drawn from the ranks of the equestrian order. In the days of the Republic, a senator was required to possess property to the value of about \$22,500, and in the days of Augustus of about \$32,500. The Senate was assembled by the supreme officers of government, deciding the propositions laid before it, article by article, by a majority of voices. A decree of the Senate was called *senatus consultum*. If the decree was opposed by the tribune, or if the Senate was not full, the act was termed *senatus auctoritas*, and was submitted to the people, whose tribunes could reject every proposition by their vote. The Senate had within its jurisdiction all matters of public administration, questions of peace or war, the choice of public officers, and the financial concerns of the republic. Under the Empire, the Senate gradually lost its political consideration, but until the time of Constantine the Great many of its decrees took the place of the laws enacted by the people. In the end, it became so submissive to the will of the emperor, that it often decided upon the propositions of the ruler, without deliberation and with acclamation.

(*Amer. Pol.*) See CONGRESS.

(*French Hist.*) The title of the upper legislative chamber of France under Napoleon I., and Napoleon III., and also since, in our day, under the actual present republic. The Senate is composed of 300 members, of which 75 hold their seats for life, the vacancies being filled by the choice of the Senate. The remaining 225 seats are divided by lot into 3 classes of 75 each, one class going out at successive periods of 3 years.

Senato'bia, or **SINATOBIA**, in *Mississippi*, a post-village of De Soto co., 40 m. S. of Memphis.

Sen'ator, *n.* [Lat.] A member of a senate.

Senato'rial, *a.* [Fr.; Lat. *senatorius*.] Pertaining to, or becoming, a senator.

Senato'rially, *adv.* In the manner of a senate; with dignity or solemnity.

Senato'rian, *a.* Same as **SENATORIAL**, *q. v.* (R.)

Sen'atorship, *n.* The office of a senator.

Send, *v. a.* [A. S. *sendan*; Ger. *senden*; Goth. *sandjan*.] To dispatch from one place to another, as on an errand or message. — To commission by authority to go and act. — To convey by the agency of another; to transmit; not to bring. — To cause to come, fall, or happen to; to bestow; as, "if God *send* life." — To emit; to hurl; to let fly; to cast or shoot. — To propagate; to diffuse, as sound or music.

To *send forth* or *out*, to produce, as the branches of a tree. — To diffuse; to emit, as a fragrant odor.

— *v. n.* To dispatch an agent, a messenger, or message for some purpose.

(*Naut.*) To pitch suddenly and violently into the trough of the sea.

To *send for*, to require by message to come, or cause to be brought.

Send'er, *n.* One who sends.

Sen'eca, **LUCIUS ANNEUS**, a celebrated Roman philosopher, was the son of M. Annæus Seneca, an eminent rhetorician, and was born at Corduba, in Spain, about the beginning of the Christian era. Taken early to Rome, he became an advocate, gained some distinction, and was made *questor*. But under Claudius, his intimacy with Julia, daughter of Germanicus, and an accusation of adultery with her, brought against him by the infamous Messalina, led to his being banished to Corsica, where he lived eight years. For a time he alleviated the bitterness of exile with the consolations of

philosophy, but he afterwards stooped to the basest adulation and the most servile entreaties to Claudius to be allowed to return to Rome. In A. D. 49 he was recalled, through the influence of Agrippina, who was just married to Claudius. He was made *prætor*, and then tutor to Agrippina's son, the future Nero. S. ingratiated himself with the young prince, and continued to enjoy his favor after his accession to the throne. How far the philosopher strove to correct the vices of the emperor, or whether he did not rather wink at, or even pander to them, cannot perhaps be ascertained. But the philosopher grew immensely rich, had a palace sumptuously furnished at Rome, country seats and splendid

gardens, and an enormous amount of ready money. After long profiting by the favor of Agrippina, he took her son's part against her, probably sanctioned, tacitly, if not expressly, her murder by her son, and wrote Nero's letter of justification to the Senate. He soon after lost the favor of the emperor, who coveted his money; and by the emperor's permission he quitted Rome for the country. In A. D. 65, S. was accused of taking part in the conspiracy of Piso, his intimate friend, and was ordered to put himself to death. He opened a vein in each arm, then in his legs, but the blood flowed very slowly; a dose of hemlock had no effect, and at last his tortures, which he bore with stoical fortitude, were ended by suffocation in a warm bath. His writings were very numerous, and many are still extant; among them are treatises *De Ira*, *De Consolatione*, *De Providentia*, *De Animi Tranquillitate*, and *De Vitæ beatâ*; 124 Letters to Lucilius; 10 Tragedies; and a remarkable work entitled *Questionum Naturalium Lib. VII.* S. attached himself chiefly to the Stoic school, but adopted also principles from other systems. His works abound in quotable maxims and sentiments; his language is lucid and vigorous; but he is over-fond of antithesis. His style, like his conduct at his death, had a theatrical affectation about it. His works have been very much read, and very frequently republished.

Fig. 2335. — SENECA,
(After an ancient bust.)

Sen'eca, in *Illinois*, a post-village of La Salle co., 12 m. E. of Ottawa. — A twp. of McHenry co.

Sen'eca, in *Kansas*, a city, cap. of Nemaha co., 32 m. E. of Marysville. *Pop.* (1895) 1,961.

Sen'eca, in *Michigan*, a flourishing post-township of Leauwee co.

Sen'eca, in *New York*, a central co.; *area*, 346 sq. m. *Rivers*, Seneca and Clyde. *Lakes*, Seneca and Cayuga. *Surface*, undulating; *soil*, fertile. *Min.* Iron and gypsum. *Caps.* Ovid and Waterloo. — A post-town of Ontario co., about 25 m. E. of Canandaigua.

Sen'eca, in *Ohio*, a N. co.; *area*, 544 sq. m. *Rivers*, Sandusky, and Honey and Green creeks. *Surface*, level; *soil*, fertile. *Cap.* Tiffin. *Pop.* (1897) 44,300. — A township of the above county. — A township of Monroe county. — A township of Noble county.

Sen'eca, in *Wisconsin*, a post-village and township of Crawford co., 18 m. N.N.E. of Prairie-du-Chien. — A township of Green Lake co.

Sen'eca Creek, in *Maryland*, enters the Potomac from Montgomery co.

Sen'eca Creek, in *Ohio*, rises in Monroe co., and enters Wills creek at Cambridge, Guernsey co.

Sen'eca Falls, in *New York*, a flourishing post-village and township of Seneca county, 43 miles W.S.W. of Syracuse.

Sen'eca In'dians, a tribe of North American Indians belonging to the Iroquois, and formerly occupying W. New York and a portion of N.W. Pennsylvania. They were once powerful; and their most famous chief was Sagoyewatha, or "Red-Jacket." They now occupy reservations in Kansas.

Sen'eca Lake, in *New York*, inclosed E. by Schuyler and Seneca cos., and W. by Stenben, Yates, and Ontario; 40 m. long, and from 2 to 4 wide, is abt. 210 feet above Lake Ontario, into which it falls through the Seneca and Oswego rivers. It is 630 feet deep, and is surrounded by beautiful scenery.

Sen'eca Oil, *n.* A name sometimes given to petroleum, after the Seneca Indians, who discovered it in Pennsylvania and used it as a medicine.

Sen'eca River, rises in the S.W. of N. Carolina, and flows S., falling into the Tugaloo River, in Anderson dist., S. Carolina.

Sen'eca River, in *New York*, which flows E., forming the outlet of Canandaigua, Cayuga, Seneca, Oswego, Skaneateles, and Onondaga lakes, after which it flows N. under the name of Oswego River, entering Lake Ontario at Oswego.

Sen'eca-root, *n.* (*Bot.*) See POLYGALA.

Sen'eca-ville, in *Ohio*, a post-village of Guernsey co., 10 m. S.E. of Cambridge.

Sen'e'cio, *n.* (*Bot.*) The Groundsel, a genus of plants, order *Asteracea*, remarkable as being probably the most extensive in point of species in the whole vegetable kingdom. They are spread over all parts of the globe, nearly 900 different kinds being known to botanists. The Groundsel (*Senecio vulgaris*) and the Ragwort, or Ragweed (*S. Jacobæ*), afford a good idea of the appearance of the European species, the most noteworthy of which is, perhaps, the well-known *S. cineraria*, better known in gardens as *Cineraria maritima*, extensively used for planting

Fig. 2336. — GOLDEN SENE'CIO.

in flower-beds for the sake of contrast with scarlet and other colors, its beautiful foliage being clothed with short white down. The Golden Senecio, *S. aureus* (Fig. 2336), an American species found in all the States, in meadows, woods, &c., is a handsome plant, with golden-yellow flowers; stem 1-2 feet high, single or branched above, terminating in a kind of umbellate, single or compound corymb.

Sen'ell, (*sen'el*), a town of Belgium, prov. of Hainault, 6 m. S.W. of Nivelles, famous as the scene of a sanguinary battle, in 1674, between the Prince of Orange, afterwards William III. of England, and the French, under the Prince of Condé, in which the latter were victorious; *pop.* 4,000.

Sen'egal, (*sen'e-gawl*), a large river in W. Africa, rises in Mount Cooro, in Lat. 10° 30' N., Lon. 10° 40' W., flows first N.W. and then W., and falls into the Atlantic after a course of 1,000 m., for the last 740 of which it is navigable for flat-bottomed boats. Here and there, throughout the whole course, the navigation is interrupted by cataracts, shoals, and rocks. In the lower course, the river forms numerous, large, cultivated, and very fertile islands, and its banks are green and productive, and in part clothed with wood. The entrance is difficult on account of breakers, and a bar, which in the dry season is covered by only 8 to 9 feet of water.

Sen'egal, a French colonial establishment, on the W. coast of Africa, comprising several islands and small portions of the African continent between the Senegal and Gambia rivers. The soil is sandy along the coast, but very fertile inland. *Prod.* Cotton, indigo, coffee, hemp, cassia, millet, maize, &c. *Manuf.* Principally iron-working and ship-building. *Exp.* Gum, hides, ivory, cabinet-woods, gold-dust, and wax. It is governed by a superior naval officer, who resides at St. Louis. The climate is unhealthy. *Chief towns.* St. Louis, the cap., and Goree. *Pop.* 198,135.

Sen'egamb'ia, an extensive maritime region of W. Africa, formerly comprised between Lat. 10° and 18° N., Lon. 4° and 17° 30' E., having N. Sahara, E. Soudan, S. the colony of the Sierra Leone, and W. the Atlantic; *area*, 400,000 sq. m. It derives its name from the Senegal and Gambia, its principal rivers. It is level and fertile along the coast, but mountainous in the interior. S. is subject to France, and as now constituted extends along the coast from Cape Blanco to the mouth of the Senegal and inland as far as the Niger, including a number of "protected" states known collectively as French Soudan. Eastward the French "sphere of influence" extends indefinitely inland, reaching Lake Tsad and embracing the Sahara. Of this France occupies little more than the colonies of the Senegal.

Sen'es'ence, *n.* [Lat. *senescens*, from *senescere*, to grow old.] The state of growing old; decay by time.

Sen'es'ent, *a.* Growing old.

Sen'es'chal, (*sen'e-shal*), *n.* [Fr. *senéchal*; L. Lat. *senescallus*, *senescalcus*; O. Ger. *seneschal*, from *sene*, old, and *scalc*, or *scalh*, a servant.] A steward; formerly, an officer in the house of princes and dignitaries, who had the care of the house, and the superintendence of feasts and domestic ceremonies.

Sen'ex, in *Illinois*, a post-village of McLean co., 16 m. S.E. of Bloomington.

Se'n'ight, (*sen'nit*), *n.* [Contracted from *seven-night*, *as fortnight* from *fourteen-Night*.] The space of seven nights and days; a week.

Se'n'ile, *a.* [Lat. *senilis*, from *senex*, *senes*, old, from *seneo*, to be old.] Pertaining to old age; proceeding from age.

Se'n'ility, *n.* State of being old; old age; imbecility proceeding from old age; dotage.

Senior, (*seen'yur*), *a.* [Lat. comp. of *senex*, old.] More advanced in years or office; elder.

— *n.* One older than another, or one more advanced in life. — One who is older in office, or one whose first entrance into office was anterior to that of another; one who has priority of rank. — An aged person.

Senior'ity, *n.* State of being senior; eldership; superior age; priority of birth. — Priority in office; priority of rank.

Senjen. (*sen'yen*), one of the Loffoden Islands, off the N.W. coast of Norway. *Extent*, 45 m. long and 30 broad. *Pop.* 3,000.

Senlis. (*san'le*), a town of France, dept. of Oise, on the Notte, a tributary of the Marne, 29 m. S.E. of Beauvais. *Manuf.* Cotton thread. *Pop.* 6,000.

Senna. *n.* [*Fr. séné*.] (*Med.*) The dried leaves of several plants of the genus *Cassia*, *q. v.* *S.* acts on the system as a strong and effective cathartic, and though apt to gripe in its operation, and somewhat heating in its nature, is a very useful, and, for children, a very valuable drug. The griping tendency can always be prevented by the addition of a few caraway or coriander seeds to the infusion, while its heating qualities can be corrected by the addition of Rochelle salts, which at the same time adds much to the efficacy of its action.

Sennaar. (*sen-nar'*), a negro state of E. Africa, forming the S. portion of Nubia (*q. v.*), between the rivers Bahr-el-Abiad and Bahr-el-Azrek. Its cap., Sennaar, is situated on the Bahr-el-Azrek, or Blue Nile, 150 m. S. of Khartoum; Lat. 13° 34' 36" N., Lon. 33° 30' 30" E. *Pop.* of township, 4,000.

Sennacherib. (*-nāk-*), King of Syria, succeeded his father Salmanneser, B. C. 712. Hezekiah, King of Judah, having refused to pay him tribute, he entered his country, where he took several fortresses, and laid siege to Jeru-

Fig. 2337.—SENNACHERIB ON HIS THRONE,
(From a sculpture in Kouyunjik Palace, Nineveh.)

salem; but his army being slain in the night by the Destroying Angel, he was obliged to return to his own country, where he was killed by his two sons, in the temple, B. C. 707.

Senne. (*sen*), a river of Belgium, rising in Hainault, and, after a N. course of 55 m., joins the Dyle 3 m. W. of Mechlin.

Sennerut. (*sen'ner-oot*), an island off the S.W. coast of Greenland, N.W. of Cape Desolation; Lat. 61° 25' N., Lon. 45° W.

Sen'nett. in New York, a post-village and township of Cayuga co., 4 m. N.E. of Auburn; *pop.* abt. 2,500.

Sen'nit. (*Naut.*) A flat, braided cordage, formed by plaiting rope-yarns or spun-yarns together. (*Com.*) Plaited straw or palm-leaves, &c., used in making straw-hats.

Sens. (*sans*), a town of France, dept. of Yonne, on the Yonne, 30 m. S.E. of Auxerre, and 60 m. S.E. of Paris; *pop.* 11,000.

Sen'sate, Sen'sated. *a.* That is perceived by a sense, or by the senses.

Sensation. (*sen-sā'shun*), *n.* [*Fr.*; from *L. Lat. sensatio*, from *Lat. sensus*.] An impression. The mental impression, feeling, or state of consciousness resulting from the action of external things on some part of the body, said, on that account, to be *sensitive*. The *S.* are classified according to the bodily organs concerned in their production. Thus, we have sight by the eye, hearing by the ear, touch by the skin, smell by the nose, and taste by the mouth. The difference of the mental feeling or consciousness in the various senses is very strongly marked, so that we never confound a taste with a sound, or a touch with a smell. In addition to these, physiologists commonly distinguish a sixth sense, of a more vague character, under the title of *common* or *general sensibility*, including the several feelings of pleasure and pain, comfort and discomfort, warmth, chilliness, hunger, thirst, &c. An important subject connected with our senses is their education. Our senses have to be educated, *i. e.*, to be drawn out and developed. We have to learn to see, to hear, and to touch. Many hundred repetitions are necessary before what we call a *S.* (*i. e.*, a distinct feeling, corresponding to that which the object will always produce upon the developed sense,) can be produced. Many *S.* are necessary to produce a perception;—a perception is a cluster of *S.* with an ideal element added. On the educated sense, objects act so as instantaneously to produce what we call their *S.*; on the uneducated sense they act only so as to produce a vague impression, which becomes more and more definite by repetition. The effects of education upon the senses are seen in the acute taste of the wine or tea-taster, the hearing of the musician, the touch of the pianist, &c.

Sensational. *a.* Relating to, or implying, sensation. **Sensationalism,** or **Sensualism.** (*Philos.*) A term applied to those systems which either directly or indirectly deduce all our knowledge from sensation, or from the experience which sense affords. The 18th century was particularly rich in sensational philosophers, the principal of whom were Condillac in France,

and Hartley and Darwin in England. Condillac, in his celebrated work, *Traité des Sensations* (1754), attempts to show that "all our knowledge and all our faculties are derived from the senses, or, to speak more accurately, from sensations." He was a professed follower of Locke, and imagined that he was only following out his principles to their legitimate consequences, though Locke, indeed, does not sufficiently distinguish between sensations, and recognizes the two as being perfectly distinct. The opposite of *S.* is *intellectualism* or *idealism*.

Sensationalist. *n.* One who advocates or believes in sensationalism.

Sense. *n.* [*Lat. sensus*, from *sentire*, to perceive, to discern by the senses.] Perception by the senses, which are five:—*sight, hearing, smelling, tasting, feeling.* See SENSATION.

—Perception by the intellect; apprehension; discernment.—Moral perception.

—*pl.* The channel of communication by which the mind derives part of its materials of thought from the external world.—Quickness or acuteness of perception; understanding; soundness of faculties.—Opinion; notion; judgment; consciousness; conviction.—Meaning; import; signification.

Senseless. *a.* Lacking sense; wanting life; void of all life and perception.—Unfeeling; wanting sympathy.—Unreasonable; foolish; stupid; acting without sense or judgment.—Contrary to reason or sound judgment.

Senselessly. *adv.* In a senseless manner; stupidly; unreasonably.

Senselessness. *n.* State or quality of being senseless; unreasonableness; folly; stupidity; absurdity.

Sensibility. *n.* [*Fr. sensibilité*; *L. Lat. sensibilitas*.] State or quality of being sensible; that faculty of living parts by which they are capable of impressions; susceptibility of impressions upon the organs of sense.—The capacity of feeling or perceiving the impressions of external objects.—Acuteness of sensation; capacity or acuteness of perception; susceptibility of quick and keen emotions.—Delicacy of feeling; actual feeling.—Quality of being easily affected.

Sensible. *a.* [*Fr.*; *Lat. sensibilis*.] Capable of being affected through the senses; susceptible of sensation.—Having the capacity of receiving impressions from external objects; capable of perceiving by the instrumentality of the proper organs.—Perceiving, or having perception, either by the mind or the senses.—Having moral perception; capable of being affected by moral good or evil.—Having acute intellectual feeling; being easily or strongly affected.—Having good sense; judicious; wise; reasonable.

—*n.* Whatever is perceptible around us; that which is capable of affecting some sense; that which is the object of sense.

Sensibleness. *n.* State or quality of being sensible; sensibility.—Reasonableness; judgment.

Sensibly. *adv.* In a sensible manner; in a manner to be perceived by the senses; perceptibly to the senses or mind.—With intelligence or good sense; judiciously; feelingly.

Sensiferous. *a.* [From *Lat. sensus*, and *ferre*, to bear.] Producing sensation. (*R.*)

Sensific. *a.* [*Lat. sensificus*.] Causing or producing sensation.

Sensism. *n.* Same as SENSUALISM, *q. v.*

Sensitive. *a.* [*Fr. sensitif*; *L. Lat. sensitivus*.] Having sense or feeling, or having the capacity of receiving impressions from external objects.—Having quick and acute sensibility.

—That affects the senses. (*R.*)
—Pertaining to, or depending on, sensation; sentient. (*Physic.*) Easily affected; easily acted upon by the touch.

(*Chem. and Photog.*) Readily affected or changed by certain appropriate agents; as, iodized silver is extremely sensitive to the action of light.

Sensitively. *adv.* In a sensitive manner.

Sensitiveness. *n.* State or quality of being sensitive, or of having quick and acute sensibility, either to the action of external objects, or to impressions upon the mind and feelings.

Sensitive-paper. *n.* (*Photog.*) Paper prepared for photographic purposes by being rendered sensitive to the effect of light.

Sensitive-plant. (*Vegetable Physiol.*) The name generally applied to a small annual, called *Mimosa pudica*, inhabiting the tropics of America. It has a stem about a foot and a half high, covered with stiff hairs; the leaves are bipinnate in a somewhat digitate manner; and the flowers are collected in small pink balls. It derives its name from the irritability of its leaves, which collapse and fold up when touched, or even when irritated by casting on them the fumes of a burning glass, or by exposing them to the vapor of hydrocyanic acid. The cause of this irritability has been investigated by Dutrochet (*Mémoires pour servir à l'Hist. Anat. et Phys. des Végétaux*, &c., vol. i., 534), who refers the phenomenon to the action of endosmosis, and to the operation of a "fibrous tissue capable of moving inward under the influence of oxygenation." The nature of the phenomena may be thus explained: When the leaf of a sensitive plant is at rest, it consists of many leaflets spreading flat, and connected in pairs along the sides of certain common leaf-stalks. When one of these leaflets is irritated, the pair to which it belongs rise upward, and apply their faces to each other; this is rapidly followed by the same action in the succeeding leaflets, and in the course of a few seconds the whole of the leaflets are in a state of collapse; then the leaf itself suddenly bends downward; and if the plant is in very good health, the shock thus communicated to one leaf

will extend to those immediately above and below it. After a time the leaf resumes its original position. Upon the approach of night, that is to say, upon the withdrawal of light, the leaf falls of itself into the same state, without any special irritation. This kind of irritability is by no means confined to the *Mimosa pudica*; on the contrary, some other species of the same genus, as the *M. dormiens*, *sensitiva*, *casta*, *somnians*, *palpitans*, &c., possess the same property, as is indicated by their names. And among the leguminous order, it is also found beyond the genus *Mimosa*, as in the *Hedy-sarum gyrans*, whose three leaflets are in a continual state of dancing or balancing during the day. In fact, the folding their leaves at night, which is universal in all the compound-leaved species of this order, is the same thing feebly exercised. Nor is such irritability confined to this order; the ternate and pinnate-leaved species of *Oxalis* and *Dionea muscipula*, and numerous other plants, exhibit similar phenomena.

Sensitivity. *n.* The state or condition of being sensitive.

Sensorium. *n.*; *pl.* Eng. SENSORIUMS; *pl.* Lat. SENSORIA. [*Lat.*, from *sentio*, *sensus*, to discern by the senses.] (*Physiol.*) It was long attempted to determine some one point in the brain where the soul is more especially located or centralized; and to this ideal point the name of *Sensorium* was applied in the elder psychological speculations. The fancy of Descartes made it a small body near the base of the brain, called the "pineal gland." The recent views of the nervous system repudiate the idea of a central point of this nature; in consciousness, the brain generally is active, although, under different impressions and ideas, the currents may be presumed to follow different nerve-tracks. Consequently, no meaning is now attached to a sensorium in psychology, as distinct from the cerebrum at large. The term is actually applied by physiologists to a series of ganglionic centres, each of which has the power of communicating to the mind the impressions derived from the organ with which it is connected, and of exciting automatic or involuntary muscular movements in response to these sensations. (See Carpenter *On the Functions of the Nervous System in Human Physiology*, 6th ed., p. 545.)

Sen'sory. *a.* Connected with the sensorium, or with sensation.

Sensual. (*sen'shu-al*), *a.* [*Lat. sensualis*, from *sensus*, sense.] Pertaining to the senses, as distinct from the mind or soul; consisting in, or affected by, the senses, or derived from them.—Carnal; not spiritual or holy.—Given to the indulgences of the appetites; voluptuous; luxurious.

Sensualism. *n.* Sensuality; state of subjection to sensual feeling and appetite; devotedness to sensual indulgence.

(*Philos.*) The doctrine that all our knowledge is derived originally from the senses. See SENSATIONALISM.

Sensualist. *n.* A person given to the indulgence of the senses or appetites; one who places his chief happiness in carnal pleasures; a voluptuary; an epicure.

Sensualist'ic. *a.* Sensual.—Adopting or teaching the doctrines of Sensualism.

Sensuality. *n.* [*Fr. sensualité*.] Quality of being sensual; devotedness to the gratification of the bodily appetites; free indulgence in carnal or sensual pleasures.

Sensualization. *n.* The act of rendering sensual; the act of being sensualized.

Sensualize. *v. a.* To make sensual; to subject to the love of sensual pleasure; to debase by carnal gratifications.

Sen'sually. *adv.* In a sensual manner.

Sen'sualness. *n.* Sensuality.

Sen'suism. *n.* Sensualism.

Sen'suous. *a.* Pertaining to sense; sensual; connected with sensual objects; full of feeling or passion.

Sen'suously. *adv.* In a sensuous manner.

Sen'suousness. *n.* Quality of being sensuous.

Sent. *imp. and pp.* of SEND.

Sentence. *n.* [*Fr.*; *Lat. sententia*, from *sentis*. See SENSE.] An opinion; a determination or decision; a judgment.—A maxim; an axiom; a short saying containing moral instruction.—A judgment pronounced by a court or judge upon a criminal; a judicial decision publicly and officially declared in a criminal prosecution; a period.

(*Gram.*) The form of words in which a thought or a proposition is expressed. A mere phrase or group of words, such as, "A very high mountain," which only conveys a meaning or calls up an idea, but does not make an affirmation, is not a sentence. Since speech is the expression of thought, the sentence is the proper unit or integer of speech, and thus forms the starting-point in the study of language. Every single sentence is made up of two parts—the one naming the subject, or the something that is spoken about; the other the predicate, or the something that is said of it; as, "The sun—shines;" "Those who have the greatest gifts, and are of the greatest usefulness—are the most humble." Every sentence must contain a finite verb, as it is the function of the verb to make affirmations. "The sun shines," is an example of a sentence in its barest form, containing merely the subject "sun," and the predicate "shines," which are called the *principal* elements. The enlargement or development of the sentence takes place by means of adjuncts, or *secondary* elements, tacked on to the principal elements; as, "Young birds build nests without experience."

—*v. a.* To pass or pronounce sentence upon; to pronounce the judgment of a court on; to doom; to adjudge; to condemn; to devote to punishment.

Sen'tencer. *n.* One who sentences.

Senten'tial, *a.* Comprising sentences; pertaining to a sentence or full period.

Senten'tially, *adv.* By means of sentences.

Sententions, (*-ten'shus*), *a.* [Fr. *sentencieux*; Lat. *sententiosus*, from *sententia*.] Abounding with sentences, axioms, and maxims; short and energetic; full of meaning; very expressive; pithy; terse.

Senten'tiously, *adv.* In short, expressive periods; with striking brevity and energy; pithily; tersely.

Senten'tiousness, *n.* Quality of being sententious; pithiness of sentences; brevity with strength.

Sen'tient, *a.* [Lat. *sentiens*, from *sentio*, to feel, hear, see, &c., to perceive.] Having sensation, or the capacity of sensation; affected through the senses; sensitive; having the faculty of perception.

Sen'tiently, *adv.* By sensation.

Sen'timent, *n.* [Fr.] A thought prompted by passion or feeling; opinion; notion; judgment; the decision of the mind formed by deliberation or reasoning; the sense, thought, or opinion contained in words, but considered as distinct from them; sensibility; feeling; emotion; tenderness; a particular disposition of mind, as love, hatred, &c.; a striking sentence in a composition; the idea which governs the general conception of a work of art.

Sentiment'al, *a.* Abounding in sentiment; having feeling; abounding with sentiments, or just opinions or reflections; expressing quick intellectual feeling; exciting to sensibility; affecting sensibility; maudlin.

Sentiment'alism, *n.* Sentimentality; affectation of exquisite sensibility; a sickly or affected mode of thinking, whether exhibited in speaking or in writing.

Sentiment'alist, *n.* One who affects sentiment, fine feeling, or exquisite sensibility.

Sentiment'al-ity, *n.* State or quality of being sentimental; affectation of fine feeling or exquisite sensibility.

Sentiment'alize, *v. n.* To form, cherish, or affect sentiment or sensibility.

Sentiment'al-ly, *adv.* In a sentimental manner; with intellectual feeling or sensibility.

Sen'tinel, *n.* [Fr. *sentinelle*; It. *sentinella*, from Lat. *sentia*.] One set to see, hear, or perceive; a soldier set to watch or guard an army, camp, or other place, from surprise, to observe the approach of danger and give notice of it; a vidette; a sentry.

Sen'tinelled, *a.* Furnished with a sentinel.

Sen'try, *n.* [Corrupted from *sentinel*.] A sentinel; a soldier placed on guard; patrol; watch; the duty of a sentinel.

Sen'try-box, *n.* A box to cover a sentinel at his post, and shelter him from the weather.

Sen'za, *prep.* [It.] (*Mus.*) A term which signifies without; as, *senza stromenti*, without instruments, *senza violini*, without violins.

Seoul, or **Söul**, *cap. of Corea*. See KING-KI-TAO.

Se'pal, *n.* (*Bot.*) One of the divisions of the calyx.

Sep'alons, *a.* Relating to sepals.

Separability, **Sep'arableness**, *n.* Quality of being separable, or of admitting separation or disunion.

Sep'arable, *a.* [Fr. *séparable*; Lat. *separabilis*, from *separo*. See SEPARATE.] That may be separated, disjoined, disunited, or rent asunder.

Sep'arably, *adv.* In a separable manner.

Sep'arate, *v. a.* [Lat. *separo*, *separatus* — *se*, and *paro*, to put, set, or place in order.] To put or set apart; to cause to be by itself; to part, in almost any manner, as things either naturally or casually joined; to disunite; to disjoin; to make a space between; to disconnect; to divide; to sever; to disassociate; to remove.

—*v. n.* To part; to be disunited; to be disconnected; to withdraw from each other; to be divided.

—*a.* [Lat. *separatus*.] Parted or divided from the rest; being parted from another; disconnected; disjoined; disunited; detached; unconnected; distinct; different; withdrawn; removed; disunited from the body; disengaged from corporeal nature.

Sep'arately, *adv.* In a separate or unconnected state; apart; distinctly; singly.

Sep'arateness, *n.* State of being separate.

Sep'aratical, *a.* Relating to separation; sectarian.

Sep'aration, *n.* [Fr. *séparation*; Lat. *separatio*.] Act of separating, severing, or disconnecting; disjunction; state of being separate; disunion; disconnection; the operation of disuniting or decomposing substances; divorce; disunion of married persons.

Sep'aratism, *n.* Act of separating; disposition to withdraw from a church; a practice of withdrawing.

Sep'aratist, *n.* [Fr. *séparatiste*.] One who separates or withdraws from a church, or rather from an established church, to which he has belonged; a dissenter; a seceder; a schismatic; a sectarian.

Sep'arative, *a.* Relating to separatists.

Sep'arativ-ly, *adv.* Relating to, or as tending to separate.

Sep'arator, *n.* One who separates.

Sep'aratory, *n.* A vessel for separating fluids of different densities from each other.

Sep'awn, *n.* (Written also *sepon*.) Maize boiled in water. [U. S.]

Se'pia, *n.* [Lat., from Gr. *sepia*, the cuttle-fish.] (*Zoöl.*) See SEPIADE.

(*Painting*) A pigment used as a water-color. It is prepared from the secretion of the ink-bag of the *Sepiade*, q. v. This secretion is black at first, and insoluble in water, but extremely diffusible through it; it is therefore agitated in water to wash it, and then allowed slowly to subside, after which the water is poured off, and the sediment, when dry enough, is formed into cakes or sticks. In this state it is called *India-ink*. If,

however, it is dissolved in a solution of caustic potash, it becomes brown, and is then boiled and filtered, after which the alkali is neutralized with an acid, and the brown pigment is precipitated and dried; this constitutes the proper sepia. It is usually prepared in Italy, great numbers of the species which yield it most abundantly, *Sepia officinalis*, being found in the Mediterranean. The black kind, called *India-ink*, is prepared in China, Japan, and India, and forms the common writing-ink of those countries.

Sepi'ade, *n. pl.* (*Zoöl.*) The Cuttle-fish family, comprising cephalopods whose calcareous internal shell or cuttle-bone consists of a broad laminated plate, terminating behind in a hollow imperfectly chambered apex.

They are distributed world-wide, and are from three inches to three feet long. The best known species is *Sepia officinalis*, the common or official Cuttle-fish (Fig. 2338). Its body is somewhat oval, but broader at the head than at the extremity, which is obtusely pointed. The head is furnished with eight arms and two feet, the latter being nearly similar in structure to the arms or tentacula, but considerably longer in their dimensions. A neck divides the head from the body, which is furnished on each side throughout its entire length with a narrow fin. The back is strengthened by a calcareous plate, well known as the *Cuttle-fish bone*. This bone was in former times in great repute among apothecaries as an absorbent; but now it is chiefly used in the form of a powder, to polish the softer metals. The term *bone*, however, is properly inapplicable to the calcareous shield of the Cuttle-fish, as in its composition it is exactly similar to shell, and consists of various membranes hardened by carbonate of lime, without the smallest mixture of phosphate. It is also termed the *Ink-fish*. Beneath its throat is a bladder, in which is secreted a black fluid, and which, when pursued, it ejects, so staining the water that it easily escapes. It has the chameleon-like power of changing its color.

Sep'im-ent, *n.* [Lat. *sepiumentum*, from *sepire*, to inclose.] A hedge; a fence.

Sepino, (*sai-pe'no*), a town of S. Italy, prov. of Molise, *Manuf.* Woollen goods and paper. *Pop.* 4000.

Sepoy Rebellion. In 1857, the natives of Upper India rebelled. Massacres took place at Cawnpore, Delhi, and Ihansi. It was put down only by the energetic action of the British and the loyal native troops.

Sepoys, (*se'pois*), *n. pl.* [Hind. *sipahi*, soldiers.] The name given in India to native soldiers disciplined in the European manner. The S. now in the pay of the English government form a large and well-trained army.

In general, the men composing this army are somewhat smaller than European soldiers; but they are brave, hardy, and active, capable of undergoing much fatigue, and of sustaining great privations. Previous to the mutiny of the Bengal army in 1857, the East-Indian army consisted of a far greater number of native than of European troops; and to them Great Britain is chiefly indebted for her Indian empire. The French were the first to see that the transportation of troops would be too expensive, and that Europeans would perish in great numbers by the exposure at sea and in the climate of India. In consequence they took Hindoos into their pay, and the same policy was adopted by the English.

In 1858, the native army, with the whole of the East India Company's troops, were transferred with the government of India, and placed under the British crown. Since that time, the native army has been greatly reduced, the government seeking the recruits for its colonial army chiefly from the Sikh population, and not, as formerly, from the Hindoo.

Seps, *n.* [Gr., from *sepo*, to putrefy, in reference to the effects of its bite.] (*Zoöl.*) A genus of saurian reptiles, which have a long, round, serpentiform body, and four very short legs, each terminated in the common seps (*Seps chalcides*) by only three toes.

Sept, *n.* [It. *ceppo*; Lat. *cippus*; Heb. *shebet*, a staff, rod.] A clan, race, or family descended from a common progenitor; — used of the ancient races or families in Ireland and the Highlands of Scotland.

Sept'angle, *n.* (*Geom.*) A figure having seven sides and seven angles.

Septan'gular, *a.* Having seven angles or sides.

Septem'ber, *n.* [Lat., from *septem*, seven.] This month, so called from its being the seventh month in the Roman year, established, as is supposed, by Romulus, is the ninth month in the so-called calendar of Numa.

Several of the Roman emperors gave names to this month in honor of themselves; but, unlike the months of July and August, the name of September has outlived every other appellation.

Septem'brists, *n. pl.* (*Fr. Hist.*) The name given to the agents in the dreadful massacre which took place in Paris on Sept. 2, 1792, during the French Revolution. The numbers that perished in this massacre have been variously given; but the term has become proverbial throughout Europe for all that is bloodthirsty and malignant in human nature.

Fig. 2338. — CUTTLE-FISH,
(From Tenney's Zoölogy.)

Septem'vir, *n.; pl.* SEPTENVIRI. [Lat.] (*Antiq.*) One of the priests who, in ancient Rome, had for duty to prepare the sacred feasts at games, processions, and on other solemn occasions. Their number was increased from 3 to 7, it is supposed by Sylla.

Sep'tenary, *a.* [Lat. *septenarius*, from *septem*, seven; Fr. *septenaire*.] Consisting of seven. — Containing seven years.

—*n.* The number seven. (R.)

Septen'nial, *a.* [Lat. *septennis*, from *septem*, and *annus*, a year.] Lasting, or continuing, seven years. — Happening or returning once in every seven years.

Septen'nially, *adv.* Once in seven years.

Septen'trial, *a.* Pertaining to the north; septentrional.

Septen'trio, *n.* (*Astron.*) The Great Bear. See URSA.

Septen'trion, *n.* [Fr.; Lat. *septentrion*.] The north, or northern regions of the globe. (R.)

Septen'trion, Septen'trional, *a.* [Fr. *septentrional*; Lat. *septentrionalis*.] Northern; pertaining or relating to the north.

Septen'trionate, *v. a.* To make northing; to north; to tend or point toward the north.

Sep'tet, Sep'tette, Sep'tuor, *n.* [It.] (*Mus.*) A musical composition for seven instruments or voices.

Sep't-foil, *n.* [Lat. *septem*, seven, and *folium*, leaf.] (*Ecol.*) In the Roman Catholic Church, a typical figure composed of seven equal segments of a circle, used to denote the number of the sacraments, gifts of the Holy Ghost, &c.

Sept-frères, (*set-frair'*) ("Seven Brothers,") a group of small islands off the N. coast of the Island of Hayti, abt. 30 m. N.E. of Cape Haytien.

Sep'tic, *n.* A substance having the power of putrefying bodies.

Sep'tic, Sep'tical, *a.* [Fr. *septique*, from Gr. *septikos*, from *sepein*, to make putrid.] Having the property of promoting putrefaction.

Septic'id-al, *a.* [Lat. *septum*, a partition, and *cadere*, to cut.] (*Bot.*) Denoting that mode of dehiscence in which the fruit is resolved into its component carpels, which split asunder through the dissepiments.

Septicity, (*-tis'*), *n.* Disposition to putrefaction.

Septif'erious, *a.* [From Lat. *septifarium*, seven-fold.] Presenting seven different courses.

Septif'erous, *a.* [Lat. *septum*, partition, and *ferre*, to bear.] (*Bot.*) Producing septa.

Septifol'ions, *a.* [Lat. *septem*, and *folium*, leaf.] (*Bot.*) Seven-leaved.

Septiform, *a.* Seven-formed.

Septifragal, *a.* [Lat. *septum*, a partition, and *frangere*, *fractum*, to break.] (*Bot.*) That mode of dehiscence in fruits in which the backs of the carpels separate from the dissepiments, whether formed by their sides or by expansions of the placenta.

Septilat'eral, *a.* [Lat. *septem*, seven, and *latus*, *lateris*, a side.] Seven-sided; as, a *septilateral* figure.

Septillion, (*sep'til'yun*), *n.* [From Lat. *septem*, seven.] According to the English notation, the number expressed by a unit with 42 ciphers attached; according to the French notation, the number expressed by a unit with 24 ciphers attached.

Septisyl'lable, *n.* [Lat. *septem*, seven, and *syllabus*, syllable.] A word consisting of seven syllables.

Septuagen'arian, Septuagen'ary, *n.* A person seventy years of age.

Septuagenary, (*-āj'-*), *a.* [From Lat. *septuaginta*, seventy.] Consisting of seventy.

Septuagesima, (*-jēs'-*), *n.* (*Ecol.*) The third Sunday before Lent, or before Quadragesima Sunday, being about seventy days before Easter.

Septuages'im-al, *a.* Comprising, or consisting of, seventy.

Septuagint, (*-jint*), *n.* [Lat. *septuaginta*.] (*Script.*) A Greek version of the Old Testament, so called because it was said to be the work of seventy, or rather seventy-two, interpreters, about 280–270 B. C.

Sep'tuary, *a.* [From Lat. *septem*, seven.] Something composed of seven, as a week.

Sep'tulate, *a.* (*Bot.*) Having imperfect or spurious septa.

Sep'tum, *n.; pl.* SEPTA. [Lat. *septus*, part, of *sepio*, to fence in.] A partition separating two cavities; — specifically,

(*Bot.*) Any partition separating a body into two or more cells in a direction parallel with the longer axis, in distinction from partitions parallel with the shorter axis, called *phragmata*.

(*Anat.*) The plate or wall which separates from each other two adjoining cavities; as, the *septum narium*.

(*Conch.*) The partition of a chambered cell.

Sep'tuor, *n.* (*Mus.*) See SEPTET.

Sep'tuple, *n.* [Fr., from L. Lat. *septuplus*.] Sevenfold; seven times as much.

—*v. a.* (*imp.* and *pp.* SEPTUPLED.) To make sevenfold; to multiply by seven.

Sepulchre, (*sep'ul-kér*), *n.* [Fr. *sépulcre*, from Lat. *sepulchrum*.] A burial-place; a grave; a tomb; any place wherein the dead body of a human being is interred.

—*v. a.* To inter; to entomb; to bury; as, *sepulchred* with pomp.

Sepul'chral, *a.* Pertaining, or relating, to a sepulchre, or to burial, to the grave, or to monuments erected to the memory of the dead; as, a *sepulchral* urn, a *sepulchral* inscription. — Hence, deep; grave; hollow; as, a *sepulchral* voice.

Sepul'ga, a river of Alabama, rises in Butler co., and flows into the Conecuh river in Escambia co.

Sepulture, *n.* [Fr., from Lat. *sepultura*, from *sepelin*.] Burial; entombment; interment; act of depositing the

dead body of a human being in the grave; as, to administer the rites of *sepulture*.

Sequacious, (*se-kwā'shūs*), *a.* [Lat. *sequax*, *sequacio*, from *sequor*, to follow.] Having tendency or disposition to follow a leader; attendant; not moving on or acting independently; following; as, a *sequacious* herd.—Hence, ductile; pliant; malleable; manageable; as, *sequacious* metal. (*R.*)—Possessing or manifesting logical consecutiveness; logically consistent and consequential in development or transition of thought; as, *sequacious* thinking.

Sequaciousness, *n.* State or quality of being sequacious; tendency or disposition to follow or move after.

Sequacity, (*se-kwā's-i-ty*), *n.* [Lat. *sequacitas*, from *sequax*.] Sequaciousness; ductility; pliancy; tendency or inclination to follow.

Sequarions, *a.* Same as SEQUACIOUS, *q. v.*

Sequatchie, **Sequatchee**, or **Sequatehy**, (*se-kwā'tchee*), in Tennessee, a river which rises in Bledsoe co., and enters the Tennessee River at Jasper, Marion co., after a S.W. course of 100 m.

—A S.E. co.; area, 252 sq. m. It is traversed by the Sequatchie river. Surface, hilly; soil, generally fertile. Cap. Dunlap. Pop. (1897) 3,270.

Sequel (*se'kwel*), *n.* [Fr. *séquelle*; Lat. *sequela*, from *sequor*, to follow.] That which follows; a succeeding part; continuation; as, the *sequel* of a novel.—That which results or is deducible; event; consequence; result; issue; as, the *sequel* will be the *sequel* of so criminal a career.—Consequentialness; logical sequence; inference of consequential action; as, a *sequel* to an argument.

Sequel'a, *n.*; *pl.* SEQUELÆ, *n.* [Lat., a result, from *sequor*, to follow.] The person who, or thing which, follows; as, (1.) A follower, or a set of followers.—(2.) That which follows as the logical result of a ratiocinative process; inference; conclusion; deduction; suggestion.—(3.) (*Med.*) The consequential effect of a disease.

Sequence, (*se'kwens*), *n.* [Fr., from L. Lat. *sequentia*—*sequens*, *sequor*, to follow.] State or quality of being sequent; order of following; succession.—That which follows, succeeds, or comes after; sequel; consequence.—Series; arrangement; method; as, the *sequence* of the seasons.

(*Games*.) A set of cards immediately following each other in the same suit; as, a *sequence* of trumps.

(*Mus.*) A similar succession of chords ascending or descending diatonically.

(*Ecc.*) In the Roman Catholic Church, a hymn introduced in the mass on certain festival days, and recited or sung immediately before the gospel, and after the introit, whence the name.

Sequent, (*se'kwent*), *a.* Following; succeeding; as, a *sequent* occurrence.—Consequential. (*R.*)

—*n.* A sequence; a sequel; a deduction; that which follows as a result or consequence. (*R.*)

Sequential, (*se-kwēn'shal*), *a.* Following or succeeding in order.

Sequentially, *adv.* In succession; by following.

Sequester, *v. a.* [Fr. *sequester*; L. Lat. *sequestro*, from *sequor*, to follow.] To put apart; to separate from other things.—To deposit; to place, for safe-keeping, in the hands of a mediator or depository.

(*Civil Law*.) To take from parties in controversy, and put into the holding of an indifferent person; to separate from the owner for a time; to seize or take possession, as of some property that belongs to another, and hold it till the profits have paid the demand for which it is taken; to take from parties in dispute, and put into the possession of a third and disinterested person; as, to *sequester* an estate for the benefit of creditors.

To *sequester one's self*, to withdraw, retire, or seclude one's self for the sake of privacy or solitude; to hold one's self aloof from society; as, he has *sequestered himself* from public life.

—*v. n.* (*Law*.) To renounce, as a widow, any interference with her late husband's estate.

—*n.* (*Law*.) One who mediates between two parties; a mediator; an arbitrator; an umpire or referee.

Sequest'able, *a.* That may be sequestered; liable to separation or sequestration.

Sequest'rate, *v. a.* Same as SEQUESTER, *q. v.*

Sequestration, (*se-kwēs-trā'shun*), *n.* [Fr., from L. Lat. *sequestratio*, from Lat. *sequester*.] State of being sequestered, separated, or set aside; separation; seclusion or retirement from society.

(*Civ. and Com. Law*.) The separation or setting aside of a thing in controversy from the possession of both the parties who contend for it, to be finally awarded to the one adjudged to be entitled to it.—In chancery practice, a process for enforcing the decrees or orders of the court by seizure of the property of a person guilty of disobeying them.—(*International Law*.) The seizure of the property of an individual for the use of the state;—particularly applied to the seizure and appropriation, by a belligerent power, of debts due from its subjects to the enemy.

Sequest'rator, *n.* One to whom the safe-keeping of sequestered property is committed.

Sequest'rum, *n.* [Lat.] (*Surg.*) A piece of dead bone;—so styled because of its becoming separated from the sound portion.

Sequin, CHEQUIN, ZEQUIN. (*se'kwīn*), *n.* [Fr.; It. *zaccino*, from *zecca*, a mint.] A gold coin formerly current in Italy and Turkey, varying in value from \$1.81 to about \$2.31.

Sequoia, *n.* (*Bot.*) A genus of trees, order *Pinaceæ*, belonging to N.W. America, and consisting of two species only. *S. sempervirens*, the Redwood of the timber trade, extends from Upper California to Nootka Sound. It at-

tains gigantic dimensions, being frequently more than 300 feet high. *S. gigantea*, the Big, or Mammoth tree (Fig. 2339), was at first thought to be confined to a single spot, the so-called Mammoth Grove of Calaveras

in the State of California; but it has since been found in the Mariposa and Fresno groves, and in various other parts of the Sierra Nevada, though nowhere attaining such a height as in the spot where it was first discovered, in June, 1850, by an American hunting-party. The tallest tree of the Mammoth Grove, stripped of its bark for the purpose of being exhibited, was 327 feet high, and at the base was 90 feet in circumference. The greatest dimensions seem to have been attained by a tree which was found broken at a height of 300 feet, and which measured at that place 18 feet in diameter. Considering that it was 112 feet in circumference at the base, and tapered regularly to the point where broken, it is calculated to have been, when in the fulness of its growth, 450 feet high. It was at first thought that these trees might be 3,000 years old; but some botanists, by actual counting of the concentric rings, have been led to think that that estimate must be reduced to about 1,100 years.

Fig. 2339. — BIG, OR MAMMOTH, TREES, (*Sequoia gigantea*.)

Seraglio, (*se-rāl'yo*), *n.* [Fr. *sérai*; Turk. *serāy*, a palace; Pers. *sērāi*.] The palace of the Grand-Seignior or Sultan of Turkey;—improperly applied to that part of the building which is occupied by the women of the imperial court. The principal gate of the Seraglio is the *Babi Humayun*, or "Sublime Porte," whence the ordinary designation of the Turkish government is derived.—Hence, a harem; a suite of apartments for the residence of wives, or odalisques [concubines].—Hence, also, by implication, a place of licentious debauchery; as, to maintain a *seraglio*.

Serāi, *n.* [Pers. *sērāi*, a palace, an inn.] In Tartary and other countries of W. and Central Asia, an inn; a caravansary; a hospice for travellers.

Seraing, (*se-rang'*) a town of Belgium, prov. of Liege, on the Meuse, 30 m. from Liege; pop. 5,000.

Seralbumen, *n.* [From *serum*, and *albumen*.] (*Chem.*) The albumen of the blood.

Serampore, (*se-ram-por'*) a town of British India, presidency of Bengal, formerly a Danish settlement, on the Hooghly River, 12 m. N. of Calcutta.

Serangan, a group of small islands in the Eastern Archipelago, 15 m. S. of Mindanao, between Lat. 5° and 6° N.

Serapé, (*sā-rā'pā*), *n.* [Sp.] A sort of outer garment, resembling a poncho, worn by Hispano-Americans, Mexicans, &c.

Seraph, (*sēr'af*), *n.*; Eng. *pl.* SERAPHS; Heb. *pl.* SERAPHIM. [Fr. *séraphin*, from Heb. *seraph*, to be eminent or noble.] An angel of the highest order surrounding the throne of God. The prophet Isaiah—vi. 2, 3—represents them as reverently adoring the triune God, and burning with zeal to fly and execute his will. Each one had six wings, with two of which he covered his face, with two his feet, and with the two others he flew. They cried to one another, and said, "Holy, holy, holy is the Lord of hosts; the whole earth is full of his glory!"—Hence, a being of celestial grace or loveliness.

Seraph'ic, **Seraph'ical**, *a.* [Fr. *séraphique*.] Pertaining, or having reference, to a seraph; becoming or befitting a seraph; angelic; pure; sublime; refined from grossness or sensuality; as, *seraphic* love, a *seraphic* countenance.—Glowing or imbued with love, zeal, or enthusiasm; as, *seraphic* fervor.

Seraph'ically, *adv.* In the manner of a seraph.

Seraph'icalness, **Seraph'icism**, (*-sīzm*), *n.* State, quality, or character of a seraph.

Seraphim, *n. pl.* (*Script.*) See SERAPH.

Seraphine, *n.* (*Mus.*) A keyed musical instrument in which the sounds were produced by the action of wind on free vibratory reeds. It was the precursor of the Harmonium, (*q. v.*)

Serapis, *n.* [Lat. and Gr.] (*Egypt. Myth.*) A deity (Fig. 2340) supposed to be the same as Osiris. There was a magnificent temple erected in his honor at Memphis, another at Alexandria, and a third at Canopus. The worship of Serapis was introduced at Rome by the Emperor Antoninus Pius, A.D. 146; but, on account of its licentiousness, it was soon abolished.

Seraskier, (*se-ras'kēr*), *n.* [Pers. *ser-asker*, head, chief.] The title given to commanders-in-chief of the Turkish armies.

Serb, *n.* A native of Serbia.

Sere, *a.* (See SEAR.) Dry; withered; sear; no longer green; as, in the *sere* and yellow leaf.

Fig. 2340. SERAPIS. (From a Seal in the Brit. Museum.)

Sere'na, in Illinois, a post-township of La Salle county.

Serenade, (*sēr'e-nāde*), *n.* [Fr., from It. *serenata*, fine weather at night, from Lat. *serenus*, clear, fair, bright.] (*Mus.*) Music performed in the open air on a clear or serene night;—usually applied to a musical concert given in the night, especially by gentlemen in a spirit of gallantry, under the windows of ladies. This practice was formerly very general in Spain and Italy, but has latterly fallen greatly into desuetude in those countries; however, it is still very common in the German university towns, where the students are in the habit of assembling in the evening under the windows of a favorite professor, and offering him a musical ovation. It is also practised to a considerable extent in some of the cities of the U. States, as a tribute of esteem tendered to some public or notable individual.—Also, a song composed for such, or the like occasions.

—*v. a.* To entertain with nocturnal music; as, to *serenade* a prima-donna.

—*v. n.* To perform a serenade or concert of nocturnal music.

Serena'ta, **Ser'enate**, *n.* (*Mus.*) A serenade.

Serene, (*se-rēn'*), *a.* [Fr. *serein*; Lat. *serenus*.] Clear; fair; bright; cloudless; calm; still; as, *serene* weather.—Calm; tranquil; undisturbed; placid; unruffled; as, a *serene* temper, a *serene* demeanor.

Serene *highness*, a title of courtesy applied to certain European princes, immediately below the rank of *grand-duke*, and *reigning duke*.

—*n.* Serenity; placidity; tranquillity; calmness; quietude;—used poetically. (*R.*)

—*v. a.* [It. and Lat. *serenare*.] To render clear and calm; to appease; to quiet; to tranquillize.—To clear; to make bright or pellucid.

Serenely, *adv.* In a serene manner; tranquilly; calmly; quietly.—With equanimity or unruffled temper; coolly; composedly; as, "*serenely* pleasant, calmly fair."—*Prior*.

Serene'ness, *n.* State or quality of being serene; serenity.

Serenity, *n.* [Fr. *sérénité*; Lat. *serenitas*, from *serenus*.] State, condition, or quality of being serene; clearness and calmness; quietness; stillness; peace; absence of agitation, cloudiness, or disturbance; as *serenity* prevailed throughout the country.—Calmness or composure of mind; evenness of temper; undisturbed state of the feelings or passions; quietude; coolness; as, he met his fate with *serenity*.

Sere'no, in Pennsylvania, a post-village of Columbia co., 14 m. E.N.E. of Danville.

Serep'ta, in New Jersey, a post-village of Warren co.; 6 m. N.E. of Belvidere.

Ser'es, or **Sirus**, a fortified town of European Turkey, in Roumelia, on Lake Takinos, 45 m. N.E. of Salonica. It contains numerous handsome mosques and public fountains. *Manuf.* Linens and cottons. *Pop.* 26,000.

Ser'eth, a river of European Turkey, rising in Austrian Galicia, 42 m. S. of Tchernowitz, and, after a S. course of 300 m., flowing into the Danube, 5 m. W. of Galatz.

Sereth, a town of Austria, in Galicia, on the Sereth, N.W. of Jassy; pop. 4,000.

Serf, *n.* [Fr., from Lat. *servus*.] In some countries, especially until of late years in Russia, a slave or bondman attached to the soil, and transferred with it; a helot. See RUSSIA.

Serfage, **Serfdom**, *n.* State or condition of serfs; bondage.

Serge, (*sērj*), *n.* [Fr.; It. *sargia*.] A kind of twilled cloth, commonly made of wool, but sometimes of silk.

(*Ecc.*) In the Roman Catholic Church, a large candle used in ceremonies, sometimes painted with letters and devices, and frequently weighing many pounds.

Sergeancy, (*sar'jen-ee*), *n.* Same as SERGEANTSHIP, *q. v.*

Sergeant, (*sar'jent*), *n.* [Fr. *sergent*, from Lat. *serviens*, *servitio*—*servio*, to serve.] (*Mil.*) A non-commissioned officer who instructs recruits in discipline, forms the ranks, &c.—A sergeant is of higher rank than a *corporal*, and next below a *sergeant-major*.

(*Eng. Law*.) See SERJEANT, the more usual orthography.

Ser'geant, or **Sar'geant**, in Minnesota, a former township of Rice co.

Sergeant, in Pennsylvania, a township of McKean co.

Sergeantcy, *n.* Same as SERGEANTSHIP, *q. v.*

Sergeant-major, *n.* (*Mil.*) The chief non-commissioned officer in a regiment, who assists the adjutant, &c.

Ser'geantship, *n.* Rank, office, or condition of a sergeant.

Sergipe, a river of Brazil, prov. of Sergipe, flows E., entering the Vaza Barris 8 m. from its mouth.

Sergipe, or SERGIPE-DEL-REY, (*ser-zhee-pā'*), a marit. prov. of Brazil, bordering on the Atlantic, and extending from Lat. 10° 30' to 11° 32' S.; area, 31,958 sq. m.

Rivers. São Francisco, Vaza Barris, Sergipe, and Cotindiba. *Surface*, mountainous, except along the coast; soil, fertile in the valleys and lowlands. *Prod.* Cotton, sugar, manioc, tobacco, rice, and flax. *Cap.* São Cristovão or Sergipe. *Pop.* abt. 295,000.

Sergius I. (*-jē'us*), Pope, b. in Syria, abt. 630, succeeded Conova in 687. He opposed the canons of the Council of Constantinople, whereupon Justinian II. sent his general-in-chief to arrest Sergius; but the exarch of Ravenna protected the Pope, who humanely interposed to save the life of Justinian's envoy. He instituted several ceremonies and established various churches at Rome. D. at Rome, 701.

SERGIVS II., was a native of Rome, and succeeded Gregory IV. in 844. He was elected without the authorization of the Emperor Lothaire, who dispatched an army into Italy, under the command of his son Louis. But the

Pope succeeded in inducing that prince to retire, after having crowned him King of Italy. Shortly afterwards, the Saracens from Africa ascended the Tiber, and ravaged the environs of Rome, but were prevented from gaining an entrance into the city itself, in consequence of the defence offered by the walls which surrounded it. D. 847.

SERGIVS III., became Pope in 904, through the influence of the Marquis of Tuscany and of the notorious Roman lady, Marozia. These personages were at the head of a powerful party which had deposed Christopher. A son of Sergius, by Marozia, afterwards became Pope by the title of John X. The character of this pontiff has been variously represented. Sergius d. 911.

SERGIVS IV., was elected Pope, in succession to John XVIII., in 1009. Under his rule, and in consequence of his exhortation, the Italian princes combined to drive out the Saracens from the country. In his time, also, the Normans began to enter Italy. D. 1012.

SERIAL, *a.* Pertaining or relating to, or consisting of, a series; as, a *serial* publication or magazine.

(*Bot.*) In rows, or belonging to, or consisting of, rows.

—*n.* A literary publication appearing in a series of numbers or parts; also, a tale, or other literary composition, published in successive numbers of a periodical.

SERIALIZED, *adv.* In a serial order or manner; by series or succession; as, the work is published *serialized*.

SERIALITY, *a.* Pertaining or relating to, or constituting, a series or succession; arranged in a series.

SERIALIZEDLY, *adv.* In a regular sequence or series; consecutively.

SERIALIZED, *adv.* [Lat.] In regular order or series.

SERICEOUS, (*se-rish'us*), *a.* [Lat. *sericeus*, from *sericum*, silk.] Pertaining, or having reference, to silk; consisting of silk; silken; silky; as, *sericeous* filaments.

(*Bot.*) Presenting a superficies of soft, silky hairs, lying close to the base; as, a *sericeous* leaf.

SERICULTURE, (*ser'i-kult-yur*), *n.* [Lat. *Seres*, the Chinese, and *cultura*, culture.] The rearing or culture of silk-worms.

SERIDO, (*sa-ree'do*), a river of Brazil, rises in the prov. of Parahyba, and falls into the Piranhas, 30 m. E. of Villa Nova do Principe after a N.E. course of 120 m.

SERIES, (*ser'ez*), *n. sing. and pl.* [Lat.] A continued or connected succession of things in the same order, and bearing the same relation to each other; a sequence; order; course; a line, link, or row of things in order of succession; as, a *series* of triumphs, a *series* of calamities.

(*Math.*) A number of arithmetical or algebraic terms in succession, increasing or diminishing according to a certain law. Series derive their names from the laws which govern the formation of their respective terms. Thus, an *arithmetical series* is one whose consecutive terms have a common difference; a *harmonic series* one of which every three successive terms are in a harmonic proportion. A *geometric series* is one every term of which has a constant ratio to the preceding one; it belongs to the family of *recurring series*, in which each term is a constant fraction of one or more preceding terms.

(*Chem.*) The first chemist who arranged organic substances in series whose numbers differed by equal increments or decrements of carbon, hydrogen, or oxygen, was Dr. James Schiel, of St. Louis, in the U. S., although the credit of having originated this important method of classifying organic compound is generally given to Gerhardt. It would be impossible to give a list of all the series which have been established of late years in organic chemistry; the most important of them will be found under **HOMOLOGOUS SERIES** and **TOLUOUS SERIES**.

SERIN, *n.* (*Zoöl.*) The Fr. name for the CANARY-BIRD, *q. v.*

SERINAGHUR. See CASHMERE.

SERINGAPATAM, ("city of Vishnu.") a decayed town and fortress of British India, S. of the river Krishna, formerly cap. of Mysore; Lat. 12° 25' N., Lon. 76° 45' E. It is situated on an island in the Caverry, 4 m. long and 1½ broad, 250 m. W.S.W. of Madras. It was stormed by the British in 1799, on which occasion Tippoo-Saib and most of the garrison were killed.

SERINO, (*sai-re'no*), a town of S. Italy, prov. of Principato-Ulteriore, on the Sabato, 6 m. S.S.E. of Avellino; pop. 8,000.

SERIO-COM'IC, *a.* Possessing an admixture of seriousness and comicality; partaking both of jest and earnest; as, a *serio-comic* poem.

SERIOUS, *a.* [Fr. *sérieux*, from Lat. *serius*.] Grave; solemn; sedate; thoughtful; earnest; characterized by gravity of manner or disposition; not light, giddy, gay, or volatile; as, a *serious* person.—Being in earnest; really intending what is expressed or implied; not jesting or assuming falsely or pretentiously; as, to take a *serious* view of a question.—Of weight or importance; momentous; onerous; weighty; grave; not irrelevant, trifling, or inconsequential; as, this is really a *serious* matter.—Hence, fraught with risk or apprehension; implying danger; as, it may prove a *serious* drawback to our success.

SERIOUSLY, *adv.* In a serious manner; gravely; solemnly; in earnest; in an important degree; momentously; without frivolity, levity, or volatility; as, do you *seriously* mean it?

SERIOUSNESS, *n.* State, quality, or condition of being serious; gravity of manner or of mind; absence of trifling, levity, or frivolity; earnest attention, particularly to religious concerns; as, "that spirit of religion and *seriousness* vanished all at once." — Atterbury.

SERJEANT, (*ser'jent*), *n.* [See SERGEANT.] (*Eng. Law.*) A barrister of the highest rank as a special pleader.

King's or Queen's Serjeant, one or more of the serjeants-at-law, whose presumed duty is to plead for the Crown in causes of a public nature, as indictments for high treason, &c.; — the title is now merely honorary.

Serjeant-at-arms, in certain legislative assemblies, a functionary who carries into effect the commands of the body, in the preservation of order and the punishment of offenders.

Serjeant-surgeon, in England, a servaut-surgeon, or chief surgeon to the sovereign.

(*Mil.*) See SERGEANT, the more correct orthography.

SERMIDE, (*sair-me'dai*), a town of N. Italy, prov. of Mantua, on the Po, 9 m. E.S.E. of Revere; pop. 5,000.

SERMON, *n.* [Fr.; Lat. *sermo*, from *sero*, to join or connect.] A discourse delivered in public by a clergyman for the purpose of imparting religious instruction; a written religious discourse or exordium; as, to preach a *sermon*. (See PREACHING.)—Hence, colloquially, a serious exhortation; a set address or exordium on one's deportment or duty; — generally used in a depreciatory sense; as, a certain lecture is a wife's *sermon*.

—*v. a.* To tutor; to lesson; to teach dogmatically.

SERMONIC, *a.* Grave and didactic, and, generally, dogmatic; resembling, or partaking of, the character of a sermon; as, *sermonic* dissertations.

SERMONISH, *a.* Like, or partaking of the quality of, a sermon.

SERMONIST, *SERMONIZER*, *n.* One who writes or delivers sermons; a preacher; an expounder of scriptural doctrines or moral precepts.

SERMONIZE, *v. a.* To affect or influence by means of a sermon or religious discourse; as, to *sermonize* a person asleep.

—*v. n.* To make, compose, or write a sermon, or sermons; to preach a sermon.—To inculcate rigid rules of moral or social propriety; as, a *sermonizing* preceptor.

SERON, *SERON*, *n.* [Fr. *seron*; Sp. *seron*.] A package made of raw hide, for packing drugs and other articles; as, a *seron* of indigo.

(*Com*) A weight varying with the substance to which it is applied; thus, a *seron* of almonds is a quantity of abt. 87½ lbs.; of anise-seed, from 3 to 4 cwt.; of Castile soap, from 200½ to 300¾ lbs.—Also, an African weight of 185½ grains.

SEROSITY, *n.* [Fr. *serosité*.] (*Physiol.*) The liquid which exudes from the serum of the blood when it is coagulated by heat. It is water holding some of the salts of the blood and a trace of albumen in solution.

SEROUS, *a.* [Fr. *séroux*. See SERUM.] Thin; watery; resembling whey; — said of that part of the blood which, in coagulation, separates from the grumous or red part.—Pertaining, or relating, to serum, a watery fluid secreted into the *serous cavities*. See MEMBRANE.

Serous membrane. (*Anat.*) See MEMBRANE.

SERPA, a fortified town of Portugal, prov. of Alentejo, on the Guadiana, 17 m. E.S.E. of Beja; pop. 6,000.

SERPENT, *n.* [Fr.; Lat. *serpens*, creeping.] (*Zoöl.*) An Ophidian. See SERPENTS.

—Metaphorically, a subtle or malicious person, or one who is guilty of baseness or treachery.

(*Pyrotechny*.) A kind of fireworks, which passes through the air with a serpentine motion, and makes a sort of sibilant noise.

(*Astron.*) There are no less than four kinds of serpents placed among the constellations. The first is *Hydra*, which is situated S. of the Zodiac, below Cancer, Leo, and Virgo; the second is *Hydrus*, which is situated near the S. Pole; the third is *Draco*, which is situated about the N. Pole; and the fourth is the serpent called *Serpens Ophiuchi*, situated chiefly between Libra and Corona Borealis.

(*Mus.*) A musical brass wind-instrument, formed like a serpent, serving as bass to the horns or cornets. It is most generally covered with leather, and has three parts; a *mouthpiece*, *neck*, and *tail*. The compass is two octaves, produced with six holes stopped by the fingers. This instrument is rarely employed in modern orchestras, but is chiefly used for accompanying Gregorian music in Roman Catholic churches.

—*a.* Serpent-like; pertaining to, or resembling, a serpent; as, "serpent mazes of deceit." — Pope.

—*v. n.* To coil, wind, or meander like a serpent, as a river. (*R.*)

SERPENTARIA, *n.* [Fr. *serpentinaire*.] (*Bot.*) See ARISTOLOCHIA.

SERPENTARIA, an islet of the Mediterranean, off the S.E. coast of Sardinia.

SERPENTARINUS, or **Ophiuchus**, *n.* (*Astron.*) One of the ancient constellations represented on the globe by the figure of a man grasping a serpent in his hand. It occupies a considerable space in the mid-heaven, directly south of Hercules, and west of Taurus Poulatowski. Its centre is very nearly over the equator, opposite to Orion, and comes to the meridian on the 26th of July. It contains seventy-four stars, including one of the 2d magnitude, five of the 3d, and ten of the 4th.

SERPENT-EATER, *n.* (*Zoöl.*) See SECRETARY-BIRD.

SERPENTIFORM, *a.* [Lat. *serpens*, serpent, and *forma*, form.] Possessing, or presenting, the form of a serpent.

SERPENTIGENOUS, (*-tij'e-nus*), *a.* [From Lat. *serpens*, and *genere*, *gignere*, to procreate.] Serpent-bred; begotten of a serpent.

SERPENTINE, *a.* [Fr. *serpentin*, from Lat. *serpentinus*.] Resembling, or pertaining to, a serpent; winding in various circumvolutions like a moving serpent; twisted like a serpent; having the color or properties of a serpent; spiral; meandering; tortuous; anfractuous; as, a *serpentine* motion, *serpentine* mazes.

S. tongue. (*Far.*) A horse's tongue, when constantly in motion under or over the bit, after the manner of a serpent. — *S. verse*. (*Poet.*) A verse which begins and terminates with the same word.

—A meandering or winding stream, or sheet of lake water.

Serpentine, *n.* (*Ord.*) A cannon of the 15th and 16th centuries, somewhat larger than the culverin.

(*Min.*) A hydrated silicate of magnesia, found in compact masses, tinged with black, red, and green spots. It takes a high polish, and is coming into very general use for ornamental purposes. It is found chiefly in Cornwall, England, where there are several extensively-worked mines. It takes its name from the resemblance it bears to the skin of certain serpents.

—*v. n.* To serpentine; to move in the manner of a serpent.

Serpentinely, *adv.* In a winding, meandering, or serpentine manner.

Serpentinous, *a.* Pertaining or relating to, or resembling serpents in character.

Serpentize, *v. a.* To turn or wind, like a serpent, in a tortuous or anfractuous manner; to meander, as a river.

Serpent River, in British America, flows W.S.W., entering the N. channel of Lake Huron, 30 m. W. of La Cloche.

Serpentry, *n.* A winding or twisting, after the manner of a serpent.

—A place infested or haunted by serpents.

Serpents, *n. pl.* (*Zoöl.*) The common name applied by Cuvier to the *Ophidians*, or *Ophidia*, and comprising in his classification the third order of reptiles. The general form of a *S.* consists of a head, a body, and a tail, in one lengthened bone, without any extremities, though there are sometimes membranes to the head or neck, which admit of being inflated at the pleasure of the animal. The skeleton is simple in them, consisting chiefly of the skull, the spinal column and the bones of the head. The skull is small, and the brain is also small, and very imperfectly developed, a fact which renders naturalists averse to the idea that the *S.* is a good emblem of cunning or wisdom. The mouth is, in every case, merely a prehensile instrument, and not a killing, or even wounding, one; for, although the stroke of the poison-fang of a *S.* is often of the most deadly character, it is only so through the poison which it discharges. The teeth of *S.* are adapted for piercing and holding, but not for dividing or bruising; and, consequently, the animals belonging to this order swallow their prey whole; the jaws of *S.* being united by ligaments, a conformation which gives them the power of dilating their jaws to such an extent as to swallow bodies larger than themselves. *S.* are divided into *venomous* and *non-venomous*; and the former are divided again into venomous with many maxillary teeth, and venomous with isolated fangs. The venomous *S.* with isolated fangs present a very peculiar structure in their organs of mastication (Fig. 2341). Their superior maxillary bones are very small, carried on a long pedicle, analogous to the external pterygoid apophysis of the spheroid bone, and very movable. Here are fixed two pointed teeth, pierced with a small canal, which give issue to a liquor secreted by a considerable gland situated under the eye. It is this liquor which, when shed into the wound made by the bite of the serpent, produces effects more or less fatal, according to the species which has inflicted the wound. The fangs are concealed in a fold of the gum when the *S.* does not wish to use them; and there are behind it many germs, destined to fix themselves in their turn, in order to replace them if they should be broken in the wound they make. In the non-venomous, the branches of the upper jaw are furnished throughout their length, as well as those of the lower jaw and the palatine branches, with fixed teeth, which are not pierced. There are, therefore, four nearly equal rows of these teeth in the upper part of the mouth, and two in the lower. All the venomous species bring forth their young alive, in consequence of the egg being hatched internally before it is laid; whence their general name of *vipers*, a contraction of *vivipares*. The venomous *S.*, with many maxillary teeth, have the jaws organized and armed nearly as in the innocuous; but the species have the first of their maxillary teeth greater than the others, and pierced so as to conduct the venom in the same manner as is effected in the venomous serpents with isolated fangs. The *S.*, with one exception (the *Deirodon*, which feeds on the eggs of birds), subsist on living prey, and, whether venomous or non-venomous, have their teeth, as might be expected, admirably constructed and arranged for the purpose of securing their prey and assisting in deglutition. The trachea of the *S.* is quite long; their heart situated very far backward; and the greater number have only one lengthy lung, with the vestige of a second. The tongue has great powers of mobility and extension, and terminates in two cartilaginous points. The skin in different genera is annulated, coriaceous, or granulated, or most frequently covered with scales. The powers of digestion are so slow, that one meal, in many cases, serves for weeks, or even for months. The structure of the vertebral column of the *S.* is different from that of any other animal; the most perfect specimens being found in the great crushing *S.*, which kill their prey by compressing it in their folds, and are so constructed as to give them the fullest latitude of action. The shell of the egg in the

Fig. 2341.

MOUTH OF A VENOMOUS SERPENT.

oviparous *S.* is soft, like the eggs of the common hen when she has not enough calcareous aliment; are often more than thirty in number, and are connected by a sort of viscous matter, which coagulates and joins them in a kind of chain. The surface of the brain of *S.* is nearly smooth, and without sinuosities or circumvolutions. Their organs of touch, taste, smell, and hearing appear to be dull, if not defective, while that of sight is sufficiently acute. *S.* can creep, glide, grasp, suspend themselves, erect themselves, leap, dart, bound, swim, and dive. Cold latitudes do not agree with them; it is in warm climates that their numbers, their venom, and their volume, attain their maximum.

Serpents, (Isle of,) in the Black Sea, opposite the mouths of the Danube.

Serpent's Tongue, n. (Bot.) The Adder's Tongue. See OPHIOGLOSSACEÆ.

Serphanto, or Serpho, (sair-fan'to,) an island of the Grecian Archipelago, 25 m. W. of Syra; Lat. 37° 10' N., Lon. 24° 30' E. Area, 20 sq. m. Pop. 600.

Serpiginous, (-pij'-s) a. [Fr. serpigineux.] (Med.) Affected with ringworm.

Serpolet, n. (Bot.) The Wild Thyme.

Serpookhov, or Serpuehov, (ser-poo-kov',) a town of European Russia, govt. of Moscow, on the Oka, 60 m. S.S.W. of Moscow. Manuf. Woollen, linen, and cotton fabrics.

Serpula, n; pl. SERPULÆ. (Zool.) A genus and family of *Annelidæ*, whose organs of respiration are in tufts attached to the head and anterior part of the body. In most cases, they live in tubes, and hence are often called *Tubeicolæ*. In some the tubes are calcareous, in others horny, the result of transudation; others, still, are formed of grains of sand, or other particles, bound together by a membrane, also transuded. The genus *S.* has the anterior portion spread out in the form of a disc armed on each side with bundles of coarse hairs, and on each side of the mouth is a tuft of branchiæ shaped like a fan, and generally tinged with bright colors (Fig. 134 and 2342). At the base of each tuft is a

Fig. 2342.—SERPULA CONTORTYLICATA.

fleshy filament, one of which is ever elongated, and expanded at its extremity into a disc, which serves as an operculum, and seals up the opening to the tube, when the animal is withdrawn into it. The calcareous tubes of the *Serpulæ* cover submarine bodies.

Serpulite, n. (Pal.) A petrified fossil of the genus *Serpula*.

Serra'na, and Serranil'la, two small islands in the Caribbean Sea, bet. Lat. 14° and 16° N., Lon. 80° W.

Ser'rate, Ser'rated, a. (Bot.) See LEAF.

Ser'rate, n. [Lat. serratura, a sawing.] A notching cut in the edge of anything, after the manner of those between the teeth of a saw; as, the serratures of a leaf.

Serre, (sair,) a river of France, dept. of Ardennes, which, after a W. course of 50 m., joins the Oise near La Fère.

Serrito, or JAGUARAO, (ser-ree'to,) a town of Brazil, 75 m. S.W. of Rio Grande; pop. abt. 4,000.

Ser'o Fri'o, or VILLA DE PRINCEPE, a town of Brazil, 130 m. N.N.E. of Ouro-Preto; pop. abt. 5,000.

Serrulate, Ser'rated, a. (Bot.) See LEAF.

Serrula'tion, n. State or condition of having minute notches, like a fine saw.

Serto'rius, QUINTUS, a distinguished Roman general, was a native of Nursia, in the country of the Sabines. He served under Marius in the Cimbric war, afterwards in Spain, and was made quæstor, B. C. 91. He joined the party of Marius in the Civil War, and commanded the Cinna at the siege of Rome, B. C. 87; but was indignant at the atrocious proscription which followed. The license and cruelty of the slaves especially excited his disgust, and he fell on them and slew several thousand. Appointed prætor in 83, he went soon after to Spain, where his courage and skill as a soldier were well known. He had, however, to retire before the forces of Sulla, and went to Africa; but on the invitation of the Lasi-tanians, returned and put himself at their head to fight for independence. His progress was rapid; he made himself master of the greater part of Spain, established a senate, founded a school at Osca for the education of young Spaniards in Greek and Roman learning, and to increase the superstitious reverence of the people for

his person, gave out that he had communications with the gods through the white fawn which always accompanied him. Metellus Pius was sent against him in 79, but could effect nothing; two years later Pompey joined Metellus, but *S.*, reinforced by Perperna, held out against both till 72. He entered into negotiations with Mithridates, which caused fresh alarm at Rome. But his influence and popularity were shaken by his despotic acts, and especially by the massacre of all the scholars at Osca; and he was assassinated by Perperna, his ally, at a banquet, B. C. 72.

Ser'rum, n. [Lat.] (Anat. and Med.) The watery part of the blood, which separates from and floats around the clot, or *crassamentum*, when the blood is drawn from the body. When, by a diseased action, *S.* is poured out in the brain, it produces *serous* apoplexy; when effused into the chest, *hydrothorax*; and into the abdomen, *ascites*, or dropsy.

Serum of milk, the whey, or serous fluid which remains after the removal of the caseine and butter.

Seruys', in Illinois, a village of Lake co., abt. 35 m. N. W. of Chicago.

Serv'able, a. That may be served.—Susceptible of being preserved.

Serv'al, n. (Zool.) The *Felis serval*, a fierce and rapacious animal, native of India and Thibet. It resides principally among trees; leaping with great agility from one to another, and pursuing birds. It resembles the panther in its spots, but the lynx in its size, the robustness of its make, and the shortness of its tail.

Servan, (St.), (sair'va,) a seaport-town of France, dept. of Ile-et-Vilaine, at the mouth of the Rance, 1 m. S. of St. Malo; pop. 12,709.

Serv'ant, n. [Fr. from servir—Lat. servus, a slave.] One who serves; especially, a domestic or menial; a person who attends another for the purpose of performing menial offices for him, or who is employed by another for such offices, or for other labor, and is subject to his command; an employé; a subordinate assistant or helper; as, to hire or engage a *servant*. (This word is most generally employed in the sense of a domestic help or menial.)—One in a state of subjection to another; a drudge.—Hence, a person of low, mean condition, or base, ignoble spirit.

Servant of servants, one reduced to the lowest degree of servitude.—*Your servant, your humble servant, your obedient servant*, phrases of formal civility or courtesy, used, for the most part, in epistolary correspondence, and generally meaning nothing.

Serv'ant-girl, Serv'ant-maid, n. A female help or domestic; a maid-servant.

Serv'ant-man, n; pl. SERVANT-MEN. A male menial or domestic; a man-servant; a body-servant.

Serv'antry, n. A body of servants taken in the collective sense.

Serve, v. a. [Fr. servir; Lat. servire, from servus, a slave.] To work for and obey; to bestow the labor of body and mind in the employment of; to minister to; to subserve; to perform official duties to; to attend at the command of; to wait on; to help; to aid; to assist; to perform duties in the employment of, or required in; also, specifically, to render spiritual obedience and worship to.—To yield obedience to servilely or meanly; to be subservient or subordinate to; to act or appear as the inferior of.—To supply with food; to attend at meals; to wait upon in the service of the table; as, to *serve* one's guests.—Hence, to produce, arrange, deal, or distribute, as a portion of anything, especially of dressed food;—usually before up or out; as, to *serve up* dinner, to *serve out* provisions.—To perform duties in the service of; to give assistance to by good offices; to do the duties required in or for; as, to *serve* one's country in time of war.—To be of use to; to benefit; to contribute or conduce to; to advance; to further; to promote; to be sufficient for; to satisfy; to content; as, a small sum will *serve* for present needs.—To be in the place of anything to one; to do duty for; to answer as substitute for; as, this will *serve* my purpose as well as another.—To treat; to act toward; to requite; to conduct one's self to; as, he *served* me well.

To serve an attachment. (Law.) To levy a writ of attachment on the person or goods of, by seizure or replevin.—*To serve an execution*, to levy an execution on lands, goods, or person, by taking forcible possession.—*To serve a process or writ*, to read it in person before the party concerned, so as to give him due notice, or to leave an attested copy with him, or his solicitor, or at his usual place of address.—*To serve a warrant*, to read such document to, and thereupon seize the person against whose body it is issued.—*To serve an office*, to discharge a public function; as, to *serve* as mayor two years in succession.—*To serve a rope. (Naut.)* To wind, as service-leather, &c., round it, as a preventive against friction.—*To serve one out*, to retaliate upon; to requite; to give tit for tat for; as, I will *serve him out* one of these days.—*To serve one's self off*, to avail one's self; to make use of; to cause to subserve;—a Gallicism; as, "they would *serve themselves* of this form." (Taylor.)—*To serve the time*, to act as a time-server; to be guided by the requirements of the moment, rather than by one's duty; to comply with, as a matter of expediency.

—*v. n.* To be a servant, bondman, or slave; to be employed in labor or other business for another; to be in subservience or subjection to.—*To wait upon*; to attend; to perform menial or domestic offices to another; to act as servant to; as, some people require constant *servings*.—*To perform duties*, as in the military or naval, or any civil service or office; to discharge the requirements demanded by any official position or employment;—specifically, to act as a soldier, seaman, &c.; as, many gentlemen of fortune *served* as volunteers in the ranks.—*To*

answer; to accomplish an end; to be of use; to suit; to conduce; as, when opportunity *serves* I shall be glad to see you.—*To officiate or minister*; to do the honors of; as, he *served* as chairman at the dinner.

Serv'er, n. One who serves.—That which serves; a salver, waiter, or plate for carrying things upon.

Serv'ia, (anc. Mæsia-Superior), a kingdom of eastern Europe, between Lat. 42° 21' and 45° N., Lon. 19° 10' and 22° 45' E., having N. the Danube, which separates it from Hungary, E. Wallachia and Bulgaria, S. Roumelia and Bosnia, and W. Bosnia; area, 20,850 sq. m. The surface is generally mountainous and well-wooded, with numerous fertile tracts. *Rivers.* Danube, Save, Morava, and Drina. *Prod.* Wheat, barley, oats, rice, hemp, flax, and tobacco. *Min.* Iron and salt. *Manuf.* Woollen, cotton, and hardware. *Chief towns.* Belgrade, the cap., Semendria, Nissa, Jogodina, Kragajewacz, and Poschega. The inhabitants nearly all belong to the Greek Church. They are distinguished for their vigor of frame, their personal valor, love of freedom, and glowing poetical spirit. Their manners and mode of life are exceedingly picturesque, and strongly prepossess a stranger in their favor. They rank among the most gifted and promising members of the Slavic family. The Servian language, or *Serb*, called also the Illyrian, belongs to one of the four great divisions of the Slavic family, and is more nearly allied to Russian than to Polish or Bohemian. It is distinguished from the other members of its division by the predominance of vowels, and consequently by its soft, melodious resonance. This character it owes in part to the influence of the Italian and Greek languages—the former influence being the result of commercial intercourse; the latter, of community of religious belief.—

Hist. The *Servi*, or *Serbs*, a tribe of Slavonians, received some land south of the Danube from the Emperor Leo VI. in the 10th century. The Greeks failed in an attempt to reduce Servia under their control in the 11th cent. Pope Honorius III. erected Servia into an independent kingdom in 1217. The Servians, Hungarians, and other Christian nations, were defeated in the plain of Kossova in Sept., 1389, by the Turks, who, in the next century, reduced the whole country under their sway; and it remained a province of the Ottoman empire with but slight interruption until 1717. Austria conquered part of Servia in 1718, but had to resign it in 1730. In 1789 Marshal Landohn took again Belgrade, which was restored to the Sultan in 1791. In 1805 the Servians rose against the Turks and expelled them. Their leader, George Czerny, ruled *S.* until 1813, when the Turks compelled him to fly from the country. Another insurrection broke out in 1815, when the country secured its independence. By the Treaty of Paris, March, 30, 1856, *S.* was placed under the protection of the Great Powers. The succession to the throne of *S.* was declared hereditary in the family of Obrenovitch by the National Skupitchina, Sept. 1, 1861. A dispute with the Turks, which broke out in Belgrade, June 15, 1862, was terminated by an armistice, June 18. Negotiations were subsequently entered into between the Porte and the Powers engaged in the Treaty of Paris of 1856, by which the Turks agreed (Sept. 4) to evacuate Servia, reserving to themselves the right of holding garrison in Belgrade. *S.* declared war against the Sultan July 3, 1876, and the independence of *S.* from Turkey was established by the Treaty of Berlin (1878). The prince was proclaimed king, as Milan I., in 1882, and 7 years later (1889) abdicated in favor of his son Alexander.

Service, (serv'is,) n. [Fr.; Lat. *servitium*, from *servus*, a slave, servant.] Act of one who serves: business, duty, office, attendance, or condition of a servant; labor of body, or of body and mind, performed at the command of a superior, or in pursuance of duty, or for the benefit of another; actual employment of a servant; anything done by way of duty to, or attendance on, a superior or employer; also, spiritual obedience and worship; as, a domestic act of *service*, to go to *service*, &c.—Actual duty; that which is required to be performed in some office or employment; act or deed of one who serves; labor rendered to another; duty done or demanded; aid, help, or kindness afforded; as, will you do me a *service*?—That performance of religious duty or respect which God requires of man; public worship or office of devotion; official duties of a minister of the gospel; religious rites or ceremonials appropriate to any event or occasion; as, divine *service*, the marriage *service*, &c.—Hence, a must-

Fig. 2343.—SERB WOMAN.

cal composition for use in divine worship; also, the books required in the celebration of the rights of religion; as, a church *service*.—Official function; duty performed in, or having relation to, any official charge or employment;—hence, specifically, military duty by land or sea; performance of the duties of a soldier, seaman, &c.; as, the naval *service*, the merchant *service*, the united *services*, &c.—That which imparts or promotes interest or well-being; benefit, avail, or utility; useful office or assistance; advantage conferred; as, he rendered essential *service* in the furtherance of the work.—Profession of respect uttered or sent; devoir; duteous expression of regard; as, present my humble *service* to his majesty.—Set or order of dishes, appointments, &c., commonly used at table; as, a dinner *service*, a tea *service*, his constituents presented him with a *service* of plate.

(Naut.) Materials employed in serving a rope, as leather, spun-yarn, ambroline, &c.

(Bot.) See PYRUS.

Service of a writ, process, warrant, &c. (Law.) The execution of a writ or process. See SERVE.—To see *service*. (Mil. and Nav.) To serve in actual collisions with the enemy; to smell gunpowder, or be under fire in practical warfare; as, though still young he had seen much *service*.

Service, in Pennsylvania, a post-village of Beaver co. **Serviceable**, *a.* That does or performs service; that imparts or promotes interest, advantage, happiness, or any quality conducive to well-being; useful; beneficial; helpful; advantageous; tending to the accomplishment of some good end, use, or object; as, a *serviceable* treatise, a *serviceable* suit of clothes.—Adapted or prepared for the performance of active service; capable of, or fitted for, the demands or exigencies of duty; as, *serviceable* troops;—hence, diligent; officious; pushing; energetic; as, a *serviceable* tool for an act of rascality.

Serviceableness, *n.* State or quality of being serviceable; usefulness in advancing good, or advantage of whatsoever kind; practical helpfulness or beneficialness; as, the *serviceableness* of an operation.—Promptness to render service; activity; diligence; officiousness.

Serviceably, *adv.* In a serviceable manner.

Service-berry, *n.* The berry of the Servia-tree. See PYRUS.

Service-book, *n.* A prayer- or hymn-book, or missal. See SERVICE.

Service-pipe, *n.* A pipe connecting mains with a dwelling, as in gas-pipes and the like.

Serviette, (*sêr-ve-ët')* *n.* A table-napkin.

Servile, (*ser-vil*), *a.* [Fr.; Lat. *servilis*, from *servus*.] Such as pertains to a servant, bondman, or slave; such as proceeds from dependence, voluntary or involuntary; slavish; abject; mean; as, *servile* submission.—Dependent; held in subjection or enforced subordination; as, a *servile* race.—Cringing; fawning; meanly obsequious; toadyism; basely or pitifully subservient; as, a *servile* sycophant, *servile* deference, *servile* flattery.

(Gram.) Foreign to the original root; as, a *servile* letter.—Not itself articulated, but causing the lengthening of the preceding vowel; as, the final *e* in *serve*.

—*n.* (Gram.) An element which is alien to the original root, in contradistinction to *radical*.

Servilely, *adv.* In a servile manner; meanly; slavishly; with base submission, obsequiousness, or sycophancy; with cringing subservience or deference to another; as, he fawns *servilely* upon his employer.

Servileness, Servility, *n.* [Fr. *servilité*.] State or quality of being servile; condition of a slave, serf, or bondman; mean submission or subservience; slavishness; sycophancy; abject obsequiousness or slavish deference; toadyism; as, *servility* to vulgar riches.

Serv'ing-board, *n.* (Naut.) A flat piece of wood, used in serving ropes on shipboard.

Serv'ing-maid, *n.* A female help or domestic; a menial of the gentler sex; a servant-maid.

Serv'ing-mallet, *n.* (Naut.) A wooden mallet employed in serving ropes.

Serv'ing-man, *n.*; *pl.* SERVING-MEN. A menial; a male help or domestic; a servant.

Serv'itor, *n.* [Fr. *serviteur*, from Lat. *servitor*—*servio*, to serve.] A servant; a help; an attendant; a retainer; one who acts or serves under another; a serving-man; as, a faithful *servitor*.

—In Oxford University, Eng., an undergraduate whose maintenance, while at college, is partially derived from a fund set apart for such purpose;—synonymous with *sizar*, at Cambridge.

Serv'itorship, *n.* Office, quality, or condition of a servitor.

Serv'itude, *n.* [Fr.; Lat. *servitudo*—*servus*.] State or condition of a serf, slave, or bondman; state of voluntary or involuntary subjection to a master or employer; service; slavery; bondage; position in life of a servant;—hence, a state or condition of slavish or helpless dependence; as, marriage with a rich and ugly old woman is splendid *servitude*.

(Civil Law.) The right to the use of a thing, without property in the same, for all or for some particular purposes. It consists either in the right to do some act, as to gather fruit from the estate, or to prevent the owner of the property from doing certain acts, as building walls beyond a certain height, blocking up a window, &c.

Servius Tullius, the sixth mythical king of Rome. He married the daughter of Tarquinius the Elder, whom he succeeded, and was murdered by his son-in-law, Tarquinius Superbus.

Sesamoid, Sesamoid'al, *a.* [Gr. *sesamon*, a seed of sesamum, and *eidos*, form.] (Anat.) Applied to small bones situate in the substance of tendons, near certain joints. Their number is various, and they are commonly more in the male than female.

Ses'amm, *n.* (Bot.) The Sesame. A genus of plants, order Pedaliaceæ. *S. Indium*, or *Oriental*, has oily seeds, which yield by expression the product known in India as *teel*, *gingelly*, or *gingillie oil*. It is rarely imported, as it soon becomes rancid; but it is said to be largely employed for adulterating almond-oil.

Ses'sia, (*sê'zha*), *n.* (Zool.) A genus of lepidopterous insects, family *Sphingidæ*, comprising those with the antennæ always single, elongate-fusiform, and often terminated by a small bundle of scales.

Fig. 2344. — SESIA THYSBE.

Sesia, (*sai'se-a*), a river of N. Italy, in Piedmont, rising near Monte Rosa, and after a S. course of 85 m., joining the Po 5 m. E. of Casal.

Sesos'tris, the most celebrated of the early kings of Egypt. According to the legend, which evidently confounds the military exploits of several monarchs, he, upon succeeding to the throne, became ambitious of military fame, and marched at the head of a numerous army to make the conquest of the world. Libya, Ethiopia, Arabia, with all the islands of the Red Sea, were conquered; and the victorious monarch marched through Asia, and penetrated farther into the East than the conqueror of Darius. He also invaded Europe, defeated the Thracians, and placed columns in the several provinces he had subdued, bearing the pompous inscription, "Sesostris, the king of kings, has conquered this territory by his arms." After his return, he employed himself in encouraging the fine arts, and in improving the revenues of his kingdom. In his old age, Sesostris, having grown infirm and blind, destroyed himself. The time of S. is placed from 1400 to 1250 B. C. Sesostris, so called by the Greeks, is identical with *Rameses II.*, one of the most famous of the Pharaohs.

Sesqui, (*sê'skwi*), [Lat., one and a half.] (Chem.) A prefix expressing the proportion of three equivalents of the substance to the name of which it is prefixed to two equivalents of the proximate principle: as, *sesquichloride of iron*, which is a compound of three equivalents of chlorine and two equivalents of iron.

Sesquial'ter, *n.* (Mus.) One of the compound stops of the organ, composed of either five, four, three, or two ranks of open metal-pipes tuned in thirds, fifths, and octaves to the diapason.

Sesquial'ter, Sesquial'teral, Sesquial'terate, *a.* (Math.) Having the ratio of one and a half to one.

Sesquidn'plicate, *a.* [Fr. *sesquidouble*.] Twice and a half; as, a *sesquiduplicate* ratio.

Sesquiox'ide, *n.* (Chem.) A compound of three equivalents of oxygen and two equivalents of another body.

Sesquip'edal, Sesquipedal'ian, *a.* [Lat. *sesquipedalis*.] Containing a foot and a half;—occasionally ludicrously applied to long words; as, a *sesquipedalian* sentence.

Sesquip'licate, *a.* (Math.) Subduplicate of the triplicate;—a term applied to ratios.

Ses'quisalt, *n.* (Chem.) A salt containing three equivalents of one component to two of another.

Sesquiter'tial, Sesquiter'tian, Sesquiter'tional, [Prefix *Lat. sesqui*, and *tertianus*, from *tertius*, third.] In the ratio of one and one-third to one.

Ses'quitone, *n.* (Mus.) A minor third.

Sessa, (*sai'ssa*), a town of S. Italy, prov. of Terra di Lavoro, 30 m. N.W. of Capua; pop. 4,500.

Sesse, or Sezza, (*sai'sa*), a town of Italy, on an eminence overlooking the Pontine Marshes, 20 m. S.E. of Velletri; pop. 9,000.

Sessile, (*sê'ssil*), *a.* [Fr.; Lat. *sessilis*, from *sedere*, *sessum*, to sit.] Connected without any apparent projecting support.

(Bot.) Emerging immediately from the main branch or stalk, without a petiole; as, a *sessile* leaf.

Session, (*sêsh'un*), *n.* [Fr.; Lat. *sessio*, from *sedeo*, *sessum*, to sit.] Act of sitting, or state of being seated or placed; as, "a usual way of *session*." (Browne.)—The actual sitting of a court, council, legislative body, &c., for the transaction of business; as, the members are in *session*.—The time, space, or term during which a court, council, legislature, and the like, meet daily for the transaction of business; or the period of time that elapses between the opening and the prorogation of a public assembly; as, a *session* of Congress, a *session* of Parliament.

—*pl.* (Law.) The title of several courts, chiefly those of criminal jurisdiction; as, the Court of Quarter Sessions.

High Court of Session. The supreme civil court of Scotland.

Sessional, (*sêsh'un-al*), *a.* Pertaining, or having reference, to a session, or to sessions; as, during *sessional* term.

Ses'terce, *n.* [Fr., from Lat. *sestertius*.] (Numis.) A Roman coin, was the fourth part of the *Denarius*, and thus contained at first 2 asses or *libræ*. The name is

an abbreviation of the Latin *semis-tertius*, which was their mode of expressing 2; and their custom was to derive the names of all their coins from the foundation of their money-system, the *As*. The symbols for it were indifferently *IIS* or *IIS*, the former being only a modification of the latter, which expresses two units, and S for the additional half-unit (*semis*). In the Latin classics, the phrase *sestertius-nummus*, or merely *nummus*, is frequently employed to denote this coin. When the *Denarius* was made to contain 16 asses, the relation between it and the sestertius was preserved, and the latter from that time contained 4 asses, though the name, which was now no longer significant, was preserved. The sum of 1,000 sestertii was called *sestertium*, which, after Augustus, was equal to about \$32, and was the "money of account" (never a "coin") used in the reckoning of large sums of money.

Ses'tet, SESTETT, SESETTE, SESETTO, SESTUOR, *n.* (Mus.) See SEXTET.

Ses'tri Levan'te, a seaport-town of N. Italy, 26 m. E.N.E. of Genoa. It is situate on a little bay near the mouth of the Gromolo; pop. 9,082.

Ses'tri Ponente, a town of N. Italy, 4 m. W. of Genoa, on the high road which runs along the sea-coast; pop. 6,421.

Set, *v. a.* (*imp.* and *pp.* SET.) [A. S. *settan*; Ger. *setzen*.] To cause to sit; to seat; to settle; to put, plant, or fix, in any place or posture; to give site or place to; as, to *set* a table on its legs.—Hence, to put or place on; to fasten in one place; to attach to; as, to *set* one's affections upon an object. To cause to take up a certain position, attitude, condition, employment, or the like; to cause to be; to put into a condition or state; as, to *set* to work, to *set* one man to fight another, &c. To make fast, permanent, or stable; to fix steadfastly; to give an unalterable form, place, or condition to.

"Set are her eyes, and motionless her limbs."—Garth.

—Hence, specifically, (1.) To obstruct; to retard; to block up; to cause to stop or be motionless; as, he is hard *set* for something to find fault with. (2.) To determine; to fix or decide upon priorly;—hence, to make hard, unyielding, or inflexible; as, his face was rigidly *set*, he drove at me with *set* fist, she *set* her mind on a new bonnet, &c. (3.) To plant; to imbed or fix firmly in the ground; as, to *set* out a parterre of shrubs. (4.) To fix in metal; as, to *set* a stone in a ring;—hence, to place or establish in something which reflects lustre or ornament; as, brighter eyes were never *set* in a lovely face. (5.) To make firm, stiff, compact, or solid; to convert into curd; as, to *set* milk for cheese.

—To assign; to appoint; to fix; to determine; as, to *set* a price on land.—To put or place in a fit or suitable condition or position; to adapt; to adjust; to regulate; as, his political faith is *set* for him by other men's opinions.

—Hence, especially, (1.) To put or place in due or working order, as an instrument; as, to *set*, that is, give an edge to, a razor; to *set*, that is, regulate by a standard, a watch, &c. (2.) To spread; to stretch out and put in position; as, to *set* the sails of a ship. (3.) To give a start to by fixing the key-note; to give a pitch to; as, to *set* a piece of music. (4.) To replace; to reduce to a proper or primary condition; to reduce from a fractured or dislocated condition; as, to *set* a broken leg.

—To wager; to risk; to hazard; to stake at play; as, "I have *set* my life upon a cast." (Shaks.)—To fit to sounds; to adapt, as words to notes; as, to *set* a song to music.—To stud; to adorn or variegate with objects placed here and there; as, jewels *set* in a coronet.—To point out without noise or disturbance, as game;—said of dogs.

To *set* about, to apply; to commence, as an action, undertaking, or enterprise; as, to *set* about one's work.—To *set* abroach, to let flow; as, to *set* abroach a cask of beer.—To *set* against, to oppose; to pit against by way of comparison; as, I will *set* my chance against yours.—To *set* a-going, to cause to start or commence motion.—To *set* apart, to lay aside for a particular purpose; to reserve; to hold separate from the rest; as, to *set* apart a wife's jointure.—To *set* a saw, to bend each tooth a little to one side, every alternate one being bent to one side, and the remainder to the other side, so that the kerf may be a little wider than the thickness of the back, to hinder the latter from sticking.—To *set* aside, to pass by; to omit; to reject; to annul; to leave out of reckoning; to abrogate; as, *setting* aside his love of liquor he is not a bad kind of fellow.—To *set* at defiance, to defy; to challenge; as, we are strong enough to *set* you at defiance.—To *set* at ease, to pacify; to calm; to quiet; to tranquillize; as, to *set* one's mind at ease.—To *set* at naught, to despise; to contemn; to underrate; to treat as of no value or account; as, to *set* authority at naught.—To *set* a trap, snare, or gin, to lay in such a position as to ensnare prey or game;—hence, to lay a plan to mislead and inveigle into the power of another.—To *set* at work, to cause to begin work or action, or to give directions how to commence work.—To *set* before. (1.) To exhibit; to expose to view before; as, roast beef is not amiss when *set* before a hungry man; also, to offer to one for selection; to propose for choice to; as, some fine silks were *set* before her.—To *set* by, to place on one side;—hence, to discard; to reject; also, to esteem; to value; to appreciate; to regard; as, I *set* great store by that relic.—To *set* by the compass, to note the bearing of by the compass.—To *set* down, (1.) To jot down in writing; to register; to record; to relate; as, he *set* down certain memoranda for his guidance. (2.) To ordain; to establish; to fix; as, to *set* down regulations for others to follow. (3.) To confound by superior arguments or eloquence; to confute; to rebuke; as, to *set* down a controversialist.—To *set* eyes on, to behold; to see; to view; to fix the eyes upon; as, I never *set*

eyes on a handsomer woman. — *To set forth*, to display; to offer or present to view; to expose to sight; to make manifest; also, to make appear; to publish; to promulgate; to circulate; as, it is *set forth* in the preamble. — *To set forward*, to further; to expedite; to promote; also, to advance; to move on; as, to *set forward* on a journey. — *To set free*, to liberate; to enfranchise; to emancipate; to release, as from confinement, bondage, imprisonment, or tutelage. — *To set in*, to give a start or beginning to; to initiate; to put in the way of; as, if you will *set me in* I can thenceforward assist myself. — *To set in order*, to reduce to systematic arrangement, order, or method; as, to *set one's papers in order*. — *To set milk*, to cause it to become curdled, as by the action of rennet; also, to expose it in flat, open dishes, so that the cream may accrete on the surface. — *To set off*. (1.) To ornament, adorn, embellish, decorate, or beautify; as, her looks require no paint to *set them off*. — (2.) To disengage from a whole and set apart; to devote to a special purpose; as, he *set off* a part of his property to portion his daughters. (3.) To speak of with eulogy; to recommend; to give a highly favorable or flattering account of; as, to *set off* a man's merit. (4.) To pit or place against an equivalent; as, to *set off* the advantages of one scheme against another. — *To set on or upon*. (1.) To instigate; to incite; as, to *set one on* a mischief. (2.) To employ; to engage, as in a task or duty; as, to *set on* extra hands. (3.) To fix or determine toward with settled purpose; as, my affections were *set upon* her. — *To set one's cap for*, to strive to engage or attach the affections of; to make indirect love to; as, she *set her cap* at him publicly; — used as a colloquialism. — *To set one's self against*, to put one's self in a state of vehement or determined opposition or antagonism to; as, his mind is *set against* meanness of any kind. — *To set on fire*, to enkindle; to communicate fire to; — hence, figuratively, to inflame; to arouse; to irritate, as the passions of. — *To set on foot*, or *a-foot*, to put in motion or action; to start; to set a-going; as, a new project was *set on foot*. — *To set out*. (1.) To set off; to display; to exhibit; to expose to view; as, she has *set out* her charms to advantage. (2.) To allot; to assign; to mark off; to limit; as, to *set out* the widow's third of an estate. (3.) To furnish; to supply; to array; to raise, equip, and send forth; as, America, at a pinch, can *set out* a fleet of three hundred sail. (4.) To ornament; to decorate; to embellish; to adorn; as, an ugly woman *set out* with jewels.

(Law.) To state at large; to go into details. — *To set over*, to assign; to convey; to transfer; to appoint or nominate as inspector, overlooker, controller, or supervisor; as, to *set a foreman over* other men. — *To set right*, or *to rights*, to reinstate; to correct; to rectify; to place in order; as, let this matter be *set to rights*. — *To set the fashion*, to lead the mode; to determine what shall be the ruling style; as, who *set* the American *fashion* of chin-whiskers? — *To set the teeth on edge*, to affect the teeth with a disagreeable sensation, as when verjuice is brought in contact with them. — *To set to*, to affix; to attach to; also, to engage in close combat; as, they *set to* with their fists. — *To set up*. (1.) To raise; to elevate; to erect; as, to *set up* a building. (2.) Hence, to exalt; to place in a high or prominent position; as, "Homer took all occasions of *setting up* his own countrymen." (Dryden.) — (3.) To institute; to found; to establish; as, to *set up* a school. (4.) To enable or find the means to commence a new business; as, he *set his son up* as a bookseller. (5.) To place in open view; as, to *set up* a land-mark. (6.) To raise; to sound loudly; as, to *set up* one's voice. (7.) To advance; to propound, as for discussion or reception; as, to *set up* a new theory. (8.) To raise, as from a low state to a higher; as, marrying an heiress quite *set him up*. (9.) (Print.) To put in type; as, to *set up* a page of copy; to form or arrange in words, lines, &c., ready for the press; as, to *set up* type. (10.) (Naut.) To extend or lay out; as, to *set up* a stay. (11.) *To set up the rigging*, to make it taut by means of tackles.

Set, *v. n.* To sink; to decline; to go below the horizon; as, the *setting sun*. — To plant by root or slip; to produce plants or slips in the ground; as, to *set* an acre of land with cabbages. — To begin to strike root or germinate; to be fixed for growth. — To be fixed hard or rigid; to become fastened; — hence, to congeal; to concrete; as, this cement *sets* slowly. — To have a certain direction in motion, as a current. — To go forth; to begin to move; to start. (R.) — To silently indicate the position of game; also, to hunt game by the help of a setter; as, the dog *sets* well. — To undertake in earnest; to apply one's self; to bestir to action; as, he *sets himself* to work in proper style.

To set about, to begin; to commence; as, let us *set about* going home. — *To set forward*, to advance; to begin to march or move on. — *To set in*, to enter upon a particular state; as, the equinoctial gales have *set in*; also, to settle one's self; to become fixed or established. — *To set off*, to start, as upon a journey. — (Typog.) To deface or soil the next sheet; — said of the ink on a recently printed sheet, when another sheet comes in contact with it before it has had time to dry. — *To set on or upon*, to assault; to make an onset or attack; as, brigands *set upon* the travellers; also, to begin, as a journey or undertaking; as, he *set upon* writing a new book. — *To set out*, to commence a journey or course of action; as, he *set out* for England by next steamer, to *set out* in life, &c. — *To set to*, to apply one's self to; as, to *set to* work. — *To set up*, to embark in business or an undertaking; as, to *set up* in business for one's self; also, to make ostensible progressions or pretensions; as, he *sets himself up* to criticise things he knows little about. — *p. a.* Fixed; firm; obstinate; stubborn; as, he is *set* in his likes and dislikes. — Uniform; equable; formal;

regular; as, a *set* speech, a *set* battle. — Prescribed; established; accepted; as, a *set* line of conduct. — *Set speech*, an oration, or a discourse carefully prepared before delivery; also, a precise, formal, or methodical harangue.

n. Act of setting; declination of a heavenly body below the horizon; as, before *set* of sun. — That which is set, placed, fixed, or established; especially, a young plant for growth; as, a *set* of quicks; permanent alteration of shape or form, as the result of pressure; as, the *set* of a spring. — A number or collection of things of the same kind and of similar form, which are ordinarily placed or used together; a number of things that are united in the formation or assemblage of a whole; a suit; an assortment; as, a toilet-*set*, a *set* of china, a *set* of instruments. — A number of persons associated; a collective body of individuals allied by kindred or sympathetic tastes, qualities, opinions, or social grade; a group; a clique; a coterie; as, he belongs to the Prince's *set*, they are an odd *set* of people, &c. — Course; direction; tendency; as, the *set* of a current. — *Dead set*. (Sport.) Act of a setter-dog when sighting game; — hence, a fixed or stationary condition caused by obstacle or hindrance; a dead lock; also, a preconceived plan to defraud by gambling; a determined onset; as, the bull made a *dead set* at him. — *To be at a dead set*, to be brought to a check; to be in a state which precludes further action or progress; colloquially, to come to grief.

Set'a, *n.*; *pl.* SETÆ. [Lat.] (Bot.) A bristle, or something resembling a bristle.

Setaceous, (-tū'shūs), *a.* [Fr. *setacé*.] Bristly; consisting of, or resembling, bristles.

(Bot.) Bristle-shaped; as, a *setaceous* leaflet.

Setaria, *n.* (Bot.) A gen. of plants, order Gramineæ. The Wild Timothy, *S. viridis*, and the Bottle Grass, *S. glauca*, are American species, common in fields and cultivated grounds; but the most important species are the European species commonly called Millet, cultivated for food, largely in certain parts of Europe, but rarely in this country. See MILLET.

Setau'ket, in New York, a post-village of Suffolk co., 58 m. N.E. of New York.

Set-back, *n.* (Arch.) A plain, flat set-off in a wall.

Set-bolt, *n.* (Ship-building.) An iron pin or bolt for fitting planks closely together.

Set-down, *n.* A rebuff; a contumelious reply or rebuke; as, his presumption met a proper *set-down*.

Sete-Lagoas, (sa'ta-la-go-as), seven lakes of Brazil, on the top of the Serra da Melgueira, prov. of Matto-Grosso; Lat. 13° 30' S., Lon. 55° 30' W. They form the sources of the Paraguay.

Seth. [Heb., compensation.] (Script.) The third son of Adam, to whom Eve gave this name in consequence of regarding him as sent to replace Abel, whom Cain had slain.

Setiferous, **Setig'erous**, *a.* [From Lat. *seta*, and *ferre*, or *gerere*, to bear.] (Bot. and Zool.) Bristle-bearing.

Setiform, *a.* Bristle-shaped.

Set'ness, *n.* State or quality of being set; fixedness; regulation; adjustment; also, stubbornness; obstinacy.

Set-off, *n.* [set and off] An offset; that which is set against another thing; any counterbalance. — That which is employed to embellish or ornament a person or thing.

(Arch.) (Also called *off-set*.) That part of a wall, &c., which is exposed horizontally when the portion above it is reduced in thickness.

(Law.) The amount of a debt due by the plaintiff to the defendant is entitled to set-off, in answer either to the whole or a part, as the case may be, of the plaintiff's claim. Thus, if the plaintiff sues for \$100, due on a note of hand, the defendant may set off \$80 due to himself for merchandise sold to the plaintiff, and in case he pleads such *S.*, must pay the remaining balance into court. The *S.*, however, must be a determined and specific sum, for a mere claim for damages not ascertained cannot be *S.* against a specific debt, neither can a debt due to the defendant personally be set off to a demand against him as a trustee.

Seton, (sē'tn), *n.* [Fr., from Lat. *seta*, a bristle.] (Surg.) A twist of silk or cambric, or of a few horse-hairs or fine threads, drawn through the skin and areolar membrane by the agency of a large needle, by which a small aperture is made and continued.

Setose, **Set'ous**, *a.* [From Lat. *seta*.] (Bot. and Zool.) Bristly; set with bristles; as, a *setose* receptacle.

Set-out, *n.* A display or exhibition; as, we had a fine *set-out* at dinner.

Set-screw, *n.* (Mach.) A screw, as in a cramp, for bringing pieces of wood, metal, or other material, into close contact.

Set-stitched, (-stīcht), *a.* Stitched after the manner of a set or formal pattern; as, a *set-stitched* sampler.

Sett', *n.* In pile-driving, a piece laid temporarily across the head of a pile when the latter cannot be got at by the weight, or hammer, except by means of such an intervening piece.

Settee, *n.* A kind of lounge or chair for the seating of several persons at a time; a divan; an ottoman.

(Naut.) Same as POLACCA, *q. v.*

Set'ter, *n.* One who, or that which, sets; — commonly used in connection with an adverb; as, a *set'ter on*, a *set'ter up*, &c. — One who adapts words to music in composition.

Set'ter, *n.* [Canis Familiaris Index.] A mongrel dog produced by crossing, chiefly between spaniels and pointers. The principal varieties of *S.* are the English and the Irish. The English *S.* does not differ from the pointer, but is more loosely made, so as to admit of more rapidity of motion, with less diminution of the continuance of that motion. It is equalled by few sport-

dogs in sagacity, and excelled by none in docility and personal attachment. In color it may be met with of almost every tint and marking common to hounds and spaniels. Their hair is, in general, beautifully curled. The habits of the *S.* and the pointer are much the same (see POINTER); but it too frequently happens that its enthusiasm leads it to forget the instructions it has re-

Fig. 2345. — ENGLISH SETTER.

ceived, and a small sample of rebreaking is often required before the shooting practices of each season commence. The Irish *S.* is a large red dog, of very commanding mien, great powers, and excellent sporting qualities.

Set'ter-wort, (-wurt), *n.* (Bot.) The Bear's-foot. See HELLEBORUS.

Set'ting, *n.* Act of putting, placing, fixing, or establishing. — Act of apparently sinking below the horizon, as of the sun. — The direction of a current, sea, or wind. — Act or method of taking game by means of a setter. — That in which something is set; as, a diamond solitaire in a gold *setting*.

(Building.) The induration of mortar or cement.

Set'ting-coat, *n.* (Arch.) The best sort of plastering on walls or ceilings.

Set'ting-dog, *n.* (Zool.) See SETTER.

Set'ting-pole, *n.* In the U. States, an iron-pointed pole used for impelling boats in shallow water.

Settle, (set'tl), *n.* [A. S. *setl*; *gesetl*; L. Ger. *setel*.] A long bench, with a high, wooden back; also, a wide step or platform.

— *v. a.* [From *setl*.] To place in a permanent state or condition after wandering, fluctuation, or disturbance; to make permanent, fixed, or established in any place; specifically, to establish in way of life; as, to *settle* in business, he *settled* in town. — To induct into the pastoral office; to ordain as the pastor of the care of souls; as, to *settle* a minister. (U. S.) — To free from doubt, or render determinate what is uncertain, as a question in litigation; to render fixed or stable; to make certain or permanent, as habits; to make sure, firm, composed, or constant; as, to *settle* pin-money on one's wife, to *settle* the mind when ruffled or disturbed. — To cause to sink or subside, as extraneous matter in liquors; as, to *settle* the grounds of coffee. — To free from a disturbed, broken up, or turbid state or condition; to still, as the surface of water. — To reduce to a smooth, dry, or passable condition, as roads, &c. — To lower; to depress; to render close or compact; as, to *settle* the contents of a barrel by shaking it. — To cause to subside after being upheaved and loosened by frost. — To bring to adjustment; to liquidate; to compose by amicable agreement or otherwise; to balance or to pay; to pacify; to make up; as, to *settle* a difference, to *settle* a bill or account, to *settle* in full. — To colonize; to plant with inhabitants; to people; as, the English *settled* Virginia, the Dutch first *settled* New York.

Settling-day, a day for making up or settling accounts, as on the Stock Exchange. — *To settle on or upon*, to confer by permanent grant upon; as, he *settled* his property on his wife to the exclusion of his creditors. — *To settle the land*. (Naut.) To cause the coast-line to sink or appear lower by receding from it.

— *v. n.* To become established or fixed; to become stationary; to assume a permanent form or condition; to quit a rambling or irregular course for a fixed or methodical one; as, he has *settled* his affections unwisely. — Hence, particularly, to fix one's residence or place of habitation; to take a lasting form or condition of life; to enter into the matrimonial or housekeeping state; also, to be established in a profession, employment, or vocation; as, to marry and *settle down*. — To subside; to sink or fall to the bottom, as of liquor; to sink and rest on the bottom; to become lower, as a building, by the sinking of the substructure; as, a house *settles* on its foundation. — To cease from agitation or disturbance; to become appeased, calm, or tranquil; as, let his anger *settle* before you approach him. — To come to an agreement, as with creditors or debtors; to adjust differences or accounts; as, he has *settled* all he owed. — To make a special provision for a wife; as, she had her fortune *settled* upon herself.

Set'tledness, *n.* State of being settled; fixed or established condition. (R.)

Set'tlement, *n.* Act of settling, or state of being settled; as, specifically, (1.) A becoming stationary, or taking a permanent residence after a roving course of life; act of taking a domestic or established state or condition of life; fixture in business, employment, &c. (2.) Act of planting or establishing, as a colony; act of peopling, or state of being peopled; plantation; colonization; as, the *settlement* of Java by the Dutch. (3.) Act of adjusting, pacificating, or determining; adjustment of accounts or differences; reconciliation; composure of doubts; arrangement of difficulties, and the like; as, the *settlement* of a debt, or of a dispute. (4.) Act of giving possession by legal sanction; act of granting any

thing in a formal or permanent manner; as, a transfer by private *settlement*.

—That which settles, or is settled, fixed, or established; as, (1.) The falling of the foul or foreign matter of liquor to the bottom; subsidence; also, settings; lees; dregs; sediment. (2.) A place, country, or colony newly settled, peopled, or established; as, the back *settlements* of Canada. (3.) That which is granted formally and permanently;—particularly, the jointure conferred on a woman; as, a marriage *settlement*;—also, a sum of money or other provision bestowed on a minister at time of ordination, over and above his salary.

(*Law*.) A disposition of property of any kind made by the owner for certain purposes. It may be made either by deed or will; but commonly the term is only applied to those made by deed, and in fact only to a certain kind of these; namely, marriage *settlements*.—Also, a residence under such circumstances as to entitle a person to support or assistance in case of becoming a pauper. It is obtained in various ways, to wit: by *birth*; by the *legal settlement* of the father, in the case of minor children; by *marriage*; by *continued residence*; by the payment of requisite taxes; by the *lawful exercise of a public office*; by *hiring and service* for a specified time; by *serving an apprenticeship*; and perhaps some others, which depend upon the local statutes of the different States.

Settler, *n.* One who settles.—Hence, specifically, one who commences a settlement in a new country; a colonist; as, a *settler* in Alaska.—That which decides, settles, or finishes;—hence, a blow or retort which disposes of a wrangle or contest. (A colloquialism.)

Settling, *n.* Act of making a settlement; a planting or colonizing.—Act of subsiding, as of lees, dregs, or sediment.—The arrangement of disputes, debts, or differences; as, when shall we have a *settling*?

—*pl.* Lees; dregs; sediment; that extraneous matter which settles at the bottom of a liquid.

Set-to, (*-too*), *n.* A contest in fisticuffs, controversy, &c. (A colloquialism.)

Setubal, or **St. Ubes**, (*sa'too-val*), a seaport-town of Portugal, prov. of Estremadura, on the Bay of Setubal, 18 m. S.E. of Lisbon; Lat. 38° 29' N., Lon. 8° 53' W. Pop. 15,000.

Setula, *n.*; *pl.* SETULE. [Lat. dim. of *seta*, bristle.] (*Bot.*) A small bristle or hair.

Setulose, **Setulons**, *a.* Bearing setules.

Sevastopol, in the Crimea. See SEBASTOPOL.

Sevastopol, in *Michigan*, a village of Muskegon co., 5 m. W. of Muskegon.

Sevastopol, or **Sebastopol**, in *Wisconsin*, a township of Door co.

Seven, (*sev'n*), *a.* [A. S. *seafon*, *seafen*; Ger. *sieben*; Lat. *septem*; Gr. *hepta*.] Four and three; one more than six, or less than eight; as, the *Seven Ages*.

Seven Dolours of the Blessed Virgin Mary. (*Ecclesi.*) A festival of the Roman Catholic Church, instituted by Pope Benedict XIII. in 1725, celebrated on the Friday preceding Palm Sunday. The seven incidents referred to under the title of *Dolours* are: 1. The prediction of Simeon (*Luke* ii. 34); 2. The flight into Egypt; 3. The loss of Jesus in Jerusalem; 4. The spectacle of Jesus bearing His cross towards Calvary; 5. The sight of Jesus upon the cross; 6. The piercing of His side with the lance; 7. His burial.—*Seven Stars.* (*Astron.*) See PLEIADES.—*Seven Wise Men.* (*Anc. Hist.*) The collective designation of a number of Greek sages, who lived about 620–548 B. C., and devoted themselves to the cultivation of practical wisdom. Their names, as usually given, are Solon, Thales, Pittacus, Bias, Chilon, Cleobulus, and Periander of Corinth; but there is no absolute unanimity among the ancients either as regards the names, the number, the history, or the sayings of these famous sages.—*Seven Wonders of the World.* See WONDERS.

—*n.* The number greater by one than six, or less by one than eight.—A symbol expressing seven units, as 7, or vii.

Seven Days' Battles. (*Amer. Hist.*) See CHICKAHOMINY.

Sevenfold, *a.* [*seven* and *fold*.] Repeated seven times; doubled by folding seven times; increased to seven times the number, size, weight, or value; as, the *sevenfold* shield of Ajax.

—*adv.* Seven times as much or often.

Seven Islands, a group of Lower Canada, in the Gulf of St. Lawrence, at the entrance of Seven Islands Bay.

Seven Mile, in *Ohio*, a post-village of Butler co., 7 m. N. of Hamilton.

Seven Mile Creek, in *Wisconsin*, a township of Juneau co.

Seven Mountains, in *Penna.*, a series of elevations on the border of Mifflin co., separating it from Centre co.

Sev'ennight, *n.* See SE'NIGHT.

Sevenoaks, a town of England, co. of Kent, on the Darent, 21 m. S.S.E. of London; pop. 5,000.

Seven Pines. (*Amer. Hist.*) The name of a locality, 6 m. from Richmond, where, May 31, 1862, the Confederates, commanded by Gens. Longstreet and Stuart, defeated the Nationals under Gen. Casey. The battle received its name from seven solitary pine-trees at the spot where the fiercest fighting took place. This battle may be considered as the beginning of the battle of *Fair Oaks*.

Sev'enscore, *n.* Seven times twenty; that is, one hundred and forty.

Sev'ensome, *a.* Arranged by sevens; consisting of seven things or parts. (*R.*)

Sev'enteen, *a.* [A. S. *seofontyne*.] Seven and ten; one more than sixteen and less than eighteen; as, *sev'enteen* shillings.

—*n.* The sum of ten and seven added; the number greater by one than sixteen.—A symbol representing seventeen units, as 17, or xvii.

Sev'enteenth, *a.* [From *seventeen*.] The ordinal of seventeen; the seventh after the tenth.

—*n.* The quotient of a unit divided by seventeen; one of seventeen equal parts.—The seventh after the tenth; the next in order after the sixteenth.

(*Mus.*) An interval consisting of two octaves and a third.

Sev'enteen Years Cicada, *n.* (*Zoöl.*) See CICADA.

Seventh, (*sev'nth*), *a.* [A. S. *seofedha*.] The ordinal of seven; the first after the sixth; containing one part in seven.

[ADVENTISTS.]
Seventh-day Adventists. (*Ecclesi. Hist.*) See SECOND SEVENTH-DAY BAPTISTS. (*Ecclesi. Hist.*) See BAPTISTS.

—*n.* The seventh part; one part in seven.—One next following the sixth.

(*Mus.*) The interval of five tones and a semitone, constituting seven degrees of the diatonic scale; also, a certain chord.

Sev'entieth, *a.* The ordinal of seventy; next in order after the sixty-ninth; as, the *sev'entieth* day of the year.—Constituting, or being, one of seventy equal parts into which a thing is divided.

—*n.* One of seventy equal parts; the quotient of a unit divided by seventy.—The tenth after the sixtieth.

Seventy, (*sev'en-ty*), *a.* Seven times ten; one more than sixty-nine; as, a person *seventy* years of age.

—*n.* The sum or amount of seven times ten.—A symbol denoting seventy units, as 70, or lxx.—*The Seventy*, the seventy, or, properly speaking, seventy-two, translators of the Old Testament into the Greek tongue, from whom this translation is called the *Septuagint*.

Seventy Sev'en, in *Iowa*, a village of Johnson co., 16 m. S.E. of Iowa City.

Seventy Six, in *Iowa*, a township of Muscatine co.;—A township of Washington co.

Seventy-six, in *Pennsylvania*, a post-village of Beaver county.

Seven Wonders of the World. See WONDERS.

Seven Years' War. (*European Hist.*) The name given to a war carried on in Germany between 1756 and 1763. The principal contending parties were Frederick II. of Prussia, and the Austrians; the latter being at one time assisted by Russia, France, the German empire, and Sweden; while the only fast ally of the former, during the struggle, was England. The war raged with varying success; but at length Frederick seemed brought to the verge of ruin, when, in 1762, the Empress of Russia died, and her successor, Peter III., made peace with Prussia, and thus led to a termination of the war, peace being concluded at Hubertsburg on the 15th of February, 1763. This disastrous war devastated Germany, and cost Europe a million of lives, without yielding material advantages to any party, except to Prussia, which annexed Silesia, and from that time took rank as one of the five great European powers.

Sever, *v. a.* [Fr. *sever*, *séparer*; It. *severare*, from Lat. *separare*.] To separate by cutting or rending; to part or divide from the rest by violence; as, to *sever* a limb from the body.—To separate or disjoin, as distinct things, but united; to separate and put in different orders or places; to disjoin; as, to *sever* man and wife.—To keep distinct or apart; to except; to make a distinction between.

(*Law*.) To disunite; to disconnect; to divide, as a joint estate among several.

—*v. n.* To make a separation or distinction; to discriminate; to distinguish.—To suffer disjunction; to be rent or parted asunder; as, "soul and body's *severing*."

Sever'al, *a.* [From *sever*.] Separate; distinct; single; special; particular; not common to two or more.

"Each *several* ship a victory did gain."—*Dryden*.

—Diverse; different; various; as, four *several* individuals.

—Divers; sundry; more than two, but not very many; as, he told the story to *several* persons.—*Joint and several note, bond, &c.*, any note or memorandum by which two or more persons signing it are collectively and individually bound.

—*n.* Each particular, or a small number, singly taken; as, *several* of the family rose to distinction.

Sever'ally, *adv.* Separately; distinctly; aloof or apart from others.

Sever'alty, *n.* A state of separation or disjunction from the rest, or from all others.—*Estate in sever'alty*.

(*Law*.) An estate which the tenant holds in his own right, without being joined in interest with any other person;—distinguished from *joint-tenancy*, *coparcenary*, and *common*.

Sever'ance, *n.* Act of severing or dividing; separation.

(*Law*.) Act of dividing; the singling or severing two or more that join, or are joined, in one writ; the putting in several or separate pleas or answers by two or more jointly; the destruction of the unity of interest in a joint state.

Severe', *a.* (*comp.* SEVERER; *superl.* SEVEREST.) [Fr., from Lat. *severus*.] Serious or grave in deportment; austere or sedate in manner; not light, airy, lively, or cheerful; as, a *severe* countenance.—Rigid; harsh; stern; characterized by great strictness; regulated by stringent rules; not mild, lax, or indulgent; as, *severe* discipline, *severe* criticism, *severe* punishment.—Rigidly exact; strictly methodical; close; concise; not permitting laxity, neglect, or transgression; exactly conformed to a standard; not luxuriant or redundant; as, a *severe* style, *severe* morality.—Sharp; keen; cutting; affective; distressing; violent; extreme; as, *severe* cold, *severe* pains, &c.—Inexorable; relentless; as, a *severe* judge.—Rigorously exact; critical or crucial in the highest degree; as, a *severe* test, a *severe* ordeal.

Severe'ly, *adv.* In a severe manner; harshly; strictly;

sharply; rigorously; painfully; afflictively; extremely; crucially; as, "to be fondly or *severely* kind."—*Savage*.

Sever'ness, *n.* State or quality of being severe; severity.

Sever'ity, *n.* [Fr. *sévérité*; Lat. *severitas*.] Quality of being severe; harshness; rigor; austerity; want of mildness or indulgence; as, the *severity* of a reproof, *severity* of discipline or punishment.—Extreme strictness; rigoronsness; crucial accuracy; as, the *severity* of a test.—Extreme degree or amount; as, the *severity* of a penalty or requisition.—Quality or power of distressing or paining; extremity; as, *severity* of pain or anguish.—Extreme coldness or inclemency; as, *severity* of winter.—Cruel treatment; harshness of punishment; as, *severities* practised on prisoners of war.—Rigid adherence to fact or truth; extreme accuracy; as, *severity* of criticism or judgment.

Severn, an important river of England, rising in Plinlimon Mountain, co. of Montgomery, N. Wales. It first flows S.E., under the name of *Hafren*, as far as Newton, where it takes the name of *Severn*, and flows N.E. until it loses itself in the British Channel. It is 200 m. long, and is navigable for 178 m. A tunnel $4\frac{1}{2}$ m. long has been constructed under this river.

Severn, a river in Md. rises in Anne Arundel co., flows S.E., entering Chesapeake Bay 3 m. S. of Annapolis.

Severn, a river of Upper Canada, which forms the outlet of Lake Simcoe, and flows N.N.W. into Georgian Bay.

Severn, a river of British America, rises in Lat. 52° 30' N., Lon. 92° W., and flows into Hudson Bay, after a N. E. course of 350 m.

Sever, (*St.*), (*sev'air*), a town of France, dept. of Landes, on the Adour, 11 m. S.S.W. of Mont-de-Marsan; pop. 4,500.

Severus I., LUCIUS SEPTIMIUS, a Roman emperor, was born A. D. 146, at Leptis, in Africa, and was raised to the throne on the death of Pertinax. He had to contend with several rivals—first, Didius Julianus, whom he put to death; then Percegnus Niger, whom he defeated at Issus; and at a later period Albinus, whom he defeated near Lyons in 197. S. had in the preceding year taken Byzantium, after a siege of two years. He carried on a successful war in the East, and in 208 visited Britain, made war on the Caledonians, and built the great wall across the north of England from the Solway to the Tyne. As a monarch he was cruel; and it has been said that he never performed an act of humanity, or forgave a fault. He was a man of letters, and composed a history of his own reign. He d. at York, in 211.

Severus, MARCUS AURELIUS ALEXANDER, a Roman emperor, b. in Phœnicia, 208. He was the cousin of the Emperor Heliogabalus, at whose death he was proclaimed emperor, 222. Towards the close of his reign, the peace of the empire was disturbed by the incursions of the Persians. Alexander marched into the East, but is said to have suffered defeat. The revolt of the Germans subsequently called him from the capital. His expedition in Germany was attended with some success; but his soldiers were undisciplined and turbulent; their clamors were fomented by the artifice of Maximinus, and Alexander was murdered in his tent, in the midst of his camp, after a reign of 13 years. His mother Julia Mamaea shared his fate, with all his friends. Severus possessed many virtues, was a patron of literature, and dedicated the hours of relaxation to the study of the best Greek and Latin historians, orators, and poets. Killed, 235.

Sev'ery, *n.* (*Arch.*) A box or compartment of a vaulted ceiling.

Sevier (*sev-er'*), in *Arkansas*, a W. S. W. co., bordering on the Indian Territory; area, 547 sq. m. *Rivers*, Red river and Little river. *Surface*, diversified; *soil*, fertile. *Cap.* Lockesburg. *Pop.* (1897) 11,450.

Sevier, in *Tennessee*, an E. co., bordering on North Carolina; area, 560 sq. m. *Rivers*, French Broad, and Little Pigeon. *Surface*, mountainous; *soil*, fertile in the valleys. *Min.* Iron and limestone. *Cap.* Sevierville, a post-village, 30 m. S. E. of Knoxville. *Pop.* (1897) 19,950.

Sévig'né, MARIE DE RABUTIN CHANTAL, MARCHIONESS DE, (*se-veen'yai*), a French epistolary writer, b. in Paris, 1626. She was the daughter of the Baron de Chantal, who lost his life in defending the Isle of Rhé against the English. After receiving a most careful education under her maternal uncle, she espoused, at the age of 18, the Marquis de Sévigné, who fell in a duel in 1651, leaving her with one son and a daughter, to whose education she paid strict attention. The daughter married, in 1663, the Count de Grignan, commandant in Provence; and it was on a visit to her that the Marchioness caught a fever, of which she died. Her letters are unequalled examples of the epistolary style, being elegant, picturesque, and animated. D. in Provence, 1696.

Seville, (*sev-il*), a city of Spain, cap. of the prov. of Seville, on the Guadalquivir, 62 m. N. E. of Cadiz, and 212 m. S.S.W. of Madrid; Lat. 37° 22' 44" N., Lon. 6° 0' 59" W. It is built in the Moorish style; the streets are narrow, but there are numerous squares and public walks. The Cathedral, a Gothic structure, surmounted by a colossal bronze statue of "Faith," is considered the finest in Spain. The other conspicuous edifices are the Alcazar, or palace, built in imitation of the Alhambra at Granada, the Lonja, or exchange, the Artillery School, and the Mint. *Manuf.* Silks, woollens, leather, hats, combs, earthenware, and tobacco. S., anc. Hispalis, was called by the Romans *Romula Julia*, from Julius Cæsar, b. c. 45. It was taken by the Goths, and afterwards in 711 by the Moors, with whom it remained until taken by Ferdinand III., King of Castile, in 1248, when it became the cap. of his kingdom.

Seville, in *Michigan*, a township of Gratiot co.

Seville, in *Ohio*, a village of Medina co., 104 m. N.N.E. of Columbus.

Sèvres, (*sai'vr*), a town of France, dept. of Seine-et-Oise, on the Seine, 5 m. N.W. of Versailles. It is famous for its manufacture of porcelain, or *Sèvres china*. Pop. 6,328.

Sèvres, (*Deux*), a dept. of the N.W. of France, bet. Lat. 46° and 47° N., Lor. 0° and 1° W., having N. the dept. Maine-et-Loire, E. Vienne, S. Charente and Charente-Inférieure, and W. Vendée. Area, 2,315 sq. m. The surface is diversified in the N. and level in the S., and the soil generally fertile. Rivers. The Deux Sèvres, Dive, and Thouet. Prod. The usual cerealia, flax, hemp, and fruits; also, numerous cattle, horses, &c. Manuf. Woollens, linens, cottons, leather, gloves, and beet-root sugar. Min. Iron, marble, and granite. Chief towns. Niort, the cap., Bressuire, Melle, and Parthenay. Pop. 333,155.

Sèvres-Nantaise, (*sai'vr'-non-taz*), a river of France, rising in the dept. of Deux-Sèvres, and after a N.W. course of 70 m. flowing into the Loire, at Nantes.

Sevres-Niortaise, (*-ne-or-taz*), a river of France, rising in the dept. of Deux-Sèvres, and after a W. course of 65 m. flowing into the Atlantic, at Aiguillon.

Sew, (*sō*), v. a. (*imp.* SEWED; *pp.* SEWED, also, sometimes SEWN.) [*A. S. siwian, suwan*; Lat. *suo, suere*, to sew.] To unite or fasten together with a needle and thread; as, to sew cloth.

To sew up, to inclose in anything sewed; also, to inclose by sewing; as, to sew up a pin-cushion; also, to close or stop by sewing; as, to sew up a rip.

—v. n. To practice sewing; to stitch; to join things with stitches.

Sewage, (*sū'ij*), n. Contents of a sewer; sewerage; refuse matter carried off by sewers; as, the sewage of a city.—Sewerage: methodical arrangement or distribution of sewers or subterranean drains.

Seward, (*sū'ard*), WILLIAM HENRY, an American statesman, b. in Florida, Orange co., N. Y., 1801, graduated at Union College in 1820, was admitted to the Bar in 1822, and commenced practice at Auburn, in his native State, in 1823. He was elected in 1830 to the State Senate of New York, in which he came forward as a champion of internal improvements, of the abolition of imprisonment for debt, and of giving the people more power in the election of public officers. He visited Europe in company with his father in 1833, and wrote a series of letters during his tour for an Albany newspaper, and they afterwards appeared in a separate form. Having been brought forward in 1834 as a candidate for the governorship of the State, he was defeated by Mr. Marcy, afterwards Minister for Foreign Affairs under President Franklin Pierce, but was more successful in 1838, when he was elected governor of New York by a large majority. In this position he recommended the increase of education, internal improvements, a liberal policy towards foreign immigrants, and took the side of abolition in the growing controversies on slavery. Mr. S. held the office of governor for two terms. He resumed afterwards the practice of law, first in the courts of his own State, and afterwards acquiring a lucrative share of patent causes in the courts of the U. States. In 1849, he was elected to the Senate of the U. States, where he became the acknowledged leader of his party, and in the debate on the admission of California he promulgated what was called his "higher-law" doctrine, in saying that there was "a higher law than the Constitution which regulated the authority of Congress over the national domain—the law of God and the interests of humanity." In a speech at Rochester, N. Y., in 1858, he

time that President Lincoln was assassinated by John Wilkes Booth, another assassin, named Payne, entered the house of Mr. S. (then confined to his room by a fall from his carriage), dangerously wounded his son, and with a poignard inflicted wounds upon him which were at first believed to be fatal, but from which he slowly recovered. After the death of Mr. Lincoln, Mr. S. continued to act as secretary until the close of Mr. Johnson's presidency. In 1868–69 he took an extended tour through the far north-west, Alaska, California, Mexico, &c., and in 1870, again set out for a travel through Eastern Asia. In Oct. of the same year he was received by the Mikado of Japan, being the first foreigner to whom the honor had been accorded. The works of Mr. S. have been published in 4 vols. 8vo, New York, 1853–60. They include his orations and addresses, political speeches, official correspondence, and miscellaneous writings. D. at Auburn, N. Y., Oct. 10, 1872.

Seward, in *Illinois*, a post-township of Winnebago co. —A township of Kendall co.

Seward, in *Indiana*, a township of Kosciusko co.

Seward, in *Kansas*, a S.S.W. co., bordering on Oklahoma; area, 648 sq. m. Rivers. Cimarron, and its tributaries. Surface, level; soil, fertile. Cap. Liberal. Pop. (1895) 826.

Seward, in *New York*, a post-town of Schoharie co.

Seward's Point, in *Illinois*, a village of Montgomery co., 50 m. S. of Springfield.

Sewell, (*n.* (Zool.)) A N. American rodent animal, family *Sciuridae*, and type of the genus *Aplodontia*. A *seporina* of Puget's Sound, is about the size, and has the general appearance, of the muskrat, but with the tail very short and much depressed.

Sewell Mountain, in W. Va., a v. of Fayette co.

Sewell, SAMUEL, an Am. jurist, b. in England, 1652. As Chief Justice for Mass. he presided at the witchcraft trials in 1692. D. 1730.

Sewell's (or **SEWALL'S**) **Point**, in Va., a promontory to the S. of Hampton Roads, 4 m. S. of Fortress Monroe.

Sewellsville, in *Ohio*, a post-village of Belmont co.

Sewer, (*sū'er*), n. [From O. Fr. *issur*, to issue, to flow forth. See *ISSUE*.] A drain or passage to convey off water and filth underground; a subterranean canal or outlet, particularly in cities.

Sewer gas, a term applied to the gaseous emanations from sewers, which, according to Prof. Chandler of N. Y., is composed as follows: Marsh gas 72 parts, carbonic acid 13, sulphuretted hydrogen 1, carbonic oxide 2½, ammonia, &c., 1 part.

[O. Fr. *sewer*, esquire.] Formerly, an officer of a great household who superintended the setting on and removing of the dishes at a banquet, and who also provided water for lavation of the hands of the guests.

"A feast serv'd up in hall with sewers and seneschals."—Milton.

—(*sō'er*). One who sews, or uses the needle.

Sewerage, (*sū'er-aj*), n. The construction and support of common sewers.—The system of sewers or subterranean conduits for receiving and carrying off the superfluous water, and the refuse, filth, &c., of a city.—Sewage; the matter collected and discharged by sewers.

Sewickley, in Pa., a post-borough of Allegheny co., on Ohio river, 13 m. N.W. of Pittsburg. Pop. (1897) 5,500.

Sewing, (*sō'ing*), n. Act or occupation of sewing, or using a needle.—That which is sewed with the needle.

—*pl.* Compound threads of silk, wound, cleaned, doubled, and thrown with especial reference to their ultimate use for sewing.

Sewing-bird, a spring-clamp, representing a bird in form, to be screwed to a support, for holding an edge of work during the operation of sewing.

Sewing-machine, n. A mechanical contrivance which forms one of the most valuable inventions of the 19th century. Its discovery originated from the fertile brain of an ingenious, but poor mechanic, one Elias Howe, a native of Mass., who, in 1841, after painful and laborious efforts in the elaboration of his project, obtained a patent therefor in May of that year. Not succeeding at first in inducing his own countrymen to patronize his invention, Howe went to England, where he met with as little encouragement; and was obliged at length to sell his patent for \$1,250 and a royalty of \$15 per machine, to a staymaker. On his return to the U. States, Howe found his patent pirated by a wealthy company, but after considerable litigation, he succeeded in establishing his rights, and ultimately realized a fortune. Howe's invention worked what is called the *lock-stitch*, but so many improvements and modifications have been introduced by subsequent inventors, resulting in varieties of the machine, that we consider it beyond our limits to enter into the various details of their construction. In fact, these machines are so well and widely known, that such descriptions would be needless. The principal of the machines now in use are:—1. *Machines which sew with one thread*; of which one kind make the *through and through*, or *shoemaker's stitch*; while another makes what is termed the *running-stitch*. The *chain*- or *tambour-stitch* is also a single-thread stitch. 2. *Machines which sew with a double-thread*, as the well-known examples patented by Wheeler & Wilson, and others. Machines have also been patented both in this country and in Europe for sewing the soles on shoes and boots, for gloves, for embroidery, &c. Sewing-machines are largely exported from this country to Europe, where they have become in almost as common demand and use as they are in this country.

Sex, n. [Fr. *sexe*; Lat. *sexus*.] The distinction between male and female, or that property or character by which an animal is male or female.—One of the two divisions of animals, formed on the distinction of male and female.

—Womankind; females;—employed by way of emphasis.

"Unhappy sex! whose beauty is your snare."—Dryden.

The sex, the female sex; females in general; as, "The sex whose presence civilizes ours."—Couper.

Sexagenarian, (*-jē-nā'-*) n. A person who has arrived at the age of sixty years.

Sexag'enary, a. [From Lat. *sexaginta*, sixty.] Designating, or pertaining to, the number sixty; proceeding by sixties.

Sexagenary or **Sexagesimal scale**, (*Math.*) A scale of numbers wherein sixty is the modulus, used in describing the divisions of the circle.

—n. A person sixty years of age; a sexagenarian;—also, something composed of sixty.

Sexagesima, (*-jēs'-*) n. (*Ecl.*) The second Sunday before Lent, or the next to Shrove Tuesday;—so called as being about the sixtieth day before Easter.

Sexagesimal, a. [Fr.] Sixtieth; pertaining to the number sixty.

Sexagesimal fractions, (*Arith.*) Such fractions as have 60, or some multiple of 60, for their denominator. Fractions of this kind were anciently the only fractions used in astronomy; and they are still retained in the division of the circle and of time, where the degree, or hour, is divided into 60 minutes, the minute into 60 seconds, and so on.

Sex'enary, a. Sixfold or six-parted. (*R.*)

Sexangle, (*sēs'ang'gl*), n. (*Geom.*) A hexagon. (*R.*)

Sexdigitism, (*sēsks-dij'it-izm*), n. [Lat. *sex*, six, and *digitus*, finger.] State of having six fingers on a hand, or six toes on a foot.

Sexdigitist, n. One who has six fingers on a hand, or six toes on a foot.

Sexduodecimal, (*-dēs'-*) n. [Fr. from Lat. *sex*, and *duodecim*, twelve.] (*Crystallog.*) With eighteen faces;—said of a crystal.

Sex'enary, a. Sextuple; proceeding by sixes.

Sexen'ial, a. [From Lat. *sex*, six, and *annus*, a year.] Lasting six years, or happening once in six years.

Sex'id, **Sex'idid**, a. [Lat. *sex*, and *findere*, *fidi*, to split.] (*Bot.*) Six-cleft.

Sexisyllable, n. [Lat. *sex*, and *syllaba*, syllable.] A word of six syllables.

Sex'less, a. Having no sex.

Sexloc'ular, a. [Lat. *sex*, and *loculus*, a little place.] (*Bot.*) Six-celled.

Sex'tain, n. [It. *sestina*, from Lat. *sextus*, sixth.] (*Poet.*) A stanza of six lines.

Sex'tans, n. (*Astron.*) The sextant, one of the constellations formed by Hevelius; it is placed across the equator, and on the south side of the ecliptic.

Sex'tant, n. [Lat. *sextans*, a sixth.] (*Math.*) The sixth part of a circle.

(*Astron.*) See *SEXTANS*.

(*Navig.*) An instrument principally used at sea for measuring the altitudes of heavenly bodies, and ascertaining their apparent angular distance. It is constructed on a similar principle to that of the quadrant; but the arc, containing the sixth part of a circle, may be taken to 120°. A sextant is generally fitted with apparatus for ascertaining the angular distances, &c., in lunar observations.

Sex'tary, n. [Lat. *sextarius*.] (*Rom. Antiq.*) Among the ancient Romans, a measure about equivalent to an English pint, in both liquid and dry measure.

Sex'tet, **Sextet'to**, n. (*Mus.*) See *SESTET*.

Sextillion, (*sēsks-til'yūn*), n. [From Lat. *sex*, *sextus*.] The number, in English notation, conveyed by a unit with 36 ciphers attached; according to French notation, the number denoted by a unit annexed to 21 ciphers.

Sex'to, n.; *pl.* *SEXTOES*. [From Lat. *sextus*.] A size of book formed by folding each sheet into six leaves.

Sextodecimo, (*-dēs'-*) a. [From Lat. *sextusdecimus*, sixteenth.] Composed of sheets folded in such a manner as to make 16 leaves; or, equal to, the size of one fold of a sheet of printing-paper when doubled in such a manner as to form 16 leaves, or 32 pages; as, a *sextodecimo* volume.

—n.; *pl.* *SEXTODECIMOS*. A book formed of sheets folded so as to make 16 leaves, or 32 pages.—The size of a book thus formed;—generally symbolized thus: 16mo, 16o.

Sex'ton, n. [A corruption of *sacristan*, q. v.] A subordinate officer of the church, whose business is to take charge of the sacred vessels, vestments, &c., belonging to the church, to attend on the officiating minister, and perform other duties, such as digging graves, &c.

Sexton'ess, n. A female sexton; the wife of a sexton.

Sex'tonville, in *Wisconsin*, a post-village of Richland, 56 m. W. of Madison.

Sex'tuple, a. [Fr., from L. Lat. *sextuplus*—*sex*, and *plico*, *plicatus*, to fold.] Sixfold; six times as much.

(*Mus.*) Noting a measure of two times, composed of six equal notes, three for each time.

Sexual, (*sēk'shu-āl*), a. [Fr. *sexuel*, from Lat. *sexualis*.] Pertaining, or having reference, to sex, or the sexes; distinguishing the sex; denoting what is peculiar to the distinction and office of the male and female organs; as, *sexual* characteristics, *sexual* intercourse, *sexual* diseases.

Sexual method. (*Bot.*) See *BOTANY*.

Sexuality, n. State or quality of being distinguished by sex.

Sex'ually, adv. In a sexual manner; by way of sexual relation.

Seybo, (*sē'bo*), a town of the Island of Hayti, 55 m. N.E. of San Domingo; pop. abt. 5,500.

Seychelles, or **Sechelles**, (*sai'shel*), a group of islands in the Indian Ocean, bet. Lat. 3° 40' and 5° 35' S., Lon. 55° 15' and 56° E. Mahé, the principal, is 18 m. long, and 4 in average breadth. The S., which are a dependency of the English colony of *Mauritius*, q. v., are moun-

Fig. 2346.—WM. H. SEWARD.

declared that there was an "irrepressible conflict between opposing and enduring forces," and that "the U. States must become either entirely slave or entirely free." In 1859, he revisited Europe, and extended his tour to Egypt and the Holy Land, and in 1860 was the most prominent candidate of the Republican party for nomination for the presidency, but personal and local interests finally secured the election of Abraham Lincoln, while Mr. S. accepted the important post of Secretary of State, in which he guided the diplomacy of the Federal Government through the perils of the War of Secession with an almost unparalleled industry, energy, and success. On the 14th of April, 1865, at the same

William Henry Seward

1801-1872

tainous and well wooded, producing excellent timber for ship-building. *Chief town.* Victoria, on the N.E. of Mahé.

Seymour. HORATIO, an American statesman, born in Onondaga co., N. Y., 1811, received a liberal education, studied for the bar, commenced practice as a lawyer in Utica, and was very successful. In 1842, he was elected a member of the Legislative Assembly, and held the position till 1845; was nominated Democratic candidate for the governorship of the State of N. Y., in opposition to Mr. Washington Hunt, in 1850, and was defeated after a sharp contest. The Democrats again brought forward Mr. S. in 1852, when he was elected by a large majority, took his seat as Governor, and signalized his term of office by vetoing the Maine Law Liquor Bill. The next election, in 1854, was very keenly contested by four candidates, nearly half a million of votes having been polled, and Mr. Clarke was elected. In 1856, Mr. S.'s name was put forward unsuccessfully by his friends as a candidate for the presidency, and in 1862 he was again nominated for the governorship of N. Y., in opposition to Geo. Wadsworth, and after a keen contest, defeated the Republican candidate. Governor S. took his seat Jan. 1, 1863, and adopted a very conservative line of policy. When the invasion of Pennsylvania took place, in June, 1863, he promptly forwarded more than the quota of militia required by the Governor of that State, though he sorely offended the Republican party by his opposition to the Conscription Bill passed by Congress, which gave the President power to call out, for military service, all able-bodied men between the ages of 18 and 45. Mr. S., nevertheless, used his utmost exertion to allay the ill-feeling provoked in the city of New York by the conscription, and to suppress the riots which, during four days, disturbed the city. Mr. S. was, in 1868, the candidate of a portion of the Democratic party for the presidency. D. 1886.

Seymour. LADY JANE, (*se'moor*.) the third wife of Henry VIII., and the mother of Edward VI. She was at first maid of honor to Anne Boleyn, whom she supplanted in 1536. She d. in 1537, a few days after giving birth to her son.

Seymour. in Ontario, a post-village of Northumberland co., on the Trent, 30 m. N.W. of Belleville.

Seymour. in Connecticut, a post-town of New Haven co., 12 m. N.W. of New Haven.

Seymour. in Indiana, a city of Jackson co., on 3 R. Rs., 18 m. S. of Columbus. Pop. (1897) 6,250.

Seyne. (*sain*.) a seaport-town of France, dept. of Var, on the Mediterranean, 3 m. S.W. of Toulon. It has an extensive sardine and tunny fishery. Pop. 9,070.

Sezza. SEZZE, a city of Central Italy, 20 m. S.E. of Velletri. pop. 8,776.

Sfax. or **Sfak'kus.** a town of Tunis, on the Gulf of Gabes, in the Mediterranean, 70 m. N.E. of Gabes; pop. 6,000.

Sforza. (*sfordz'a*.) a noble Italian family, founded by GIACOMO ATTENDOLA, a peasant of the Romagna, who was B. at Cortignola, in 1369, and, enlisting in a company of soldiers that passed through the village, rose gradually to the rank of general. He was called *Sforza* on account of his great vigor. He was drowned in effecting the passage of the River Pescara, in the service of Joan of Naples, 1424. — FRANCESCO ALESSANDRO, Duke of Milan, was a natural son of the preceding. He was B. in 1401, and rose to distinction in the service of Juan, afterwards as general of the Milanese troops; he was created duke by the leaders of a revolt in 1450; d. 1466. The descendants of the latter possessed the duchy through several generations. The principal of them was MAXIMILIAN, who figured in the events that followed the league of Cambrai, and d. at Paris, in the reign of Francis I., 1550.

Sforzan'do. **Sforza'to.** n. [It.] (*Mus.*) A term written over a note to signify that it is to be played or sung louder than the rest. It is abbreviated *sf*, *sfz*, or *<*.

Sfuma'to. a. [It., smoky.] (*Paint.*) A term applied to that style of painting wherein the tints are so blended that the outline is scarcely perceptible, the whole presenting an indistinct misty appearance. The Milanese school exhibits this quality more than any other.

Sgraffito. (*-f'ito*), **Sgradiato.** a. [It., scratched.] (*Paint.*) A species of drawing in which the ground is prepared with dark stucco, on which a white coat is applied, which last being removed with an iron instrument, the scraping it away forms the shadows, giving it the appearance of a chiaro-oscuro painting.

Shab. n. The chiro or scab in animals.
—v. a. (*imp.* and *pp.* SHABBED,) (*shābd*.) To play mean tricks; to behave or act shabbily.

Shab'bily. *adv.* In a shabby manner; meanly; in a despicable manner; as, to act or behave *shabbily*; with rent, ragged, or scedy garments; as, to be dressed *shabbily*.

Shabbiness. n. State, quality, or condition of being shabby; meanness; paltriness; ruggedness; seediness; as, the *shabbiness* of a hat, *shabbiness* of behavior, &c.

Shab'by. a. [Ger. *schübig*] Ragged; torn or worn to rags; poor; dingy; mean; seedy; as, a *shabby* coat. — Attired in threadbare or ragged apparel; as, a *shabby* mendicant. — Mean; paltry; despicable; contemptible; as, a *shabby* fellow, *shabby* treatment.

Shabby-genteel, presenting a shabby appearance combined with an air or aspect of former or natural gentility; as, a *shabby-genteel* mode of living.

Shabo'na. in Illinois, a post-township of De Kalb co.; pop. abt. 1,800.

Shab'rack. n. [Fr. *chabrique*, from Turk. *tshâprâk*.] (*Mil.*) The large saddle-cloth forming part of the full-dress equipment of officers of cavalry and horse artillery.

Shack'elford. or SHACKLEFORD, in Texas, a N.W. cen-

tral co.; area, 900 sq. m. *Rivers.* Clear Fork of Brazos River, and Hubbard's Creek.

Shack'le. n. (Usually in the plural, SHACKLES.) [A. S. *sceacul*; Du. *schakel*, the link of a chain.] That which binds, or that which prevents the free movement of the limbs; a fetter; a gyve; a manacle; a chain. — Hence, that which obstructs, impedes, or embarrasses free action; as, the *shackles* of tyrannical law. — A band, resembling a fetter-lock, worn as an ornament; a bangle; as, gold *shackles* for the legs. — A link or chain for connecting railroad cars; also called *drag-link* and *draw-link*. — A link in a chain fitted with a movable bolt, so that the chain can be separated.

(*Naut.*) A ring; applied on shipboard more especially to the rings of the posts through which the port-bar is passed to close the port-hole effectually, and to the ring of the anchor by which it is attached to the cable.

—v. a. To tie or confine, as the limbs, so as to prevent free motion; to chain; to fetter; to manacle; to gyve; also, to join by a link or chain, as railroad cars; as, to *shackle* a prisoner. — To bind or confine so as to obstruct or embarrass action; to cumber; to impede; as, to be *shackled* by promises or obligations.

Shack'le-bar. n. (*Mach.*) The coupling-bar between a locomotive-engine and its tender.

Shack'ly. a. Shaky; rickety. (Vulgar and local.)

Shad. n. (*Zool.*) A fish of the genus *Alosa*, distinguished from the herrings by a deep notch in the middle of the upper jaw, and by the roof of the mouth and the tongue, which are destitute of teeth. *A. prestibilis*, the American shad, is about 20 inches long.

Shad'-bush. **Shad'-berry.** n. (*Bot.*) See AMELANCHIER.

Shad'dock. n. (*Bot.*) See CITRUS.

Shade. n. [A. S. *scad*; Ger. *schatten*, from Sansk. *chayā*, a shadow.] The separation or interruption of the rays of light;—hence, the obscurity which is caused by such interception;—*shade* is distinguished from *shadow*, in that the former implies no particular form or definite limit, whereas a *shadow* reflects the form of the object which intercepts the light. — Darkness; gloom; obscurity. — An obscure place, properly in a grove or dense wood, which precludes the sun's rays; and hence, a secluded retreat; a screen; umbrage; as, to seek a pleasant *shade*. — Shelter; protection; cover; as, under the greenwood *shade*. — Some object formed upon a surface by the interception of light; a shadow. — The soul, after its separation from the body;—so styled because the ancients supposed it to be perceptible to the sight, not to the touch; a spirit; a ghost; a spectre; an incorporeal presence; as, the *shades* of the defunct great. — Degree or gradation of light or color; as, a *shade* of blue. — A very minute difference; an infinitesimal degree; an almost imperceptible amount of alteration; as, he is a *shade* better to-day, every *shade* of opinion or belief.

(*Paint.*) The darker portion of a picture; deficiency or absence of illumination or brightness of tint.

—v. a. [A. S. *sceadan*, *ge sceadan*.] To shelter or screen from light by intercepting its rays; to put or place in shadow; as, a spot of ground *shaded* with trees. — To overspread with darkness or obscurity; to make overcast or gloomy; to obscure; to cloud. — To screen from danger; to shelter; to protect; to hide; to conceal. — To paint in obscure colors; to darken. — To mark with gradations of light or color; as, to *shade* a drawing.

Shade. in Pennsylvania, a post-township of Somerset co.

Shade Creek. in Ohio, enters the Ohio River from Meigs co.

Shade Creek. in Pennsylvania, falls into Stony Creek from Alleghany co.

Shade'ful. a. Shady.

Shade'less. a. Lacking shade; not shaded.

Shade Mountain. in Pennsylvania, forming the boundary between Mifflin and Juniata cos., and extending to the Susquehanna River in Union co.

Shad'er. n. One who, or that which, shades.

Shad'ily. *adv.* In a shady manner; umbragously.

Shade'ville. in Ohio, a post-village of Franklin co., 9 m. S. of Columbus.

Shad'iness. n. [From *shady*.] State of being shady; umbrageousness.

Shad'ing. n. Act or process of making a shade. — The filling up of an outline, in a picture or drawing.

Shad'oof. n. See IRRIGATION.

Shadow. (*shād'ō*.) n. [A. S. *scadu*, *sceadu*.] Obscurity or deficiency of light, perceptible on a surface, and representing the form or the outlines of the body which intercepts the rays of light; shade within defined and apparent limits. — Darkness; shade; obscurity; gloom; as, the *shadow* of an eclipse. — Shelter made by anything that intercepts the light, heat, or influence of the air; place of obscurity or seclusion; cover; protection; security. — The representation of comparative deficiency of light; the darker or less illuminated part of a picture. — An adumbration; an imperfect and faint representation;—hence, type; mystical configuration; as, "Coming events cast their *shadows* before." (*Campbell*.) — An inseparable companion; that which follows or accompanies a person like a shadow. — That which is unreal, incorporeal, or unsubstantial; as, "beckoning *shadows* dire." (*Milton*.) — An uninvited guest coming with one who is invited. — (A Latinism. *Nares*.)

Shadow of death, awe-inspiring gloom, trouble, or death.

—v. a. To overspread with a shade or shadow, or with obscurity; to intercept light from; as, a *shadowing* cloud. — To protect; to shroud; to screen or conceal from danger; as, "we shall *shadow* the number of our

host." (*Shaks*.) — To shade; to mark with faint gradations of light or color. — To paint in obscure colors. — To adumbrate; to body forth dimly; to represent slightly or imperfectly;—hence, to configurate typically; as, I have *shadowed* some part of your virtues under another name. — To cloud; to darken; to make gloomy. — To follow closely and almost imperceptibly, as if in the manner of a shadow.

Shad'owiness. n. State of being shadowy or incorporeal.

Shad'owing. n. Shading; shade or gradation of light and color.

Shad'owless. a. With no shadow.

Shad'owy. a. [A. S. *sceadwig*.] Full of shade; shady; serving to shade; as, *shadowy* woods. — Hence, dark; gloomy; as, a *shadowy* desert. — Faintly light; not vividly luminous; as, a *shadowy* background. — Typical; faintly representative or configurative; as, *shadowy* explanations. — Unreal; immaterial; unsubstantial; as, a *shadowy* pretence.

Shadrach. (*shā'drāk*.) n. A mass of imperfectly smelted iron.

Shad'uan. an island of the Red Sea, in Lat. 27° 29' N., Lon. 34° E. Ext. 7 m. long and 4 broad.

Shad'well. in Virginia, a post-village of Albemarle co., 4 m. E. of Charlottesville.

Shad'y. a. (*comp.* SHADIER; *superl.* SHADIEST.) Abounding with shade or shades; overspread with shade; as, a *shady* grove. — Sheltered or screened from the glare of light or sultry heat; as, a *shady* apartment.

Shady Grove. in Pennsylvania, a post-village of Franklin co., 60 m. S.W. of Harrisburg.

Shaeffers'town. in Pennsylvania, a post-village of Lebanon co., 34 m. E. of Harrisburg.

Shaffer. or SHAFER, in Pennsylvania, a village of Venango co., 7 m. S. of Titusville.

Shaft. n. [A. S. *scaft*; Ger. *schaft*, from *schaffen*, to fashion, to make.] The cylindrical, column-shaped part of anything; a stem; a stalk; a trunk; a body of a long, cylindrical shape. — Hence, the stem or yard of an arrow;—hence, also, an arrow; a missile weapon; as, "the *shaft* that quivered in his heart." (*Byron*.) — The handle or haft of a weapon; as, the *shaft* of a spear. — The stem, or stock, of a feather or quill. — The pole or thill of a carriage or wagon.

(*Arch.*) The body of a column or pillar; the part between the capital and base. (See Fig. 650.)

(*Mining*.) A sinking, or pit, either in the lode or through the country.

(*Mach.*) In mill-work, a large axle, in contradistinction to a small one, which is called a *spindle*; thus we say "the *shaft* of a fly-wheel," "the *spindle* of a pulion." Shafts are said to be *lying* when they are in a horizontal direction, and *vertical* when they are upright.

(*Mech.*) That part of a machine in which the motion is communicated by torsion, as in the paddle-shaft or screw-shaft of a steamship.

(*Mil.*) In military mining, the vertical excavation made to reach the required position for the charge. Horizontal or inclined excavations are called *galeries*.

Counter-shaft. (*Mach.*) Any intermediate shaft between the power and the work. — *Shaft of a forge-hammer*, the helve, haft, or handle. — *Shaft of a blast-furnace*, in smelting, the internal cavity of the furnace.

Shaft'-bender. n. One who bends timber by steam and pressure.

Shaft'ed. a. Having a shaft or handle.

(*Her.*) Borne on a shaft;—applied to a spear-head.

Shaftesbury. ANTHONY ASHLEY COOPER, EARL OF, an English statesman, b. 1621, descended from a family intimately associated with the political history and literature of England, and was actively engaged in public offices during the Civil War. He first espoused the cause of royalty; he then became one of the most eminent of the Parliamentary leaders in the council, and not the least active in the field. When he saw that the restoration was inevitable, he took so prominent a part in bringing back Charles II. that he was raised to the peerage as *Baron Ashley*. He was a member of the justly infamous "Cabal" Ministry, and was afterwards appointed to be Lord-Chancellor, with the earldom of Shaftesbury. He was the Achitophel of Dryden, by whom his character is drawn with as much truth as power. He hated a calm, lived all his life in intrigues, but is honored as the author of the Habeas Corpus Act, D. 1683. — His grandson, ANTHONY COOPER (b. 1671, d. 1713), author of the *Characteristics*, the friend of Pope, obtained from Voltaire the questionable praise of being the boldest of the English philosophers.

Shaft'-horse. **Shaft'er.** n. The horse that works between the shafts of a carriage, wagon, &c.

Shaft'ing. n. Shaft in the collective sense.

Shafts'bury. in Vermont, a post-village and township of Bennington county, 100 miles south-west of Montpelier.

Shag. n. [A. S. *sceacga*.] Coarse hair or nap, or rough woolly hair; as, the *shag* of broad cloth. — A kind of cloth resembling freize. — A kind of long-cut, dark-colored smoking tobacco.

(*Zool.*) A species of cormorant having a tuft of feathers on the head, between the eyes, at the beginning of the spring.

—v. a. (*imp.* and *pp.* SHAGGED.) To make rough, hairy, or shaggy.

Shag'-bark. n. (*Bot.*) See HICKORY.

Shag'ged. a. Shaggy; rough with shag.

Shag'gedness. **Shag'guiness.** a. State of being shagged or shaggy; roughness with long, loose hair or wool.

Shag'gy. a. Shagged; hirsute; rough with long hair or wool; as, a *shaggy* skin. — Rugged; rough; as, a *shaggy* wilderness.

Shagreen, *n.* [Fr. *chagrin*; Turk. *sagri*.] See **LEATHER**.
Shagreen, **Shagreened**, (*-grind*), *a.* Made of the leather called *shagreen*.

Shah, **SCHAH**, *n.* [Pers. *sháh*, a king, sovereign.] The title assumed by the Persian monarchs.

Shahjehanpore, (*sha-je-han-por'*), a town of British India, cap. of a district of same name, prov. of Delhi, on the Gurra River, 175 m. S.E. of Delhi; Lat. 27° 38' N., Lon. 79° 18' E.; pop. 65,000.

Shahpoor, a river of Persia, prov. of Khuzistan, rising 10 m. N. of the ruins of Sus, and, after a S.E. course of 60 m., joining the Karoon 50 m. S. of Shuster.

Shahpoor, or **PADSHAHPUR**, (*sha-poor'*), a town of British India, presidency of Bombay, Lat. 16° 18' N., Lon. 74° 45' E.; pop. 7,000.

Shahpoorah, (*sha-poo-ra'*), a town of British India, prov. of Ajmeer; Lat. 25° 43' N., Lon. 75° 9' E.

Shahporee, (*sha-po-ré'*), an island of British India, off the coast of Aracan; Lat. 20° 40' N., Lon. 92° 24' E.

Shake, *v. a.* (*imp.* SHOOK; *pp.* SHAKEN.) To cause to move with quick vibrations; to move or oscillate rapidly one way and the other; to agitate; to make to totter or tremble; to cause to shiver. — To weaken the stability of; to move from firmness; to threaten with danger of an overthrow; as, his throne is too strong to be shaken. — To cause to waver or doubt; to sap or impair the resolution of; to depress the ardor or courage of; as, can nothing shake his purpose? — To trill; to give a tremulous, quivering note; as, to shake a note in music. — To throw down or away by a violent or sudden motion; to drive off or away by a jolting or vibratory motion; — commonly preceding an adverb, as *out*, *off*, &c.; as, he shook off the shackles of dependence.

To shake hands with, to join or unite with; to agree or contract with. — To take leave of; as, men who are shaking hands with their allegiance.

— *v. n.* To be agitated with a waving or vibratory motion; to tremble; to shiver; to quake; to quiver; to shudder; to didder; to totter; as, he shakes with ague.

— *n.* A concussion; a vacillating or wavering motion; a rapid, oscillating movement; agitation; a trembling or shivering; as, a shake of the hand, the shake of an earthquake. — A fissure in rock or earth. — A fissure or rent in timber.

(*Mus.*) A quick, alternate repetition of the note above with that over which the mark *tr* is placed, commonly ending with a turn from the note below.

(*Naut.*) One of the staves of a barrel or harness-cask taken apart.

The shakes, an American colloquialism for the fever and ague; as, he is down with the shakes.

No great shakes, of no particular importance, value, or account; as, as a general he is no great shakes. (*Colloq.*)

Shake-down, *n.* Any temporary substitute for a bed, as on chairs, on a sofa, on straw strewed on the floor, or the like.

Shaken, (*shāk'n*), *a.* Cracked or split; as, shaken timber.

Shaker, *n.* The person who, or thing which, shakes or agitates.

— *n. pl.* (*Ecl. Hist.*) A religious sect which originated in a secession from the Quakers, in Lancashire, in 1747, and received their name from the violent shaking of their bodies in religious worship. In their ordinary meetings they often engaged in a regular dance, jumping, turning round rapidly, falling on their knees, and assuming numerous other peculiar postures. At other times they marched in order round the room in harmony with songs sung on the occasion, shouting and clapping their hands. They had also intervals of shuddering, as if in a fit of ague. They were joined, in 1758, by Ann Lee, who subsequently became the leader of the sect, giving herself out to be inspired, and the woman alluded to in *Rev. xii*. In consequence of persecution, she, and a number of her followers, left England for New York, where they arrived in 1774. Their numbers rapidly increased, and they formed themselves into communities called *families*, each holding property in common. There still exists a considerable number of them in the U. S., and it is said a few of them in England; but they have given up the more violent of their exercises, and are generally distinguished as peaceful and well-conducted in ordinary life.

Shaker Village, in New Hampshire, a post-village of Merrimack co., 12 m. N.E. of Concord.

Shakiness, *n.* State or condition of being shaky.

Shak'o, *n.* [Hung. *csákó*.] (*Mil.*) The head-dress worn by the infantry of the line in the British, French, Austrian, and other armies.

Shak'opee, in Minnesota, a city, cap. of Scott co., 28 m. W.S.W. of St. Paul. Pop. (1895) 1,966.

Shakspeare, **WILLIAM**, an English dramatist, b. at Stratford-on-Avon, Warwickshire, April, 1564. From the birth of the great poet until his marriage, and from that date until we find him an actor in London, we know almost nothing of him with any certainty. From such trivial matters as the spelling of his name and the house in which he was born, up to the high and difficult question of the meaning of his sonnets, almost all the particulars of his biography are either involved in total darkness, or only seen by the imperfect and bewildering light of conflicting traditions. All that is possible to do here is to tell the story as it is usually told, or the most probable particulars of it. The poet's father was John Shakspeare, a well-to-do inhabitant of Stratford, probably glover, grazier, and dealer in wool, owner of landed property, alderman, and in 1563 chief magistrate of Stratford. His mother was Mary Arden, of an ancient and wealthy family, but of whom personally nothing whatever is known. His name appears in the forms — *Shakspeare*, *Shakespeare*,

Shakspere, *Shakspur*, *Shagspur*, *Saxpere*, *Chakspere*, and with other variations, and is spelt differently by himself on different occasions. His birth-place, as pointed out by traditions, is the house in Henley street, Stratford, which belonged to his father. But his father owned several other houses, and there is no evidence to show where he lived in 1564. The house is now the property of the nation. S. was educated at the free grammar-school of Stratford, where he probably remained from the age of 7

Fig. 2347. — WILLIAM SHAKSPEARE.

to about 14. During his boyhood Stratford was frequently visited by companies of strolling players, whose performances doubtless first attracted him to the stage. The beautiful scenery of the Avon, and the places of historical interest in the neighborhood, could not fail to influence his fine and sensitive nature. In his 19th year he married Anne Hathaway, daughter of a yeoman at the neighboring hamlet of Shottery, and eight years older than himself. Among the many suspicious stories told of S.'s early life, one is of a drinking challenge made by a club at Bidford, called "The Topers," and accepted by him and his comrades; and of his sleeping off the effects of the bout under a crab-tree on the way home. More celebrated is the tale of his taking part in stealing deer from the park of Sir Thomas Lucy at Charlecotte, and of his detection and prosecution. This affair is said to have been the immediate occasion of his going to London, about 1586. It is quite as probable that nuptial disappointments and dissatisfaction may have driven him from home; and very natural that his course should be to the metropolis, with its large, full, and fascinating life. It is certain that he did go to London, and lived there many years, leaving his wife and children at Stratford; that he gained an honorable position as actor, play-writer, and shareholder in the theatre of Blackfriars, and afterwards in that of the Globe (Fig. 2348); enjoyed the favor and patronage of Queen Elizabeth, James I., and the Earl of Southampton, the warm friendship of Ben Jonson, and the highest respect and admiration of his associates, not only for his preëminence as a poet, but for his honesty, geniality, and worth as a man. S. gained also wealth, and became the

Fig. 2348.

THE GLOBE AND ROSE THEATRES, AND BEAR-GARDEN, (Southwark, 1612.)

purchaser of the house at Stratford called New Place, and afterwards of a large estate which he annexed to it. It was his ambition to found a family, and it was probably by his desire that his father, in 1597, obtained a grant of arms from the Herald's College, and, subsequently, permission to impale the arms of S. with those of Arden. During his residence in London he is said to have visited his native town annually, and he returned to spend his last years there, perhaps about 1604. Enjoying the dignified ease of the country gentleman, the highest respect of his countrymen, and the sweets of the rare wisdom to which he had attained, he awaited the end; not ceas-

ing to write, but producing in those quiet years some of his grandest works. Of his end we have no other account than the short statement in the diary of the Rev. John Ward, vicar of Stratford, that "Shakspeare, Drayton, and Ben Jonson had a merry-meeting, and it seems drank too hard, for Shakspeare died of a fever then contracted." The date of his death is April 23d, 1616. Two days after, his remains were buried in the chancel of Trinity church, Stratford, and his well known bust was executed and placed near the spot within seven years. Besides his first child, Susanna, his only other children were a boy and a girl, twins, born in 1585. Susanna married Dr. Hall, a physician of Stratford, in 1607, was left a widow in 1635, and died in 1640. She had one child only, a daughter, who, though twice married, left no children. Of the twins, the boy, named Hamnet, died at the age of eleven, and the girl, Judith, married Thomas Quincy, and had three sons, who all died childless. Although we have no proof that S. ever sat to a painter, portraits of him exist; but they curiously differ, and only three are thought of much importance, viz., that engraved by Martin Droeshout for the folio of 1623; the Chandos portrait, copied in Fig. 2347; and that preserved in the museum at his birth-place. The bust is probably the best authenticated likeness. The Chandos portrait was presented by the Earl of Ellesmere, in 1856, to the London National Portrait Gallery. The first collected edition of S.'s plays was the folio of 1623. His poems of *Venus and Adonis*, and *The Rape of Lucrece*, were published in 1593 and 1594, and were the only works which appeared with his name in his lifetime. Of the 36 plays (exclusive of *Pericles*), the dates of publication of only a few are known. *The Two Gentlemen of Verona*, and *Love's Labor Lost*, were among the earliest; and *Tempest*, *Troilus and Cressida*, *Henry VIII.*, *Coriolanus*, *Julius Caesar*, and *Antony and Cleopatra* among the latest. *The Midsummer Night's Dream*, *Merchant of Venice*, *Romeo and Juliet*, *Richard II.*, *Richard III.*, *Henry IV.*, and *King John* were all produced before 1598. A copy of *Hamlet* is extant, bearing the date 1602. *Twelfth Night* was produced in 1601; *King Lear* was printed in 1607; the *Tempest* was written in 1611. The second folio edition of the collected plays appeared in 1632, and two others subsequently. It is said that by 1830 not less than 82 editions had been published, without including separate plays, and poems, and commentaries. Since then the number has been enormously increased. The works of Shakspeare have become, to a large part of the world, one of the primal necessities of life. In no other man's books, probably, is to be found so much truth, wisdom, and beauty as in his. Great to all men, he is greatest to the great, the homage of the highest intellects of the world is silently, or with eloquent speech, yielded to him. The myriad-minded man, the greatest intellect; who in our recorded world has left such a record of himself in the way of literature; the poet of the human race; the melodious priest of a true Catholicism; — such are some of the phrases in which other great men have striven to express their sense of his superiority. Ben Jonson, Milton, Dryden, Pope, and in our own day Coleridge, De Quincey, Carlyle, and Emerson, have led the chorus of his praise. In Germany, Lessing revived the knowledge of his works; and after him, Herder, Tieck, Wieland, Schlegel, and Goethe have contributed to establish his supremacy. The most important of recent contributions to the critical study of S., is the Commentary of Professor Gervinus, of which an English translation has appeared. Another valuable critical work is Dr. Hermann Ulrici's *Shakspeare's Dramatic Art*, also translated. A Shakspeare Jubilee, the first celebration of the kind in England, was suggested and carried out at Stratford by David Garrick, 6-8th September, 1769. A similar celebration took place under the auspices of the Shakspeare Club in 1824, and was appointed to be held annually. In April, 1864, a Tercentenary Festival, with dramatic performances, exhibition of relics, and even sermons, was held at Stratford. An attempt was made to get up a national subscription for a monument to the poet; but it failed miserably. In Germany, one result of the centenary movement was the formation of a *Shakspeare Society*, which is to publish annually a volume devoted to Shakspearean subjects. Among the many editors of the works of S. may be mentioned Dryden, Pope, Sir T. Hanmer, Warburton, Steevens, Malone, Dr. Johnson, Coleridge, Dr. Chalmers, Hazlitt, Collier, Dyce, C. Knight, C. Lamb, Halliwell, Craik, Guizot, Mrs. Jameson, &c.

Shakspearean, *a.* Pertaining, or relating, to Shakspeare, or to his immortal works; in the style, or after the manner, of Shakspeare.

Shak'y, *a.* (*comp.* SHAKIER; *superl.* SHAKIEST.) Shaking, quivering, or trembling; as, a shaky hand, a shaky morass, &c.

— Noting timber when naturally full of slits or clefts. — Loosely put together; ready to fall to pieces; as, a shaky scaffolding.

Shale, *n.* [Corrupted from *shell*; Ger. *schale*.] A cod or pod; a shell; a husk; as, the shale of a bean.

(*Geol.*) An indurated clay, which often forms beds in the coal measures. It is chiefly composed of silica and alumina, in variable proportions, but also frequently contains a considerable amount of carbonate of lime and oxide of iron. It is of a gray or grayish-black color, or brownish-red when containing much iron. Its structure is more or less slaty. It is soft, and easily reduced to powder. It is used for making slate-pencils. When free from lime and iron, it is reduced to powder, and used for making fire-bricks, for which it affords an excellent material. S. very often contains a notable quantity of bitumen, and when this is so much the case that the mineral has a shining resinous streak,

and crackles and blazes in the fire, emitting a black smoke and a bituminous odor, it is known as *Bituminous shale*, and from it may be distilled an oil known as *shale-oil*, used for illuminating purposes.

Shale, *v. a.* To shell; to take off the shell, coat, or incrustation of; as, to *shale* the husk of a nut.

Shaler, in *Pennsylvania*, a township of Allegheny co. Pop. (1897) 5,350.

Shalersville, in *Ohio*, a post-township of Portage co.

Shalersville, in *Pennsylvania*, a vill. of Allegheny co.

Shall, *v. n.* and *aux.* (*imp. SHOULD*.) (*shud.*) [*A. S. sceal*, I owe, I ought; *Icel. skal*, I ought; *Ger. sollen*.] This

word, as an auxiliary, denotes or implies a duty or necessity whose obligation is deduced from the person speaking; as, you *shall* come, she *shall* come: that is, I command or assure your or her coming. It thus customarily expresses, in the second or third person, an order, a menace, or a promise. When the auxiliary is emphasized, the order is rendered more imperative, the menace or promise more positive and assured. It is also used in language indicative of prophecy; as, "the time *shall* come, when . . ." in the sense that a threat or an assurance, and a dictatorial or magisterial prophecy nearly assimilate in coincidence. When employed with the first person, the force of the action is occasionally understood as residing elsewhere than in the speaker; as, I *shall* insist, we *shall* refuse; and there is necessarily always a less emphatic and determinate assertion of his volition than is expressed by *will*. "I *shall* come," infers merely a simple futurity; or, in the more exact sense, a prognostication or presage of my going, in which, naturally enough, some definite degree of scheme or purpose may be included. When *shall*, however, is emphasized, the circumstance is demonstrated as certain to happen, and the phrase becomes analogous in force of significance to our imperative, "I *will* go." Interrogatively, the relation of speaker and cause of obligation is necessarily transferred to the person accosted; as, "*shall* you go?" (reply, "I *shall* go;") "*shall* she go?" i. e., "do you insist upon or assure her going?" (reply, "she *shall* go.") The same analogy is transferred to either second or third person in such terms as "you say, or believe, you *shall* go," "she says, or believes, she *shall* go." Following a conditional subjunction, as *whether*, *if*, the word *shall* is employed in all persons to indicate or imply futurity simply; as, if you *shall* say he is right. *Should* is in all cases used in the same relation and the same signification as *shall*, as its imperfect. In the early English, and accordingly in our English version of the Scriptures, *shall* is the auxiliary chiefly employed, in all the persons, to denote simple futurity. Inaccurate speakers, as foreigners, vulgarians, &c., are apt to frequently confound *shall* and *will*.

Shal'li, *n.* Same as CHALLIS, *q. v.*

Shalloon', *n.* [Said to take its name from *Chalons*, France.] A slight kind of worsted or woollen stuff.

Shal'lop, *n.* [*Fr. chaloupe*; *Sp. chalupa*.] An open, broad, two-masted boat, rigged schooner-fashion, formerly used by fishermen, but now nearly superseded by luggers and yawls.

Shallot', *n.* (*Bot.*) Same as ESCHALOT, *q. v.*

Shal'lotte, in *N. Carolina*, a post-village of Brunswick co., 30 m. S.W. of Wilmington.

Shallow, (*shāl'lo*), *a.* (*comp. SHALLOWER*; *superl. SHALLOWEST*.) [Probably from *A. S. sceylf*, a shelf; accumulations of sand on the shore having formerly been called *shelves*.] Shoal; not deep; having little depth; as, a *shallow* river.—Not deep, or not entering far into the earth; as, a house with a *shallow* foundation.—Not intellectually deep; not profound; not entering deeply into abstruse subjects; superficial; empty; ignorant; simple; as, a *shallow* intellect, a *shallow* understanding.—Slight; not deep or sonorous; not of low, heavy, or penetrating sound; as, a *shallow* tone.

—*n.* A shelf; a flat; a shoal; a sand-bank; any place where the water is not deep;—usually in the plural; as, "the *shallows* of the moving sand."—*Dryden*.

Shal'low-brained, **Shal'low-pated**, *a.* Empty-headed; silly; vacuous; having superficial or petty understanding; as, a *shallow-brained* critic.

Shal'lowly, *adv.* In a shallow manner; superficially; ignorantly.

Shal'lowness, *n.* State or quality of being shallow; small depth; lack of depth; as, the *shallowness* of a stream.—Superficialness of the mental faculties; want of power to enter deeply into an abstruse subject; emptiness of brain; ignorance; silliness.

Shal'low-searching, (*-sérch-*), *a.* Searching or seeking in a superficial manner.

Shalmane'ser, King of Assyria, ascended the throne abt. B. C. 728, and reigned 14 years. Scripture represents that he came into Palestine, subdued Samaria, and carried away most of the people beyond the Euphrates.

Shal'stone, *n.* [*Ger. schaalstein*.] (*Min.*) Tabular spar.

Shalt, the 2d person singular of *SHALL*, *q. v.*

Shal'y, *a.* Having the characteristic qualities of shale.

Sham, *n.* [*A. S. sceamu*; *Ger. sham*, shame.] That which is shameful because deceiving just expectation; any trick, fraud, or pretext that seduces or disappoints; imposture; feint; humbug; delusion; as, the *shams* of astrological judgments.

—*a.* False; counterfeit; pretended; spurious; as, a *sham* quarrel.

—*v. a.* (*imp. and pp. SHAMMED*.) To trick; to cheat; to humbug; to deceive the expectation of; to delude or bamboozle by false pretences; as, to *sham* piety, modesty, or humility.—"to obtrude by fraud, feint, or imposture; as, to *sham* fallacies upon the world for cur-

rent reason.—To ape; to imitate; to copy; to assume the style, manner, or characteristic appearance of; as, a vulgar person who *shams* gentility.

To *sham* *Abraham*, to feign sickness, infirmity, or incapacity. (*Colloq.*)

—*v. n.* To feign; to impose; to use false pretences; as, he is *shamming* poverty to hide his meanness.

Shamanism, *n.* A general appellation given to the idolatrous religions of a number of barbarous tribes, comprehending those of Finnish race—the Ostiaks, Samoyeds, and other inhabitants of Siberia as far as the Pacific Ocean.

Sham'ble, *v. n.* To walk awkwardly and unsteady, as if the knees were weak; to shuffle along.

—*n.* [*A. S. scamet*, a stool, bench, form; *Ger. schämel*; *Fr. escabeau*.] (*Mining*.) A shelf or niche left at proper distances to receive the ore which is thrown from one to another, and thus raised to the top.

—*pl.* The benches, or stalls, on which butchers expose their meat for sale; a flesh-market.

Sham'bling, *n.* An awkward, clumsy, unsteady pace or gait; a shuffling motion.

Shame, *n.* [*A. S. sceamu*, *scamu*; *Ger. scham*.] A painful sensation excited by a consciousness of guilt, or of having done something which injures reputation, or by the exposure of that which nature or modesty prompts us to conceal;—hence, decency; propriety; decorum; as, her blush of maiden *shame*.—Reproach incurred or endured; ignominy; contumely; derision; contempt; dishonor suffered; as, "an erring sister's *shame*." (*Byron*).—Cause or reason of shame or dishonor; that which brings reproach, and lowers or degrades one in the estimation of others; as, he is a *shame* to manhood.—The privy or secret parts.—*For shame!* fie upon you! shame on you!—*To put to shame*, to inflict shame on; to cause to experience or suffer shame.

—*v. a.* [*A. S. sceamian*.] To make ashamed; to cause to feel or experience a consciousness of guilt or of doing something derogatory to honor or reputation; to cause to blush.

"He *shamed* oppression, till it set him free."—*Dryden*.

—To dishonor; to disgrace; to cover with reproach or ignominy; to confer infamy upon; as, speak truth and *shame* the Devil.—To deride; to ridicule; to mock at. (*R.*)

—*v. n.* To feel shame; to be ashamed; as, such language I *shame* to repeat. (*R.*)

Shame'faced, (*-fāst*), *a.* Bashful; modest; diffident; coy; easily confused or put out of countenance; as, a *shamefaced* woman.

Shame'facedly, *adv.* In a shamefaced manner; with becoming or excessive modesty, or bashful coyness.

Shame'facedness, *n.* Bashfulness; excess of modesty; also, becoming coyness or diffidence.

Shame'ful, *a.* Full of shame; disgraceful; reproachful; that brings shame, dishonor, or infamy; disreputable; unbecoming; scandalous; reprehensible; as, a *shameful* retreat, a *shameful* act or proceeding.—Indecent; raising or exciting shame in others; as, a *shameful* sight.

Shame'fully, *adv.* In a shameful manner.

Shame'fulness, *n.* State or quality of being shameful; disgracefulness.

Shame'less, *a.* Destitute of shame; utterly short of, or wanting modesty or self-respect; insensible to reproach, dishonor, or disgrace; impudent; immodest; unblushing; audacious; indecent; done without shame; indicating absence of shame; as, a *shameless* reprobate.

Shame'lessly, *adv.* In a shameless manner.

Shame'lessness, *n.* Want of shame; absence of modesty or decency; insensibility to disgrace or dishonor; impudence.

Sham'er, *n.* One who, or that which, puts to shame; that which confounds.

Sham'mel, *n.* (*Mining*.) A process by which ore or water is raised by bringing it first to an intermediate platform before lifting it to the surface of the ground.

Sham'mer, *n.* One who shams; an impostor; a humbug.

Shamo'kin, in *Pennsylvania*, a post-borough and township of Northumberland co., 18 m. E.S.E. of Sunbury. Pop. (1897) 16,160.

Shamokin Creek, in *Pennsylvania*, falls into the Susquehanna river at Sunbury.

Shamokin Dam, in *Pennsylvania*, a post-village of Snyder co.

Shamong', in *New Jersey*, a village and township of Burlington co., 40 m. E.S.E. of Camden.

Shamoo'la, *n.* (*Bot.*) See PANICUM.

Sham'oy, **Sham'moy**, **Sham'my**, *n.* See LEATHER.

Shamoy'ing, *n.* (*Manuf.*) See LEATHER.

Shampoo', *v. a.* [*Hind. champra*, to press.] To press and rub the entire surface of the body, and at the same time to bend and extend the limbs and rack the joints, in connection with flesh-brushes and the hot bath.—To wash and scrub thoroughly the head with the fingers, using either soap or a saponaceous preparation, for the more perfect cleansing.

Shampoo'er, *n.* One who shampoos.

Shampoo'ing, *n.* Act or practice of one who shampoos.

Sham'rock, *n.* [*Irish*.] (*Bot.*) A ternate-leaved plant, adopted by the Irish as their national emblem. Many and warm have been the disputes to determine the veritable *S.* Some writers contend for the *Oxalis acetosella*, or Wood-sorrel, the leaves of which unfold about St. Patrick's day; while others maintain that the *Trifolium repens*, or White Clover, is the favored plant. Legends make out that St. Patrick, when preaching the gospel to the benighted inhabitants of Ireland, illustrated the great doctrine of the Trinity by the triple leaf of the *S.* Whether he plucked the bright, green

leaf of the Wood-sorrel, or the more familiar herbage of the White Clover, cannot now be determined. The latter is, however, now generally worn by Irishmen on St. Patrick's day.

Sham'rock, in *Missouri*, a post-village of Calloway co., 48 m. N.E. of Jefferson city.

Sham'rock, in *Ohio*, a village of Adams co., 88 m. S.E. of Cincinnati.

Sham'yl. See SCHAMYL.

Shanda'ken, in *New York*, a post-township of Ulster co., 56 m. S.S.W. of Albany.

Shanes'ville, in *Ohio*, a post-village of Tuscarawas co., 90 m. E.N.E. of Columbus.

—A village of Mercer co., 124 m. W.N.W. of Columbus.

Shanesville, in *Pennsylvania*, a post-village of Berks co., 16 m. N.E. of Reading.

Shang'hae, or **Shang'hai**, a city and river-port of China, prov. Kiang-su, on the Woosung River, 40 m. by water from the sea, and 160 m. E.S.E. of Nankin; Lat. 30° 12' N., Lon. 120° 50' E. The city stands in a level and well cultivated plain, it consists of old *S.*, enclosed by a wall, and several suburbs, the foreign suburb is divided into the French, British and American concessions. It is well sewered, has excellent supply of water, electric lights and also gas. The total population with the suburbs is about 700,000. It has a mint, with manufactures of silk, vegetable oils, and oil cake (of which vast quantities are annually sent into the interior), iron-ware, glass, paper, and ivory-ware. *S.* is the most northerly of the 5 Chinese ports opened to foreigners by the treaty of 1842, and is now one of the Chinese treaty ports. The river, which may be navigated by ships of 450 or 500 tons for a considerable distance above the town, crosses the Grand Canal, so that *S.* is an entrepôt for all the vast and fertile countries traversed by the canal, and by the great rivers in the Yang-tse-Kiang, and the Hoang-Ho, with which it is connected,—hence the present importance of this emporium, and hence, also, the indefinite extension to which its foreign trade will probably attain. Its inland and coasting trades are both very extensive. The inhabitants of *S.* are much more hospitable, and better disposed towards foreigners than those of Canton; and strangers may travel for miles into the interior, all round the city, with perfect security. The Chinese part, with narrow, filthy streets, is surrounded by a wall, between which and the river lie densely crowded suburbs. The French and English settlements are handsomely built.

Shank, (*shangk*), *n.* [*A. S. scanca*; *Ger. schenkel*.] The large bone of the leg; the whole joint of the leg from the knee to the ankle;—hence, the legs, used in a contemptuous sense; as, a pair of pitiful *shanks*.—Hence, that long part of an instrument which serves as the handle or motor; as, specifically, the straight part of a hook above the bent portion; the shaft or principal member of an anchor (Fig. 121); the eye of a button; that part of a key which is between the bow and the part which enters the wards of the lock; that part of a cutting tool or implement which connects with the handle.

(*Arch.*) The space between the channels of a triglyph.

(*Metal.*) A large ladle moved by the action of bars.

(*Print.*) The body of a type.

Shank'er, *n.* (*Med.*) Same as CHANCER, *q. v.*

Shank'-painter, *n.* (*Naut.*) A rope or chain which, passing round the shank of the anchor, lying horizontally, confines it to the ship's bow, abaft the cathead.

Shanks'ville, in *Pennsylvania*, a post-village of Somerset co., 77 m. E.S.E. of Pittsburgh.

Shan'non, a large river in the W. of Ireland, and one of the finest in the British Islands. The *S.* has a length of 220 m., and is divided into the Upper and Lower *S.* The Upper *S.*, by far the longest and narrowest part of the river, rises in the mountains of Ulster, at the N.W. extremity of the co. of Cavan from the Kulkeah Mountains, and flowing *S.* enters and passes through Lough Allen, till, quitting the county of Leitrim, it flows *S.* and E. and S.W. to the town of Banagher, forming from this portion of its course the boundary between Connaught and Leinster. From Banagher the river has first a S.W. and then a *S.* course, till, a little above the city of Limerick, it divides into two branches, which, flowing round King's Island, the most ancient part of the city, unite below to form the Lower *S.* From its rise in Cavan to its encircling the King's Island, the river has a length of 180 m. In this course the river is greatly interrupted by shallows, falls, and rocks, impeding all navigation; many canals, however, have been constructed to overcome these difficulties, and connect the clearer portions of channel. The Lower *S.*, from Limerick to the mouth of its estuary in the Atlantic, has a length of 40 m. and a breadth of from 1 to 7 m.; though the channel in places is obstructed by islands, rocks, and shoals. It has, however, good anchorage everywhere, and forms a harbor of refuge for ships against the force of westerly gales.

Shan'non, in *Illinois*, a post-village of Carroll co., 14 m. S.W. of Freeport.

Shannon, in *Kansas*, a post-township of Atchison co. Pop. (1897) 2,380.

Shannon, in *Missouri*, a S.E. co.; area. 960 sq. m. Rivers. Current, Jack's Fork, and Big, and Sinking creeks. Surface, diversified, and in part covered with pine forests; soil, generally fertile. *Min.* Copper. *Cap.* Eminence. Pop. (1897) 10,050.

Shannon, in *Ohio*, a village of Muskingum co., 11 m. N.N.W. of Zanesville.

Shan'nonale Springs, in *W. Virginia*, a watering-place of Jefferson co., about 5 m. S. of Charlestown.

Shan'non Hill, in *Virginia*, a post-village of Goochland co., 25 m. W. of Richmond.

Shan'nouville, in *Pennsylvania*, a post-village of Montgomery co., 5 m. W. of Norristown.

Shan-se, a prov. of China, between Lat. 35° and 41' N., Lon. 110° and 114° 30' E.; area, 55,268 sq. m. The surface is mountainous, but generally fertile. *Prod.* Wheat, cotton, millet, rice, tobacco, silk, chemicals, honey, and live-stock. *Cap.* Tae-yuen-foo. *Pop.* 15,000,000.

Shan States, a number of tributary states in Indo-China, lying between Munnipur on the W. and Yunnan on the E., and from the parallel of 24° N. Lat. south to Bangkok and Cambodia. Of these the northern states are tributary to Burma, and the southern to Siam. A great portion of the mountainous region of these states is called the *Laos Country*, and is inhabited towards the N. by the *Black-bellies*, so called from the circumstance that they tattoo themselves with figures in ink, and in the S. by the *White-bellies*, who do not tattoo. Xieng-mai, the cap. of Laos, stands on a wide plain on the Meinam, 500 m. N. of Bangkok, and is said to contain 50,000 inhabitants. The number of Laocians included in Siam alone is estimated at 1,000,000. They are meek, gentle, unwarlike, and superstitious. Their chief employment is agriculture; and in religion they are Buddhists.

Shan't. An inelegant contraction of *shall not*, frequently employed in colloquial language; as, I *shan't* do it.

Shan-tung', a marit. prov. of China, bordering on the Gulf of Pecheleo, the Yellow Sea, and the Hoang-ho, bet. Lat. 35° and 38° N., Lon. 115° and 122° 40' E.; area, 65,000 sq. m. The surface is mountainous in the E. and level in the W. *Prod.* Wheat, millet, indigo, drugs, and silk. *Manuf.* Carpets, caps, and heupen cloth. *Cap.* Tse-nan-foo. *Pop.* 28,000,000.

Shan'ty, *n.* [Etymol. unknown.] A temporary building or structure, used as a dwelling; a mean place of abode; a log-cabin; a hut.

—*v. n.* To become the occupant of a shanty.

Shan'ty-man, *n.*; *pl.* SHANTY-MEN. One who dwells in a shanty; a lumberer; a wood-cutter.

Shap'able, *a.* That may be shaped, formed, or figured.

Shape, *v. a.* [*A. S.* *syppan*; *Ger.* *schaffen*.] To form or create; to produce; to make; as, "I was *shapen* in iniquity." (*P's.* li. 5.)—To mould or make into a particular form or figure; to give form or figure to; to fashion; to cast.

"Grace *shaped* her limbs, and beauty decked her face." — *Prior*.

—To mould; to adapt or contrive to a purpose; to regulate; to direct; to adjust.

"There is a Providence that *shapes* our ends." — *Shaks*.

—To image; to conceive; as, to *shape* one's ideas into elegancies of expression.

—*v. n.* To suit; to square; to be adapted or adjusted.

—*n.* To form or figure as constituted by lines or angles; external appearance; outward aspect; make; guise; the form of the trunk of the human body; as, the *shape* of a leg, of a horse, of a tree, &c.—A being, as endowed with form; a figure; an appearance.—Concrete embodiment, idea, or pattern, as of some quality; form, as of thought, conception, or language.

"Thy heart contains....of good, the perfect *shape*." — *Milton*.

Shape'less, *a.* Destitute of shape or of regular form; lacking symmetry or harmony of dimensions; formless; as, he battered it into a *shapeless* mass.

Shape'lessness, *n.* State or condition of being shapeless.

Shape'ly, *a.* Having a regular or harmonious shape; well-formed; symmetrical; as, *shapely* hands.

Shape'smith, *n.* A burlesque appellation given to one who undertakes to improve the form of the body.

Shapleigh, (*shap'lee*), in *Maine*, a post-township of York co., 77 m. S.W. of Augusta.

Shard, *n.* [*A. S.* *sceard*.] A piece, or fragment, of an earthen vessel, or of any brittle substance.—Hence, a hardcase that covers the wings of certain insects, as the beetle, &c.

Share, (*shair*), *n.* [*A. S.* *scear*.] The broad iron blade of a plough which cuts the ground or furrow-slice.—A part; a portion; a division; a certain quantity; as, she has a *share* of good looks.—A part or portion of a thing owned by a number in common; the part of a thing allotted or distributed to each individual of a number; allotment; dividend; as, he received his *share* of the profits.—Hence, a part belonging to one; portion possessed; part contributed; as, he owns *shares* in various railroads.—*To go shares*, to be equally a partaker of; to have an even interest in; as, *to go shares* in a business speculation.

—*v. a.* To part among two or more; to divide; to apportion; to allot; as, to *share* another's good fortune.—To seize and possess jointly or in common: to partake; to participate in; as, to *share* the spoils of war.

—*v. n.* To have part; to receive a dividend or portion; as, he *shares* in the national prosperity.

Share'-beam, *n.* That part of a plough to which the share is attached.

Share'-bone, *n.* (*Anat.*) The *os pubis*. See *PUBIS*.

Share'-broker, *n.* A dealer in government bonds, or railroad, or other shares and securities.

Share'-holder, *n.* One who holds or owns a share, or shares, in a joint fund or property.

Shar'er, *n.* One who shares; one who participates in anything with another; one who enjoys or suffers in common with another or others; as, a *sharer* in a commercial transaction.

Shark, *n.* [*Lat.* *carcharias*; *Gr.* *karcharias*, from *karcharos*, with sharp or jagged teeth.] (*Zoöl.*) A family of large and voracious sea-fishes. See *SQUALIDÆ*.

—A rapacious, grasping fellow; also, a sharper, a trickster.

—*v. n.* To play the petty thief; to pilfer; to swindle;—

To cadge; to live by contemptible shifts or artifices; to act the bummer; as, he *sharks* for a dinner.

Shark'er, *n.* A cadger; a bummer.

Shark'ing, *n.* Petty theft; pilfering; trickery.—Cadging; getting one's livelihood by petty shifts and stratagems.

Sha'ron, (*Script.*) a level tract along the Mediterranean, between Mount Carmel and Caesarea, celebrated for its rich fields and pastures. (*Josh.* xii. 18; *Cant.* ii. 1; *Isa.* xxxiii. 9, xxxv. 2, lxx. 10; 1 *Chron.* xxvii. 9.)

Sha'ron, in *Connecticut*, a post-village and township of Litchfield co., 40 m. N.W. of Hartford.

Sharon, in *Illinois*, a township of Fayette co., 4 m. N.W. of Vandalia.—A village of Whitesides co., 135 m. S.W. of Springfield.

Sharon, in *Iowa*, a village and township of Appanoose county, 100 miles south-west of Iowa City.—A township of Clinton county.—A township of Johnson county.

Sharon, in *Massachusetts*, a post-village and township of Norfolk co., 17 m. S. W. of Boston.

Sharon, in *Michigan*, a village and township of Washenaw co., 60 m. S.W. of Detroit.

Sharon, in *Minnesota*, a township of La Sneur county.

Sharon, in *Mississippi*, a village of Madison co., 30 m. N. of Jackson.

Sharon, in *New Hampshire*, a twp. of Hillsborough co., 35 m. S.W. of Concord.

Sharon, in *New York*, a post-township of Schoharie co.

Sharon, in *Ohio*, a township of Franklin county.—A village of Hamilton county, 15 miles N.N.E. of Cincinnati.—A township of Medina county.—A post-village and township of Noble county, 27 miles N.W. of Marietta.—A township of Richland county.

Sharon, in *Pennsylvania*, a flourishing town in the W. part of Mercer co., on the Ohio State line, 16 m. W. of Mercer. It has 8 churches, 3 banks, 3 newspapers, some manufactories, several blast furnaces and foundries, and is the business centre of a large iron and coal trade.—A township of Potter county.—A village of Beaver county, 26 m. N. W. of Pittsburgh.

Sharon, in *Vermont*, a post-village and township of Windsor co., 28 m. S.E. of Montpelier.

Sharon, in *Wisconsin*, a post-village and township of Walworth county, 65 miles E.S.E. of Madison.—A township of Portage county, 5 miles north-east of Stanton.

Sharon Centre, in *New York*, a post-village of Schoharie co., 46 m. W. of Albany.

Sharon Centre, in *Ohio*, a post-village of Medina co., 112 m. N.E. of Columbus.

Sharon Centre, in *Pennsylvania*, a post-village of Potter co., 192 m. W.N.W. of Harrisburg.

Sharon Springs, in *New York*, a post-village of Schoharie co., 50 m. W. of Albany, celebrated for its mineral waters.

Sha'ronville, in *Ohio*, a post-village of Hamilton, 13 m. N.E. of Cincinnati.—A village of Pike co., 55 m. S. of Columbus.

Sharp, *a.* (*comp.* SHARPER; *superl.* SHARPEST.) Having a very thin edge, or fine point; acute; keen; acuminate; not dull, blunt, or obtuse; as, a knife with a *sharp* edge.—Terminating in a point or edge; not rounded; peaked or ridged; as, a *sharp* roof.—Having acuteness of mind, or quickness to discern or distinguish; of keen perception; ready at invention; discriminating; not dull; as, a *sharp* sight or hearing.—Keen to the taste or smell; acrid; biting; tart; pungent; acid; sour; as, *sharp* mustard.—Affecting the sense of hearing, like sharp points piercing to the ear; shrill; as, a *sharp* sound, a *sharp* voice.—Characterized by severity or harshness of language; severely rigid; caustic; sarcastic; incisive; cutting; as, a *sharp* rebuke.—Distressing or trying to the feelings; painful; severe; bitter; as, *sharp* misery.—Eager in pursuit; keen in quest or seeking; impetuous to obtain gratification; hungry; as, a *sharp* appetite.—Vehement; violent; fierce; ardent; impetuous; as, a *sharp* onset upon an enemy.—Characterized by leanness, meagreness, or emaciation; as, a *sharp* visage.—Biting; pinching; nipping; piercing; as, a *sharp* wind.—Close and exact; shrewd; smart in dealing; keenly attentive to self-interest; as, a *sharp* man of business.—Hard; as, *sharp* sand;—a cant term among workmen.

(*Mus.*) Above the pitch; acute; as, a *sharp* note;—opposed to a *flat* tone; higher by a semitone in pitch; so heightened in sound as to be out of tune; as, that violin is *sharp*.

(*Pronunciation.*) Aspirated; whispered; non-vocal; surd, as certain consonants, as, *p, k, t, f*.

(*NOTE.*) *Sharp* is largely employed in the construction of self-explaining compounds; as, *sharp-cornered, sharp-edged, sharp-featured, sharp-toothed, &c.*

To brace sharp. (*Naut.*) To brace the yards as obliquely as possible, in order to bring a ship well up to the wind.

—*n.* A part of a stream where the current runs very rapidly; as, *sharps* and eddies.

(*Mus.*) A sign # in music, which, when prefixed to a note, elevates it by a semitone in the scale. When placed at the beginning of a piece of music, it denotes that all the notes on the line or space on which it is placed, and their octaves above and below, are to be played sharp. A double sharp X raises a note two semitones.

—*v. a.* To sharpen; to make sharp, keen, acute, or penetrating; to render quick.

(*Mus.*) To make with a sharp; to raise a note or semitone.

Sharp, *v. n.* To act the sharper; to play tricks in bargaining.

Sharp, a co. of *Arkansas*.

Sharp'-cut, *a.* Clear; well-defined; having the outlines distinctly marked; as, a *sharp-cut* countenance.

Sharpen, (*shar'pn*), *v. a.* To make sharp; to give a fine edge or point to; as, to *sharpen* a razor, to *sharpen* the teeth of a saw.—To make more eager or active; to render more keen; as, to *sharpen* the appetite.—To make more quick, acute, or ingenious; as, to *sharpen* the wit or understanding.—To make more quick or acute in perception; as, to *sharpen* one's sight.—To make more pungent or painful; as, to *sharpen* a disease.—To make incisive, sarcastic, caustic, or severe; as, to *sharpen* invective.—To render less flat, or more shrill and piercing; as, to *sharpen* sound.—To make sour; to make more piquant, tart, or acid; as, meat *sharpened* with vinegar.

(*Mus.*) To raise by means of a sharp, as a note or sound.

—*v. n.* To grow or become sharp.

Sharp'er, *n.* One who practises sharpness;—particularly, in a derogatory sense, a trickster in dealings; a cheat in bargaining or gaming; an over-shrewd man of business; as, he was fleeced of his money by *sharpers*.

Sharp'ie, *n.* (*Naut.*) A term for a long, sharp, flat-bottomed sail-boat.—*Webster*. (*Local Amer.*)

Sharp'ly, *adv.* In a sharp manner; with a keen edge or a fine point; severely; rigorously; roughly; keenly; acutely; violently; vigorously; vehemently; with keen perception or nice discernment; exactly; minutely; wittily.

Sharp Mountain, or THIRD MOUNTAIN, in *Pennsylvania*, extends over Schuylkill co. from N.E. to S.W. It contains inexhaustible beds of anthracite coal.

Sharp'ness, *n.* State or quality of being sharp; as, (1.) Keeness of an edge or point; as, the *sharpness* of a knife. (2.) Pungency; acidity; tartness; sourness; as, the *sharpness* of vinegar. (3.) Acuteness or severity of pain or affliction; as, *sharpness* of suffering. (4.) Severity or pungency of language; caustic sarcasm; as, the *sharpness* of a retort. (5.) Acuteness of intellect; power of nice discernment or quick discrimination; readiness or exactness of the understanding; sagacity; penetration; ingenuity; as, *sharpness* of wit. (6.) Keeness; severity; as, the *sharpness* of the air. (7.) Quickness of sense or perception; as, *sharpness* of vision. (8.) Keeness; eagerness; as, *sharpness* of appetite. (9.) Shrillness; piercingness; as, *sharpness* of sound.

(*Mus.*) Elevation of a note by a semitone.

Sharps'burg, in *Kentucky*, a post-village of Bath co., 38 m. S. of Maysville.

Sharps'burg, in *Maryland*, a post-village of Washington co., 16 m. S. of Hagerstown, near Antietam Creek. See *ANTIETAM*.

Sharpsburg, in *Missouri*, a village of Marion co., 90 m. N.N.E. of Jefferson City.

Sharpsburg, in *Pennsylvania*, a post-borough of Allegheny co., 5 m. N.E. of Pittsburgh. *Pop.* (1897) 5,450.

Sharp'set, *a.* Affected by keen hunger; eager in quest of gratification; ravenous; as, he is *sharp-set* for his dinner.

Sharp'shoot'er, *n.* [From *sharp* and *shoot*.] A skilled marksman with a rifle or carbine; one trained to aim at a mark with exactness.

Sharp'shoot'ing, *n.* A shooting with precision or exactness of aim;—hence, a keen contest of wit, badinage, or argument.

Sharp'sight'ed, *a.* Having quick or acute sight or perception; as, a *sharp-sighted* bird.—Having quick discernment or acute understanding; as, a *sharp-sighted* individual.

Sharp'sight'edness, *n.* Quality of being sharp-sighted.

Sharp's Island, in the Chesapeake, with a light-house and fixed light at its N. extremity, opposite the entrance of Pawtuxent River.

Sharps'ville, in *Indiana*, a post-village of Tipton co., 48 m. N. of Indianapolis.

Sharps'ville, in *Pennsylvania*, a flourishing post-borough of Mercer co., 11 m. N.W. of Mercer, the principal shipping point for the Mercer co. block-coal. It contains several blast-furnaces, foundry, machine-shops, flour-mill, &c.

Sharp'town, in *New Jersey*, a post-village of Salem co., 10 m. N.E. of Salem.

Sharp'-visaged, (*-viz'ajd*), *a.* Having a sharp, thin, or weakened face.

Sharp'-witted, *a.* Sagacious; penetrating; having an acute or nicely-discerning mind; as, a *sharp-witted* lawyer.

Shartlesville, (*shar'tels-vil*), in *Pennsylvania*, a post-village of Berks co., 65 m. E. of Harrisburg.

Shas'ta, in *California*, a N. co., bounded on the W. by the Coast Range, and intersected by the Sacramento and Pitt rivers; area, 3,960 sq. m. *Surface*, mountainous; *soil*, fertile in the valleys and along the streams. *Min.* Gold, salt, granite, and metamorphic limestone. Mineral springs are numerous. *Cap.* Redding. *Pop.* (1897) 13,100.—A post-township of the above co., about 40 m. N.N.W. of Red Bluff.

Shas'ta, SHASTE, or SHASTY, a mountain of the Cascade Range in the N. part of California, Lat. 41° 20' N., Lon. 122° W., abt. 14,000 feet high.

Shas'ter, *Shas'tra*, *Sas'tra*, *n.* [*Hind.*] (*Bibliol.*) A term denoting the book which contains the interpretations or explanations of the Vedas by *sasta*, i. e., science;—of such books we have the *Vedanga-Sashtra*, the *Sashtra-Bade*, and several others.

Shat'ter, *v. a.* [*A. S.* *scateran*.] To break so as to scatter into pieces; to break at once into many pieces; to dash, burst, rend, or part into fragments by violence; to rend; to crack; to split; to rive into splinters; as,

to *shatter* a vase.—To dissipate; to break up; as, a man of *shattered* humor.—To disorder; to derange; to make unsound; to render delirious; as, to *shatter* the animal constitution, to be *shattered* in intellect, &c.

Shat'ter, *v. n.* To be broken into fragments; to fall or crumble to pieces by any force or violence applied.

—*n.* A fragment; —used, for the most part, plurally, to denote the fragments of anything forcibly rent or broken; as, to break glass into *shatters*.

—*pl.* The fallen leaves of the pine-tree.

Shat'ter-brained, **Shat'ter-pated**, *a.* Having the brains or mind disordered or confused.—Heedless; wild; incoherent; not consistent.

Shat'tery, *a.* Friable; brittle; easily breaking into many pieces or splinters; not firm, dense, or compact; as, *shat'tery* spar.

Shaum'burg, in *Illinois*, a post-township of Cook co., 25 m. W.N.W. of Chicago.

Shave', *v. a.* (*imp.* SHAVED; *pp.* SHAVED, or SHAVEN.) To cut or pare off something from the surface of; as, to *shave* a grass-plot.—To pare close; to make bare or smooth by cutting the hair from the surface; to take off the beard or hair of; as, to *shave* the beard with a razor.—To cut off thin slices from; to cut in thin slices; to make smooth by paring or cutting off slices; as, to *shave* wood.—To skim along the surface of or near it; to sweep along; —also, to ricochet; as, a gull *shaves* the ocean.—To fleece; to strip; to pillage; to oppress by exaction or extortion.

To *shave a note*, to buy up a note at a considerable discount, or to receive interest upon it much in excess of the legal rate. (Used colloquially.)

—*v. n.* To cut off the beard with a razor close to the surface; —hence, to cut closely or keenly; to be hard or exacting in bargaining; to cozen; to get the better of in dealing or trading.

—*n.* A shaving; a thin slice; as, a *shave* of bread.—The operation of shaving; as, an easy *shave*.—A drawing-knife; an instrument for shaving wood.—A fine or minute difference or distinction; as, he is a *shave* a better man than the other.—In the U. States, an exorbitant discount on a note for ready money.

Shave'-grass, *n.* (*Bot.*) The Dutch-rush. See *EQUISETACEAE*.

Shave'ling, *n.* A man shaved;—hence, a term of contempt or derision for a monk or friar; as, a bald *shave'ling*.

Shav'er, *n.* One who shaves, or whose occupation is to shave; hence, a barber.—A close bargainer; a sharp dealer; a cheat; a trickster; one who chisels; as, the man is a cunning *shaver*.—A pillager; a plunderer; one who strips or fleeces.—A youngster; a little fellow; an urchin; as, a small *shaver* in buttons opened the door.

Sha'vertown, in *New York*, a post-village of Delaware co., 15 m. S.E. of Delhi.

Shav'ing, *n.* Act of one who shaves; act of paring the surface.—That which is shaved or pared off; —especially, a thin slice or curl of wood planed or shaved off.

Shaving-brush, a brush for administering lather to the face preparatory to the operation of shaving.

Shawa'naw, or **Shawa'no**, in *Wisconsin*, a N.E. co.; area, 1,152 sq. m. Rivers, Wolf, Oconto, and Embarras. Lake Shawanaw, 6 m. long, is in the central part. Surface, mostly covered with forests of pine and other trees; soil, generally fertile. Cap. Shawano. Pop. (1895) 22,573.

—A thriving city, cap. of the above co., on Wolf river and the Ch. & N.W. R. R., 152 m. N.W. of Milwaukee. Pop. (1895) 1,759.

Shawangunk, (*shong'gum*), in *New York*, a river which rises in Orange co., and enters Walkill River in Ulster co., 14 m. W.S.W. of Poughkeepsie, after a N.E. course of 80 m.—A post-township of Ulster co., 85 m. S.S.W. of Albany.

Shawan'gunk Moun'tains, in *New York*, a portion of the Appalachian system, extends through Orange and Sullivan cos. into Ulster.

Shawl, *n.* [*Fr. châle*; *Pers.* and *Hind. shal*; *Sansk. shālū*.] A kind of mantle or tunic; a cloth of cotton, wool, silk, or hair, used by females as a loose covering for the upper part of the body; as a Cashmere *shawl*.

—*v. a.* To wrap in a shawl; as, to *shawl* a lady.

Shawnee', in *Indiana*, a township of Fountain county.

Shawnee, in *Kansas*, a N.E. co.; area, about 558 sq. m. Rivers, Kansas and Wakarusa. Surface, undulating; soil, fertile. Min. Coal and limestone. The county is traversed by the Union Pacific and the Atch., Topeka & Santa Fé R.Rs. Cap. Topeka. Pop. (1895) 47,978.

—A post-village and township of Johnson co., 11 m. S.W. of Kansas City, Mo.

Shawnee, in *New York*, a post-village of Niagara co., 18 m. N.E. of Buffalo.

Shawnee, in *Ohio*, a township of Allen co.

Shawnee, in *Pennsylvania*, a post-village of Monroe co., 30 m. N. of Easton.

Shawnees, a tribe of N. American Indians of the Algonquin group, who lived on the Wabash and other neighboring affluents of the Ohio. They now live on the S. bank of the Kansas River, and number abt. 1200.

Shaw'neetown, in *Illinois*, a post-town, cap. of Gallatin co., abt. 9 m. S.W. of the mouth of the Wabash River.

Shaw's Flat, in *California*, a post-village of Tuolumne co., 2 m. W. of Sonora.

Shaws'ville, in *Virginia*, a post-village of Montgomery co., 77 m. S.W. of Lynchburg.

Shaws'wick, in *Indiana*, a township of Lawrence co.

She, *pers. pron. fem.* (*nom.* SHE; *poss. HER*, or *HERS*; *obj. HER*; *pl. nom.* THEY; *poss. THEIR*, or *THEIRS*; *obj. THEM*.)

[*A. S. heo*; *Ger. sie*.] A pronoun which is the substitute for the name of a female, and of the feminine gender; also, the word which refers to a female mentioned in the preceding or following part of a sentence or discourse.—A woman; a female; —used, sometimes, as a noun, principally in a disparaging or humorous sense; as, "Who'er she be, that not impossible she." *Crashaw*.

(NOTE. *She* is employed in composition for *female*, as representing an animal of the feminine sex; as, a *she-cat*, a *she-fox*.)

Sheaf', *n.*; *pl.* SHEAVES, (*sheers*.) [*A. S. sceaf*; *Ger. schaub*.] A number or quantity of things shoved, pressed, or thrown together; —specifically, a quantity of the stalks of wheat, rye, oats, or barley bound together; a bundle of stalks or straw; as, *sheaves* of golden grain.

—Any bundle, mass, or collection; —particularly, a number of arrows sufficient to fill a quiver.

(*Mech.*) See *SHEAVE*.

—*v. n.* To collect and bind into sheaves.

Sheaf'y, *a.* Pertaining or relating to, or consisting of, sheaves.

Sheak'leyville, in *Pennsylvania*, a post-village of Mercer co., 16 m. S.W. of Meadville.

Sheal'ing, *n.* The husk, pod, or shell, as of peas and the like.

Shear', *v. a.* (*imp.* SHEARED; *pp.* SHEARED, or SHORN.) [*A. S. scearan*, *scyran*; *Ger. and Du. scheren*.] To cut or clip from the surface of with an instrument of two blades, as a scissors; as, to *shear* sheep.—To cut or clip from a surface; to separate or take off by shears; as, to *shear* a fleece.

—*v. n.* To divide, as the two parts of anything when cut or sheared.

—*n.* An instrument used to cut with; —generally used in the plural. See *SHEARS*.

—Anything having the form of shears; as, specifically, (*Mining*.) Two very high joists or pieces of wood, placed in nearly a vertical position in each side of a shaft, and united at the top, over which, by means of a pulley, passes the capstan rope; this is for the convenience of lifting out, or lowering into the shaft, timber or other things of great length and weight.

(*Ship-building*.) See *SHEER*.

—A shearing; —used in expressing the age of sheep; as, a two- or three-shear ram.

(*Mach.*) The bed-piece of a machine-tool; as, the shears of a lathe.

Shear'er, *n.* One who shears; as, a *shearer* of sheep.

Shear'ersburg, in *Pennsylvania*, a post-village of Westmoreland co., 25 m. N. of Greensburg.

Shear'ing, *n.* Act of shearing; act of clipping or cutting off.—Proceeds of the act or process of clipping by shears; as, the *shearings* from cloth.—A once-sheared sheep; a sheurling.—Tilting; the process of preparing shear-steel.—In Scotland, the operation of reaping.

Shear'ing-machine, *n.* A machine for cutting plates of metal.—An apparatus for shearing cloth.

Shear'ling, *n.* A sheep that has been but once sheared.

Shears', *n. pl.* Scissors on a large scale, chiefly used in gardening. They are variously modified to suit their particular purposes, such as pruning trees, hedges, box-edgings, &c.

Shear-steel, *n.* A kind of steel made by welding several bars together, and again drawing them out. It is used for clothiers' shears, and many other cutting instruments.

Shear'water, *n.* (*Zoöl.*) The genus *Puffinus*, family *Procellariidae*, including birds distinguished from the Petrels in having the bill compressed near the end, and a straight spur in place of the hind toe. They spend their lives mostly on the ocean, rarely visiting the shore

Fig. 2349.—MANX SHEARWATER, (*Puffinus anglorum*.)

except for the purpose of incubation. *P. anglorum*, the Manx S. of the coast from New Jersey to Labrador (Fig. 2349), is about 15 inches long, grayish-black, the neck mottled with gray, the throat and all the under parts white. *P. major*, the Greater S., is about 20 inches long.

Sheas'ville, in *Indiana*, a post-village of Morgan co., 36 m. S.W. of Indianapolis.

Sheath, *n.* [*A. S. sceath*, from *sceadan*, to separate; *Ger. scheide*.] A cover, or covering; a case, usually of metal, for the reception of a sword or other long and slender instrument; a scabbard.

—Any thin covering for protection; as, a membrane investing a stem or branch, as in grasses; also, the wing-case of an insect.

Sheathe, (*shēth*), *v. a.* (*imp.* and *pp.* SHEATHED.) To put into a sheath, case, or scabbard; as, to *sheathe* a sword.—To fit with a sheath.—To case or cover with

boards, or with sheets of copper, zinc, or yellow metal; as, to *sheathe* a ship's bottom.—To cover or line; as, to *sheathe* the intestines with any demulcent substance.—To obtund, as acrimonious particles.—To *sheathe* the sword, figuratively, to make peace; to cease from war or enmity; —synonymous with to *bury the hatchet*, or *tomahawk*.

Sheathed, (*shēthd*), *p. a.* Put in a sheath; provided with a sheath; as, a *sheathed* weapon.

(*Bot.*) Invested with a sheath or membrane, as a stem.

Sheath'er, *n.* One who sheathes.

Sheath'ing, *n.* That which serves to sheathe; —particularly,

(*Naut.*) The covering laid on a ship's bottom as a protection against worms. Sheets of thin copper, zinc, or yellow metal, nailed on with copper or composition nails, constitute, at present, the sheathing of all the better class of vessels.

Sheath'less, *a.* Unsheathed; without a sheath.

Sheath-winged, *a.* Provided with a case for covering the wings, as certain insects.

Sheath'y, *a.* Forming, or resembling, a sheath or case. (*R.*)

She'a-tree, *n.* (*Bot.*) The Butter-tree of Africa, supposed to be the *Bassia butyragreea*. See *BASSIA*.

Sheave, (*sheev*), *n.* [*O. Du. schijve*, a disc, wheel.] (*Naut.*) The wheel in a block or pulley. In ships' blocks it is usually of brass or lignumvitæ, not infrequently in combination.—a square coak of brass being inserted in the centre of a wheel of lignumvitæ.

Sheave-hole, *n.* (*Naut.*) The hole through a block or spar in which a sheave is fixed.

She'ba, (*Anc. Geog.*) A kingdom of S. Arabia, embracing the greater part of Arabia Felix, was named after *Sheba*, one of the sons of Jokshan, second son of Abraham and Keturah (*Gen. x. 28*). The Queen of Sheba visited Solomon, B. C. 990 (1 *Kings* x. 1-13). The Greeks and Romans called the people *Sabai*, or *Sabaens*.

Sheboy'gan, or **CHEBOY'GAN**, a river of *Michigan*, rises in Otsego co., and flowing N. enters the Strait of Mackinaw at the town of Sheboygan.

Sheboygan, in *Wisconsin*, an E.S.E. co., bordering on Lake Michigan; area, 500 sq. m. Rivers, Sheboygan, Onion, and Mullet. Surface, level; soil, fertile. Pine and other timber is plentiful. Capital, Sheboygan.

—A flourishing city, cap. of the above co., on Lake Michigan and the Chic. & N.W. R. R., 52 m. N. of Milwaukee. Pop. (1895) 21,130.

Sheboygan, a river of *Wisconsin*, rises in Fond du Lac co., and flowing E., enters Lake Michigan at Sheboygan.

Sheboy'gan Falls, in *Wisconsin*, a post-village and township of Sheboygan co., on Sheboygan River, 6 m. from its mouth in Lake Michigan.

Shechi'nah, *n.* (*Jewish Antiq.*) See *SHEKINAH*.

Shed, *v. a.* (*imp.* and *pp.* SHED.) [*A. S. sceadan*, to pour out; *Ger. schütten*.] To cause or suffer to flow out; to emit; to throw off from one's self; to diffuse; as, to *shed* blood, to *shed* tears.—To cast; to let fall; to throw off, as any natural covering; as, trees *shed* their leaves in the autumn.—To cause to flow off without penetrating; as, an oilskin-coat is said to *shed* water.—To cover; to sprinkle; as, his hair is *shed* with gray.

—*v. n.* To let fall the parts forming the outer covering, as leaves, &c.

—*n.* Act of shedding, or causing to flow; —used only in composition; as, bloodshed.

Shed, *n.* [*A. S. scead*, from *sceadan*, to hide, cover.] A shelter or protection; —especially, a shanty; a covering of timber, shingles, &c., for shelter against rain and the inclemencies of weather; a structure consisting simply of a roof supported on columns; a rude house; a hovel; a sheal.

(*Weaving*.) The duplex sloping interstice made of the threads of the warp, through which to drive the shuttle.

She'chem, or **Si'chem**. See *GERIZIM*, and *NABLUS*.

Shed'der, *n.* One who sheds, or causes to flow; as, a *shedder* of blood.

Shed'ding, *n.* Act of spilling, effusing, or of casting off or out.—That which is shed, emitted, or cast off. (*R.*)

Shed'iac, (*shed-e-ak'*), in *New Brunswick*, a town and island opposite the mouth of Shediak River, in Shediak Bay, on the S.E. coast.

Sheel'in, (*Lough*), (*lok*), a lake of Ireland, partly in the cos. of Cavan, Meath, and Westmeath, 5 m. long and 2½ broad.

Sheen, **Sheen'y**, *a.* Lustrous; sparkling; glittering; —used in poetry only; as, "the azure *sheen*; *sheeny* heaven."—*Milton*.

—*v. n.* To shine; to glisten; to sparkle; to glitter; —used only in poetical composition.

Sheen, *n.* [*A. S. scieno*, shine, shining, clear; *Ger. schön*, beautiful.] Lustre; brightness; radiance; splendor; as, "Mercy throned in celestial *sheen*."—*Milton*.

Sheen'ly, *adv.* Brightly; lustrously; radiantly. (*R.*)

Sheep, *n. sing.* and *pl.* [*A. S. sceap*; *Ger. schaf*.] (*Zoöl.*) The common name of the genus *Ovis*, belonging to the *Caricornia*, or Hollow-horned Ruminant family. Naturalists are by no means agreed as to what was the original breed of this invaluable animal, which is, in modern farming, almost equally important for furnishing the farmer with a dressing of manure, and the community at large with mutton, clothing, and other necessities of life. Of the several varieties of wild S., which have by naturalists been considered entitled to the distinction of being the parent-stock, may be mentioned: 1, the Musmon (*O. musimon*), still found wild in the mountains of the larger islands of the Mediterranean and European Turkey; 2, the Argali (*O. ammon*), or

wild Asiatic *S.*, which are the tenants of the highest mountains of Central Asia, and the elevated, inhospitable plains of its northern portions; 3, the Rocky Mountain *S.* (*O. montana*) (Fig. 2350), which is found on the mountains of N. America; 4, the Bearded *S.* of Africa (*O. tragelaphus*), found on the high lands of Egypt and in Barbary. The leading fact in the geographical history of this genus is that it occurs both in the New and the Old World, whereas the goat tribe are naturally unknown in America. It is usually regarded by naturalists as being not only specifically, but generically, distinguished from the goat tribe; but some authorities, on the other hand, are inclined to believe that the generic separation is founded chiefly upon characters which have arisen from the influential power of man. In a state of nature, the *S.* is scarcely less active or energetic than the goat: its dimensions are greater, its muscular strength at least equal, both in force and duration. It is also an Alpine animal, and among its native fastnesses, bounds from rock to rock with almost inconceivable swiftness and agility. The main characteristics of the four unsubdued races of *S.* mentioned above are as

Fig. 2350. — ROCKY MOUNTAIN SHEEP,
(*Ovis montana*.)

follows:—The *Musmon* measures about three feet and a half in length, and its height, at the highest part of the back, is about two feet six inches. The neck is large, the body thick, muscular, and of a rounded form. The limbs are robust, and the hoofs short. The horns of the male are nearly two feet long. The body is protected by a short, fine, gray-colored wool, of which the filaments are spirally twisted, and by a stiffish silky hair, of no great length, yet sufficient to conceal the wool beneath. It is gregarious in a state of nature, and seldom descends from the highly-elevated portions of the mountains on which it dwells. The general opinion of naturalists is that it is from this species the domestic breeds have been obtained.—The *Bearded S.* of Africa has the hair on the lower part of the cheeks and upper jaws extremely long, so that it forms a double or divided beard. The hairs on the sides and body are short, those on the top of the neck somewhat longer, and rather erect. The whole under-parts of the neck and shoulders are covered by coarse hair, not less than fourteen inches long; and beneath the hair, on every part, there is a short genuine wool, the rudiments of a fleecy clothing. The tail is very short; the horns, which are about two feet long, approach each other at their base, and diverge outwards.—The *Argali*, or Wild sheep of Asia, measures about three feet in height at the shoulder, and five feet in length. His horns are nearly four feet long, and placed on the summit of the head, so as to cover the occiput. They nearly touch each other in front, bending backwards and laterally, and then forward and outward. The female is of smaller size, and her horns are nearly straight. The name of *Argali*, applied to this species, is the Mongol name of the female; the male is called *Guldschal*.—The *Ovis montana*, or Rocky Mountain sheep of America, is larger than the largest varieties of our domestic breeds. The horns of the male are of great dimensions, arising a short way above the eyes, and occupying almost the entire space between the ears, but without touching each other at their bases. The hair in this species resembles that of a deer, and is short, dry, and flexible in its autumn growth, but becomes coarse, dry, and brittle as the winter advances. There is no country where more attention has been paid to the improvement of the breeds of sheep, both foreign and domestic, or where more success has been attained, than Great Britain. The many varieties of sheep which tenant Great Britain and Ireland may be conveniently divided into two classes; the first consisting of sheep without horns, and the second of sheep with horns. Of the first class are, the *New Leicester sheep*, the characteristics of which are fineness and fulness of form, an early maturity and a propensity to fatten, a diminution in the proportion of offal, and the return of most money for the quantity of food consumed; the wool not so long as in some breeds, but considerably finer.—The *Cotswold sheep*, which have been long celebrated for the fineness of their wool, and which have been gradually improved by crossing with the Leicester sheep. Their mutton is fine-grained and full-sized.—The *Dartmoor sheep*, which have white faces and legs, some with and some without horns, small in the head and neck, and generally small-boned, carcass narrow and flat-sided.—The *Southdown sheep*, which takes its name from a tract of down extending more than sixty miles in length,

through parts of the counties of Sussex, Surrey, and Kent. The wool is short, close, and curled, and free from spiky projecting hairs. The flesh is finely grained and of good flavor.—The *Romney-Marsh sheep*, which have long but coarse wool, much internal fat, and much hardihood, and require no artificial food during the hardest winter but a little hay.—The *Cheviot sheep* are a peculiar breed, which are kept on the extensive range of the Cheviot hills. They have the face and legs generally white, and the body long; their wool is short, thick, and fine; they possess very considerable fattening qualities, and can endure much hardship both from starvation and cold.—Of the *Horned sheep*, the chief varieties are:—The *Dorset sheep*. They are a good folding sheep, and their mutton is well flavored, but their principal distinction and value is the forwardness of the ewes, who take the ram at a much earlier period of the year than any other species, and thus supply the market with lamb at the time when it fetches the highest price.—The *Shetland sheep* are small and handsome; hornless, hardy, feeding on even sea-weed, and with soft and cottony wool.—The *Hebridean sheep* is the smallest of its kind, even when fat weighing only twenty pounds.—The most important breed of sheep as regards the texture of the wool is the *Merino* (*O. hispanica*), in modern times brought to the greatest perfection in Spain, though their originals probably formed the flocks of the patriarchs thousands of years ago, and have been the stock of all the fine-wooled sheep. Unlike the British breeds, they have wool on the forehead and cheeks; the horns are very large and heavy, and convoluted laterally; the wool is fine, long, soft, twisted, in silky spiral ringlets, and naturally so oily that the fleece looks dingy and unclean from the dust and dirt adhering to the outside, but perfectly white underneath; the form is not so symmetrical as in many English breeds, and there is generally a loose skin hanging from the neck. They readily form cross breeds, called *demi-merinos*, which have been brought to great perfection in France, whence, as well as from Spain, they have been imported into America.—Of the other remarkable varieties of the genus *Ovis* in different parts of the world, we may mention the *Fat-tailed sheep*, common in Tartary, Arabia, Persia, and Egypt, the tail of which is so loaded with fat that it alone frequently weighs 20 pounds.—The *Many-horned sheep* of Iceland, and the most northern part of the Russian dominions, which has three, four, or five horns, sometimes placed with great regularity, and sometimes differing in proportion and situation.—The *Cretan sheep*, chiefly found in the island of Crete, but kept in many parts of Europe on account of the strangeness of the appearance of its horns, which are remarkably large, long, and spiral; those of the male being upright, and those of the female at right angles to the head.—The *Fat-rumped tailless sheep* met with in all the deserts of Tartary, and which have long legs, a somewhat arched visage, horns, in the male, like those of the domestic sheep, large pendent ears, and a tail so enveloped in fat as to be scarcely visible.—The *African*, or *Guinea sheep*, a native of all the tropical climates, both of Africa and the East. The distinguishing characteristics are—a rough, hairy skin, short horns, pendulous ears, a kind of dewlap under its chin, and a long unane, which reaches below the neck.—Different names are given to the sheep, according to its sex and age. The male is called a *ram* or *tuss*. After weaning, he is said to be a *hog*, *hogget*, or *hoggerel*, a *lamb-hog*, or *tuss-hog*, or *teg*; and if castrated, a *wether-hog*. After shearing, he is called a *shear-hog*, or *shearing*, or *dimmort*, or *tuss*. After the second shearing, he is a *two-shear ram*; and so on. The female is a *ewe* or *gimmer-lamb* till weaned, and then a *gimmer*, or *ewe-hog*, or *teg*. After being shorn, she is a *shearing-ewe* or *gimmer*, or *theave*, or *double-toothed ewe*; and after that a *two*, or *three*, or *four-shear ewe* or *theave*. The age of the sheep is reckoned, not from the period of their being dropped, but from the first shearing.

—Hence, a mawkish, silly fellow;—used by way of contempt.—Figuratively, the elect; God's people, considered as under a spiritual shepherd or pastor; as, "We are His people, and the sheep of His pasture."—*Psalms*.

Black sheep, a figurative term to denote a person who is, as it were, outlawed from society, by reason of his misdeeds or moral obliquities.

Sheep'-berry, *n.* (*Bot.*) See *SIBURNUM*.

Sheep'-cot, **Sheep'-fold**, *n.* A fold or pen for sheltering sheep.

Sheep'-hook, *n.* A shepherd's crook.

Sheep'-ish, *a.* Like a sheep;—hence, bashful; timorous or diffident to excess; over-modest; as, he is *sheepish* in ladies' society.

Sheep'-ishly, *adv.* In a sheepish manner.

Sheep'-ishness, *n.* Quality of being sheepish.

Sheep'-run, *n.* Same as *SHEEP-WALK*.

Sheep'-eye, (*-i*) *n.* A modest, shy, timorous look; a languishing oillade; a wishful glance, such as lovers cast at each other in public.

Sheep'-scott, in *Maine*, a river which rises in Waldo co., and flows into the Atlantic in Lincoln co., after a S. course of 60 m.—A post-village of Lincoln co., 5 m. N. of Wiscasset.

Sheep'-s'-foot, *n.*; *pl.* *SHEEP'S-FEET*. A printer's tool in the form of a hammer combined with a lever.

Sheep'-shank, *n.* (*Naut.*) See *KNOT*.

Sheep'-s'-head, *n.* (*Zoöl.*) See *SPARIDÆ*.

Sheep'-shear'er, *n.* One who strips or shears sheep.

Sheep'-shear'ing, *n.* The operation of clipping off the wool from the bodies of ewes and lambs; generally performed in the beginning of summer, when the animals are not likely to suffer from being deprived of their warm covering, and when there is sufficient time

for the wool to grow again before winter.—The time of shearing sheep; also, a festival held on the occasion.

Sheep'-skin, *n.* The skin of a sheep, or leather made from it.—A diploma;—so called from its being written on parchment usually made from the skin of a sheep. (Colloquial and vulgar.)—In England, a woolly cushion attached to the saddles carried by cavalry horses.

Sheep'-split, *n.* The skin of a sheep split by a cutting instrument into two sections.

Sheep'-walk, (*-wawk*) **Sheep'-run**, *n.* A place of pasturage for sheep.

Sheep'y, *a.* Belonging, or relating, to sheep; resembling sheep; sheepish.

Sheer, *a.* [*A. S. scyr.*] Pure or unmingled; clear; separate from anything foreign or extraneous; as, *sheer* argument.—Thin; clear; diaphanous; as, *sheer* cambric.—Simple; pure; unmixed; mere; being only what it appears to be; unrelieved; as, a *sheer* impossibility.—Vertical; perpendicular; straight up and down; as, a *sheer* precipice.

Sheer battens. (*Ship-building*.) Long battens by which the position of the wales or bends is marked on the timber preparatory to those planks being bolted on.—*Sheer plan*, in naval architecture, the longitudinal section of a ship, taken through the keel, at right angles to the horizon. It shows the position of every point in the vessel in regard to its distance fore and aft of the midship point, and to its height above the keel.

—*v. n.* To deviate or decline from the line of the proper course, as a ship when not steered with steadiness; to slip or move aside.

To *sheer off*, to turn or move aside to a distance; as, he *sheered off* when he saw a policeman approaching.

To *sheer up*, to turn and approach in a nearly parallel direction.

—*n.* (*Naut.*) The curve which the line of ports, or of the deck, presents to the eye when viewing the side of a ship. When these lines are straight, or the extremities do not rise, as is most usual, the ship is said to have a *straight* sheer.

Sheerness, a fortified seaport-town of England, co. of Kent, on the Isle of Sheppey, at the confluence of the Thames and Medway, 18½ m. W.N.W. of Canterbury, and 36 m. S.E. of London; pop. 12,015.

Sheers, *n. pl.* Shears.

(*Mach.*) An apparatus for raising heavy weights to a considerable height, as hoisting masts into a ship, or boilers into a steam-vessel. The easiest-formed sheers are made of two spars lashed together near the top, with a block suspended from the point of intersection. The resemblance borne by such spars to an open pair of scissors is said to have suggested the name. In permanent sheers, used in dockyards, the upper ends of the spars are cut off, the tops joined by an iron cap and bolts, the bases firmly set in masonry, and the apparatus is lowered or raised by chains working to the top of a massive mast, rising vertically from between the feet of the spars. In some instances a pair of sheers is placed on each side of the centre spar, the whole being built on a stone causeway, between two basins.

(*Ord.*) Two spars from 30 to 40 feet long, lashed together at one end. Their other extremities are placed in the ground, the lashed ends being raised by tackle, and fixed by guy ropes. To the lashed end is attached a tackle; and the whole arrangement is used for mounting and dismounting guns from towers, &c., in the same manner as a derrick.

Sheer'-strake, *n.* (*Ship-building*.) The strake under the gunwale in the top-side; it is generally worked thicker than the rest of the top-sides, and scarfed between the drifts.

Sheet, *n.* [*A. S. sceat*, a covering.] Something extended or spread out, as a covering; anything expanded;—specifically, a broad and large piece of linen or cotton cloth spread over a bed; a broad piece of cloth used as a part of bed-furniture next to the body.—A broad piece of paper as it comes from the manufacturers, or folded into pages.

—*pl.* Hence, a book or pamphlet; as, a collection of printed sheets.

—A broad surface or expanse of liquid, &c.; as, a *sheet* of water.—A broad, thinly spread-out portion of metal or other substance; as, a *sheet* of copper, a *sheet* of glass, &c.

In *sheets*, spread flat or expanded; not folded, or if folded, not bound; as, printed matter in *sheets*.

(*Naut.*) The rope attached to the after or leeward clew or corner of a sail, to extend it to the wind. In the square sails above the courses, the ropes attached to both clews are called *sheets*; in all other cases the weathermost one is termed a *tack*.

(*NOTE.* *Sheet* is frequently employed in composition to indicate that the substance to the name of which it serves as a prefix is in the form of sheets, thin leaves, or laminæ; as, *sheet-iron*, *sheet-lead*, &c.)

—*v. a.* To furnish with sheets; as, to *sheet* a bed. (*r.*)—To cover, as with a sheet; to cover or overlay with something broad and thin; as, the ground is *sheeted* with snow.—To fold or swathe in a sheet; as, a *sheeted* corpse.—To draw out or expand like a sheet.

To *sheet home*. (*Naut.*) To extend a sail till the clew is close to the sheet-block; as, topsails *sheeted home*.

Sheet'-anchor, *n.* (*Naut.*) The largest anchor belonging to a ship, on which, in cases of extremity, the vessel's safety depends;—hence, metaphorically, the mainstay or chief support; the last refuge for safety; as, rectitude is the mind's *sheet-anchor*.

Sheet'-cable, *n.* (*Naut.*) The cable which belongs to the sheet-anchor, being the strongest and best cable on shipboard.

Sheet'-ful, *n.* As much as a sheet will hold.

Sheet'-ing, *n.* Linen or cotton cloth for sheets.

Percy Bysshe Shelley

1792-1822

Sheet-lightning, *n.* Lightning thrown out or appearing in widely expanded flashes, in distinction from *fork-lightning*, which flashes in a zigzag manner.

Sheet-ling, *n.* A small sheet. (*R.*)

Sheet-pile, *n.* A pile of thick plank or scantling, shot or jointed on the edges, jammed between the main piles of a coffer-dam or other hydraulic substructure.

Sheffield, a large manufacturing town of the W. Riding of Yorkshire, Eng. on an eminence at the confluence of the rivers Sheaf and Don, both of which are here crossed by several bridges, 6 miles from Rotherham. The houses are well built, and many of them elegant; but the smoke of the numerous manufactories tends to give the town a sombre appearance. *Manuf.* Cutlery of all kinds, iron and steel goods, plates, wares, metallic instruments, printing types, and filed. Here coal is abundant, and some iron is raised in the vicinity. *Pop.* (1897) 355,460.

Sheffield, in Georgia, a village of Newton co., 65 m. N. W. of Milledgeville.

Sheffield, in Illinois, a post-village of Bureau co., 38 m. W. of La Salle. It has valuable coal mines. — A village of Greene co.

Sheffield, in Indiana, a vill. of Lake co., on three railroads, 16 m. S.S.E. of Chicago. — A twp. of Tippecanoe co.

Sheffield, in Iowa, a post-village of Franklin co., on the Cent. R.R. — A v. of Story co., 14 m. N.N.W. of Nevada.

Sheffield, in Massachusetts, a post-village and township of Berkshire co., 120 m. S.W. of Boston.

Sheffield, in Missouri, a village of Cape Girardeau co., 16 m. N. E. of Jackson.

Sheffield, in Ohio, a township of Ashland co. — A post-township of Lorain co. — A village of Meigs co., on the Ohio, 2 m. W. of Pomeroy.

Sheffield, in Pennsylvania, a post-township of Warren co., 79 m. S.E. of Erie.

Sheffield, in Vermont, a post-township of Caledonia co., 37 m. N.E. of Montpelier.

Shefford, in prov. of Quebec, a S.W. central co.; area, 745 sq. m. Drained by the Yama-ka river. *Cap.* Waterloo. *Pop.* (1897) 24,180.

Shehr, (*shair*), a seaport-town of the S.E. of Arabia, 32 m. E.N.E. of Makallah: Lat. 14° 43' N., Lon. 49° 40' E. *Manuf.* Cotton cloth, gunpowder, arms, &c. *Pop.* 6,000.

Sheik, Sheikh, Sheikh, (*shāh*), *n.* [Ar. *sheikh*, elder, or eldest.] A title of dignity properly belonging to the chiefs of Arab tribes. The heads of monasteries are also, in some instances, termed *sheiks* among the Mohammedans. It is also the title of the higher order of religious persons who preach in the mosques. The mufti at Constantinople bears the title of *Sheikh-ul-Islam*.

Sheil, RICHARD LALOR, one of the greatest orators that Ireland has produced. B. at Drumdowney near Waterford, 1794. Second to O'Connell alone, S. often surpassed even the "Agitator" himself in his powers of captivation, from the beauty of his language and the grace of his imagination. As an author, S. was also eminently distinguished. He wrote some successful tragedies: one of them, *Eradne*, still retains possession of the stage. When the Emancipation Act passed, S. was elected member for Milbourne Port, and, in spite of his shrill voice and vehement gesticulation, his fervid eloquence placed him at once in the foremost rank of the most attractive speakers in the House. When O'Connell's energies declined, many in Ireland looked upon S. as his successor: but the orator had too closely allied himself with the Whig party, and for some years was heard in the House but on rare occasions. Besides being a Queen's counsel and a privy-councillor, S. was successively a commissioner of Greenwich Hospital, Vice-President of the Board of Trade, Judge-Advocate-General, and Master of the Mint. His last appointment was that of minister-plenipotentiary at Florence, where he d. 1851.

Shekel, *n.* [Heb.; Lat. *siclas*; Fr. *sicle*.] A Jewish weight equivalent to half an ounce avoirdupois. — Also, a Jewish coin of the value of 62 cents. There were, however, several standards of the S., and many opinions are entertained respecting its real value.

Sheki'nah, Shechi'nah, *n.* (*Jewish Hist.*) The name given by the Jews to the Divine Presence which rested in the form of a cloud over the mercy-seat, or between the cherubim of the ark. The rabbins affirm that it descended on the day of the consecration of the ark by Moses in the wilderness, and afterwards passed into the sanctuary of Solomon's temple on the day of its dedication, continuing there until the destruction of Jerusalem and the temple by the Chaldeans, and not afterwards seen.

Shelbi'na, in Missouri, a post-town of Shelby co., 47 m. W. of Hannibal.

Shelburne, a seaport-town and port of entry of Nova Scotia, cap. of a co. of the same name, on the Atlantic, 112 m. S.W. of Halifax. The harbor is the best in Nova Scotia, and has at its entrance a light-house on Rosneath Island, with two lights 125 ft. above the sea. *Pop.* 4,000.

Shelburne, in Massachusetts, a post-township of Franklin co., 95 m. N.W. of Boston.

Shelburne, in New Hampshire, a post-village and township of Coos co., 91 m. N.E. of Concord. The twp. is bounded on the west by Lake Champlain.

Shelburne, in Vermont, a post-village of Chittenden co.

Shelburne Falls, in Massachusetts, a thriving post-village of Franklin county, 90 miles west north-west of Boston.

Shelby, in Alabama, a N. central co.; area, 772 sq. m. *Rivers*, Cahawba and Coosa. *Surface*, diversified; *soil*, fertile. *Min.* Stone-coal and iron. The co. is intersected by several railroads. *Cap.* Columbiana. *Pop.* (1897) 21,965.

Shelby, in Illinois, a S. E. central co.; area, 776 sq. m. *Rivers*, Kaskaskia, Little Wabash, and the S. Fork of

Sangamon river. *Surface*, undulating; *soil*, fertile. *Cap.* Shelbyville. *Pop.* (1897) 33,240.

— A village of Edwards county.

Shelby, in Indiana, a S. E. central co.; area, 400 sq. m. *Rivers*, Blue river, and Sugar creek. *Surface*, level, with large forests of oak, ash, walnut, &c.; *soil*, fertile. The county is intersected by several railroads. *Cap.* Shelbyville. *Pop.* (1897) 26,260.

— A township of Jefferson county.

— A township of Ripley county.

— A township of Tippecanoe county.

Shelby, in Iowa, a W. co.; area, 576 sq. m. *Rivers*, The W. Fork of Nishnabotona river, and Key creek. *Surface*, undulating; *soil*, fertile. *Cap.* Harlan. *Pop.* (1897) 18,980.

Shelby, in Kentucky, a N. co.; area, 405 sq. m. It is drained by Beech, Brashears, Bear, Fox, and Six-Mile creeks. *Surface*, undulating; *soil*, very fertile. *Products*, Corn and wheat. *Cap.* Shelbyville. *Pop.* (1897) 17,950.

Shelby, in Michigan, a village and township of Macomb co., 22 m. N. of Detroit.

Shelby, in Minnesota, a township of Blue Earth co.

Shelby, in Missouri, an E. N. E. central co.; area, 514 sq. m. *Rivers*, South Fabius, Salt, and North rivers. *Surface*, undulating; *soil*, generally fertile. *Min.* Stone-coal. *Cap.* Shelbyville. *Pop.* (1897) 16,450.

Shelby, in New York, a post-village and township of Orleans co., 16 m. E. of Lockport.

Shelby, in North Carolina, a post-village, cap. of Cleveland co., 190 m. S. W. Raleigh. Large shipments of cotton are made from here.

Shelby, in Ohio, a W. co.; area, 420 sq. m. *Rivers*, Miami, and Loraines creek. *Surface*, undulating, with flat table-land in the N.; *soil*, fertile. *Cap.* Sidney. *Pop.* (1897) 27,405.

— A post-village of Richland co., 68 m. N. E. of Columbus.

Shelby, in Tennessee, a S. W. county, bordering on Mississippi; area, 728 sq. m. *Rivers*, Mississippi on the W., Wolf, and Loosahatchy, and Nanconiah creek. *Surface*, level; *soil*, fertile. *Products*, Cotton and corn. *Cap.* Memphis. *Pop.* (1897) 30,250.

— A village of the above co., 19 m. E. N. E. of Memphis, on the L. & M. R.R.

Shelby, in Texas, an E. co., bordering on Louisiana; area, 800 sq. m. *Rivers*, Sabine and Attoyac. *Surface*, level; *soil*, fertile. *Cap.* Center. *Pop.* (1897) 15,865.

Shelby's Basin, in New York, a post-village of Orleans co., 15 m. E. of Lockport.

Shelbyville, in Illinois, a city, cap. of Shelby co., 60 m. S. E. of Springfield. *Pop.* (1897) 3,425.

Shelbyville, in Indiana, a city, cap. of Shelby co., 26 m. S. E. of Indianapolis. *Pop.* (1897) 6,120.

Shelbyville, in Kentucky, a post-village, cap. of Shelby co., 30 m. E. of Louisville.

Shelbyville, in Minnesota, a village of Blue Earth co., 28 m. S. S. W. of Mankato.

Shelbyville, in Missouri, a post-town, cap. of Shelby co., 90 m. N. N. E. of Jefferson City.

Shelbyville, in Tennessee, a post-town, cap. of Bedford co., 59 m. S. S. E. of Nashville.

Shelbyville, in Texas, a post-village, former cap. of Shelby co., 325 m. E. N. E. of Austin city.

Sheldon, in California, a village of Sacramento co., 16 m. S. E. of Sacramento.

Sheldon, in Illinois, a post-village of Iroquois co., 109 m. E. of Peoria.

Sheldon, in Minnesota, a post-township of Houston co., 12 m. W. of Brownsville.

Sheldon, in Missouri, a post-village of Vernon co.

Sheldon, in New York, a post-village and township of Wyoming co., 15 m. W. of Warsaw.

Sheldon, in Vermont, a post-village and township of Franklin co., 54 m. N. W. of Montpelier.

Sheldon, in Wisconsin, a township of Monroe co., 34 m. E. of La Crosse.

Sheldrake, SHIELDRAKE, or BERGANDER, *n.* (*Zoöl.*) The common name of the genus *Tadorna*, sub-family *Anatina*, the type of which is *T. vulpanser*, the common S. (Fig. 2351). The head and neck of the male is

of a dark green; lower part of the neck, coverts of the wings, the back, sides, rump, and base of the tail, pure white; the scapulars, abdomen, quills, a large band across the belly, and tips of the tail-feathers, deep black. A large bay-colored gorget adorns the breast, and the wing is ornamented with a spot of purple-green. The bill, and the fleshy knob at its base, deep red. Feet, flesh color. Sheldrakes are very abundant in Holland and on the coasts of France. They may be domesticated, and are handsome ornaments in poultry-yards; but their flesh is rank and bad. — In this country the name S. is commonly given to the Red-breasted Merganser, *Mergus serrator*, which resembles the European S. only in the color of its breast.

Shelduck, *n.* The female of the SHELDRAKE, *q. v.*

Shelf, *n.*; *pl.* SHELVES, (*shelvz*). [A.S. *scylfe*.] A board, or platform of boards or planks, elevated above the floor of an apartment, and fixed or set horizontally on a frame, or contiguous to a wall, for holding vessels, utensils, books, and the like. — A flat projecting layer of rock. — A sandbank in the sea, or a rock or ledge of rocks.

Shelfy, *a.* Full of shelves; abounding with sandbanks or rocks.

Shell, *n.* [A.S. *scel*, *scyll*; Ger. *schale*, from the antiquated *schalen*, to cover.] A hard external covering; particularly, that serving as the natural protection of certain fruits and animals; as, (1.) The exterior coat of a nut; (2.) The integument or outer layer of an egg; (3.) The hard, calcareous substance which covers a testaceous animal. (See below, *q. Zoöl.*) — Any framework or skeleton of a structure, considered as not filled in, or unfinished; as, the *shell* of a house, or ship. — Hence, by analogy, outer or superficial show without intrinsic substance; as, "this outward *shell* of religion." (*Ayliffe*.) — A rude kind of coffin. — A musical instrument resembling the lyre, supposed to have been originally formed by stringing the shell of a tortoise; — used only in poetry.

"The soul of music slumbers in the shell." — *Rogers*.

— An engraved copper roller employed in print-works.

(*Zoöl.*) The hard calcareous substance which either protects the testaceous mollusca externally, or supports certain species of them internally. It has been truly said, that he who would know the nature of shells, must know first the nature of the animals of which shells form a part; and to this end we at once refer the reader to the article MOLLUSCA. Although shells, properly so called, which form the habitation of testaceous animals are sometimes confounded with the shelly coverings which protect the crustacea (crabs and their numerous allies), a very obvious and striking difference exists between them, as well as between the kinds of animals which respectively inhabit them. The shells of testacea are composed of carbonate of lime, combined with a small portion of gelatinous matter; they are, in general, permanent coverings for their inhabitants; and the animal is of a soft substance, without bones of any kind, and attached to its domicile by a certain adhesive property. On the other hand, those animals which are defended by a crustaceous covering cast their shells, and renew them annually; while the animals themselves are of a fibrous texture, with articulated limbs, and protected, as it were, by a coat of mail. Shells are divided into *Multivalves*, *Bivalves*, and *Univalves*. The first order, *Multivalve*, is made up of shells consisting of more shelly parts or pieces than two. Every part of a shell which is connected with a corresponding part by a cartilage, ligament, hinge, or tooth, is called a *valve* of such shell. — The second order, *Bivalve*, is made up of shells having two parts or valves, generally connected by cartilage or hinge; as in the cockle and mussel. — The third order, *Univalve*, is made up of shells complete in one piece — as in the periwinkle and the whelk — and they are subdivided into shells with a regular spire, and those without a spire. The shells composing this order are far more numerous than those of the two preceding, both in genera and species. The spire is a prominent feature of the Univalve; and upon its being lengthened or elevated, shortened or depressed, &c., depends much of the generic and specific definition. Shells increase in size by the disposition of new layers internally upon those already formed. Each new layer extends more or less beyond the margin of the layer to which it is applied, so that as the animal becomes older its shell becomes larger and thicker. The outer surface is generally covered by a thin layer of membranous or horny matter, named the *epidermis*, and the inner surface is often covered with a layer of a pearly nature. — It is universally found that the marine shells of warm climates exceed all others in beauty of coloring, and in taking a fine polish. Several of the land shells, also, that are met with in tropical countries are remarkable for their bright colors and elegant forms. River and land shells, with very few exceptions, are thinner than those of the sea.

(*Mil.*) A hollow vessel of metal containing gunpowder, or other explosive compound, so arranged that it shall explode at a certain point, and spread destruction around by the forcible dispersion of its fragments. The invention of this murderous missile cannot be accurately traced. Shells were employed in 1480 A. D. by the Sultan of Gujerat, and by the Turks at the siege of Rhodes, in 1522. The Spaniards and Dutch both used them during the war of Dutch independence; and they appear to have been generally adopted by about 1634. Formerly, every shell was a hollow sphere of cast-iron, varying in thickness from half an inch to two inches, and in diameter from five and a half inches to thirteen inches. The sphere had a fuse-hole (like a bung-hole) an inch across, through which the charge was inserted, consisting of pieces of metal and powder to burst the shell. The hole was plugged by a fuse, which was a tube of slow-burning powder, timed to communicate fire to the charge after the lapse of a certain number of seconds. This fuse might either be kindled by hand the moment before the mortar was fired, or its ignition might be effected by the act of firing itself. Since the introduction of rifled ordnance, the shell has become the commonest form of projectile. It has ceased to be spherical, and is usually of cylindrical form and pointed at the end. Having a polar movement, so that the conical end always strikes first, they are adapted for percussion priming, which placed in this end explodes as the projectile reaches the object against which it is thrown.

pl. The husks of the cacao-seeds, a preparation of which is often used as a substitute for cocoa, chocolate, &c.

Shell-bit, a gouge-like tool working with a brace in the boring of wood. — **Shell-boat**, a boat built with a flimsy framework, deck, &c. — **Shell-gun**. (*Ord.*) A gun made for projecting shells, bombs, &c.; a mortar. — **Shell of a boiler**. (*Mach.*) The plating; also, the barrel

Fig. 2351. — SHELDRAKE, (*Tadorna vulpanser*.)

Shell, *v. a.* To strip or break off the shell of, or to take out of the shell; as, to *shell* almonds.—To detach from the ear; as, to *shell* corn.—To bombard; to hurl shells upon; as, to *shell* a fort or city.—To *shell out*, to pay or give money freely. (Colloq.)

—*v. n.* To fall off, as a shell, crust, or external coat or covering; as, a scab *shells off*.—To cast the shell or outer covering; as, acorns *shell* in falling.—To be detached or separated from the husk; as, wheat *shells* in harvesting.

Shell-lac, *Shell-lac*, *n.* See LAC.

Shell-bark, *n.* (Bot.) See HICKORY.

Shell-button, *n.* A button made of a shell, especially of a mother-of-pearl shell.—A hollow button made of two pieces of metal fused together, and sometimes coated with silk, &c.

Shelley, PERCY BYSSHE, an English poet, b. in Sussex, 1792. He received his rudimentary education at Eton, from which college, in consequence of his eccentric habits, he was removed before the usual time, and sent to Oxford, from whence, for his irregularities and open declaration of atheistical opinions, he was expelled. This conduct, joined with a very imprudent marriage contracted with the daughter of a coffee-house keeper, greatly estranged him from his family. After the birth of two children, Shelley separated from his wife, who soon after his desertion committed suicide. Before the scandal this affair created had subsided, Shelley married Miss Godwin, the daughter of Mary Wolstonecroft and William Godwin, author of *Caleb Williams*. By an order of the Lord-Chancellor he was deprived of the guardianship of his children, in consequence of his atheistical and, as it was alleged, immoral opinions, upon which Shelley and his wife set out for Italy, where he renewed his acquaintance with Lord Byron and Leigh Hunt. While residing in the kingdom of Sardinia, on the 8th of July, 1822, he, while returning home in a boat across the Gulf of Spezzia, was overtaken by a violent storm, the boat capsized, and Shelley unfortunately drowned. Fifteen days afterwards, agreeably to an often-expressed wish, his body was burnt on the seashore, and the ashes buried in an urn near the remains of his friend Keats, at Rome. In force and splendor of imagination, *S.* is perhaps unrivalled; and few poets equal him in wealth and felicity of diction. He is no realist; he does not stand firmly on the ground and deal with men and women as Shakspeare does; but, while denouncing the evils and wrongs, corruptions and miseries of the world, dreams splendid dreams of truth, and good, and beauty, and bliss, and creates scenes of Utopian peace and loveliness. His principal poems are, — *Queen Mab*, *The Revolt of Islam*, *Prometheus Unbound*, and *The Cenci*. His wife, b. 1798, d. 1851, wrote at the age of 18 her wild and extraordinary tale of *Frankenstein*, which gained immense popularity. She was also author of several novels, written after her husband's death.

Shell-fish, *n.* A term applied, chiefly in commerce, to aquatic animals invested with a hard covering, either testaceous, as oysters, or crustaceous, as lobsters.

Shell-flower, *n.* (Bot.) See MOLUCCELLA.

Shell-ing, *n.* The commercial term for groats.

Shell-jacket, *n.* (Mil.) An undress military jacket.

Shell-lime, *n.* Lime made by calcining shells.

Shell-marl, *n.* A deposit of clay and other substances, mixed with shells, which collects at the bottom of lakes.

Shell-meat, *n.* Food supplied by shell-fish or testaceous molluscs.

Shell River, in Wisconsin, enters the St. Croix River from St. Croix co.

Shell Rock, in Iowa, a post-village and township of Butler co.

Shell Rock, in Minnesota, a post-village and township of Freeborn county, 7 miles S. E. of Albert Lea.

Shell Rock Creek, in Iowa, joins Lime creek in Floyd co., and with it forms English river.

Shell-town, in New Jersey, a village of Monmouth co., 10 m. S. E. of Trenton.

Shelly, *a.* Abounding with shells; as, a *shelly* beach.—Comprising or consisting of shells, or of a single shell; as, a *shelly* grotto.

Sheloe'ta, in Pennsylvania, a post-village of Indiana co., 165 m. N.W. of Harrisburg.

Shelter, *v. a.* [A. S. *scyldan*, *gescyldan*.] To cover or shield from violence, injury, annoyance, or attack; to defend; to protect from danger; to secure or render safe; to harbor; as, to *shelter* a fugitive.—To cover from notice; to disguise for protection; as, to *shelter* love under the mask of friendship.—To betake to cover, or a safe place;—employed reflexively; as, to *shelter* one's self under a doorway from the rain.

—*v. n.* To take shelter: to avail one's self of shelter.

—*n.* That which covers or defends from injury or annoyance; an asylum; a refuge; a retreat; a covert; a harbor.—Hence, inferentially, one who shields or protects from danger; a guardian.—State of being covered and protected; protection; defence; security; as, the house receives *shelter* from the hill above it.

Shelter Island, in New York, a post-township of Suffolk co., 100 m. E. of New York.

Shelterless, *a.* Without shelter, safeguard, or protection.

Sheltie, *Sheltie*, *n.* [From *Shetland*.] One of a breed of small, shaggy ponies, originally from the Shetland Islands, Scotland.

Shel-ton, in Indiana, a former township of Warrick county.

Shelton, in South Carolina, a post-village of Fairfield county, 66 m. N.N.W. of Columbia.

Shel-tonville, in Georgia, a post-village of Miltou co.

Shelve, *v. a.* (imp. and pp. *SHELVED*,) (*shelvd*.) [From *shelf*.] To place on a shelf, or on shelves;—hence, analogically, to cast or put aside, as being no longer wanted; as, to *shelve* an argument, to *shelve* a dupe.—To furnish with shelves; as, to *shelve* a closet or pantry.

—*v. n.* To incline; to be aslope, as shelves or shallows in the sea; as, a *shelving* bank.

Shelving, *n.* Act of laying on a shelf, or shelves.—Operation of fixing up a shelf, or shelves.—Materials for shelves, in a collective sense.

Shelvy, *a.* Full of rocks, shoals, or sand-banks; shallow; as, a *shelvy* coast.

Shem'ite, *n.* A descendant of Shem.

Shem'ite, *Shem'itish*, *a.* Same as SEMITIC, *q. v.*

Shem'itism, *n.* The system or idiosyncratic form or constitution of the Semitic or Shemitic languages.

Shem, (*Script.*) One of the three sons, and according to many commentators the elder son, of Noah (*Gen. v. 32*), from whom descended the nations enumerated in *Gen. x. 22, sq.*, and who was the progenitor of that great branch of the Noachian family, called from him *Shemitic*, or *Semitic*, *q. v.*, to which the Hebrews belong.

Shenandoah, in Virginia, a river formed by the junction of the N. and S. Forks at Front Royal, in Warren co., the latter, or Shenandoah Proper, rising by three branches, called N., S., and Middle rivers, in Augusta and Rockingham cos., and falls into the Potomac at Harper's Ferry, after a N.E. course of 170 m. It is navigated by small boats, called *gondolas*, for more than 100 m. above Fort Royal.—A N. co., bordering on W. Virginia; area, 500 sq. m. It is drained by the N. Fork of the Shenandoah. Surface, diversified; soil, generally fertile. Min. Iron, lead, copper, lime, and sandstone. Cap. Woodstock.

Shenandoah, in New York, a village of Dutchess co., 12 m. S.E. of Poughkeepsie.

Shenan'go, in Pennsylvania, a township of Lawrence co.—A township of Monroe co.—A vill. of Mercer co., 8 m. N.W. of Mercer.

Shenango Creek, in Pennsylvania, rises in Crawford co., and flows S., uniting with Mahoning Creek in Lawrence co. to form the Beaver River.

Shen'vas Creek, in New York, enters the E. branch of the Susquehanna River from Otsego co.

Shen'dy, a town of Africa, in Lower Nubia, on the Nile, 100 m. below Khartoum. The finest seuna is obtained in its territory. Pop. 10,000.

She'ol, *n.* [Heb.] Hades; the Inferno; the limbo of departed spirits.

Shen-se', a prov. of China, between Lat. 32° and 40° N., Lon. 106° and 111° E. The surface is mountainous, but in parts fertile. Prod. Wheat, millet, rhubarb, and other drugs, timber, &c. Min. Iron, copper, gold, and jasper. Manuf. Agricultural and military implements. Cap. Se-gan-foo. Pop. 15,000,000.

Shepan'g River, in Connecticut, rises in Litchfield co., and enters the Housatonic in New Haven co.

Shepherd, (*shepherd*,) *n.* [A. S. *sceapheorde*.] One who tends or keeps sheep; a man employed in tending, feeding, and guarding sheep in the pasture.—A bucolic swain; a country lover.—The pastor of a parish, church, or congregation;—used figuratively, in the sense of the members being considered as a flock.

Shepherd's crook, a long staff with the upper end curved hook-wise, used by shepherds.

—*v. a.* To tend, guard, herd, or drive, as a shepherd. (R.)

Shepherdess, *n.* A woman who tends sheep;—hence, a country lass.

Shepherdism, (*-izm*,) *n.* Pastoral life; bucolic occupation.

Shepherdling, *n.* A little shepherd.

Shepherdly, *a.* Rustic; pastoral.

Shepherd's Dog, *n.* (Zool.) See CANIS.

Shepherd's-ponch, **Shepherd's-purse**, *n.* (Bot.) See CAPSELLA.

Shepherd's-rod, **Shepherd's-staff**, *n.* (Bot.) The Teasel. See DIPSAKACEÆ.

Shepherdstown, in Ohio, a post-village of Belmont co., 7 m. N.W. of St. Clairsville.

Shepherdstown, in Pennsylvania, a post-village of Cumberland co., 8 m. S.W. of Harrisburg.

Shepherdstown, in West Virginia, a post-town, the former cap. of Jefferson co., on the Potomac, 12 m. N. of Harper's Ferry.

Shepherdsville, in Kentucky, a post-town, cap. of Bullitt co., 18 m. S. of Louisville.

Shep'ody, in New Brunswick, a seaport of Albert co., on Shepody Bay, 90 m. N.E. of St. John; Lat. 45° 40' N., Lon. 64° 30' W.

Shepardtown, in Alabama, a village of Tuscaloosa co., on the Black Warrior River, S.W. of Tuscaloosa.

Shep'ey, an island of England, co. of Kent, at the mouth of the Thames and Medway; ext. 11 m. long and 8 broad. Chief town. Sheerness.

Sherbet, *n.* [Ar. *sharbut*, *shurbet*, syrup, from *shereb*, to drink; Hind. *shoorb*, drink.] A favorite beverage in Eastern countries, bearing some resemblance to our lemonade, being made of water, lemon-juice, and sugar, with the addition of orange- or rose-water, to give it a delicious perfume.

Sherborn, in Massachusetts, a post-village and township of Middlesex co., 22 m. W.S.W. of Boston.

Sherborne, a town and parish of England, co. of Dorset, on the Ivel, 16½ m. N. of Dorchester, and 110 W.S.W. of London. Manufactures. Buttons and silk twist.

Sherboro, an island off the coast of Guinea, in W. Africa, opposite the mouth of a river of the same name, 40 m. S.S.E. of Sierra Leone; Lat. 7° 30' N., Lon. 12° 40' W.; ext. 30 m. long and 10 broad. Prod. rice and fruit.

Sherbrooke, in prov. of Quebec, an E. co.; area, 375 sq. m.—A town, cap. of the above co., 95 m. E. of Montreal.

Sherbrooke, in Nova Scotia, a town of the co. of Guysborough, on the estuary of the St. Mary's River, 12 m. from the Atlantic.

Sherburne, in Minnesota, an E. central co.; area, 424 sq. m. Rivers. Mississippi and Elk. Soil, fertile. Products, chiefly wheat, corn, and hay. Cap. Elk River. Pop. (1895) 7,137.

Sherburne, in New York, a post-village and township of Chenango co., 43 m. S.S.W. of Utica.

Sherburne, in Vermont, a post-township of Rutland co., 46 m. S.W. of Montpelier.

Sherburne Mills, in Kentucky, a post-village of Fleming co., 10 m. S.W. of Flemingsburg.

Sherd', *n.* A fragment. See SHARD.

Sher'eef, **Sher'if**, *n.* Same as SHERIF, *q. v.*

Sher'idan, PHILIP HENRY, an American general, b. in Somerset, Perry co., Ohio, 1831. After being educated at West Point, he was admitted into the Military Academy in 1848, where he graduated in 1853. Entering the U. S. artillery, he served in Texas and Oregon till 1855, when he sailed for San Francisco, in command of an escort to the expedition for surveying the proposed branch of the Pacific Railway between San Francisco and the Columbia River. This work done, he continued in command of a body of troops among the Indian tribes until 1861, when he was promoted to the rank of captain. On the breaking out of the Civil War, he was appointed quartermaster of the army in course of organization in S.W. Missouri; in 1862, became chief quartermaster of the Western Department, and colonel of the 2d Michigan Volunteer Cavalry, in which capacity he cut the railroads S. of Corinth. He defeated two separate forces of cavalry at Baldwin and Guntown in June, 1862, and gained fresh laurels at Boonesville in July, for which he was promoted to the rank of brigadier-general of volunteers, and took the command of the third division of the Army of Ohio, distinguishing himself by the defence of Louisville, and in the engagement on the banks of Stone River, December 30, for which he was

Fig. 2352. — GEN. SHERIDAN.

promoted to major-general of volunteers. He was engaged at Chickamauga, September 19 and 20, 1863, where he had his horse killed under him; was appointed, in April, 1864, to the command of the cavalry corps of the Army of the Potomac, defeated the Southern forces at Meadow Bridge, on the Chickahominy, in May, set out in June on a cavalry expedition into the heart of the rebel country, where he repulsed his opponents, and defeated Gen. Early in several engagements in the Shenandoah Valley. He was appointed to the chief command of the cavalry, which branch of the Federal forces, under his able and energetic direction, acquired an efficiency and gained a reputation such as it had never borne before. *S.* was appointed brigadier-general of the U. S. army Sept. 20, 1864, and major-general Nov. 8 of the same year. On Feb. 9, 1865, the thanks of Congress were tendered to him for "the gallantry, military skill, and courage displayed in the brilliant series of victories achieved by his army in the Valley of the Shenandoah, especially at Cedar Run." After the capture of Staunton, he pressed on to Columbia, laying waste the country in every direction; gained the battle of the Five Forks, April 1, 1865; assisted in compelling the Southern forces to evacuate Petersburg and Richmond, and encountered Gen. Lee near Appomattox Court House, who surrendered April 9. Gen. *S.* was in command of the military division of the S.W. from June 3 to July 17, 1865; of the military division of the Gulf, July 17, 1865, to Aug. 15, 1866; of the Department of the Gulf, Aug. 15, 1866, to March 11, 1867; and of the Fifth Military District of Louisiana and Texas, March 11 to Sept. 5, 1867; and of the dept. of the Missouri, Sept. 12, 1867. On March 4, 1869, he was appointed lieutenant-general, and Nov. 1, 1883, suc. Sherman in command of the army. Congress revived the grade of Gen. to which he was appointed June 1, 1888. D. Aug. 5, 1888.

Sher'idan, RICHARD BRINSLEY, an English dramatist and statesman, b. at Dublin, 1751, was the son of Thomas *S.*, author of a *Dictionary of the English Language*. His first dramatic attempt was *The Rivals*, which was acted at Covent Garden in 1775, with moderate success; but the *Duenna*, a musical entertainment, which followed, was received with general admiration; and his *School for Scandal* gained him the highest reputation as a comic writer. On the retirement of Garrick from Drury Lane Theatre, *S.* purchased a share in that

Philip Henry Sheridan

William Tecumseh Sherman

1820-1883

property, which qualified him for a seat in Parliament; and, in 1780, he was chosen member for the borough of Stafford. He attained great celebrity as an orator, especially during the progress of the impeachment of Warren Hastings. The political changes consequent on the death of Pitt, in 1806, occasioned the rise of the party with which *S.* was connected, and he obtained the lucrative post of Treasurer of the Navy, and the rank of a privy-councillor. This administration being weakened by the loss of Mr. Fox, who survived his rival only a few months, new alterations took place, and *S.* was deprived of office, to which he never returned. At the general election in 1806, he obtained a seat for Westminster, the great object of his ambition; but he was afterwards nominated for the borough of Ilchester, which he continued to represent during the remainder of his parliamentary career. The latter part of his life was embittered by misfortunes, principally arising from his own improvidence. His profuse habits involved him deeply in debt; his loss of a seat in Parliament deprived him of protection from arrest; intemperance had undermined his constitution, and mental anxiety completed the destruction of his health. D. 1816. Besides the pieces already noticed, he was the author of a part of *A Translation of Aristænetus*; the farce of *The Critic*, and poems. *S.* was twice married, first to Miss Linley, a celebrated singer; and the second time to Miss Ogle, daughter of the Dean of Winchester.

Sher'idan, in *Michigan*, a township of Calhoun county.

Sheridan, in *New York*, a post-township of Chautauqua co., 10 m. N.E. of Dunkirk.

Sheriff, *n.* [A. S. *scire-gerefa*—*scire*, a shire, and *gerefa*, a reeve, a warden.] An officer having jurisdiction over a shire or county, to whom is intrusted the execution and administration of the law. In England *S.* are appointed by the crown, but in this country the usual practice is for the people of the several counties to elect *S.* at regular intervals, generally of three years, and they hold subject to the right of the governor to remove them at any time for good cause, in the manner pointed out by law. Before entering upon the discharge of their duties, they are required to give bonds to the people of the State, conditioned for the faithful performance of their duties, without fraud, deceit, or oppression. It is the *S.*'s duty to preserve the peace within his county. To this end he is the first man within the county, and may apprehend and commit to prison all persons who break, or attempt to break the peace, or may bind them over in a recognizance to keep the peace. He is bound, *ex-officio*, to pursue and take all traitors, murderers, felons, and rioters; has the safe-keeping of the county jail, and must defend it against all rioters; and for this, as well as for any other purpose in the execution of his duties, he may command the inhabitants of the county to assist him, which is called the *posse comitatus*. And this summons every person over fifteen years of age is bound to obey, under pain of fine and imprisonment. In his ministerial capacity he is bound to execute, within his county, any process that issues from the courts of justice, except where he is a party to the proceeding, in which case the coroner acts in his stead. He has no power or authority out of his own county, except when he is commanded by a writ of *habeas corpus* to carry a prisoner out of his county; and then, if he conveys him through several counties, the prisoner is in custody of the *S.* of each of the counties through which he passes. If, however, a prisoner escapes and flies into another county, the *S.* or his officers may, upon fresh pursuit, take him again in such county. To assist him in the discharge of his various duties, he may appoint an under-sheriff, and as many general or special deputies as the public service may require, who may discharge all the ordinary ministerial duties of the office, such as the service and return of process, and the like, but not the execution of a writ of inquiry, for this is in the nature of a judicial duty, which may not be delegated.

Sheriffalty, *n.* Shrievalty. (R.)

Sher'man, WILLIAM TECUMSEH, general of the army of the United States, b. in Lancaster, Ohio, 1820. His father, one of the judges of the Supreme Court of Ohio, died in 1829, and William was educated in the family of the Hon. Thomas Ewing until he had reached the age of 16, when he went to West Point, graduated in 1840, entered the U. S. army, and was promoted to the rank of first lieutenant in 1841. He acted as Assistant Adjutant-General in 1847, and obtained a brevet of captain in the regular army from May, 1848, for meritorious services in California during the war with Mexico. He was appointed commissary of subsistence in 1850, served at St. Louis and New Orleans, but finding his pay inadequate to support his family, resigned his commission Sept. 6, 1853, and removed to San Francisco, Cal., where he was a partner in a bank till 1848, when he returned to St. Louis, and was elected Superintendent of the Louisiana State Military Institute, which position he resigned when the Civil War began. After the fall of Fort Sumter, he was commissioned colonel of the 13th infantry, and commanded the 3d brigade at the unfortunate battle of Bull Run, July 21, 1861. On the reorganization of the National army, Colonel *S.* was made brigadier-general of volunteers accompanied Gen. Anderson to Kentucky, succeeded him temporarily in command, until at his own request he was relieved by Gen. Buell, and was ordered to Missouri. In the early part of 1862, he was appointed to the command of a division under General Grant, and acted with great bravery at the battle of Shiloh, April 6; was promoted to the rank of major-general, May 1; and when the department of Tennessee was formed, in December, was made commander of the 15th army corps. At the end of that month, he led an

expedition to Vicksburg; but the works were too strong to be taken by assault, and he was obliged to withdraw his troops, after a severe fight. He commanded the wing of the army that captured Fort Hindman, Arkansas, January 10, 1863, after which he resumed command of the 15th army corps; took part in the siege of Vicksburg, which capitulated July 3, 1863; and led the expedition which captured Jackson City, July 10. When Gen. Grant was placed in command of the army previously under Gen. Rosecrans, he gave the command of the dept. of the Tennessee to Gen. *S.*, who encountered Gen. Longstreet, and obliged him to retreat, Nov. 20; and in February, 1864, made his expedition to Meridian, Miss., and broke up that important railroad centre, driving Gen. Polk's army out of Mississippi. Having been charged with the command of the army in Georgia, May 4, he commenced the expedition through that State, which ended in the capture of Atlanta, the capital city. Gen. Hood thrice attacked the Federal army, and was repulsed, sustaining considerable loss. After his third failure, General Hood acted merely on the defensive in Atlanta, which fell into the hands of the Nationals in the beginning of September. In October, Hood began his movement towards Tennessee. *S.* followed him as far as Resacca, 75 miles, drove him from the railroad, and then sent part of his army to Tennessee to defend that State, and with the balance began his "march to the sea," to act in concert with the Union army in Virginia against Lee. The distance from Atlanta to Savannah is 290 miles. Gen. *S.* accomplished the march with very little loss in 23 days; and Savannah fell into his hands Dec. 21, 1864. The news of its capture was received with great rejoicing, not only because it showed how triumphant the campaign in Georgia had been, but because it opened up the seaboard of that State, and inflicted a heavy blow on the Confederate cause. Gen. *S.* defeated

From a photograph taken in 1864.

the Confederate army of N. Carolina at Bentonville, in that State, March 19, 1865, and soon afterwards paid a visit to Gen. Grant, to concert those measures for the defeat of Gen. Lee, which ended in the submission of that general, and that of Gen. J. E. Johnston, who surrendered his army to Gen. *S.*, April 26, 1865, which was one of the closing actions of the war. Gen. *S.* was promoted to the rank of lieutenant-general, July 25, 1866; succeeded Gen. Grant as general, March 4, 1869; retired Feb. 8, 1884, and died Feb. 14, 1891.

Sher'man, ROGER, an American statesman, and one of the signers of the Declaration of Independence, b. in Newton, Mass., 1721. Having studied law, he was admitted to the bar in 1754. In 1774 he was appointed a member of the first Congress, a post in which he continued till his death. In 1783 he assisted in codifying the laws of Connecticut. D. in New Haven, 1793.

Sherman, in *Mich.*, a twp. of St. Joseph co.

Sherman, in *New York*, a p. twp. of Chautauqua co., 10 m. S.W. of Maysville.

Sherman, in *Texas*, a city, cap. of Grayson co., on the Texas Pacific and 3 other R.Rs., 285 m. N.E. of Austin; has extensive industries, and a large trade. Pop. (1897) 10,700.

Sherman's Creek, in *Penn.*, enters the Susquehanna River from Perry co.

Shermansville, in *Rhode Island*, a village of Providence co., 20 m. N.W. of Providence.

Sher'rington, in Lower Canada, a vill. and township of Huntingdon co., 28 m. S.W. of Montreal.

Sherry, *n.* [Named from *Xeres*, in Spain, where the wine was originally made.] A strong, full-bodied wine of a deep amber color, and having, when good, an aromatic odor and nutty flavor, and containing from 20 to 23 per cent. of alcohol; as, dry sherry, Amontillado sherry.

Sherry-cobbler. (Drinks.) A favorite fancy beverage concocted of sherry wine, water, sugar, ice, &c., with a squeeze, or *soupeon*, of lemon-juice added, and commonly imbued through a tube of straw.

Sher'ryallies, *n. pl.* An American phrase for pantaloons of thick cloth or leather, buttoned on the outside of each leg, and generally worn over ordinary pantaloons, to protect from dust or mud when riding on horseback; —synonymous with the English *spatterdash*.

Sher'wood, in *Michigan*, a post-township of Branch co.

Sherwood, in *Missouri*, a post-village of Jasper co., 80 m. W. of Springfield.

Sherwood's, in *New York*, a post-village of Cayuga co., 14 m. S.W. of Auburn.

Shesh'equin, in *Pennsylvania*, a post-township of Bradford co., 7 m. N. of Towanda.

Shet'land, or **Zetland**, **Isles**. See ORKNEY and SHETLAND ISLANDS.

Shetnuck'et River, in *Connecticut*. It is formed by the junction of several small streams in Tolland and Windham cos., and flows S.E., uniting with the Quinebaug River near Norwich to form the Thames.

Shew, **Shewed**, **Shewn**, (*shō*.) A vulgar rendering of SHOW, SHOWED, SHOWN, *q. v.*

Shew-bread, (*shō'-bred*.) *n.* An inelegant orthography of SHOW-BREAD, *q. v.*

Shew'er, *n.* One who shows; —a vulgarism for SHOWER, *q. v.*

Shi'ah, *n.* Same as SHITE.

Shiawassee, (*shi-a-wos'see*), in *Michigan*, a river which rises in Oakland co., and flows N.N.W., uniting with the Flint River to form the Saginaw River, abt. 10 m. S.W. of Saginaw.—A central co.; area, 528 sq. m. *Rivers*. Shiawassee, Maple, and Looking-glass rivers. *Surface*, diversified, and in parts heavily timbered; *soil*, fertile. *Min. Coal*. *Cap. Cornua*. *Pop.* (1894) 32,827.

—A village and township of the above co., 30 m. N.E. of Lansing. *Manuf.* Paper, flour, &c.

Shib'boleth, *n.* [Heb., an ear of corn.] A word by which the Gileadites tested the Ephraimites after the battle narrated in *Judges* xii. The latter, being unable to sound the aspirate, called it *sibboleth*, and were thus detected. The term is now sometimes applied to a watchword, or criterion of opinion on which all the members of a party are agreed.

Shic, *v. a.* More frequently written SHY, *q. v.*

Shield, (*shēld*.) *n.* [A. S. *scyld*, from *scyldan*, to protect; Du. and Ger. *schild*; Icel. *skíldr*.] (Mil.) A broad piece of defensive armor, carried on the left arm; a buckler; a target; —a protection for the body very extensively used before the invention of gunpowder, and still employed by many nations among which military art has made little or imperfect progress. See Figs. 192, 194, 591.

—Hence, anything which serves to protect or defend; shelter; defence; safeguard; protection.

—Hence, also, figuratively, a person who protects, defends, or guards; as, "Achilles, the Grecian ornament and shield." (*Dryden*).—A spot or mark having resemblance to a shield.

(Bot.) A small colored cup or line with a solid disc encircled by a rim, and containing the fructification of lichens.

(Her.) Same as ESCUTCHEON, *q. v.*

(Mining.) A movable framework used to protect miners in making an adit under ground.

—*v. a.* To cover, as with a shield; to shelter from danger; to defend; to protect; to act as a safeguard to; to secure from attack or injury; as, to shield a woman from insult or outrage.—To ward off; to protect against; as, *thurs shield* the Laplanders from cold.

Shield, in *Illinois*, a twp. of Lake co.

Shield'-fern, *n.* (Bot.) The Wood-fern; —a plant of the genus *ASPIDIUM*, *q. v.*

Shield'less, *a.* Without a shield or buckler; —hence, defenceless.

Shield'lessly, *a.* In a shieldless manner; without protection.

Shield'lessness, *n.* State or condition of being shieldless; lacking defence.

Shields, (North,) a seaport-town of England. See TYNEMOUTH.

Shields, (South,) a seaport-town of England, co. of Durham, at the mouth of the Tyne, 8 m. N.E. of Newcastle, and 16 m. N.N.E. of Durham. *Manuf.* Ropes, glass, soda, alum, and earthenware.

Shields, in *Wisconsin*, a township of Dodge county. —A township of Marquette county, 3 miles north of Montello.

Shields'borough, in *Mississippi*, a post-village, former cap. of Hancock co., 212 m. S.E. of Jackson.

Shields'ville, in *Minnesota*, a post-village and township of Rice county, 10 miles N.W. of Faribault county.

Shiel'ville, in *Indiana*, a village of Hamilton co., 35 m. N. of Indianapolis.

Shif'nal, a town and parish of England, co. of Salop, 12 m. N.W. of Wolverhampton. *Manuf.* Paper. *Pop.* 6,000.

Shift, *v. a.* [A. S. *scyftan*, to divide, to drive away; Du. *schiften*, to separate.] To change or alter place or position; as, to shift the scenes.—To transfer from one location, direction, or position to another; as, to shift the helm, to shift one's place of residence.—To change one's clothes, particularly the under-garments or linen; as, she shifted herself once a week.—To put off or keep out the way by some artifice or expedient; as, I shifted my creditors to a distance.—To dress in fresh clothes; to put on a change of apparel; as, I must have time to shift myself.

To shift about, to turn round to the contrary side or opposite quarter; as, the wind shifted about.—To shift off, to delay; to defer; to put off or postpone; as, to shift off the paying of a tax.—To cast off or aside; to disengage one's self of; to shake off; as, he shifted off the task upon another.

—*v. n.* To move; to change place or position; to change in direction; to vary from one point to another; as, those people are continually shifting about.—To change one's employment or rules of action; as, he shifts from one

thing to another without advantage to himself. —To change one's clothing, particularly of linen or undergarments; as, turn aside while the lady *shifts*. —To practise in direct methods; as, to *shift* one's self out of a dilemma. —To resort to expedients for a livelihood, or for the accomplishment of a purpose; to scheme; to contrive; to manage; as, each must *shift* for himself as well as he can.

Shift, *n.* A change; a turning from one thing to another; — hence, an expedient attempted or resorted to in difficulty or embarrassment; one thing tried when another fails; a contrivance; an artifice; as, he makes a *shift* to live by some means — Hence, a mean refuge; a trick to escape detection of evil; a paltry evasion or subterfuge; fraud; artifice; last resource or alternative; as, "pious frauds and holy *shifts*." (*Hudibras*). — A shirt; a smock; an undergarment; — particularly, a woman's undergarment; a chemise; a linen jupe; as, to change one's *shift*. — Among miners, a spell or turn of work or duty; as, it is his *shift* at six o'clock.

To make *shift*, to manage temporarily; to contrive for the time being; as, when a man has no money, he must make *shift* without it.

Shift'able, *a.* That may be shifted, changed, or moved.

Shift'er, *n.* One who shifts; — especially, one who plays tricks or practises subterfuge or artifice; a cozeuer; a trickster.

(*Naut.*) A person employed on shipboard as an assistant to the cook in washing, steeping, and shifting the salt provisions from the harness cask before cooking them.

Shift'iness, *n.* State or quality of being shifty or variable; changeableness.

Shift'ingly, *adv.* By shifts, changes, or variations; trickishly; deceitfully.

Shift'less, *a.* Destitute of expedients, or not resorting to successful expedients; wanting means or method to act or live; as, a *shiftless* fellow, *shiftless* diplomacy.

Shift'lessly, *adv.* In a shiftless manner.

Shift'lessness, *n.* State or condition of being shiftless.

Shift'y, *a.* Fertile in expedients or contrivances; full of, or ready with, shifts or subterfuges; as, a *shifty* person.

Shiite, Shi'ah, *n.* [Ar. *shī'at*.] One of a Mohammedan sect who consider Ali, the fourth Caliph, as the rightful successor of Mohammed, and regard his predecessors Abubekr, Omar, and Othman, as usurpers. The Persians belong to this division — the Moslems who hold that Abubekr and his two next successors were legitimate caliphs, being called *Sunnites*, or *Sunnites*.

Shikarpoor, a town of British India, in Sind, 15 m. W. of the Indus, and N.W. of Sukkur; Lat. 27° 55' N., Lon. 68° 45' E. It has an extensive trade. Pop. 30,000.

Shillelagh, Shilla'ly, Shille'lah, *n.* A Hibernicism for a stout oaken cudgel about two feet long, carried and used by Irishmen in faction fights, and on similar occasions; — said to be derived from *Shillelagh*, a wood famous for its oaks.

"With his sprig of *shillelagh*, and shamrock so green." — *Lover*.

Shil'ling, *n.* [A. S. *scilling*; Ger. *schilling*; Icel. *skillingr*.] An English silver coin and money of account equal to twelve pence, or the twentieth part of a sovereign or pound sterling; and equivalent in the U. States to about 24 cents (\$0.24).

— In the U. States, a denomination of money differing in value relatively to the dollar in different States, but below that of the English shilling, with a corresponding value for the penny, and in former usage, for the pound. The diversity arose from the scarcity of coin in the American colonies, and was fixed at an early period in their history. — *York shilling*, a designation given in some parts of Canada to a silver sixpenny piece, or English sixpence.

Shilly-shal'ly, *n.* (A vulgar rendering of SHILL-I-SHAL-I, reduplicated from *shall I*: that is, *shall I, or shall I not?*) A colloquialism expressing the sense of silly trifling; awkward hesitation; wavering; irresolution.

— *adv.* In a hesitating, dubious, wavering, or irresolute manner; as, I will not act *shilly-shally* when the proper time comes.

Shiloh, (*shī'lō*), *n.* [Heb., quiet, rest.] (*Script.*) The Messiah; — an appellation of the Almighty, so styled by Jacob while moribund.

Shi'loh, in *Illinois*, a post-village of St. Clair co., 7 m. N.E. of Belleville.

Shiloh, in *New Jersey*, a post-village of Cumberland co., 5 m. N.N.W. of Bridgeton.

Shiloh, in *Ohio*, a post-village of Richland co., 14 m. N.N.E. of Crestline.

Shiloh, in *Tennessee*, a locality in Hardin co., 2 m. W. of the Tennessee River at Pittsburg Landing, and abt. 12 m. S.W. of Savannah, the scene of a battle sometimes called *Pittsburg Landing*, between the Union army, under Gen. U. S. Grant, and the Confederates, under Gens. A. S. Johnston and P. G. T. Beauregard, April 6–7, 1862. The first day the Nationals were defeated with great loss; but, having received reinforcements during the night, they attacked the Confederates the day following, and compelled them to retire, with the loss of their commander.

Shi'ly, *adv.* See SHILLY, the more correct orthography.

Shim, *n.* (*Agric.*) A clod-breaker.

(*Mach.*) A thin piece of metal placed between two parts to fill up and cause them to fit.

Shim'erville, in *Pennsylvania*, a post-village of Lehigh co., 30 m. N.E. of Reading.

Shim'mer, *v. n.* [From A. S. *scimian*, to glitter; Ger. *schimmern*, to glisten.] To glimmer; to shine or sparkle faintly; to glitter with a subdued sheen; as, a *shimmering* rivulet.

Shim'mer, *n.* A gleaming or glimmering; as, the *shimmer* of twilight.

Shim'mering, *n.* A faint gleam or glimmering.

Shin, *n.* [A. S. *scina*; Du. *scheen*.] (*Anat.*) The fore part of the leg, or the bone or tibia of the fore part of a leg.

— *v. n.* (*imp.* and *pp.* SHINNED.) To run about borrowing money hastily and temporarily, as for the payment of one's notes at the bank. — *Bartlett*. (An Americanism.)

— *v. a.* To climb by the aid of the hands and legs alone; as, to *shin* a tree; — (a colloq. Am., corresponding in this sense with the English word *swarm*.)

Shin'dy, *n.* A row; a riot; a rumpus; a general uproar; a rough-and-tumble fight; a scrimmage; as, to raise a *shindy*. — A game at ball played with a club; — also called *shimmy* and *bandy*. — A fancy; a liking; a predilection; a hankering for; — as, to take a *shindy* to a girl. (*Colloq.*)

Shine, *v. n.* (*imp.* and *pp.* SHONE, or SHINED.) [A. S. *scinan*; Ger. *scheinen*.] To emit a steady brilliant light; to give forth rays of light; to exhibit brightness, luminousness, or splendor; as, the stars *shine* by night. — To beam; to radiate; to glitter; to be bright or brilliant; to be lively and animated; as, her eyes *shone* on him with affection. — To be glossy, bright, or polished, like silk; as, the *shining* blade of a sword, the *shining* scale of a fish. — To be gay, splendid, showy, or beautiful; as, "the imperial ensign *shone* like a meteor." (*Milton*). — To be eminent, conspicuous, or distinguished; as, he is well qualified to *shine* in society.

To cause the countenance to *shine* upon, to be favorable or propitious to. — *Num.* vi. 25.

— *v. a.* To make to shine; as, to *shine* the eyes of a stag.

— *n.* Fair weather; — hence, by implication, sunshine; as, "heat and cold, and *shine* and rain." (*Locke*). — State or quality of shining; radiance; brightness; lustre; splendor; gloss; polish; as, the glittering *shine* of gold.

— A fancy; a liking; a predilection for a person. (*Colloq.*)

Shin'er, *n.* That which shines or emits brilliance, as the sun.

— In England, a cant term for a brand-new piece of money, particularly a bright gold coin; as, he tipped me a *shiner*.

(*Zool.*) A name applied to several species of fishes, family *Cyprinidae*, formerly grouped in the genus *Leuciscus*, but now distributed in several genera. The common *S. Platygyrus*, or *Leuciscus Americanus*, is 3–6 inches long, head small, tail forked, general color golden, dark above.

Shin'ness, *n.* An inelegant orthography of SHYNESS, *q. v.*

Shingle, (*shing'gl*), *n.* [Ger. *schindel*; allied to Icel. *skinn*, a skin, and Lat. *scindula*, a shingle.] (*Building.*) A small piece of wood sawed to a certain quality of scantling, used in roofing, instead of tiles or slates; as, a log-hut roofed with *shingles*.

(*Geol.*) Coarse sand and pebbles deposited by the surge of the sea, and which, accumulating in banks, form dangerous shoals.

Shingle-ballast. (*Naut.*) Ballast consisting of coarse gravel.

— *v. a.* To cover with shingles; as, to *shingle* a roof. — To cut, as hair, in such a manner that one portion overlaps another, like shingles.

— *v. a.* (*Metal.*) To hammer, as iron, after it has passed through the puddling furnace, in order to convert it into blooms, and detach impurities.

Shing'ler, *n.* One employed in the operation of shingling. — An apparatus for shingling puddled iron, prior to its conversion into blooms.

Shingle-roofed, (*-roof't*), *a.* Possessing a roof covered with shingles.

Shingles, (*shing'glz*), *n.* [From Lat. *cingulum* — *cingo*, to gird, to bind round.] (*Med.*) A kind of herpes, or eruptive disease, which spreads around the body like a zone.

Shin'gling, *n.* Act of roofing with shingles; also, a covering with shingles.

(*Metal.*) Act of detaching the impurities from blooms of puddled iron by hammering or compressing, and converting it into malleable stuff.

Shin'gly, *a.* Abounding with gravel or shingle.

Shin'ing, *p. a.* Radiant; lustrous; luminous; bright; splendid; as, a *shining* light. — Conspicuous; eminent; distinguished beyond others; as, a *shining* instance of self-denial.

(*Bot.*) Smoothed and polished of surface; — said of leaves.

— *n.* Radiance; brightness; effusion or transparency of light.

Shin'ingness, *n.* Brilliance; lustre; luminousness. (*R.*)

Shin'log, *n.* In the East Indies, a curl or crooked piece of timber.

Shin'necock Bay, in *New York*, on the S. coast of Suffolk co., Long Island, abt. 12 m. long, and inclosed S. by a sand beach.

Shin'ner, *n.* In the U. States, a colloquialism for one who goes about borrowing money temporarily, to meet pressing emergencies.

Shin'ning, *n.* An American colloquialism for a running about borrowing money temporarily to meet pressing exigencies.

Shinn'ston, or SHINNSTOWN, in *W. Virginia*, a post-village of Harrison co., 60 m. S.S.E. of Wheeling.

Shin'ny, *n.* (*Games.*) Same as BANDY and SHINDY, *q. v.*

Shin'-plaster, *n.* In the U. States, a colloquial vulgarism for paper-money; a bank-note of inferior denomination, generally noting a sum under one dollar.

Shin'ty, *n.* (*Games.*) In Scotland, the club used in playing golf; also, the game itself. See GOLF.

Shin'y, *a.* (*comp.* SHINIER; *superl.* SHINIEST.) Radiant; luminous; unclouded; as, a *shiny* day; also, glossy; lustrous; polished to brightness; as, a *shiny* hat.

Shioe'ton, in *Wisconsin*, a post-village of Outagamie co., 16 m. N.W. of Appleton.

Ship, [A. S. *scype*.] A termination expressing state, office, condition, dignity, vocation, profession, art, &c., as in kingship, lordship, stewardship, horsemanship, seamanship, chancellorship, &c.

Ship, *n.* [A. S. *scyp*; Ger. *schiff*; Fr. *vaisseau*; Lat. *scapha*; Gr. *skaphe*.] (*Naut.*) Any sea-going vessel of large size. The term was formerly restricted to such as carried three complete masts; i. e., lower, top-gallant, and royal masts (Fig. 2293,) but in modern days, when the application of steam and innumerable experiments in rigging have upset any universal principle of rig, the only limitation of the term *ship* is practically by the size of the vessel. The ship, as a whole, may be treated under four great heads, viz., the hull; the masts, rigging, and sails; the officers, crew, and passengers (if any); the cargo. As regards the hull, the principles for designing its shape are shown under NAVAL ARCHITECTURE (*q. v.*); and the masting, rigging, &c., under MAST, RIGGING, SAIL (all of which see). The general functions of a ship's personnel are also stated in this work under their respective titles, while under various minor headings the minutiae of a ship's equipment are fully particularized.

Ship of the line. (*Naut.*) One of the line of battle; i. e., a ship of war of two or more gun-decks, with their respective tiers of guns; a three-decker.

— *v. a.* (*imp.* and *pp.* SHIPPED, (*shipt*.) [A. S. *scipian*.] To put on board of a ship or vessel of any kind for transportation or conveyance; to send or dispatch by water; as, to *ship* merchandise; — hence, to dispose; to get rid of. — To engage for service on shipboard; as, to *ship* a deck-hand. — To take on board of a ship or vessel; as, she *shipped* a heavy sea. — To fix in working order in its proper place; as, to *ship* the rudder.

To *ship off*, to transport by water; as, to *ship off* convicts.

— *v. n.* To engage for service on shipboard; as, he *shipped* as an able seaman.

Ship-biscuit, (*-bis'kit*), **Ship'-bread**, *n.* Hard biscuit prepared for common use on shipboard, in distinction from *soft-tack*, or *cabin-bread*.

Ship-board, *adv.* Aboard ship; upon or within a ship.

— *n.* The plank or deck of a ship; — used almost always in the phrase on *shipboard*.

Ship-boy, *n.* A cabin-boy; a powder-monkey.

Ship-breaker, (*-brāk-*), *n.* One who breaks up condemned ships for the sake of the timber and materials.

Ship-broker, *n.* An agent who conducts the business of chartering or freighting vessels; a broker who procures insurance on, or dispatches, a ship.

Ship-builder, (*-bild'er*), *n.* One who builds or constructs ships or other vessels; a naval architect; a shipwright.

Ship-build'ing, *n.* Act, process, or operation of constructing ships or other vessels. See NAVAL ARCHITECTURE.

Ship'-canal, *n.* A canal for the passage of ships; as, for instance, the Suez *'canal*.

Ship'-carpenter, **Ship'-wright**, (*-rit*), *n.* One who works at ship-building.

Ship'-chandler, *n.* A dealer in ship's stores; one who supplies the necessary cordage, canvas, tackling, &c., pertaining to a ship.

Ship'ful, *n.*; *pl.* SHIPFULS. Enough or sufficient to fill a ship.

Ship'-holder, *n.* A ship-owner.

Ship Island, in the Gulf of Mexico off the coast of Mississippi, 30 m. N. of the Chandeleur Islands.

Ship'-load, *n.* The load or cargo carried by a ship.

Ship'man, in *Illinois*, a post-village of Macoupin co., 19 m. N.N.E. of Alton.

Ship'-master, *n.* The commander of a merchant ship; — called, by courtesy, *captain*.

Ship'mate, *n.* One who serves aboard ship with another; a fellow sailor; a messmate.

Ship'ment, *n.* Act of shipping, or of putting anything on board of a ship or other vessel; embarkation; as, to make a *shipment* of cotton to Liverpool. — The goods, merchandise, or things shipped, or put on board of a ship or other vessel; as, I have an interest in that *shipment*.

Ship'-owner, *n.* The owner or proprietor of a ship, or ships.

Shippegan, (*ship-peh-gan'*), an island of New Brunswick, in the Gulf of St. Lawrence, at the entrance of Chaleur Bay, 20 m. long and 10 broad.

Ship'pen, **Ship'pon**, *n.* (The latter is the better orthography.) A cow-house; a shed for oxen or other cattle.

Shippen, in *Pennsylvania*, a village, former cap. of Cameron co., 100 m. W.N.W. of Williamsport.

— A township of McKean co.

— A village and township of Tioga co.

Ship'psburg, in *Pennsylvania*, a post-borough and township of Cumberland co.

Ship'psville, in *Pennsylvania*, a post-borough of Clarion co., 5 m. N.W. of Clarion.

Ship'per, *n.* One who ships goods; one who places merchandise in a ship's bottom for transportation abroad; as, a *shipper* of palm-oil.

Ship'ping, *a.* Pertaining or having reference to ships, their ownership, transfer, and employment; as, a *shipping* business.

— *n.* Ships in general; ships or vessels of any kind fitted for navigation; collective tonnage.

(*Law.*) See MARITIME LAW.

Shipping articles, articles of agreement between the captain of a vessel and the seamen on board, in respect to the amount of wages, length of time for which they

are shipped, &c. (*Bourier*).—To take shipping, to embark; to go on board ship for conveyance, transportation, or passage.

Ship'pingport, in *Kentucky*, a village of Jefferson co., on the Ohio, 2 m. W. of Louisville.

Ship-rigged, (*-rigd*). *a.* (*Naut.*) Rigged in the manner of a full-masted ship; square-rigged.

Ship's-shape, *adv.* In a seamanlike manner;—hence, regular; exact; proper; according to method; as, he made love ship-shape and English fashion.

Ship'-worm, *n.* (*Zool.*) The *Pholadida* or *Pholas*, a family of *Lamelli-branchiata*, embracing marine aculeata which have the shell open at both ends, thin, white, exceedingly hard, and armed with rasp-like imbrications. They burrow in almost all substances.

Fig. 2354. — PHOLAS CRISPATA, (New England.)

Shipwreck, (*-reck*). [*Ship* and *wreck*.] The destruction of a ship or other vessel by being cast ashore or broken to pieces by striking against rocks, shoals, and the like.—A ship wrecked or dashed to pieces, or the parts of such ship.—Hence, by analogy, utter destruction; total loss; ruin; as, his hopes suffered shipwreck.

—*v. a.* To destroy, as a ship, by running ashore on rocks or sand-banks, or by the force of winds or waves in a storm.—To make to suffer the perils or dangers of a wreck; as, a shipwrecked seaman.—Hence, analogically, to throw into utter confusion, distress, or difficulty; as, a passion for one woman shipwrecked his after life.

Shipwright, (*-rit'*). *n.* A ship-carpenter.

Ship'-yard, *n.* A yard or place where ships are built or repaired.

Shiraz, or **Shiras**, (*she-raz'*), a city of Persia, prov. of Fars, or Persia Proper, formerly cap. of the empire, 115 m. N.E. of Bushire, and 220 m. S.S.E. of Ispahan; Lat. 29° 38' N., Lon. 52° 44' E. It is surrounded by walls, entered by 6 gates, and its environs are celebrated for their beauty and fertility. It also contains a royal palace, with numerous handsome mosques and bazaars. *Manuf.* Silk and woollen stuffs, sword-blades, earthenware, and soap, as well as wine (or rather liquors) and oil of roses. *Pop.* 30,000.

Shiraz', *n.* A growth of wine;—said to be derived from Shiraz, in Persia.

Shire, *n.* [*A. S. scyr*, from *sceran*, to divide.] In England, a county;—this word is unaccented, as in the compound *Cheshire*, i. e., the county of Chester (an abbreviation of *Chestershire*, pronounced *Chesh'ur*).

—In the U. States, a division of a state, comprising several contiguous townships;—a distinction must be drawn between the application of this word as between English and American usage; as, for instance, it is correct in this country to say "the county of Berkshire," whereas, in England, such an expression would be tautological, or, in other words, would convey the sense of "a county of a county."

Shire', a river of S.E. Africa, which issues from Lake Nyassa, in Lat. 14° 28' S., and joins the Zambesi after a S. course of 250 m. The navigation is obstructed by cataracts over a space of 35 m., in which it falls 1,200 ft.

Shire'mantown, in *Pennsylvania*, a post-borough of Cumberland co., 4 m. W. of Harrisburg.

Shire'town, *n.* A county town.

Shirk, *v. a.* (See *SHARK*.) To avoid; to shirk away from in a mean manner; as, to shirk duty.

—*n.* A person who seeks to avoid duty.

—*a.* Deceitful; cunning; inclined to shirk.

Shir'land, in *Illinois*, a post-village and township of Winnebago county, 10 miles S.W. of Beloit.—A post-village of McLean county, 6 miles S.W. of Bloomington.

Shir'ley, JAMES, an English dramatic writer, b. in London about 1594, who, after completing his degrees in arts at Cambridge, entered into orders; but subsequently embraced the Roman Catholic faith, and became a schoolmaster in London. He and his wife both died the same day, of a fright, occasioned by the Fire of London, in 1666. He wrote thirty-nine plays, and a volume of poems.

Shir'ley, in *Kansas*, a township of Clond co., on Republican River, 10 m. E. of Concordia.

Shir'ley, in *Maine*, a township of Piscataquis co., 85 m. N.E. of Augusta.

Shirley, in *Massachusetts*, a post-village and township of Middlesex co.

Shirley, in *New York*, a village of Erie co., 23 m. S. of Buffalo.

Shirley, in *Pennsylvania*, a township of Huntingdon county.

Shir'leysburg, in *Pennsylvania*, a post-borough of Huntingdon co., on the East Broad Top R.R., 85 m. W. of Harrisburg.

Shir'ley Village, in *Massachusetts*, a village of Middlesex co., 41 N.W. of Boston.

Shirr, (*shir*). *n.* An elastic cord inserted between two pieces of cloth.

Shirred, *a.* Said of a cloth composed of two thicknesses, separated by elastic cords.

Shirt, *n.* [*A. S. syrce*, *syryce*.] A loose garment of linen, cotton, or other material, worn by men and boys next to the body.

—*v. a.* To cover or clothe as with a shirt.

Shirvan, or **Shirwan**, (*shir-van'*) a prov. of Asiatic Russia, in Trans-Caucasia, between Lat. 40° and 41°

N., Lon. 48° and 49° 30' E., having N. and W. Georgia and Daghestan, E. the Caspian Sea, and S. the river Kur. It is traversed by a range of mountains from N.W. to S.E., separating the basins of the Kur and the Terek. The N. portion is, however, level and fertile. The principal town is Shamakha.

Shir'wa, or **TAMANDUA**, a lake of S.E. Africa, having its centre in Lat. 15° 30' S., and Lon. 35° 40' E. Length 60 m., breadth 10 to 23 m. It is 1,500 feet above the sea-level. On the West, between the lake and the river Shire, Mount Zomba rises to 7,000 feet.

Shis'dra, **Jis'dra**, a town of Russia, govt. of Kaluga, 80 m. S.W. of Kaluga. *Manuf.* Woollens and glass. *Pop.* 8,000.

Shit'tah, or **Shit'tim**, *n.* (*Script.*) A kind of wood which was employed in making various parts of the tabernacle while the Israelites were wandering in the Wilderness. It is mentioned also as forming part of the offerings, as in *Exod.* xxv. 5, and xxxv. 7, 24. In *Isa.* xli. 19, it is mentioned as a tree worthy of planting. It was probably a species of *Acacia*.

Shive, *n.* [*A. S. scafan*, to shave.] A little piece or fragment; as, a shive of bread.

Shiver, *n.* A small piece or fragment into which a thing breaks by any sudden violence.—A slice; a shive.

—*v. a.* [*Ger. schiefen*, to peel off in flakes, to scale.] To break into many small pieces, flakes, or splinters; to shatter; to dash to pieces by a blow.

(*Naut.*) To cause to shiver or flatten, as a sail, by bracing it so that the wind strikes upon the leech.

—*v. n.* To fall at once into many small pieces or parts.—To quake; to tremble; to shudder.—To shake, as with cold, ague, fear, or horror; to be affected with a thrilling sensation, like that of chilliness.—To shake or flutter in the wind, as a sail.

Shiv'er, *n.* The act of shivering; a shaking fit; a tremor.

Shivering, *n.* The act of shaking or shuddering, as from cold or fever.

Shiv'ery, *a.* Easily falling into many pieces; not firmly cohering; incompact.—Trembling; inclined to shiver.

Sho'a, or **Shwa**, a state of E. Africa, in the S. of Abyssinia, between Lat. 8° 30' and 11° N., Lon. 38° and 40° 30' E.

Shoad'-stone, *n.* A stone or fragment of ore rendered smooth by the action of running water.

Shoal, *n.* [*A. S. sceol*, a multitude.] A great multitude assembled; a crowd; a throng, as of fishes.—A place where the water of a river, lake, or sea is shallow or of little depth; a sand-bank or bar; a shallow.

—*v. n.* To crowd; to throng; to assemble in a multitude. To become more shallow.

—*v. a.* To cause to become more shallow.

—*a.* Shallow; of little depth; as, shoal water.

Shoal Creek, in *Illinois*, formed in Bond co. by the junction of the E. and W. Forks, and flows S. entering the Kaskaskia River in Clinton co.

Shoal Creek, in *Missouri*, rises in Clinton co., and enters Grand River in Livingston co.

Shoal Creek, in *Tennessee*, rises in Giles co., and flows S.W., entering the Tennessee River in Lauderdale co., Alabama, abt. 5 m. E. of Florence.

Shoal'iness, *n.* Shallowness; frequency of shallow places.

Shoal'ness, a headland of Alaska; Lat. 69° N., Lon. 162° W.

Shoal'water Bay, in *Washington*, an inlet of the Pacific, in Pacific co.

Shoaly, (*sho'ly*). *a.* Full of shoals or shallow places.

Shock, *n.* [*Dan. schok*; *Fr. choc*; *Sp. choque*.] A violent concussion or collision of bodies, or the concussion which it occasions; a violent striking or dashing against.—Conflict of contending armies or foes; external violence; also, offence; impression of disgust.

(*Elect.*) The concussion, or violent muscular contraction instantaneously experienced when a charge or current of electricity passes through the body.

(*Med.*) See *CONCUSSION*.

(*Agric.*) A pile or assemblage of sheaves of wheat, rye, &c.

—*v. a.* [*Dan. schokken*; *Fr. choquer*.] To shake with violence; to shake by the sudden collision of a body; to meet, as force with force; to encounter; to strike, as with terror or disgust; to offend; to disgust; to appal; to dismay; to cause to recoil, as from something odious or horrible; to make up into shocks, as grain.

—*v. n.* To meet with hostile violence; to collect sheaves into a pile.

Shock'-head'ed, *a.* Having thick, bushy hair.

Shock'ing, *a.* Striking, as with horror; causing to recoil with dismay or disgust; appalling; terrifying; frightful; dreadful; terrible; formidable; disgusting; offensive.

Shock'ingly, *adv.* In a manner to strike with horror or disgust.

Shock'ingness, *n.* State or quality of being shocking.

Shod, *imp.* and *pp.* of *shoe*.

Shoe, (*sho'*) *n.*; *pl.* SHOES, (*shüz*). [*A. S. sceo*, *sco*, *scoh*.] A covering or protection for the foot, usually of leather.

The ancients usually wore sandals (*q. v.*), which are mentioned under the title of *baskins* and *cothurni*, and were often very costly. The crescent was employed as an ornament on the shoes of Romans of exalted rank, who appear to have carried on the art of shoe-making with great taste and skill. Only one instance is known of an ancient monument exhibiting shoes with separate heel-pieces. The custom of making shoes right and left was common in classical times. The fashion of shoes and boots, as has occurred with other articles of dress, has undergone innumerable changes. At one time these were pointed to an extravagant degree (see Fig. 2152); and in the last century, the high heels of ladies' shoes became a monstrosity. In our own day, the general

disease of the shoe proper, and the introduction of short ankle-boots, form the chief change of fashion. In the U. S., the manufacture of shoes has attained the highest perfection, chiefly in Massachusetts, where many towns are chiefly engaged in the manufacture, and where, in 1890, there were 1,057 establishments engaged in this business, with a product valued at \$116,387,900. Maine, New Hampshire, New York, and Pennsylvania also produce largely, and there are large establishments for the manufacture of the finer kinds of boots and shoes in Philadelphia, New York, Baltimore, and others of the leading cities. Ingenious machines, all of American invention, are used in these factories, nearly the whole work on the shoe being performed by machinery. The goods thus produced are often made to resemble hand-work so closely as to be distinguished from it with great difficulty, while the best grades of machine-made are often more durable than hand-made shoes. There was little export trade in shoes before 1890, but the U. S. now exports about \$35,000,000 worth annually. The total product in 1890 was valued at more than \$220,000,000.

—A plate or rim of iron nailed to the hoof of a horse or an ox to defend it from injury.—A plate of iron, or a piece of wood nailed under the runner of a sleigh or a sled.—Anything resembling a shoe, or that answers the purpose of a shoe.

(*Naut.*) A piece of wood for the bill of an anchor to rest upon, to save the vessel's side;—also, for the heels of sheers, &c.

Shoe, *v. a.* To furnish with shoes; to put shoes on.—To cover at the bottom, as the fluke of an anchor.

Shoe'-boy, *n.* A boy that cleans shoes or boots.

Shoe'-ing-horn, *n.* A horn used to facilitate the admission of the foot into a shoe.—Anything by which a transaction is facilitated; anything used as a medium;—in contempt.

Shoe'less, *a.* Destitute of shoes or covering for the feet.

Shoe'maker, *n.* One who makes shoes and boots.

Shoe'makertown, now **OGONTZ**, in *Pennsylvania*, a post-village of Montgomery co.

Shoe'neck, in *Pennsylvania*, a village of Lancaster co.

Sho'er, *n.* One who makes or puts on shoes, as a tanner.

Shoe'-stone, *n.* A sharpening-stone used by shoemakers, &c.

Shoe'-tie, *n.* A string or ribbon used for fastening a shoe to the foot.

Shog'-trot, *n.* A jog-trot.

Shoho'la, or **SOHOLA**, in *Pennsylvania*, a post-township of Pike co.

Sho'kan, in *New York*, a post-village of Ulster co., 15 m. W. of Kingston.

Sholapoor, a town of British India, in Bejapore, on the river Kistna, 165 m. from Poona; Lat. 17° 43' N., Lon. 75° 40' E.

Shoo, *interj.* Begone;—an expression used to frighten away animals or fowls; as, shoo, fly!

Shooks, *n. pl.* (*Cont.*) Staves for making hogsheds;—boards for making sugar-boxes.

—*v. a.* To pack, as staves, in a shook.

Shoot, *v. a.* [*A. S. sceotan*, *scotian*.] To let fly, or cause to dart, as an arrow.—To discharge anything so as to make it fly with violence.—To discharge, as from a gun or bow; to let off, used of the instrument.—To strike with anything shot.—To emit new parts, as a vegetable.—To emit; to dart or thrust forth.—To push suddenly; as, to shoot a bolt or lock.—To push forward.—To fit to each other by planing;—a workman's term.—To pass through with swiftness.—To kill by a ball, arrow, or other thing propelled.

To be shot of, to become free from. (*Colloq.*)

—*v. n.* To perform the act of discharging, sending with force, or driving anything by means of an engine or instrument.—To germinate; to increase in vegetable growth.—To form itself into any shape; as, "Metals will shoot into crystals." (*Bacon*).—To be emitted; to move with velocity; as, a shooting star.—To protuberate; to jut out, as a promontory.—To pass, as an arrow or pointed instrument.—To penetrate; to grow rapidly; to advance by rapid growth.—To feel a quick, darting pain.

To shoot ahead, to surpass or outstrip in running, &c.

—*n.* Act of shooting, or of propelling or driving anything with violence; the discharge of a fire-arm or bow.—Act of striking, or endeavoring to strike, with a missile weapon.—A young branch or plant; a scion.—A narrow passage in a river. See *CHUTE*.

(*Mining*.) A vein parallel to the stratification.

Shooter, *n.* One who shoots; an archer; a gunner.—Anything that shoots, as a fire-arm; as, a six-shooter.

Shoot'ing, *n.* Act of sending an arrow with force, or of discharging fire-arms.—Sensation of a quick, glancing pain.

(*Sportsmanship*.) Act or practice of killing game with bows or fire-arms.

Shoot'ing-box, *n.* A small house for use in the shooting season.

Shoot'ing-iron, (*-i-urn*) *n.* A gun or other fire-arm.

Shoot'ing-star, *n.* (*Astron.*) See *FALLING-STAR*.

Shoot'ing-stick, *n.* (*Print.*) A wedge-shaped piece of wood or iron for tightening and loosening the quoins that wedge up the pages in a chase.

Shop, *n.* [*A. S. scoppa*; *Fr. échoppe*, a stall; *Ger. schoppen*, a shed.] A building or room in which goods, wares, &c., are sold by retail.—A building in which mechanics' work, and where they keep their wares for inspection.

Shop-bill, a list of a shop-keeper's goods, printed separately for distributing.

—*v. n.* To visit shops for the purpose of buying.

Shop'-board, *n.* A board or bench on which any work is done.

Shop-books, *n. pl.* (Com.) The books of a retail dealer, manufacturer, or other person, in which entries or charges are made of work done, or goods sold and delivered to customers.

Shopiere, (*sho-pe-air'*), in Wisconsin, a post-village of Rock co., 60 m. W.S.W. of Milwaukee.

Shop/keeper, *n.* One who keeps a shop; one who sells goods in a shop, or by retail; — in distinction from one who sells by wholesale.

Shop/lifter, **Shop-thief**, *n.* One who steals anything in a shop, or takes goods privately from a shop.

Shop/lifting, *n.* The act, or the crime, of a shoplifter.

Shop/man, *n.* A shopkeeper; a tradesman. — One who attends in a shop; a salesman.

Shop/pe, *n.* One who shops.

Shopping, *n.* Act of visiting shops for the purchase of goods.

Shop-walker, *n.* One whose duty, in a shop or store, is to direct customers to the proper department for the goods they seek, and to see that they are waited on; also, to keep general supervision over the department in which he is placed.

Shore, *n.* [A. S. *scora*, from *sceran*, *scyran*, to shear, to cut off.] The place where the continuity of the land is interrupted or separated by the sea or the river; the coast or land adjacent to the sea, or to a large lake or river.

—*v. n.* To prop; to support by a post or buttress.

Sho'rea, (*Bot.*) A genus of large resinous trees, belonging to the order *Dipteraceae*. The most important species is *S. robusta*, a native of India, which furnishes the valuable timber known by the name of *saul* or *sal*. It also yields a balsamic resin, called *ral*, *dhooma*, or *dammar-pitch*, which is employed for incense.

Shored, (*shord*), *a.* Having a bank or shore.

Shore/ham, (*New*), a seaport-town of England, co. of Sussex, at the mouth of the Adur, 1 m. from the British Channel, and 6 m. W. of Brighton. It is noted for ship-building. Pop. 3,000.

Shore/ham, in Vermont, a post-village and township of Addison co., on Lake Champlain, 50 m. S.W. of Montpelier.

Shore-land, *n.* Land bordering on a shore; the sea-coast.

Shore-less, *a.* That has no shore or coast.

Shor'ing, *a.* Supporting; propping.

Short, *a.* [A. S. *scort*, *seort*; Lat. *curtus*; Fr. *court*.] Not long; not having great length or extension. — Not extended in time; not of long duration. — Not of usual or sufficient length, reach, or extent. — Repeated at small intervals of time. — Not of adequate extent or quality; not reaching the point demanded, desired, or expected; deficient; defective; imperfect; not adequate; insufficient; scanty. — Not sufficiently supplied; (see the SUPPLY.) — Not far distant in time; near at hand. — Defective in quantity; narrow; limited; not large or comprehensive. — Brittle; friable; breaking all at once without splinters or shatters; not bending. — Laconic; brief; concise. — Abrupt; pointed; petulant; severe. — *adv.* Not long; — used in composition. — At once; suddenly; as, to stop short.

To turn short, to turn on the ground occupied, or without making a circuit.

—*n.* A summary account. (*Shaks.*) — The long and the short, the whole. — In short. In few words; briefly.

Short-breathed, *a.* That has short breath or respiration.

Short-cake, *n.* A cake in which shortening is put.

Short-coming, *n.* A failing of the usual produce, quantity, or amount, as of a crop; a failure of full performance, as of duty.

Short Creek, in Ohio, enters the Ohio River from Jefferson co.

—A post-township of Harrison co.

Short-dated, *a.* Having little time to run.

Short'en, *v. a.* To make short in measure, extent, or time; to abridge; to lessen; to curtail; to contract; to reduce or diminish in extent or amount; to confine; to restrain; to lop; to deprive; to make friable.

—*v. n.* To become short or shorter; to contract.

Short'ener, *n.* One who, or that which, shortens.

Short'ening, *n.* A making short, or shorter. — Something added to paste to make it short or friable, as butter or lard.

Short-hand, *n.* Short writing; a compendious method of writing; otherwise called *STENOGRAPHY*, *q. v.*

Short-jointed, *a.* Having a short pastern, as a horse.

Short-lived, *a.* Not living or lasting long; being of short continuance.

Short'ly, *adv.* Quickly; soon; in a little time; in few words; briefly.

Short'ness, *n.* State or quality of being short in space or time; little length or brief duration; fewness of words; brevity; conciseness; want of reach, or the power of retention; deficiency; imperfection; limited extent.

Short-rib, *n.* A rib shorter than the others; one of the lower ribs; a false rib.

Short'sight, *n.* Shortsightedness.

Short'sighted, *a.* Near-sighted; not able to see far intellectually; also, imprudent; inconsiderate.

Short'sightedness, *n.* A defect in vision, consisting in the inability to see things at a distance; — more correctly, near-sightedness; defective or limited intellectual sight or vision; *MYOPIA*, *q. v.*

Short Tract, in New York, a post-village of Alleghany co., 10 m. N. of Angelica.

Short-winded, *a.* Affected with shortness of breath; having a quick respiration.

Shoshone (*sho-sho'ne*), in Idaho, a N. co., bordering on Montana; area, 4,400 sq. m. Rivers. Clearwater, Oro Fino creek. &c. Surface, mountainous in the N.E.,

elsewhere diversified, with forests of pine, cedar, &c. *Min. Gold. Cap. Murray. Pop.* (1897) 6,200.

Shoshone Falls. See IDAHO.

Shot, *n.; pl.* SHOT, or SHOTS. [A. S. *scotu*.] Act of shooting. — Discharge of a missile weapon. — The flight of a missile weapon, or the distance which it passes from the engine. — A marksman; as, a dead shot. — One who practises shooting.

—Any solid projectile; — those for cannon and carronades being of iron, those for small-arms of lead. The latter are known as *bullets* (*q. v.*) and *small-shot*. The usual method of making the small-shot, used in numbers at a time for killing game and other small animals, resembles, in some respects, the natural process by which rain is converted into hail. Melted lead is made to fall through the air from a considerable elevation, and thus leaden rain becomes cooled and solidified into leaden hail or shot. To carry out this manufacture, shot-towers and shot-wells had to be constructed. At the top of the tower melted lead is poured through a colander, and the drops are received into a vessel of water below. The colanders are generally hollow hemispheres of sheet iron, about ten inches in diameter. The size of the holes varies in different colanders, according to the size of the S. required. When the S. are taken out of the water, they are dried upon metal plates heated by steam. The imperfect shot are afterwards separated from the spherical S. in the following manner: A polished iron plate is tilted at a certain angle, and the mixed S. are strewn along the upper part of the inclined surface; the spherical S. roll down the plane in straight lines, and fall into a receptacle placed for them about a foot from the bottom of the iron plates; the imperfectly-formed S. roll with a zig-zag motion, and more slowly, and then fall, without any bound, into a bin placed for them immediately at the bottom of the iron plate. The perfect S. are next polished and made black with plumbago, and are then ready for sale. Shot towers are often of considerable height, the highest being one at Villach, in Carinthia, where there is a fall of 249 feet. There are many having a height of 100 to 150 feet. — The S. discharged from artillery are no longer made solid, if of more than 3 pounds in weight, except when made for old style ordnance, such as smooth-bore or Armstrong guns. Even the Palliser chilled shot used for piercing armor are not solid, but are made with a small internal cavity. — *Bar-shot*, formerly used to destroy the spars and rigging of a ship, were double-headed shot composed of a bar with a ball at each end. — *Chain-shot* were similar in purpose, they being connected by a chain instead of a bar. — *Grape-shot*, an obsolete device, consisted of small iron balls, of from 1 pound to 2 pounds in weight, held together on a spindle by canvas or, by iron plates so as to be easily inserted in a gun. — *Case-shot*, or *canister*, consists of a tin cylinder filled with bullets, and of the proper size to fit the bore of the gun. It is used to ward off an overwhelming or sudden attack, as of boats or of cavalry.

—*v. a.* To load with shot over a cartridge, as a gun.

Shot-belt, *n.* A long pouch for holding shot.

Shote, *n.* A young hog; a hog partially grown.

Shot'ten, *a.* [From *shoot*.] Having thrown out the spawn, as a herring. — Shooting into angles. — Shot out of its socket; dislocated, as a bone. — Being put forth or emitted.

Shot-tower, *n.* A tower from the top of which melted lead is dropped in the process of making shot.

Should, (*shud*), the *imp.* of *SHALL*, but now used as an auxiliary verb, either in the past time, or conditional present; and it often denotes obligation or duty. See *SHALL*.

Shoul'der, *n.* [A. S. *sculder*.] (*Anat.*) The joint by which the arm of a human being, or the fore-leg of a quadruped, is connected with the body. There are three

Fig. 2355.

THE LEFT SHOULDER-JOINT AND ITS CONNECTIONS.

1, The clavicle, or collar-bone; 2, the acromion process; 3, the coracoid process; 4, the capsular ligament; 5, the coraco-humeral ligament; 6, the tendons of the biceps muscle; 7, the shaft of the humerus, or arm-bone; 8, the greater tuberosity of the humerus; 9, the lesser tuberosity; 10, the neck of the scapula; 11, the anterior surface of the scapula.

bones which enter into the formation of this part of the body — the *scapula*, or blade-bone; the *humerus*, or bone of the arm; and the *clavicle*, or collar-bone, — which, with ligaments, muscles, and integuments, complete the entire anatomy of the part. (See Fig. 2355.)

—The upper joint of the fore-leg of an animal cut for the market. — Something like the human shoulder. — Horizontal or rectangular projection from the body of a thing. — Figuratively, support; strength; sustaining power, or that which elevates and sustains.

(*Fort.*) The angle of a bastion included between the face and flank. (Fig. 745.)

—*pl.* The upper part of the back.

Shoul'der, *v. a.* To push or thrust with the shoulder; to push with violence. — To take upon the shoulder.

Shoul'der-belt, *n.* A belt that passes across the shoulder, or shoulders.

Shoul'der-blade, *n.* The blade-bone. See *SHOULDER*.

Shoul'der-knot, *n.* An ornamental knot of ribbon or lace worn on the shoulder; an epaulette.

Shoul'der-slip, *n.* Dislocation of the shoulder.

Shout, *v. n.* [Ar. *sayhat*, an exclamation, cry, shriek.] To exclaim; to cry out; to utter a sudden and loud outcry, usually in joy or exultation, or to animate soldiers in an onset.

—*n.* A loud burst of voice, or voices; a vehement and sudden outcry, particularly of a multitude of men, expressing applause, joy, triumph, exultation, or animated courage.

Shout'er, *n.* One who shouts.

Shout'ing, *n.* Act of crying out loudly; a shout.

Shove, (*shuv*), *v. a.* [A. S. *scufan*.] To thrust or push forward; to push; to thrust; to propel; to drive along by the direct application of strength without a sudden impulse; to push a body by sliding, or causing it to move along the surface of another body; to press against.

—*v. n.* To push or drive forward; to urge a course; to push off; to move in a boat or with a pole.

—*n.* Act of pushing or pressing against by strength, without a sudden impulse; a sudden push.

Shovel, *n.* [From *shove*.] That which shoves or thrusts; an instrument consisting of a broad scoop or blade with a handle, used for throwing earth or other loose substances.

—*v. a.* To take up and throw with a shovel; as, to shovel earth. — To gather in great quantities.

Shoveller, *n.* One who shovels.

(*Zoöl.*) A species of duck (*Anas clypeate*, Linn.), remarkable for the length and terminal expansion of its shovel-like bill.

Show, (*sho*), *v. a.* (*imp.* SHOWED; *pp.* SHOWN or SHOWED.)

[A. S. *sceawian*.] To cause to see, or to be seen; to exhibit, present, or display to the sight or view of others; to bring to the eye, or to notice. — To make to know; to cause to understand; to make known to. — To teach, instruct, or inform; to prove; to manifest; to point out, as a guide. — To bestow; to confer; to afford. — To disclose; to make known; to discover; to explain.

—*v. n.* To appear; to look; to be in appearance; to seem.

—*n.* Something presented or offered to the sight or view; a sight; a spectacle; an exhibition; something offered to view for money. — Superficial appearance; not reality; ostentatious display or parade; ostentation. — Appearance, as an object of notice; public appearance in distinction from concealment; semblance; likeness. — Spaciousness; plausibility. — External appearance; pomp; magnificent spectacle; representative action. — Hypocritical pretence.

Show-bill, *n.* A large sheet containing an advertisement in large letters or devices; a placard.

Show-box, *n.* A box containing some object of curiosity to be exhibited.

Show-bread, **Shew-bread**, *n.* See *BREAD*, and Fig. 412.

Show-card, *n.* A trader's placard.

Show-case, *n.* A case, or box, with the top and one side of glass, in which articles are placed in a shop.

Show'er, *n.* [A. S. *scur*.] That which falls or runs down from a cloud; a fall of rain or hail, of short duration; a fall of things from the air in thick succession; as, a sharp shower of arrows. (*Spenser*). — A copious supply bestowed; liberal distribution.

—*v. a.* To water with a shower; to wet copiously with rain, or with falling water; to bestow liberally; to distribute or scatter in abundance.

—*v. n.* To rain in showers.

Show'er-bath, *n.* A bath in which water is poured in drops upon a person.

Show'eriness, *n.* State of being showery.

Show'ery, *a.* Raining in showers; abounding with frequent falls of rain, hail, or sleet.

Show'ily, *adv.* In a showy manner; pompously; with parade; ostentatiously.

Show'iness, *n.* State of being showy; pompousness; great parade; ostentation.

Show'man, *n.* One who exhibits shows.

Shows'town, or **Shons'town**, in Pennsylvania, a post-village of Allegheny co., on the Ohio, 17 m. N.W. of Pittsburgh.

Show'y, *a.* Making a great show; exhibiting ostentation; splendid; gay; gaudy; magnificent; stately; sumptuous; pompous; ostentatious.

Shrak'leyville, in Pennsylvania, a vill. of Mercer co.

Shred, *v. a.* (*imp.* and *pp.* SHRED.) [A. S. *screadian*.] To cut into small pieces; — particularly, narrow and long pieces.

—*n.* A long, narrow piece cut off, as of cloth; a fragment; a piece.

Shred'ding, *n.* A cutting into shreds; also, that which is cut off a piece

Shred'dy, *a.* Consisting of shreds or fragments.
Shreveport (*shreev'port*), in Louisiana, a thriving city, cap. of Caddo parish, on the Red river, 300 m. N.W. of Baton Rouge. Pop. (1897) 13,500.

Shrew, *n.* [*W. criaw*, to cry.] A scold; a vixen; a termagant; a peevish, brawling, turbulent, vexatious woman; as, he has got a shrew for a wife.

(*Zoöl.*) The common name of the *Soricidae*, a fam. of *Insectivora*, comprising numerous small animals, covered with short velvety fur, and having much of the general form and aspect of the mouse, from which, however, they may be easily distinguished by their long, taper, cartilaginous snout.

Shrewd, (*shrud.*) *a.* (*comp.* SHREWDER; *superl.* SHREWDESS.) [*A. S. scrudinan*, to scrutinize.] Having the qualities of a shrew; malicious; troublesome; mischievous. — *Maliciously sly; cunning; more artful than good.* — *Bad; ill-betokening.* — *Artful; sagacious; sharp-sighted; penetrating; acute; keen; astute.*

Shrewdly, *adv.* Archly; sagaciously; with good guess.
Shrewdness, *n.* Quality of being shrewd; penetration; sagacity; acuteness; the quality of nice discernment; sagaciousness; sharp-sightedness; astuteness; cunning.

Shrewish, *a.* Having the qualities of a shrew; forward; peevish; petulantly clamorous.

Shrewishly, *adv.* Peevishly; clamorously.

Shrewishness, *n.* The qualities of a shrew; forwardness; petulance; turbulent clamorosity.

Shrew-mole, *n.* (*Zoöl.*) See MOLE.

Shrew-mouse, *n.* (*Zoöl.*) See SHREW.

Shrewsbury, (*shrus'ber-re*), a town of England, cap. of the co. of Salop, on the Severn, 50 m. S.E. of Liverpool, and 138 m. N.W. of London. *Manuf.* Woollen cloths, flannels, linen, thread, canvas, and iron-ware. Pop. (1897) 27,690.

Shrewsbury, in Massachusetts, a post-township of Worcester co., 38 m. S.W. of Boston.

Shrewsbury, in New Jersey, a post-village and township of Monmouth county, 42 miles northeast of Trenton.

Shrewsbury, in Pennsylvania, a post-borough and township of York county, 14 miles south of York. — A township of Lycoming county. — A township of Sullivan county.

Shrewsbury, in Vermont, a post-township of Rutland co., 59 m. S.W. of Montpelier.

Shrewsbury River, in New Jersey, an inlet of Sandy Hook Bay, in Monmouth co., S. of Neversink River.

Shriek, *v. n.* [*Ger. schreien, kreischen*, to scream, to shriek.] To cry out shrilly; to utter a sharp, loud cry; to scream, as in a sudden fright, in horror, or anguish.

— *n.* A sharp, shrill outcry or scream, such as is produced by sudden terror or extreme anguish.

Shrieker, *n.* One who shrieks.

Shrieking, *a.* Crying out with a shrill voice.

— *n.* A crying out with a loud, shrill voice.

Shriev'alty, *n.* [*From sheriff.*] The office or jurisdiction of a sheriff.

Shrike, *n.* (*Zoöl.*) See LARDE.

Shrill, *a.* Sharp; acute; piercing, as sound; uttering an acute sound.

— *v. a.* To make a shrill or piercing sound.

— *v. n.* To express in a shrill manner.

Shrillness, *n.* Quality of being shrill; acuteness of sound; sharpness or fineness of voice.

Shrilly, *adv.* Acutely, as sound; with a sharp sound.

Shrimp, *n.* [*Ger. schrumpfen*, to shrink, to become crumpled.] (*Zoöl.*) The *Crangon vulgaris*, a small crustaceous animal, allied to the lobster and craw-fish, which frequents shallow waters along the sea-coast. In shape, it resembles these animals, but is much more elongated in proportion, and is destitute of the large anterior claws; it is distinguished from the prawn by the absence of the long, anterior, serrated spine. During life, the body is semi-transparent, and so much resembles seawater that the animal is distinguished with difficulty. In Franco and England, it is esteemed as one of the most delicious of the macrurous crustaceans. In the U. States, it is considerably used as food, but chiefly as bait.

Shrine, *n.* [*A. S. scrin*; *Fr. écrin*; *Lat. scrinium* — all meaning a chest, desk, or repository.] A case or box, particularly a receptacle of the remains or relics of a saint (Fig. 2356). *S.* are of 2 sorts; *portable*, used in processions; and *fixed*, in churches. The appropriate place for shrines in the churches of the Middle Ages was generally in the eastern part, in the space behind the high altar. Such is the situation of the celebrated *S.* of the Three Kings of Cologne.

— *v. a.* To place in a shrine; to enshrine.

Shriuk, *v. n.* (*imp.* and *pp.* SHRUNK.) [*A. S. scrincan.*] To contract spontaneously; to draw back or be drawn

back into less length, breadth, or compass by an inherent power; to shrivel; to become wrinkled by contraction, as the skin. To withdraw or retire, as from danger; to decline action from fear; to recoil, as in fear, horror, or distress.

Shrink, *v. a.* To cause to contract.

— *n.* Contraction; a spontaneous drawing back into less compass; corrugation; a withdrawing from fear or horror.

Shrink'age, *n.* A shrinking or contraction into a less compass.

Shrink'er, *n.* One who shrinks.

Shrink'ing, *n.* A contraction or spontaneous drawing into less compass; act of drawing back through fear.

Shrink'ingly, *adv.* By shrinking.

Shriv'el, *v. n.* [*Ger. schrumpeln.*] To draw back, or be shrunk, into wrinkles; to contract; to shrink and form corrugations.

— *v. a.* To contract into wrinkles; to cause to shrink into corrugations.

Shriv'elled, *a.* Contracted into wrinkles.

Shropshire, a co. of England. See SALOP.

Shroud, *n.* [*A. S. scrud, scruid*, from *scrydan*, to clothe.] That which clothes, covers, conceals, or protects; a cover; a shelter. — The dress of the dead; a winding-sheet.

— *pl.* (*Naut.*) A range of large ropes in a ship, extending from the head of a mast to the right and left sides of the ship, to protect or support the masts and enable them to carry sail. In Fig. 2357, the diagonal ropes and rope-ladders are the shrouds, fastened below to the chain-wales.

— *v. a.* To clothe; to cover; to shelter from danger or annoyance. — To dress for the grave; to cover, as a dead body. — To conceal; to hide; to defend; to protect by hiding. — To overwhelm.

Shrove-tide, Shrove-Tuesday, *n.* [*A. S. shruven*, to confess.] The Tuesday following Quinquagesima Sunday, and immediately preceding Ash Wednesday, so called because the Roman Catholic Church enjoins confession to be made on that day in preparation for the fast of Lent.

Shrub, *n.* [*A. S. scrob, scrobb.*] (*Bot.*) A plant with woody stem and branches like a tree, but of smaller size, not generally exceeding 20 feet in height, and branching near the root, so as to have no main stem of considerable height. When a shrub is of small size and much branched, it is often called a *bush*. There is no more important botanical distinction between trees and shrubs, and the same genus very often includes species of both kinds. Many *S.*, as honeysuckles, are climbers.

— [*Ar. shrub*, drinking, anything drunk; allied to *syrup* and *sherbet.*] A liquor composed of acid, particularly lemon-juice and sugar, with spirit to preserve it.

— *v. a.* To rid from shrubs.

Shrub'bery, *n.* Shrubs; a plantation of shrubs.

Shrub'biness, *n.* State or quality of being shrubby.

Shrub'by, *a.* Full of shrubs; resembling a shrub; consisting of shrubs or brushwood.

Shrug, *v. a.* To draw up; to contract, as the shoulders.

— *v. n.* To raise or draw up the shoulders.

— *n.* A drawing up of the shoulders; — a motion usually expressing dislike or slight contempt.

Shubenacadie, (*shoo'ben-ah-kay-de*), a river of Nova Scotia, which peninsula it nearly divides into two parts. It flows N. into Mines Basin, 45 m. N. of Halifax, and is connected with the harbor of that city by a canal 30 m. long.

Shud'der, *v. n.* [*Ger. schüttern.*] To quake; to tremble, shake, or quiver with fear, horror, or aversion; to shiver.

— *n.* A tremor; a shaking with fear or horror.

Shud'dering, *n.* A trembling or shaking with fear or horror.

Shud'der'ingly, *adv.* With tremor.

Shude, *n.* The husks of rice, and other refuse of rice-mills, largely used as an adulterating ingredient for linseed cake.

Shuff'le, *v. a.* [*Dan. schjellen*, to shove, from *schoffel*, a kind of shoe.] To shove one way and the other; to push from one to another; to mix by pushing or shoving; to confuse; to throw into disorder; — especially, to change the relative positions of, as of cards in the pack; to remove or introduce by artificial confusion.

— *v. n.* To change the relative positions of cards in a pack by little shoves. — To change the position; to shift ground; to avoid answering fair questions; to practise shifts to elude detection; to equivocate; to prevaricate; to quibble; to evade; to struggle; to shift. — To move with an irregular gait.

— *n.* A shoving, pushing, or jostling; the act of mixing and throwing into confusion by change of places; an evasion; a trick; an artifice.

Shuff'le-cap, *n.* A play at which money is shaken in a hat.

Shuff'ler, *n.* One who shuffles or prevaricates; one who plays tricks; one who shuffles cards.

Shuff'ling, *a.* Evasive; as, a *shuffling* answer.

— *n.* Act of one who shuffles; act of throwing into confusion; trick; artifice; evasion; also, an irregular gait.

Shuff'lingly, *adv.* With shuffling; with an irregular gait or pace.

Shulls'burg, in Wisconsin, a city and township of Lafayette co., 15 m. N.E. of Galeua. Pop. (1895) 1,295.

Shun, *v. a.* [*A. S. scunian, onscunian.*] To fly from; to avoid; to eschew; to evade; to keep clear of; not to fall on or come in contact with; not to mix or associate with; not to practise; to escape; to decline; to neglect.

— *v. n.* To decline; to avoid to do a thing.

Shun'less, *a.* Inevitable; unavoidable.

Shu'sau, in New York, a post-village of Washington co., 43 m. N.N.E. of Albany.

Shuster, (*shoos'ter*), a city of Persia, prov. of Khuzistan, on the Karoon, 165 m. S.W. of Ispahan, and 50 m. E.S.E. of Sbus; Lat. 32° N., Lon. 48° 59' E.; pop. 15,000.

Shut, *v. a.* (*imp.* and *pp.* SHUT.) [*Ger. schützen*, to shelter, to dam, to dike.] To close, as water, so as to hinder ingress or egress; to close or stop up for defence or security; to prohibit; to bar; to forbid entrance into; to preclude; to exclude; to close, as the fingers; to contract.

— *v. n.* To close itself; to be closed.

— *n.* A close; the act of shutting. — A small door or cover; a shutter.

Shutesbury, in Massachusetts, a post-township of Franklin co., 16 m. N.W. of Boston.

Shut'ter, *n.* A person who shuts or closes; also, a close cover for a window or aperture.

Shut'tle, *n.* [*A. S. scyttel, scyttels*, a bar, bolt, from *seotan*, to shoot, dart, cast.] (*Weaving.*) An instrument used for passing or shooting the thread of the woof in weaving from one side of the cloth to the other, between the threads of the warp.

(*Founding.*) A gate or stop to the sow or trough by which the melted metal from the furnace is let out into the mould.

Shut'tle-cock, *n.* A wooden cock stuck with feathers, used to be cast or driven backwards and forwards by a battledoor in play; also, the play itself.

Shut'tle-race, *n.* A sort of shelf in a weaver's loom.

Shy, *a.* [*Ger. scheu*; *It. schifo.*] That shuns, avoids, or evades; that is fearful of near approach; keeping at a distance through caution or timidity; shunning approach; reserved; not familiar; coy; avoiding freedom of intercourse; cautious; wary; careful to avoid committing one's self or adopting measures; suspicious; jealous.

— *v. n.* To start suddenly aside, as a horse.

— *n.* The starting suddenly aside of a horse.

— *v. a.* To throw, as a flat stone or a shell, with a careless jerk; to fling.

Shyenne, SHEYENNE, or SHIENNE (*shē-en'*), in North Dakota, a river which rises by two branches in the northern central portion of the State, and flows into the Red River of the North in Cass co., after a S.E. course of something like 300 m. Locally, and in the best gazetteers and atlases, this name is spelled SHEYENNE, the other forms being practically obsolete.

— A post-village of Eddy co.

Shy'ing, *n.* Act of starting aside, as of a horse.

Shy'ly, *adv.* In a shy or timid manner; not familiarly; with reserve; bashfully; coyly.

Shy'ness, *n.* Quality of being shy; fear of near approach or of familiarity; reserve; coyness.

Shy Post, in Missouri, a village of Audrain co., 48 m. N.E. of Jefferson city.

Si, *n.* (*Mus.*) The French and Italian name for the seventh sound added by Le Maire, a Frenchman, at the latter end of the seventeenth century, to the six ancient notes, *ut, re, mi, fa, sol, la*, of Guido. It corresponds to our B.

Si'ak, a river of the island of Sumatra, which flows into the sea nearly opposite Malacca; Lat. 1° 40' N., Lon. 103° E.

Sial'ogogue, *n.* [*Gr. sialon, saliva, agogos*, a leader.] (*Med.*) One of a class of medicines which produce an increased flow of saliva. Of these there are both *vegetable* and *mineral*. The former embrace most of the pungent plants, particularly sorrel, tobacco, pelletory root, and mezereon; of the latter, several of the metals, when taken constitutionally, especially mercury. The first are called *masticatories*, because the effect is produced by merely chewing the article.

Sial'dæ, *n. pl.* (*Zoöl.*)

The *Corydalis* family, comprising neuropterous insects, which have very large anterior wings. They frequent the neighborhood of water, and pass their larva state in that element. Some of them (Fig. 2358) are of very large size.

Si'au, (called by the Burmese *Foodra*, or *Yutha*.) An extensive country of India-beyond-the-Brahmapootra, comprising, in its former extension, most of the central and S. parts of that peninsula, extending between the 4th and 20th degrees of N. Lat., and 98th and 109th of E. Lon., having N. the Laos country, E. the French Annamite region, W. the British provs. of Burma and Tenasserim and the

HORNED CORYDALIS (*C. cornuta*).
(Half size.)

Indian Ocean, and on the S. French Cambodia and the Gulf of Siam. It consists in chief of mountains, swamps, and jungles, a very small portion being in a state of cultivation. The principal rivers are the Kombooree, Menan, and the Bang-Pa-Kong, all running south, and their numerous tributaries. The wild animals of Siam include monkeys of many varieties, antelopes, buffaloes, tigers, leopards, rhinoceroses, elephants, bears, and wild boars. The vegetable products are sugar, tobacco, pepper, cotton, coffee, sago, and immense quantities of rice, which may be regarded as the staple of the country. Immense forests of teak and other hard timber grow in all parts, while the value of sandal, sapan, rose-wood, and other fancy trees obtained here, is very great. Next in abundance is fruit, which is yielded in greater quantity and of richer flavor than in any country of India. The mineral wealth of Siam is no doubt large, but it has never been properly worked. Gold, silver, tin, and antimony are the principal metals with which we are acquainted. The number of gems, or precious stones, found, however, is very large. The exports are the metals already named, teak and fancy woods, ivory, betel, pepper, wax, rattans, diamonds and other gems, and salt. The religion of the people is Buddhism, and the government a despotic monarchy, the people being the absolute property of the sovereign—so completely his slaves that, by his tyrannical decree, it is death for a subject even to mention the king's name. The natives are of the Mongolian family, and remarkable for their cleanliness, orderly manners, and humanity, but so backward in arts and manufactures, that they can neither manufacture cotton like the Hindoos, porcelain like the Japanese, nor silk like their neighbors of China. The temples of Siam are the most magnificent in India, and the language employed in their religion is distinct from that of common life. Music and poetry form the ruling passions of the Siamese; but instrumental music is always valued solely in proportion to the loudness of the noise produced. Their tragedies generally represent extravagant fables; but their comic writers indulge in a pointed ridicule against the reigning manners, and often against persons in power, who choose to wink at these liberties. Dancing and wrestling form also common public exhibitions, and their puppet-shows are carried to greater perfection than any in Europe. The annals of the

Fig. 2359.—FORMER AUDIENCE OF A SUPERIOR.

Siamese begin about five centuries B. C. But nothing authentic is known of the history of the country till 1350, in which year Ayuthia, the former capital, was founded. Cambodia was first conquered in 1532, and in this century the Siamese dominion extended to Singapore. The present dynasty ascended the throne in 1782. There have been numbers of Protestant and Catholic missionaries in S. since the year 1828, but so far as the Siamese are concerned, their labors have been almost, if not altogether, fruitless.—In commerce, Bangkok, the cap. (q.v.), once ranked second only to Calcutta and Canton, but all-grasping monopolies, exorbitant duties, and numberless restrictions had well nigh stifled production and banished trade. In 1855-56, the King, Chao Pha Mongkout (d. 1869), concluded new treaties with Great Britain, the United States, and France. The purchase of land is now allowed; the monopolies and tonnage duties are abolished. Slavery ceased to exist after 1872; and since May 8, 1874, the king has exercised the legislative power in common with a supreme council of state. French aggressions have considerably reduced the territory of S., a large section of it having been taken in 1893, while a disposition is shown to annex the remainder.

Siam, (*Gulf of*), a large bay of the Indian Ocean, bet. Lat. 7° and 14° N., Lon. 99° and 105° E.; having E. the kingdom of Cambaja, and W. the peninsula of Malacca. Ext. 500 m. long and 300 broad.

Siamang, *n.* (*Zoöl.*) The *Hylobates syndactylus*, a quadrumanous animal of Sumatra, inferior to the Chimpanzee and Orang-outang, both in structure and intelligence, and belonging to that division of monkeys called Gibbons.

Siamese, *n. sing. and pl.* A native, or the natives, of Siam.

Siamo, or **Siao**, (*se'a-mo*), an island of the Eastern Archipelago, off the N.E. extremity of the island of Celebes. It is 35 m. in circumference.

Siam'pa, a state of S.E. Asia. See TSAMPA.

Siascon'set, in *Massachusetts*, a village at the S.E. extremity of Nantucket Island.

Siberia, (*si-beer'i-a*), a vast extent of the Russian Empire, forming the whole of N. Asia bet. Lat. 45° and 78°

N., Lon. 60° E. and 170° W., having N. the Arctic Ocean, E. the Sea of Kamtschatka and the N. Pacific Ocean, S. the Sea of Okhotsk, China, and Independent Tartary, and W. European Russia. See SECTION II.

Siberian, *n.* A native of Siberia.

Sibilance, *n.* A hissing sound.

Sibilant, *a.* [Lat. *sibilans*, from *sibilo*, to hiss.] Hissing; making a hissing sound. *S* is called a *sibilant* letter.

—*n.* A letter uttered with a hissing of the voice, as *s*.

Sibilat'ion, *n.* The act of hissing; a hissing sound.

Sibilous, *a.* Hissing; sibilant.

Sib'ley, in *Minnesota*, a S. co.; area, 588 sq. m. *Rivers*. Minnesota, and S. Fork of Crow river. It has also several lakes. *Surface*, undulating; *soil*, excellent. *Cap.* Henderson. *Pop.* (1895) 16,436.

Sibley, in *Missouri*, a post-village of Jackson co., on the Missouri River, 16 m. N.E. of Independence.

Sibyl, *n.* [Lat. and Gr. *sibylla*.] The name given to certain prophetic women said to have lived in Greece and Italy. Some authors recount as many as ten of them. The most celebrated was the Sibyl of Cumæ. According to the legend (B. C. 520)—“A woman of strange appearance presented herself to King Tarquinius Superbus, offering him nine books of the prophecies of the Sibyl for 300 pieces of gold. The offer was contemptuously refused; whereupon the prophetess burned three of the books, and offering the remainder for the same price, these were again scornfully refused. The Sibyl then retired, and having burned three other books, again returned, asking the same price for the remaining three. The King, much amazed, demanded of the augurs what he should do. They said that he had acted unwisely in refusing them, and commanded him by all means to purchase the remaining books. The sacred volumes were put into a stone chest, which was deposited under ground in the Capitol, and two persons, called the *guardians of the sacred books*, were appointed in charge of them.” The number was afterwards raised.

Sibylline, *a.* Pertaining to the sibyls; uttered or composed by sibyls; as, the *sybilline* books.

Sic, [Lat.] Thus.

Sicard, ROCH-AMBOISE CUCURRON, an eminent French teacher of the deaf and dumb, b. 1742, near Toulouse. On the death of the Abbé de l'Épée, in 1789, the Abbé *S.* was called to Paris to succeed him in the direction of the establishment there. In 1792, he was arrested amidst his scholars, sent to prison, and was in imminent danger of becoming a victim in the ensuing massacres. He, however, obtained his liberty, and in 1796 took part in compiling the *Annales Catholiques*, for which he was sentenced to transportation, but escaped. When this storm passed away, he resumed his situation as teacher of the deaf and dumb. He wrote several valuable works relating to the instruction of deaf mutes. D. 1822.

Sicasica, (*se-ka-see'ka*), a town of Bolivia, 57 m. S. of La Paz.

Siccative, *a.* [Lat. *siccus*, *siccatus*, to dry.] Causing to dry.

Sicc'ity, (*sik'se-te*), *n.* [Fr. *siccité*.] Dryness; aridity; want of moisture.

Sicilian Ves'pers, (*sis-il'yān*), *n. pl.* (*Hist.*) Charles of Anjou, brother of Louis IX., King of France, having seized Sicily by virtue of a grant from Pope Alexander IV., the natives rose against the French the day after Easter, March 30, 1282. The massacre which ensued commenced at Palermo, extended to Messina and other parts of the island, and is known in history as the Sicilian Vespers.

Sicily, (*sis'e-le*), an island belonging to the kingdom of Italy, in the Mediterranean, the largest and the finest in that sea, lying at the S.W. extremity of Italy, from which it is parted by the narrow Strait of Messina; Lat. between 36° 30' and 38° 15' N., Lon. between 12° 20' and 38° 15' E.; area, 10,500 sq. m. *S.* is of an irregularly triangular shape (hence its ancient Latin name of *Trinacria*), and is 180 m. in length by 120 in breadth. A mountain-chain, seemingly a continuation of the Apennines, traverses the island east and west, throwing off spurs, from one of which in the east rises Mount Etna, the loftiest volcano in Europe, having a culmination of 10,900 feet; neither the lakes nor the rivers are of any considerable size or length. The plains and valleys which compose the greater portion of the island are remarkably fertile, and yield large crops of maize, wheat, rice, pulse, all kinds of vegetables, and abundance of fruits; the silk-worm is largely cultivated. The minerals are marble, iron, copper, stone, agate, jasper, salt, and coal, while of sulphur the yield is enormous,—above 150 mines, finding constant work for 12,000 men. The manufactures, generally unimportant, are silks, hats, furniture, skins, cotton, and cutlery; the exports comprise all native produce, with linseed, manna, rags, and tanned leather. *S.* is divided into seven provinces—Palermo, Messina, Catania, Girgenti, Syracuse or Noto, Trapani, and Catani-setta.—The Sicilians are of middle stature, well made, with dark eyes and coarse black hair; their features are better than their complexion; and they attain maturity and begin to decline earlier than the inhabitants of more northern regions. They are cheerful, inquisitive, and fanciful, with a redundancy of unmeaning compliments, showing they are not so deficient in natural talents as in their due cultivation. Their delivery is vehement, rapid, full of action, and their gesticulation violent; the latter is so significant as almost to possess the powers of speech, and animates them with a peculiar vivacity, bordering, however, rather on conceit than wit, on farce than humor. The upper classes are incorrigibly indolent, and fond to excess of titles and other marks of distinction. This

love of ostentation is so inveterate that the poorer nobility and gentry are penurious to an extreme in their domestic arrangements, and almost starve themselves to be able to appear abroad in the evening with a mean and poverty-stricken equipage. The peasantry are generally sober, but

passionate, ignorant, credulous, and superstitious. They are, however, bigots rather than fanatics, and are civil and kind to such heretical strangers as may be thrown in their way. There is a great want of keeping and of comfort, even in the best houses; and in them, and everywhere, there is a lack of cleanliness.—*S.* was originally peopled by the Phœnicians, by the Greeks, next by the Carthaginians, and then by the Romans. The Saracens in the 8th century subjugated the island, and some centuries later the Norwegians made inroads upon its territory, and finally it fell under the Norman sway.—

Fig. 2360.—WOMAN OF TRAPANI.

From this time *S.* became the prey of Spain, France, and Austria, till the crown was united to that of Naples under the title of the *Two Sicilies*, in 1734. When the French overran Italy under Bonaparte, the King of Naples, being driven from his throne, took shelter in this, the insular portion of his dominions, where he reigned in peace, under British protection, till the final peace of 1815 placed him once more in his continental chair of Naples. The revolution in Italy begun by Garibaldi in 1860 soon spread to Sicily, and on the landing of that patriot the whole island rose in arms, and the royal troops were beaten in every engagement. *S.* in a few months was free, and when Naples acknowledged Victor Emanuel as its sovereign, under the style of King of Italy, the Sicilian crown was laid with rejoicings at the feet of that sovereign. *Pop.* (1897) 3,150,500.

Sic'ily, in *Ohio*, a village of Highland co., 16 m. S.W. of Hillsborough.

Sick, *a.* [A. S. *seoc*.] Suffering from a complaint of body or mind; affected with disease of any kind; not in health; not well; ill; indisposed; affected with nausea; disgusted; inclined to vomit; having a strong dislike to; tired; weary (followed by *of*); indicating a place where sickness is.

The sick, the person or persons affected with disease.

Sick-bed, *n.* A bed to which one is confined by sickness.

Sick-brained, *a.* Having a disease of the brain.

Sick'en, *v. a.* To make sick; to disease; to make squeamish; to disgust.

—*v. n.* To become sick; to fall into disease; to be satiated; to be filled to nausea; to become disgusting or tedious; to be disgusted; to be filled with aversion or abhorrence; to become weak; to decay; to languish.

Sick'ening, *a.* Becoming sick; making sick; disgusting.

Sick'en'ingly, *adv.* In a manner to sicken.

Sick'ish, *a.* [From *sick*.] Somewhat sick or diseased; inclined to be sick; exciting disgust; nauseating.

Sick'ishly, *adv.* In a sickish manner.

Sick'ishness, *n.* Quality or state of being sickish.

Sick'le, *n.* [A. S. *sicel*, *sicol*; Lat. *secula*, from *seco*, to cut.] (See SECTION.) An instrument for cutting grain; a reaping-hook.

Sick'led, *a.* Furnished with a sickle.

Sick'lied, *p. a.* Made sick.

Sick'liness, *n.* State of being sickly; state of being habitually diseased; state of producing sickness extensively; disposition to generate disease extensively.

Sick'-list, *n.* See LIST.

Sick'ly, *a.* Affected with sickness; not healthy; somewhat affected with disease, or habitually indisposed; ailing; infirm; weakly; feeble; languid; faint; producing disease extensively; marked with sickness; tending to produce disease; diminished in strength or brightness.

—*adv.* Not in health.

Sick'ness, *n.* State of being sick; nausea; a failure of strength under a sense of disgust or squeamishness; state of being diseased; malady; illness; a morbid state of the body.

Sick'-room, *n.* The apartment where one lies ill.

Sicilian, (*see-kool-ya'na*), a seaport of S. Italy, in Sicily, prov. of Girgenti, 18 m. W.N.W. of Girgenti; *pop.* 6,000.

Sicyon, (*sis'i-on*), (anc. *Sicyonia*), a once celebrated city and small state of Greece, situated a few miles S. of Corinth, in the Morea. *S.* was a chief seat of painting and statuary (tradition asserting that the former

Sir Philip Sidney

1554-1585

was invented there), it having given its name to a school of painting which included among its disciples Pamphilus and Apelles, both natives of Sicyon. It was also the native city of Aratus (q. v.), the general of the Achaean League. There exists at the present day a few remains of the ancient city, as well as of the more modern buildings erected by the Roman conquerors of Greece, near which stands a small modern village named *Vasilika*.

Sida, *n.* (Bot.) An extensive genus of plants, order *Malvaceae*, many species of which are used medicinally.

Siddons, SARAH, an English actress, b. at Brecon, S. Wales, 1755, was the sister of John and Charles Kemble. At the age of 18 she married a young actor named Siddons. Garrick engaged her for Drury Lane Theatre, where she made her *début*, in 1775; but she incurred the displeasure of the English "Roscians," and was compelled to again retire to the provinces. In 1782 she again appeared at Drury Lane. She made her first appearance in her celebrated part of "Lady Macbeth" in 1785, and rapidly became the leading actress of the English stage. She retired from the stage in 1812; but reappeared on some subsequent occasions, for benefits and charities. She gave readings from Shakspeare and Milton at a later period, and appeared before Queen Charlotte and the royal family, and at the universities of Oxford and Cambridge. D. 1831.

Siddonsburg, in *Pennsylvania*, a post-village of York co., 12 m. S.W. of Harrisburg.

Side, (*sid*), *n.* [A. S. *side*, *sidan*.] That part of the body on which one usually lies or reclines.—The part of an animal between the back and the face and belly.—The broad and long part or surface of a thing, as distinguished from the end, which is of less extent, and may be a point; margin; edge; verge; border; the exterior line of anything, considered in length; the outward part between the top and bottom.—The slope, declivity, or ascent, as of a hill or mountain.—One part of a thing or its superficies; any part considered in respect to its direction or point of compass.—Party; faction; sect; any man, or body of men, considered as in opposition to another, or others.—Any part being in opposition or contradistinction to another.

—*a.* Being on the side, or toward the side; lateral; oblique; indirect.

—*v. n.* To take the same side with another; to embrace the opinions of one party or engage in its interest, when opposed to another party;—followed by *with*.

Side-board, *n.* A kind of table with drawers, &c., placed at the side or end of a dining-room, to hold dining utensils, &c.; a buffet.

Side-bones, *n. pl.* (*Far.*) Enlargements situated above a horse's heels, resulting from the conversion into bone of the elastic lateral cartilages. They occur mostly in heavy draught horses with upright pasterns, causing much stiffness, but, unless when of rapid growth, little lameness. They are treated at first by cold water applied continually, until heat and tenderness are removed, when blistering or firing must be resorted to.

Side-box, *n.* A box, or inclosed seat, on the side of a theatre.

Sided, *a.* Having a side or sides; used in composition; as, *one-sided*, *many-sided*, &c.

Side-ling, *adv.* Sidewise; with the side foremost; sloping.

Side-ling Hill, in *Pennsylvania*, a mountain range stretching N.E. and S.W. from the Juniata River, in Huntingdon co., to the Maryland line, S. of Bedford co.

Side-ling Hill Creek, in *Pennsylvania*, rises in Bedford co., and flows into the Potomac River near Hancock, in Maryland.

Side-long, *a.* Being along, or on the side; lateral; oblique; not directly in front; as, a *sidelong* glance.

—*adv.* On the side; laterally; obliquely; in the direction of the side.

Side-posts, *n. pl.* (*Carp.*) A kind of truss-posts placed in pairs.

Sid'eral, **Sid'er'al**, *a.* [Lat. *sidus*, a constellation.] (*Astron.*) A term used in order to distinguish that which has reference to the fixed stars from that which relates to the sun, moon, planets, or comets. Thus a *Sid'eral* day is the time during which the whole body of fixed stars appears to revolve round the earth. It is found by observing two successive passages of the same star over the meridian. The time for one passage to another consists of 24 hours, each of 60 minutes, of 60 seconds each, &c., of *Sid'eral* time, the *Sid'eral* day being nearly 4 minutes shorter than the solar day. *Sid'eral* time is not suited for the purposes of every-day life; but because of its uniformity, it is very useful in astronomical observations.

Sid'erite, *n.* [Gr. *sidēros*, iron.] (*Min.*) Sparry iron-ore, or native carbonate of iron.

Sid'eritis, *n.* (*Bot.*) A genus of plants, order *Lamiaceae*, having generally flowers of a ferruginous color, whence its popular name of *Iron-wort*.

Siderography, *n.* [Gr. *sidēros*, iron (or steel), and *graphein*, to write.] The art or practice of engraving on steel.

Sideroschis'olite, *n.* [Gr. *sidēros*, and *schizein*, to cleave, and *lithos*, stone.] (*Min.*) A hydrate silicate of iron, found in small six-sided black prisms in Brazil.

Sid'eroscope, *n.* [Gr. *sidēros*, and *skopein*, to view.] An instrument for detecting minute degrees of magnetism in substances usually supposed to be non-magnetic—the name having reference to the hypothesis that the traces of magnetism so detected are due to the presence of atoms of iron.

Sideroxylon, *n.* (*Bot.*) A genus of plants, order *Sapotaceae*. The name of Iron-wood is often given to *S. inerme*, a species native to the Cape of Good Hope, on account of the weight and hardness of its wood.

Side-saddle, *n.* A saddle for a woman's seat on horseback.

Side-saddle-flower, *n.* (*Bot.*) See *SARRACENIACEAE*.

Sides'man, *n.* [*Side* and *man*.] An assistant to a church-warden.—One who takes sides; a partisan; a party-man.

Side-table, *n.* A table to be placed at the side of a room.

Side-taking, *n.* A taking sides, or engaging in a party.

Side-view, *n.* An oblique view; a side-look.

Side-walk, *n.* A walk for foot-passengers by the side of a street or road; a foot-way; a trottoir.

Side-ways, **Side'wise**, *adv.* Toward one side; inclining.—Laterally; on one side.

Side-wind, *n.* A wind blowing against the side, or laterally; hence, an indirect effort or means.

Sid'i-Bel-Ab'bes, a town of Algeria, prov. of Oran, 50 m. S. of Oran; *pop.* 6,500.

Sid'ing, *n.* The attaching of one's self to a side or party.—The turn-out or place of passing on a railway.

Sidlaw, or **Sudlaw Hills**, (*sid'law*), a mountain range of Scotland, extending from Kinnoul Hill, near Perth, N.E. to Forfar, at which place is the summit of Dunsinane, 1,400 ft. high.

Sid'le, *v. n.* To go or move sideforemost; to lie on the side.

Sid'month, a seaport-town of England, co. of Devon, on the Sid, 13 m. E.S.E. of Exeter; *pop.* 3,500.

Sidney, ALGERNON, (*sid'ne*), an English statesman and political martyr, was the son of Robert, 2d Earl of Leicester. He distinguished himself at the beginning of the Civil War by his opposition to Charles I.; became a colonel in the Parliament army, and avowed himself a republican. When Cromwell assumed the title of Protector, Sidney retired into private life. In 1683 he was apprehended on a charge of being concerned in the Rye-house plot, tried before Judge Jefferies, most illegally sentenced to death, and executed.

Sid'ney, SIR PHILIP, an English poet, b. 1554, and educated at Oxford. In 1576, he was sent as ambassador to Vienna, where he formed an alliance of the Protestant States of Europe against Spain. On his return he became a brilliant ornament of Elizabeth's court, and wrote the celebrated pastoral, *Arcadia*. In 1585, he was appointed general in the expedition against the Netherlands, where he was killed at the siege of Zutphen, same year.

Sid'ney, in *Illinois*, a post-village and township of Champaign co., 48 m. N.E. of Decatur.

Sidney, in *Indiana*, a post-village of Fulton co., 30 m. N.E. of Logansport.—A village of Marshall co., 115 m. N. of Indianapolis.

Sidney, in *Iowa*, a post-vill. and twp., cap. of Fremont co., 12 m. E.N.E. of Nebraska City.

Sidney, in *Maine*, a post-township of Kennebec, on the Kennebec, N. of Augusta.

Sidney, in *Michigan*, a post-township of Montcalm co., 35 m. N.E. of Grand Rapids.

Sidney, in *Missouri*, a post-village of Ralls co., 15 m. W.S.W. of Hannibal.

Sidney, in *New Jersey*, a post-village of Hunterdon co., 11 m. N.W. of Flemington.

Sidney, in *New York*, a post-village and township of Delaware co., 24 m. N.W. of Delhi.

Sidney, in *Ohio*, a post-village, cap. of Shelby co., 72 m. N.W. of Columbus.

Sidney, in *Virginia*, a village of Augusta co., 11 m. N.E. of Staunton.

Sid'ney Plains, in *New York*, a post-village of Delaware co., 100 m. W.S.W. of Albany.

Sid'on, a town of Palestine. See SAIDA.

Sid'ra, (**Gulf of**), the principal inlet of the Mediterranean Sea, on the N. coast of Africa, between Lat. 30° and 33° N., Lon. 15° and 21° E.

Sie'bengeblirge. [Ger., the seven mountains.] A collection of conical heights in Rhenish Prussia, on the right bank of the Rhine, about 22 miles above Cologne. The highest of the peaks is the Löwenkopf, or Löwenberg, 1,560 feet high; but the most famous is the *Drachenfels*, q. v.

Siedlee, (*seed'lek*), a town of Poland, 55 m. E.S.E. of Warsaw; *pop.* 5,500.

Sieg, (*sreg*), a river of Rhenish Prussia and Westphalia, rising 10 m. N.E. of Siegen, after a W. course of 80 m. joins the Rhine 2 m. N. of Bonn.

Siege, (*sej*), *n.* [Fr. *siege*, from Lat. *sedes*, a seat. See SEAT.] (*Mil.*) The seating, or setting, of an army around or before a fortified place for the purpose of compelling it to surrender, or the surrounding or investing of a place by an army, and approaching it by passages and advanced works, which cover the besiegers from the enemy's fire.

—Any continued endeavor to gain possession.

Siegen, LUDWIG VON, (*se-gen*), the inventor of mezzotint-engraving, b. at Utrecht, 1609; d. abt. 1676.

Sie'gen, a town of Prussian Westphalia, on the Sieg, 38 m. S.S.W. of Arnsberg. *Manuf.* Woollens, cottons, leather, and iron- and steel-ware. *Pop.* 7,000.

Sienna, or **Siena**, (*se-en'na*), a city of Italy, prov. of Sienna, 30 m. S.E. of Florence; Lat. 43° 22' N., Lon. 11° 10' E. It is situated on three eminences on the high road to Rome from Florence, and has a circuit of nearly five miles. The city abounds in superb churches, magnificent palaces, and fine public monuments. It has a university, clerical seminary, and several charities. The city is noted for the purity with which the Italian language is spoken.

Sienna Earth. See TERRA DI SIENNA.

Sienné, (*se-en*), a river of France, dept. of Manche, which, after a W. course of 40 m., flows into the Atlantic 7 m. S.W. of Coutances.

Sien'nese, *n.* (*Geog.*) A native of Sienna.

Sierra, (*se-er'ra*), *n.* [Sp., from Lat. *serra*, a saw.]

(*Geog.*) A term signifying a chain of hills, and prefixed to the names of several mountain ranges in Spain, and countries discovered or colonized by the Spaniards.

Sier'ra, in *California*, a N.E. co., bordering on Nevada; area, 900 sq. m. *Rivers*. N. and Middle Yuba rivers, and Cañon, Kanaka, Sierra, and Oregon creeks. *Surface*, mountains, the Downieville Buttes near the center being about 8,800 ft. high. *Min.* Gold and granite. *Cap.* Downieville. *Pop.* (1897) 5,350.

Sierra Aearai, (*-a-ka-ri'*), a mountain range of S. America, forming a part of the boundary between Brazil and Guiana, between the Equator and Lat. 2° N., Lon. 57° and 59° W.

Sierra de la Platte (*-platt*), the name of a mountain range in the S. E. of Utah, about Lat. 38° N., Lon. between 108° and 110° W.

Sierra de la Vinda, (*-veen'da*), the W. mountain range of the Andes, in Peru, between Lima and the table-land of Pasco, crossed by two passes, abt. 15,000 ft. above the sea.

Sierra Leone, (*-le-one'*, or *lai-o-nai'*), a small British colony on the W. coast of Africa, consisting of a peninsula, 18 m. long and 12 broad, on the coast of Senegambia. It consists generally of one vast, almost impenetrable forest, only particular spots of which have been cleared and cultivated; Lat. of Cape Sierra Leone, 8° 30' N., Lon. 13° 18' W. Sierra Leone was purchased by Great Britain in 1787 from the native chiefs, for the purpose of a settlement for liberated negroes, and to aid in the suppression of the slave-trade. *Cap.* Free Town. *Pop.* 41,806, mostly negroes.

Sierra Ma'dre, a name given to central portions of the great chain of Cordilleras or Rocky Mountains in Mexico, from Lat. 19° to 25° N., and in New Mexico, to the great western range, from Lat. 34° to 35° N. These ranges contain some of the richest silver-mines in the world.

Sierra More'na, in Spain. See MORENA.

Sierra Morina, or BROWN MOUNTAINS, (*-mo-ree'na*), in *California*, extending through San Francisco and Santa Clara cos., the highest peak of which is 3,000 ft.

Sierra Nevada, a mountain range of Spain, in Andalusia, 60 m. long and 25 in breadth, extending from Padul, 12 m. S. of Granada, E. to the prov. of Almería. The principal peaks are Mulhagen and Valeta; the former of which is 11,678 ft. high, and the latter 11,387 ft.

Sierra Nevada, in *California*, a mountain range, stretching N. from the Coast Mountains in Los Angeles co. to the Cascade Range in Oregon. Its highest summit is 14,998 feet.

Sierra Pacaraima, in S. America. See MOUNT PACARAIMA.

Sierra Pari'ma, in Venezuela. See PARIMA (SIERRA).

Sierra Soledad, a mountain range in the S. of New Mexico, between Lat. 32° and 34° N., Lon. 106° 30' W.

Sierra Valley, or SIERRA CITY, in *California*, a post-vill. of Sierra co., 30 m. E. of Downieville; *pop.* abt. 400.

Siest'a, *n.* [Sp.] The name given to the practice indulged in by the Spaniards, and the inhabitants of hot climates generally, of sleeping two or three hours in the middle of the day, when the heat is too oppressive to admit of their going from home.

Sieve, (*siv*), *n.* [A. S. *sife*, *syfe*.] A vessel or utensil for separating flour from bran, or the smaller particles of any substance from the larger.

Sieyes, COUNT EMANUEL JOSEPH, commonly called the ABBÉ SIEYES, a French political philosopher and Consul of France, b. at Fréjus, 1748, gave, by his pamphlets, a great impetus to the French Revolution, and by his councils brought the National Assembly into existence. He was carried along by the torrent, the sluices of which he had opened, vainly endeavoring to control it, and failing, retired for a time during the Reign of Terror. He, however, voted for the King's death, took part in the 18th Brumaire, and was elected Consul along with Napoleon and Ducos. He soon resigned this office, and retired on a pension and an estate. At the Restoration he left France, but returned as a private citizen in 1830. He was author of several political brochures. D. 1836.

Sift, *v. a.* [A. S. *siftan*.] To separate; to part; to separate by shaking or agitating; to separate by a sieve, as the fine parts of a substance from the coarse, as flour from bran; to examine minutely or critically; to scrutinize; to try; to discuss.

Sift'ed, *a.* Separated by a sieve; purified from the coarser parts; critically examined.

Sifter, *n.* One who sifts; that which sifts; a sieve.

Sig'z, *n.* Urine. (Local Amer.; prov. Eng.)

Sigebert, (*sig'bert*), two kings of France, the first born about 535, was the third son of Clothaire I., King of the Franks, whom he succeeded as King of Austrasia, or Metz, 561. He was assassinated at Vitry, at the instance of Fredegonde, mistress of his rival, Childeric, 575.—The second of the name, son of Dagobert I., succeeded to the kingdom of Austrasia 638, d. 656.

Sigel, FRANZ, a Major-Gen. of Volunteers, U. S. army, b. at Zinsheim, Baden, in 1824, was educated at the military school of Karlsruhe, and became Adjutant-Gen. of the army of Baden in 1847, which position he resigned in 1848, becoming Minister of War under the Republican Revolutionary government of Baden organized in that year. After the defeat of the Revolutionists under Mieroslawski, by the Prussians, at Waghäusel and Ettlingen, S. took command and retreated within the fortress of Rastadt, which, being taken soon after, and the Provisional Government overthrown, S. fled into Switzerland, and thence to the U. S. in 1850, obtaining employment as a teacher in New York city, and afterwards, in 1858, in St. Louis, Mo. At the outbreak of the late war in 1861, S. became colonel of the 3d Mo. Volunteers, under Gen. Lyon; was sent with 1,200 men to the S.W.

of Missouri, where, being attacked by a superior force of Confederates, he effected a masterly retreat; took part in the battle of Wilson's Creek, where, on the death of Gen. Lyon, he directed the retreat of the Union army to Rolla; after which he was appointed brigadier-general, and took part in the battle of Pea Ridge. Becoming dissatisfied with Gen. Halleck, who commanded the dept., he resigned in May, 1862, but his resignation not being accepted, he was promoted to major-general, and appointed to a command in Virginia, where he served under Gens. Fremont and Pope, participating in the second battle of Bull Run.

Sigh, (*sī*), *v. n.* [A. S. *sican*; Du. *zuchten*; Ger. *seufzen*; Sansk. *svang*, to move one's self.] To suck in or inhale a larger quantity of air than usual, and immediately expel it; to suffer a single deep respiration; to inhale and expire a long breath audibly, as from grief—To grieve; to mourn; to lament.—To utter a sound like sighing.—*v. a.* To lament; to mourn.

—*n.* (*Physiol.*) A deep inspiration, in which a more than usual volume of air is slowly inspired: it is an action, as is well known, often produced by strong mental affections, but the want of such inspiration is also often produced by the feebleness or imperfection of the normal action of the respiratory functions. According to a popular belief, not yet wholly exploded, a person is supposed to lose a drop of blood with every sigh. Shakspeare alludes to this fallacy when he makes one of his characters talk about "blood-drinking sighs." That the habit of giving way to this state of melancholy is hurtful, by imperfectly inflating the lungs, is undoubted; but as regards the loss of blood at every sigh, the idea is preposterous.

Sigh-born, *a.* Mournful; sorrowful.

Sigh'er, (*sī'ēr*), *n.* A person who sighs.

Sigh'ing, *n.* The act of one who sighs.

Sigh'ingly, *adv.* With sighing.

Sight, (*sīt*), *n.* [A. S. *gesiht*, from *seón*, *geséon*, to see; Ger. *sehen*.] Act of seeing; perception of objects by the eye; view.—Faculty of vision, or perceiving objects by the instrumentality of the eyes. (See below. *§ Physiol.*)—Open view; the state of admitting unobstructed vision; a being within the limits of vision.—Notice from seeing; knowledge.—The organ of seeing; the eye. (*R.*)—A small aperture through which objects are to be seen; as, the *sights* of a quadrant.—That which is beheld; show; spectacle; exhibition.—A small piece of metal fixed on the muzzle of a musket, &c., to aid the eye in taking aim.—A large quantity or number; as, a *sight* of people. (*Colloq.*)

(*Physiol.*) One of the five human senses, having for its organ the *EYE*, *q. v.* In this organ, then, we have the retina, an expansion of the optic nerve, to receive and transmit to the brain the impressions of light; certain refracting media for so disposing the rays of light traversing them as to throw a correct image of an external body on the retina; and a contracting diaphragm, with central apertures for regulating the quantity of light admitted into the eye. When the eye is directed to any object, an image of that object is depicted on the back of the eye by means of the rays of light entering the pupil, and duly refracted by the different humors. The image, which is inverted, produces, somehow, an impression upon the retina with the assistance of the choroid coat, and this impression passes inwards to the nervous centres, whence the optic nerve takes its rise. No satisfactory explanation has yet been given to account for the fact that we see objects erect the images of which are presented to us inverted on the retina. According to Müller, the mind really perceives the objects inverted; but as this inversion is uniform, it is not perceived. The subject of binocular vision, or that with two eyes we only perceive one object, was long a perplexing subject to philosophers, until it was satisfactorily explained by means of that now well-known instrument the *stereoscope*. The power of adapting the eye to vision at different distances has received the most varied explanations; but the opinion now generally entertained is that it depends mainly on some alteration, either in position or form, which takes place in the crystalline lens. Some persons possess this power of adaptation in a very slight degree, and thus labor under defective vision, of which there are two kinds, the person in the one case only seeing distinctly those objects which are near, in the other, only such as are distant. *Near-sightedness* is caused by anything—such as undue convexity of the cornea—which increases the refracting power of the eye, and so causes the image of an object to be formed at a point anterior to the retina, and is remedied by the use of concave glasses. *Long-sightedness*, on the other hand, is owing to conditions the reverse of this, and is remedied by the use of convex glasses, which diminish the focal distance of an image formed in the eye. In order to distinctness of vision, the following conditions are necessary: 1, A sufficiency of light or illumination in the object viewed; 2, the formation of the image exactly on the retina, and not either before or behind; and 3, the minute size of the ultimate divisions of the retina capable of independent sensation. The great superiority of the eye as a medium for perceiving the outer world, lies in this power of independent sensibility to minute points. We judge of the motion of an object partly from the motion of its image over the surface of the retina, and partly from the motion of our eyes following it; and of the form of bodies, partly from the mere sensation, and partly from the association of ideas. There is none of the senses capable of affording so large an amount of instruction and delight as the eye; none in which the judgment has to play so important a part; and none so susceptible of education

(*Law.*) Presentment.—Bills of exchange are frequently drawn payable *at sight* (i. e. on presentation), or a certain number of days *after sight*. In the last case, the time begins to run from the period of presentment and acceptance. *Sight draft* and *Sight bill* are bills payable at sight.

To take sight. To take aim at.—*Field of sight.* The circular space within which objects are visible through a properly adjusted microscope or telescope.

—*v. a.* To come in sight or view of; to obtain a view of, as land.—To look at through an aperture or sight.

—To give a proper direction or elevation to fire-arms or artillery by means of a sight.

—*v. n.* To obtain a view of anything.—To take sight, or aim.

Sight'ed, *a.* Having sight, or seeing in a particular manner; as, near-sighted.

Sight'less, *a.* Wanting sight; blind; that cannot be seen; invisible.

Sight'lessly, *adv.* In a sightless manner.

Sight'lessness, *n.* Want of sight.

Sight'liness, *n.* The state or quality of being sightly.

Sight'ly, *a.* Pleasing to the sight or eye; striking to the eye or view.—Open to the view; that may be seen from a distance.

Sight'-seeing, *a.* Eager for novelties, or for seeing sights.

—*n.* Act of seeing sights or novelties.

Sight'-seer, *n.* A person eager for seeing sights, or for novelties.

Sight'-shot, *n.* Reach of the sight.

Sights'man, *n.* (*Mus.*) One who reads or sings music readily at first sight.

Sig'il, *n.* [Lat. *sigillum*, dim. of *signum*, a sign.] A signature.

Sigillaria, *n. pl.* [N. Lat. from *sigillum*, a seal.] (*Pal.*) An extinct genus of fossil plants found in the coal formation. They are represented mainly by the stems, which have leaf-scars like seal-impressions; whence the name of the genus.

Sigismund, Emperor of Germany, and King of Hungary and Bohemia, was second son of the Emperor Charles IV., and was b. in 1366. On the death of his father, in 1378, he became Margrave of Brandenburg, and was occupied four years in visiting his states, and receiving their homage. He married, in 1386, Maria, daughter of Ludwig Louis, King of Hungary, and was crowned king the same year. He soon after extended his dominions by the conquest of Wallachia. His queen dying in 1392, his claim to the crown of Hungary was contested by Ladislaus V., King of Poland, but unsuccessfully; and the frequent conspiracies formed against S. by the nobles made him suspicious and cruel. Alarmed by the conquests of the Turks, he sought aid of France and England; and a great battle was fought at Nicopolis in 1396, in which the French, under the Count of Nevers, were defeated and almost all slain, the Hungarians fled without fighting, and S. narrowly escaped, and led a wandering life for eighteen months. In 1410 he was chosen emperor by one party of the electors, Jobst, Marquis of Moravia, being chosen by another party, and Wenceslaus, who had been deposed, still retaining the title of emperor. At the same period there were also three rival popes. But the death of Jobst and the acquiescence of Wenceslaus left S. without a rival in the following year. He was crowned at Aix-la-Chapelle in Nov., 1414, and went thence to the great Council of Constance. He surrounded the town with his troops, and remained master of its gates during the Council. The Bohemian reformer, John Huss, had come to Constance under a safe-conduct of the emperor; but he was, nevertheless, burnt, as was also his disciple, Jerome of Prague. S. had a conference with the Pope, Benedict XIII., at Perpignan, hoping to induce him to resign the tiara, but he failed. About the same time he sold Brandenburg to Frederick of Hohenzollern, Burgrave of Nürnberg; raised Savoy into a duchy for Amadeus VIII., and visited France and England. He professed to negotiate a peace between Charles VI. and Henry V., but perfidiously made a secret alliance with the latter, hoping to recover Arles. By the death of his brother, Wenceslaus, in 1419, he succeeded to the crown of Bohemia, and the Hussite war began, which lasted fifteen years. The famous Zisca defeated S. before Prague in 1420, but agreed to a truce, and S. was crowned soon after. After the death of Zisca the war was ably carried on by the two leaders, named Procopius. In 1431, S. was crowned King of Italy at Milan; and in 1433, Emperor of Rome by Eugenius IV. D. 1437.

Sigismund I., King of Poland, called *The Great*, son of Casimir IV., b. 1466, succeeded his brother, Alexander, in 1507; d. 1548.—**SIGISMUND II.**, surnamed *Augustus*, b. 1520, was son of the preceding, and succeeded him in 1548; d. 1572.—**SIGISMUND III.**, surnamed *De Vasa*, b. 1566, was son of John III., King of Sweden, and of Catharine, the daughter of Sigismund I. He was elected King of Poland in 1587, and succeeded to the crown of Sweden in 1594. Being a Catholic, his uncle, Charles, Duke of Sudermania, easily undermined his authority in Sweden, and he lost that kingdom in 1604. In 1610, he succeeded in placing his son, Vladislaus, on the throne of Russia, but was afterwards obliged to succumb, and besides that, was involved in a war with Gustavus Adolphus. D. 1632.

Sig'la, *n. pl.* [Lat.] In printing and in ancient MSS., notes, abbreviations, letters used for words, characters, or shorthand.

Sig'ma, *n.* The Greek letter Σ, σ, ς, corresponding to the English s.

Signaring'en, a town of Prussia, about 30 m. from Constance, which, till 1849, was the cap. of Hohenzollern-Signaringen; pop. 2,500.

Sigmoid, *a.* [From Gr. *sigma*, s, and *eidos*, form.] (*Anat.*) A term applied to the valves which guard the pulmonary artery, named from their resemblance to a segment of a circle.—Also applied to a part of the large intestine—the colon—where it forms a sort of double curve in the pelvis, called the *sigmoid flexure* of the colon.

Sigmoid'al, *a.* (*Bot.*) Having the form of S.

Sign, (*sin*), *n.* [Fr. *signe*; Du. *sein*; Ger. *zeichen*; Goth. *taikns*; Icel. *takn*; Lat. *signum*.] That by which anything is known; something by which another thing is shown or represented; a mark; a note; a character.—A wonder; a miracle; a prodigy; a remarkable transaction, event, or phenomenon.—Something hung or set near a house, or over a door, to give notice of the tenant's occupation, or what is made or sold within.—A memorial or monument; something to preserve the memory of a thing.—A note or token given without words.

"They made signs to his father."—*Luke*.

—Visible representation; a mark of distinction; cognizance.

"Aloft by angels borne, his sign in heaven."—*Milton*.

—Typical representation; a symbol; a type.

(*Astron.*) A portion of the ecliptic or zodiac, containing thirty degrees, or a twelfth part of the complete circle. The first commences at the point of the equator through which the sun passes at the time of the vernal equinox; and they are counted onwards, proceeding from west to east, according to the annual course of the sun, all round the circle. The names of the twelve signs, in the order in which they follow each other, with the characters by which they are indicated on globes, and in the almanacs and books of astronomy, are as follows: *Aries* ♈, *Taurus* ♉, *Gemini* ♊, *Cancer* ♋, *Leo* ♌, *Virgo* ♍, *Libra* ♎, *Scorpio* ♏, *Sagittarius* ♐, *Capricornus* ♑, *Aquarius* ♒, *Pisces* ♓. It is to be remarked, that the above are also the names of the twelve constellations of the zodiac; and in ancient times (more than 200 years before our era), the places of the signs and the constellations were coincident; but owing to the motion of the earth's equator, by which the equinoctial points are carried backwards on the ecliptic about 50-6" annually, the intersections of the ecliptic and equator, and consequently the commencement of the signs, now correspond to different stars, the first point of the sign Aries being at present near the beginning of the constellation Pisces. On this account care must be taken not to confound the signs of the zodiac, which are fixed in respect of the equinoxes, with the constellations, which are movable in respect of those points.

(*Algebra*.) A symbol indicating an operation to be performed, or a relation subsisting between two quantities. Of the former kind, those most commonly used are, + for addition, — for subtraction, × for multiplication, ÷ for division, √ for the square root, ³√ for the cube root, ⁿ√ for the *n*th root, &c. The signs denoting relations are, = equal to, > greater than, < less than, &c.

—*v. a.* To mark; to represent typically; to denote; to signify; to indicate by sign.—To mark with characters, or one's name.

—*v. n.* To communicate intelligence by a sign or signal.

Signa, (*seen'ya*), a town of N. Italy, prov. of Florence, 8 m. from Florence. *Manuf.* Straw bonnets. *Pop.* 5,500.

Sign'al, *n.* [Fr.; L. Lat. *signale*; Lat. *signum*.] A sign that gives, or is intended to give, notice, or to communicate intelligence or orders, or the notice given.—At sea, signals are of very great importance, and they may be divided into three classes;—First, those which are made by the sound of any particular instrument, such as a trumpet, horn, or fife; and to these may be added striking the bell and beating the drum. Second, signals made by displaying pendants, ensigns, and flags of different colors, or by lowering or altering the position of sails. Third, signals which are executed by rockets of various kinds, by firing cannon or small arms, by artificial fireworks, or by lanterns. Very few subjects have engaged the attention of nautical men more than the arrangement of signals. They are numerous and important, and are all communicated in the instructions sent to the commander of every ship of the fleet, or squadron, before putting to sea.—In the army, signals are generally made by the firing of cannon or the sound of trumpet. Balloons, rockets, or semaphores, placed from distance to distance, are also used.—The subject of *railway signals* is one of great importance in its relation to the saving of life and property. The most valuable of these are the signals transmitted by telegraph.

—*a.* Distinguished from what is ordinary; eminent; remarkable; memorable; extraordinary; notable; conspicuous.

—*v. a.* To mark with a sign; to communicate by signals.

Sign'alize, *v. a.* To make signal; to make remarkable or eminent; to render distinguished from what is common.

Sign'ally, *adv.* Eminently; remarkably; memorably; in a distinguished manner.

Sign'alment, *n.* The act of giving a signal, or of communicating by signals; the act of signaling;—hence, description by peculiar, appropriate, or peculiar marks.

Sign'atory, *a.* Relating to a seal; used in sealing.

Sign'ature, *n.* [Fr., from Lat. *signo*, *signatus*. See *SIGN*.] A sign, stamp, or mark impressed; a mark for proof, or proof drawn from marks; a sign-manual; the name of a person written or subscribed by himself.—An external mark or feature, supposed to indicate the nature and characteristics of a person, &c.

(*Mus.*) In writing music in any key with sharps or

flats, the sharps and flats belonging to the key, instead of being prefixed to each note as required, are placed together immediately after the clef on the degrees of the staff to which they belong; and this collection of sharps or flats is called the *signature*.

(*Print.*) A letter or figure at the bottom of the first page of each sheet, to denote the order of the sheet, and to facilitate the arrangement of them for binding.

Sign-board, n. A board on which a person sets a notice of his occupation, or of articles for sale.

Sign'er, n. One who signs or subscribes his name.

Signet, n. [Fr.] A mark; a stamp; a seal. — The seal used by a sovereign in sealing his private letters and grants.

Significance, Significancy, n. [From Lat. *significo*. See SIGNIFY.] That which is signified; meaning; import; that which is intended to be expressed; force; energy; power of impressing the mind; importance; moment; consequence.

Significant, a. [Fr. from Lat. *significans*.] Signifying; expressing or containing signification or sense; standing as a sign of something; betokening something; indicative; expressive or representative of some fact or event.

Significantly, adv. With signification or meaning; with force of expression.

Significate, n. (Logic.) One of the several things signified by a common term.

Signification, n. [Fr.; Lat. *significatio*.] Act of signifying or making known, or of communicating ideas to another by signs or by words, by anything that is understood, particularly by words. — That which is understood to be intended by a sign, character, mark, or word. — Meaning; import; sense.

Significative, a. [Fr. *significatif*.] Betokening or representing by an external sign; having signification or meaning; expressive of a certain idea or thing.

Significatively, adv. So as to represent or express by an external sign.

Significativeness, n. Quality of being significant.

Significator, n. One who, or that which, signifies.

Significatory, n. That which signifies or represents.

Signify, v. a. [Fr. *signifier*; Lat. *significo* — *signum*, a sign, and *facto*, to make.] To make known either by signs or words; to express or declare by a token; to betoken; to point to; to make known; to declare; to proclaim; to intimate; to manifest. — To mean; to denote; to imply; to purport. — To import; to weigh; to have consequence.

— *r. n.* To express meaning with force.

Signior, (seen'yor, n.) See SEIGNIOR.

Sign-man'ual, n. [See MANUAL.] One's own name written by himself; — applied particularly to the signature of a sovereign or prince.

Signor, (seen'yor, n.) [Sp. *señor*; Lat. *senior*, elder.] The Italian term equivalent to the English *Sir* or *Mr.*, the French *Monsieur*, and the German *Herr*.

Signora, (seen-yo'ra, n.) The Italian term corresponding to the English *Madame* or *Mrs.*

Signorina, (seen-yo-re'na, n.) The Italian term answering to the English *Miss*.

Sign-post, n. A post on which a sign hangs, or on which papers are placed to give public notice of anything.

Signor'ney, in Iowa, a city, cap. of Keokuk co., 45 m. S.W. of Iowa City. Pop. (1895) 1,777.

Siiguenza, (se-gwain'tha, n.) (anc. *Segontium*), a town of Spain, 75 m. from Madrid; pop. 5,000.

Sikes'ton, or SIKESTOWN, in Missouri, a post-village of Scott co., 26 m. S.W. of Cairo, Illinois.

Sikhs, (seeks, n. pl.) [Corrupted from Sansk. *sithya*, disciples.] A warlike race of India, who commenced their career as a religious sect, adopting a kind of combination of the Mohammedan and Hindoo creeds. Their dispositions were originally mild, abstracted, and almost philosophic; but persecution, and a cruel death inflicted on two of their chiefs, roused them into fury, and changed them into a race of desperate warriors. While the Mogul power, however, continued in its vigor, they could avenge their wrongs only by hasty and stolen ravages, after which they sought the recesses of the Northern mountains. The seat of their power was principally in Lahore or the Punjab. They attained to their highest pitch of power under Runjeet Singh, at the beginning of the present century; but, after a series of sanguinary conflicts with the British, their territories were definitely annexed to the English East India possessions in 1849.

Sikino, (se-ke'no, n.) an island of the Grecian Archipelago, 20 m. N.W. of Santorini; area, 17 sq. m.; pop. 300.

Sila'o, a town of Mexico, 10 m. N.W. of Guanajuato; pop. abt. 4,000.

Silicales, n. pl. (Bot.) An alliance of plants, subclass *Hypogynous exogens*. DIAG. Monodichlamydeous flowers, a free central placenta, an external embryo curved round a little mealy albumen, and more than one carpel completely combined into a compound fruit. The alliance includes 4 orders, — CARYOPHYLLACEÆ, ILLECEBRACEÆ, PORTULACACEÆ, and POLYGONACEÆ, q. v.

Silence, n. [Fr.; It. *silenzio*; Lat. *silentium*, from *sileo*, to be still or silent.] State of being silent; stillness, or entire absence of sound or noise; state of holding one's peace; forbearance of speech in man, or of noise in other animals; habitual taciturnity; secrecy; stillness; calmness; quiet; cessation of rage, agitation, or tumult; absence of mention; oblivion.

— *a.* To make silent; to oblige to hold the peace; to restrain from noise or speaking; to still; to quiet; to restrain; to appease; to stop; to cause to cease firing

by a vigorous cannonading; as, to *silence* an enemy's batteries. — To put an end to; to cause to cease.

Silence, interj. Be silent! be still! — *Shaks.*

Sil'ne, n. (Bot.) The Catch-fly, Campion, or Fly-bane, a genus of plants, order *Caryophyllaceæ*, with a tubular 5-toothed calyx; 5 notched or bifid petals, which terminate in a narrow claw at the base, spring from the stalk of the germen, and have each an appendage forming a corona in the mouth of the corolla; 10 stamens; 3 styles; the capsule 3-celled, 6-toothed, many-seeded. The species are numerous, mostly natives of the temperate parts of the northern hemisphere, annual and perennial plants; about a dozen of them natives of the U. States, and others frequent in our flower-gardens.

Silent, a. [Lat. *silens*, from *sileo*, to be silent.] Making no noise or sound; still; calm; quiet; not speaking; mute; dumb; speechless; habitually speaking little; taciturn; not inclined to much talking; not loquacious. — Not operative; wanting efficacy; not mentioning; not proclaiming; not acting; not transacting business in person. — Not pronounced; having no sound, as a letter.

Silently, adv. Without speech or words; without noise; without mention.

Sil'entness, n. State of being silent; stillness.

Sile'uns. (Myth.) The foster-father and attendant of Bacchus, and likewise leader of the satyrs. He was represented as a robust old man in a state of intoxication, and riding on an ass, with a can in his hand. He was invested with prophetic powers, and hence became the symbol of wisdom hidden beneath a rough exterior.

Sile'sia, n. (Manuf.) See SECTION II.

Silesia, a prov. of Prussia, having N. the prov. of Posen, E. Poland and Cracow, S. Austrian Silesia, Moravia, and Bohemia, and W. Saxony and Brandenburg; Lat. between 49° 40' and 52° N., Lon. 14° 25' and 18° 12' E. Area, 15,711 sq. m. The surface is mountainous on the S. and S.W., but level and very fertile in the other parts. Rivers, The Oder, the two Neisses, the Bober, Malapane, and Bartsch. Prod. Corn, flax, hemp, beet-root, sugar, tobacco, timber, and madder. Min. Iron, lead, zinc, copper, and coal. Manuf. Linens, cottons, woollen cloth, and hardware. Principal towns, Breslau, Liegnitz, Glogau, Gorlitz, Niesse, Glatz. Pop. 3,843,699. S. became a province of Poland in the 10th century. It was divided and governed by three independent princes in 1163; invaded by the Mongolians in 1241; by John of Bohemia in 1327; and it placed itself under the protection of the King of Bohemia in 1459. Matthias Corvinus, King of Hungary, took possession of Silesia, and extended his protection to the descendants of John Huss, in 1478. It fell to the house of Austria in 1526. S. was conquered by Frederick the Great during the Seven Years' War, and the greatest part of it was ceded to Prussia by the three treaties of 1742, 1745, and 1763.

Silesia, (Austrian.) That part of Silesia which was retained by Austria in 1742, when the province described in the foregoing article was ceded to Prussia. Area, 1,845 sq. m. It is divided into the circles of Troppau and Teschen, and is now completely incorporated with Moravia. See MORAVIA.

Sil'lex, n. [Lat., a flint.] Flint-stone; pure quartz; SILICA, q. v.

Sil'het, or Syl'het, a town of British India, presidency of Bengal, on the Soomah, 120 m. N.E. of Dacca, and 260 m. from Calcutta; Lat. 24° 55' N., Lon. 91° 55' E.

Silhouette, (sil'oo-et, n.) In the fine arts, S. is the representation of the outlines of an object filled with black color, in which the inner lines are sometimes finely drawn in white. The name comes from *Elienne de Silhouette*, a French minister of finance in 1759, who strove to enforce severe economy in the administration. While he was in power, all the fashions in Paris took the character of parsimony. Coats without folds were worn; snuff-boxes were made of plain wood; and, instead of painted portraits, outlines only were drawn in profile, and filled with Indian ink. All these styles were called *à la Silhouette*; and profiles made by tracing the shadow projected by the light of a candle on a sheet of white paper (Fig. 2361) being then much in vogue, have continued to bear the name.

Fig. 2361.

SILHOUETTE.

Silica, SILICIC ACID, (sil'e-ka, n.) [Lat. *sillex*, flint, because it constitutes the chief part of that substance.] S. only forms a single oxide, which has caused a difficulty in deciding on the number of equivalents of oxygen it contains. The theory generally adopted at the present time is, that it is a *binoxide*, and not a *teroxide*, as represented by Berzelius, making the equivalent of silicic acid to be 28.4, instead of 42.72. This view has received confirmation at the hands of Wöhler, who has formed a *silicified hydrogen*, exactly corresponding to carburetted hydrogen. Pure S. occurs in nature, crystallized in six-sided prisms, terminated by six-sided pyramids in rock crystal and some other forms of quartz. It enters largely into the composition of agate, chalcedony, flint, opal, sandstone, felspar, and a vast number of other minerals. In a perfectly pure state it is quite transparent and colorless. Its hardness is next to that of the precious stones, and it has a sp. gr. of 26. It fuses in the oxy-hydrogen blowpipe, and may be drawn into threads like glass. It is insoluble in water when anhydrous, and in all acids except the hydrofluoric. When heated alone, S. is not volatile, but when heated with water, it undergoes partial sublimation at a high temperature. S. presents the general characters of an earthly base, but acts as an acid, forming with the bases

compounds known as *silicates*. These are very abundant in nature; clay, felspar, mica, hornblende, and a large number of other common minerals, are compounds of this description. S. may be obtained pure by fusing one part of finely-powdered quartz or sand in a platinum crucible, with 2½ parts of a mixture in equivalent proportions of the carbonate of potash and soda, the mineral being added to the fused mass from time to time, until the whole of the carbonic acid is driven off. The fused mass is allowed to cool, and is dissolved in very dilute hydrochloric acid, and filtered. It is then evaporated to dryness, and the residue is again heated with hydrochloric acid, and thrown on a filter, washed with hot water, dried, and ignited. In this state it forms a finely-divided gritty white powder, insoluble in water and acids, with the exception of hydrofluoric acid. It may be precipitated in a gelatinous form by the decomposition of fluoride of silica by water, being considerably soluble in that liquid. The history of the hydrates of S. is somewhat complicated. The industrial applications of S. are very numerous. Glass and pottery are compounds of S., with various metallic oxides. It is extensively used in metallurgical operations, as a flux for effecting the decomposition of ores by the formation of a light glassy slag, which floats on the top of the molten metal, carrying with it the impurities contained in the mineral. Form. SiO_2 .

Sil'icate, n. (Chem.) See SILICA.

Sil'icated, n. (Chem.) Impregnated with silica.

Sil'icic Acid, n. (Chem.) See SILICA.

Siliciferous, a. (Chem.) Containing silica.

Silic'ify, v. a. (Chem.) To convert into silica, or to petrify by silica.

Sil'icious, Sil'iceous, a. (Chem.) Belonging to, resembling, or containing silica.

Sil'icite, n. (Min.) A yellowish-white Labradorite.

Sil'icium, n. (Chem.) The former name of SILICON, q. v.

Sil'iciuretted hydrogen, n. (Chem.) See SILICA.

Sil'icle, Sil'icula, n. [From Lat. *siliqua*, a pod.]

(*Bot.*) A short silique, the length of which is not more than twice its breadth, as, for example, that of Shepherd's purse, &c.

Sil'icon, n. (Chem.) The base of silica, discovered by Berzelius in 1823. It was at first supposed to be a metal, and received the name of *silicium*; but from its close analogy to carbon and boron, it is now considered to be a non-metallic element. It is in the form of its only oxide, silica, the most abundant solid element in nature. It is obtained in a state of purity by igniting the double fluoride of S. and potassium with sufficient potassium to combine with the whole of the fluorine. The mass is washed first with cold, and then with hot water. S. thus obtained is a dull-brown powder, sinking in water, in which it is insoluble. It soils the fingers when touched, is a non-conductor of electricity, and is insoluble in all acids but the hydrofluoric. Heated in oxygen or air, it burns with a brilliant flame, being converted into silica, its only oxide. If heated in a closed platinum crucible, its properties become changed. It is now insoluble in hydrofluoric acid, it is decreased in bulk, and may be heated strongly in air and oxygen without taking fire. Deville describes a kind of modification of S., which has the appearance of platinum filings. It is formed by acting with hydrochloric acid or silicic acid of sodium and aluminum. S. unites with hydrogen, forming a gas spontaneously inflammable in air or oxygen. It also forms compounds with sulphur, chlorine, bromine, fluorine, and one or two other elements; but these combinations possess little or no practical interest. *Equiv.* 28.4; *symbol*, Si.

Silic'ulose, a. (Bot.) Pertaining to, or bearing, silicles.

Silique, (sil'lek, n.) [Lat. *siliqua*.] (*Bot.*) A superior 1- or 2-celled, many-seeded, long, narrow fruit, dehiscing by two valves separating from below upwards, and having the seeds attached to two parietal placentas, which are commonly connected together by a spurious vertical dissepiment, called a *replum*. The placentas are opposite to the lobes of the stigma instead of alternate, as is the case in all fruits which are regular in structure. When the replum extends entirely across the fruit, the latter is said to be 2-celled; when only partially, it is 1-celled. Examples occur in the Wall-flower, Stock, Cabbage, Cardamom (Fig. 2362), and in many other plants of the order *Brassicaceæ*. When a fruit possesses the general structure of the silique, but with the lobes of the stigma alternate with the placentas, as in the Celandine, it is termed a *ceratium*, or *siliquiform capsule*.

Siliquel'la, n. (Bot.) A subordinate part of such fruit as the Poppy, composed of the carpel and two extended placentas. *Fig. 2362.*

Sil'iquiform, a. (Bot.) Having the form of a silique.

Sil'iquose, Sil'iquous, a. (Bot.) Bearing siliques, or pods resembling siliques.

Silis'tria, (Turk. Dristra), a fortified town of Bulgaria, on the right bank of the Danube, 63 m. E.N.E. of Rustchuk. In 1854 this town was besieged by the Russians, who, after sustaining a great loss of men, were forced to abandon all hope of taking it.

Silk, n. [A. S. *seole*; Dan. and Sw. *silke*; Russ. *serilk*; Lat. *sericum* (passing into *selikum*); silk; Gr. *serikon*; from *ser*, *seros*, pl. *seres*, the *Seres*, a Chinese people, from whom the ancients got the first silk; *ser*, also, the silk-worm; Fr. *soie*.] A well-known species of glossy thread, spun by the caterpillar of various species of the genus *Bombyx*, of which *Bombyx mori* is that which is more commonly employed for this purpose, and to

Fig. 2362.

which is more especially applied the name of *silk-worm*. The threads as spun by the silk-worm, and wound up in its cocoon, are all double, in consequence of the twin orifice in the nose of the insect through which they are projected. These two threads are laid parallel, and are glued together by a sort of varnish which envelops them, and constitutes 25 per cent. of the weight of the silk. The thickness of the double thread is about the one thousandth part of an inch. It is much the strongest of all textile fibres, a thread of it of a certain diameter being nearly three times as strong as a thread of flax, and twice as strong as a thread of hemp. The color of raw silk is generally bright yellow, but in some varieties it is nearly white. — *Raw silk* is produced by the operation of winding off, at the same time, several of the balls or cocoons (which are immersed in hot water, to soften the natural gum of the filament) on a common reel, thereby forming one smooth even thread. When the skein is dry, it is taken from the reel and made up into hanks; but before it is fit for weaving, and in order to enable it to undergo the process of dyeing, without furring up or separating the fibres, it is converted into one of three forms — viz., *singles*, *tram*, or *organzine*. — *Singles* (a collective noun) is formed of one of the reeled threads, being twisted, in order to give it strength and firmness. — *Tram* is formed of two or more threads twisted together. In this state it is commonly used in weaving, as the *shoot* or *weft*. — *Thrown silk* is formed of two, three, or more singles, according to the substance required, being twisted together in a contrary direction to that in which the singles of which it is composed are twisted. This process is termed *organzining*; and the silk so twisted, *organzine*. — The art of making the fibrous substance of the cocoon available for textile purposes seems to have originated with the Chinese, and to have been practised by them from a very early period. According to the written records of this nation, the art seems to have been known and practised by them 2,700 years before the Christian era. Until the reign of the Emperor Justinian, the silk-worm was only cultivated in China; but the raw material was purchased and manufactured for a long time before by the inhabitants of Persia, Tyre, and other places. Until the reign of Augustus, however, silk was very little used in Europe. In the 6th century, two monks brought some eggs of the silk-worm from China and India to Constantinople, and the Emperor Justinian encouraged them to breed the insect and cultivate its cocoons. Within a short period afterwards, silk manufactures were established at Athens, Thebes, and Corinth, not only for rearing the worm upon mulberry-leaves, but for unwinding its cocoons, twisting their filaments into stronger threads, and then weaving them into cloth. At that time, and for a long period afterwards, the Venetians became the only channel through which the silk produce of the Greek empire was transferred to the Western; and they derived great wealth from the trade. The silk manufacture remained in this state for six centuries; but in 1146, Roger I., King of Sicily, in his conquest of Greece, took many of the people engaged in this branch of industry, and compelled them to continue their avocations in Palermo and Calabria. From these places the silk industry spread throughout Italy, and ultimately reached Spain, from which country it was introduced into France during the reign of Francis I. The cultivation of the silk-worm was not commenced in France till 1564. The mulberry plantations for their propagation were greatly encouraged by Henry IV., and since that period they have been the source of most beneficial employment to the French people. James I. was very anxious to introduce the breeding of silk-worms into England; but it would appear that that country is not well adapted for this species of husbandry, on account of the cold east winds which are so prevalent in April and May, a time when the silk-worm requires a plentiful supply of mulberry-leaves. The manufacture of silk goods, however, made great progress during that king's peaceful reign, and the revocation of the Edict of Nantes, in 1685, contributed in a remarkable manner to the increase of the English silk trade, by the influx of a large colony of skilful French weavers who settled in Spitalfields. But the great European mart for silk manufacture is still, up to the present day, the French city of Lyons. In this country, there had been from the beginning of the century, some importation of raw silk, mostly for the fringe and dress trimming manufacturers, and to some extent also for exportation; in some years it had amounted to \$100,000, \$200,000, and in one year to \$600,000. These new manufacturers now began to import raw silk from China, from Turkey and from Italy; and though they had to contend with unfavorable tariffs, with the general prejudice in favor of imported goods, and with the difficulties attendant upon the employment of unskilled and incompetent workmen, they persevered. In 1850 the Cheney Bros., at Hartford, and South Manchester, Conn., and several manufacturers at Mansfield, at Newton, Groton, Northampton, and other points in Mass., Philadelphia, Baltimore and New York, were doing an increasing business in the manufacture of sewing silk and twist. As yet, there was little done save in sewing silks, dress trimmings, and a few styles of ribbons. But in the next decade (1850-1860) the demand for sewing-machine silk and twist began to increase, and by this time it was found that the best brands of American sewing silks were superior in quality, evenness, strength and color, to the best Italian; pougees, Japanese silks, and other mixed goods were made of as good quality as the imported; handkerchiefs, ribbons and a few pieces of broad goods were put upon the markets, and were creating a demand for more; and

after years of experiment, on the part of the Brothers Cheney, the spun silk made from silk waste, pierced cocoons, etc., were coming into use, and greatly reducing the cost of those goods of which they formed a part. As yet (in 1860) American silk manufacturers had received no protection or aid from the government; indeed, they had been hindered rather than helped, since the moderate duties on manufactured silks were more than counterbalanced by the duties on raw silk, which they needed to have free. But in 1861, the exigencies of the war, requiring the raising of a large revenue, and a heavy duty (40 per cent., afterwards raised to 60 per cent.), was imposed on manufactured silk, while raw silk was admitted duty free. Here was the opportunity for the silk manufacturers, and they improved it. In every direction their enterprise was manifest. Paterson became, to some degree, the Lyons of America, and its forty or fifty silk houses (now over 100) were active and wide awake. In Philadelphia, New York, Boston and Baltimore, as well as in numberless smaller towns and cities, one form or other of the silk industry was established, and profitable work furnished to many thousands of busy workers. The sewing silk and machine twist still continued to be in great demand, and since 1870 has been sold in Europe as well as in other countries; ribbons and scraps of all kinds are manufactured here, and are crowding out the foreign goods; dress trimmings, from the simplest fringe, and the plainest buttons to the richest marabout trimming and bullion fringe, and the costliest of silk buttons, are now manufactured here better and cheaper than the imported goods; lace, in all the varieties of which silk is a constituent—scarfs, veils, nets, etc.—is contesting in our markets the palm with the choicest products of the looms of Nottingham and St. Gall. But the greatest advance has been made in what are known as broad goods—dress silks of all colors, fancy and brocaded silks wrought by the improved Jacquard looms, millinery silks, foulards and spun silks of slight lustre but of great durability and beauty, and at the same time so moderate in price as to be within the reach of all. In color, quality and durability, as well as in beauty, the American silks surpass the French silks of the same grade, with two additional advantages—they are not weighted with dye stuffs, as are the same grade of foreign silks, and hence are of more durable and of more enduring colors, and they are lower in price. — *Rearing of Silk-worms*. Of the several species of mulberry, the white (*Morus alba*) is the best adapted for the feeding of the worms, and is grown wherever silk culture is practiced. The worms are fed on the leaves in some specially favorable localities in the open air, but they are usually reared in specially constructed buildings, the mulberry leaves being gathered and brought to them daily. In tropical countries the natural heat suffices for hatching the eggs, but in Southern Europe artificial heat is usually necessary, and stoves are employed, the temperature being gradually increased during 10 days from 64° to 82°, at which it is maintained until the insects are hatched. The eggs are usually first washed to remove gumminess and other impurities. The worms are fed in trays, in which the leaves are so distributed as to prevent them from crowding each other, the most careful operators chopping the leaves small and spreading them very carefully about. The worms of each brood are kept separate, unless of the same age, lest the stronger insects should deprive the weaker of food. Small bundles of twigs are placed over the trays for the caterpillars to spin in. When ready to spin its cocoon the silk-worm ceases to eat, and begins by producing a loose, rough fiber, which forms the outside of the cocoon. Then the more valuable interior fiber is spun, it being very closely disposed by the movement of the insect's head. This work occupies about 5 days, during which often more than 1,000 feet of thread are produced. The insect then rests in the pupa state for 2 or 3 weeks, at the end of which time the perfect insect forces open the cocoon and emerges. As this, however, is injurious to the silk, the rearer prevents it by killing the pupa with hot water or air, retaining only sufficient cocoons for breeding purposes. In reeling the silk, the natural gum with which it is coated is first softened by steam or hot water, the ends of the threads from 3 to 5 cocoons are caught up and united, and these are combined into one by aid of a reeling apparatus, each cocoon yielding about 300 yards of thread. The rearing of silk-worms has long been attempted in the U. S., but with little success, the profit not being sufficient to attract industry or capital. Silk manufacture, on the contrary, has largely developed, the importation of raw silk having increased from 2,562,236 lbs. in 1880 to 7,510,440 lbs., valued at \$24,325,531, in 1890, and being still on the increase. See **SILK-WORM**. **Silk'-cotton Tree**, *n.* (*Bot.*) See **BOMBAX**. **Silk'-en**, *a.* [*A. S. scolcen*] Made of silk; like silk; soft to the touch; soft; delicate; tender; smooth. — *v. a.* To make soft or smooth like silk. **Silk'-grass**, *n.* See **YUCCA**. **Silk'-iness**, *n.* Quality of being silky; softness and smoothness to the feel. **Silk'-mercer**, *n.* A dealer in silks. **Silk'-mill**, *n.* A mill for spinning raw silk, or manufacturing silk goods. **Silk'-shag**, *n.* A coarse, rough, woven silk, resembling plush. **Silk'-thrower**, **Silk'-throwster**, *n.* One who twists or spins, and prepares silk for weaving. **Silk'-weaver**, *n.* One who weaves silk stuffs. **Silk'-weed**, *n.* (*Bot.*) See **ASCLEPIAS**. **Silk'-worm**, *n.* (*Zool.* and *Sericulture*.) The ordinary

name of the caterpillar of *Bombyx mori*, a lepidopterous insect, type of the genus *Bombyx*, family *Bombycidae*. It was originally from China, and is of a white or cream color, with a brown fascia, and two or more waved lines of a deeper color crossing the upper wings. The males fly swiftly in the evening, but the females are inactive: they live but a few hours after the eggs are deposited on the mulberry trees. The eggs are about the size of mustard-seeds, and the young emerge in a few days, if the weather or air of the breeding-room be warm and dry: when first hatched, they are 1 or 2 lines long, of a dark color, and very soon commence eating voraciously, with short intervals of abstinence during the moultings, until full-grown, when they are about 3 inches long, of a light-green color, with darker marks, blackish head, and fleshy protuberance on the last joint but one; there are 12 segments to the body, 9 stigmata or breathing-holes on each side, and 16 legs, of which the anterior 6 are hooked, and the others, including the 2 on the last segment, end in disks; the mouth has a vertical opening with strong and serrated jaws; the stomach is very large, as would be expected in such a voracious larva. It lives exposed in the wild state, but none of the Chinese or European worms are allowed to incur the risks of life in the open air. According to the experiments of Count Daudolo, 100 newly-hatched silk-worms weigh 1 grain, after the first moult 15, after the 2d 94, after the 3d 400, after the 4th 4,628, and at full size 9,500 grains; each consumes an ounce of mulberry leaves during these stages, about 60,000 times its primitive weight, and its length increases from 1 to 40 lines during the same period; by calculation, the product of an ounce of eggs eats upward of 1,200 lbs. of leaves, and should furnish 120 lbs. of cocoons. The caterpillar *S.* is at first of a dark color, but soon becomes light, and in its tints much resembles the perfect insect. Its proper food is the mulberry, though it will sometimes eat the lettuce and some few other plants. The *S.* is about eight weeks in arriving at maturity, during which period it changes its skin four or five times. For about three days before casting its skin, it is lethargic, refusing its food. On the termination of this period, the old skin opens at the anterior end, the fore-legs are disengaged, and the new and delicately-attired worm escapes forth. Immediately after this renewal, the body of the worm appears gray

Fig. 2363. — THE AILANTUS MOTH,
(*Bombyx cynthia*.)

and somewhat wrinkled, the new coat being made of full size, to admit of future growth; but the latter attribute speedily disappears. After the fourth or fifth casting of its skin, it measures from an inch and a half to two inches long, and for a continuous period of about ten days it eats voraciously, and increases greatly, both in length and thickness. On the expiry of this last-mentioned period it has attained the full size of a *S.*, being from two and a half to three inches long. Its desire for food abates; it nibbles and wastes its leaves; then ceases to eat, and becomes restless to eat and uneasy, seeking a quiet haven in which to spin its silken shroud. In the course of about twenty-four hours from the time of its having ceased to feed, the silky fluid becomes abundantly supplied to the interior reservoirs; the body becomes of a soft yellow, and somewhat transparent towards the neck. The beautiful silken covering, or *cocoon*, as it is called, is generally completed in three or four days. It is commenced by the formation of a loose, decomposed structure, of an oval form, made of what is denominated *floss-silk*. Within this, in the course of the ensuing days, the firmer cocoons are constructed. These are rounded, somewhat oval balls, varying in tint, some being of a golden tint, some of a straw color, and others, again, white. The included worm, having finished its labors, casts its skin once more, but never appears again as a caterpillar, as it now assumes that rounded, shapeless form termed *chrysalis*. In the chrysalis state it remains a fortnight or three weeks. It then bursts its horny cases, coming forth as a moth into the hollow chamber of the cocoon. The moth subsequently emits a fluid, which has the effect either of dissolving the gum or the threads at one end of the cocoon. The length of the thread in a cocoon varies from six hundred to a thousand feet. In 1856, another species of the same genus, *Bombyx cynthia* (Fig. 2363-4), was introduced into Europe, which proved to be a happy rival to the mulberry-feeder. The Piedmontese Abbé Fantoni obtained its worms from the N. of China, and sent them to France, where they succeeded perfectly. This new silk-producer feeds on the *Ailanthus glandulosa*, a hardy tree, which stands the severest winters and longest draughts without injury, grows well in any climate, thrives in almost any soil, and has been naturalized and widely propagated in this country as a shade-tree, where

it is, nevertheless, rather an object of aversion than of real benefit, on account of the peculiar odor it emits when in blossom. The *B. cynthia* produces two crops per annum, and would easily produce three in such countries as California, where the season is longer, and the foliage

Fig. 2364. — AILANTUS SILK-WORM AND COCOON.

more plentiful in the autumn. Its eggs are nearly twice as large as those of the *B. mori*, equally large at both ends, and of a white color, with a black mark, caused by the germ inside the egg. The cocoons are elongated, of a pale-gray color, and are reeled off in one continuous thread. The *Cynthia* cocoon yields *flosselle*, or floss-silk. It is manufactured in France under the name of *galette*, or *fantaisie*. According to French report, "the silk produced by the *Ailanthus* lasts double that of the mulberry. It does not spot so easily; and it washes like linen." See *The Silk-worm*, Riley, Washington, D.C., 1879.

Silk'y, a. Made of silk; consisting of silk; like silk; soft and smooth to the touch.

Sill, n. [A. S. *syl*: Lat. *solum*, the ground, the lowest part of anything, the foundation; Fr. *seuil*; It. *saglia*, a threshold.] (Arch.) A piece of timber on which a building rests; the timber or stone at the foot of a door; the threshold; the timber or stone on which a window-frame stands; or the lowest piece in a window-frame. See GROUND-SILL.

Sillabub, n. [Etymology uncertain.] (*Drinks*.) A liquor made by mixing wine or cider with milk, and thus forming a soft curd. (More frequently written SYLLABUB.)

Silla de Caracas, (seel'ya-da-ka-rah'kas,) a mountain of Venezuela, near Caracas, 8,700 feet high.

Silly, adv. In a silly manner; foolishly; without the exercise of good sense or judgment.

Sillimanite, n. [Named after Professor Silliman.] (*Min.*) An anhydrous silicate of alumina, found in a vein of gneiss at Chester, near Saybrook, in Connecticut. It is of a dark-gray color, passing into clove-brown, and either occurs in slender prisms, which are flattened and striated, or fibrous, columnar, or compact and massive.

Silliness, n. State or quality of being silly; weakness of understanding; want of sound sense or judgment; simplicity; harmless folly.

Sillon, n. (*Fort.*) A work raised in a ditch to defend it if too wide. It may be of any form, but must be lower than the works of the place, and higher than the covered way.

Silly, a. [A. S. *sæli*, *sælig*, *gesælig*, happy.] Inoffensive; harmless; artless; weak in intellect. — Destitute of ordinary strength of mind; witless; senseless; foolish; stupid; shallow; proceeding from want of understanding or common judgment; characterized by weakness or folly; unwise; indiscreet; imprudent; as, a silly person, a silly thought. [ENSILAGE.]

Silo, n. A pit or subterranean repository for grain. See **Silo'am**, (*John* ix. 7, 11.) or **SHILOAH**, (*Neh.* iii. 15; *Isa.* viii. 6); a fountain and pool at the base of the hill Ophel, near the opening of the Tyropeon into the valley

Fig. 2365. — FOUNTAIN AND POOL OF SILOAM.

of the Kidron on the south of Jerusalem. The small upper basin, or fountain, excavated in the rock is merely the entrance, or rather the termination, of a long and narrow subterranean passage beyond, by which the water comes from the Fountain of the Virgin.

"Siloam's brook, that flowed
Fast by the oracle of God." — Milton.

Silo'am, in *N. Carolina*, a village of Surry co., 141 m. W.N.W. of Raleigh.

Siloam, in *New York*, a post-village of Madison co., 110 m. N.W. of Albany.

Silphium, n. (*Bot.*) A genus of plants, order *As-teraceæ*, of which the most interesting species is the Compass-plant, *S. laciniatum*, the leaves of which are said to present their faces uniformly N. and S., a statement which needs confirmation. The plant is also known as Pilot-weed, Polar-plant, Rosin-weed, and Turpentine-weed — the latter named from the abundant resin exuded by its stems, which grow to a height of three to six feet, as well as by the leaves, which are deeply pinnatifid. It is common in the U. States to Texas, producing columns of smoke in the burning prairies by its copious resin.

Silt, n. [Sw. *sylta*, to pickle.] A deposit of mud or fine earth from running or standing water.

— *v. a.* To choke or obstruct by accumulation of mud, clay, sand, or earth.

— *v. n.* To ooze or percolate, as muddy water.

Silty, a. Of the nature of silt.

Silures', n. pl. (*Eng. Hist.*) The early inhabitants of South Wales.

Silurian System, n. (*Geol.*) A name first applied by Murchison to a series of fossiliferous strata lying below the Old Red Sandstone, and occupying that part of Wales which once constituted the kingdom of the *Silures*. It comprises the oldest fossiliferous strata as yet known to geologists. During the last twenty years they have undergone a most minute and careful survey. The system, although consisting in the main of alternate flagstones and sandstones, of argillaceous and calcareous shales, of clayey limestones and limestones of a concretionary character, has been divided into lower and upper groups, which have been sub-divided variously in different countries. In America, geologists generally have adopted that sub-division into periods and epochs which is derived from the succession of rocks in the State of New York, where the strata are well displayed and have been carefully studied. For the order of succession in the Silurian periods and rocks. See Fig. 1142.

Siluridae, n. pl. (*Zoöl.*) A family of malecopterygious fishes, the type of which is the genus *Silurus*, comprising species of large size, *S. glanis* (Fig. 2366), of the rivers of Germany and Hungary, sometimes exceeding 6 ft. in length, and 300 pounds in weight. They are chiefly distinguished by the want of true scales, having merely a naked skin, or large osseous plates. A strong osseous spine forms the first ray of the dorsal and pectoral fins, except in the genus *Malapterus*, which includes the Electrical *Silurus* of the African rivers, whose power of giving electrical shocks appears to derive from a particular tissue situated between the skin of the sides and the muscles. The genus *Pimelodus* contains the Cat-fishes of the U. States, of which there are about 30 species. The Cat-fish of the Great Lakes, *P. nigricans*, is from 2 to 4 feet long, and attains the weight of 30 pounds. The common Horn-pout, or Horned Pont, *P. atrarius*, is from 6 to 10 inches long, and abounds in ponds and slow streams.

Fig. 2366. — SILURUS GLANIS.

Silurus, n. (*Zoöl.*) See SILURIDÆ.

Silvan, a. [From Lat. *silva*.] Pertaining to a wood or grove; inhabiting woods; woody; abounding with woods. See SYLVAN.

Silvan, in *Michigan*, a village and township of Washtenaw county, about sixty miles west of Detroit.

Silvas, n. pl. [Lat. *silva*, a wood.] A tract covered with forest vegetation, occupying at least a million of sq. m. in the tropical part of S. America. A fifth part of this vast area is annually subject to inundation, and the exuberance of animal and vegetable life resulting from such conditions renders the whole district almost hopelessly unapproachable by civilized man. This tract is chiefly on the course of the Amazons, and the group of rivers connected with it.

Silver, n. [A. S. *seolfer*, silver.] (*Chem.*) This beautiful metal has been known from the earliest ages, and has always been highly valued for its rarity, beauty, lustre, and permanence. It is of a white color, with a slight tinge of red. It is between iron and copper in point of hardness, and is very tenacious. It may be hammered into thin leaves and drawn into very fine wire. It fuses at about 1873° F., expanding forcibly at the moment of solidification. It is one of the best known conductors of heat and electricity, and is not oxidized at any temperature, even in the presence of moisture. When perfectly pure, it has the property of absorbing oxygen mechanically at its melting-point, giving it off with effervescence at the moment of solidification; — hence, the bubbly appearance of the surface of ingots of the pure metal. It has a powerful affinity for sulphur, speedily turning black in atmospheres containing notable portions of sulphuretted hydrogen. Alloyed with certain proportions of copper, to give it increased hardness and tenacity, it is adopted by all civilized nations for purposes of coinage and for articles of plate. From its purity of color, it is the most perfect reflector known, and is always employed for reflecting surfaces when practicable. — *S.* occurs in nature in the native state, crystallized in cubes and forms derived therefrom. It is not uncommon, though not in large masses, in the

silver-bearing veins of the Western States and Territories of the United States. It is more generally alloyed with gold, arsenic and antimony. The native alloy in the great Comstock Lode of Nevada, contains about forty-three per cent. of silver, the rest being gold. The galena ores of the United States, with the exception of those of the Mississippi valley, nearly all contain silver in quantities varying from 0.10 to 3.0. In the case of argentiferous copper, it is found with a certain amount of lead. The alloy is heated gradually, so that the lead melts out and flows away, carrying with it the silver, and leaving behind a spongy mass of copper. The argentiferous lead is then submitted to cupellation. The rich ores, such as the sulphides already mentioned, are reduced by the process of amalgamation. The sulphide of silver is converted into chloride by mixing the ore in a finely-divided state with chloride of sodium and roasted copper pyrites. The chloride of copper formed acts on the sulphide of silver, converting it into chloride. Mercury is added to the mass, which decomposes the chloride of silver, and the amalgam so formed is distilled. There are several other methods of separating silver from its ores, for an account of which the reader is referred to Abel and Bloxam's *Handbook of Chemistry*. The only alloy of silver worth noting is that used for coinage, the standard for which in this country, as fixed by law, is 11.1 parts of silver and 0.9 of copper. To increase the beauty and usefulness of many articles made of the baser metals, they are often covered with a coating of silver by different processes. *Plating*, properly so called, consists in covering a clean sheet of copper with a thin film of silver, by washing over it a solution of lunar caustic. A plate of silver rather larger than the plate of copper is then laid upon it and the edges turned over. The two are heated to a dull redness, and passed through powerful rollers. The process of *electro-plating* has already been described under that head. Of late years, silver has been substituted for mercury in the silvering of glass in numerous instances. The deposition is effected by pouring over the glass a mixture of alcohol, nitrate of silver, carbonate of ammonia, and ammonia, to which has been added a few drops of essential oil of cloves. A gentle heat is applied for two or three hours, until the whole of the surface is coated, after which the residue is poured off, and the film of silver is dried and varnished. Grape sugar and Rochelle salt are sometimes added instead of the essential oil. Copper and brass are *silvered* either by rubbing over their cleaned surface a mixture of cream of tartar, chloride of silver, and corrosive sublimate, or by agitating them in mercury in which silver is dissolved. By the application of heat, the mercury is expelled, leaving the silver behind as a very thin film. Chemically pure metallic silver may be obtained by dissolving standard silver in nitric acid; the solution is filtered, and pure chloride of sodium added until the whole of the silver is thrown down. The precipitate is then washed in distilled water until the washings are tasteless. The chloride is then mixed with one-fourth of its weight of oil of vitriol, and bars of zinc are placed in the mass. The zinc gradually reduces the chloride to the metallic condition. It is then washed with sulphuric acid, and lastly with water, until the washings give no precipitate with nitrate of silver. The reduced silver thus obtained is not absolutely pure: it is therefore once more dissolved in pure nitric acid, precipitated by pure hydrochloric acid, and reduced by fusion in a deep clay crucible, with 70.4 per cent. of chalk and 4.2 per cent. of powdered charcoal, for an hour and a half. *Eq.* 108; *sp. gr.* 10.53; *symbol*, Ag. See PRECIOUS METALS.

Aceto-nitrate of S. (Phot.) The so-called aceto-nitrate of silver, used in photography, is made by adding 1½ drachms of glacial aceto-acid to 50 grains of nitrate of silver, dissolved in one ounce of water.

Ammonio-nitrate of S. (Phot.) The so-called ammonio-nitrate of silver, used in photography, is made by adding strong liquor ammonia to a solution of nitrate of silver, until the precipitate formed is redissolved.

Bromide of S. (Chem.) It may be formed by precipitating a solution of the nitrate with bromide of potassium. It is of a light-yellow color, is insoluble in water, and less soluble in ammonia than the chloride. It dissolves readily in bromide of potassium and other soluble bromides, forming with them double salts, and in hyposulphate of soda. It is one of the constituents of the sensitive film used in the collodion process. It occurs in nature as *bromite*, at Santa Fiora, in Mexico, and in combination with chloride of silver as *enobolite*, in Chili, Mexico, and Honduras. *Form.* AgBr.

Chloride of S. (Chem.) There appears to be two chlorides of silver — the ordinary chloride, AgCl, and the sub-chloride, Ag₂Cl. Chloride of silver is formed as a dense white flocculent precipitate, by adding hydrochloric acid, or a solution of any soluble chloride, to a soluble salt of silver. It is insoluble in water and dilute acids. It is dissolved by boiling hydrochloric acid, and by strong solutions of the alkaline and earthy chlorides, with which it forms double salts. It melts at 500° into a horny mass; hence its old name of *horn-silver*. It is easily reduced by hydrogen, when heated, and by zinc, iron, and most of the easily oxidizable metals when moist. Cyanide, iodide, and bromide of potassium dissolve it with the formation of double salts. It is also soluble in solutions of the hyposulphates, forming compounds having an intensely sweet taste. In combination with organic matter, it possesses the property of being blackened by light; hence its use in photography. It is found native in most silver-mines as *kerute*, or *horn-silver*. The sub-chloride is obtained by digesting leaves of pure silver in chloride of copper, or perchloride

of iron. It forms black scales, which are not acted on by nitric acid.

Iodide of S. (Chem.) It is formed by precipitating the nitrate by iodide of potassium. It is a pale-yellow substance, insoluble in acids, and nearly so in ammonia. It dissolves readily in iodide and cyanide of potassium, forming double salts. Its sensitiveness to light renders it of great use in photography. It occurs in nature as *iodite*, in thin flexible plates, in Mexico, Chili, and Spain.

Nitrate of S. (Chem.) This important salt is made by dissolving silver in strong nitric acid. It crystallizes in square anhydrous colorless tables, and dissolves in an equal weight of water. It fuses when heated, and may be cast in cylindrical moulds, in which form it is used by surgeons as an escharotic, under the popular name of *lunar caustic*. When perfectly pure, it undergoes no alteration when exposed to light; but if the smallest portions of organic matter be present, it darkens perceptibly. When exposed to light in contact with organic matter, as in the ordinary photographic processes, it forms a dark brownish-purple compound of an organic nature, whose composition is at present but little understood. For photographic purposes, it must be perfectly neutral and pure, free from contaminations of nitric acid and organic matter. For this purpose, the ordinary so-called pure nitrate should be carefully fused and recrystallized. It is also used as a source of silver in the electrolytic process, in silvering glass and in marking-ink.

Oxides of S. (Chem.) There are three oxides of silver—the *sub-oxide*, Ag_2O , is a dark powder, formed when nitrate of silver is heated in a current of hydrogen; the *protoxide*, Ag_2O , procured by adding a solution of potash or soda to the nitrate when it falls, as a brown hydrate; and the *peroxide*, Ag_2O_2 , a compound formed in gray circular crystals when a dilute solution of nitrate of silver is decomposed by the voltaic current. The protoxide is a powerful base, combining with the acids to form neutral salts. It is soluble to a slight extent in water, to which it communicates a feeble alkaline reaction.

Phosphates of S. (Chem.) Silver from several phosphates, but they are unimportant.

Sulphate of S. (Chem.) When the metal is boiled in sulphuric acid, a portion of the acid is decomposed, and sulphate of silver is formed. It may be obtained in rhombic prisms, which dissolve in ninety parts of water. It is a very stable salt, requiring a greater heat for its decomposition than the sulphates of copper and iron.

Sulphide of S. This compound is the principal ore of silver, and is found native, crystallized in cubes and octahedra, as well as in massive concretions. It has a metallic lustre, from which it derives its mineralogical name, *Silver glance*. S. of S. is also found in combination with other sulphides, especially those of copper and silver. Metallic silver has a very powerful affinity for sulphur, the metal becoming blackened by exposure to an atmosphere containing sulphuretted hydrogen in the gaseous state, even though largely diluted with air. S. of S. may be prepared chemically by transmitting a current of sulphuretted hydrogen through a solution of the nitrate, or by fusing metallic silver with excess of sulphur in a crucible. In a massive form, S. of S. is to a certain extent malleable, and will take impressions from a die.

Silver, a. Made of silver; white like silver; white or pale; of a pale lustre.—Soft and clear, as tones.

—**v. a.** To cover superficially with a coat of silver; to foliate; to cover with tinfoil amalgamated with quicksilver; to adorn with mild lustre; to make smooth and bright.—To make hoary; as, *silvered locks*.

Silver-bell-tree, (Bot.) n. Same as the Snow-drop. See *HALESIA*.

Silver City, in Idaho, a post-village, cap. of Owyhee co., 1 m. W. of Ruby City.

Silver City, in Nevada, a post-village of Lyon co., 2 m. N.W. of Dayton.

Silver Creek, in Illinois, enters the Kaskaskia River at Athens, in St. Clair co.—A twp. of Stephenson co.

Silver Creek, in Indiana, flows into the Ohio River from Clark co.—A township of Clark co.

Silver Creek, in Iowa, a township of Mills county.

Silver Creek, in Michigan, a township of Cass county.

Silver Creek, in Minnesota, a post-township of Wright co., 7 m. N.W. of Monticello.

Silver Creek, in Mississippi, flows into Sunflower River from Washington co.—A post-vill. of Lawrence co.

Silver Creek, in Missouri, a township of Randolph co.

Silver Creek, in New York, a post-village of Chautauqua co., 31 m. S.W. of Buffalo.

Silver Creek, in Ohio, a township of Green county.

Silver-fir, n. See *FIR*.

Silver-fish, n. (Zool.) A small species of carp, striped with silvery lines.

Silver Glance, n. (Min.) A valuable ore of silver; composed of 87.1 per cent. of silver, and 12.9 sulphur. It is of a blackish-gray color, but acquires a superficial iridescent tarnish on exposure; opaque, with a metallic lustre; flexible, but difficultly frangible; malleable and sectile, yielding easily to the knife, and cutting like lead. It is found in various cubical forms.

Silvering, n. The art or operation of covering the surface of anything with silver; the silver thus laid on. See *SILVER*.

Silver Lake, in Wyoming co., New York. It is 3 m. long, and its surplus waters flow into Genesee River.

Silver Lake, in Pennsylvania, a post-township of Susquehanna co., 9 m. N.W. of Montrose.

Silver-leaf, n. Silver beaten into a thin leaf.

Silverly, adv. With the appearance of silver.

Silver Mountain, in California, a village, former cap. of Alpine co., 56 m. E. of Placerville.

Silverside, n. (Zool.) The common name of the genus of fishes *ATHERINA*, *q. v.*

Silversmith, n. One whose occupation is to work in silver.

Silver Spring, in Pennsylvania, a village and township of Cumberland co., 10 m. W. of Harrisburg.—A post-village of Lancaster co.

Silverton, in Oregon, a post-village and township of Marion co., 15 m. E. of Salem.

Silverville, in Indiana, a post-village of Lawrence co., 10 m. W. of Bedford.

Silver-weed, n. (Bot.) A fine American plant of the genus *Potentilla*, found in meadows and rocky hills in the Northern states; *P. anserina*.

Silvery, a. Like silver; having the appearance of silver; white; of a mild lustre; besprinkled or covered with silver.

Silvester I., POPE, was elected in 314. The Arian heresy commenced in his pontificate, and he distinguished himself against the Donatists. D. 336.

SILVESTER II., was at first a monk in Auvergne; but his superior talents exciting the envy and hatred of his companions, he withdrew from the monastery and went to Spain. The Duke of Barcelona took him to Italy, where he was noticed by the Emperor Otho, who gave him an abbey, which he afterwards quitted, and, proceeding to Germany, became preceptor to Otho III. He was afterwards tutor to the son of Hugh Capet, by whom he was made archbishop of Rheims. By the interest of Otho, he gained the papacy in 999. He was a man of considerable learning, particularly in the mathematical sciences. D. 1003.

Silveyville, in California, a post-village of Solano co., 20 m. N.E. of Suisan City.

Silybum, n. (Bot.) A genus of plants, order *Asteraceæ*, the most familiar of which is *S. marianum*, the Milk Thistle, which grows to the height of three or four feet or more, with large spreading wavy spinous leaves, of which those next the root are pinnatifid, and variegated with green and milk-white. The specific name *Marianum* was given to this plant to preserve the legend that the white stain on the leaves was caused by the falling of a drop of the Virgin Mary's milk.

Simaba, (sim-a-ba,) n. [Its native name.] (Bot.) A genus of the order *Simarubaceæ*. The seeds of the species *S. cedron* are highly esteemed throughout Central America for their febrifugal properties.

Simar, Simare, Cimar, Cymar, n. [Fr. sinarre.] A woman's long gown or robe.—Also, the outer robe of a Protestant bishop.

Simaruba, n. (Bot.) The typical genus of the order *Simarubaceæ*. The species *S. amara*, the Mountain Damson, is a native of South America and the West Indies. The bark of the root acts like a tonic, and has been employed medicinally in diarrhoea, dysentery, &c.

Simarubaceæ, n. pl. [Simaruba, its Caribbean name.] (Bot.) The Quassia family and order of plants, alliance *Rutales*. **DIAG.** Few-seeded, finally apocarpous fruit, whose pericarp does not laminate, a dry inconspicuous torus, exalbuminous seeds, and alternate leaves without stipules.—They are trees or shrubs, found in the tropical parts of India, America, and Africa. A bitter principle is the most remarkable characteristic of the order. See *PICRAMMA*, *QUASSIA*, *SIMARUBA*.

Simbirsk', a city of Russia in Europe, cap. of a government of the same name, on the Volga, near the confluence of the Sviaga, 430 m. S.E. of Moscow; Lat. 54° 18' 49" N., Lon. 48° 22' 15" E. Pop. 24,837.

Sim'blot, n. [Fr.] (Weaving.) The harness of a draw-loom.

Simcoe, (sim'kō,) in prov. of Ontario, a lake abt. 30 m. long, and about 18 broad at its widest part, situate between Lake Ontario and the arm of Lake Huron called Georgian Bay, into which it discharges its waters through Lake Gongichin and the Severn. It contains numerous islands, and generally frozen over in the winter, so as to be passable with safety for sleighs.—A co. between the above lake and Georgian Bay; area, 1,797 sq. m. Cap. Barrie. Pop. abt. 57,500.—A town, cap. of Norfolk co., 8 m. N. of Lake Erie; pop. abt. 1,900.

Sim'con. (Script.) The second son of Jacob and Leah. When he and his brethren went into Egypt to buy corn, his brother Joseph insisted on Benjamin, the youngest brother, being brought to him, and detained Simeon as a hostage for his forthcoming. He gave his name to one of the Twelve Tribes, which dwelt to the north of the territory occupied by the tribe of Judah. B. about 1755 B. C.

Simeon, surnamed STYLITES, a Christian fanatic who acquired immense fame by passing the last forty-seven years of his life upon the tops of ruined pillars. He flourished, if such a word is at all applicable to him, from 392 to 461. A second saint of the name dwelt on his pillar sixty-eight years, but the former was the original inventor of this pastime.

Simiade, (sim'e-a-de,) n. [Lat. simia, an ape.] The name of a quadrumanous family of mammalian animals, which embraces the most highly developed forms of the monkeys. They are all of them inhabitants of the old world. The nostrils are divided by a narrow septum; they possess opposite thumbs on their fore- and hind-feet; the callosities on the rumps are generally naked. Some of the species only are furnished with cheek-pouches. The S. are divided into two groups:—1. The Tailless, or Apes, comprising the Chimpanzee, the Gorilla, and the Orang-outang; 2. The Tailed monkeys, including all the true monkeys of the old world.

Similar, a. [Fr. similaire, from Lat. similis, like.] Like; resembling; having a like form or appearance; having like qualities.

(*Geom.*) Similar figures are those which have the same shape. More accurately defined, similar rectilinear figures or polygons are such as have their angles respectively equal, and the sides about the equal angles proportional. Of these two conditions, triangles alone necessarily satisfy the one when they satisfy the other.

Similarity, n. State of being similar; likeness; resemblance; similitude; uniformity.

Similarly, adv. In like manner; with resemblance.

Sim'ile, n. [Lat., from similis, like.] (Rhet.) A figure by which two things are considered with regard to a third, that is common to both. Similes serve two purposes: when addressed to the understanding, their purpose is to instruct; when to the heart, their purpose is to please. To have a just notion of S. they must be distinguished into two kinds; one common and familiar, as where a man is compared to a lion in courage, and another more distant and refined, as where two things which have in themselves no resemblance or opposition are compared with respect to their effects; as where a comparison is instituted between a *flower* and a *song*, with reference to the emotions they produce in the mind.

Similitude, n. [Fr.; Lat. similitudo, from similis.] Likeness; resemblance; similarity; likeness in nature, qualities, or appearance; comparison; simile.

(*Geom.*) The relation which similar figures bear to each other. The centre of similitude of two similar figures, is a point such that like or oppositely directed radii vectores from it to the two figures are proportional.

Sim'lor, n. [Fr.] A golden-colored variety of brass.

Sim'ious, a. [Lat. simia, an ape.] Relating to, or resembling, a monkey.

Sim'ner, v. n. To boil gently, or with a gentle hissing.

Simms, WILLIAM GILMORE, an American author, b. in Charleston, S. C., 1806. At a very early age he exhibited evidences of his literary abilities in short verses narrating the exploits of the American army during the War of 1812. Owing to the reduced circumstances of his family and a sickly childhood, his early education was very simple. After serving for several years as an apprentice in a Charleston drug and chemical establishment, he at eighteen years of age began the study of law. At twenty he was married, and at twenty-two admitted to the bar. One year's experience in the practice of his profession sufficed to weary him of it, and he quitted it in 1828 to become editor and part proprietor of the *Charleston City Gazette*.—He had previously, in 1825, published a *Monody on the Death of Charles Cotesworth Pinckney*, and two volumes in 1827, entitled *Lyrical and other Poems*, and *Early Lays*. These were followed in 1829 by *The Vision of Cortez*; *Caius*, and other *Poems*; and in 1830 by *The Tricolor*; or, *Three Days of Blood in Paris*. The *Gazette*, during the nullification troubles in S. Carolina, having espoused the cause of the Union, involved its proprietors in much pecuniary trouble, and in 1832 S. found himself nearly penniless. Having about the same time lost his father and his wife, he left Charleston for the North. At Hingham, Mass., where he resided for some time, he prepared the largest, best known, and most liked of all his poems, *Atalantis, a Story of the Sea*, published at New York, in 1833. In the same year appeared his first prize-tale, *Martin Faber, the Story of a Criminal*. From that date down to within a few years ago, S. has been one of the most prolific and industrious of modern authors. He has written and published in rapid succession volumes of poetry, romance, history, biography, and miscellaneous literature, many of which have obtained a wide popularity. His poetical works, in addition to those enumerated above, comprise *Southern Passages and Pictures* (1839), *Donna Anna* (1843), *Grouped Thoughts and Scattered Fancies* (1845), *Lays of the Palmetto* (1848), and a series of ballads illustrating the deeds of the S. Carolina soldiers during the war with Mexico; *Poems—Descriptive, Dramatic, Legendary, and Contemplative* (2 vols. 1854); *Areytos*; or, *Songs and Ballads of the South*, in 1860, and a number of occasional pieces. He also wrote two dramas, *Norman Maurice*; or, *the Man of the People*, and *Michael Bonham*; or, *the Fall of Alamo*. S., nevertheless, was best known and will be longer remembered as a writer of prose romances. No American writer in his productions has drawn more largely from local and revolutionary history. His contributions to imaginative fiction are very numerous, and many of them have enjoyed great popularity. To the departments of history and biography he contributed a *History of S. Carolina*; *S. Carolina in the Revolution*; *A Geography of S. Carolina*; and *the American Loyalists of the Revolutionary Period*. S. occasionally mingled in politics, but since 1845 he held no public position. He passed the last years of his life in comparative retirement at Savannah, and in a style in keeping with his fortunes, which were sadly impaired by the late war. Died in 1870.

Simms, in Illinois, a village of Edgar co.

Si'mon, called the brother of JESUS, was the son of Cleophas, and elected bishop of Jerusalem after the death of St. James, A. D. 62. In the reign of Trajan he was put to death by being crucified, in 107.

Simon, (St.,) an apostle of Jesus Christ, was called the *Canaanite*, or *Zelote*. He preached the gospel in Egypt, Libya, and Mauritania, and suffered martyrdom in Persia. He is by some supposed to be the same with the preceding.

Simon, JULES, a French philosopher, b. at L'Orient, 1814, was one of the most brilliant pupils of Cousin. He became Professor of History and Philosophy at the Sorbonne in 1839. He was elected a member of the French Academy in 1875, and senator for life in the same year.

In Dec. 1876, he became Minister of the Interior and President of the Council, and resigned on May 16, 1877. His principal works are: *Histoire de l'Ecole d'Alexandrie*, 2 vols., 1844-45; *Le Devoir*, 1854; *La Religion Naturelle*, 1856; and *La Liberté de Conscience*, 1857.

Simoni'ac, n. [Fr. *simoniaque*.] One guilty of simony; one who buys or sells preferment in the church.

Simoni'acal, a. Guilty of simony; consisting in simony, or the crime of buying and selling ecclesiastical preferment.

Simoni'acally, adv. With the guilt or offence of simony.

Simonides, (si-mon'i-dees.) a celebrated Greek lyric poet, born in the island of Ceos, B. C. 556. He lived at Athens during the reign of Hipparchus, and spent his last years at the court of Hieron of Syracuse. S. especially excelled in the elegy and epigram, was the contemporary of Æschylus, Pindar, and Lasus of Hermione, won very numerous prizes, and even defeated Æschylus by his elegy on the heroes who fell at Marathon. Only fragments of his poems are extant. S. made poetry his profession, and is said to have been the first poet who wrote for pay. He was also in repute as a philosopher, and is said to have added four letters to the Greek alphabet. Died B. C. 467.

Simon Magus, or THE MAGICIAN, a heresiarch, who is supposed to have been the founder of the Gnostic sect. He was a native of Samaria, and perceiving the miracles wrought by Philip the Deacon, he was baptized; but, on offering money to the apostles that he might receive the Holy Ghost, or the gift of tongues, and of working miracles, he was excommunicated by St. Peter. It is from this circumstance that the term *Simoniac* is applied to such as purchase spiritual things. He afterwards fell into the grossest errors, and maintained that God has left the world to be governed by certain beings called *Eons*.

Simonsville, in Vermont, a post-village of Windsor co., 89 m. S. of Montpelier.

Sim'ony, n. [From *Simon Magus*, q. v.] (*Ecc. Law*.) The corrupt presentation of any one to a benefice for gift, money, or reward.

Simoom', n. A noxious hot wind which occurs in most countries situated at no great distance from sandy deserts, and which always blows from that quarter in which the desert is situated. In Senegambia and Guinea it blows from the north-east, in the delta of the Nile from the south-west, on the eastern shores of the Gulf of Suez from the north-east, in Syria from the south-east, at Mecca from the east, at Bagdad from the west, and at Surat from the north. The approach of the S. is indicated by terrible appearances. The eastern horizon is pervaded by a dull yellow hue; a thick sulphurous exhalation rises from the ground, which is first hurried round in rapid gyrations, and then ascends into the air, covering the whole heavens. Hissing and crackling sounds are heard; and a hot current of air rushes over the ground. There is generally a considerable quantity of fine sand in the hot air, and the wind affects the human body very powerfully, often producing great feebleness, and sometimes even death.

Si'mons, a. Having a flat nose; snub-nosed.

Sim'per, v. n. [Sw. Goth. *semper*.] To smile in a silly or affected manner.

—*n.* A smile, with an air of silliness or affectation.

Sim'perer, n. One who smiles.

Sim'pering, a. Smiling foolishly or affectedly.

Sim'peringly, adv. In an affected or foolish manner; with a silly smirk.

Simpher'opol, or Akmetchet, a town of European Russia, in the Crimea, of which it is the cap., 40 m. N.E. of Sebastopol.

Sim'ple, a. [Fr.; Lat. *simplex*—*sine*, without, and *plico*, to fold.] Without fold or doubling; single; consisting of one thing; not complicated, complex, or combined; not compounded, mingled, or associated with anything else; elementary; not given to design, stratagem, or duplicity; plain; artless; sincere; harmless; guileless; frank; open; unaffected; inartificial; unadorned; unsuspecting; credulous; silly; foolish; shallow; not wise; not sagacious.

—*n.* Something not mixed or compounded.

Sim'ple-hearted, a. Ingenuous; open; frank.

Sim'ple-minded, a. Artless; undesigning; simple.

Sim'pleness, n. State or quality of being simple, single, or uncompounded; artlessness; simplicity; also, weakness of intellect.

Simpler, n. A collector of simples; a simplist.

Simpl'eton, n. A simple, silly person; a person of weak intellect; a trifler; a foolish person.

Simplie'ity, n. [Fr. *simplicité*; Lat. *simplicitas*, from *simplex*, simple.] State or quality of being simple; simplicity; state of being unmixed or uncompounded; state of being not complex, or of consisting of few parts. — Artlessness of mind; freedom from a propensity to cunning or stratagem; freedom from duplicity; sincerity; plainness; freedom from artificial ornament; freedom from subtlety or abstruseness. — Weakness of intellect; silliness.

Simplifica'tion, n. [Fr.] Act of making simple; act of reducing to simplicity, or to a state not complex.

Simplify, v. a. [Fr. *simplifier*; Lat. *simplex*, and *facio*, to make.] To make simple; to reduce, as what is complex to greater simplicity; to make plain or easy.

Simplist, n. One skilled in medicinal herbs.

Simplon, (sam-plawng.) a mountain of the Alps, in the south of Switzerland, separating the canton called the Valais from the Piedmontese territory. The old road across it being impracticable for heavy carriages, a new one, called the *Route of the S.*, was formed by order of Napoleon I., at the joint expense of France and

the kingdom of Italy. Though the ascent is everywhere gradual, the highest point of the road is nearly 6,600 feet above the level of the sea. The length is 35 miles, and the width between 25 and 30 feet. It is carried

Fig. 2367.

A BRIDGE ON THE OLD PASS OF THE SIMPLON, NEAR SION.

through several tunnels, over upwards of 600 bridges, and has twenty station-houses for travellers. The road of the S., long regarded as one of the greatest feats accomplished by modern engineering, has become of less importance since the formation of a railroad. The Simplon tunnel, now in construction, will be larger than either that of St. Gothard or Mt. Cenis.

Simply, adv. In a simple manner; without art; without subtilty; artlessly; plainly; of itself; without addition; alone; merely; solely; weakly; foolishly.

Simp'son, in Kentucky, a S. co., bordering on Tennessee; area, 320 sq. m. Surface, level; soil, excellent. Cap. Franklin. Pop. (1897) 11,480.

Simpson, in Mississippi, a S. central co.; area, 580 sq. m. Rivers, Pearl and Strong. Surface, undulating, and mostly covered with pine forests; soil, sandy and unproductive. Cap. Westville. Pop. (1897) 11,155.

Simp'son's Store, in Pennsylvania, a post-village of Washington co.

Simp'sonville, in Kentucky, a post-village of Shelby co., 30 m. W. of Frankfort.

Sims, in Indiana, a post-township of Grant co.

Simsbury, in Connecticut, a post-vill. and township of Hartford co., 11 m. N.W. of Hartford.

Sims' Port, in Louisiana, a post-village of Avoyelles parish, 237 m. N.W. of New Orleans.

Sim'ulate, v. a. [Lat. *simulo*, *simulatus*, from *similis*, like.] To copy; to counterfeit; to feign; to assume the mere appearance of, without the reality.

Sim'ulated, a. Feigned; pretended; assumed artificially.

Simula'tion, n. [Fr.; Lat. *simulatio*.] Act of simulating or of counterfeiting; act of feigning to be that which one is not; the assumption of a deceitful appearance or character.

Simula'tor, n. [Lat.] One who simulates or feigns.

Simultane'ity, n. State of being simultaneous. (R.)

Simulta'neous, a. [Fr. *simultané*, from Lat. *simul*, at once.] Existing, or happening, at the same time.

Simulta'neously, adv. At the same time.

Simulta'neousness, n. State of being simultaneous.

Sin, n. [A. S. *syn*, *sin*, *synn*.] That which requires to be atoned for; any action, word, thought, or purpose contrary to the law of God, or any omission of what it requires; any voluntary transgression or violation of the divine law, or any voluntary failure to comply with its requirements; any violation of a divine command; transgression; wickedness; iniquity; a wicked act.

—*v. n.* [A. S. *singian*, *syngian*.] To violate or transgress the law of God, or to omit or neglect what it requires; to depart voluntarily from the path of duty prescribed by God to man; to violate any known rule of duty; to do wrong; to offend against right, against men, or against society; to trespass.

Sinai, (si-ni, or si-na-i.) a mountain, or mountain-range, in Arabia Petraea, in the peninsula formed by the two arms of the Red Sea, and rendered memorable as the

Fig. 2368.

PLAIN OF ER-RAHAH, AND CONVENT OF ST. CATHARINE.

spot where, according to the Pentateuch, the law was given to Israel through Moses. This mountain-pass is

divisible into three groups: a N.W., reaching, in Mount Serbal, an elevation of 6,340 feet; an E. and central, attaining, in Jebel Katherin, a height of 8,100 feet; and a S.E., whose highest peak, Um Shammer, is the culminating point of the whole Sinaitic range. Serbal, with its five peaks, looks the most magnificent mountain in the peninsula, and is identified with Sinai by the earlier church fathers, Eusebius, Jerome, Cosmas, &c.; but it does not meet the requirements of the Hebrew narrative, and even as early as the time of Justinian, the opinion that Serbal was the Sinai of Moses had been abandoned, and to a ridge of the second or eastern range that honor had been transferred, the N. summit of which is termed *Horeb*; and the S. Jebel Mûsa, or Mount of Moses, continues to be regarded by the great majority of scholars as the true Sinai. Its height is variously estimated at from 6,800 to 7,100 feet above the sea. It is separated from the Jebel-ed-Deir on the W. by a narrow valley, called Er-Rahah, on one of the steps of which stands the famous convent of Mount Sinai (Fig. 2368), devoted to St. Catharine. In many of the western Sinaitic valleys, the more accessible parts of the

Fig. 2369.

ONE OF THE INSCRIPTIONS IN THE SINAITE VALLEYS.

rocky sides are covered by thousands of inscriptions (Fig. 2369), usually short, and rudely carved in spots where travellers would naturally stop to rest at noon, frequently accompanied by a cross and mingled with representations of animals. The inscriptions are in unknown characters, but were at first ascribed to the ancient Israelites on their way from Egypt to Sinai, and afterwards to Christian pilgrims of the fourth century. Recently, however, many of them have been deciphered by Professor Beer of Leipzig, who regards them as the only known remains of the language and characters once peculiar to the Nabathæans of Arabia Petraea. Those thus far deciphered are simply proper names, neither Jewish nor Christian, preceded by some such words as "peace," "blessed," "in memory of."

Sinai'ic, Sinait'ic, a. Belonging to Mount Sinai.

Sinapis, (si-nai'pis, n.) [Lat.] (*Bot.*) The Mustard, a genus of plants, order *Brassicaceæ*. The seeds of two species are commonly used for culinary and medicinal purposes. The seeds of *S. nigra* are of a dark reddish-brown color, and are known as *black mustard-seeds*; those of *S. alba* are of a yellowish color, and are termed *white mustard-seeds*. The flour of mustard, so extensively used as a condiment, is prepared from a mixture of the two kinds, usually in the proportion of two parts black and three parts white. The seeds are pounded, and the husks then removed from the flour by sifting. Both the black and white mustard-seeds contain a large quantity of bland fixed oil, resembling rape, which is readily obtained by submitting them to pressure. It is remarkable that the pungent principle for which mustard is valued does not exist in the seeds, but it is produced when the constituents of the seeds are brought together under the influence of water. The acid and pungent volatile oil of mustard is obtained by distilling black mustard-seeds with water. Internally, flour of mustard is used as a stimulant, diuretic, and emetic; externally, as an irritant and rubefacient. White mustard-seeds are often taken in an entire state as stimulants in dyspepsia. The young herbs, with their seed-leaves, are commonly used in salads.

Sinaruco, (se-na-ro'ko), a river of Venezuela, which joins the Orinoco, after an E. course of 100 m.

Since, (sins,) prep. [A. S. *siththan*.] After; from the time of; from the time that.

—*adv.* Ago; past; before this; from that time.

—*conj.* Seeing that; because that; inasmuch as.

Sincere, (sin-sér'), a. [Fr. *sincère*; Lat. *sincerus*.] Pure; unmixed; unfeigned; real; true; genuine; not pretended; being in reality what it appears to be; not simulated; not assumed or said for the sake of appearance; not hypocritical; honest; ingenuous; unaffected; inartificial; frank; upright; undissembling.

Sincere'ly, adv. Honestly; with real purity of heart; without simulation or disguise; unfeignedly.

Sincere'ness, n. Honesty; sincerity.

Sincer'ity, n. [Fr. *sincérité*; Lat. *sinceritas*.] State or quality of being sincere; honesty of mind or intention; freedom from simulation or falsity; freedom from hypocrisy, disguise, or false pretence.

Sincipit'al, a. (Anat.) That belongs to the sinciput.

Sin'ciput, n. [Lat., from *semi*, half, and *caput*, the

head.] The fore part of the head from the forehead to the coronal suture.

Sinelair, (*sin'klier*), in *Illinois*, a village of Morgan co., 6 m. N.E. of Jacksonville.

Sinclairville, in *New York*, a village of Chautauqua co., 50 m. S.W. of Buffalo.

Sinde, a river of Hindostan, rises near Seronge, and after a N.E. course of 220 m. joins the Jumna 26 m. S.E. of Etawah.

Sinde, or **Seinde**, (*sind*), an extensive country of British India, between Hindostan and Beloochistan, comprising the lower course and delta of the Indus, between Lat. 23° and 29° N., Lon. 66° and 72° E., having N. the Punjab and Bahawalpoor territories, E. Rajpootana, S. the Runn of Cutch and the Indian Ocean, and W. Beloochistan and Cutch-Gundava. Area, estimated at 60,000 sq. m. It has been compared, in consequence of some of its physical features, to Egypt; the country consisting, like Egypt, of a long fertile valley, bordered on either side by high hills, and surrounded by a wide sandy desert, the fertile portion being annually inundated by the overflowing of the Indus. Though in general features resembling the land of pyramids, it falls immensely short of that country in the real fertility of the soil. The land is by no means well cultivated, though irrigation is very extensively practised. Large tracts of the country are devoted to pasture; and there are woods of palm, mangroves, banyans, and mimosas. Tigers, hyenas, and wolves are the chief wild animals or beasts of prey. The rest are those common to N. India. *Cap.* Hyderabad. The principal port, Kurrachee, from whence nearly all the exports are dispatched, is situated at the mouth of the Indus. The *Ameers*, or upper orders of the people, are of Mohammedan religion, and till lately exercised a sort of feudal right in the country, under the dominion of the sovereign of Cabul. In 1844, Sir Chas. Napier advanced against the Ameers, and after a series of victories, the country was annexed to the British empire. Pop. 1,795,994.

Sine. [A Lat. prep.] Without.

Sine, *n.* [Lat. *sinus*, a curved surface, a curve. See SINUS.] A geometrical line drawn from one end of an arc, perpendicular to the diameter drawn through the other end.

Sineural, *a.* Relating to a sineure.

Sineure, *n.* [Lat. *sine*, without, and *cura*, care.] A benefice without cure or care of souls; an office which yields revenue without active employment.

—*v. a.* To place in a sineure.

Sineurism, *n.* The state of having a sineure.

Sineurist, *n.* One who has a sineure.

Sine die. [Lat., without day.] A term usually employed in connection with meetings or assemblies, which are adjourned or prorogued without a day being specified for reassembling.

Sinepux'ent Bay, in *Maryland*, a long, narrow bay and inlet of the Atlantic in Worcester co.; Lat. 38° 12' N., Lon. 75° 10' W.

Sine qua non. [Lat., without which not.] That without which the matter in hand is null; an indispensable condition.

Sinew, (*sin'yo*), *n.* [A.S. *sinu*, *sinw*, *senw*.] (*Anat.*) That which unites a muscle to a bone; a tendon.

—*pl.* Strength, or rather that which supplies strength; muscle; nerves.

"Money is the sinews of war." — Johnson.

—*v. a.* To bind or join, as by sinews; to strengthen; to harden.

Sinewless, (*sin'yu-less*), *a.* Having no sinews; — hence, lacking in strength or vigor.

Sin'ew River, in British America, rises E. of the Rocky Mountains, abt. Lat. 56° N., Lon. 119° W., and flows into the Peace River after a N.E. course of 100 m.

Sin'ew-shrunk, *a.* (*Farriery*.) That has the sinews under the belly stiff and contracted, as an overworked horse.

Sin'ewy, *a.* Consisting of a sinew or nerve; nervous; strong; well braced with sinews; vigorous; firm.

Sinful, *a.* [From *sin*.] Tainted with sin; wicked; iniquitous; criminal; unholy; containing sin, or consisting in sin; contrary to the laws of God.

Sinfully, *adv.* In a manner which the laws of God do not permit; wickedly; iniquitously; criminally.

Sinfulness, *n.* Quality of being sinful or contrary to the divine will; wickedness; iniquity; criminality; corruption; depravity.

Sing, *v. n.* (*imp.* SING, SANG; *pp.* SUNG.) [A.S. *singan*.] To read or recite with musical modulations; to utter sounds with various inflections or melodious modulations of voice, as fancy may dictate, or according to the notes of a song or tune; to utter sweet or melodious sounds, as birds; to make a small, shrill sound; to tell or relate something in numbers or verse.

—*v. a.* To utter with musical modulations of voice; to chant; to carol; to celebrate in song; to give praises to in verse; to relate or rehearse in numbers, verse, or poetry.

Singapore, a settlement belonging to Great Britain, in S.E. Asia, consisting of a small island at the S. extremity of the Malay peninsula, including the town of the same name, the latter being in Lat. 1° 17' N., Lon. 103° 50' E.; area, 275 sq. m. The climate is hot, but remarkably healthy; nutmegs and all kinds of spices grow well; and the forests contain much timber well suited for nautical purposes. The town of Singapore, situated on the S. side of the island, is an emporium for merchandise from all parts of the world; and its trade is probably the largest of any single port in the Chinese waters. The chief articles of export to N. America are gambier, tin, sago, tapioca, black and white pepper, tortoise-shell, nutmegs, gutta-percha, camphor, coffee, Japan-wood, and rattans. P. of island 1888, abt. 160,000.

Singboom', a town of British India, presidency of Bengal, prov. of Orissa; Lat. 22° 37' N., Lon. 85° 55' E.

Singe, (*sinj*), *v. a.* [A.S. *sengan*.] To burn slightly or superficially; to scorch; to burn the surface of, as the nap off cloth, or the hair off the skin.

—*n.* A burning of the surface; a slight burn.

Singer, *n.* [From *sing*.] One who sings; one versed in music, or one whose occupation is to sing; a bird that sings.

Singhalese', *n. sing. and pl.* A native, or the natives, of Ceylon; Ceylonese. See CINGALESE.

Sing'ing, *n.* Act of uttering sounds with musical intonations; musical articulation; the utterance of melodious notes.

Sing'ingly, *adv.* In a singing manner; with a kind of tune.

Sing'ing-master, *n.* A music-master; one who teaches vocal music.

Sing'ing-school, *n.* A school where singing is taught.

Single, (*sing'gl*), *a.* [Lat. *singulus*, from the root, *sim*, once, whence *semel*, once, a single time.] One to each; separate; single; one; only; individual; consisting of one only; particular; uncompounded; alone; having no companion or assistant; unmarried; not double; not complicated; performed with one person or antagonist on a side, or with one person only opposed to another; pure; simple; incorrupt; unbiassed.

—*v. a.* To separate; to select, as an individual person or thing from among a number; to choose one from others. (Followed by *out*.)

Single-entry, *n.* See BOOK-KEEPING.

Single-hand'ed, *a.* Unassisted; unaided; alone.

Single-heart'ed, *a.* Without duplicity; sincere; upright.

Single-mind'ed, *a.* Having a single purpose.

Singleness, *n.* State of being single, or one only, or separate from all others; the opposite of *doubleness*, *complication*, or *multiplicity*; simplicity; sincerity; purity of mind or purpose; freedom from duplicity.

Singles, *n. pl.* See SILK.

Single-stiek, *n.* A stout cudgel for fencing or fighting with; also, a game at cudgels.

Single-tree, *n.* A whiffle-tree.

Sing'lo, *n.* A fine kind of tea, with large, flat leaves, not much rolled.

Sing'ly, *adv.* Individually; particularly; only by one's self; without partners or companions; also, honestly; sincerely.

Sing Sing, in *New York*, a post-village of Westchester co., on the Hudson, 33 m. N. of New York. It is situated on an acclivity, and contains many elegant villas, but is particularly noted as the seat of one of the New York State-prisons, composed of two separate stone buildings, one containing 1,200 cells, for male convicts from the 1st and 2d judicial districts, with the addition of Ulster, Greene, and Sullivan cos.; the other, with 120 cells, receives female convicts from every county in the State.

Sing-song, *n.* A term for bad singing, or for drawing.

Singular, *a.* [Fr. *singulier*; Lat. *singularis*, from *singulus*.] That is single; alone; solitary; not complex or compound; expressing one person or thing; not plural; not dual. — Particular; existing by itself; without precedent; unexampled. — Remarkable; eminent. — Unusual; rare; not common. — Implying something censurable or not approved — Peculiar; strange; odd. (*Gram.*) Expressing only one; not plural.

Singularity, *n.* [Fr. *singularité*; Lat. *singularitas*, from *singularis*.] State of being singular; peculiarity; some character or quality of a thing by which it is distinguished from all, or from most others; an uncommon character or form; something curious or remarkable; particular privilege, prerogative, or distinction; character, or trait of character, different from that of others; eccentricity; oddity.

Singularly, *adv.* Peculiarly; in a manner or degree not common to others; oddly; strangely. — So as to express one, or the singular number.

Singul'tons, *a.* Relating to, or affected with, hiccup.

Singultus, *n.* [Lat.] (*Med.*) A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrest the air in the trachea. It is the symptom of many morbid conditions, and especially of gangrene, but occurs frequently in persons otherwise in good health. Also, a sob.

Sinigaglia, (*sin-e-gal'ye-a*), a seaport-town of Italy, prov. of Ancona, at the mouth of the Misa, in the Adriatic, 16 m. W.N.W. of Ancona; pop. 9,000.

Sin'ister, *a.* [Lat. *sinistra*, from *sinister*.] Left; on the left hand, or the side of the left hand. — Evil; bad; corrupt; p. verse; dishonest. — Unlucky; unfortunate; inauspicious.

—*n.* (*Her.*) The left-hand side of the escutcheon, or anything that is used in armory; that is, the object being placed immediately before the spectator, the side opposite the right-hand is the *sinister*, and the side opposite the left-hand the *dexter*.

Sin'isterly, *adv.* Absurdly; perversely; unfairly.

Sin'istral, *a.* To the left; belonging to the left hand; sinistrans.

Sin'istrality, *n.* Quality of being sinistral.

Sin'istrally, *adv.* Toward the left; on the left-hand.

Sin'istrorse, *a.* (*Bot.*) Turned to the left.

Sin'istrans, *a.* Being on the left side; inclined to the left; — hence, wrong; absurd; perverse.

Sin'istrously, *adv.* Perversely; wrongly; with a tendency to use the left as the stronger hand.

Sink, (*sink*), *v. n.* (*imp.* SUNK; *pp.* SUNK.) [A.S. *sencan*.] To move one's self downwards; to fall or go downward

in a medium or substance of less specific gravity; to go to the bottom; to subside; opposed to *float* or *swim*; to fall gradually; to enter or penetrate into any body; to become lower; to settle to a level; to be overwhelmed or depressed; to enter deeply; to be impressed; to become deep; to retire or fall within the surface of anything, as the eyes into the head; to decline; to droop; to decay; to decrease; to fall into rest or indolence. — To be lower; to become less, as prices.

Sink, *v. a.* To cause to sink, settle, or descend; to put under water; to immerse in a fluid; to make by digging or delving; to depress; to degrade; to plunge into destruction; to cause to fall or to be plunged; to bring low; to reduce in quantity; to overbear; to crush; to diminish; to lower or lessen; to cause to decline or fall; to lower in value or amount; to reduce; to pay; to diminish or annihilate by payment; to waste; to dissipate; to reduce, as a capital sum of money, for the sake of greater profit or interest out of it.

—*n.* That into which anything sinks or descends; — specifically, a drain to carry off filthy water; a jakes; a kind of basin of stone or wood to receive foul water. — Any place where corruption, physical or moral, is gathered or generated.

Sinker, *n.* That which sinks; a weight placed on some body, as a fish-line, to sink it.

Sink-hole, *n.* A hole for receiving and conducting off dirty waters, &c.; a sink.

Sink'ing-fund, *n.* (*Pol. Economy*.) A fund provided from other funds for the gradual payment of the debt of a government or a corporation.

Sink'ing Spring, in *Ohio*, a post-village of Highland co., 75 m. E. of Cincinnati.

Sinking Spring, in *Pennsylvania*, a post-village of Berks co., 50 m. E. of Harrisburg.

Sink'ing Valley, in *Pennsylvania*, a valley in Berks co., celebrated for its picturesque beauty.

Sin'less, *a.* [From *sin*.] Free from sin; pure; perfect; innocent.

Sin'lessly, *adv.* In a sinless manner; innocently.

Sin'lessness, *n.* State or quality of being sinless; freedom from sin and guilt.

Sinnamary, **Sinnimari**, (*seen'na-ma-re'*), in French Guiana, a river which flows into the Atlantic, 78 m. N.W. of Cayenne, after a N. course of 200 m.

Sinnemahoning Creek, in *Pennsylvania*, enters the W. branch of the Susquehanna from Clinton co.

Sin'ner, *n.* One who sins; one who has voluntarily violated the divine law; a moral agent who has voluntarily disobeyed any divine precept, or neglected any known duty; an unregenerate person; an offender; a criminal.

Sin-offering, *n.* (*Script.*) The sacrifice of propitiation for the sin of the people, enjoined in *Lev. iv.*, and considered different from the trespass-offering (*ibid. xiv.*), thought to be appropriate to special cases of negligence only.

Sin'ope, [Turk. *Sinub*.] a fortified seaport-town of Asiatic Turkey, on the N. coast of the Black Sea, 75 m. from Samsoon. The place was bombarded by the Russians in 1853, when a Turkish squadron of thirteen ships, lying in the roadstead, was destroyed by the Russian fleet. On this occasion 4,000 Turks perished. — Diogenes was born there. Pop. 9,000.

Sin'ople, *n.* (*Min.*) A ferruginous jasper, of a bright brick-red color, found in Hungary.

(*Her.*) The French designation for the color *green*; by English heralds called *vert*. The name is said to be derived, through the Crusaders, from the tower of *Sinope*, in Asia Minor.

Sin'ta Bayou, in *Alabama*, enters the Tombigbee River near Coffeeville.

Sin'ter, *n.* [Ger., a scale.] (*Min.*) *Culcareous sinter* is a variety of carbonate of lime composed of successive concentric layers. *Silicious sinter*, a variety of common opal.

Sinn, or **ZINU RIVER** (*see'noo*), in *Repub. of Colombia*, rises in the dept. of Cauca, abt. Lat. 7° 30' N., Lon. 76° 10' W., and flows into the Caribbean Sea after a N.N.E. course of 200 m.

Sin'uate, *v. a.* [Lat. *sinuare*, *sinuatus*, from *sinus*, the bosom, a curved surface, a curve, a bending.] To bend, wind, or curve; to turn; to bend in and out.

Sin'uate, **Sin'uose**, *a.* (*Bot.*) Strongly wavy on the margin, with alternate convexities and concavities (Fig. 2370).

Sinua'tion, *n.* A winding or bending in and out.

Sinuos'ity, *n.* [Fr. *sinuosité*, from L. *sinuositas*, from Lat. *sinus*.] Quality of being sinuous, or of bending or curving in and out; or, a series of bends and turns in arches or other irregular figures.

Sin'uons, *a.* [Fr. *sinueux*, from Lat. *sinuosus*, from *sinus*.] Bending; winding; crooked; bending in and out; of a serpentine or undulating form.

Sin'uously, *adv.* In a sinuous manner; windingly; crookedly.

Sin'us, *n.*; *pl.* Lat. SINUS; *pl.* Eng. SINUSES. [Lat.] A bay of the sea; a recess in the shore, or an opening into the land.

(*Anat. and Surg.*) A blind canal or cavity; a cell, or pipe-like passage, closed at one extremity, — in that respect being the opposite of *fistula*, which is a tube open at both ends. — The depressions which exist in various bones or other hard parts of the body. — The veins of the dura mater of the brain are also called *sinuses*.

(*Bot.*) The name given to the recesses formed by the lobes of leaves, &c.

Fig. 2370.

Sion, a town of Switzerland, cap. of the canton of Valais, in a picturesque situation on the right bank of the Rhone, 18 m. N.E. of Martigny by the Simplon Railroad; pop. 3,227.

Siout, or **Sint**, (*se'oot*), a town of Upper Egypt, near the Nile; Lat. $27^{\circ} 11' 14''$ N., Lon. $31^{\circ} 14'$ E. *Manuf.* Pipe-bowls.

Sioux, (*soo*), or **DACOTAHs**, a once powerful family of N. American Indians. Their number is estimated from 10,000 to 35,000; they are well advanced in civilization, and are increasing in population. Their places of residence are on the Upper Mississippi and St. Peter's rivers, and branches of the Missouri. Some of the tribes engage in agriculture; those residing on the banks of the Mississippi and St. Peter's mainly subsist by farming. In 1862, the *S.*, under the lead of "Little Crow," a noted chief, in consequence of their annuity not having been paid to their satisfaction, waged a most cruel and exterminating war upon the whites of Minnesota; and so well concerted were their schemes, that no less than six hundred and forty-four men, women, and children, and ninety-four soldiers, were killed before the massacre was stayed. As an atonement for their great crime in thus murdering the whites, the Federal government allowed only thirty-eight, out of three hundred and three Indians found guilty by a proper tribunal, to be executed. This clemency, though seemingly unjust, was the result of mature deliberation on the part of the authorities at Washington, who found that the Indians had been greatly wronged by some of the whites, not only in withholding their annuities, but in extorting money from them for the most trivial consideration, and in consequence of which the Indians sought revenge. In 1876, they were removed from the Black Hills.

Sioux, in *Iowa*, a W.N.W. co., bordering on South Dakota; area, 768 sq. m. *Rivers.* Sioux and Floyd. *Cap.* Orange City. *Pop.* (1895) 21,406.

Sioux City, in *Iowa*, an important city, cap. of Woodbury co., on Missouri river, 100 m. N. by W. of Omaha, Neb. *Pop.* (1895) 27,371.

Sioux Falls, in *South Dakota*, a thriving city, cap. of Minnehaha co. *Pop.* (1895) 9,002.

Sioux River, in *Minnesota*, rises abt. Lat. 45° N., Lon. $97^{\circ} 20'$ W., and falls into the Missouri River, Lat. $42^{\circ} 30'$ N., Lon. $96^{\circ} 20'$ W., after a S.E. course of 300 m.

Sip, *v. a.* [*A. S. sipan*.] To soften by steeping; to take a fluid, or something sopped in fluid, into the mouth in small quantities by the lips: to drink or imbibe in small quantities; to draw into the mouth; to extract; to drink out of.

—*v. n.* To drink a small quantity; to take a fluid with the lips.

—*n.* The taking of a liquor with the lips in small quantities, or a small draught taken with the lips.

Siphanto, (*se-fan'to*), an island of the Grecian Archipelago, 25 m. S.W. of Syra; area, 34 sq. m.; pop. 7,000.

Siphoid, *n.* A vase or apparatus for receiving and giving out gaseous waters.

Siphon, *n.* [*Fr. and Gr.; Lat. siphon*.] (*Physics*.) A bent tube, open at both ends and with unequal legs (1, Fig. 2371). It is used in transferring liquids in the following manner: The syphon is filled with some liquid, and the two ends being closed, the shorter leg is dipped in the liquid, as represented in 1, Fig. 2371; or the shorter leg having been dipped in the liquid, the air is exhausted by applying the mouth at B. A vacuum is thus produced, the liquid in C rises and fills the tube in consequence of the atmospheric pressure. It will then run out through the syphon as long as the shorter end dips in the liquid. A syphon of the form represented in 2, Fig. 2371 is used where the presence of the liquid in the mouth would be objectionable. A tube, M, is attached to the longer branch, and it is filled by closing

Fig. 2371. — SIPHONS.

the end P, and sucking at O. An enlargement, M, renders the passage of any liquid into the mouth more difficult. To explain this flow of water from the syphon, let us suppose it filled, and the short leg immersed in the liquid. The pressure then acting on C, and tending to raise the liquid in the tube, is the atmospheric pressure minus the height of the column of liquid D B. In like manner, the pressure on the end of the tube C is the weight of the atmosphere, less the pressure of the column of liquid A B. But as this latter column is longer than C D, the force acting at B is less than the force acting at C, and consequently a flow takes place proportional to the difference between these two forces. The flow will therefore be more rapid in proportion as

the difference of level between the aperture B and the surface of the liquid in C is greater. Instead of exhausting the siphon of air, it may be inverted and filled with water; if both ends are then stopped, and the shorter limb immersed in the water to be decanted, on removing the plugs the water will flow. In the *War-*

Fig. 2372. — SIPHON USED BY THE EGYPTIANS 1455 B. C.

temberg siphon, the two ends are turned up, so that when once filled it will always remain so, and act at once when one end is immersed in a liquid. — *S.* were in use by the Egyptians full 15 centuries B.C., and their application to drawing liquor from their vases is shown in the drawings preserved in their tombs (Fig. 2372.)

(*Zoöl.*) The name of the membranous and calcareous tubes which traverse the septa and the interior of the shells divided in several chambers. The term is also applied to the tubular prolongation of the mantle in certain univalve and bivalve molluscs; and by Latreille to the mouth of certain suctorial, crustaceous, and apterous insects.

Siphon'ic, *a.* Relating to, or resembling, a siphon.

Siphonia, *n.* (*Bot.*) A genus of plants, order *Euphorbiaceæ*. They are trees containing a milky juice in more or less abundance, though all the species do not yield caoutchouc of good quality. One of them, *Siphonia elastica* (Fig. 2373), is a native of French Guiana, and the remainder of the Amazons and Rio Negro districts of Brazil. They are called *Seringa-trees* by the Brazilians, from the Portuguese word *seringa*, signifying a syringe or clyster-pipe, the caoutchouc having first been used for making those articles. The bulk of the caoutchouc at present exported from Pará is obtained from *S. Brasiliensis*, which is common in the forests of that province; but that brought down to Pará from the Upper Amazons and Rio Negro is derived from *S. lutea* and *S. brevifolia*. These three species are all slender, smooth-stemmed trees, averaging 100 feet in height; the Pará species, however, yields the greatest abundance of caoutchouc.

Fig. 2373. — SIPHONIA ELASTICA.

Siphuncle, *n.* (*Zoöl.*) Same as SIPHON.

Siphunculatus, *a.* Having a little spout or siphon.

Siphonophora, *n. pl.* (*Zoöl.*) A sub-order of hydroid aculephs, comprising those species which have no central digestive cavity, but simply isolated tubes.

Sipotu'ba, in Brazil, a river which rises in the prov. of Matto-Grosso, Lat. $13^{\circ} 50'$ S., Lon. 58° W., and falls into the Paraguay after a S.E. course of 200 m.

Sipper, *n.* One who sips; as, a *sipper* of nectar.

Sippican, in Massachusetts, a village of Plymouth co., 55 m. S.E. of Boston.

Sip'scy, or **NEW RIVER**, in Alabama, rises in Marion co., and flows S.W., falling into the Tombigbee River in Sumter co., 12 m. N. of Gainesville. — Another, rises in the N. of Walker co., and flows S.E. into Mulberry Fork of the Black Warrior River.

Sipunculus, *n.* (*Zoöl.*) A genus of worms which burrow in the sands of the sea-shore, and are classed with the *Echinoderms* by Cuvier, and with the *Entozoa* by M. de Blainville. They are much sought after by the fishermen, who use them, like the Common Lob-worm (*Arenicola piscatorum*), as baits for their hooks. They have a long, cylindrical, retractile proboscis, around the extremity of which is a circle of tentacles, and at the base of it the anus. Some of them attach stony particles to their skin, by a glutinous exudation, so as to cover it with a hard crust, resembling that formed by some annelids.

Siquis, (*sí kwis*), *n.* [*Lat.*, if any one.] (*Eccl.*) An announcement made by a candidate for the ministry of his purpose to make inquiry as to whether his candidature may be challenged.

Sir, (*ser*), *n.* [*Fr. sire, and sieur*, in *monsieur*, from *seigneur*; *Lat. senior*, an elder, or elderly person. See *SENIOR*.] A word of respect used in addresses to men, as *madam* is in addresses to women. It is likewise, in

England, the titular prefix of a knight or baronet; as, *Sir* Walter Scott.

Siraball, *n.* (*Bot.*) See OREODAPHNE.

Sire, (*sir*), *n.* [*Fr.*, from *Lat. senior*.] A father. (Used in poetry.) — The word of respect used in addressing a king. — The male parent of a beast, particularly used of a horse; — correlative to *dam*.

—*v. a.* To beget.

Siredon, *n.* (*Zoöl.*) A genus of batrachians, family *Sirenidae*. They are 6 to 10 inches long, and every way similar in form to young aquatic salamanders. They live mainly in the water. This genus contains the celebrated *Oxololl*, which is eaten by the Mexicans.

Siren, **Syren**, *n.* [*Lat.*] (*Myth.*) One of the young maidens who sat on the shores of a certain island or promontory near the S.W. coast of Italy, and sang with bewitching sweetness songs that allured the passing sailor to draw near, but only to meet with death. Homer speaks of them in the plural, but does not specify their number; later writers mention two and three by name, and assign them various genealogies. Their tenure of life was dependent on the successful exercise of their charms. If any seaman could resist the enticements of their magic music, they were doomed, but Ulysses or the Argonauts alone succeeded in doing so. It is related by Homer, in the *Odyssey*, that when the former, in the course of his wanderings, approached their perilous home, he, by the advice of the sorceress Circe, stuffed the ears of his companions with wax, and lashed himself to a mast, until he had sailed out of hearing of the fatal songs. Others say that it was the Argonauts who got safely past, owing to the superior enchantment of Orpheus's singing, whereupon the *S.* threw themselves into the sea and were transformed into rocks. The Latin poets give them wings; and in works of art they are often represented as birds with the faces of virgins, and are provided with musical instruments.

—An enticing woman; a woman of dangerous fascinations. (*Zoöl.*) See SIRENIDE.

—*a.* Pertaining to a siren, or to the dangerous enticements of music; bewitching; fascinating.

Sirene, *n.* (*Acoustics*.) An instrument for determining the velocity of aerial vibration, corresponding to the different pitches of musical sounds.

Sirenidae, *n. pl.* (*Zoöl.*) The Siren family, comprising batrachians which have permanent external branchiæ that occur in tufts, covering the branchial orifices. They also have lungs like others of their class, and are thus true amphibians. It will be observed that, even in their adult state, these animals represent the embryonic forms of the higher batrachians. — The Genus *Siren* has

Fig. 2374. — SIREN LACERTINA.

an eel-shaped body, with anterior legs, three spiracles, and three tufts; no posterior legs. The Siren, or Mud-eel, *S. lacertina*, of South Carolina, attains the length of 24 inches; color above nearly black, with numerous light spots; abdomen purplish. It lives in mud, and is common in the ditches of rice-fields. Two more species are found in the South.

Sir Francis Drake's Bay, in California, 30 m. W.N.W. of San Francisco; Lat. 38° N., Lon. $122^{\circ} 50'$ W.

Sirgoojah, (*seer-go-ja'*) a town of British India, presidency of Bengal, in Gundwana, 75 m. S.W. of Palamow; Lat. $23^{\circ} 5'$ N., Lon. $83^{\circ} 50'$ E.

Sir'ius, *n.* (*Astron.*) The most brilliant of the fixed stars, and the largest in the constellation of *Canis Major*, the Great Dog. It is very frequently called the *Dog Star*. Its name is obtained from *Siris*, one of the Egyptian appellations of the river Nile, because its heliacal rising gave warning that the overflow of the river was about to commence.

Sir'loin, **SUR'LOIN**, *n.* [*Fr. surlonge*—*sur*, on, upon, over, and *longe*, a loin.] A loin of beef.

Sirocco, *n.* [*It.*; *Sp. sirco*, or *xalcoque*; from *Ar. sharki*, easterly, from *shark*, the east.] A term applied in Italy and the East to a hot, relaxing, and oppressive S.W. wind. It is supposed by some to be identical with the simoom, tempered by its passage across the water.

Sir'na, in Illinois, a township of La Salle co.

Sir'rah, *n.* [*Said to be corrupted from sir, ha!*] A word of reproach or contempt, used in addressing vile characters; also, employed familiarly or sportively in addressing males.

Sir'up, **Syr'up**, *n.* [*Fr. sirop*.] A sweet liquid; the sweet juice of vegetables or fruits, or other juice sweetened, or sugar boiled with vegetable infusions.

Siruped, (*sir'upt*), *a.* Moistened, or tinged, with sirup or sweet juice.

Sir'upy, *a.* Like sirup, or partaking of its qualities.

Sirven'te, *n.* (*Lit.*) A species of poems which were in common use among the Troubadours; usually satirical, and divided into strophes of a peculiar construction.

Sisal, (*se'sal*), in Mexico, a seaport-town of Yucatan, 30 m. N.W. of Merida; Lat. $21^{\circ} 10' 6''$ N., Lon. $90^{\circ} 2' 45''$ W.

Sis'kiwit, *n.* [India name.] (*Zoöl.*) A species of stout, broad, and thick salmon (*Salmo siskiwit*, Agassiz), caught in Lake Superior.

Siskiyou (*sisk'yo*), in California, a N. co., bordering on Oregon; area, 5,680 sq. mi. Rivers. Klamath, Pitt, Sacramento, Scott, and Shasta. Surface, mountainous, the principal peak, Mount Shasta, being 14,000 ft. high; soil, fertile in the valleys. Lakes. Numerous, Goose Lake being the principal. Min. Gold, grauite, and limestone. Cap. Yreka. Pop. (1897) 13,250.

Sis'ley's Grove, in Iowa, a village of Linu co., 7 m. W. of Cedar Rapids.

Sismondi, CHARLES SIMONDE DE, (*sees-môn'de*), one of the most eminent of modern historians and political economists, was b. at Geneva, 1773. He was the last of a noble family, which, driven from Pisa into France by republican dissensions in the 14th cent., was again (being Protestant) forced into Switzerland by the revocation of the Edict of Nantes. The works by which he is most widely known are his excellent *Histoire des Républiques Italiennes* (10 vols.), *La Littérature du Midi de l'Europe* (4 vols.), and his large and laborious *Histoire des Français* (31 vols.). D. 1842.

Siss', *v. n.* To hiss; to sizzle. (Local.)

Sis'sonville, in W. Virginia, a post-village of Kanawha co.

Sissopoli, or **Sizeboli**, (*sis-sop'o-le*), (anc. *Apollonia*), a seaport-town of European Turkey, in Roumelia, on the Black Sea, 80 m. N.E. of Adrianople.

Sis'ter, *n.* [A. S. *swuster*, *suster*.] A female corresponding to a male of the same parentage; a female born of the same parents.—A woman of the same faith; a female fellow-Christian.—A female of the same kind; one of the same kind, or of the same condition; as, a sister ship.—A female of the same society or community, as the nuns of a convent.

Sis'ter-block, *n.* A solid piece of wood, with two holes, one above the other, with or without sheaves, to pass a pulley through.

Sis'terhood, *n.* Sisters collectively, or a society of sisters, or a society of females united in one faith or order.

Sis'ter-in-law, *n.* A husband or wife's sister.

Sis'terly, *a.* Like a sister; becoming a sister; affectionate.

Sisteron, a fortified town of France, dept. of Basses-Alpes, on the Durance and Buech, 16 m. W.N.W. of Digne; pop. 4,576.

Sisters, (*The*), two small islands of the Indian Ocean, between Great and Little Andaman Islands; Lat. 11° 10' N., Lon. 92° 46' E.

Sis'ter's Creek, in New York, enters Lake Erie from Erie co.

Sisters of Char'ity. (*Ecc. Hist.*) A religious congregation of females for the assistance of the sick poor, was founded by Vincent de Paul, at Châtillon-les-Dombes, in 1629. In 1633 he established a similar society at Paris, where he was shortly joined by a widow named Le Gras, who formed a staff of nurses, which received the sanction of Cardinal de Retz, under the title of *Daughters of the Poor*, in Jan., 1655, which community was confirmed by the Pope in 1660. From that time, prisons, free schools, hospitals, and almshouses have been placed under their direction in all parts of France. They make simple vows, which are renewed every year. The number of their establishments throughout the world is now about 2,000, under the charge of about 40,000 sisters. The American branch of the congregation was established under a distinct rule at Emmetsburg, Md., in 1809, by Mrs. Eliza Seton, their first mother-superior; but recently many of the American houses have united with the French order. The *S. of C.* have distinguished themselves in every country by their acts of beneficence; and their admirable charity has won for them general veneration, even in heathen countries. See DEACONESSES.

Sistersville, in W. Virginia, a post-village of Tyler county, on the Ohio River, 35 miles south-west of Wheeling.

Sis'tine, *a.* Belonging to Pope Sixtus V.; as, the *Sis'tine* Chapel in the Vatican.

Sisto'va, a town of European Turkey, in Bulgaria, on the Danube, 24 m. E.S.E. of Nicopolis; Lat. 43° 38' N., Lon. 25° 20' E..

Sisymbrium, *n.* (*Bot.*) A genus of plants, order *Brassicaceae*. The Hedge Mustard, *S. officinale*, is a common and troublesome weed in fields, roadsides, &c., throughout the U. States.

Sisyphus, (*siss'y-füs*). (*Myth.*) A descendant of Æolus, said by some to have lived at Ephyra, on the Peloponnesus, while others allege that he was a robber, slain by Theseus. His punishment in Tartarus for his crimes committed on earth consisted in rolling a huge stone to the top of a high hill, which constantly recoiled, and thus rendered his labor incessant.

Sisyrinchium, *n.* (*Bot.*) A genus of plants, order *Dioscoreaceae*, comprising grass-like plants, with compressed, acutical scapes. *S. anceps*, the Blue-eyed Grass, is a delicate little plant, with blue flowers, common in low grass-lands in Canada and the U. States.

Sit', *v. n.* (*imp.* and *pp.* SAT.) [A. S. *sittan*; Gr. *hezomat*.] To rest on the lower extremity of the body; to rest upon the buttocks, as animals; to perch; to rest on the feet, as fowls.—To occupy a seat or place in an official capacity.—To be in a state of rest or idleness; to rest, lie, or bear on, as a weight or burden.—To settle; to rest; to abide.—To cover and warm eggs for hatching, as a fowl.—To be adjusted; to be with respect to fitness or unfitness.—To be placed in order to be paid.—To be in any situation or condition.—To hold a session; to be officially engaged in public business; to exercise authority; to be in any assembly or council as a member; to have a seat.

Sit, *v. a.* To keep the seat upon; to place on or in a seat. **Sit'e**, (*sit*), *n.* [Lat. *situs*, from *sino*, *situm*, to put or set down, to let, suffer, allow.] Place on which anything stands or is set; situation; local position; place; spot; a seat or ground-plot.

Sit'fast, *n.* (*Furriery*.) An ulcerated sore or tumor growing on a horse's back under the saddle.

Sit'ka, *n.* (*Zoöl.*) See NUT-HATCH.

Sitka, or **Bara'noff**, one of the Alexander Islands, off the coast of Alaska, in the Pacific, on its W. coast, in Lat. 57° 3' N., Lon. 135° 18' W. On it is located the town of Sitka, formerly called New Archangel, the seat of Territorial government. Pop. (1897) 2,000.

Sitol'ogy, *n.* [Gr. *sitos*, bread, and *logos*, discourse.] Dietetics, or the doctrine of aliments.

Sit'ter, *n.* One who sits; also, a bird that incubates.

Sit'ting, *a.* Resting on the buttocks, or on the feet, as fowls while hatching; incubating; brooding.

—*n.* The posture of being on a seat; act of placing one's self on a seat; a seat or space in the pew of a church sufficient for one person; the act or time of resting in a posture for a painter to take the likeness; a session; the actual presence or meeting of any body of men; an uninterrupted application to business or study for a time; course of study unintermitted; a time for which one sits, as at play, at work, or on a visit; a resting on eggs for hatching, as fowls.

Sit'uate, **Sit'uated**, *a.* [L. Lat. *situatus*, from *situo*, to set, to place.] Seated, placed, or standing with respect to any other object.—Placed, or being in any state or condition with regard to men or things.

Situa'tion, (*-shun*), *n.* [Fr.] State of being situated; position; seat; location in respect to something else; site; station; state; condition, as of difficulty or ease; case; plight; circumstances; temporary state; post; place; office.

Sium, *n.* (*Bot.*) A genus of the order *Apiaceae*, consisting of strong-smelling, weedy-looking plants, one of which is grown for culinary purposes, namely, *S. sisarum*, better known by its common name of *Skirret*. This plant, although usually treated as an annual, is a hardy perennial, a native of China, and has been cultivated in Europe since 1548. The roots, for which this plant is cultivated, are composed of small fleshy tubers about the size of the little finger, joined together at the crown.

Sius'law, in Oregon, a post-village of Lane co., 16 m. S.W. of Eugene City.

Sins'law River, in Oregon, rises in Lane co., enters the Pacific Ocean, after a W. course, in which it forms the boundary between Douglas and Laue cos.

Si'va. (*Hind. Myth.*) A title given to the Supreme Being, considered in the character of the avenger or destroyer. Under the name of *Mahadeva*, he is exhibited also as a type of reproduction; to destroy, according to the Vedantas of India, the Sufis of Persia, and even to many European schools of philosophy, being only to generate or reproduce under another form.

Sivas, (*se-vas'*), a town of Asiatic Turkey, cap. of the pashalic of Sivas, on the Kizil Irmak, 60 m. S.S.E. of Tokat; Lat. 39° 20' N., Lon. 37° E.; pop. 25,000.

Sivathe'rium, *n.* [*Siva*, and Gr. *therion*, a wild beast.] (*Pul.*) An extinct genus of Ruminantia found in fossil remains in the tertiary strata of the Sivalik Sub-Himalayan range. It surpassed all known ruminants in size, and had four horns.

Six, (*siks*), *a.* [A. S. and Fr. *six*; Lat. *sex*.] Twice three.

—*n.* The number of six, or twice three.

Six'fold, *a.* Six times as much or as many; six times told or repeated.

Six'mile Run, in New Jersey, a post-village of Somerset co.

Six'pence, *n.* An English silver coin of the value of six pennies; half a shilling = \$0.12.—The value of six pennies.

Six'penny, *a.* Worth sixpence.

Six'score, *a.* and *n.* Six times twenty.

Six'teen, *a.* [A. S. *sixtene*, *sixtyne*.] Six and ten; noting the sum of six and ten.

Six'teenth, *a.* [A. S. *sixleotha*.] The sixth after the tenth; the ordinal of sixteen.

—*n.* The sum of six and ten;—a symbol representing this sum; as, 16, xvi.

Sixth, *a.* [A. S. *sixta*.] The first after the fifth; the ordinal of six.

—*n.* The sixth part.

(*Mus.*) There are four kinds of sixths, two consonant and two dissonant. The consonant sixths are, first, the minor sixth, composed of three tones and two semitones major; secondly, the major sixth, composed of four tones and a major semitone. The dissonant sixths are, first, the diminished sixth, composed of two tones and three major semitones; secondly, the superfluous sixth, composed of four tones, a major semitone, and a minor semitone.

Sixth'ly, *adv.* In the sixth place.

Sixth'rate, *n.* A British vessel of war bearing a captain.

Six'tieth, *a.* [A. S. *sixteogotha*.] The ordinal of sixty;—noting one of sixty parts into which a thing is divided.

—*n.* One of sixty equal parts.

Six'tus I., Pope, and successor of Alexander I., in 119; martyred 127.

SIXTUS II., was the successor of Stephen I. He is stated to have been an Athenian and pagan philosopher before his conversion to Christianity. He was one of those who suffered martyrdom in the persecution of the Christians by Valerianus, 258.

SIXTUS III., was the successor of Celestin I., in 432. He endeavored to reconcile the disputes existing in the Eastern Church, particularly in the case of Cyril, bishop of Alexandria, and John of Antioch. Some of the

epistles which he composed with regard to those controversies are extant, and are included in the collection of Constant. He was also a munificent patron of learning, and is stated to have left 5,000 silver marks to be expended in the embellishment of ecclesiastical structures. D. 440.

SIXTUS IV., Pope, b. 1414, was the son of a fisherman on the coast of Genoa, but became a monk of the order of the Cordeliers. His abilities procured him the chair of divinity at Padua and other universities of Italy. He also became general of his order, and was honored with the cardinalship by Paul II., whom he succeeded in 1471. He is accused with having been a participator in the conspiracy of the Pazzi, the object of which was to destroy the Medici family. He also endeavored to raise a new crusade against the infidels, but without success. D. 1484.

SIXTUS V., (*Felice Peretti*), one of the most celebrated of the popes of Rome, born near Montalto, in the March of Aucona, 1521. He entered the convent of the Cordeliers at Ascoli, and by his natural good abilities, and his popularity as a preacher, made his way rapidly, notwithstanding a petulant temper and frequent contentions with his associates. He was successively professor of theology, commissary-general of his order at Bologna, and inquisitor at Venice, whence he fled to Rome, and obtained still higher honors and offices. A remarkable change appeared in his character or manners—he showed himself meek and amiable, and ingratiated himself with all who had to do with him. Pius V., who had been his pupil, got him chosen general of the Cordeliers, named him his confessor, and, in 1570, created him cardinal. He was not in favor with Gregory XIII., and it is said that in his retirement he feigned great feebleness, walked leaning on a stick, his head declined, and his voice broken. These signs of old age vanished with surprising suddenness the moment of his election as successor to Gregory, in April, 1585. He threw away his staff, lifted up his head, and made the place ring with his loud *Te Deum*. His first care was to repress brigandage, and make Rome and the States of the Church safe from the violence which had long prevailed. One year of his vigorous government made an immense and beneficial change. Before the end of 1585 *S.* published a bull of excommunication against Henry of Navarre and the Prince of Condé. After the murder of the Duke of Guise and the Cardinal of Lorraine, he cited Henry III. of France to Rome, and on his non-appearance excommunicated him. During the five years of his pontificate, *S.* formed and executed many great designs for the improvement and adornment of Rome, at a cost which made him so unpopular with the people, that after his death they destroyed his statue. He caused the famous granite obelisk, which Caligula had brought from Egypt, to be set up on a pedestal; completed a great aqueduct for the supply of Rome with water; rebuilt the library of the Vatican, and established the celebrated printing-office in connection with it; had new editions of the *Septuagint* and the *Vulgate* published at his own expense, and yet left the treasury rich. *S.* confirmed the order of "Feuillants;" established or reformed many congregations for the management of secular or ecclesiastical affairs, and fixed the number of cardinals at seventy. D. 1590.

Six'ty, *a.* [A. S. *sixtig*.] Six times ten.

—*n.* The number of six times ten.

Siz'able, *a.* Of considerable bulk; being of reasonable or suitable size.

Siz'ar, *n.* A student of the lowest rank at the University of Cambridge (Eng.), who eats at the public table, after the Fellows, free of expense. The sizars were probably so called from being originally employed in distributing the *size*, or provisions.

Size, (*siz*), *n.* [Contracted from *assize*, q. v.] A rated or adjusted quantity or magnitude, according to some standard; comparative magnitude; extent of superficies; dimensions; bulk; largeness; greatness; magnitude.

—*v. a.* To adjust or arrange according to size or bulk; to take the *size* of, as of soldiers.

[Sp. *sisa*.] A sort of varnish, paint, or glue used by painters, paper-manufacturers, &c.; a thick, tenacious varnish used by gilders; a buffy coat on the surface of coagulated blood.

—*v. a.* To cover with size; to prepare with size.

Sizeable, (*siz'a-bl*), *a.* See SIZABLE.

Sized, (*sizd*), *a.* Having a particular magnitude or size.

Siz'el, *n.* The clippings of various metals, produced in their manufacture; also the slips of metal out of which blanks for coins have been cut. See SCISSEL.

Size-roll, *n.* A small piece of parchment added to some part of a record.

Size'stick, *n.* A measuring stick used by shoemakers.

Siz'iness, *n.* Quality of being sizy; glutinousness; visconsness.

Siz'ing, *n.* A weak glue used in manufactories; also, the act of covering with size.

Sizy, *a.* Having the quality of size; glutinous; thick and viscous; ropy; having the adhesiveness of size.

Siz'le, *v. n.* To hiss from the action of the fire; to effervesce; to fizzle.

—*n.* A hiss from the action of fire; effervescence.

Skag'er-rack, or **Skagerae**, an arm of the North Sea, or German Ocean, between Norway and the peninsula of Jutland, and communicating with the Cattegat. Ext. 150 m. long and 80 broad.

Ska'git River, rises in British Columbia, and flows into Puget Sound from Whatcom co., Washington, after a S.W. course of 100 m.

Skain (*skān*), *n.* See **SKEIN**.

Skalholt, a town of Iceland, 35 m. E. of Reikiavik.
Ska'liez, a town of N.W. Hungary, co. of Neutra, 54 m. N.W. of Neutra. *Manuf.* Linen and woollen goods. *Pop.* 9,000.

Skama'nia, in Washington, a S.W. co., bordering on Oregon; area, 1,636 sq. m. *Rivers*, Columbia, Klikitat, Cathlamet, and White Salmon. *Surface*, traversed by the Cascade Range, of which Mount St. Helen attains an elevation of 13,330 feet; *soil*, fertile in the valleys. *Cap.* Stevenson. *Pop.* (1897) 950.

Skauteles, (*skan-e-at'les*), in New York, a lake in the S.W. of Onondaga co., about 16 m. long and 2 wide. — A post-village and township of Onondaga co., 18 m. S.W. of Syracuse.

Skate, *n.* [*Dan. schaats*. See **SHOOT**.] A sort of shoe, or sandal, furnished with a smooth iron, and fastened under the foot, for shooting along, moving rapidly, or sliding on ice.

—*v. n.* To slide or move on skates.

Skate, *n.* [*A. S. scadda*; *Lat. squatus, squatina*; *It. squadro, squaja*.] (*Zoöl.*) The common name of the cartilaginous fishes composing the genus *Raia*, family *Raidæ*, *q. v.*

Skater, *n.* One who skates on ice.

Skating, *n.* The act or art of moving on skates. It is one of the finest exercises and most healthful outdoor pastimes in winter, when rivers and ponds are frozen, and offer a clear surface of ice. The art consists in poising the body on a sharp ridge of iron beneath the sole of the foot, and advancing on the ice in that position, one foot relieving the other. The skate itself is a well-known apparatus, generally made of wood and iron, with straps and buckles to attach it to the foot. The iron should be about a quarter of an inch thick, and not deeper than three-quarters of an inch, and smooth or flat along its under edge. The edges should be smooth, free from rust, and sharply ground. The best skaters are found in Holland (where men and women skate to market), Germany, and Russia. In the *Edda*, written 800 years ago, *S.* is mentioned. The god Uller is represented as being distinguished for his beauty, arrows, and skates. In speaking of *S. Klopstock* says that man, "like the Homeric gods, strides with winged feet over the sea transmuted into solid ground." Goethe, Herder, and other German poets have also sung its praises.

Skating Rink, *n.* A place or hall for skating, either upon ice, or with rollers upon other hard substances.

Skeet, (*naut.*) A scoop used for throwing water on the decks and lower sails.

Skeg, *n.* A kind of wild plum. — A sort of oats.

Skegger, *n.* A little salmon.

Skein, (*skain*), *n.* A knot, or number of knots, of thread, yarn, or silk. A skein of cotton-yarn contains 80 threads of 54 inches.

Skeletology, *n.* [*Gr. skeleton, and logos, a discourse*.] A treatise on the solid parts of the body.

Skeleton, *n.* [*Gr. skelēton, dried up, parched; Fr. squelette*.] (*Anat.*) The dry osseous framework of an animal body preserved in its natural position. It usually consists of various parts; and when these are connected together by their natural ligaments, it is said to be a natural skeleton; and when they are artificially connected by wires or the like, it is said to be an artificial skeleton. In some of the lowest classes of animals, the *S.* consists only of a single piece; in others, it is external, in the form of a case. In man, however, and all the higher animals, the *S.* is internal, and composed of numerous pieces, adapted to give strength and beauty to the body, and to admit of motion in various directions (*Fig. 2375*). The *S.* consists of two complete sets of bones, united in the centre or medial line, those on the right side being an exact counterpart of those on the left, 125 bones constituting the perfect set on one side. Though some of these, like those of the spinal column, the breastbone, and *os hyoides*, are single bones, they are capable of an accurate partition into two exactly corresponding halves.

—The general structure or frame of anything; the heads and outline of a literary performance, particularly of a sermon. — A very thin or lean person; as, a living skeleton.

—*a.* Resembling a skeleton; consisting of mere framework; wanting those parts which make up a complete

body or form. — Containing mere outlines or heads, as of a literary performance.

Skeletonize, *v. a.* To prepare a skeleton of; to present in a framed but unfinished state.

Skeleton-key, *n.* A key used for several varieties of locks.

Skel'ligs, 3 rocky islets off the S.W. coast of Ireland, co. of Kerry, in the Atlantic Ocean, 9 m. S.W. of Brea Head, Valentia Island; *Lat.* 51° 46' N., *Lon.* 10° 32' W.

Skel'ly, *v. n.* To squint.

Skel'p, *n.* The rolled sheet of wrought-iron from which a gun-barrel is made.

Skep'tic, *n.* See **SCEPTIC**.

Sker'ries, in the Irish Sea, an islet off the N.W. coast of Anglesey, with a light-house; *Lat.* 53° 25' 3" N., *Lon.* 4° 36' 5" W.

Sker'ries, or Sker'ry Isles, three small islands in the extreme E. of the Shetland group, 10 m. S.E. of Fetlar; *pop.* 122.

Sketch, *n.* [*Ger. skizze; Fr. esquisse*.] A rough dash or outline of an object; an outline or general delineation of anything; a first rough or incomplete draught of a plan or any design.

—*v. a.* To draw the outline or general figure of; to make a rough draught of; to plan by giving the principal points or ideas; to map; to delineate; to depict; to design; to portray.

Sketch'er, *n.* One who sketches.

Sketch'ily, *adv.* In a sketchy manner.

Sketch'y, *a.* Containing slight sketches or outlines; resembling sketches; unfinished; incomplete.

Skew, (*sku*), *n.* [*Ger. schief*, from *schieben*, to push, to shove.] Wry; distorted; oblique.

—*v. n.* To walk or to move obliquely; to start aside, as a horse. (*Local*.)

Skew'back, *n.* (*Arch.*) The sloping abutment, in brickwork and masonry, for the end of the arched head of an aperture.

Skew'bridge, *n.* (*Engineering*.) A bridge in which the passages under and over the arch intersect each other obliquely. There are cases of frequent occurrence in which various sorts of passages and courses necessarily cross each other obliquely, as well as on different levels, and where it would be difficult or impossible to construct a square bridge which should both have sufficient strength and at the same time leave the lower passage quite clear. In such cases, recourse must be had to a different form of arch, placed obliquely to the abutments, and yet exerting its thrust in the direction of the upper passage. Such a structure is called a *S.-B.*, and is frequently required on lines of railway, which it is important to keep as straight as possible. The difficulty of building *S.-B.* increases with the obliquity of the angle from 90° to 45°, which is supposed to be the most hazardous angle for a semi-circular arch; but beyond that limit, instead of increasing, it rather diminishes to about 25°, which appears to be about the natural limit for a semi-cylindrical arch. Elliptical oblique arches are deficient in stability, more difficult to execute, and more expensive than semi-circular or segmental arches.

Skewer, (*skü'er*), *n.* [*Sw. and Goth. skifva, pl. skifvar*.] A slice, slip, or cutting of wood; a pin of wood or iron for fastening meat to a spit, or for keeping it in form while roasting.

—*v. a.* To fasten with skewers.

Skia'io, (*anc. Sciathus*), a small island of the Grecian Archipelago, in the Egean Sea, 10 m. N. of Eubœa; *Lat.* 39° 12' N., *Lon.* 23° 35' E. *Ext.* 4 m. in length and breadth.

Skibbeen', a town of Ireland, prov. of Munster, co. of Cork, on the Ilan, 40 m. S.W. of Cork; *pop.* 4,000.

Skid, Skeed, *n.* [*Allied to Ger. scheiden*, to cleave.] An iron shoe or socket for checking the revolution of a wheel of a carriage when going down a hill; — otherwise called *brake*, and acting on the same principle as the brake of a railway-car. — In the U. States, a lengthy square piece of timber, along which something is rolled, or by which it is supported.

(*Naut.*) On shipboard, any beam or timber used as a support for some heavy body, to prevent its weight falling on a weak part of the vessel's structure.

Skid-beams. Timbers laid crosswise in a ship's waist, to sustain the larger boats, the launch in particular.

—*v. a.* To check by means of a skid, as wheels in going down hill.

Skiff, *n.* [*Fr. esquif; Ger. schiff*.] A small light boat resembling a yawl.

—*v. a.* To pass over in a light boat.

Skil'der, *v. n.* To live by begging or pilfering. — *Scott.*

Skil'ful, *a.* Possessing skill; skilled; discriminating; discerning; knowing; well versed in any art; dexterous; able in management; able to perform nicely any manual operation in the arts or professions; well versed in practice; expert; adroit; handy.

Skil'fully, *adv.* With skill; dexterously.

Skil'fulness, *n.* Quality of possessing skill; dexterity; ability to perform well in any art or business.

Skill, *n.* [*A. S. scylan, to distinguish*.] Ability or power to distinguish, discriminate, or discern; knowledge; the familiar knowledge of any art or science, united with readiness and dexterity in the application of it to practical purposes; art; dexterity; expertness; adroitness; activity.

Skilled, (*skild*), *a.* Having skill; having familiar knowledge, united with readiness and dexterity in the application of it; familiarly acquainted with; expert; skilful; as, a *skilled* mechanic.

Skillet, *n.* [*O. Fr. escuelle*.] A small vessel of metal, with a long handle, used for heating and boiling water, &c.

Skil'ton, in Indiana, a twp. of Warwick co.

Skilts, *n. pl.* Short, loose, tow trousers. (*Local U. S.*)
Skim', *v. a.* [*From scum, q. v.*] To take off, as the thick, gross matter which separates from any liquid substance and collects on the surface; to take off by skimming.

—To pass near the surface; to brush the surface slightly.
 —*v. n.* To pass or glide over or along the surface, or near the surface; to pass lightly; to glide along in an even, smooth course, or without flapping; to hasten over superficially, or with slight attention.

Skim'ble-seam'ble, *a.* Rambling; uncollected; wandering; wild. (*Low*.)

Skim-colter, *n.* The colter of a plough used for paring land.

Skink, or **Shikagna River**, in Iowa, rises in Hamilton co., and falls into the Mississippi 8 m. S. of Burlington, after a S.E. course of 250 m.

Skimmed, (*skind*), *a.* Taken from the surface; having the thick matter taken from the surface; brushed along.

Skimmer, *n.* That which skims; particularly, a utensil used for skimming liquors.

(*Zoöl.*) See **SCISSOR-BILL**.

Skimming, *n.* Act of taking off the scum, &c., from the surface of a liquid; also, that which is skimmed.

Skim'mingly, *adv.* By gliding along the surface.

Skin', *n.* [*A. S. scin*.] (*Anat.*) That membrane of variable thickness which covers the whole body externally, and extends inwards into all the natural openings, where it changes its properties, becoming soft and moist, and hence known as mucous membrane. The *S.* is generally described as composed of three layers: — the *cuticle*, the *rete mucosum*, and the *cutis vera*, the last being the most internal. The *cutis (dermis)*, or true *S.*, consists of two layers, of which the deeper is called the *corium*, and the more superficial, the *papillary layer*. The *corium* is composed of numerous fibres closely interlaced, and forming a smooth surface for the support of the papillary layer. It varies in thickness, being, as a general rule, thick on the exposed parts and thin on the protected. The papillary layer is soft, and formed by numerous papillæ, which cover its whole surface. It contains the expansions of the sensitive nerves. The *rete mucosum* (mucous network) lies immediately over the *cutis*, and in some measure diminishes the inequalities of its surface, being thicker between the papillæ and thinner on their summits. It is composed of minute, uncleated cells, and is almost pulpy in consistence. It is very slightly developed in the white races, but is very distinct and thick in those that are darker, the cells, which are filled with a pigment, being that which gives the dark color to their *S.* The *cuticle*, scarfskin, or epidermis, is a disorganized scaly substance, serving to protect from injury the more delicate *cutis*. It is thickest on the most exposed parts; and on the palms of the hands and soles of the feet it consists of several layers. The *S.* performs various important functions. It is the seat of common sensation, and is furnished with numerous pores or openings, which give passage to the sweat and other exhalations. It is in this way the great regulator of the heat of the body.

Diseases of the S. are of very different kinds, and of very different degrees of importance. Some are dangerous to life, others are attended with no danger: some are attended with fever and rapid in their course, others are chronic and obstinate; some are disfiguring; some contagious; and so on. The different diseases of the *S.* may be classified into eight orders, distinguished from each other solely by the appearances upon the *S.*, as follows: — 1. *Papulæ*, or pimples, little elevations of the cuticle of a red color, and not containing any fluid, as in the earliest stage of small-pox. — 2. *Squamæ*, or scales, small, hard, thickened, opaque, whitish patches of unhealthy cuticle, as in leprosy. — 3. *Erythematæ*, or rashes, superficial red patches varying in figure and size, and irregularly diffused over the surface, as in measles, scarlet-fever, &c. — 4. *Bullæ*, blebs or miniature blisters, as sometimes occur in erysipelas. — 5. *Pustulæ*, or pustules, circumscribed elevations of the cuticle containing pus, and having red inflamed bases, as in the eruption of small-pox when at its height and maturity. — 6. *Vesiculæ*, or vesicles, small elevations of the cuticle, covering a fluid usually at first clear and colorless, but becoming afterwards opaque and whitish, or pearly, as in cow-pox and chicken-pox. — 7. *Tubercula*, tubercles, small, hard, superficial tumors, circumscribed and permanent, or, if they separate at all, it is only partially. — 8. *Maculæ*, spots or patches, arising from excess or deficiency of the coloring matter of the skin, and frequently occurring congenitally, or connected with some slight disorder of the digestive organs or of the general health. Such a classification as this is very useful for the purpose of distinguishing the different appearances, but it is of little further service. They are almost all more or less important manifestations in cutaneous tissues of disordered or diseased conditions of one or more of the vital functions. Besides, a complaint which is popular to-day may be vesicular to-morrow, and pustular the day following. Some arrangement directing the attention more entirely to the relations and constitutional and visceral dependencies of these affections, and leading to rational and successful methods of cure, is still wanted.

—A hide; a pelt; the skin of an animal separated from the body, whether green, dry, or tanned; the bark or husk of a plant; the exterior coat or rind of fruits and plants.

—*v. a.* To strip off the skin or hide of; to flag; to peel. To cover with skin; to cover superficially.

—*v. n.* To be covered with skin.

Skin-deep, *a.* Superficial; slight; not deep.

Skinflint, *n.* A very niggardly person.

Skink, *n.* (*Zoöl.*) The common name of the lizards

comprising the family *Scincoidæ*. They have the body cylindrical, and covered with smooth scales, variable in shape and size, and disposed in the form of a quincunx. The head is covered with large, thin, angular plates; the neck is of the same size as the thorax; tongue free, flat, and notched, and not retractile into a sheath; and the jaws are furnished with closely set teeth. The body and tail seem to be one continued and uniform piece. The genera and species are quite numerous.

Skin/less, *a.* [From *skin*.] Having no skin, or having a very thin skin; as, *skinless* fruit.

Skin/ner, *n.* One who skins; one who deals in skins, pelts, or hides; a furrier.

Skin/ner's Eddy, in *Pennsylvania*, a post-village of Wyoming co., 150 m. N.E. of Harrisburg.

Skin/niness, *n.* Quality of being skinniness.

Skin/ny, *a.* Consisting of skin, or of skin only; deficient in flesh.

Skinosa, (*ske-no'sa*), a small island of the Grecian Archipelago, 5 m. S. of Naxos.

Skin/wool, *n.* Wool pulled from the dead skin — not sheared from a living animal.

Skip, *v. n.* [Dan. *kipper*, to leap.] To bound; to spring, as a goat or lamb; to bound lightly and joyfully.

—*v. a.* To pass over or by; to omit; to miss.

—*n.* A light leap; a bound; a spring.

Skip/jack, *n.* An upstart; a parvenu.

(*Zoöl.*) The common name of the insects of the family *Elateridae*, *q. v.*

Skip/kennel, *n.* A lackey; a foot-boy.

Skip/pack, in *Pennsylvania*, a post-village and township of Montgomery co., 86 m. E. of Harrisburg.

Skip/pper, *n.* [Dan.] The master of a trading or merchant vessel.

(*Zoöl.*) The common name of the lepidopterous insects composing the family *Hesperidae*. They have the body short and thick, head large, eyes prominent, antennæ short, with the knob curved like a hook or bent to one side, legs six, and the four hindmost shanks armed with two pairs of spurs. *S. fly* with a jerking motion, and hence their name. They are generally of a rich brown, marked with yellow spots. The species are quite numerous, and expand from one inch and a half to two inches and a half.

Skip/ping, *a.* Leaping lightly; bounding.

Skip/pingly, *adv.* By leaps.

Skip/ping-rope, *n.* A short cord or rope used by children to skip over.

Skip/ton, a town of England, co. of York, on the Aire, 38 m. W. of York. *Manuf.* Cotton goods. *Pop.* 4,962.

Skir/mish, *n.* [Fr. *escarmouche*; It. *scaramuccia*, a skirmish, contest, *schermo*, a fight, from Old Ger. *scirm*, *scerm*, defence, protection, a shield, *scirman*, to defend.] A slight fight; a light combat by armies at a distance from each other, or between detachments and small parties; a contest; a contention.

—*v. n.* To fight irregularly, or in small parties.

Skir/misher, *n.* One who skirmishes.

Skir/mishing, *n.* The act of fighting in a loose or slight encounter; guerilla warfare.

Skir/ret, *n.* (*Bot.*) The common name of the genus *Sium*, order *Apiaceæ*. The species *Sium sisarum* is a native of China and Japan, but which has long been cultivated in gardens in Europe, and occasionally in this country, for the sake of its roots, which are tuberous and clustered, sometimes 6 inches long, and of the thickness of the finger. They are sweet, succulent, and nutritious, with a somewhat aromatic flavor, and when boiled, are a very agreeable article of food. A kind of spirituous liquor is sometimes made from them. Good sugar can also be extracted. It is propagated either by seed or by very small offsets from the roots. It has a stem from 2-3 feet high; the lower leaves pinnate, with oblong serrated leaflets, and a heart-shaped terminal leaf, the upper ones ternate with lanceolate leaflets.

Skirt, *n.* [Swed. *skjorta*; Dan. *skjorte*; Icel. *skirta*, an apron. Etymol. uncertain.] The lower and loose part of a garment; the part below the waist; as, the *skirts* of a coat or riding habit. — The edge or selvage of any part of dress. — A woman's article of apparel resembling a petticoat; as, a linen *skirt*. — Border, edge, verge; margin; as, on the *skirts* of a country. — In animals, the diaphragm or midriff.

—*v. a.* To border; to form the verge, selvage, or outer line of; to run along the margin of; as, a city *skirted* by the ocean.

—*v. n.* To be on the border; to live near the extremity.

Skirt/ing, *n.* Material for skirts; also, skirts taken collectively.

Skirt/ing, Skirt/ing-board, *n.* (*Arch.*) A narrow board forming a plinth to an external wall; a wash-board.

Skit, *n.* A gibe; a sarcastic reflection; a joke at the expense of another.

—*v. a.* To gibe; to pass jokes upon. (Prov. Eng.)

Skit/tish, *a.* [Probably from A. S. *scytan*, to shoot.] Easily made to start forward or to the side; restive; shy; easily alarmed or confused; shunning approach to familiarity; timorous; as, a *skittish* mule.

—Wanton; volatile; hasty; impetuous; as, *skittish* humor, a *skittish* lass. — Fickle; changeable; inconstant; not to be relied on; as, *skittish* fortune.

Skit/tishly, *adv.* In a skittish manner; shyly; wantonly; changeably.

Skit/tishness, *n.* Quality of being skittish; shyness; aptness to fly approach; timorousness; fickleness; wantonness.

Skit/tle-ball, *n.* A disc, or flat, cheese-shaped ball of hard wood, used for throwing at skittles or nine-pins.

Skittles, (*skit'tl'z*) *n. pl.* (*Games.*) Same as NINE-PINS, *q. v.*

Skive, *n.* The iron lap used by diamond-polishers in finishing the facets of the gem.

Skiv'er, *n.* An inferior quality of leather, made of split sheep-skin, tanned by immersion in sumac, and dyed. It is used for hat-linings, pocket-books, book-binding, and other purposes.

Skoko/mish River, in *Washington*, flows S.E. into Hood's Canal from Mason co.

Skolop/site, *n.* (*Min.*) A mineral of a grayish-white or reddish-gray color, consisting chiefly of silica, alumina, lime, and soda.

Skomy/wong River, in *Wisconsin*, flows into Wisconsin river from Marathon co.

Skoo/kmehuck, in *Washington*, a post-village of Lewis co., 8 m. N. of Claquato.

Skope/lo, a small island of the Grecian Archipelago, 15 m. N. of Eubœa; *area*, 32 sq. m.; *pop.* 2,500.

Skop/in, a town of European Russia, on the Werda, 50 m. S. of Riazan. *Manuf.* Russian leather. *Pop.* 6,000.

Skout, *n.* (*Zoöl.*) The GUILLEMOT, *q. v.*

Skowhe/gan, in *Maine*, a post-village and township of Somerset co., 30 m. N.E. of Augusta.

Skreed, *n.* Floating ice in small detached portions.

Skrim/mage, *n.* Same as SCRIMMAGE, *q. v.*

Skrimpy, *a.* Inclined to scrimp; mean; close-fisted; stingy; parsimonious; as, a *skrimpy* individual. (*Colloq.*)

Skne, *a.* and *n.* Same as SKEW, *q. v.*

Skne/sight, (*-sīt*), *n.* (*Med.*) Defective vision, in which objects can be distinctly perceived when looked at with the eyes askew.

Skulk, *Skulk*, *v. n.* [Sw. and Goth. *skolka*, to flee secretly or by stealth.] To lurk; to lie close from shame, fear of injury, or detection; to get out of the way in a sneaking, stealthy manner; as, he *skulks* from serving his country.

Skulk, *Skulk'er*, *n.* One who skulks; one who evades the performance of duty; a shirk; a sneak; as, no *skulkers* shall sign articles on this ship.

Skulk, *n.* A troop of foxes.

Skulkingly, *adv.* In a skulking, sneaking manner.

Skull, (sometimes written SCULL,) *n.* [O. Ger. *sculla*, the skull of man or beast;

Icel. *koltr*, the skull, from *skyla*, to hide, conceal; Sw. and Goth. *skalle*, the skull, from *skul*, a pan.] (*Anat.*) The osseous case or covering which, containing the brain, forms the forehead, and every part of the head except the face; the cranium (Fig. 2376). The bones of the skull are 8 in number, — the *frontal*, *occipital*, two *parietal*, two *temporal*, the *sphenoid*, and *ethmoid*. These bones are separate in the newborn child, but as age advances they gradually consolidate into a single bone, the joints of union being called the *sutures*. — Figuratively, the brain, as the seat of intelligence; as, he has an empty *skull*. — An oar. See SCULL, the more correct orthography.

Skull-cap, *n.* A cap fitting close to the head after the manner of a Turkish fez; a calotte.

Skull-fish, *n.* A term given by whalers to an old whale, or one more than two years old.

Skunk, *n.* (*Zoöl.*) The common name of the carnivorous animals comprising the genus *Mephitis*, family *Mustelidae*. Eighteen species are known, eight of which are found in N. America, and ten in South America. The genus is especially distinguished by its exceedingly large anal gland, which exhales a putrid and offensive odor, shed by the animal when annoyed or irritated. The scent is so powerful, that it endures for many years. — Hence, an opprobrious epithet applied in the U. States to a mean, cowardly, disreputable person.

Skunk-bird, *n.* (*Zoöl.*) A name of the bobolink.

Skunk-cabbage, *Skunk-weed*, *n.* (*Bot.*) See SYMLOCARPUS.

Skunk-head, *n.* (*Zoöl.*) The *Anas Labrador* of Wilson; also called *Pied Duck*.

Skunk'ish, *a.* Resembling, or pertaining to, the skunk; — especially, possessing the peculiar odor of a skunk.

Skurry, *n.* Haste; impetuosity; precipitation; — generally used in the colloquialism *hurry-skurry*.

Skutsch, (*skutch*), a town of Austria, in Bohemia, 12 m. S.E. of Chrudin; *pop.* 4,000.

Skut/terdite, *n.* [From *Skutterud*, in Norway.] (*Min.*) A native arsenide of cobalt found at Skutterud, near Modun, in Norway. It occurs both crystallized and massive, of a color between tin-white and lead-gray, with a metallic lustre and occasionally an iridescent tarnish.

Sky, *n.* [A. S. *scwa*, *scua*, a shade; Swed., Dan., and Icel. *sky*, a cloud.] The heavens; the aerial region which surrounds the earth; the apparent arch or vault

of heaven, that on a clear day is of a blue color, the cause of which has hitherto not been satisfactorily accounted for, although various theories have been propounded thereupon. — The weather; the climate.

"The sky is changed! and such a change!" — Byron.

Open sky, *sky*, with no shelter coming between. (NOTE. *Sky* forms the frequent prefix of self-explaining compound phrases; as, *sky-colored*, *sky-guided*, *sky-rolling*, &c.)

Sky'-blue, *a.* Cerulean; of the color of the sky.

Sky'-color, *n.* The color of the sky; azure; a particular shade of blue.

Skye, (*ski*), the largest island of the Hebrides, in the W. of Scotland, co. of Inverness, separated from the mainland by the narrow strait of Loch Alsh. *Ext.* 50 m. long, with a breadth varying from 4 to 2½ m. *Area*, 550 sq. m. The surface is mountainous, and the coast deeply indented with inlets. *Climate*, Mild, but variable. Cattle-grazing and fishing are the principal occupations of the inhabitants. A peculiar breed of terrier, known as the *Skye-terrier*, is raised here, and is in good demand. *Pop.* 22,000.

Skied, (*skīd*), *a.* Encircled by sky; as, a *skied* peak. (Used only in poetry.)

Sky'ey, *a.* Resembling the sky; ethereal.

Sky'-high, *a.* High as the sky; — hence, very high; used as a colloquial vulgarism; as, his wife blew him up *sky-high*.

Sky'ish, *a.* Like the sky; ethereal. (R.)

Sky'lark, *n.* (*Zoöl.*) See ALANDA.

Sky'larking, *n.* (*Naut.*) The act of running about the spars and rigging in sport, as practised by reefers, &c.; — hence, practical joking; frolicking; mischievous sporting; carousing, &c.; as, we were out for a night's *sky-larking*.

Sky/light, *n.* (*Arch.*) A window placed in the roof of a building, or ceiling of a room, for the admission of light.

Sky-parlor, *n.* A title humorously given to an attic, or uppermost room in a house.

Skyros, or **Seyros**, (*ske'ras*), an island of the Grecian Archipelago, in the Ægean Sea, 24 m. N.E. of Cape Kili, in Eubœa. *Ext.* 17 m. long; breadth varying from 2 to 7 m. *Area*, 60 sq. m. *Chief town*, St. George. *Pop.* 3,000.

Sky-sail, (*Colloq.* *skī'sl*) *n.* (*Naut.*) The sail set above the royal, being the highest sail carried by a full-rigged ship. It is seldom used except in light winds, and fair weather.

Sky-scraper, *n.* (*Naut.*) A triangular sky sail.

Sky'ward, *n.* In the direction of the sky; toward the heavens, or aloft.

Slab, *n.* [W. *llab*, a flag or thin strip.] A thin piece of anything having plane surfaces; as, a *slab* of marble, stone, soap, &c. — An exterior strip taken from a log, or large piece of timber, in sawing it into boards, planks, scantling, and the like.

Slabs of tin, the smaller masses into which the smelters cast the metal.

Slabber, (*Colloq.* *slōb'ber*), *v. n.* [Ger. *schlabben*, *schlabbern*.] To slaver; to driblet; to let the saliva or other liquid run from the mouth carelessly; as, a *slabbering* infant.

—*v. a.* To wet and soil by liquids, suffered to fall carelessly from the mouth, or by fluid spilled. — To shed; to spill.

—*n.* Slaver; liquid or moisture exuded and let fall from the mouth in a careless or drivelling manner.

Slabberer, (*Colloq.* *slōb'er*), *n.* One who slabbers; a driveller; an idiot.

Slabbery, (*Colloq.* *slōb'er*), *a.* Resembling slabber; covered with slabber; also, slippery; sloppy; slushy; as, *slabbery* ground.

Slab/biness, *n.* State of being thick, ropy, or slabby.

Slab/by, *a.* (*comp.* SLABBER; *superl.* SLABBIEST.) Viscous; thick; as, a *slabby* potion. — Sloppy; muddy; slushy; as, a *slabby* road.

Slab-line, *n.* (*Naut.*) A small rope leading through a block under the lower yards, and thence to either foot of the sail, for the purpose of tricing it up.

Slab-sided, *a.* Flat-sided; — hence, tall, or long and lank; as, a *slab-sided* man.

Slab/town, in *New Jersey*, a village of Burlington co.

Slabtown, in *Pennsylvania*, a village of Montour co., 15 m. S.E. of Danville.

Slabtown, in *S. Carolina*, a post-village of Anderson, dist., 130 m. W.N.W. of Columbia.

Slack, *a.* (*comp.* SLACKER; *superl.* SLACKEST.) [A. S. *slac*; Icel. *slakr*; Ger. *schlaff*.] Not tight or tense; relaxed; not hard drawn or firmly extended; as, a *slack* rope. — Not holding fast; weak; lax; remiss; as, a *slack* hand. — Not exercising due diligence; not earnest, zealous, or eager; as, he is *slack* in his attentions. — Abated; diminished; not violent or rapid; slow; as, a *slack* motion.

Slack in stays. (*Naut.*) Said of a ship, when slow in going about or tacking. — *Slack-water*, the interval between the ebb and flow of the tide.

—*adv.* In a slack manner; partially; inadequately; not thoroughly or intensely; as, biscuit *slack-baked*.

—*n.* The part of a rope that hangs loose, having no strain or tension upon it. — In England, small or cobble coal.

Slack, **Slacken**, (*slāk'n*) *v. n.* [A. S. *slacian*; Swed. *slakna*.] To become less tense, firm, or rigid; to relax in tension, as a rope under certain conditions. — To be remiss or backward; to neglect; as, he was observed to *slacken* in his attentions to the lady. — To lose cohesion or the quality of adhesion; as, mortar *slackens* and becomes friable. — To diminish in force or violence, to abate; as, the gale begins to *slacken*. — To become less rapid; to decrease in activity; as, the tide is *slackening*.

—To flag; to falter; to languish;—hence, to fail; as, his pace *slackens* visibly.

Slack, *Slack'en*, *v. a.* To reduce the tension of; to make less firm, rigid, or tight; as, to *slack* a rope, to *slacken* a ligature.—To relax; to remit; to mitigate; to diminish in intensity or severity; to abate; to lower; to relieve; to unbend; as, to *slacken* in exertion, to *slacken* one's pace, &c.—To employ less liberally; to withhold.—To check; to repress, or make less quick or active.—To slake; to deprive of cohesive properties; as, to *slack* lime.

Slackened, (*slāk'nd*.) *a.* Released or remitted.

Slack'ly, *adv.* In a slack manner; not tightly; loosely; negligently; remissly.

Slack'ness, *n.* State of being slack; looseness; the state opposed to *tension*; not tightness or rigidity. Remissness; negligence; inattention; slowness; tardiness; want of tendency; weakness; not intenseness.

Slag, *n.* [Ger. *schlacke*, from *slagen*, to lay down, deposit, cast off.] The dross or recrement of a metal;—also, vitrified cinders; the scoria of a volcano.

Slag'gy, *a.* Pertaining to slag; resembling slag.

Slake, *v. a.* [A. S. *leccan*, to wet, to moisten.] To apply water to; to quench; to extinguish; to mix with water so as to reduce to powder, as quicklime.

—*v. n.* To abate; to go out; to become extinct.

Slaked, (*slākt*.) *a.* Quenched; mixed with water so as to be reduced to powder.

Slake'less, *a.* Unquenchable; inextinguishable; as, *slakeless* thirst.

Slam, *v. a.* [Icel. *lem*, *lemia*, to strike.] To strike with force and noise; to shut with violence; as, to *slam* a door.

—*n.* A blow; a stroke; a violent driving and dashing against; a violent shutting of a door.

Slam-bang, *adv.* With a slamming or banging noise. (Used colloquially.)

Slan'der, *n.* [Fr. *esclandre*, from Gr. *skandalon*, a snare laid for an enemy, a stumbling-block, offence, from *skazō*, to limp, to halt.] Defamation; detraction; calumny; a false tale or report maliciously uttered, and tending to injure the reputation of another; disgrace; reproach; disreputableness; ill-name.

(*Law.*) Slander is of two kinds; one, which is actionable, as necessarily imparting some general damage to the party slandered; the other, actionable only when some special damage has been actually caused. The former includes such words as impute to a person crimes or misdemeanors that are legally punishable in a court of law; such as tend to injure him in his profession, trade, or calling by which he gains his livelihood, as imputing to him malpractice, incompetence, &c.; such as tend to his exclusion from society, or to disparage him in an office of public trust. In the other case, the words, though untrue and maliciously spoken, are not in themselves actionable, unless the party aggrieved is able to prove that he has sustained some certain actual loss therefrom. The words require to be maliciously spoken; and hence, if spoken in a friendly manner, or by way of advice, they are not actionable. There are certain kinds of communications which are regarded as privileged, and therefore not actionable; as when a master is called upon to give the character of a servant, or where a man communicates to another circumstances which it is right that he should know in relation to a matter in which they have a mutual interest. If the defendant be able to prove the words to be true, no action will lie for defamation, whether special damage has ensued or not; for the law holds them to be justifiable.

—*v. a.* To defame; to calumniate; to injure by maliciously uttering a false report respecting one; to asperse; to reproach.

Slan'derer, *n.* One who slanders; a defamer; a calumniator; one who injures another by maliciously reporting something to his prejudice; a propagator of false reports.

Slan'derous, *a.* Prone or disposed to slander; as, a *slanderous* tongue.—Containing slander or defamation; calumnious; scandalous; defamatory; as, a *slanderous* report, falsely and maliciously circulated.

Slan'derously, *adv.* With slander; calumniously.

Slan'derousness, *n.* State, quality, or condition of being slanderous or defamatory.

Slan'ey, a river of Ireland, rises in Wicklow co., prov. of Leinster, and flows into Wexford Harbor after a S. course of 60 m.

Slang, *n.* [Probably from Fr. *langue*; Lat. *lingua*, the tongue.] Low, vulgar, inelegant language; a colloquial mode of expression peculiar to, or familiarly used by, certain classes of society; cant; as, the *slang* of the prize-ring, of university students, of the turf, &c.

Slang-whanger, (*-wāng'gr*.) *n.* [Slang and whang, to belabor.] A blustering demagogue; a noisy, factious politician. (A cant term.)

Slang'y, *a.* Characterized by, conveyed in, or partaking of the qualities of, slang; using slang; as, a *slangy* form of speech, a *slangy* individual.

Slant, *v.* [Swed. *slant*, from *slinta*, to slide down.] Sloping; oblique; inclined from a direct line, whether horizontal or perpendicular.

—*v. a.* To deflect from a straight line; to give an oblique or sloping direction to.

—*n. n.* To slope; to have an oblique direction; to incline or lean from a right line; as, a *slanting* roof.

—*n.* A slope; an inclined plane; as, the *slant* of a hill.—An innuendo; an oblique reflection or sarcasm.—A Swedish copper coin, 196 of which average one rix-dollar.

Slant of wind, (*Naut.*) A transitory breeze of wind, or the period of its duration.

Slant'ingly, *adv.* With a slope or inclination; in a slanting manner; also, with innuendo, or oblique hint or reflection.

Slant'ly, **Slant'wise**, *adv.* Obliquely; in an inclined direction; aslope; as, he wore his hat *slantwise*.

Slap, *n.* [Ger. *schlappe*; allied to Lat. *alapa*, a box on the ear.] A blow administered with the open hand, or with some broad instrument; as, a *slap* across the face.

—*v. a.* (*imp.* and *pp.* SLAPPED.) (*slāpt*.) To strike with the open hand, or with something broad; as, to *slap* a child by way of punishment.

—*adv.* With a sudden and impetuous blow;—hence, promptly; on the spur of the moment; instant; as, he paid the money *slap* down.

Slap'dash, *adv.* At haphazard; at random; impetuously; in a bold, reckless, harnum-scarum manner; as, he rode *slapdash* at the fence.—Slap; iustanter; without shilly-shally or hesitation.

—*v. a.* To roughcast; to coat with cement or mortar in a rough, careless manner; as, to *slapdash* a wall.

Slap'-jack, *n.* In the U. States, a sort of flat cake baked upon a griddle; a kind of pancake; a flap-jack.

Slapper, *n.* The person who, or that which, slaps.—A person or thing of unusually large size; a monster; a whopper. (*Colloq.* and *vulgar.*)

Slapper, (*Colloq.* and *vulgar.*) A vulgarism expressive of great size or dimensions; very large or big; strapping; as, a *slapping* woman.

Slash, *v. a.* [Icel. *slasa*, to strike, to wound.] To cut by striking violently and at random; to cut in long cuts; to score; as, to *slash* flesh.—To slash; to whip; as, "to *slash* the vigorous steeds." (*King.*) (R.)—To crack, as a whip. (R.)

—*v. n.* To strike violently and at random with a sword, cutlass, or other cutting instrument; to lay about one right and left with blows.

—*n.* A long cut or score; a cut made at random or indiscriminately; as, he received a *slash* across the cheek.—A large slit or open cut made in the trunk-hose, sleeves, &c., of certain costumes of the 16th and 17th centuries, made to exhibit a lining of bright color between the openings.

Slash Cottage, in Virginia, a village of Hanover co., 20 m. N. of Richmond.

Slashed, (*slāst*.) *p. a.* Marked, scored, or cut, with a slash, or slashes; deeply gashed or incised;—particularly, having long, narrow openings, as an article of dress, to exhibit cloth or lining of a showier color beneath; as, a *slashed* doublet.

(*Bot.*) Laciniate.

Slashes, *n. pl.* An American term for a surface in woods, which has been slashed or cut over.

Slash'y, *a.* Same as SLUSHY, *q. v.*

Slat, *n.* A rung; a flat step, or narrow piece of timber employed to hold together larger pieces, or to support something; as, the *slats* of a cart or ladder.—A blow; a slap; as, a *slat* in the face.

—*v. a.* To slap; to beat; to push down with force. (*Prov. Eng.* and *colloq. Amer.*)

—To split; to crack; as, to *slat* bricks.

Slatch, (*slāch*.) *n.* (*Naut.*) The time of duration of a slant wind.—An interval of fair weather.—The slack of a rope.

Slate, *n.* [Swed. *slita*.] (*Geol.* and *Min.*) A very remarkable form of clay rock, frequently fossiliferous and not confined to one geological period. Consisting essentially of clay, the particles of S. are so mechanically arranged that the rock splits with perfect facility into

Fig. 2378.

SLATE QUARRIES AT PENRHYN, (North Wales.)

almost indefinitely thin layers in one direction only, and in all others either breaks with a jagged edge, or in well-defined joints at some distance from each other. Mineralogically, S. is nothing more than a pure clay; nor does there seem any reason to suppose that any approach is made in it towards crystalline structure. As, however, no other rock shows this tendency to split indefinitely, the case is one of great interest. Practically, slate is very valuable, owing to its peculiar facility of splitting, and the perfectly smooth natural face which it presents. Its hardness and compactness preserve it from all weathering by mere exposure, though, when ground down, it easily passes back into fine clay. S. is

always, and properly, regarded as a metamorphic rock. It has certainly undergone much change, though it is not quite certain what the change may have been. For a long time, S. was used almost exclusively for roofing. For this purpose the slates are cut into sizes varying from a few square inches to two square feet, though some are much larger. This is done with very simple tools and extreme rapidity. The rest is in slabs or thick slates, often very large. The use of S. and slabs has increased considerably of late years. Slabs are now used in house fittings; as in strong rooms, powder magazines, larders, partitions, baths, stables, floors, drains, &c. For all these, and many like purposes, its perfect resistance to the atmosphere, to all chemical influences, and to the passage of heat, render it invaluable. It is very largely used also for enamelling; the surface of enamelled slate being made to represent marble of all kinds with wonderful accuracy, and resisting almost all wear. Thus, for mantel-pieces, billiard-tables, ornamental slabs, and furniture, it has no equal, its cheapness being such as to drive other material out of the market. Quarries of great magnitude are worked in Cornwall, Wales, Scotland, and Ireland. The product of the Welsh quarries was formerly largely exported to the U. States, but this business has received a serious check since the opening of valuable quarries in Vermont, New York, Pennsylvania, Maryland, and other States.

Adhesive slate, a kind of greenish-gray slate, quickly absorbent of water, and remarkable for its adhesiveness.

—**Bituminous slate**, a soft species of scitile slate-clay, impregnated with bitumen. (*Buchanan.*)—**Hornblende slate**, a slaty rock, consisting of hornblende and feldspar, with some chlorite;—principally used for flagging.

Slate, *v. n.* To cover with slate, or thin laminae or plates of schistose stone; as, to *slate* a roof.—To fling or hurl slates or brick-ends at; as, to *slate* a policeman.

—To set down upon a slate, as a student's name for future punishment.

—*v. a.* To set loose, as a dog, at any person or thing.

Slate-axe, *n.* An implement used by slaters for chipping and trimming slates for roofs.

Slate Creek, in Oregon, a village of Josephine co., 16 m. N.E. of Kerbyville.

Slate-colored, *a.* Bluish-gray; of a hue resembling that of slate.

Slate-pencil, *n.* A pencil of soft slate, used for writing on slates in school, &c.

Slat'er, *n.* One who sets or lays slates in order, or whose business is to slate buildings.

Slate River, in Virginia, falls into James River from Buckingham co.

Slatersville, in Rhode Island, a post-village of Providence co., 13 m. N.N.W. of Providence; *pop.* abt. 1,800.

Slat'ing, *n.* Act of covering or roofing with slates.—The cover or roof thus put on.—Slate; materials for slating.

Slat'ington, in Pennsylvania, a post-borough of Lehigh co., 16 m. N.N.W. of Allentown. *Pop.* (1897) 2,950.

Slat'ter, *v. n.* [Ger. *schlottern*, to fit negligently.] To be dirty, careless, or slovenly in dress.—To be negligent, awkward, or careless.

Slat'ter'a, *n.* [Icel. *sladda*, to go squalidly.] A woman who is negligent of her dress or house, or who is untidy in her appearance or habits; one who is not neat, clean, nice, or orderly.

(NOTE. The term *slattern*, in this sense, is synonymous with that of *sloven*, applied to a man.)

—*a.* After the manner of, or resembling, a slattern; sluttish; untidy; slatternly.

—*v. a.* To dissipate, squander, or waste recklessly;—preceding away. (R.)

Slat'terliness, *n.* State or quality of being slatternly; lack of cleanliness or neatness.

Slat'terly, *a.* Like a slattern; untidy; sluttish; dirty; negligent of orderly appearance or habits; as, a *slatternly* girl;—synonymous with *slovenly*, as applied to the male sex.

—*adv.* Awkwardly; carelessly; negligently; untidily.

Slat'ting, *n.* Slate taken in the collective sense.

Slat'y, (*slāt'y*.) *a.* Resembling slate; characterized by the nature or properties of slate; composed of thin, parallel laminae or plates, readily susceptible of cleavage; as, a *slaty* texture.

Slaughter, (*slaw'ter*.) *n.* [A. S. *slægt*; Ger. *schlächter*, a butcher.] A killing in numbers; carnage; great destruction of human life by violent means; massacre; as, the enemy was defeated with immense *slaughter*.—A killing of oxen or other beasts for market; butchery.

—*v. a.* To slay in battle; to kill on an extensive scale; to make great destruction of human life; as, no quarter being given, every man was *slaughtered*.—To kill for the market; to butcher; as, to *slaughter* oxen or other beasts, he *slaughters* two bullocks a week.

Slaugh'terer, *n.* One engaged in slaughtering;—specifically, a butcher.

Slaugh'ter-house, *n.* A place where beasts are slaughtered for market.

Slaugh'terman, *n.* A person employed in killing or slaughtering.

Slaugh'terous, *a.* Murderous; destructive; disposed to carnage; as, a *slaughterous* intent.

Slaugh'terously, *adv.* In a manner conducive to slaughter; murderously; destructively; sanguinarily.

Slaugh'ter's Creek, in Texas, enters the Colorado River from Travis co.

Slave, *n.* [Dn. *slaf*; Ger. *sklave*; Fr. *esclave*; said to be from the *Sclavi*, who were reduced to servitude by the Germans.] A person who is wholly subject to the will, and at the mercy of, another; a bondman; a bond-servant; a serf; a thrall.—One who has lost the power of self-resistance; one blind to any controlling influence.

one who surrenders himself to any power whatever; as, a slave to avarice, ambition, lust, &c. — A drudge; a hack; a mean person; one who labors or drudges like a slave; one who is overworked and underpaid.

(*Law.*) One over whose life, liberty, and property another has unlimited control. The *Jus vite et necis* is included in pure and absolute slavery. Every limitation placed by law upon this absolute control modifies, and to that extent changes, the condition of the slave. In every slaveholding State of the U. States, the life and limbs of a slave were protected from violence inflicted by the master or a third person.

(*NOTE.* *Slave* often occurs in the construction of sufficiently self-explanatory compound terms; as, slave-captain, slave-dealer, slave-market, slave-owner, slave-ship, &c.)

Slave, *v. a.* To enslave; to make a slave of. (*R.*)

—*v. n.* To labor after the manner of a slave; to drudge; to toil; to fag; to work laboriously for scanty compensation; as, he *slaves* hard for a livelihood. — To deal in slaves.

Slave, Selave, *n.* [Etymol. uncertain.] An individual of the Slavonic race.

Slave'-born, *a.* Born in slavery, or compulsory servitude.

Slave'-catcher, *n.* One employed in the tracking and capture of a fugitive slave, or slaves.

Slave'-catching, *n.* The business of pursuing and capturing fugitive slaves, to restore them to their masters.

Slave'-coast, *n.* The name given to that part of the W. coast of Africa from which slaves are shipped and exported.

Slave'-coffle, *n.* Same as *COFFLE*, *q. v.*

Slave'-driver, *n.* An overseer of slaves while at their work; — hence, by analogy, a hard taskmaster.

Slave'-holder, *n.* An owner of slaves; one who holds property in slaves.

Slave'-holding, *a.* Retaining persons in compulsory servitude.

Slave'-hunt, *n.* A quest after persons to take into slavery. — A pursuit of fugitive slaves, with intent to restore them to their masters.

Slaveocracy, (*-ok'-ra-se*), *n.* [Eng. *slave*, and Gr. *kratein*, to exercise power over.] Formerly, in the U. States, the community of persons, exercising political influence, who represented, promoted, or defended the system of slavery as a social institution.

Slaver, (*slāv'er*), *n.* (*Naut.*) A ship or vessel employed in the slave-trade; as, to chase a *slaver*. — Also, a slave-trader; a person engaged in the buying and selling of slaves.

—(*slāv'er*.) Saliva dripping or drivelling from the mouth; as, the *slaver* of a mad dog.

—*v. n.* To suffer the spittle or saliva to exude from the mouth. — To be smeared over with saliva.

—*v. a.* To besmear with drivel; to overspread with saliva issuing from the mouth.

Slav'erer, *n.* A driveller; an idiot.

Slav'eringly, *adv.* With slaver or drivel.

Slavery, (*slāv'ry*), *n.* State or condition of a slave; bondage; compulsory servitude; serfdom; state of absolute subjection of one person to the will of another. — Hence, analogically, drudgery; menial or laborious offices performed to eke out a livelihood.

(*Hist.*) Repugnant as such a state of things may appear to nature and reason, there can be no doubt that *S.* prevailed to a great extent among all the great nations of antiquity. The Latin name *servus*, which is usually translated *servant*, properly signifies a *slave*, and is derived from *servare*, to preserve; the *servi*, or slaves, being such persons as were taken in war, and their lives preserved, on condition of their becoming the absolute property of their masters. In like manner, the Hebrew word in the Old Testament, which in our version is translated *servant*, properly signifies *slave*; and from the curse which Noah denounces upon Ham and Canaan, immediately after the Deluge, we have reason to believe that the state existed even in antediluvian times. *S.* was authorized by the Jewish law, which lays down many directions as to how slaves are to be treated. Foreign slaves might be obtained by capture, purchase, or by being born in the house; and over these the masters had entire authority to sell, exchange, judge, punish, or even to put them to death. A Hebrew might also fall into *S.* in various ways; if reduced to poverty, he might sell himself for a slave; a father might sell his children for slaves, or creditors might sell their debtors; but in such cases the slave was not to be treated as a slave, but as a hired servant, and was to be restored to freedom at the year of jubilee. In Egypt, Chaldea, Arabia, and all over the East, slavery existed to a very great extent, and a large traffic in slaves was carried on. Among the Greeks, even as early as the time of Homer, we find *S.* a recognized institution; and none of the Greek philosophers seem to have regarded it as other than a regular and natural state of things. Aristotle lays it down that a complete household comprises both slaves and freemen, and defends the institution on the ground of diversity of races; and even Plato, in his perfect state, only desires that no Greeks should be made slaves by Greeks. At Athens, as well as in the other states of Greece, there was a regular slave-market, called the *kuklos*, because the slaves stood round in a circle. The number of slaves in all the Greek states was very great, far exceeding the number of free men. According to a census made during the archonship of Demetrius Phalerens, there were in Attica 21,000 free citizens, 10,000 strangers, and 400,000 slaves. Even those who doubt the accuracy of these figures, admit that there must have been three or four slaves to one of the free population.

At Athens, even the poorest citizen had a slave to take care of his household; and Plato remarks that some had fifty, or even more. At Athens, and in Greece generally, slaves are said to have been more humanely treated than in Rome, where they could be tortured, and even put to death, at the discretion of their masters. Afterwards, a spirit of greater humanity began to prevail, and a succession of edicts were enacted by Claudius, Hadrian, and Antoninus Pius, by which the jurisdiction of life and death was taken away from the masters, and referred to the magistrate, and the *ergastula*, or dungeons of cruelty, were abolished. Hume, in his *Essay on the Populousness of Ancient Nations*, says that some great men among the Romans possessed to the number of 10,000 slaves; and Blair, in his *Inquiry into the State of S. among the Romans*, assigns as many as three slaves to every free person in Italy in the time of the Emperor Claudius. Slaves were not only employed in the usual domestic offices, and in the labors of the field, but also as mechanics, artisans, and in every branch of industry, some of them even filling offices of honor and trust, as factors or agents for their masters in the management of business. The spread of Christianity did much to ameliorate the condition of the slave, though the possession of them was for a long time not regarded as contrary to Christian principles; and down to the age of Theodosius, wealthy persons continued to keep as many as two or three thousand of them. Justinian did much to promote the ultimate extinction of slavery; but the number of slaves was again increased by the invasion of the barbarians; and finally the slaves became merged in the villeins and serfs of the Middle Ages. The personal servitude which grew out of the abuses of the feudal system, and to which the Germans had been accustomed, even in their primitive settlements, was exceedingly grievous, but it is not supposed to have equalled, in severity or degradation, the domestic *S.* of the ancients, or among the European colonies on the other side of the Atlantic. The feudal villein of the lowest order was indeed subjected to the most ignoble services; but in the eye of the law, in England, he was regarded as a villein only to his own master — to all other persons he was a free man — and he was even protected against excessive injuries at the hands of his master, who might be made answerable at the king's suit. That Africa was free from the blot which stained more advanced countries, even at a very early period, it is impossible to suppose, and is fully confirmed by what glimpses we obtain of its early history. There is no truth, therefore, in the statement that Europeans were the first to introduce that trade; for it has been proved that a great trade in slaves was carried on from the coast of Guinea by the Arabs some hundreds of years before the Portuguese embarked in the traffic. The Portuguese began to transport negroes from their possessions in Africa to Spanish America in 1501. In 1517 the Emperor Charles V. legalized the slave-trade, and granted a patent to certain persons to carry it on. The French under Louis XIII., and the English under Queen Elizabeth, formally permitted this trade. The most important markets for slaves in Africa were Bonny and Calabar, on the coast of Guinea, and they still remain among the principal. Here the slaves who came from the interior were exchanged for rum, brandy, toys, iron, salt, &c.; and the number of those beings who have thus been torn from their country during three centuries is calculated to amount to more than 40,000,000. The sufferings of the slaves during the passage were horrible, it being estimated that from 15 to 20 per cent. perished on it. Almost from the very time that this traffic was established, there were persons who more or less powerfully declared against it; but the honor of having systematically and successfully taken up the cause of the slave belongs emphatically to the Quakers, and the movement began more particularly about 1727. In 1751 the Quakers entirely abolished it among themselves; and in 1772 Granville Sharp obtained a decision of the English judges, in the famous case of the negro Somerset, that a slave as soon as he sets his foot upon English ground becomes free. In 1783 a petition for the abolition of the slave-trade was addressed to Parliament by the Quakers, and supported by Sir Cecil Wray; and in 1787 a society for the suppression of the slave-trade was established in London, and numbered among its members Wilberforce, Sharp, Dillwyn, and Thomas Clarkson, then a young graduate of Cambridge, to whose enthusiasm and energy the cause is probably more indebted than to the labors of any other man. It was not, however, till 1807 that a bill for preventing the further importation of slaves into the W. Indies passed both houses successively, and received the royal assent. *S.* was abolished in the British colonies in 1834. Long before that time, several of the N. American States had decreed the extinction of *S.* Vermont abolished it in 1777, before she had joined the Union. Pennsylvania in 1780, Rhode Island and Connecticut shortly after, New York in 1797, and New Jersey, in 1804, provided for the gradual emancipation of their slaves. In Massachusetts the Supreme Court declared that *S.* was abolished by the act of adopting the State Constitution of 1780. In 1820, the U. S. passed a law declaring the slave-trade to be piracy, but no conviction was obtained under the statute until Nov., 1861, when Nathaniel Gordon, master of a vessel called the *Erie*, was convicted and hanged at New York. The first slaves introduced into the territory of the American colonies were sold from a Dutch vessel, which landed 20 at Jamestown, Va., in 1620. The importation of slaves was received with great disfavor by the colonists. Laws were passed by the colony of Virginia restraining the practice; but their wishes were disregarded

by the King, who, on the 10th day of December, 1770, issued an instruction, under his own hand, commanding the governor, "under pain of the highest displeasure, to assent to no law by which the importation of slaves should be in any respect prohibited or obstructed." In April, 1772, this rigorous order was solemnly debated in the Assembly of Virginia. A memorial to the King himself was prepared, declaring the importation of slaves from the coast of Africa "a trade of great inhumanity, and dangerous to the very existence of his majesty's American dominions," and praying that the interests of the few of his subjects "in Great Britain who might "reap emolument from this sort of traffic" might be disregarded when placed in competition with the interests of the entire colonies. Their petition was of no avail; and with the further development of the country the institution of slavery, regarded at first as a moral and political evil, came to be recognized in the S. States as a social necessity. Washington, Jefferson, Madison, Franklin, Jay, Hamilton, and many others among the founders of our republic, regarded *S.* as inconsistent with the principles of the Declaration of Independence, and if they consented to give the system certain advantages, it was with the hope that they would be temporary. The Pennsylvania Abolition Society was founded in 1775, B. Franklin being elected president, and B. Rush secretary. Similar associations were founded in other States. In 1819–20, however, the opponents to *S.* were defeated in their resistance to the admission of Missouri into the Union as a slave State. On Jan. 1, 1831, William Lloyd Garrison began to publish in Boston *The Liberator*, in which he asserted that immediate liberation was the right of every slave and the duty of every master. Anti-slavery societies were organized on this basis in Boston, 1832, and in Philadelphia, 1833, which strongly influenced public opinion throughout the country. In 1840, a portion of the members of the American Anti-Slavery Society seceded, and formed the *American and Foreign Anti-Slavery Society*, and the political *Liberty Party*. This party was mostly absorbed in 1848 by the *Free-Soil Party*. This latter was in its turn absorbed by the *Republican Party*, which, in 1856, first became the exponent of the doctrine of *S.* restriction. In 1855, the American Abolition Society was founded in Boston to promote the views of those who held that the National Government had constitutional power to abolish *S.* in every part of the Union. Finally, the attempt to extend *S.* on one side, and to limit it on the other, conducted to the gigantic War of Secession, whose fruit was the total abolition of *S.* in the American Union, which is consecrated by the 13th Amendment to the Constitution. *S.* was abolished in the French colonies in 1848, and serfdom was abolished in Russia in 1861. *S.* was abolished in Brazil in 1871, and in the Spanish dependencies of Cuba and Porto Rico shortly after. Slavery still exists in North Africa, Arabia, and Turkey, and the active efforts to suppress the slave-trade in interior Africa have as yet proved ineffectual.

Slave'-trade, *n.* The general term applied to the traffic in slaves, formerly extensively carried on by civilized nations between the W. coast of Africa, the continent of America, and the W. Indies.

Slavic, Selavie, (*slāv'ik*), *a.* Same as *SLAVONIC*, *q. v.*

Slavish, (*slāv'ish*), *a.* Pertaining, or relating, to slaves, or to compulsory servitude; servile; meanly dependent; as, *slavish* homage.

—Such as becomes a slave; laborious; toilsome; consisting in drudgery; as, editorship is a *slavish* occupation.

Slav'ishly, *adv.* In a slavish manner; servilely; abjectly; meanly; basely; obsequiously. — In the manner of a slave, drudge, or overworked and underpaid person.

Slav'ishness, *n.* State or quality of being slavish; servility; abject meanness.

Slavism, (*-izm*), *n.* The individuality of the Slavonic race.

Slavo'nia or Selavo'nia, a prov. of Austro-Hungary, forming, with Croatia, a kingdom united with that of Hungary, bounded N. and E. by Hungary, W. by Croatia, and S. by Turkey; area, inclusive of the recently annexed portions of the former Military Frontier, abt. 6,600 sq. m.; pop. abt. 600,000, belonging to the Illyrio-Serbian branch of the Slavs, and chiefly to the Greek church. Principal towns, Eszék (the cap.), Peterwardin, Carlovitz, Semlin, Mitrovitz, and Brod. The chief manuf. glass. Pop. (1897) 2,450,400.

Slavo'nian, Selavo'nian, *n.* (*Geog.*) A Slave, or Selave; a native or inhabitant of Slavonia, or Selavonia.

Slavo'nian, Selavo'nian, Slavon'ic, Slavon'ic, *a.* (*Geog.*) Pertaining or relating to Slavonia, or to its inhabitants. — Belonging or having reference to the ancient *Slavi*, a nation inhabiting the country between the rivers Save and Drave; as, the *Slavonic* languages.

Slavonic Languages, *n. pl.* (*Philol.*) A name applied to the dialects of Lithuania, Russia, and Poland, founded on the speech of the ancient *Slavi*.

Slaw, *n.* [*Dn. slau*, salad.] (*Cookery.*) Sliced cabbage prepared raw or cooked, as a salad; as, cold *slaw*.

Slay, *v. a.* (*imp. SLEW*; *pp. SLAIN*.) [*A. S. slean*, *slagan*; Ger. *schlagen*, to beat, strike.] To kill; to put to death by a weapon or by violence; to murder; to slaughter; to assassinate; to destroy.

"And thrice he slew the slain." — Dryden.

Slay'er, *n.* One who slays; an assassin; a murderer; a killer; a destroyer of life.

Sleaford, New, (*slē'furd*), a town of England, co of Lincoln, on the Slea, 16 m. S. S. E. of Lincoln; pop. 4,000.

Sleave, *n.* [*Ger. schleife*, a knot.] The knotted or involved part of silk or thread; — also, silk or thread untwined.

Sleeve silk, raw silk in the state in which it is ready for weaving.

Sleeve, *v. a.* (*Wearing*.) To sleigh; to divide or separate, as a mass of threads.

Sleaved, (*slēvd*), *a.* Raw; not spun or wrought; as, *sleaved silk*.

Sleaziness, *n.* State, quality, or character of being sleazy.

Sleazy, *a.* [From Ger. *schleitzen*, to decay.] Lacking firmness or consistence of texture or body; thin; flimsy; flaccid; as, *sleazy muslin*.

Sled, *n.* A sledge or sleigh. — A light seat mounted on runners, employed for sliding on snow or ice.

—*v. a.* To carry, convey, or transport on a sled; as, to *sled lumber*.

Sledging, *n.* Act or operation of conveying on a sled. — Means applicable to transportation on a sled, or sleds; as, the snow is good for *sledging*.

Sledge, (*slēj*), *n.* [A. S. *slēgja*; Icel. *slægja*; Ger. *schlagel*, a mallet.] A large, heavy hammer, used chiefly by workers in iron; — otherwise called *sledge-hammer*.

—[Dan. *slæde*, a car; Icel. *slædi*; Du. *slæde*.] A sort of carriage or vehicle made to move on runners, or on very low wheels; as, specifically, a sled or sleigh, constructed for

Fig. 2379. — RUSSIAN SLEDGE.

sliding over the surface of snow (Fig. 2379), and drawn by horses, dogs, or reindeer. — In England, a hurdle formerly employed to convey traitors to the place of execution.

—*v. a.* To travel or transport in sledges.

Sleek, *a.* [Goth. *slaihts*, smooth to the touch.] Smooth; having an even or equable surface; — whence, glossy; highly polished; as, *sleek hair*, a *sleek skin*. — Not rough or harsh; — hence, specious; plausible; as, a *sleek manner*.

—*v. a.* To make even and smooth; as, to *sleek the hair*. — To render soft, smooth, or glossy; — hence, to make attractive, specious, or plausible.

"The persuasive rhetoric that *sleek'd* his tongue." — Milton.

Sleek, *adv.* With readiness, exactness, and dexterity; with handy aptness; — a vulgarism, frequently rendered *slick*; as, to do anything *slick*, i. e., off-hand.

Sleekly, *adv.* In a sleek manner.

Sleekness, *n.* State or quality of being sleek.

Sleek-stone, *n.* A smoothing-stone.

Sleek'y, *a. in.* Of a silky, or smooth and glossy appearance; as, the *sleek'y skin* of a race-horse.

Sleep, *v. n.* (*imp.* and *pp.* SLEPT.) [A. S. *slāpan*.] To glide away into temporary unconsciousness; to take rest by a relaxation or suspension of the voluntary action of the powers of the body and mind, and a lethargy of the organs of sensation; to slumber; to repose. — Hence, by analogy, to be inattentive, heedless, or unconcerned; to live without care or thought; to relax in vigilance or energy; as, he *sleeps* through life. — Also, to be dead; to rest in the grave for a time. — Hence, to rest; to be in repose; to lie quiet, or be still; to be inactive or motionless; not to be noticed or agitated; as, the matter *sleeps* for the present.

—*v. a.* To give the means of sleep to; to supply with conveniences for sleeping; as, that hotel can *sleep* a hundred guests. (*n.*)

—*n.* That natural state or condition of unconsciousness in animals which alternates with a period of activity. In this state, the involuntary functions, such as those of nutrition, secretion, &c., go on as usual, but the voluntary powers are quiescent. All action in the living economy produces waste of tissue; and, accordingly, rest is necessary in order that the deficiency may be made up. Hence it is that we feel refreshed after *S.*; the muscles possess greater strength, the nerves have attained a higher sensibility, and the powers of the mind are more active. The poet well speaks of "tired nature's sweet restorer, balmy *sleep*." Many hypotheses have been advanced by physiologists to account for the phenomena of *S.*, but all more or less unsatisfactory. According to some, it arises from mere exhaustion of the sensorial powers, the brain ceasing to act because it is fatigued and cannot act further until restored by rest. In many cases, however, we find excessive fatigue, either of mind or body, to be an effectual preventive of *S.* Others, again, refer *S.* to changes in the cerebral circulation, regarding it as arising from congestion or a retarded movement of the blood in the cerebral vessels, especially the veins, or, according to some, from a diminished flow of arterial blood to the brain. It is not improbable that several of these causes may be at work in producing *S.*, the nervous power being enfeebled by its expenditure during the waking state, and the circulation becoming slower, the vessels become, in consequence, congested, and there is a deficient supply of arterial blood, leading to a suspension of the powers of attention and voluntary motion. According to Sir Henry Holland, *S.* is not a single state, but "a succession of states in constant variation; their variation consisting not only in the different degrees in which the same sense or faculty is submitted to it, but also in the different proportions in which these several powers are under its influence at the same time." The approach of *S.* is announced by

diminished activity of mind, and loss of the power of attention. The senses become blunted to external impressions, and we feel an unconquerable desire for stillness and repose. Our ideas grow confused, our sensations more obscure, our sight fails us, and, if our ears still perceive sounds, they are indistinct and seem as though distant. The eyelids close, the joints relax, and we instinctively assume an easy position and fall into a *S.* As a general rule, the senses and reasoning faculties sleep first, while the imagination and lighter ones remain longest awake. *S.* is at first deep, then soft and gentle, and becomes gradually less sound as the time for waking approaches. There is usually an intermediate state between sleeping and waking, in which the *S.* is very light, and from which persons can be aroused with the greatest facility. The amount of *S.* required by a person varies according to age, temperament, habit, and previous fatigue. The new-born infant sleeps almost continuously, and very old persons also require a great deal of *S.* Middle life is the period when the system requires the least *S.*; and women usually require less *S.* than men. The average amount of *S.* required by a healthy person is about eight hours; but it varies greatly in different individuals, some persons being able to sustain nature with only four hours, while some sluggish persons spend nearly half their time in *S.* Not one of the least strange of the phenomena of this state, is the power that some persons have of awaking at a particular hour predetermined on.

—Hence, analogically, rest in the grave; as, "the *sleep* that knows not breaking." — Scott.

Sleep of plants. One of the phenomena of irritability (*q. v.*) in plants. Light acts on plants as a powerful stimulus, essential to their active and healthy vegetation. When it is withdrawn, the flowers of many plants close, and the greater number show a tendency to it, while leaves more or less decidedly incline to fold themselves up. The leaf stalk also generally hangs down more or less, although in some plants it is more erect during sleep. The sleep of plants, however, is not always nocturnal. The flowers of some open and close at particular hours of the day. Thus, the crocus is a morning flower, and closes soon after mid-day, while some flowers expand only in the evening or during the night. Their hours of vegetative rest are probably as essential to the health of plants as those of sleep are to animals. It was Linnæus who first observed the sleep of plants in watching the progress of some plants of *lotus*, the seeds of which he had sown.

Sleep-charged, **Sleep-heavy**, **Sleep-laden**, *a.* Overcome with sleepiness.

Sleeper, *n.* A person who sleeps; also, a drone, or lethargic, lazy person. A sleeping-car, (*U. S.*)

—An animal that lives through the winter in a torpid, comatose state, as the wood-chuck.

—*pl.* Pieces of timber employed to support others, and laid asleep, or with a bearing along their own length; *sleepers* denote more particularly those timbers which are placed lengthwise on walls to support the joists of a floor. *S.* are also employed on railroads as longitudinal parallel bearings for the rails to rest upon; in this sense, they are usually termed *stringers*; when lying across the road-bed, they take the name of *cross-sleepers*.

(*Naut.*) One of several knees which connect the transoms to the after-timbers on a ship's quarter; one arm of the sleeper lies on the foot-waling, and the other extends up the transoms; — also termed *transom-knees*.

—In glass manufacture, a large iron bar laid at right angles with smaller ones, which, while checking the passage of coals, allows the ashes to go through.

Sleepily, *adv.* In a sleepy manner; drowsily; with desire or disposition to sleep; dully; heavily; stupidly; in a lazy or lethargic manner.

Sleepiness, *n.* State of being sleepy; drowsiness; inclination to sleep.

Sleeping, *p. a.* Devoted to sleep; occupied with sleep; as, *sleeping hours*.

—Appointed or furnished for sleeping; as, a railroad *sleeping-car*.

Sleeping partner, a dormant partner. See PARTNER.

—*n.* State of reposing in sleep. — State of being dormant or at rest; hence, freedom from agitation.

Sleepless, *a.* Having no sleep; without sleep; wakeful; as, he passed a *sleepless* night.

—Restless; in perpetual commotion; as, *sleepless waters*, *sleepless hate*.

Sleeplessly, *adv.* In a sleepless or wakeful manner.

Sleeplessness, *n.* State of being sleepless.

Sleep-waker, *n.* One under the influence of clairvoyance.

Sleep'y, *a.* State of a person mesmerized.

Sleep'y, *a.* (*comp.* SLEEPER; *superl.* SLEEPYEST.) Disposed to, or overcome by, sleep; drowsy; not wakeful; as, to feel *sleep'y*.

—Soporiferous; somniferous; tending to promote sleep; as, a *sleep'y* draught or drink. — Lethargic; heavy; dull; lazy; inert; sluggish.

Sleet, *n.* [Icel. *slétta*.] (*Meteorol.*) Snow or hail which is in a partially melted condition before it reaches the surface of the earth. In some cases sleet may also be produced by the simultaneous precipitation of snow or hail from a superior, and of rain from an inferior, stratum of the atmosphere.

—To snow, or hail, with an intermingling of rain.

Sleetch, *n.* The thick mud or slush lying at the bottom of rivers.

Sleetiness, *n.* State of being sleety; a state of weather in which rain falls mixed with hail or snow.

Sleety, *a.* Bringing sleet; consisting of sleet; as, a *sleety* shower.

Sleeve, *n.* [A. S. *sluf*, *slufa*, from *slēfan*, to clothe.] That which is put on, or clothes, the arm; — specifically, the part of a garment that is fitted to cover the arm, as, the *sleeve* of a coat.

—A knot in silk or thread. See SLEAVE.

(*Mach.*) A tubular part resembling a sleeve in form, and fitted to cover, or hold steady, another part that moves within it. — A long bushing, as in the nave of a wheel.

To laugh in the sleeve, to laugh in a secret or unobserved manner, while apparently keeping a grave or serious countenance before the object, or objects, of risibility.

—To pin or hang on the sleeve, to cause to become dependent on.

—*v. a.* To put in sleeves; to furnish with sleeves; as, to *sleeve* a jacket.

Sleeve-button, **Sleeve-link**, *n.* A button, or couple of buttons or studs linked together, to fasten the sleeve or wristband.

Sleid, (*slād*), *v. a.* To prepare for use in the weaver's sley.

Sleigh, (*slā*), *n.* Same as SLEDGE, *q. v.*

Sleigh-bell, a small bell attached to a sleigh or sledge or fastened to the horse which draws it.

Sleighting, (*slā'ing*), *n.* Act of riding in a sleigh.

The state of the snow or ice in winter, in so far as it renders the running of sleighs practicable.

Sleight, (*slit*), *n.* [A. S. *slith*, slippery, changeable.]

A sly artifice; a trick or feat so artfully and dexterously performed that the manner of performance eludes observation. — Hence, dexterity; artful or cunning practice, *Sleight of hand*, legerdemain; prestidigitation.

Slender, *a.* (*comp.* SLENDERER; *superl.* SLENDEREST.)

[A. S. *slæne*, fragile; Belg. *slinder*.] Thin; slim; small in circumference compared with the length; small in the waist; not thick, gross, or bulky; as, a *slender* figure, a *slender* stalk. — Fragile; feeble; weak; slight; not strong or vigorous; as, a *slender* chance, a *slender* constitution, a *slender* comfort. — Inconsiderable; trivial; mediocre; as, a person of *slender* capacity of mind. — Inadequate; small; meagre; sparing; pitiful; paltry; as, a *slender* pittance. — Not amply supplied; spare; pinched; limited; as, a *slender* stock of provisions.

Slenderly, *adv.* In a slender manner; without bulk; sparsely; meagrely; feebly; inadequately; as, a woman *slenderly* made, he left his family *slenderly* provided for, &c.

Slenderness, *n.* State or quality of being slender; thinness; slimmess; as, the *slenderness* of a lady's waist. Deficiency of body, bulk, or strength; as, the *slenderness* of a cord. — Slighthead; flimsiness; as, the *slenderness* of an excuse or argument. — Feebleness; weakness; fragility; as, *slenderness* of bodily constitution. — Inadequacy; insufficiency; paucity; as, *slenderness* of means, income, or estate. — Sparseness; meagreness; want of abundance or plenty; as, *slenderness* of aliment.

Slept, *imp.* and *pp.* of SLEEP, *q. v.*

Sleswick. See SCHLESWIG.

Sleuth, *n.* [Scot.] The track of man or beast, as pursued by the scent.

Sleuth-hound, *n.* Same as BLOOD-HOUND, *q. v.*

Slew, *imp.* of SLAY, *q. v.*

Slewed, (*slūd*), *a.* Half-tight with liquor; somewhat inebriated; as, the man is *slewed*. (Colloq.)

Sley, *n.* [A. S. *slē*.] A weaver's reed.

—*v. a.* Same as SLEAVE, *q. v.*

Slice, *v. a.* (*imp.* and *pp.* SLICED,) (*slit*.) [Ger. *schleissen*, to cleave, to split; A. S. *slitan*, to slit.] To cut into thin pieces, or to cut off, as a thin, broad piece from; to cut in slices; as, to *slice* an apple. — To cut into parts or sections; to divide; as, to *slice* an estate among one's children.

—*n.* A thin, broad piece sliced or cut off; a shive; as, a *slice* of bread, a *slice* of bacon. — Anything broad and thin, like a slice; as, (1.) A peel or fire-shovel. (2.) A broad, thin piece of plaster. (3.) A spatula. (4.) A broad, thin, hatchet-shaped knife or carver; as, a fish-*slice*.

—*pl.* (*Ship-building*.) Small angular wedges driven immediately before launching, under the shores by which a ship is sustained on the ways. Being driven in simultaneously all round the vessel by blows of hammers, the mass is raised sufficiently to enable the blocks on which the keel has rested to be removed.

Slicer, *n.* One who, or that which, slices; — specifically, a lapidary's circular saw.

Slick, **Slick**, **Schlich**, *n.* [Du. *slijk*; Ger. *schlich*.] (*Metal.*) The ore of a metal; — especially of gold, committed and made ready for further working.

Slick, *a.* Sleek; smooth; glossy; as, *slick* stones.

—*adv.* See SLEEK.

—*v. a.* To make sleek or smooth.

Slick'ing, *n.* A narrow vein of ore.

Slick'ness, *a.* State or quality of being slick; smoothness; sleekness.

Slid, *imp.* and *pp.* of SLIDE, *q. v.*

Slidden, (*slid'dn.*) *pp.* of SLIDE, *q. v.*

Slide, *v. n.* (*imp.* SLID; *pp.* SLID, SLIDDEN.) [A. S. *slidan*, *sliderian*; allied to GLIDE, *q. v.*] To move by slipping or gliding; to move along a surface without stepping, bounding, or rolling; as, a glacier *slides* into a crevasse. — Particularly, to move over ice or frozen snow, with an easy, uninterrupted course. — To pass inadvertently. — To pass smoothly along without agitation, difficulty, or obstruction; to pass in silent, unobserved progression; to pass silently and gradually from one state to another; as, a canal-boat *slides* through the water, he *slid* into the vacant place. — To slip; to fall; as, he *slid* into error.

—*v. a.* To push along by slipping; as, to *slide* along a plank. — To pass or put imperceptibly; as, to *slide* in a word to alter the sense of a question.

—*n.* Act of sliding; as, to take a *slide*. — A smooth and easy passage; as, a *slide* of the voice, a *slide* into a fortune. — The descent of a detached piece of earth or rock down a declivity; a land-slip. — A timber-shoot on a hill-side.

(*Geol.*) A vein of clay intersecting a lode, and producing a vertical dislocation.

(*Mus.*) A grace used in the German school, consisting of two small notes moving by degrees.

(*Mach.*) In steam-engines, a contraction for SLIDE-VALVE, *q. v.*

Slid'er, *n.* One who, or that which, slides. — The part of a machine or instrument that slides.

Slide-rest, *n.* (*Mach.*) In turnery, a guide employed to carry forward the cutting-tool of a lathe to the axis of the revolving object.

Slid'er-pump, *n.* A kind of pump in which the piston revolves continuously, ejecting the water through a pipe by means of a slide regulated by a spring, which prevents it from passing in any other direction.

Slide'-valve, *n.* (*Mach.*) In locomotive engines, the valve placed in the steam-chest to work over the steam-pots. It regulates the admission of steam to the cylinder from the boiler, and, also, the escape of the steam from the cylinder to the atmosphere.

Slid'ing, *n.* Act of sliding; lapse; falling.

Slid'ing-keel, *n.* (Sometimes called CENTRE-BOARD.) (*Naut.*) A narrow, oblong board let down at pleasure through the bottom of a small vessel, to serve as a deepening of the keel throughout a portion of her length. Its use is, like that of the lee-board, to sustain the vessel against the lateral force of the wind, and to enable it to bear more sail.

Slid'ing-rule, *n.* A rule constructed with logarithmic lines, formed upon a slip of wood, brass, or ivory, inserted in a groove, in a rule made to slide longitudinally therein, so that by means of another scale upon the rule itself, the contents of a surface or solid may be known.

Slid'ing-scale, *n.* (*Pol. Econ.*) A theory to regulate prices by varying the rate of taxation on imports in proportion to the price at which a home product of the same or a similar kind is offered for sale. — A sliding-rule.

Slid'ing-ways, *n. pl.* (*Ship-building.*) Two narrow inclined planes built strongly on the shipway, and intended to form the tracks by which the cradle sustaining the vessel glides into the water.

Sleeve Beg, (*sleeve*) in Ireland, a mountain of the co. Down, 2½ m. W.S.W. of Newcastle, 2,384 feet high.

Sleeve Car, in Ireland, a mountain of the co. Mayo, prov. of Connaught, between Lough Conn and Blacksod Bay, 2,368 feet high.

Sleeve Don'ard, in Ireland, a mountain of the co. Down, prov. of Ulster, 2 m. S.W. of Newcastle, 2,796 ft. high.

Slight, (*slit*) *a.* (*comp.* SLIGHTER; *superl.* SLIGHTEST.) [*Dan. slæt.*] Plain; superficial; cursory; not thorough; not deep; faint; weak; inconsiderable; not forcible; not strong or firm; not calculated to endure; negligent; not vehement; not done with effort; as, a *slight* structure, impression, remark, inspection, pain, effort, and the like. — Slim; slender; not heavy or corpulent; as, a person of *slight* figure. — Thin; flimsy; not stout, strong, or thick; as, a fabric of *slight* texture.

—*n.* A partial degree of contempt manifested negatively by neglect or indifference; disregard; inattention; disdain; as, to receive a *slight* from an old acquaintance.

—*v. a.* To disregard or taboo from the consideration that a person or thing is trivial, or of little value or importance, or unworthy of notice; as, to *slight* the offices of religion.

To *slight over*, to perform hastily or superficially; to run over, or treat negligently or indifferently; as, to *slight over* an irksome task.

Slight'er, *n.* One who slights, or treats with neglect or indifference.

Slight'ingly, *adv.* In a slighting manner; with neglect or indifference; without attention or respect; as, he spoke of him *slightingly*.

Slight'ly, *adv.* In a slight manner; superficially; weakly; with inconsiderable force or effect; in a small degree; negligently; with moderate contempt; without regard.

Slight'ness, *n.* State or quality of being slight; superficialness; weakness; deficiency of force, strength, or substance; as, the *slightness* of an accident, the *slightness* of an excuse or impression. — Negligence; lack of vigor or vehemence which commands attention; as, the *slightness* of a sermon or literary composition.

Slight'y, *a.* Slight; flimsy; unsubstantial; superficial. — Trivial; inconsiderable; inmomentous.

Sligo, a seaport-town of Ireland, cap. of a co. of same name, pleasantly situated at the mouth of the river which flows from Lough Gill to Sligo Bay, 69 m. from Londonderry. It has various charitable institutions, market-

houses, news-rooms, and a theatre. It is the entrepôt of an extensive country, and is, therefore, a place of considerable trade. Pop. 12,420.

Sligo, in Ohio, a village of Clinton co., 6 m. N.E. of Wilmington.

Sligo, in Tennessee, a village of De Kalb co., 70 m. S.E. of Nashville.

Slily, *adv.* [From *sly*.] In a sly manner; insidiously; with artful or dexterous craft or secrecy.

Slim, *a.* (*comp.* SLIMMER; *superl.* SLIMMEST.) [*Du. slim*, *wry*, oblique; Ger. *schlimm*, wrong, bad.] Slender; of small diameter or thickness in proportion to the height; as, a *slim* young girl. — Weak; slight; flimsy; trivial; unsubstantial; as, a *slim* argument, a *slim* excuse.

Slime, *n.* [A. S. *slim*; *Du. stym*; Ger. *schleim*.] Viscous mud; soft, humid earth or clay, possessing an adhesive quality.

(*Mining.*) Mud or earthy particles mixed with metallic ores.

Slime-pit, *n.* A pit or deposit of slime or viscous mire.

Sliminess, (*slim'-y*) *n.* Quality of being slimy; viscosity.

Slimness, (*slim'-y*) *n.* State or quality of being slim; slenderness.

Slimy, (*slim'y*) *a.* (*comp.* SLIMIER; *superl.* SLIMIEST.) Consisting of, or abounding with, slime; as, *slimy* ground. — Covered with slime; as, a *slimy* frog. — Viscous; glutinous; resembling or partaking of the quality of slime.

Sliness, *n.* A different orthography of SLYNESS, *q. v.*

Sling, *n.* [*Du. slinger*; Ger. *schlinge*, a snare, a springe, a noose.] A contrivance for casting stones (Fig. 2381),

Fig. 2381. — EGYPTIAN SLINGERS AND SLING.

consisting of a leathern strap and two strings. — A throw; a stroke.

(*Surg.*) A kind of suspensory bandage put round the neck, in which a wounded arm or hand is supported.

(*Drinks.*) A beverage composed of equal parts of spirit and water sweetened; as, gin *sling*.

—*pl.* (*Naut.*) On shipboard, combinations of rope for hoisting horses, cattle, casks, or goods, in or out of the vessel. — Also, ropes or chains by which the yards are suspended in their places to the relief of the lifts.

—*v. a.* (*imp.* and *pp.* SLUNG.) [A. S. *slingan*; *Du. sling-en*; Ger. *schlingen*.] To throw or hurl with a sling; as, to *sling* stones. — To pitch; to throw; to cast. — To hang so as to swing; as, to *sling* panniers across a mule.

(*Naut.*) To hang in ropes, or suspend, as a cask, bale, package, piece of ordnance, and the like, so as to attach to a tackle and hoist or lower.

Sling'-cart, *n.* (*Mil.*) In artillery service, a two-wheeled carriage for transporting ordnance through short distances. A *sling-wagon* has four wheels, and is used for longer distances.

Slinger, *n.* One who slings, or uses the sling.

Slink, *v. n.* (*imp.* and *pp.* SLUNK.) (*SLANK*, old and rare.) [A. S. *slincan*.] To sneak off or away; to creep away stealthily; to steal away meanly; as, he *slunk* out of sight like a beaten cur. — To miscarry, as a beast; to cast young prematurely; as, a mare *slinks* her foal.

—*v. a.* To abort or miscarry of, as the female of a beast.

—*a.* Cast or dropped prematurely; as, a *slink* lamb.

—*n.* The produce of a beast delivered prematurely; especially, a calf brought forth before the proper time. — A sneak; a prying, eavesdropping, knavish fellow; — used as provincial English.

Slinky, *a.* Lank; thin; lean; meagre; scraggy; scrawny.

Slip, *v. n.* (*imp.* and *pp.* SLIPPED,) (*slipt.*) [A. S. *slipan*; Ger. *schlüpfen*.] To slide; to glide; to move along a surface without bounding, rolling, stepping, or bumping. — To slide; not to tread or pass the feet firmly; as, when you walk be careful lest you *slip*. — To move or start out of place; as, an ill-set bone *slips* out again. — To sneak; to slink; to levant; to decamp; to depart or withdraw secretly; — preceding *away*; as, let him *slip away* without observation. — To err; to go astray; to fall into fault or error; as, he *slips* in his speech. — To glide; to pass imperceptibly or unexpectedly; as, jelly *slips* down one's throat. — To creep into by oversight or inadvertence; as, some errors may *slip* into the book, notwithstanding every precaution. — To escape insensibly; to be lost; as, you have allowed it to *slip* your memory. — To let slip, to loose from the slip or leash, as a hound.

—*v. a.* To convey or transmit privately; as, to *slip* a love-letter into a lady's hand. — To lose by negligence; to forfeit by omission of performance; as, do not let *slip* an opportunity of writing to me. — To part twigs from the branches or stem of a tree; to cut; to take off; as, the scions may now be *slipped*. — To leave slyly; to escape

from secretly; as, the fellow *slipped* me after all. — To free; to let loose; as, to *slip* a greyhound. — To throw off, or disengage one's self from; as, my horse *slipped* his bridle, and ran away. — To miscarry; to undergo abortion of, as a beast; as, to *slip* a calf or foal.

To *slip a cable*. (*Naut.*) To veer out a cable, and let go the end of it; — hence, to let it go altogether along with the anchor attached, as in a sudden gale, or when the ship is in imminent jeopardy.

To *slip on*, to throw or put on hastily or negligently; as, to *slip on* a coat.

Slip, *n.* Act of slipping; as, his foot made a *slip*. — An inadvertent fault, error, or omission; as, a *slip* of the tongue, a *slip* of memory. — A scion or twig severed from the parent stock; a cutting; as, the *slip* of a rose-tree. — A kind of jetty or pier forming an inclined plane from a quay to the surface of a river or harbor, constructed for the landing of passengers, goods, &c., from steamers, packet-boats, &c., in all states of the tide. — A long, narrow piece; as, a *slip* of paper or parchment. — A leash, noose, or string by which a dog is held; — so styled from its being made to *slip* or fly loose by action of the hand at will; as, a greyhound in the *slip*. — A secret or unexpected desertion; a stealing suddenly away; a stealthy escape; as, to give one's creditors the *slip*. — Anything easily slipped on or fitted to another thing, or to a person; as, (1.) A loose negligée worn by females; a wrapper. (2.) A kind of flounce or overskirt partly covering a woman's dress; as, a satin *slip*. (3.) An external case or covering; as, a pillow-slip. — Among potters, the clayey cream, size, or cement used for attaching pieces to crockery-ware, such as handles to jugs, &c. — A narrow alley or passage between buildings. — In the U. States, a narrow, doorless pew in churches.

(*Ship-building.*) In a dockyard, an inclined plane having an inclination to the horizon of about 1 in 19, laid upon a most solid foundation, and serving as the base upon which a ship is built, and from which, by its slope, the vessel is launched into the water when finished. *Repairing slips* are now furnished with carriages, on many wheels and rails, which are run under ships as they float at high tide, so that when the ebbing water has grounded the vessels on the trucks, they can be hauled up by steam-power high and dry for examination and repairs.

(*Print.*) A portion of printed matter struck off by itself; a proof from a column of type when set up and in the galley.

(*Geol.*) A mass of strata separated aslant.

(*Engineering.*) The motion of the centre of resistance of the float of a paddle-wheel, or of any propeller through the water horizontally. This, being deducted from the speed of the propeller, will give the rate of speed made by the vessel.

Slip-board, *n.* A board sliding in grooves.

Slip'-coat-cheese, *n.* A rich variety of new-made cheese, resembling butter, but white; — sometimes called *cream-cheese*.

Slip'-knot, (*-not*) *n.* A knot which slips along the line or rope around which it is made.

Slip'-link, *n.* (*Mach.*) A connecting link so constructed as to allow some play of the parts, to avoid concussion.

Slip-on, *n.* In Scotland, a kind of over-coat, worn after the manner of a wrapper across the shoulders.

Slip'per, *n.* [A. S., from *slipan*, to slip.] A kind of light shoe, which may be slipped on with ease and worn in undress.

— A kind of child's pinafore. — One who, or that which, slips; as, a *slipper* of crockery-ware, a *slipper* of greyhounds from the leash, &c. — A kind of iron slide or socket for the wheel of a wagon.

Slippered, (*-perd*) *a.* Wearing slippers.

Slip'periness, *n.* State or quality of being slippery; smoothness; glibness; as, the *slipperiness* of ice; lubricity of character; want of footing; uncertainty; as, the *slipperiness* of the law.

Slip'pery, *a.* Apt to slip, or cause to slip; smooth; glib; having the quality opposed to adhesiveness; as, frozen water is *slippery*. — Not affording firm footing or confidence; as, a *slippery* expectation. — Apt or liable to slip; not standing firm; as, a *slippery* position. — Changeable; unstable; uncertain; nutable; as, the *slippery* turns of fortune.

— Not easily held or retained; liable to slip away; as, a *slippery* prisoner. — Not certain in its effect; as, a *slippery* trick.

Slippery Ford, in California, a post-village of El Dorado co., 45 m. N.E. of Placerville.

Slip'pery Rock, in Pennsylvania, a post-township of Butler co., 44 m. N.W. of Pittsburg. — A township of Lawrence co.

Slip'pery Rock Creek, in Pennsylvania, flows into the Beaver River from Lawrence co.

Slip'piness, *n.* A rare rendering of SLIPPERINESS, *q. v.*

Slip-rope, *n.* (*Naut.*) A rope by which a cable is secured preparatory to slipping it.

Slip'shod, *a.* [*slip* and *shod*.] Wearing shoes like slippers, without pulling up the quarters; as, a *slipshod* woman. — Hence, shuffling; loose, careless, or negligent in manner, style, &c.; as, a *slipshod* demeanor, a *slipshod* style of writing, &c.

Slip'-shoe, *n.* Another name for slipper.

Slip'slop, *a.* [*slop* reduplicated.] Bad liquor.

Slit, *v. a.* (*imp.* SLIT; *pp.* SLIT, or SLITTED.) [A. S. *slitan*; *Du. slyten*; Ger. *schleissen*.] To rend; to split; to cut in two pieces; as, to *slit* a quill. — To cut lengthwise; to cut into long pieces or strips; as, to *slit* a board. — To cut or score, or make a long fissure in or upon; as, to *slit* the ears or nose.

—*n.* A long cut, or a narrow opening; as, a *slit* in the nose. — A cleft or crack in the breasts of cattle.

Slith'er, *v. a.* [Ger. *schlittern*.] To slide; to glide.
Slit'ing, *n.* One who, or that which, slits.

Slit'ing-mill, *n.* A mill where iron bars, plates, &c., are slit into long, narrow strips, as nail-rods and the like. — A machine employed by lapidaries for slicing stones, commonly by means of a revolving wheel (see SLICER) supplied with diamond-powder.

Slit'ing-roller, *n.* (*Mach.*) One of a pair of rollers fitted with alternate ribs entering between each other, and cutting, as iron, &c., in the manner of a pair of shears.

Sliver, *v. a.* [A. S. *slifan*, to split, cleave.] To cut or divide lengthwise; as, to *sliver* a piece of deal.

—*n.* A long piece cut or rent off, or a piece cut or divided lengthwise.

—A light ribbon, or twist of cotton, wool, &c., to be formed into a thread.

Sloak'an, *n.* (*Bot.*) Same as LAVER, *q. v.*

Sloam, *n.* (*Geol.*) A layer of clay between seams of coal.

Sloansville, (*slōns'vill*), in New York, a post-village of Schoharie co., 35 m. N.W. of Albany.

Sloat, *n.* Same as SLAT, *q. v.*

Sloatsburg, in New York, a post-village of Rockland co., 36 m. N. of New York.

Slobodsk, or **Slobod'skoi**, a town of European Russia, gov't. of Viatka, on the Viatka River, 16 m. N.E. of Viatka; *pop.* 6,000.

Stocking-stone, *n.* A rich piece of ore exhibited as a bait for persons to engage in a mining enterprise.

Slo'cum, in Pennsylvania, a post-township of Luzerne co. *Pop.* (1897) 460.

Sloe, *n.* (*Bot.*) See PRUNUS.

Slo'gan, *n.* [Gael. and Scot.] Among the Scots Highlanders, the war-cry, or gathering-word, of a clan.

Slo'nin, a town of Russian Poland, gov't. of Grodno, 72 m. S.E. of Grodno; *pop.* 7,500.

Sloo, *n.* Same as SLOUGH, *q. v.*

Sloop, *n.* [Du. *sloop*; L. Sax. *sluop*, *slupe*; Ger. *schaluppe*; Fr. *chaloupe*.]

(*Naut.*) A vessel with one mast like a cutter, the main sail of which is attached to a gaff above, to a boom below, and to the mast on its foremost edge.

Sloop of war. (*Naut.*) A vessel of war below the size of a corvette, and above that of a brig. It is either ship, brig, or schooner-rigged, and carries an armament varying from 18 to 32 guns.

Sloot'sk, or **Slut'sk**, a town of Russian Poland, gov't. of Minsk, 63 m. S.W. of Minsk; *pop.* 8,000.

Slop, *v. a.* [Etymol. uncertain.] To spill; to cause to overthrow, as a liquid, by the motion of the vessel containing it. — To soil by letting water or other liquid fall upon.

—*v. n.* To overflow or be spilled, as a liquid; — generally before *over*.

—*n.* Water carelessly spilled or thrown about on a table or floor; a puddle. — Mean liquor; mean liquid food.

—*pl.* Dirty water; refuse liquid matter of kitchens, bedrooms, &c.; also, coarse liquid food, spoon-meat, &c.

Slop-basin, or *Slop-bowl*, a basin or bowl for containing slops; — particularly, for receiving the dregs of tea-cups at the table.

Slops, *n. pl.* [A. S. *to-slupan*, to slip, roll, or tumble down.] Pantaloon, or trowsers, made so as to slip on easily; — hence, ready-made clothes, bedding, &c., more especially such as are suited to seafaring persons.

Slope, *n.* [Probably from *slip*.] A surface which is inclined, so that anything placed on it is apt to slip or slide down; a declivity, also an acclivity—any declivity being necessarily an acclivity also; as, the *slope* of a hill. — A line or direction inclining from a horizontal line; properly, a direction downward.

—*a. and adv.* Same as ASLOPE, *q. v.*

—*v. a.* To form with a slope; to form to declivity or obliquity; to incline; to direct obliquely; as, to *slope* the ground in a pleasure-garden.

—*v. n.* To be declivous or inclined; to take an oblique direction; as, a *sloping* way. — To decamp; to levitate; to take one's self off suddenly or stealthily.

Slope'ness, *n.* State of being aslope or inclined; declivity. (*R.*)

Slop'ing, *p. a.* Oblique; declivous; inclining, or inclined, from a horizontal or other right line or plane.

Slop'iness, *n.* State of being sloppy.

Slop'py, *a.* Wet, so as to spatter; plashy; miry; muddy; as, the ground is *sloppy* under foot.

Slop'seller, *n.* A vender of ready-made clothes, especially for sea-rig.

Slop-shop, *n.* A place where slops are exposed for sale.

Slop-work, *n.* The manufacture of slops, or cheap ready-made clothing, bedding, &c.

Slopy, *a.* Declivous; sloping; inclined.

Slosh, *a.* Same as SLUSH and SLUSHY.

Slot, *n.* [Du. *slot*, a lock; Icel. and Dan. *slot*, a strong hold.] A bar or bolt; a slit or sloat. — A narrow piece of timber which fastens, connects, or holds together larger pieces.

(*Mach.*) A mortise in a plate of metal, or an aperture through the same, for the reception of some part of a machine.

Slot, *v. a.* To shut or close with violence; to slam, to bang; as, to *slot* a door.

Slote, *n.* A trap-door in the stage of a theatre.

Sloth, (*slōth*), *n.* [A. S. *slōwth*, from *slau*, slow.] Tardiness; slowness; as, "this dilatory *sloth* of Rome." (*Shaks.*) — Indisposition toward action, exertion, or labor; sluggishness; laziness; idleness.

(*Zoöl.*) See AI, and BRADYPODA.

Sloth'ful, *a.* Addicted to sloth; idle; lazy; indolent; sluggish; inactive; inert; as, *slothful* ease.

Sloth'fully, *adv.* Sluggishly; idly; inactively.

Sloth'fulness, *n.* State or quality of being slothful; indulgence of sloth; inactivity; sluggishness; laziness.

Sloth'hound, *n.* A hound which tracks a deer by the slot; a slenth-hound; a blood-hound.

Slot'ted, *a.* Having a slot.

Slot'ting-machine, *n.* A machine in which a tool moves vertically, in the manner of a mortising chisel, so as to cut out slots or mortises, or to pare round the edge of any object requiring to be made fair and smooth round the edge.

Slouch, *n.* [Swed. and Goth. *slōka*, to hang down.] A hanging down; a depression of the head, or of some part of the body; an ungainly, awkward gait; as, "he hath a sort of *slouch* in his walk." (*Swift*). — An awkward, clumsy, clownish fellow.

—*v. n.* To hang down; to have a downcast, sheepish, clownish look, gait, or demeanor.

—*v. a.* To cause to hang down; to depress.

Slough, (*slou*), *n.* [A. S. *slog*; Gael. *sloc*, *slochd*, a pit; W. *ysluch*, a slough.] A piece of deep mud, mire, or slush; a hole full of mire, chiefly in a road.

(*slūf*). [Ger. *schlauch*, a skin.] The cast-off skin of a serpent or other reptile.

(*Med.*) The dead part of flesh or skin that separates from the living parts in a wound or ulcer during mortification.

—*v. a.* (*Surg.*) To separate from the living parts. (To *come off*, to *fall off*, to *peel off*, to *slough off*, are all adopted to express the action of separation of dead from living structure.)

Sloughy, (*slou'y*), *a.* Miry; slushy; full of sloughs, as a road.

—(*slūf'y*). Resembling, or partaking of the nature of, a slough; noting the condition of a wound, or of mortification when the dead tissue is about to separate from the living.

Slovaks, the name of the Slavic inhabitants of N. Hungary, who, in the 9th cent., formed the nucleus of the great Moravian kingdom, but who, after the bloody battle of Presburg (A. D. 907), were gradually subjugated by the Magyars, to whom even yet they entertain no friendly feeling. Their number is reckoned at 2,750,000, of whom 800,000 belong to the Protestant, and the rest to the Catholic Church. The *S.*, whose character probably comes nearest to that of the old Slavic type, travel in great numbers over Germany and Poland as peddlers (Fig. 2383). Their language is a dialect of the Bohemian.

Sloven, (*slūv'n*), *n.* [Du. *slōf*.

slow, *slōffen*, to trail one's feet along.] Literally, a slow or sluggish man; to trail specifically a man or boy habitually negligent of neatness and order; one who is careless of his dress or negligent of cleanliness. See SLATTERN.

Slovenliness, (*slūv'n-*), *n.* State or quality of being slovenly.

Slovenly, (*slūv-*), *a.* Careless or negligent of dress, or of neatness or cleanliness of appearance; as, a *slovenly* man. — Loose; irregular; disorderly; not exact, precise, or neat; as, a *slovenly* dress, a *slovenly* piece of work.

—*adv.* In a careless, negligent, inelegant manner.

Slow, (*slō*), *a.* (*comp.* SLOWER; *superl.* SLOWEST.) [A. S. *slaw*.] Inactive; tardy; dilatory; acting with circumspection or deliberation; not hasty; not precipitate; as, the Lord is merciful, and *slow* to anger. — Moving a small distance in a certain time; not quick or alert in motion; not swift or rapid; as, a *slow* walker, a *slow* rate of speed. — Long in taking place; not happening in a short time; as, the change is *slow*, but sure. — Not ready, prompt, or quick; as, a person *slow* of speech. — Behind in time; noting a time later than the true time; as, my watch is *slow*. — Heavy in wit; intellectually dull; wanting quickness, briskness, or liveliness of understanding; as, a person of *slow* perception or compre-

hension, they are a *slow* sort of people, &c. — Wearisome; triste; vapid; dull; as, life is *slow* to some people.

(*NOTE.* *Slow*, used in the formation of self-explaining compounds, gives *slow*-spirited, *slow*-paced, *slow*-sighted, and the like.)

Slow, *v. a.* To lessen the speed of; to retard; as, to *slow* a railroad-train.

Slow'ly, *adv.* In a slow manner; with moderate motion; not rapidly; not soon; not in a little time; not hastily or rashly; not readily or promptly; tardily; with slow progress; as, he *slowly* recovered, money comes in *slowly*.

Slow'ness, *n.* State or quality of being slow; dilatoriness; tardiness; want of speed or celerity; moderate progression; dulness to admit conviction or impression; want of readiness or promptness; dulness of intellect; deliberation; coolness; caution in deciding.

Slows, *n.* (*Med.*) Another name for the MILK-SICKNESS, *q. v.*

Slub, *n.* (*Imp.* and *pp.* SLUBBED,) (*slūbd*). To draw out and slightly twist, as wool.

Slub'ber, *v. a.* [Du. *slobberen*; Icel. *slupra*.] To do anything lazily, imperfectly, or rudely. — To stain; to daub; to smear; to smudge; — also, to cover carelessly.

Slub'ing-machine, *n.* The machine used in the formation of slubs.

Sludge, (*slūj*), *n.* (See SLOUGH.) Mire; soft mud; slush. — Some floating pieces of ice and snow.

Sludge-hole, *n.* (*Mach.*) The mud-hole of the boiler of a steam-engine.

Sludger, (*slūj'r*), *n.* A borer for use in sludge, a bog, or quicksand.

Sludgy, *a.* Slushy; muddy; miry.

Slue, *v. a.* (*imp.* and *pp.* SLUED,) (*slūd*). (*Naut.*) To turn, as a cylindrical piece of timber, as a spar, boom, &c., about its axis, without moving it out of its place; as, to *slue* the main-yard. — To twist or turn about; — usually with *round*; as, he *slued round*, and took to his heels.

—*v. n.* To turn about or aside from the course; — generally before *round*.

Slug, *n.* [Du. *slēk*, slug, slug-snail; allied to *slow*.] A slow, lazy, sluggish fellow; a sluggard.

(*Mil.*) A cylindrical or oval piece of metal used for the charge of a gun, probably so named from its resemblance in shape to a slug or snail.

(*Zoöl.*) See LIMAX.

—*v. a.* To load with a slug or slugs; as, to *slug* a fowling-piece.

Slug'ard, *n.* [*Slug*, and term. *ard*.] A drone; a person constitutionally or habitually slow, lazy, idle, inert, or inactive.

—*a.* Sluggish; lazy; as, *sluggard* sleep.

Slug'ish, *a.* Slow; lazy; idle; slothful; habitually or naturally given to indolence or laziness; dull in action; as, a *sluggish* man, a *sluggish* temperament. — Having little motion; slow; as, a *sluggish* stream. — Lacking power to move; inert; inactive; — said either of a person or thing.

—Vapid; dull; spiritless; tame; inane; simple; as, a *sluggish* fancy.

Sluggishness, *n.* State or quality of being sluggish; natural or habitual indolence or laziness; sloth; dulness; as, *sluggishness* of the understanding. — Inertness; absence of power of motion; — applied to inanimate matter. — Slowness of motion; as, the *sluggishness* of a river.

Slugs, *n. pl.* (*Mining*.) Half-roasted ore.

Sluice, (*slūs*), *n.* [Du. *sluis*, a flood-gate; Ger. *schleuse*; Fr. *écluse*.] (*Hydraul.*) A frame of timber, stone, or other solid substance, serving to retain and raise the water of a river or canal, and when necessary, to give it vent. — Hence, an opening; a source of supply; that from which anything flows; as, the eyes are the lachrymal *sluices* of sensibility. — The stream of water issuing through a flood-gate. — Hence, any stream, or that which is considered as flowing in a stream.

—*v. a.* To open, as a flood-gate or sluice; to wet abundantly; to overwhelm; as, to *sluice* grass-lands.

Sluicy, (*slū'sy*), *a.* Falling in streams, as from a sluice or flood-gate; as, *sluicy* rain.

Slum, *n.* [Etymol. unknown.] Any portion of a city or large town, inhabited by a squalid or vicious population; any low neighborhood, or refuge of the criminal and the destitute; as, the *slums* of New York.

Slum'ber, *v. n.* [A. S. *slumerian*.] To sleep lightly; to doze or drowse. — To sleep; — used chiefly in the poetic and more elevated sense. — To be in a state of negligence, indifference, supineness, idleness or inactivity; as, "the *slumbering* ages." — *H. Taylor*.

—*v. a.* To lay to sleep. — To stupefy; to stun; as, to *slumber* one's conscience.

—*n.* Light sleep; sleep not deep or sound; repose; rest; as, at last, she fell into a gentle *slumber*.

Slum'berer, *n.* One who slumbers.

Slum'berless, *a.* Without slumber; sleepless.

Slum'berous, *a.* Somniferous; soporiferous; inviting or exciting slumber; as, a *slumberous* shade.

Slump, *v. n.* [Scot., a swamp.] To fall or sink suddenly through or in, when walking on an apparently hard surface, as on ice, frozen ground, &c.

—*n.* In Scotland, the sound made by a person or thing falling into a hole, or into a boggy, miry place.

Slumpy, *a.* Covered with a crust only; swampy; boggy.

Slung, *imp.* and *pp.* of SLING, *q. v.*

Slung-shot, *n.* A small metal attached to a thong, and used for striking, as an offensive weapon.

Slunk, (*slungk*), *imp.* and *pp.* of SLINK, *q. v.*

Slur, *v. a.* [Icel. *slor*, the refuse of fishes.] To soil; to sully; to pollute; to contaminate; to disgrace. — To

Fig. 2382. — A SLOOP.

Fig. 2383. — A SLOVAK.

pass slightly; to cloak; to conceal; as, he *slurs* the gist of the argument. — To perform carelessly, imperfectly, or inattentively; as, the writing was *slurred* with inaccuracies. — To cheat; to trick; to chisel; as, to *slur* one out of the game. (R.)

Slur, *v. a.* (*Print.*) To mackle; to blur or double, as an imprint from type.

(*Mus.*) To sing or perform in a smooth, gliding style; to connect smoothly in performing a musical composition, as several notes.

—*n.* A black mark or stain; hence, a stigma; a slight reproach or disgrace; also, an imendo; an imputation; as, to cast a *slur* upon a person's good name. — An imposition or practical joke played upon one.

(*Mus.*) An arch — connecting two or more notes not on the same degree, indicating to the performer that in playing they are to be united as much as possible.

Slush, Stosh, *n.* (See *Slough*.) Soft mud; sludge; puddle. — A puddle of snow and water. — A mixture or combination of greasy substances, employed in lubrication. — The refuse grease and fat, collected in cooking, on shipboard.

(*Mach.*) A composition of lime and white lead, used in painting the bright parts of machinery, as a preventative to oxidation.

—*v. a.* To dab with slush or grease; as, to *slush* a spar. (*Mach.*) To paint with a composition of white lead and lime, as the bright parts of machinery.

Slushy, Stoshy, *a.* Consisting of, containing, or resembling slush.

Slut, *n.* [*Dn. slet*, a slut.] A woman who is sluggish, slovenly, and negligent of cleanliness and tidiness of dress; a slattern; — hence, a term of reproach or slight contempt for a woman.

"I buy good meat for sluts to spoil." — *King*.

—A bitch; a female dog.

Slut/tish, *a.* Pertaining to, or characteristic of, a slut or slattern; untidy; not neat or cleanly; dirty; disorderly; as, a *slut/tish* appearance. — Meretricious; showy; as *slut/tish* tricks. (R.)

Slut/tishness, *n.* Qualities or practice of a slut; negligence of dress; want of cleanliness of person, or of furniture, and in domestic affairs generally.

Sly, *a.* (*comp. slyer*; *superl. slyest*.) [*Icel. slægr*, cunning.] Artful; cunning; crafty; subtle; wily; underhand; insidious; — in a bad sense; as, a *sly* intrigue.

—Dexterous in performing things secretly, and escaping observation and detection; knowing; astute; skillful; shrewd; — in a good sense; as, *sly* circumspection. — Done with artful secrecy; as, a *sly* trick.

On the *sly*, in a sly or underhand manner; under the rose; as, to kiss a pretty girl on the *sly*.

Sly-boots, *n.* A sly, roguish, or innocently-mischievous person; — used as a humorous colloquialism.

Sly/ly, Sh/ly, *a.* In a sly manner; artfully; insidiously; secretly.

Sly/ness, Sh/ness, *n.* State or quality of being sly; artfulness; craftiness; wiliness; cunning.

Smack, *v. n.* [*A. S. smæccan*.] To make a sharp noise by the separation of the lips, as after tasting anything with relish. — To kiss with sonorous violence; to buss; as, he gave her a *smacking* salute. — To have a taste, or be tinged with any particular flavor or quality; as, this wine *smacks* of age. — To possess or exhibit natural evidence of the presence or influence, as of any distinctive character or virtue; as, his observations *smack* of pedantry.

—*v. a.* To kiss with a sharp, sonorous noise; to buss; to osculate unnecessarily loud. — To make a noise, as with the lips, by separating them in the act of tasting; as, he *smacked* his lips over a bumper of '34 claret. — To crack; to make a sharp sound by striking; as, to *smack* a whip.

—*n.* [*A. S. smæc*; *Ger. schmack*.] A noise made by the separation of the lips in eating or drinking with relish. — The quick, sharp sound made by cracking a whip. — A sonorous noise made by the lips in kissing; a buss. — Pleasing taste; favor; savor; distinguishing quality; as, the *smack* of truffles in a *paté de foie gras*. — Hence, characteristic influence or ruling feature; as, the *smack* of experience. — A quick, smart blow, as with the flat of the hand; a slap; as, she gave him a *smack* on the face. — A taste; a drop; a minute quantity.

Smack-smooth, in a heedless, reckless, free-and-easy manner, careless of results.

—[*Dn. smakschip*.] (*Naut.*) A small vessel, usually sloop-rigged, used chiefly in the coasting trade and fisheries.

Smack'ing, *n.* A smack; a sharp, quick noise, as of a kiss.

—*a.* Making a sharp, lively sound; as, a *smacking* wind.

Smack'over, in Arkansas, a township of Ouachita co.

Small, (*smawl*), *a.* (*comp. SMALLER*; *superl. SMALLEST*.) [*A. S. smal, smal*; *Ger. schmal*.] Slender; minute in bulk; not large in dimensions; little in degree or quantity; diminutive; little in amount. — Petty; being of small moment, consequence, weight, or importance; trivial; insignificant; as, a *small* matter. — Exhibiting little worth, genius, or ability; not lofty-souled, large-minded, or intellectual; — occasionally, in a reproachful sense, little; mean; paltry; despicable; as, a man of *small* mental calibre, a *small* poet or politician, his conduct was of the *smallest*, &c. — Short; trifling; not prolonged or extended in time or duration; as, a *small* sketch, a *small* attempt. — Weak; slender; thin; gentle; soft; not loud, resonant, or sonorous; as, her voice is but *small*. — Having little strength; thin; innocuous; as, *small* ale or beer.

—The small or slender part of a thing; as, the *small* of the leg, of the foot, or of the back.

Small beer, a kind of thin-bodied, weak beer; — sometimes called *table-beer*; — hence (used adjectively), wishy-watery; spiritless; vapid; weak and unadorned; as, a *small-beer* poet, *small-beer* philosophy.

Small craft. (*Naut.*) A small vessel; or, used generically, vessels of small size, or below the ordinary size of square-rigged or sloop-rigged ships, as coasters. — *Small stuff*, spun-yarn, marline, ambroline, and the smaller kinds of cordage used on shipboard.

Small talk, chit-chat; light, common-place conversation.

Small wares. (*Com.*) Various small articles, principally of textile manufacture, as tapes, fringes, thread, braid, and the like; — known in the U. States under the American term *notions*.

Small'age, *n.* (*Bol.*) *Apium graveolens*. See *CELERY*.

Small'-arms, *n.* (*Mil.*) Muskets, rifles, pistols, revolvers, &c., in distinction from cannon or ordnance.

Small'-clothes, *n. pl.* Same as *BREECHES*, *q. v.*

Small'-coal, *n.* Coal about the size of a small nut in size, separated from the larger pieces by screening; — *cobble-coal*.

Small'ish, *a.* Somewhat small.

Small'ness, *n.* State or quality of being small; littleness of size, extent, volume, degree, force, strength, amount, value, weight, &c.; inconsiderableness in moment or importance; as, the *smallness* of a child, or of a bird or insect, the *smallness* of an affair, concern, or obligation, *smallness* of trouble or thanks, *smallness* of mind or memory, *smallness* of salary or compensation. — Fineness; softness; melodiousness; as, the *smallness* of a voice; also, in a depreciatory sense, thinness; reediness.

Small'-pox, *n.* [*Lat. variola*.] (*Med.*) An eruptive febrile disease, which, happily, is not now nearly so prevalent as it once was. It seems very doubtful whether this disease was at all known to the ancients; and, according to some Arabic historians, it came first from Ethiopia into Arabia about A. D. 572. The wars which were carried on in the East, and particularly the Crusades in the 12th and 13th centuries, introduced it into Europe, first into Spain and France, and then into other countries. This disease commonly commences with the usual febrile symptoms; as rigors, pain in the back and loins, great prostration of strength, followed by heat and dryness of the skin, a hard and frequent pulse, loss of appetite, pain in the epigastrium, with nausea, vomiting, headache, and sometimes delirium or convulsions. About the third day, an eruption of small, hard, red-colored pimples makes its appearance about the face and neck, and gradually extends over the trunk and extremities. The pimples gradually ripen into pustules, which, on the eighth day, generally begin to break, and crusts or scabs form on these last, falling off in four or five days more. The severity of the disease varies much in different instances, but is almost always in direct relation to the quantity of the eruption. When the pustules are numerous, they run together, and form an irregular outline; when fewer, they are distinct, and of a regularly circumscribed circular form. The former is technically called *variola confluenta*, the other *variola discreta*; the former being never free from danger, the latter seldom or ever dangerous. The most important difference between the two forms is in the secondary fever, which sets in about the eighth day of the eruption, or just when the maturation of the pustules is complete. It is slightly marked in the distinct *S.*, but generally very intense and perilous in most instances of the confluent; being the period at which death oftenest occurs. Both kinds are accompanied by sore throat, salivation, and frequently diarrhoea. A peculiar disagreeable odor also usually proceeds from the body of the patient. Like measles and scarletina, this disease frequently gives rise to others of a troublesome or dangerous nature; as glandular swellings, abscesses, pleurisy, loss of sight, consumption, &c. *S.* is the effect of specific contagion, communicated by contact, or through the air. There is no disease of which the contagion is so sure, and which operates at a greater distance, than that of *S.*; but it rarely attacks the same individual more than once. It is not a little remarkable that a small quantity of the matter taken from a pustule and inserted beneath the skin of a healthy individual, gives rise to a much milder form of the disease than would arise in the natural way, *i. e.*, by inhaling the contagious poison; and to this fact are we indebted for the great means of guarding against this disease. (See *INOCULATION*, and *VACCINATION*.) The treatment required in *S.* does not differ particularly from that of ordinary fever; the bowels requiring to be

kept moderately open, free ventilation established, and the skin, if necessary, kept cool by sponging it with tepid vinegar and water. Small doses of mercury are often serviceable in moderating the febrile symptoms. The strength requires to be attended to, and, if much reduced, quinine, wine, and nourishing diet are to be employed. Blood-letting is almost always attended with very great danger, and not to be had recourse to if it can possibly be avoided. The complications of this disease require to be carefully watched, and if the throat be much affected, a blister should be applied to the neck, and gargles of infusion of roses used.

Smalls', *n. pl.* A colloquialism for small-clothes or breeches.

Smally, (*smawl'y*), *adv.* In a small degree; with minuteness. (R.)

Small'wood, in Illinois, a township of Jasper co.

Smalt, *n.* [*Ger. schmalte*.] (*Paint.*) See *COBALT*.

Smalt'ine, *n.* (*Min.*) One of the most important ores of cobalt, being (with cobaltine) that from which most of the smalts of commerce is manufactured; whence the name. It is an arsenide of cobalt, composed of 72 per cent. of arsenic, 95 cobalt, 9 iron, and 9.5 nickel.

Smarag'dine, *a.* Made of emerald; resembling emerald.

Smaragd', *n.* [*Gr. smaragdos*.] (*Min.*) The emerald.

Smarag'dite, *n.* (*Min.*) A peculiar laminated form of argite, or hornblende, of a bright emerald-green color.

Smart, *n.* [*Dn. Ger. schmerz*, pain, ache.] Pain, as from a cut; quick, acute, lively pain; a pricking, local pain, as the pain from stinging by nettles; as, the *smart* caused by flagellation. — Severe, pungent grief or pain of mind; as, the *smart* of conscience. — A cant word for a young fellow who affects an air of briskness, readiness, and vivacious assurance.

—*v. n.* [*A. S. smæortan*; *Dn. smarten*.] To feel an active, pungent pain; especially, some local pain from some piercing, stinging, or irritating application. — To feel a pungent pain of mind; to experience acute pain; as, to *smart* under undeserved reproaches. — To be punished; to bear penalties of the evil consequences of anything.

"No creature *smarts* so little as a fool." — *Pope*.

—*a.* (*comp. SMARTER*; *superl. SMARTEST*.) Pungent; pricking; causing an acute local pain or irritation; as, a *smart* cut from a whip, a *smart* quality or taste. — Keen; poignant; severe; as, *smart* sufferings. — Quick; vigorous; active; sharp; severe; as, to have a *smart* encounter with the enemy. — Brisk; fresh; as, a *smart* breeze. — Acute and pertinent; witty; vivacious; quick in suggestion, expellent, or retort; characterized by pungency, force, or shrewdness; as, a *smart* saying, a *smart* epigram, a *smart* reply. — Active; efficient; brilliant; able to accomplish speedy results; as, a *smart* man of business. — Showy; dashy; spruce; modish; having pretensions to taste or fashion; as, to be dressed *smart*.

(*Note.* *Smart* is frequently used in this country in the sense properly expressed by the word *clever*; as, a *smart* young fellow. This is a solecism. The term *smart*, when applied to persons, is, among good speakers, almost entirely used in reference to dress; as, a *smart* appearance.)

Smart'ly, *adv.* In a smart manner; with keen or acute pain; briskly; sharply; wittily; vigorously; actively; showily; sprucely.

Smart'-money, *n.* Money paid by a person by way of indemnity, to release himself from some embarrassing dilemma, awkward engagement, or humiliating or painful position; hash-money.

(*Mil.*) Money paid to soldiers or sailors in the English service, as partial compensation for wounds or injuries received.

(*Law.*) Damages much in excess of full compensation for actual injury done; vindictive damages.

Smart'ness, *n.* Quality of being smart or pungent; poignancy; or, the quality of being quick or vigorous; as, the *smartness* of a stroke, *smartness* of pain or suffering; quality of being lively, witty, keen, or vivacious; readiness; acuteness; wittiness; comprehensive force; as, the *smartness* of a repartee.

Smarts'ville, in California, a post-village of Yuba co., 18 m. E. of Marysville.

Smart'-weed, *n.* (*Bol.*) Same as *Water pepper*. See *POLYGONUM*.

Smash, *a.* To break in pieces by violence; to dash to pieces; to crush; to shatter; as, to *smash* a dish.

—*n.* [*Ger. schmiss*, a stroke, a blow.] A breaking to pieces; utter destruction.

—Hence, bankruptcy; insolvency; ruin; as, to go to *smash*. (Colloquially used.)

Smash'er, *n.* One who, or that which, smashes. — A cant term for one who passes counterfeit coin or bad currency. — A colloquialism for anything unusually large or wonderful.

Smatch, *n.* Taste; tincture; savor; twang; as, some languages have a guttural *smatch*, this wine has an oily *smatch*.

Smat'ter, *v. n.* [*For smacker*, from *smack*, a taste, a savor; *Icel. smækr*, a taste.] To talk superficially or ignorantly; as, he *smatters* of things he knows absolutely nothing about. — To have a slight taste; to have a slight, superficial, or imperfect knowledge; to smack; as, by a *smattering* of big words, and his own effrontery, he manages to be considered by some a wiseacre.

—*n.* A smattering; slight, flimsy, superficial knowledge; as, a *smattering* of judicial astrology.

Smat'ter'er, *n.* A sciolist; one who has only a slight, superficial knowledge.

Smat'tering, *n.* Sciolism; a slight, superficial knowledge; as, he possesses a *smattering* of several languages.

Fig. 2384. — A SMACK.

Smear, *v. a.* [A. S. *smyrian*; Du. *besmeren*.] To over-spread with grease, or anything unctuous, viscous, or adhesive; to daub; to besmeer; as, to *smear* a vessel's bottom with pitch.—To soil; to contaminate; to pollute.

—*n.* Ointment; unguent; a fat, greasy, oily substance. (R.)—A spot made by an unctuous, oleaginous, or viscous substance, or as if by such a substance; a blot or blotch; a dab or daub; a stain; a patch; as, a *smear* of paint.

Smec'tite, *n.* [Fr., from Gr. *smēchein*, to wipe off.] (Min.) A greenish kind of halloyside.

Smeg'matic, *n.* [Gr. *smēgma*, soap.] Detergent; cleansing; soapy.

Smeir, *n.* A kind of semi-glaze on earthenware, made by adding common salt to pottery glazes.

Smell, *v. a.* (imp. and pp. SMELLED, SMELT.) [Ger. *schmelen*, to smoke, to reek; Du. *smellig*, greasy, from the odor emitted by ointment when spread.] To perceive by the nose, or by the olfactory nerves; to have a sensation excited in certain organs of the nose by particular qualities of a body which are transmitted in fine particles, often from a distance; as, to *smell* a perfume, to *smell* a stench.

To *smell* a rat. To entertain strong suspicion. (Colloq. and R.)—To *smell out*. To discover by natural sagacity; as, the dog *smelt out* his master.

—*n.* (Physiol.) The power or faculty of perceiving odors. For this purpose, the animal is provided with a special nerve, called the *olfactory nerve*, in which alone this faculty resides. In man, the filaments of this nerve are distributed in minute arrangements in the mucous membrane covering the interior and upper cavities of the nose. (See NOSE.) The branches are distributed principally in close plexuses, but the mode of termination of the filaments is not yet satisfactorily determined. Besides the sense of smell, the nasal cavities are endowed with common sensibility by the nasal branches of the first and second divisions of the fifth nerve, as is proved by those cases in which the sense of smell is lost, while the party still remains susceptible of sensations of cold, heat, itching, tickling, &c. The olfactory nerve is susceptible of any infinite variety of states, dependent on the nature of the external stimulus by which it is brought into a state of activity. All animals do not perceive the same odors in an equal degree. Carnivorous animals, for instance, have the power of detecting by the smell the special peculiarities of animal matters, and of tracking other animals by the scent, but apparently are not sensible to the odors of plants and flowers; while, on the other hand, herbivorous animals are peculiarly sensitive to the latter, and have little sensibility to animal odors. Man is inferior to many animals in respect to acuteness of smell, but his sphere of susceptibility to various odors is more uniform and extended. Odors in the case of animals living in the air arise from substances suspended in a state of extremely fine division in the atmosphere, or gaseous exhalations, often of so subtle a nature that they can be discovered by no other agent than the sense of smell itself. The odorous matters also require to be transmitted in a current through the nostrils, which is effected by the respiratory organs; and hence our perception of them is increased by repeated quick inspirations, as in sniffing. They are in all cases dissolved in the mucus of the mucous membrane before they affect the olfactory nerve; and hence this membrane must not be either too moist or too dry. The cause of the difference in the effect of different odors is unknown. Great differences in this respect exist among different individuals, many odors which are generally thought agreeable being to some persons intolerable; and different persons describe differently the sensations which arise from the same odorous substances. Further, the acuteness of this sense differs greatly in different individuals, and there seems to be in some persons insensibility to certain odors, and in the case of sight, to certain colors. Linnæus has divided odors into seven different classes:—*Aromatic*, as the carnation; *fragrant*, as the lily; *ambrosial*, as musk; *alliacous*, as garlic; *fœtid*, as the rag-wort, valerian; *virulent*, as Indian pink; *nauseous*, as the gourd.

Smeller, *n.* One who smells.—The nose, as being the organ of the olfactory sense;—used generally in the plural.

Smelling, *n.* The sense of smell; the sense by which odors are perceived; the act of one who smells.

Smelling-bottle, *n.* A small bottle filled with something pungent and aromatic for titillation of the nose and revival of the spirits; a vinaigrette.

Smelling-salts, *n. pl.* See HARTSHORN.

Smell'less, *a.* Lacking odor; destitute of smell.

Smelt, *imp.* and *pp.* of SMELL, *q. v.*

—*n.* [A. S.] (Zool.) A small and delicate fresh-water European fish, of the family *Salmonidæ*; the *Salmo eperlanus* of Linnæus.

—*v. a.* [Dn. *smelten*; Ger. *schmelzen*; A. S. *meltan*, to melt.] To melt or fuse, as ore, for the purpose of separating the metal from extraneous substances; as, to *smelt* iron, lead, tin, or copper.

Smelt'er, *n.* One who melts ore.

Smelt'ery, **Smelt-works**, *n.* A building or place for smelting ores.

Smelt'ing, *n.* Act or operation of melting or fusing ores for the purpose of extracting the metal; the process of separating metals from the earthy and other substances with which they are combined in the state of ore. See IRON (MANUFACTURE OF).

Smelt'zer, in Wisconsin, a township of Grant co.

Smelt'port, or SMITHPORT, in Pennsylvania, a post-borough, cap. of McKean co., 196 m. N.W. of Harrisburg.

Smew, *n.* (Zool.) A bird of the family *Anatidæ* (*Mergus albellus*, Linn.), very nearly allied to the goosanders and mergausers, but having a shorter bill. It abounds on the N. coast of Asia and in some parts of Europe.

Smiek'er, *v. n.* [Dan. *smigre*, to flatter.] To smirk; to ogle amorously; to look languishingly or wantonly.

—*a.* Amorous; wanton. (R.)

Smiek'ering, *n.* An amorous look.

Smieks'burg, in Pennsylvania, a post-borough of Indiana co., 174 m. W.N.W. of Harrisburg.

Smid'dum-tails, *n. pl.* (Mining.) The sludge or slimy portion deposited in washing ore.

Smift, *n.* A fuse used in blasting, or in firing a train of powder.

Smila'ceæ, *n. pl.* (Bot.) The Sarsaparilla family, an order of plants, class *Dictyogæus*. Diag. Bisexual or polygamous hexapetaloidous flowers, several consolidated carpels, and axile placentæ. They are herbaceous plants or under-shrubs, with a tendency to climb, and sometimes having fleshy tubers. The species are distributed over various parts of the world, both in tropical and temperate climates, being most abundant in tropical America. See SMILAX.

Smila'eine, (-sin),

n. (Chem.) A crystalline principle obtained from sarsaparilla root.

Smil'ax, *n.* [Gr.]

(Bot.) Sarsaparilla, the typical genus of the order *Smilacææ*. The roots of several species or varieties constitute the Sarsaparilla of the materia medica. Sarsaparilla is regarded as an alterative in venereal and skin diseases, rheumatism, &c. The kind most valued is that known as Jamaica Sarsaparilla, obtained from the species *S. officinalis* (Fig. 2385). It is not the produce of Jamaica, but of Central America and the northern parts of S. America. Other kinds distinguished in commerce are "Lima," "Lean Vera Cruz," "Gouty Vera Cruz," "Lisbon," or "Brazilian," and "Honduras." Among the European species is *S. aspera*, the roots of which form Italian Sarsaparilla.

Fig. 2385. — SARSAPARILLA, (*Smilax officinalis*.)

Smile, *v. n.* [M. H. Ger. *smilten*; Sw. and Goth. *smila*; allied to Sansk. *smi*, to smile.] To contract the features of the face in such a manner as to indicate pleasure, satisfaction, or affection and kindness;—the opposite of frown; as, "Patience on a monument, smiling at grief." (Shaks.)—To express slight disdain or contempt by a smiling look, implying sarcasm or pity: to smirk ironically; to sneer; as, one cannot but *smile* at such empty pretensions.—To look pleasant, gay, or joyous, or to present that aspect which excites to pleasurable emotions; as, *smiling* plenty.—To be propitious; to favor; to countenance; as, may fortune *smile* on our endeavors.

—*v. a.* To express or interpret by a smile; as, to *smile* approval.

—*n.* Act of smiling: a peculiar contraction of the physiognomy, which naturally expresses pleasure, satisfaction, approbation, moderate joy, or love and kindness;—correlative to frown; as, "the smiles of joy, the tears of woe." (Moore.)—Gay or jocund appearance; as, "the smiles of nature, and the charms of art." (Addison.)—Propitiousness; favor; countenance; as, the *smiles* of fortune.—An expression of the countenance resembling a benevolent smile, but indicative of opposite or malevolent feelings, as contempt, disdain, &c.; as, a scornful *smile*.

Smile'less, *a.* Without a smile.

Smil'ingly, *adv.* In a smiling manner; with a look of pleasure or satisfaction.

Smil'ingness, *n.* State of being smiling.

Smireh, *v. a.* [From *smear*.] To sully; to soil; to cloud; as, to *smireh* one's face with soot.

Smirk, *v. n.* [A. S. *smircian*.] To smile wantonly, affectedly, or pertly: to look affectedly soft, amorous, or kind; as, a *smirking* fop.

—*n.* An affected smile; as, the *smirk* of a coquette.

Smirk, **Smirk'y**, *a.* Jaunty; vice; spruce; dapper; affected.

Smit, *pp.* of SMITE, *q. v.* (R.)

Smite, *v. a.* (imp. SMOTE; pp. SMITTEN, rarely SMIT.) [A. S. *smitan*; Ger. *schmeiden*, to forge iron.] To strike, drive, or force against, as the fist or hand, a stone, hammer, or weapon; as, to *smite* one on the face.—To kill: to slay by a blow; to destroy the life of by beating, or by weapons of any kind.—To blast; to destroy the life of, as by a stroke or by something sent.—To destroy or overthrow in battle.—To afflict; to chasten; to punish; as, we are *smitten* for our wickedness.—To strike or affect with passion, as love, hate, or fear.—To *smite off*, to cut off.—To *smite out*, to strike out, as a tooth.

—*v. n.* To strike; to clash together, as the knees.

Smit'er, *n.* One who smites or strikes.

Smith, *n.* [A. S. from *smitan*, to smite; Ger. *schmid*; Icel. *smidr*, a workman.] One who forges with the hammer; a worker in metals; as, a blacksmith, goldsmith, ship-smith, and the like.—One who makes or effects anything.

Smith, ADAM, a celebrated political economist, B. at Kirkcaldy, Scotland, 1723. He studied at Oxford, and was appointed Professor of Moral Philosophy at Glasgow University in 1752. Towards the close of 1763, he accepted an invitation to travel with the Duke of Buccleuch, and having resigned his chair, made a long tour in France, becoming acquainted at Paris with some of the most eminent philosophers and economists. Returning in 1766, he spent the next ten years in retirement at Kirkcaldy, engaged in the composition of his great work, the *Inquiry into the Nature and Causes of the Wealth of Nations*, which first appeared in 1776. It has a high rank among the successful books of the world—overthrowing the grave errors which it attacked, and establishing their opposite truths. Its main principle is that *labor*, not money or land, is the real source of wealth. The means of making labor most fruitful, the division of labor, what wealth consists in, the mischiefs of legislative interference with industry and commerce, the necessity of freedom of trade, are admirably discussed and expounded. The book may be regarded as the basis of modern political economy, and one of its great objects has been accomplished in England in the establishment of *free trade*. In 1788, *S.* settled at Edinburgh, where he had the appointment of a Commissioner of Customs for Scotland. He was the friend of David Hume, of whose last days and death he wrote an account, with a warm panegyric on his character, which was published with Hume's autobiography. He was also author of a *Theory of Moral Sentiments*, which appeared in 1759, and the doctrine of which is that sympathy is the foundation of morals. *S.* was chosen Lord-Rector of the University of Glasgow in 1787, and D. 1790.

Fig. 2386. — ADAM SMITH.

Smith, JOHN, the founder of Virginia, B. at Willoughby, in Lincolnshire, England, about 1579. Of a daring spirit, longing for a larger and more adventurous life, he early served in the Netherlands as a soldier in the cause of liberty. He then travelled in France, visited Egypt and Italy, and, about 1602, greatly distinguished himself in the wars of Hungary against the Turks, gaining the favor of Sigismund Bathori, Prince of Transylvania. Wounded and taken prisoner by the Turks, he was sold as a slave, was harshly treated in the Crimea, and made his escape. Rumors of war in Morocco attracted him thither, and thence he returned to England about 1606. He entered with enthusiasm into the project of colonizing the New World, and with Gosnold, Winkfield, Hunt, and others, set out in December, 1606, with a squadron of 3 small vessels for Virginia, under the authority of a charter granted by James I. Amidst the unhappy dissensions, difficulties, and distress of the first years of the great enterprise, Smith rendered the most important services by his irrepres-

Fig. 2387. — JOHN SMITH.

sible hopefulness, his practicable wisdom, and his vigorous government. But for his wisdom and noble exertions the project would probably have been abandoned. He made important geographical explorations and discoveries. In 1607, ascending the Chickahominy, and penetrating into the interior of the country, *S.* and his comrades were captured by the Indians, and he only, by his rare self-possession, escaped with life. He remained a prisoner for some weeks, carefully observed the country, got some knowledge of the language of the natives, and when at last they were going to put him to death, he was saved by the affectionate pleading of Pocahontas, the daughter of the chief Powhatan, a girl of ten or twelve years old. Reconducted to Jamestown, *S.* had need for all his energy to cheer the desponding colonists. In the summer of 1608 he explored in an open boat the Bay of the Chesapeake and its tributary rivers, a navigation of nearly 3,000 miles. He also penetrated inland, established friendly relations with the Indians, and prepared a map of the country. On his return from this great expedition, he was made president of the colonial council. In 1609 he was severely injured by an accidental explosion of gunpowder, and without reward for his splendid services, except in his own conscience and the applause of the world, returned to England. He revisited Virginia in 1614, was captured by the French in the following year, and on his return

to London after three months, heard of the arrival of his Indian friend Pocahontas, *q. v.* S. made known her services, and she was presented to Queen Elizabeth, and loaded with marks of honor and gratitude. S. published in 1608 *A True Relation of such Occurrences and Accidents of Note as hath Happened in Virginia since the First Planting of that Colony, &c.* D. 1631.

Smith, JOSEPH, the founder of Mormonism. See **MORMONS**.

Smith, EDMUND KIRBY, a general of the Confederate army, son of the late Judge L. Smith, B. in St. Augustine, Florida, entered West Point in 1841, and graduated in 1845. At the close of the Mexican war, in which he served, he was sent to West Point, and remained there for three years as Assistant Instructor of Mathematics. After some other services he attained the rank of major of cavalry, which grade he resigned at the outbreak of the Civil War, and joined the Confederates. He was appointed major of artillery, shortly afterwards lieutenant-col. of Van Dorn's cavalry, adjutant-general to Gen. J. Johnston, and in that capacity obtained the rank of brigadier-general. He was assigned to a brigade of Gen. Johnston's corps, and by a timely arrival, in conjunction with Kershaw, changed the current of the first battle of Bull Run, at which he was severely wounded and obliged to retire from the field. Shortly after he was made a major-general, and married a daughter of Col. McDaniel, who had attended him through his illness. On his recovery he invaded Tennessee, and threatened Louisville and Cincinnati, but was obliged, in conjunction with Bragg, to retreat to Murfreesboro', and was sent, early in 1863, by Jefferson Davis to relieve Holmes in command of the Trans-Mississippi Department. He was made a general, and for a long time his headquarters were at Shreveport. He was in command of the Confederate troops in the campaign in which occurred the battles of Mansfield and Pleasant Hill, the damming of Red River, and the retreat of Gen. Banks. In May, 1865, he surrendered to Gen. Canby, and left the country. At the time of his death (March, 1893) S. was professor of Mathematics at the University of the South.

Smith, WILLIAM, a modern English philologist, born in London, 1814. An article on *Language*, furnished by him to the "Penny Cyclopædia," was one of his first successes in that career which he subsequently worthily pursued. In 1842 he commenced the *Dictionary of Greek and Roman Antiquities*, fulfilling the duties of editor himself. In the same capacity he subsequently published *The Dictionary of Greek and Roman Biography and Mythology*, and the *Dictionary of Greek and Roman Geography*. In 1850, he was appointed Professor of the Greek and Latin Languages and Literature in the New College. Three years later he became classical examiner in the University of London. In 1854 he commenced the publication of a new edition of Gibbons's *Decline and Fall of the Roman Empire*, with notes by M. Guizot, Dean Milman, and himself. He also produced several abridged editions of his larger classical dictionaries, a *Latin-English Dictionary*, based upon Forcellini and Freund; and a *Dictionary of the Bible*.

Smith, GEORGE, a distinguished Assyrian scholar, B. 1825, author of *Explorations in Assyria, Chaldean Account of Genesis, Ancient History of Assyria, &c.* D. 1876.

Smith, GERRITT, an Am. philanthropist, B. in Utica, N. Y., 1797. He was a large landed proprietor. In 1848, he distributed 200,000 acres, in lots of 50 acres each; in 1852, elected to Congress, but resigned ere his time was out. He was an earnest opponent of slavery. He published *The Religion of Reason* (1864); *Theologies* (1867), &c. Died Dec. 28, 1874.

Smith, in Ark., a twp. of Dallas co.—In *Iud.*, a twp. of Green co.—A twp. of Posey co.—A twp. of Whitley co.—In *Miss.*, a S. central co.; area, 620 sq. m. It is watered by Leaf River. Surface, undulating, and mostly covered with pine forests; soil, sandy. Cap. Raleigh.—In *Ohio*, a twp. of Belmont co.—A twp. of Mahoning co.—In *Penna.*, a twp. of Washington co.—In *Tenn.*, a N. co.; area, 360 sq. m. It is traversed by the Cumberland River. Surface, diversified; soil, excellent. Cap. Carthage.—In *Texas*, a N. E. co.; area, 990 sq. m. Rivers, Sabine, Neches, and the Angelina. Surface, level; soil, fertile. Cap. Tyler.

Smithborough, in N. Y., a post-vill. of Tioga co.

Smithdale, in *Miss.*, a post-village of Amite co.

Smithereens, *n. pl.* An Irish rendering of **SMITHERS**, *q. v.*

Smithers, *n. pl.* Fragments; shivers; splinters; as, to break a thing into *smithers*.

Smithery, *n.* A smith's workshop; a smithy or stithy. —Work performed by a smith.

Smithfield, in *Indiana*, a township of De Kalb co.—A v. of Delaware co.—A v. of Wayne co.

Smithfield, in *Iowa*, a township of Fayette county.

Smithfield, in *Maine*, a post-township of Somerset co., 25 m. N. of Augusta.

Smithfield, in *Minnesota*, a post-village of Wabashaw co., 12 m. N. of Wabashaw.

Smithfield, in *New York*, a township of Madison county.

Smithfield, in *North Carolina*, a post-village, cap. of Johnson co., 27 m. S.E. of Raleigh.

Smithfield, in *Ohio*, a post-village and township of Jefferson co., 14 m. S.W. of Steubenville. Staple produce, wool.

Smithfield, in *Pennsylvania*, a village and township of Bradford co., 10 m. N.W. of Towanda.—A post-village of Fayette co., 190 m. S.W. of Harrisburg.—A township of Monroe co.

Smithfield, in *Rhode Island*, a post-township of Providence co., 12 m. N. of Providence.

Smithfield, in *Utah*, a post-village of Cache co., 6 m. N. of Logan.

Smithfield, in *Virginia*, a post-town, the former cap. of Isle of Wight co., 80 m. S.E. of Richmond.

Smithfield, in *W. Virginia*, a village of Monongalia co., 10 m. N.W. of Morgantown.

Smithing, *n.* Act, art, or process of working a mass of iron into a particular form or shape.

Smith Island, in the Antarctic Ocean, the most W. of the S. Shetland group; Lat. 63° 2' S., Lon. 62° 47' W.

Smithland, in *Indiana*, a post-village of Shelby co., 8 m. S.W. of Shelbyville.

Smithland, in *Iowa*, a post-town of Woodbury co., 34 m. S.E. of Sioux City.

Smithland, in *Kentucky*, a post-village, cap. of Livingston co., on the Ohio river, 215 m. W.S.W. of Frankfort.

Smithland, in *Pennsylvania*, a village of Clarion co., 15 m. S. of Clarion.

Smithport, in *Louisiana*, a village of De Soto parish, 12 m. N.E. of Mansfield.

Smith's Bar, or **SMITHVILLE**, in *California*, a village of Placer co., 24 m. N.E. of Sacramento.

Smithsburg, in *Maryland*, a post-town of Washington co., 106 m. N.W. of Annapolis.

Smith's Creek, in *Michigan*, a post-village of St. Clair co., 11 m. S.W. of Port Huron.

Smith's Creek, in *N. Carolina*, flows into the Roanoke River from Warren co.

Smith's Falls, in prov. of Ontario, a town of Lanark co., 32 m. N.W. of Brockville.

Smith's Ferry, in *Massachusetts*, a village of Hampshire co., 80 m. W. of Boston.

Smith's Island, in *Pennsylvania*, a small island in the Delaware River, opposite Philadelphia.

Smith's Island, in *N. Carolina*, an island of New Hanover co., at the mouth of Cape Fear River. Cape Fear is at the S. extremity.

Smith's Landing, in *New Jersey*, a post-village of Atlantic co., 4 m. S. of Absecon.

Smith's Mills, in *New York*, a post-village of Chautauque co., 12 m. E. of Dunkirk.

Smithsonian, *a.* Pertaining to, or derived from, *Smithson*, an English gentleman, who gave by legacy a large sum of money to the U. States, for the foundation and support of an establishment for the diffusion of learning; as, the *Smithsonian Institute*.

Smithsonian Institute, a literary, scientific, and philosophical institution, organized at Washington, D.C., by Act of Congress in 1846, pursuant to the will of James Smithson, an Englishman (natural son of Hugh Percy, third Duke of Northumberland), who, dying at Genoa, 1829, after a life devoted to scientific pursuits, bequeathed to the U. States of America property amounting to \$515,169, to be applied to the "increase and effusion of knowledge among men." The management of the Institute is in the hands of regents appointed by the Federal govt., and a spacious structure, containing a museum, library, cabinets of natural history, and lecture-rooms, has been the result of their able adminis-

Fig. 2388. — SMITHSONIAN INSTITUTE, (Washington.)

tration of the testator's wishes. The library, carefully collected, is unsurpassed in this country as a resource for scientific reference, while in its museum are collected the rich acquisitions of national exploring expeditions. Some part of its income is devoted to scientific researches, and the production of works too costly for publication by private individuals. Departments of Astronomy, Ethnology, Meteorology, and Terrestrial Magnetism, have been established; and among the publications hitherto issued are the *Smithsonian Contributions to Knowledge*, 4to., distributed gratis to libraries; *Annual Reports*, and *Miscellaneous Collections*. The periodical courses of lectures, held in the Institute by eminent scientists and savans, form a prominent social feature of the national capital. The board of regents, at an early session after their appointment, selected Prof. JOSEPH HENRY, *q. v.*, as their secretary, an office which he held until his death.

Smith's Point, in the Chesapeake Bay, the most S. point of land at the mouth of the Potomac, on which is a light-house, with a fixed light 85 feet high.

Smith's Ranch, in *California*, a post-village of Sonoma co., 17 m. S.W. of Santa Rosa.

Smith's River, in *California*, flows W. into the Pacific Ocean from Del Norte co.

Smith's River, in *New Hampshire*, flows into the Connecticut River from Grafton co.

Smith's River, in *Virginia*, rises in Patrick co., and flows into Dan River near Leaksville, Rockingham co., N. Carolina.

Smith's Sound, a body of water N.W. of Baffin's Bay, terminating in the N.E. by a gulf 110 m. in its greatest breadth.

Smithton, in *Missouri*, a post-village of Worth co., 58 m. N.N.E. of St. Joseph.

Smithton, in *W. Virginia*, a post-village of Doddridge co., 58 m. E. of Parkersburg.

Smithtown, in *New York*, a post-village and township of Suffolk county, 45 miles N.E. of New York.

Smithtown Bay, in *New York*, an inlet of Long Island Sound, in Suffolk co.

Smithtown Branch, in *New York*, a post-village of Suffolk co.

Smithville, in *Arkansas*, a post-village, former cap. of Lawrence co., 125 m. N.N.E. of Little Rock.

Smithville, in *Indiana*, a post-village of Monroe co., 8 m. S.E. of Bloomington.

Smithville, in *Missouri*, a post-town of Clay co., 15 m. N.W. of Liberty.

Smithville, in *North Carolina*, a village, former cap. of Brunswick co., on Cape Fear river, 2 m. from its mouth in the Atlantic.

Smithville, in *New York*, a township of Chenango county. A post-village of Jefferson county, 5 m. S. of Ellisburg.

Smithville, in *Ohio*, a post-village of Wayne co., 92 m. N.E. of Columbus.

Smithville, in *Pennsylvania*, a post-village of Lancaster co., 46 m. E.S.E. of Harrisburg.

Smithville, in *S. Carolina*, a village of Abbeville dist., 94 m. W. of Columbia.

Smithville, in *Tennessee*, a post-village, cap. of De Kalb co., 65 m. E. of Nashville.

Smithville, in *Virginia*, a village of Powhatan co., 39 m. W. of Richmond.

Smithville Flats, in *New York*, a post-village of Chenango co., 125 m. S.W. of Albany.

Smithy, (formerly **SMIDRY**), *n.* [A. S. *smiththe*.] The workshop of a smith, particularly a blacksmith; a smithery; a stithy; as, a village *smithy*.

Smitt, *n.* [L. Ger. *schmitte*.] Ruddle, or fine red clay or ochre, used for marking sheep.

Smitten, *pp.* of **SMITE**. Struck; killed. — Affected with some emotion or passion, excited by something impressive; — especially, affected by amorous feelings; enamored; as, he was *smitten* with her attractions.

Smock, *n.* [A. S. *smoc*.] A shift; a chemise; a woman's under-garment. — A smock-frock; a blouse.

Smock-faced, (*fäst*), *a.* Pale-faced; maidenly; having a feminine countenance or complexion; as, "*smock-faced beaux*." — *Fenton*.

Smock-frock, *n.* A blouse; a coarse linen frock or shirt worn over the coat by farm-laborers, chiefly in England; a gabardine.

Smock-mill, *n.* A wind-mill, of which the sails are borne on a rotating cap, which turns round to meet the wind, in distinction from a *post-mill*, whose whole building turns on a post.

Smock-race, *n.* In England, a race run by women for the prize of a fine smock.

Smokable, *a.* That may be smoked; fitted, or ready, to be smoked.

Smoke, *n.* [A. S. *smoca*.] (*Chem.*) The exhalations, visible vapor, or substance that escapes, or is expelled, in the process of combustion, from the substance burning. Under the articles **COMBUSTION**, **FLAME**, and **FUEL**, the principle of combustion is fully explained. Those fuels which consist of fixed carbon, as anthracite and the coke of bituminous coal, evolve no S., for the first movement of the carbon into the air is when it combines with the oxygen to form the invisible carbonic oxide, from which it is not again set free. In nearly every process of combustion, whether the object be the attainment of light or heat, the formation of smoke should be guarded against as a waste of fuel. In great cities, where bituminous coal is consumed on a large scale for manufacturing purposes, the atmosphere is constantly charged with clouds of S., which is diffused over everything. In Pittsburg, for instance, so great is the nuisance, that white articles of external dress are almost discarded in consequence of their becoming immediately soiled. Several plans, at once efficient and economical, have been supplied to manufacturers. The object of these plans has been either to prevent the production of S. by effecting complete combustion in the furnace, or to consume the S. after it has been evolved from one fire by causing it to pass over another, supported by smokeless fuel. It has been ascertained that the great mass of S. is sent forth from fuel freshly thrown on a fire, and that when the fire becomes hotter, the S. diminishes. This is owing to the sweeping off of the carbon before it could be fairly exposed to the further action of the heat and air. This leads to the method which adds the fuel gradually, and spreads it over the front portion of the grate, so that the S. shall have to pass over the fire behind, and thus be consumed as it mixes with the excess of air carried along with it; hence, this method of preventing S., by consuming it in the furnace, has been adopted very generally. Other inventions are based on supplying fuel to the fires from beneath, so that the products of combustion must pass through the incandescent coals above before escaping.

—Vapor; watery exhalations; —so called because resembling smoke.

(NOTE. *Smoke* used as a prefix to other words, forms various compound terms, self-explaining in their character; as, *smoke-consuming*, *smoke-dried*, *smoke-wreath*, &c.) —*v. n.* To emit or expel smoke; to throw off volatile matter in the form of vapor or exhalation; as, a chimney *smokes*. — Hence, scripturally, to burn; to be kin-

died; to rage. — To raise a dust or smoke by rapidity of motion; as, the horses *smoked* along the field. — To suffer; to be punished or chastised; as, he shall *smoke* for doing this. — To inhale and exhale the vapor of burning tobacco; as, he both drinks and *smokes*.

Smoke, *v. a.* To apply smoke to; to hang in smoke; to scent, dry, or medicate by smoke; as, to *smoke* infected articles, to *smoke* meats for preservation.

— To subject to the operation or action of smoke, for the purpose of annoying or driving out; — frequently with *out*; as, to *smoke* a badger *out* of its hole. — To sneer at; to ridicule to the face; as, to *smoke* a pedagogue. — To cause to emit the fumes of tobacco; to inhale the smoke of tobacco through; as, to *smoke* a pipe or cigar.

Smoke-arch, *n.* (*Mach.*) The smoke-box of a locomotive.

Smoke'-ball, *n.* (*Mil.*) Same as STINK-POT, *q. v.*

Smoke'-black, *n.* Lump-black prepared by the combustion of resinous substances in large pans under a dome or chimney in which cloths are suspended, to which the soot becomes attached.

Smoke'-board, *n.* A board suspended before a fireplace to hinder the smoke from coming out into the room.

Smoke'-box, *n.* (*Mach.*) The end of a steam-boiler on which the chimney or smoke-stack is placed. Locomotives with inside cylinders have them placed in this box, which keeps both them and the steam-pipes at a high temperature.

Smoke-box door, the door in front of the smoke-box, by which access is gained to the cylinders or steam-pipes, and other parts placed in this box.

Smoke'-dry, *v. a.* To dry by smoke.

Smoke'-jack, *n.* See JACK.

Smoker, *n.* One who dries by smoke; as, a *smoker* of meats. — One who uses tobacco by inhaling its smoke from a pipe or cigar; as, a confirmed *smoker*.

Smoke'-sail, *n.* (*Naut.*) A small sail hoisted before the funnel of a ship's galley, to allow the smoke to rise before it is blown away by the wind.

Smoke's Creek, in New York, flows into Lake Erie from Erie co.

Smoke'-stack, *n.* The chimney or funnel of a steamer or locomotive.

Smoke'ing, *n.* Act of emitting smoke, as from a chimney. — Act of applying smoke to; as, the *smoking* of beef or hams, the *smoking* of an animal out of its hole. — Act or practice of inhaling tobacco-smoke from a pipe or cigar. See TOBACCO.

Smok'ing-cap, *n.* A fez, or skull-cap, worn by men in a tabagie or smoking-room.

Smok'ily, *a.* In a smoky manner.

Smok'iness, *n.* State of being smoky.

Smoky, *a.* (*comp.* SMOKIER; *superl.* SMOKIEST.) Emitting smoke; fumid; as, a *smoky* fire. — Thick; filled with smoke, or with a vapory exhalation resembling it; as, a *smoky* atmosphere. — Having the appearance or characteristic qualities of smoke; as, a *smoky* fog. — Subject to be filled with smoke from the various avenues to a fire; as, a *smoky* house. — Tarnished with smoke; noisome with smoke; sooty; as, a *smoky* ceiling.

Smoky Hill Fork, a branch of the Kansas River, rises in E. Colorado, and joins the Republican Fork near Fort Riley, Kansas, to form the Kansas River, after an E. course of 400 m.

Smoky Hol'low, in New York, a village of Columbia co., 36 m. S.S.E. of Albany.

Smolen, an island of Norway, in the Atlantic, 3 m. W.S.W. of Hittern. Lat. 63° 20' N., Lon. 8° 5' E. Ext. 15 m. long and 10 broad.

Smolensk, a town of Russia in Europe, cap. of a government of same name, on the Dnieper, 230 m. S.W. of Moscow. Lat. 54° 50' N., Lon. 31° 56' 36" E. It is the see of an archbishop, and has three cathedrals, numerous churches, monasteries, and an episcopal palace. It has, besides, numerous schools, a college, hospitals, a house of correction, and assembly-rooms. *Manuf.* Linens, leather, carpets, and soap. *S.* was the scene of an obstinate conflict between the French and Russians, Aug. 16-17, 1812, in which victory is claimed on both sides. The day following, Aug. 18, the French returning to the attack, found the city deserted and in ruins. *Pop.* (1897) 37,300.

Smollett, TOBIAS, a British author, b. in Dumbarton-shire, 1721, was educated for the medical profession, and commenced practice in London, 1746, though his entire time was devoted to literature. He produced in rapid succession *The Regicide*, a tragedy; *The Tears of Scotland*, a poem; some satires, called *Advice and Reproof*; and in 1748, his novel of *Roderick Random*. This work, which made him universally popular, was followed by *Percegrine Pickle*, *Count Fathom*, *Sir Launcelot Greaves*, and *Humphrey Clinker*; and, on the death of his friend and countryman, Hume, he carried on the *History of England* from the period at which Hume had left it. D. 1771. As a poet, *S.* has small claims on our consideration; as a novelist, he is only second to Fielding, though his gross indecency too often makes his works unreadable to refined and educated minds; but, as a historian, he is entitled to a large share of praise, not only for his industry and perspicuity, but for the liberality that distinguishes his political writings, and the absence of any national or party bias in his expressed opinions.

Smolt, *n.* (*Zool.*) A salmon, from 4 to 6 inches long, and a little more than a year old, that has acquired its silver scales.

Smooth, *a.* (*comp.* SMOOTHER; *superl.* SMOOTHEST.) [A *S. smethe*, *smooth*.] Having a plain, even, or level surface, or a surface so even that no roughness or asperities are perceptible; not rough; as, *smooth* paper, a *smooth* table. — Evenly spread; glossy; sleek; as, *smooth* hair,

a *smooth* skin. — Moving equally; gently flowing; not ruffled, undulated, or obstructed; as, *smooth* waters. — That flows without stops, obstruction, or hesitation; voluble; even; not harsh; as, *smooth* language, *smooth* verse. — Blind; assuasive; mild; flattering; deceptive; as, a *smooth* tongue, a *smooth* discourse.

(NOTE. *Smooth* is frequently used in the construction of such self-explaining compounds as *smooth-faced*, *smooth-chinned*, *smooth-grained*, *smooth-leaved*, &c.)

Smooth, *n.* That which is smooth; the smooth part of anything; as, in the rough or the *smooth*. — In the U. States, a meadow; a grass-field.

— *v. a.* [A. S. *smethian*, to soothe, to soften.] To make smooth; to make plain or even on the surface; to level; to flatten; as, to *smooth* linen with an iron, to *smooth* a board with a plane. — Hence, (1.) To free from impediment or obstruction; as, money *smooths* one's way through life. (2.) To make flowing; to smooth from harshness; as, to *smooth* poetic numbers. (3.) To calm; to assuage; to mollify; to allay; as, to *smooth* a ruffled temper. (4.) To soften; to palliate; to lighten; as, to *smooth* a fault. (5.) To ease; to rectify; to regulate; as, to *smooth* a difficulty.

— *v. n.* To play the flatterer; to employ blandishments; as, "I cannot . . . *smooth*, deceive, and coo." — *Shaks.*

Smooth'er, *n.* One who, or that which, smooths.

Smooth'ing-iron, *n.* Same as FLAT-IRON.

Smooth'ing-plane, *n.* A small, fine plane, used for smoothing and finishing work.

Smooth'ly, *a.* In a smooth manner; evenly; not roughly or harshly; with even flow or motion; without obstruction or difficulty; readily; easily; with soft, bland, insinuating language.

Smooth'ness, *n.* State, quality, or condition of being smooth; evenness of surface; freedom from ruggedness or asperity; as, *smoothness* of the skin, the *smoothness* of a board, &c. — Softness or mildness to the palate; as, the *smoothness* of a liquor. — Fluency of words; softness or harmony of numbers; blandness of address; mildness or gentleness of speech; as, the *smoothness* of a verse, the *smoothness* of a compliment, *smoothness* of manner.

Smooth' - spoken, **Smooth' - tongued**, *a.* Plausible; insinuating; flattering; with specious words; as, a *smooth-spoken* villain.

Smorzando, **Smorza'to**, (*smörd-zan'do*), *p. a.* [It.] (*Mus.*) Dying away; becoming fainter and softer by degrees, as sound.

Smote, *imp.* of SMITE, *q. v.*

Smother, *v. a.* [A. S. *smoran*, *asmoran*.] To suffocate or extinguish life by closely covering, and by the exclusion of air; to destroy the life of by suffocation; as, to *smother* a child — To choke; to deprive of air by a thick covering, as of smoke, &c.; as, to *smother* a fire. — Hence, to suppress; to stifle; to repress the action of; to prevent publicity; as, to *smother* a complaint or remonstrance, *smothered* rage, &c.

— *v. n.* To be suffocated, choked, or stifled. — To be suppressed or concealed. — To smoulder, as a fire.

— *n.* Smoke; thick dust.

Smouch, *v. a.* and *n.* Same as SMUDGE, *q. v.*

Smould'er, *v. n.* To burn and smoke without flame or vent.

— *n.* Smothered smoke.

Smould'eriness, *n.* The state of smouldering.

Smudge, *v. a.* To smear; to smutch; to soil.

— *n.* A stain; a blot; a smear.

— In the U. States, a slow fire, by the smoke of which to drive away mosquitoes, &c.

Smug, *a.* [A. S. *smicere*; Ger. *schmuck*.] Nice; spruce; dressed with affectation of stylishness, but without elegance. — Affectedly smart; as, a *smug* clerk.

— *v. a.* To adorn; to spruce.

Smuggle, (*smug'gl*) *v. a.* [A. S. *smugan*, *smuan*, to creep; Du. *smokelen*.] To import or export secretly and in defiance of law, or secretly to import or export, as dutiable goods, without paying the duties imposed by law. — To convey or introduce clandestinely.

— *v. n.* To import or export goods without paying the customs.

Smug'gled, *a.* Imported or exported clandestinely and contrary to law; as, *smuggled* goods.

Smug'gler, *n.* One who smuggles; a contrabandist. — A vessel employed in smuggling.

Smug'gling, *n.* The offence of clandestinely importing or exporting prohibited goods, or other goods without paying the customs.

Smug'ly, *adv.* Neatly; sprucely. (*R.*)

Smug'ness, *n.* Spruceness; neatness; affected elegance.

Smut, *n.* [A. S. *smitta*; Ger. *schmutz*, fat, dirt.] A spot made with soot, coal, or other dirty substance. — Filthy language; obscenity.

(Agric.) A disease in grain. See UREDO.

— *v. a.* To blacken; to tarnish; to stain or mark with smut. — To taint with mildew.

— *v. n.* To gather smut; to be converted into smut.

Smutch, (*smüch*) *v. a.* To blacken with smoke.

— *n.* A smut; a foul spot. (*Low.*)

Smut'-mill, *n.* (*Agric.*) A machine for winnowing grain from smut.

Smut'tily, *adv.* Blackly; smokily; foully; in a smutty manner. — With obscene language; as, to speak *smut'tily*.

Smut'tiness, *n.* State of being smutty; soil from smoke, soot, coal, or smut. — Ribaldry of language; obscenity; indecency in speech or writing.

Smut'ty, *a.* Soiled with smut, coal, soot, or the like; as, a *smutty* face. — Tainted with mildew; as, *smutty* wheat. — Obscene; not modest or pure; as, a *smutty* joke.

Smyrna, (*smir'nah*), one of the most ancient cities now existing in Asia Minor, and one of the most wealthy

and important of all the towns of Asiatic Turkey. *S.* is situated at the bottom of a deep and capacious bay on the N.W. coast of Asia Minor, in the prov. of Natolia, 210 m. S.S.W. from Constantinople; Lat. 38° 25' 36" N., Lon. 27° 6' 45" E. The whole front of the city is lined with quays, and ships of large tonnage can come up into the heart of the town. The trade carried on, both in import and export, is immense. The town is wretchedly built, and consists of narrow, dirty streets, both crooked and gloomy. The exports consist of cotton, coffee, mohair, drugs, galls, resins, and all kinds of dried fruits, especially figs. The district round the city, extending for several miles, is governed by a pasha. *S.*, according to Herodotus, was first colonized by the *Æolians*, B. C. 688. It was one of the seven churches mentioned in *Rev. i.* Polycarp, a disciple of the apostle John, who suffered martyrdom here about 166, is said to have been the first bishop. A massacre of several thousand Greek inhabitants by the Mohammedans took place June 15, 1821, and another massacre of more than 1,000 Christians occurred Nov. 2, 1826, and following days. A fire, which destroyed 12,000 houses, took place in July, 1841; and an earthquake caused much damage in 1846. Great fires occurred in 1860 and 1882. The first stone of the Roman Catholic Cathedral of St. John was laid Dec. 27, 1862. *Pop.* 160,000. The Gulf of *S.* is an inlet of the *Ægean* Sea, extending 45 m. inland, and having 22 m. of breadth at its entrance. It contains several small islands. Its waters are deep, and it affords good anchorage.

Smyrna, in Delaware, a post-town of Kent co., 36 m. S. of Wilmington. *Pop.* (1897) 2,750.

Smyrna, in Indiana, a post-village of Decatur co., 40 miles N. of Madison. — A township of Jefferson county. — A village of Vanderburg county, 5 miles N.E. of Evansville.

Smyrna, in Maine, a post-township of Aroostook co., 110 m. N.E. of Bangor.

Smyrna, in Michigan, a post-village of Ionia co., 25 m. N.E. of Grand Rapids.

Smyrna, in New York, a post-village and township of Chenango co., 100 m. W. of Albany.

Smyrna, in Ohio, a post-village of Harrison co., 40 m. W.S.W. of Stenbenville.

Smyrna, in Tennessee, a post-village of Rutherford co., 20 m. S.E. of Nashville.

Smyrniot, (*smir'nī-ol*), *a.* (*Geog.*) Belonging, or pertaining, to Smyrna.

— *n.* (*Geog.*) A native or inhabitant of Smyrna.

Smyser's Depot, in Pennsylvania, a village of York co., 10 m. S. of York.

Smyth, in Virginia, a S.S.W. co.; area, 625 sq. m. *Rivers.* The N., Middle, and S. Forks of the Holston River. *Surface*, mountainous; *soil*, fertile in the valleys and along the rivers. *Min.* Salt and gypsum. *Cap.* Marion.

Smythfield, in Pennsylvania, a village of Somerset co., 158 m. S.W. of Harrisburg.

Snack'wine, in Illinois, a post-village and township of Putnam co., 23 m. S.W. of La Salle.

Snack, *n.* [O. Eng. *snack*, to snatch.] A slight, hurried repast; an improvised luncheon; as, to take a *snack*. (*Local Eng.*)

To go *snacks*, to take a fair share or part; as, they went *snacks* in the transaction.

Snaffle, (*snaff'l*) *n.* [Du. *sneb*, *snavel*; Ger. *schnabel*, a bill, a beak, a muzzle.] A bridle consisting of a slender bit-mouth without branches. — A snaffle-bit.

— *v. a.* To bridle; to manage with a snaffle or bridle, as a horse.

Snaffle-bit, *n.* A slender bit, with a joint in the middle.

Snag, *n.* [Icel. *snagi*, a small stake or peg.] A jag or sharp protuberance; a short branch, or a sharp or rough branch; a shoot; a knot. — A tooth; a tooth projecting beyond the rest; — applied in contempt.

— The trunk of a large tree firmly imbedded in the bottom of a river at one end, and rising nearly or quite to the surface at the other end, thus presenting a dangerous obstruction to navigation; — they are common in the Mississippi and other western rivers of this country. See SAWYER.

Snag-boat, a vessel fitted with an apparatus for removing snags, or other obstructions to navigation, in rivers. — *v. a.* (*imp.* and *pp.* SNAGGED,) (*snagd*.) To injure or wreck utterly by fouling a snag; as, to *snag* a steamboat. (*Amer.*)

Snagged, *a.* Full of snags, or sharp protuberances; snaggy.

Snaggy, *a.* Full of snags; shooting into sharp points; abounding with knots; as, a *snaggy* tree, or branch of a tree.

Snail, *n.* [A. S. *snegel*, *snægel*.] (*Zoöl.*) The common name of gasteropodous molluscs comprising the numerous family HELICIDÆ, *q. v.*, feed chiefly on vegetable substances, although they are very indiscriminate in their appetite, and even devour the dead of their own kind. The mischief which they do to garden-crops is too well known; and gardeners lay down cabbage-leaves and the like to attract them, in order that they may be destroyed — any greasy substance increasing the attractiveness of the bait. — *S.* delight in warm, moist weather; in dry weather, their chief time of activity is during the night, and they hide themselves by day; but after rain, they come forth at any hour in quest of food. At the approach of winter, or in very dry weather, they close the mouth of the shell with a membrane (*epiphragm*), formed by the drying of the mucous substance which they secrete, and become inactive and torpid. *S.* retreat into crevices for the winter, or into holes which they make in the earth, and which are roofed over with earth,

dead leaves, &c., agglutinated by secreted mucus.—*S.* are hermaphrodite: but mutual impregnation takes place. When they are about to copulate, they excite each other by pricking, or even piercing, with a sharp calcareous glass-like style, affixed to a peculiar muscular sac which serves for its protusion, and which is produced by recent secretion, not being found in them on dissection, except at the season of reproduction. The Great Vine Snail, or Edible Snail (*Helix pomatia*) (Fig. 2389), a European species, was considered by the ancient Romans one of their table luxuries. In some countries, as Switzerland and parts of France, they still form a considerable article of commerce. They are fed by thousands in places called *escargatoires*, which are made on purpose for them. They are used, boiled in milk, for diseases of the lungs, and are sent to this country as a delicacy. (Bot.) See MEDICINE.

Fig. 2389.—EDIBLE SNAIL,
(*Helix pomatia*.)

—A drone; a slow-moving person.—A metallic spiral, forming part of the striking works of a time-piece.

Snail'-like, *a.* Resembling a snail.

Snail-paced, (*snäl'päst*), *a.* Moving slow, after the manner of a snail.

Snake, *n.* [*A. S. snaca*, a snake, from *snican*, to creep.] (*Zoöl.*) Same as SERPENT, *q. v.*

—*v. a.* To drag or draw, as a snake from a hole; — with *out*. (*Amer.*)

(*Naut.*) To worm.

Snake'-bird, *n.* (*Zoöl.*) See PLOTIDE.

Snake'-fence, *n.* In the U. States, a common log-fence erected in a zigzag line.

Snake'-head, *n.* (*Bot.*) *Cheloma glabra*, the only American species of the genus *Cheloma*, order *Scrophulariaceæ*. It is a plant of brooks and wet places, with flowers shaped much like the head of a snake, the mouth opened and tongue extended. Stem mostly simple, 2 feet high, erect; flowers large, contracted at the mouth, with short, gaping lips; filaments hairy; style long, erect, bending downward.

(*Railroads.*) One end of one of the strap-rails upon which the wheels of cars run, sometimes used in the construction of railroads.

Snake-moss, *n.* (*Bot.*) Club-moss. See LYCOPODIUM.

Snake'-nut, *n.* (*Bot.*) See OPHIOCARPON.

Snake'-root, *n.* (*Bot.*) See ARISTOLOCHIA.

Snake'-weed, *n.* (*Bot.*) The great Bistort, *Polygonum bistorta*. The root is twice bent on itself; hence the name.

Snake'-wood, *n.* A beautiful fancy wood obtained from *Brasium guianensis*. Owing to the peculiar markings upon it, it is sometimes called *Letter-wood*.

Snak'ish, *a.* Having the qualities of a snake; snaky.

Snaky, *a.* Pertaining to, or resembling, a snake; serpentine.—Having, or abounding in, snakes; as, a *snaky* swamp.—Covered or adorned with serpents; as, a *snaky* wand.—Sly; cunning; insinuating; deceitful; as, *snaky* wiles.

Snap, *v. a.* (*imp.* and *pp.* SNAPPED,) (*snäpt*.) [*Ger. schnappen*; *Du. snappen*.] To break at once or suddenly, as with the teeth; to break short, as any brittle substance; as, to *snap* a pipe-stump.—To strike with a sharp sound; as, to *snap* one's fingers together.—To catch at; to bite or seize suddenly, as with the teeth; as, the dog *snapped* at a bone.—To break upon suddenly, with sharp, angry words; as, you need not *snap* at me.—To crack; as, to *snap* a whip.

To *snap off*, to break suddenly; to bite off suddenly.—To *snap one up*, to *snap one up short*, to interrupt with sharp, acrimonious words; to cut one short in one's speech; as, his wife *snapped him up short*.

—*v. n.* To break short; to part into two pieces suddenly; as, a needle *snaps*.—To attempt to seize suddenly; to make an attempt to bite; as, a terrier *snaps* at one's legs, a fish *snaps* at the bait, an office-seeker *snaps* at a place.—To utter acrimonious language; as, she *snaps* at him whenever she has the chance.

—*n.* An attempt to seize or bite; a quick, eager bite; as, the alligator took his leg off at a *snap*.—A crack of a whip, or a like sound.—A sudden breaking or sundering of any substance.—A greedy fellow; as, a cunning *snap*.—A small catch or fastening; as, the *snap* of a bracelet.

—*pl.* A crisp kind of gingerbread nut.—In the U. States, a sudden and severe interval; as, a *snap* of cold weather; —equivalent to the English word *spell*; as, a *spell* of frost.

Snap'-dragon, *n.* (*Bot.*) See ANTIRRHINUM.

—A Christmas pastime, in which raisins or sweetmeats are snatched from a bowl of flaming brandy, and then eaten; —hence, the article eaten at snap-dragon.

Snap'-lock, *n.* A lock closing with a snap.

Snapper, *n.* The person who, or thing which, snaps.

Snapping-turtle, *n.* (*Zoöl.*) The common name of the *Chelydroidæ*, a family of reptiles, comprising turtles which have the body high in front, low behind, head large, neck large and long, both jaws strongly hooked, the tail long and powerful, and the sternum small. They are aquatic, but are very frequently found upon the land near the water. They are exceedingly powerful and voracious, devouring smaller reptiles, fishes, young ducks, and other animals. When molested, they take the defensive, raise themselves upon their legs and tail, open wide the mouth, and forcibly throwing the body forward, snap the jaws upon the assailant with fearful power. They are fully a match for anything which they are likely to meet with except man.

The eggs are numerous and spherical. Three genera are known, each with a single species, and two of these are American, the most remarkable of which is *Chelydra serpentina*, Fig. 2242.

Snap'pish, Snap'py, *a.* Apt to snap; eager to seize or bite; as, a *snappish* dog.—Sharp in reply; peevish; apt to speak acrimoniously or tartly; as, a *snappish* old bachelor.

Snap'pishly, *adv.* Peevishly; sharply; acrimoniously; tartly.

Snap'pishness, *n.* Quality of being snappish; peevishness; tartness.

Snares, (*snair*), *n.* [*Du. snaar*, a string.] A string or cord; a noose; —particularly, a string or line with a noose for catching animals, especially birds, by the leg; a trap; a wire; —hence, by analogy, that by which one is inveigled or entangled and brought into trouble; as, woman is the greatest *snares* man has to fear.—The gut drawn across the lower head of a drum.

Snares-drum, (*Mus.*) The smaller, common military drum, in distinction from the *bass-drum*.

—*v. a.* [*Swed. snærja*.] To insnare; to catch with a snare; to inveigle; to entangle; to lure or bring into unforeseen and sudden difficulty, evil, or danger.

Snar'er, *n.* One who sets or lays snares, or entangles.

Snarl, *v. n.* [*Ger. schnarren*, to grumble.] To utter a sound like that of an angry dog; to growl, as a snarly dog; as, a *snarling* wolf.—To speak peevishly or roughly; to talk in rude, sharp, murmuring terms.

"Kissing to-day, to-morrow *snarling*."—*Prior*.

—To form, as hollow vases out of sheet-metal, by the percussion of a snarling-iron when struck by a mallet.

—*v. a.* [*From snare*.] To involve; to entangle; to complicate; as, to *snarl* a skein of thread.

—*n.* A peevish contention or altercation. (*Prov. Eng., colloq. U. S.*)

Snarler, *n.* One who snarls; a snarly, growling animal; a captious, snappish, quarrelsome fellow.—One who uses a snarling-iron.

Snarling-iron, (*-i-urn*), *n.* A long-beaked tool used in the process of snarling.

Snatch, *v. a.* [*Intensive of catch*; *A. S. gelaecan*.] To seize hastily, abruptly, or without permission or ceremony; as, to *snatch* a kiss.—To seize and transport away.

"O nature! . . . *snatch* me to heaven."—*Thomson*.

—*v. n.* To catch at; to attempt to seize suddenly; as, he *snatches* the first thing to his hand.

—*n.* A sudden catch or seizing.—A catching at, or attempt to seize suddenly.—A short spell or fit of vigorous action; a broken or interrupted action.—A short fit or turn; as, a *snatch* at reading.—A small portion or fragment; a hasty repast; a snack. See SNACK.—A quip; a quibble; a shuffling or evasive answer.

Snatch'-block, *n.* (*Naut.*) A kind of block used in ships, having an opening on one side to receive the bight of a rope.

Snatcher, *n.* One who snatches or takes away suddenly; as, a body-snatcher.

Snath, Sneath, Sneath, *n.* [*A. S. snæd*.] The handle of a scythe.

Sneak, (*snēk*), *v. a.* [*A. S. snican*.] To creep, slip, or steal away privately; to withdraw meanly, as if afraid or ashamed to be seen; as, the would-be thief *sneaked* off, he *sneaked* away from the company.—To act or behave with meanness or despicable servility; to couch; to truckle; to lick-spittle; to play the toady; as, a *sneaking* fellow.

—*n.* A mean, despicable, shuffling, sneaking fellow; a shirk.

Sneak'iness, *n.* Same as SNEAKINGNESS, *q. v.*

Sneaking, *p. a.* Characterized by absence of openness, manly pluck, or courage; mean; servile; dastardly; despicable; contemptibly cowardly; as, a *sneaking* sycophant, a *sneaking* tattler.—Covetous; niggardly; close-fisted; meanly parsimonious.

Sneak'ingly, *adv.* In a sneaking, underhand manner; meanly; without openness or courage.

Sneak'ingness, Sneak'iness, *n.* Quality of being sneaking; meanness; absence of manly spirit or courage; niggardliness.

Sneeds'ville, in *Tennessee*, a post-village, cap. of Hancock co., 275 m. N.E. of Nashville.

Sneek, or Snits, a town of the Netherlands, prov. of Friesland, 13 m. S.S.W. of Leeuwarden; *pop.* 8,000.

Sneer, *v. n.* [*Allied to snore*, and perhaps to *Lat. nares*, the nostrils.] To manifest contempt or scorn by turning up the nose, or by a supercilious cast of countenance; as, a *sneering* look.—To insinuate contempt or disdain by covert expression; to scoff; to gibe; to jeer; as, a *sneering* manner, a *sneering* remark.—To exhibit awkward mirth; to snigger.

—*v. a.* To niter with grimace or ludicrous contortions of the face.—To express contempt of, as by turning up the nose at; to deride; to flout; to jeer at; as, he was *sneered* at as a fool.

—*n.* A look of contempt, or a turning up of the nose to manifest contempt or derisive scorn; a look of disdain or contemptuous ridicule; as, a solemn *sneer*. (*Byron.*)—An expression of ludicrous scorn.

"Neither wisdom nor majesty could secure them from a *sneer*."—*Watts*.

Sneer'ing, *n.* One who sneers; a derider; a scoffer.

Sneer'ingly, *adv.* In a sneering manner; with a look of contempt or scorn.

Sneeze, *v. a.* [*A. S. nīsan*, from *næse*, the nose.] To emit or expel air, chiefly through the nose, audibly and violently, by a kind of involuntary spasmodic force, occasioned by irritation of the inner nasal membrane.

Not to be *sneezed* at, not to be treated lightly or with indifference; not to be despised or rejected; as, a proffer not to be *sneezed* at. (*Colloq.*)

Sneeze, *n.* A sudden and violent ejection or expulsion of air, chiefly through the nose, with an audible sound.

Sneeze'-weed, Speeze'-wort, *n.* (*Bot.*) See HELENIUM.

Sneez'ing, *n.* (*Physiol.*) The act of sneezing. It is preceded by a deep inspiration that fills the lungs; the air-passages are then closed at the lances, a sudden and violent contraction of the muscles of expiration takes place, and the passages by the mouth and the nasal canal are suddenly opened simultaneously, or the nasal canal alone. It is always occasioned by some irritation affecting the inner membrane of the nose, or, at least, it is always felt there, though it may exist in some other part, and may be produced by very different causes. The irritation must possess a certain degree of acuteness; for every one must have felt that when this is not the case, the disposition to sneeze suddenly passes off, though the act had been desired, and had seemed on the point of being accomplished. In several respects it resembles coughing. Various superstitious notions and customs have been associated with the act of sneezing. The custom of blessing people when they sneeze is mentioned by various ancient authors, and is so ancient that Aristotle professes ignorance of the origin of it. Among the Greeks, it was generally regarded as a good omen. Sneezing has been known to cause death; and it is reported that in the time of Gregory the Great an epidemic distemper prevailed in Italy, which carried off by sneezing all who were seized by it. It is, however, rarely dangerous, and is frequently regarded as a favorable symptom.

Snell, *n.* A short line of gut, horse-hair, &c., which connects a fish-hook to a longer line.

Snel'ing, in *California*, a post-village, former cap. of Merced co., 35 m. S. of Sonora.

Snet, *n.* Among hunters, the fat of a deer.

Sniatin, (*sné'a-tin*), a town of Austria, in Galicia, on the Pruth, 24 m. S.W. of Kolomea; *pop.* 7,500.

Snib, *v. a.* Same as SNUB, *q. v.*

Snibar, or **SNIBAR**, in *Missouri*, a post-village and township of La Fayette county, 20 miles S.S.W. of Lexington.

Snick, *n.* See SNEEK.

Snick'er, *v. n.* and *a.* Same as SNIGGER, *q. v.*

Snick'ersville, in *Virginia*, a post-village of Loudoun co., 165 m. N.W. of Richmond.

Snider Rifle, *n.* (*Arm.*) The breech-loading rifle that was substituted in 1866 in the British army for the muzzle-loading Enfield rifle, and so called from the name of its American inventor, Mr. Jacob Snider, who died in 1866. The *S. R.* was the first breech-loading rifle used in the British army, its adoption being temporary only, in order to utilize the many muzzle-loaders previously in use. The method of conversion was as follows: About two inches of the Enfield barrel were cut away at the breech, and a solid breech stopper, A (Fig. 2390), working sideways on a hinge, was placed in the opening thus made. Through this stopper passed a piston, one end of which, B, when the breech was closed, received the blow from the hammer, while the other communicated it to the center of the cartridge,

Fig. 2390.—SNIDER-CONVERTED ENFIELD RIFLE.
(1, open; 2, closed.)

thus firing the latter. There was an arrangement for withdrawing the old cartridge-case after each discharge, by means of sliding back the stopper on the bar on which it hinged, when a mere tilting action of the hand threw out the old case, and the new one could be inserted, which was ignited by a blow on the center, like the cartridge of the Prussian needle-gun. With this cartridge there was no escape of gas, and the accuracy of the arm was about 33 per cent. greater than that of the muzzle-loading Enfield rifle. By this conversion the military authorities prepared themselves for any possible emergency, while steps were immediately taken to obtain a new breech-loader. The proposals made brought out a number of inventions, of which that known as the Martini-Henry rifle was adopted in 1869, it combining the Martini breech action with the Henry barrel. This has since given way to a form of the magazine rifle.

Snider's, in *Kentucky*, a village of Washington co., 25 m. E.S.E. of Independence.

Sniff, *v. n.* [*Du. snuiven*; *Ger. schnüffeln*. See SNUFF.] To draw air audibly up the nose; to sniff.

—*v. a.* To draw in with the breath through the nose; as, to *sniff* the sea-breeze.—To perceive as if by smelling; to sniff; to scent; as, to *sniff* an intrigue.

—*n.* That which is taken by sniffing; as, a *sniff* of perfume; also, perception by sniffing; as, a *sniff* of danger.

sniffle, *v. n.* Same as SNUFFLE, *q. v.*

Sniff, *v. n.* [From *sniff*.] To sniff; to snuff; to smell; as, a dog *sniffing* another dog.

Sniffling-valve, *n.* (*Mach.*) A small valve opening from the cylinder or condenser of a steam-engine into the atmosphere, to allow the escape of air during the downward stroke of the piston;—so termed from the sniffling sound made by its action.

Snig, **Snigg**, *n.* [Allied to *snake*.] (*Zoöl.*) A kind of eel. See ANGUILLA.

Snigger, **Snicker**, *v. a.* To laugh in a half-suppressed manner; to laugh in a silly, semi-idiotic manner. —*n.* A half-suppressed, broken laugh; a vacant, silly laugh.

Sniggle, *v. a.* To angle for eels by thrusting the bait into their holes.—To snigger.

Snip, *v. a.* (*imp.* and *pp.* SNIPPED) (*snipt*.) [Du. *snippen*, to cut in small pieces; Ger. *schnippen*, to cut in bits.] To nip; to cut into small pieces; to clip; to cut off the nip or neb, or to cut off at once with shears or scissors; as, to *snip* dead leaves from a plant.—To pilfer; to take bit by bit.

—*n.* A single cut with shears or scissors; a clip; as, to make a *snip* in cloth.—A bit cut off; a small shred; as, a *snip* of plaster.—A share or snack; an equal portion. (Vulgar.)—A cant term for a tailor; as, he stole the *snip's* shears.

Snipe, *n.* [A. S. *snite*.] (*Zoöl.*) The common name of the birds composing the family *Scolopacidae*. There are many genera, of which the genus *Gallinago* may be taken as the type. The Common Snipe of Europe (*G. media*), is about 17 inches in entire length, the bill almost 3 inches.

The general color of the upper parts is a blackish-brown, finely mixed with pale-brown and a rich buff-color; three pale-brown streaks along the head; the neck and breast pale-rust color mottled with black; the belly white. The tail consists of 14 feathers. The *S.*, when flushed, changes its course several times in a zig-zag manner in the air, and then darts off very swiftly, so that young sportsmen find it a very difficult bird to shoot. The *S.* makes a very inartificial nest of a little dry herbage, in a depression of the ground, or sometimes in a tuft of grass or rushes. The eggs are four in number, pale-yellowish or greenish-white, the larger end spotted with brown. This species of *S.* is plentiful in all the moory and marshy places throughout Europe, also in some parts of Asia, and it is found in the north of Africa. The *S.* is capable of being tamed, and becomes very familiar, but is difficult to keep, from the prodigious quantity of worms and other such food which it requires.—The Common American *S.* (*G. Wilsoni*) is about equal in size to the Common *S.* of Europe, and much resembles it also in plumage. The tail has 16 feathers. This species is abundant in summer in the northern parts of the U. S. and in Canada, in the more southern States in winter. It is in much request for the table, and is often caught in snares.—The *S.* is a very fat bird, but its fat does not cloy, and very rarely disagrees even with the weakest stomachs. It is much esteemed as a delicious and well-flavored dish.

Snipe-bill, *n.* An American localism for a bolt which fastens the body of a cart to the axle.

Snipe-fish, *n.* (*Zoöl.*) See CENTRISCUS.

Snipper, *n.* One who snips or clips.

Snipper-snapper, *n.* Same as WHIPPER-SNAPPER, *q. v.*

Snip-snap, *n.* [A reduplication of *snap*.] A tart dialogue with quick rejoinders; as, "*snip-snap* short." Pope.

—*a.* Quick; short; smart.

Snivel, *n.* [A. S. *snafel*; dimin. of *sniff*.] Snot; mucus running from the nose.

—*v. n.* (*imp.* and *pp.* SNIVELLED,) (*sniv'ld.*) To run at the nose; to discharge mucus through the nostrils.—To cry or whine as children; as, a *snivelling* ustril.—

Sniveller, *n.* One who cries with snivelling.—One who manifests maudlin weakness by weeping; a driveller.

Snivelling, *n.* A crying, as of children, with sniffling or whining.

Snob, *n.* [Prov. Eng *snob*, snot.] A vulgar person who affects a sort of spurious gentility, and apes the manners, dress, and habits of well-bred people;—also, a body; a vulgar hanger-on or lick-spittle; a low, pretentious puppy who tries to pass himself off as a gentleman; the counterpart of *Nob*, *q. v.*; as, that fellow is what he is—a pitiful, unmitigated *snob*.—In the great English universities, the students' term for a townsman, as opposed to a *gownsmen* or *collegian*.—A journeyman shoemaker.—A mechanic who works for lower wages during a strike, as distinguished from a *Nob*, *q. v.*

snobbery, *n.* Quality of being snobbish, or of making vulgar pretensions to gentility.

Snob/bish, *a.* Belonging to, resembling, or characteristic of a snob; as, *snobbish* vulgarity.

Snob/bishly, *a.* In a snobbish manner; with vulgar pretentiousness.

Snob/bishness, *n.* Quality of being snobbish; character, habits, or manners of a snob.

Snob/bism, *n.* Characteristic qualities of a snob; parvenuism; spurious or pretentious gentility; snob-bishness; shoddyism.

Snob/cracy, *n.* Snobs taken as a collective body; codfish aristocracy.

Snoho'mish, in Washington, a N.W. co., bordering on Admiralty Inlet; area, 1,720 sq. m. Rivers, Skikomish, Snohomish, and Steilaquamish. The Cascade Range traverses the E. border. Cap. Snohomish. Pop. (1897) 13,900.

Snood, *n.* A Scottishism for the fillet which binds the hair of a young unmarried woman.—A snell.

—*v. a.* To bind up the hair, as with a snood.

Snooded, *a.* Wearing a snood; as, *snooded* locks.

Snooze, *n.* (*Zoöl.*) Same as GAR-FISH (*q. v.*).

Snooze, *n.* [Scot. *snooze*, to sleep.] A nap; a short sleep; a siesta; as, I must take a *snooze*. (*Colloq.*)

—*v. n.* To doze; to nap; to drowse; to sleep; as, he *snoozes* away the afternoon. (*Colloq.*)

Snoqualmie River, in Washington, rises in King co., and flowing generally N. enters Puget Sound in Snohomish co.

Snore, *v. n.* [A. S. *snara*, snoring; Du. *snorken*; Ger. *schnarchen*; Icel. *snírla*.] To breathe through the nose with a rough, hoarse noise, as in sleep.

—*n.* Respiring with a rough, harsh noise in sleep.

Snor'er, *n.* One who snores.

Snort, *v. a.* [Another form of *snore*.] To expel the air with violence through the nostrils, so as to make a loud sharp noise.—To make a guffaw; to give a horse laugh. (*Colloq.*)

Snorter, *n.* One who, or that which, snorts.

Snorting, *n.* Act of forcing the air through the nose with noisy violence.

Snot, *n.* [A. S. *snote*; Du. and Dan. *snot*.] Mucus secreted in, or discharged from, the nose; snivel.

—*v. a.* To blow or clear from snivel, as the nose. (Vulgar.)

Snot-rag, *n.* A vulgarism for a pocket-handkerchief.

Snotter, *n.* (*Naut.*) A rope going over a yard-arm, used to bend a tripping-line to, in sending down top-gallant and royal yards, in vessels of war.

Snottily, *adv.* In a snotty manner.

Snottiness, *n.* State or quality of being snotty; hence, meanness.

Snotty, *a.* Foul with snot;—hence, mean; filthy.

Snout, *n.* [Du. *snuit*; L. Sax. and Sw. *snut*; W. *ysnid*, a snout.] The nose or muzzle; the long, projecting nose of certain beasts; as, a hog's *snout*.—The nose of man;—used by way of contempt.—The nozzle or end of a hollow pipe or tube.

—*v. a.* To furnish with a nozzle or point.

Snow, *n.* [A. S. *snaw*.] (*Meteorol.*) *S.* is water solidified in stellate crystals, variously modified, and floating in the atmosphere. These crystals arise from the congelation of the minute vesicles which constitute the clouds, when the temperature of the latter is below zero. They are more regular when formed in a calm atmosphere. Their form may be investigated by collecting them on a black surface, and viewing them through a strong lens. The regularity, and at the same time variety, of their forms are truly beautiful. Fig. 2392 shows some of the forms as seen through a microscope. These crystals are united together in such a manner as to reflect light to the eye in great abundance from all, thus producing a sensation of whiteness. The presence of air in *S.* renders it opaque, otherwise it would be transparent, like ice and other crystallized bodies. Regular crystals of *S.* are only found where the air is still and the temperature very cold; they do not, therefore, often occur in temperate regions. In the Polar regions, *S.* has been seen of red, orange, and salmon color. This phenomenon occurs both in the fixed and floating ice, and seems to result in some cases from vegetable, and in others from animal matter suspended in the water, and deposited upon the surrounding ice. In some cases snow storms have been known to present a luminous appearance, covering every object with a sheet of fire. In general, the electricity of *S.* is positive, and by chemical analysis it has been found that snow-water contains a greater proportion of oxygen than rain or river-water—a fact which accounts for its superior activity in causing iron to rust, &c. In the economy of nature, *S.* answers many valuable purposes. By its gradual melting in high regions, it serves to supply streams of running water, which a sudden increase in the form of rain would convert into

destructive torrents or standing pools. In many countries, *S.* tempers the burning heat of summer by cooling the winds which pass over it. On the other hand, in colder climates, *S.* serves as a defence against the severity of winter, where it protects plants against the frost, and serves as a shelter to animals, which bury themselves in it. The elevation at which mountains are covered with perpetual *S.* is called the *snow-line*, or plane of perpetual *S.* The *S.*-line on the northern side of the Himalayan Mountains is about 17,000 feet; on Chimborazo, 15,802 feet. The altitude of perpetual *S.* under the equator was fixed by Humboldt at 15,748 feet: towards the poles it is considerably lower. The *S.*-line of the Alps, under 46° north latitude, is only 8,860 feet, and that of the Pyrenees about 8,850 feet. At the North Cape, in Lat. 71°, it is only 2,240 feet. The position of the snow-line in all mountains, however, depends so much on variable causes, such as the form of the summits, the comparative altitude, and other physical features of the surrounding country, the particular exposure of the mountains, &c., that no general rule can be laid down for determining the altitude of perpetual snow.

(NOTE. *Snow* is frequently employed in the construction of compound terms, most of which are self-explaining; as, *snow-bound*, *snow-capped*, *snow-flake*, *snow-water*, *snow-wreath*, &c.)

Snow, *v. n.* [A. S. *sníwan*.] To fall in snow;—used chiefly in the impersonal sense; as, it *snows* to-day.

—*v. a.* To scatter like snow; as, "Till age *snow* white hairs on thee."—*Donne*.

Snow'-ball, *n.* A round mass of snow pressed or rolled together.

—*v. a.* To pelt with snow-balls.

—*v. n.* To hurl or fling snow-balls.

Snow'-ball, **Snow'-ball-tree**, *n.* (*Bot.*) See VIBURNUM.

Snow'-berry, *n.* (*Bot.*) See SYMPHORICARPUS.

Snow'-bird, *n.* (*Zoöl.*) The common name of the genus of birds *Fusco*, from *Fringillidae*, distinguished by their bill small and conical, the wings reaching the basal fourth of the exposed portion of the tail, and the tail slightly emarginate. The common *S.-B.*, or Black Snow-bird, *Fusco hyemalis*, of the U. States east of the Missouri, is 6¼ inches long; grayish or dark ashy-black, deepest before: the middle of the breast and belly, the under tail-coverts, and the first and second external tail-feathers white, and the third tail-feather white margined with black. These birds appear in flocks in winter, and are very tame. They are fond of grass-seeds and berries; the flesh is delicate and juicy, and is often sold in the New Orleans market.

Snow'-blindness, *n.* A kind of ophthalmia, caused by the reflection of light from the snow, which gives a partial blindness to the sight.

Snow'-broth, *n.* Snow and water mixed;—hence, very cold liquor.

Snow'-bunting, *n.* (*Zoöl.*) A bird of the genus *Plectrophanes* (*P. nivalis*), common in summer in Arctic America, and in winter in the U. States. It is distinguished from the True Buntings by the long and nearly straight claw of the hind-toe, in this resembling the

Fig. 2391.—WILSON'S SNIPLE,
(From Tenney's Zoölogy.)

Fig. 2392.

Fig. 2393.—SNOW-BUNTING.

larks. There is also an approach to larks in habits; there is a similar ease and celerity in running along the ground, and the song is very different from that of any of the True Buntings. The *S.-B.* is generally very fat, and is highly esteemed for the table.

Snowd, **Snow'ing**, *n.* A thin cord made of hemp, suspended to deep-sea fishing-lines, and having a fish-hook attached.

Snow'den, in Pennsylvania, a township of Alleghany co., 11 m. S. of Pittsburg.

Snow'don, a mountain-range in Caernarvonshire, N. Wales, stretches in a N.E. by N. direction from a point 5 m. N. of Criccieth, near the head of Cardigan Bay, to near Conway; but is broken up by valleys and river-courses into four mountain groups, whose chief peaks are Carnedd-Llewelyn, 3,460 ft.; Moel-Siabod, 2,878 ft.; and Moel-y-Wyddfa ("the Conspicuous Peak"), the highest mountain in S. Britain, 3,571 ft. above sea level.

Snow'-drift, *n.* A bank of snow accumulated by the wind.

Snow'-drop, *n.* (*Bot.*) See GALANTHUS.

Snow'-drop-tree, *n.* (*Bot.*) Same as HALEZIA, *q. v.*

Snow'-gnat, (*-nät*), *n.* The common name of the insects composing the gen. *Chione*, fam. *Tibulariæ*. They are very small, wingless, look like spiders, and are found in great numbers in the last of winter upon the snow.

Snow Hill, in Alabama, a post-village of Wilcox co., 55 m. S.W. of Montgomery.

Snow Hill, in Maryland, a post-town and port of entry, cap. of Worcester county, 100 m. S.E. of Annapolis.

Snow Hill, in North Carolina, a post-village, cap. of Greene co., 70 m. S.E. of Raleigh.

Snow Hill, in Ohio, a village of Clinton co., 74 m. S.S.W. of Columbus.

Snow Island, in the S. Atlantic Ocean, one of the S. Shetland group S.W. of Livingston Island, 25 m. long.

Snow-plough, (-plow), *n.* A machine operating like a plough for clearing away the snow from roads, railways, &c.

Snow-slip, *n.* A large body of snow which slips down the side of a mountain; an avalanche.

Snow-shoe, *n.* A light shoe or racket worn by persons travelling on snow, to prevent their feet from sinking therein.

Snow-shoe, in Pennsylvania, a post-village and township of Centre co., 17 m. N.W. of Bellefonte.

Snow-storm, *n.* A storm accompanied with falling snow.

Snow-white, *a.* White as snow; very white; as, a snow-white bull.

Snowy, *a.* White like snow; as, a snowy dove, a snowy breast. — Abounding or covered with snow; as, snowy plains. — White; pure; unstained; unblemished; as, a snowy reputation.

Snub, *n.* [See SNIP.] A cutting short; — hence, a check, reprimand, or rebuff; as, he met with a snub for his pains. — *v. a.* To nip; to clip or break the end of; as, waves snubbed by the winds. — To reprimand; to check; to stop, rebuke, or rebuff with a tart, sarcastic, or severe retort or remark; as, she snubbed him for his assurance. — To give the cold shoulder to; to cut; to ostracise; to treat with merited contempt, contumely, or neglect, as a snob, or an intrusive or pretentious person; to slight premeditatedly; as, to snub a forward or familiar fellow. To snub a rope or cable. (Naut.) To give it a sudden check while running out.

Snub-nose, *n.* A short, flat, stumpy nose.

Snub-post, *n.* (Naut.) A post on a quay or wharf, round which to wind a rope to check the motion of a vessel.

Snuff, *n.* [Ger. *schneiffeln*, to snuff, to smell; Du. *snuiven* to snuff; Swed. *snuflwa*.] The nose, or end, of the wick of a candle that is burned black or charred. — Pulverized tobacco, or other powder, taken, or prepared to be taken, into the nose. See TOBACCO.

Up to snuff, knowing; shrewd; astute; not readily imposed upon. (Colloquial.)

— *v. a.* To draw up or inhale through the nose; to draw in with the breath through the nose; as, to snuff the air. — To scent; to smell; to perceive by the nose. — To take snuff; as, he does not snuff.

— *v. n.* To inhale air with violence or with noise through the nose; to snort; as, a hound snuffs the scent. — To turn up the nose and inhale air, as an expression of contempt; — hence, to take umbrage or offence.

"Ye said, what a weariness is it, and ye have snuffed at it." *Mal. i. 13.*

Snuff-box, *n.* A small box for carrying snuff about the person.

Snuff-dipping, *n.* A practice common among the lower class of women in the Southern States, of collecting a quantity of snuff upon a sort of brush made by separating the fibres of one end of a small piece of wood, and rubbing the teeth and gums with it.

Snuffer, *n.* One who snuffs; a snuff-taker.

— *pl.* A table instrument for cropping the snuff of a candle.

Snuffingly, *adv.* With snuffing; in a snuffing manner.

Snuffle, (*snuiffl*), *v. n.* [From *snuff*; Du. *snuffelen*; L. Ger. *schneiffeln*.] To speak through the nose; to breathe hard through the nose, or through the nose when obstructed; as, "snuffling, broken-winded tones." *Hadibras*.

— *n.* A sort of sibilant sound made by the passage of air through the nostrils; as, to speak with a snuffle. — An affected nasal twang; as, the real Puritan snuffle; — hence, cant; sanctimonious intonation of the voice.

Snuffler, *n.* One who snuffles, or speaks with a nasal twang.

Snuffles, *n. pl.* Obstruction of the nasal air-passages by mucus.

Snuffletown, in New Jersey, a village of Sussex co., 15 m. N.E. of Newton.

Snuffy, *a.* Soiled with snuff; as, a snuffy handkerchief.

— Addicted to the use of snuff; as, a snuffy old lady.

— A Scottishism for sulky; irate; annoyed.

Snug, **Snuggle**, *v. n.* To lie close for comfort or warmth; to move or wriggle about to get a close, easy position; to be sheltered; as, "the loving couple lay snuggling together." — *L'Estrange*.

— *a.* (comp. *snugger*; superl. *snuggest*.) [A. S. *snican*; Dan. *sniger*.] Cozy; closely cuddled or pressed; as, a child snug in a cot. — Concealed; sheltered; not exposed to notice; as, he lay snug in hiding. — Compact, cozy, convenient, and comfortable; as, a snug property, a snug office under government.

Snug'gery, *n.* A snug, cozy, comfortable place; a tabagie; a sanctum.

Snugly, *adv.* In a snug manner; closely; safely; warmly; cozily; as, snugly tucked in bed.

Snugness, *n.* State or condition of being snug; coziness.

Snyder, in Pennsylvania, an E. central co., formerly the S. part of Union co., bounded E. by the Susquehanna river; area, about 325 sq. m. The surface is hilly, and the soil fertile. Iron ore and coal are found in great abundance. *Cap. Middlebury. Pop.* (1897) 18,320.

— A township of Blair co. — A township of Jefferson co.

Snyder'sville, in Pennsylvania, a post-village of Monroe co., 112 m. N.E. of Harrisburg.

Snydertown, in New Jersey, a village of Hunterdon county.

Snydertown, in Pennsylvania, a village of Columbia co. — A post-borough of Northumberland co., 8 m. E. of Sunbury.

Sny'ing, *n.* (Naut.) A circular plank placed edge-

wise, to work into a vessel's bow.

So, *interj.* Steady; stand still; — a word spoken to cows, as when being milked.

(Naut.) Hold hard! avast! stop! — a command to cease hauling upon anything, as a rope or stay, when it has reached the proper position.

— *adv.* [A. S. *swa*; Dan. *zoo*; Ger. and Icel. *so*; Dan. *sua*; Lat. *sic*; Gr. *hōs*.] In that or the self-same manner or degree; as expressed, implied in any way, or as supposed to be known.

"We think our fathers fools, so wise we're grown." — *Pope*.

— Thus; in like manner; in the way that; for like or with equal reason; — employed in a correlative sense, after *as*, to indicate comparison or resemblance; — occasionally, also, preceded by *inasmuch as*.

"According to the multifariousness of this immutability, so are the possibilities of being." — *Norris*.

— To such degree; in such manner; — employed correlatively, and preceding *as* or *that*; as, as I was so lucky as to meet with him, it matters not to me so that you are satisfied. — Exceedingly; very; in a superior degree; — that is, in such a degree as may be considered nearly inexpressible; as, he knows it so well, she does so admire herself. — In the same manner or degree; in this way; in this or that state or condition; under these circumstances; — with reflexive relevancy to something privily asserted, expressed, or implied; — employed, also, as a predicate, with the verb to be; as, do I deserve to be treated so? — For this cause or reason; therefore; on these terms; on this ground or account; — used in both an adverbial and a conjunctive sense.

"So may kind rains their vital moisture yield." — *Pope*.

— Be it so; it is well; thus be it; — conveying assent.

"If it be my desire, so; if it be not, so." — *Shaks.*

— Well; thus it is; the fact being so; such being the state; — employed expletively; as, so you are come at last!

— Is it the fact? do you really mean it? — with an elevation of tone; as, is that so? (Used colloquially.)

So forth, more of the same or a similar kind; in the like strain; as, we shall be glad to see you, and so forth.

— *So much as* (frequently, as *much as*), that much; whatever may be the amount, degree, or quality; as, so much as the measure will contain. — *So, so*, well, well.

— Passably; middling; tolerably well; as, our friend feels only so, so, to-day. — *So that*, in order that; with the effect that; as, come early, so that we may go together. — *So then*, therefore; thus then it is; the result is; as, so then he made a clean breast of it.

— *conj.* Provided that; on condition that; in case that; in like manner; answering to *as*, and noting comparison or resemblance; therefore; for this reason; — noting a wish, desire, or petition.

Soak, (*sōk*), *v. a.* [A. S. *socian*, to soak, to macerate.] To cause to suck in or imbibe wet or moisture; to cause or suffer to lie in a fluid till the substance has imbibed what it can contain; to subject to maceration in water or other fluid; to steep; as, to soak bread. — To wet thoroughly; to drench; to saturate; as, his clothes were soaked with rain. — To penetrate by wetting thoroughly; — often before *through*; as, the blood soaked its way through the bandage. — To draw in by the pores, as the skin.

— *v. n.* To be soaked; to lie steeped in water or other fluid; as, put this cloth to soak. — To penetrate into pores or interstices; as, the rain soaks through the ceiling. — To drench; to swell; to drink intemperately or inordinately; as, he soaks liquor like a sponge. (Vulg.)

Soak'age, *n.* Act of soaking, or state of being soaked.

Soak'er, *n.* One who soaks, or macerates in a liquid. — A hard drinker. (Vulgar.)

Soak'ing, *n.* That wets or drenches thoroughly; as, a soaking rain.

Soak'y, *a.* Moist on the surface; steeped in water; soggy.

Soap, (*sope*), *n.* [A. S. *sape*; Lat. *sapo*; Fr. *savon*.] (Chem.) Strictly speaking, a *S.* may be defined as a salt consisting of a fatty acid in combination with a metallic base. In common parlance, however, it is applied to the soluble salts formed by the union of the fatty acids with the alkalis. If oil and water be shaken together, mechanical union will take place; but on allowing the mixture to rest, the oil will gradually separate and float on the surface of the water. If a small quantity of caustic soda or potash be added to the mixture, and it be then agitated, union will take place between the three bodies, a milky fluid being formed. If a sufficient quantity of alkali has been added, and the solution be boiled, it gradually becomes clear, giving rise to a soapy fluid, which froths strongly on agitation, presenting all the properties of a solution of *S.* If to a portion of this clear liquid a strong solution of common salt is added, a peculiar curdling is produced. The liquid separates into a clear fluid, containing glycerine, while the curdy portion rises to the surface. This substance is the fatty acid of the oil, in combination with the alkali used and a certain proportion of water, and if pressed and dried, exhibits the properties of ordinary *S.* Ordinary *S.* is freely soluble in both hot and cold water; but if any of the earths, such as lime, be present, an insoluble compound is immediately formed; or, in common language, the *S.* curdles, from the water being hard. Ordinary *S.* are of two kinds, — *soft* and *hard*. Soft *S.* is a combination of some fatty or oily substance with potash, and contains an excess of alkali; hence it is used for cleansing purposes where very highly detergent powers are required. The hard *S.* are combinations of the fatty acids with soda; the principal varieties being *yellow S.*, made from tallow and palm-oil, and containing a certain proportion of resin to give it lathering properties; *curd S.*, which is made from tallow, only a small portion of olive-oil or lard being added, to give it softness; *mottled S.*, which is prepared

from tallow, palm-oil, and kitchen-stuff, and contains a portion of insoluble iron *S.*, giving it a marbled appearance. *Marseille* and *Carlisle S.* are made of olive-oil and soda, a small quantity of sulphate of iron and sulphuretted lye being added to them while in a pasty condition. The object of marbling *S.* with an insoluble matter is to show that they contain but little moisture, since, if too large a proportion of water were present, the coloring matter would sink to the bottom and remain there, instead of being diffused through the mass. The manufacture of the different *S.* is very similar, differing only in minor details. An alkaline lye is first prepared in large iron boilers, called *coppers*, heated by steam, by boiling in them a mixture of soda, ash, lime, and water. After boiling for some time, the steam is turned off, and the lye is allowed to cool, carbonate of lime being deposited. The clear lye is then drawn off, weakened by the addition of water, and added to the tallow, fat, or oil, in the proportion of 150 gallons of weak lye to one ton of fat. When ebullition takes place, stronger lyes are added by degrees until the *S.* feels no longer greasy. Common salt is then added, which separates the glycerine and other impurities derived from the grease. These are drawn off and thrown away, stronger lyes being added, and the boiling continued until the whole of the soap separates. It is then transferred to frames to cool, a small portion of the lye contained in the *S.* gradually separating and accumulating in the lower part of the frame. This portion is poured off and added to the next charge. When perfectly hard, which occurs in three or four days, the *S.* is cut up into bars with wires. *Curd S.* is generally remelted, and forcibly stirred or *crushed* to break up the grain. It is the purest commercial *S.* *Fancy S.* are made from pure curd *S.*, scented with various perfumes, and colored with a variety of tints to suit the prevailing fashion. *Honey S.* contains no honey. It is made of good yellow *S.*, scented with oil of citronella. *Real old Brown Windsor S.* is curd *S.* which has turned brown by age. It is now, however, made artificially, by mixing caramel with white *S.* *Transparent S.* is made by dissolving white *S.* in spirit and evaporating. *Glycerine S.* is prepared by heating the fat with alkali and a little water to about 400° F. for two or three hours, and running the mass at once into moulds. It is, of course, a mixture of soap and glycerine. Besides being used for ordinary domestic purposes, *S.* is employed in various manufactures as a detergent for cleansing silk, wool, and the different fabrics made from them.

Soap, *v. a.* (*imp.* and *pp.* SOAPED,) (*supt.*) [A. S. *sapian*; Ger. *seifen*.] To rub or wash over with soap. — To ply with flattery or adulatory language; as, to soap a patron.

Soap-berry-tree, *n.* (Bot.) See SAPINDACEÆ.

Soap-boiler, *n.* A manufacturer of soap; a soap-maker.

Soap-boiling, *n.* The business of making soap.

Soap-bubble, *n.* A globular film of soap-suds formed by inflation.

Soap-cerate, (-sē'rat), *n.* (Med.) A compound of lead, soap, white wax, and olive oil; — used as a sedative in external inflammation.

Soap Creek, in Iowa, flows into the Des Moines River from Wapello co. — A twp. of Davis co.

Soap-stone, or **Steatite**, *n.* (Min.) A hydrated silicate of magnesia, with a smooth greasy feel like that of soap, and so soft as to yield to the nail. It is a massive variety of talc, which, when pure and compact, is much used as a refractory material for lining furnaces, being infusible in any ordinary furnace heat. It is easily turned in the lathe, or cut with knives and saws, and is made into culinary vessels. When very strongly heated, *S.* loses the small portion of combined water which it contains, and becomes harder and susceptible of polish. In this state it is made into jets for gas-burners, which have the advantage of not being liable to rust or corrosion. When reduced to powder, it is used like plumbago as a lubricator and to diminish friction, as well as to give a surface to some kinds of paper-hangings.

Soap-suds, *n. pl.* Water holding a solution of soap; suds.

Soap-wort, (-wurt), *n.* See SAPONARIA.

Soapy, *a.* Resembling, or partaking of the properties of, soap; — hence, soft and smooth; as, a soapy lather. — Smeared or covered with soap. — Grossly adulatory; as, a soapy compliment, a soapy sycophant.

Soar, *v. n.* [Fr. *essor*, soaring, *pp.*] To rise into the air; to fly aloft; to mount upon the wing, or as on wings; as, a soaring eagle. — To tower in thought or imagination; to reach the sublime, as a poet or an orator; to rise high in ambition or heroism; as, a soaring genius. — *n.* A towering flight; as, the soar of the condor.

Soar-falcon, *n.* A falcon of the first year.

So're, **Soarement'e**, *a.* [It., sweet, sweetly.] (Mus.) A term denoting to the player that the music to which it is prefixed is to be executed with sweetness.

Soar'ing, *n.* Act of mounting on the wing, or of towering in thought or mind.

Sob, *v. n.* (*imp.* and *pp.* SOBBED,) (*sōbd.*) To sigh with a sudden heaving of the breast or a convulsive motion; to sigh with deep sorrow, or with tears.

— *n.* A convulsive sigh or catching of the breath in sorrow; a spasmodic act of respiration obstructed by mental affliction; as, she gave vent to her sobs. — Hence, any mournful and subdued cry or sound; as, the sob of a rising gale.

Sobbing, *n.* The act, or the sound, of one who sobs.

Sober, *a.* (comp. *soberer*; superl. *soberest*.) [Fr. *sobrié*; It. *sobrio*; Lat. *sobrius*.] Free from drunkenness; practising temperance or moderation in the use of alcoholic liquors; habitually temperate in the use of strong

drinks; as, a *sober* man, a *sober* habit of life. — Not intoxicated or overpowered by spirituous liquors; as, a man may be physically drunk while intellectually *sober*. — Not mad or insane; not wild, visionary, or heated with chimerical or crotchety notions; having the regular exercise of cool, dispassionate reason; self-controlled; self-possessed; self-controlled. — Calm; cool; collected; regular; not springing from, or attended with, impulsiveness or passion; as, *sober* sense is his distinguishing quality. — Grave; circumspect; sedate; staid; serious; sombre; solemn; as, a *sober* costume, "The *sober* follies of the wise and great." — *Pope*.

So'ber, *v. a.* To make sober; to free from intoxication; as, he drank largely of hock and seltzer to *sober* himself. — To become sober; — frequently preceding *down*; as, matrimony *sobers* a man *down*.

So'berize, *v. a. and n.* To sober; to make or become sober. (R.)

So'berly, *a.* In a sober manner; without intemperance; without enthusiasm; gravity; seriousness; freedom from heat and passion; calmness; coolness.

So'ber-mind'ed, *a.* Having a disposition or temper naturally or habitually sober, calm, temperate, and dispassionate.

So'ber-mind'edness, *n.* State of being sober-minded.

So'berness, *n.* State or quality of being sober; freedom from intoxication; temperance; sobriety; seriousness; abstinence from heat or passion; calmness; coolness.

So'b'eski, *JOHN*. See *JOHN III.* (of Poland.)

Sob'oles, *n.* [Lat., a shoot.] (*Bot.*) A shoot which runs under the surface of the ground, sending out new plants at certain distances; also, a sucker, as of a tree or plant.

Sobolif'erous, *a.* [Lat. *soboles*, a shoot, and *ferre*, to bear.] (*Bot.*) Yielding shoots from under or near the surface of the ground.

Sobralia, (*so-bral'le-ä*), *n.* (*Bot.*) A genus of plants, order *Orchidaceæ*. One species is said to yield in Panama a kind of vanilla, which is called *chica*.

Sobri'ety, *n.* [Fr. *sobriété*, from Lat. *sobrietas*.] State or quality of being habitually sober, or temperate in the use of alcoholic liquors; as, few men are patterns of *sobriety*. — Habitual freedom or abstinence from enthusiasm, inordinate passion, or over-heated imagination; calmness; coolness; steadiness; self-possession; as, the *sobriety* of age. — Seriousness; sedateness; gravity, unaccompanied with sadness, melancholy, or religious hypochondria; as, *sobriety* of language or demeanor.

Sobriquet, (often written *SOUBRIQUET*), (*sô-bre-kä'*), *n.* [Fr.] A pseudonym; a nom-de-plume; a fanciful appellation; an assumed name; a nickname.

Soc, *n.* (*Eng. Law.*) In England, an exclusive privilege formerly claimed by millers of grinding all the corn used within the manor or township in which the mill stands.

So-called, *a.* So named, termed, or styled; called by such a name.

Sociability, (*sô'sha-*), *n.* [Fr. *sociabilité*.] Quality of being sociable; disposition to associate and converse with others, or the practice of familiar social intercourse.

Sociable, (*sô'sha-bl*), *a.* [Fr.; Lat. *sociabilis*.] That may be conjoined or united in one body or company; as, *sociable* parts. — Social; ready or disposed to unite in a general interest; ready and inclined to join in company or society, or frequent meeting for conversational intercourse: as, a *sociable* nature. — Hence, companionable; friendly; familiar; inclined to converse when in company; conversible; free, or disposed to freedom, in social intercourse; talking pleasantly or familiarly; not taciturn, reserved, or self-absorbed; as, a *sociable* individual. — Affording opportunities for conversation and friendly intimacy; as, a *sociable* party.

— *n.* An at-home; a re-union; a social party assembled for music, conversation, &c.

Sociableness, (*sô'sha-*), *n.* Quality of being sociable; sociability.

Sociably, (*sô-sha-bl*), *a.* In a sociable manner; with free intercourse; conversibly; familiarly, as a companion.

Social, (*sô'shal*), *a.* [Fr.; Lat. *socialis*, from *socius*, a companion; Hind. *sakha*, a friend, companion.] Pertaining or having reference to society; relating to persons living in society, or to the public as an aggregate body; as, *social* interests, pleasures, duties, benefits, institutions, &c. — Ready or disposed to mix in converse or friendly intercourse; companionable; as, a *social* disposition. — Consisting in union or mutual converse; as, *social* intimacy, *social* communication.

(*Bot.*) Naturally growing in company.

Social Cir'cle, in Georgia, a post-village of Walton co., 120 m. W. of Augusta.

Socialism, *n.* (*Pol. Philosophy*) *Socialism* and *communism* are two modern words which, in point of meaning, are not separated by any accurate distinction, and are frequently used the one for the other. There is, however, a slight difference in common usage, which the following remarks may elucidate. 1. It is held by some theorists that the notion of *property* has no foundation either in right or expediency; that as, in point of fact, the possession of property was originally merely the usurpation of superior strength, so, in a really equitable state of society, this usurpation would altogether disappear; that, in Proudhon's epigrammatic phrase, *property is robbery*. This doctrine of the absolute community of goods is ordinarily designated as *communism*. 2. But between this extreme and that which regards the right of individual property and the use of it as not to be interfered with at all except in certain extreme cases recognized by ordinary legislation, there is a wide interval. There are many intermediate theories, according to which the use of property ought to be re-

stricted or interfered with, or property itself, when beyond a certain amount, divided, for the common good, or rather that of the majority. These theories commonly pass under the general name of *Socialism*, and in this sense not only the theories of philosophers, but many existing or proposed laws and usages, may be regarded as socialistic in their tendencies. Such are: agrarian laws, limiting the quantity of land to be held by an individual; laws fixing the maximum of rent, or the minimum of wages; laws interfering in other ways between the capitalist and the laborer (for shortening the duration of labor, and the like); the usages of trades' unions, &c. *S.* in this sense had a large part in the institutions, and still larger in the theories, of classical antiquity. In modern times, the first disciples of progress who openly denounced the right of property as the fundamental error of society were Babeuf and his followers, who attempted an insurrection against the Directory in 1797. In his paper, the *Tribun du Peuple*, Babeuf advocated the division of property, without endeavoring to establish any very definite substitute. Robert Owen, *q. v.* (B. 1771, d. 1858), stands in point of date next to Babeuf among the leading advocates of communistic socialism. He attempted to put his ideas in practice, but his community of *New Harmony*, founded in Indiana, proved a total failure. The Count of St. Simon, *q. v.*, though an older man than Owen, came forward much later as a leader having influence on mankind. His theory partook of the religious as well as the political aspect of Socialism. Property was to be in common, but the enjoyment of it by individuals was to be regulated by a governmental power embracing the highest intelligence and wisdom of the community. Charles Fourier, while advocating community of property, demanded a thorough disciplinary training of the human race in all the duties of life. Since the middle of the 19th century *S.* has taken a decided step forward, under the instigation of the teachings of the German thinkers, Robertus, Lassalle, and especially Karl Marx, the high priest of this new dispensation. The crude theories of the earlier writers were replaced by these men with a scientific exposition of the subject, and the few early socialists have been succeeded by a host sufficiently numerous to give them a powerful influence over modern political movements. Throughout all the countries of western Europe *S.* has become a power, and particularly so in Germany, where it has a strong parliamentary representation. It has made itself felt in various measures of old-age insurance, government railways and telegraphs, municipal control of franchises, &c. In the U. S. its influence is little less marked, the People's party, a new and growing political organization, being distinctly socialistic in its aims. Anarchism holds similar views as regards property, but is the reverse of *S.* in its proposed method of obtaining its end, advocating the overthrow of government, while *S.* advocates the assumption of all functions, industrial as well as political, by government.

Socialist (*sô'shal-ist*), *n.* An advocate of the politico-philosophical doctrines of Socialism.

Socialist'ic, *a.* Pertaining or relating to, or resembling, Socialism.

Socialize, (*sô'shal-*) *v. a.* To make social. — To subject, or govern by, the principles of socialism; as, to *socialize* society.

So'cially, *a.* In a social way or manner.

So'cialness, *n.* Quality of being social.

So'cial Science, *n.* The study of the various facts and principles which relate to the social improvement of the community. *S. S.* occupies a position intermediate between political economy and political philosophy. It does not discuss or expound the exact theories of the former, nor does it examine the problems of the latter; but it deals with the effect of existing social forces, and their result on the general well-being of the community. The progress of *S. S.* has resulted in the adoption of many important social reforms. Among these may be enumerated the general development of a sound theory of sanitary science, and the extensive use of precautions against ordinary, epidemic, and endemic disease; the reconstitution of hospital charities; the regulation of prisons and work-houses on sounder and truer principles than those which had hitherto been accepted; the establishment of reformatories and penitentiaries for youthful offenders and reclaimed prostitutes; the extension of education, particularly of middle class and industrial education; and many other important results. Great, however, as have been the effects of these investigations, it cannot be doubted that much remains to be done, and that many problems await their solution at the hands of such persons as have already effected much, and at those of their successors in these branches of practical philanthropy.

So'cial War. (*Rom. Hist.*) M. Livius Drusus proposed a law for investing the Italian allies with the privileges of Roman citizens; but it was strongly opposed by the senators, the knights, and the people, and Drusus was assassinated B. C. 91. The Marsi, who took the lead (whence the name *Marsian* or *Marsic*, also given to that war), the Peligni, the Samnites, the Lucani, and almost every nation in Italy, except the Latins, Tuscans, and Umbrians, revolted and established a republic in opposition to that of Rome. In the first campaign the Romans met with some severe losses. Nola was taken by the Samnites; the consul, P. Rutilius, and his lieutenant, Q. Cæpio, were defeated and slain, and many cities were captured. On the other hand, Sylla and Marius obtained a great victory over the Marsi, and L. Cæsar defeated the Samnites. In the second campaign, B. C. 90, the Romans defeated the Marsi, and induced them, together with the Vestini, Peligni, and Marrucini, to make a

separate peace. Sylla, the Roman general, destroyed the town of Stalio, defeated a large army near Nola, reduced the Hirpini to subjection, and defeated the Samnians. The Romans were induced, hearing that Mithridates VI., King of Pontus, intended to aid the allies, to adopt measures of conciliation, and one state after another submitted and received the gift of Roman citizenship. After the close of this campaign, the war dwindled away, until it was brought to a conclusion, B. C. 88, by the remainder of the Italian states receiving the concessions they required. During this war, called *S. W.*, 300,000 men were slain.

Society, (*sô-si'*), *n.* [Fr. *société*; Sp. *sociedad*; Lat. *societas*, from *socius*, a companion, a fellow, a comrade.] A number of persons united, either for a temporary or permanent purpose; any number of persons associated for a particular object, as for mutual entertainment, profit, or utility; a fraternity; a club, clique, or coterie; a company; a partnership; a union on equal terms; as, "Marriage is a human *society*." (*Milton*). — Fellowship; association; companionship; social relationship; as, I wish no better *society* than yours. — The union of a number of rational beings; particularly, any community or body of individuals who are united together by any common bond of affinity or intercourse; those who recognize each other as belonging to the same social status as themselves, and as such to be qualified for acquaintance, association, or friendship; specifically, the more cultivated and elevated portion of any community in its social aspects, interests, and influences; those who give and receive formal entertainments mutually; as, he is seldom seen in *society* (*i. e.*, good society), she is an ornament to *society*, he is partial to low *society*, &c. — Connection; implication; participation. (R.)

Literary, Scientific, and Artistic Societies. Associations formed for the promotion of literature or science are sometimes called *academies*; and under this or their own special names will be found notice of the chief European societies. In the U. States, associations corresponding to the English societies of the highest degree, or to the French and German academies, are still few in number. The most ancient and most celebrated are the *American Philosophical Society* (founded in Philadelphia in 1743), the *American Academy of Arts and Sciences* (founded in Boston, 1780), the *Connecticut Academy of Arts and Sciences* (founded in 1799), the *Academy of Natural Sciences* (founded in Philadelphia, 1818), the *Pennsylvania Academy of Fine Arts* (founded in 1807). Later examples include the *National Academy of Design* at New York, the *Medical Academy of New York*, the *American Genealogical Society* of Boston, the *American Antiquarian Society* of Worcester, the *Geographical and Statistical Society* and the *New York Historical Society* of New York, the *American Oriental Society* of New Haven, the *American Ethnological Society* of New York, and the *Boston Society of Natural History*. *Historical societies* have been organized in almost every State, and in many counties. The above-named are only a few of the societies which have now gained prominence in the U. S., and of which a far longer list might be presented, did it seem necessary. See plate of SOCIETY EMBLEMS and PAST OFFICERS' JEWELS.

Society Hill, in Alabama, a post-village of Macon co., 167 m. S.E. of Tuscaloosa.

Society Hill, in S. Carolina, a post-village of Darlington dist., 100 m. E.N.E. of Columbia.

Society Islands, a group of islands in the S. Pacific Ocean, extending between Lat. 16° and 18° S., and Lon. 145° and 155° W.; area, 1179 sq. m. The group is formed of two clusters of islands, about 70 m. apart, and, in former times, politically distinct; both are now under French rule. Exclusive of islets, the group is formed of 13 islands — Tahiti or Otahite, Maitea, Eimeo, Maiaoiti, Tetaraoa, Inaheine, Raiatea, Otaha, Borabora, Marua, Tuba, Lord Howe's Island, and Scilly Island. All the islands closely resemble each other in appearance. They are mountainous in the interior, with tracts of low-lying and extraordinarily fertile land occupying the shores all round from the base of the mountains to the sea. They are surrounded by coral reefs, are abundantly watered by streams, and enjoy a temperate and agreeable climate. Almost every tropical vegetable and fruit known is grown here. The inhabitants belong to the Malay race, are affable, ingenious, and hospitable, but volatile and sensual. Tahiti, the principal island, is said to have been visited as early as 1606. Captain Cook reached it in 1769, and discovered many of the other islands of the archipelago, to which he gave the name of *S. I.*, in honor of the Royal Society of London. A quarrel between the Protestant and Roman Catholic missionaries, who thought it better to enter upon ground already occupied by Protestants than to take up new ground for themselves, occasioned the interference of France in favor of the latter, and the island of Tahiti was taken possession of in the name of Louis Philippe, by a strong French force in 1844. All the possessions of the native ruler — who, however, still enjoys nominal authority — were afterwards placed under the protection of France, and in 1880 the *S. I.* were definitively annexed, and became a French colonial possession. Pop. 11,172.

Socinianism, *n.* (*Ecc. Hist.*) The tenets of the Socinians.

Socin'ians, *n. pl.* (*Ecc. Hist.*) A sect of Christians, named after their founder, Faustus Socinus, a native of Sienna, born in 1539, and died 1604. The Socinians maintain that the Father alone is true and properly God; that Jesus Christ was a mere man, who had not existence before he was conceived by the Virgin Mary, and that the Holy Ghost is no distinct person. They

own that the name of God is given in Scripture to Jesus Christ, but contend that it is only a deputed title, investing him, however, with an absolute sovereignty over all created beings, and rendering him an object of worship to men and angels. They deny the doctrines of satisfaction and imputed righteousness, and regard original sin and predestination as scholastic chimeras. They likewise maintain the sleep of the soul after death, and they say that it will be raised again with the body at the resurrection. In the present day, the term *Socinian* is commonly applied to such as hold the Unitarian doctrines, which are similar, but not exactly the same. See UNITARIANISM.

Sociology, *n.* [Lat. *socius*, and Gr. *logos*, discourse.] A word somewhat barbarously coined by the school of M. Comte (Positivism) to express the science which has to do with man in his social capacity, including politics, political economy, and similar subjects.

Sock, *n.* [A. S. *soce*; Lat. *soccus*, a light shoe.] A covering for the foot; especially, the shoe worn by an actor of the ancient comedy;—hence, comedy, as distinguished from tragedy, which latter art is typified by the *buskin*.—A short knit or woven stocking for the foot; as, a pair of *socks*.

—A warm, inner sole for a shoe; as, a felt *sock*.

—[Fr. *soc*; L. Lat. *soccus*.] A ploughshare.

Sockdolager, **Soedol'ager**, **Sockdol'oger**, (*-jer*), *n.* [Corrupted from *doxology*.] That which gives the finishing stroke to anything;—hence, that which is final and admits of no appeal, redress, or escape. (Colloq. U. S.)—A kind of fish-hook, having two hooks, self-acting by means of a spring, and which close upon a fish the moment it bites. (Am.)

Sock'et, *n.* [Dim. of *sock*.] Any hollow thing or place which receives and holds something else; as, the *sockets* of the eye-balls.—Especially, the hollow tube in which a candle is fixed in the candlestick; as, the light burned down to the *socket*.

Sock'et-bolt, (*nich*). A bolt that passes through a thimble that is fixed between the parts connected by the bolt.

Sock'et-chisel, (*-chiz'l*), *n.* A strong chisel used for mortising.

Sock'less, *a.* Without socks or shoes.

Socle, (*sō'kl*), *n.* [Fr., from Lat. *soccus*.] (*Arch.*) A square member whose breadth is greater than its height;—used instead of a pedestal for the reception of a column. It differs from a pedestal in being without base or cornice.—Also, a plain face or plinth at the lower part of a wall.

Soconusco, (*so-ko-noos'ko*), a town of Guatemala, cap. of the prov. of Soconusco, abt. 60 m. S.W. of Ciudad Real, in Mexico.

Socorro, an island of the Pacific Ocean, Lat. 18° 43' 14" N., Lon. 110° 54' 15" W., 24 m. long and 9 broad.

Socorro, in *New Mexico*, a S.W. co., adjoining Arizona; area, 15,476 sq. m. River, Rio Grande. Surface, mountains in the center and W., where it is traversed by the Sierra Madre. Cap. Socorro. Pop. (1897) 10,540.

—A thriving town, cap. of the above co., on the Rio Grande, 135 miles S. S.W. of Santa Fé. Pop. (1897) 4,260.

Socorro, a town of the Republic of Colombia, dept. of Boyaca, 65 m. S.W. of Pamplona. Pop. about 13,000.

Socorro, or **SOCORRA**, in *Texas*, a post-township of El Paso co., on the Rio Grande, 15 m. S.E. of El Paso.

Soc'otra, an island of the Indian Ocean, 230 m. from the S. coast of Arabia, and 120 m. E. of Cape Gardafui, in Africa, its chief town, Tamarinda, being in Lat. 12° 39' 2" N., Lon. 54° 6' 29" E.; area, 1,000 sq. m. Date-trees and cotton are cultivated; but the productions for which *S.* is particularly famous are aloes and the gum of the dragon's blood-tree, both of which are said to be the finest in the world. Annexed to Gt. Britain 1886.

Soc'otrine, *a.* Pertaining to, or obtained from, Socotra; as, *Socotrine* aloes.

Socrates, the great Athenian philosopher, was the son of Sophroniscus and Phænarete, and was b. near Athens B. C. 469. He was brought up to his father's calling, that of a sculptor, and for a time gained his living by it. He was, however, naturally an eager student, and by means of the best teachers and the best works accessible to him, got the best education his country and his age could give him. He was one of the disciples of the great Anaxagoras, and of his successor Archelaus, and soon gave himself up entirely to philosophy. He led an active social life, married—unhappily for himself, a Xanthippe—served his country as a soldier, distinguishing himself by his courage and extraordinary endurance at the siege of Potidea, at the battle of Delium, and at Amphipolis. At Potidea he saved the life of his pupil Alcibiades, and at Delium the life of his pupil Xenophon. His robust constitution made him indifferent to the extremes of temperature; he could dress alike and go barefoot all the year round. He appears to have scarcely ever held any political office, and seems to have inclined rather to the aristocratic than the democratic party. Critias, one of the Thirty Tyrants, had been his pupil; Theramenes was his friend; so was Charmides. Yet he fearlessly rebuked Critias for his vices, and thereby made him his enemy; and he with equal courage and disregard of consequences denounced the proceedings of the Thirty, and in one important case refused to obey their command. On the trial of the six generals after the battle of Arginusæ he firmly opposed the injustice of the sentence. But it was as a teacher that *S.* made himself the foremost man of Athens, and perhaps of the ancient world. He wrote no book, he did not establish a school, nor constitute a system of philosophy. But he almost lived abroad, and mixed with men familiarly, and in the street or any

place of public resort, where listeners gathered round him, he talked and questioned and discussed, not for pay, but from the love of truth and a sense of duty. He was persuaded that he had a high religious mission to fulfil, and that a divine voice (afterwards spoken of as his *Dæmon* or *Genius*), habitually interfered to restrain him from certain actions; and instead of encouraging profitless speculations upon nature or the rhetorical charlatany of the Sophists, he turned the thoughts of men to themselves, their actions, and their duties. *S.* was distinguished chiefly by his theory of virtue. Virtue, he said, consisted in knowledge. To do right was the only road to happiness; and as every man sought to be happy, vice could arise only from ignorance or mistake as to the means; hence the proper corrective was an enlarged teaching of the consequences of actions. Yet even on these things he did not dogmatize; instead of asserting and imparting, he questioned, and suggested, and showed, and led the way to real knowledge. He ruthlessly compelled ignorance and pretence to own themselves, and thus drew on himself the hatred of many. So early as B. C. 424 he was attacked by Aristophanes, in his comedy of the *Clouds*, as the arch-sophist, the enemy of religion, and corrupter of youth; substantially the same charges as those on which he was prosecuted twenty years later. He was unable to appear not only hateful, but ridiculous—a result the more easy to be attained because of his singularly ugly physiognomy, so easily rendered by the comic mask. He was persecuted during the tyranny of the Thirty, and after their fall he was impeached by Anytus, one of their leading opponents, with whom were associated Melitus, a tragic poet, and Lycon, an orator. He was charged with not believing in the gods which the state worshipped; with introducing new divinities; and with corrupting the youth. Death was proposed as the penalty. *S.* refused to make use of a speech prepared for his defence by Lysias, and defended himself in a tone of confident innocence and worthiness, which aggravated the ill-will of his judges. He was condemned by a majority of six only; but his additional speech in mitigation of the sentence raised the majority against him to eighty. Thirty days elapsed between his sentence and its execution, in pursuance of the law that no criminal must be put to death during the voyage of the sacred ship, the *Theoris*, to Delos with the annual offerings. During that period *S.* had the society of his friends, and conversed with them as usual; the last conversation being on the immortality of the soul. He refused the offer of some of his friends to procure means of escape for him; drank the hemlock cup with perfect composure, and so D. in the 70th year of his age, B. C. 399. *S.* opened a new era in philosophy, and without founding a system he originated, by rousing men to reflection and leading them toward self-knowledge, a vast movement of intellect, which produced, first Platonism and the Aristotelian logic, and then all the systems, even conflicting ones, which rose into more or less importance during ten successive centuries. So true, on a wider scale than he meant, was his own conception of his method as an "intellectual obstetricism." By his religious spirit, his belief in God and in immortality, his aim to reunite religion and morality, and his own noble and beautiful life, the mirror of the truths he taught, he exerted so strong and wholesome an influence that the historian of the Christian religion, Neander, does not hesitate to adopt the saying of the Florentine philosopher, Marsilio Ficino, that *S.*, like John the Baptist, was a forerunner of Christ. Our primary authorities for the life and teaching of this extraordinary man are Xenophon's *Memorabilia* and *Apology* of *S.*, and Plato's *Dialogues*, in which he forms the great central figure.

Socratic, **Socrati'cal**, *a.* Pertaining or relating to Socrates, or to his doctrines or method of teaching.

Socratically, *adv.* After the manner or method of Socrates.

Socratist, *n.* A disciple or follower of Socrates.

Sod, *n.* [Du. *zode*.] That stratum of earth on the surface which is filled with the roots of grass; turf; sward; also, a piece of turf.

—*a.* Made of sod; as, a *sod* fence.

—*v. a.* To turf; to cover with sod; as, to *sod* a garden-plot.

Sod, *imp.* and *pp.* of SEETH for SODDEN. See SEETH.

Soda, *n.* [Ger., Sp., and It. *soda*, *sode*; Fr. *soude*.] (*Chem.*) The protoxide of the alkaline metal sodium. It may be procured in an anhydrous state by burning the metal in dry air or oxygen. It is of a white color, greedily abstracting water from the air, which cannot be expelled by heat. In this state it forms hydrate of *S.*, or caustic *S.* It is so familiar in its properties to hydrate of potash, that it need not be fully described here.

Carbonates of S. There are three of these, the ordinary *monocarbonate*, or common washing-soda, Na_2CO_3 , which in its crystalline form contains ten equivalents of water; the *sesquicarbonate*, $\text{Na}_2\text{CO}_3 + 2\text{NaHCO}_3 + 3\text{Aq}$, which occurs in the mineral kingdom as *irona* and *urua*; and the *bicarbonate*, NaHCO_3 , which is prepared by passing carbonic acid through a concentrated solution of the carbonate until saturation takes place. It is also prepared by exposing the crystallized monocarbonate to the action of a current of carbonic acid; but in this method of making it, only the outside portions of the converted crystals should be used, the inner parts being only partially changed. It is ground and dried at a very gentle heat, care being taken to avoid a high temperature, which would cause the formation of the sesquicarbonate. Bicarbonate of *S.* crystallizes in prisms. It occurs in commerce as a white crystalline powder, which is gradually converted into the sesquicarbonate by exposure to the air. It is much used

in medicine, having a much less unpleasant taste than either the mono- or sesquicarbonate, from which it is readily distinguished by giving no precipitate with the magnesia salts. The properties of the monocarbonate are described under *Manufacture of Soda*.

Hyposulphite of S. This important salt is now manufactured in tons for photographic purposes and as an *antichlore*, to extract the last traces of chlorine from paper pulp. It is prepared by fusing equal weights of carbonate of *S.* and flower of sulphur, and transmitting sulphurous acid through the solution of impure sulphide of sodium thus formed. The liquid is evaporated and hyposulphite of *S.* crystallizes from the solution in bold prisms.

Manufacture of S. The preparation of carbonate of *S.* from common salt may be divided into three principal operations: 1, the production of *salt-cake*, or crude sulphate of *S.*; 2, the transformation of the sulphate of *S.* into black-ash or impure carbonate mixed with sulphide of sodium, by roasting with chalk and coal; 3, the extraction of *S. ash*, or dry carbonate, by lixivation with water and evaporation to dryness. The first process is performed by placing about 6 cwt. of ordinary salt in a strong iron pan, and mixing it with an equal weight of oil of vitriol. The mixture is then removed to a reverberatory furnace, and the flame allowed to play on its surface until the whole of the hydrochloric acid is driven off, and the chloride of sodium transformed into a dry mass of sulphate of *S.*, or salt-cake, as it is termed. The hydrochloric acid produced is condensed, and used either for the production of chlorine in the manufacture of bleaching powder, or for extracting the copper from the iron pyrites used in making the *black-ash*, or impure carbonate of *S.* is effected by mingling the sulphate of *S.* or salt-cake, formed in the first process, with chalk and powdered coal in the proportions of three parts of sulphate of *S.*, three of chalk, and two of coal. The mixture is thrown into a reverberatory furnace in quantities of two hundred-weight and a half at a time, and frequently stirred until melted. Towards the conclusion of the operation, a violent effervescence takes place, carbonic oxide escaping in large quantities, and burning with a green or yellow flame; the products being carbonic oxide, which burns; sulphide of lime, which remains behind; and carbonate of soda, with which it is mixed. This intermediate action is the foundation of the whole process. In practice, an excess of coal and chalk is employed, as much of the coal burns away, and an excess of lime is required in order to prevent the formation of any of the soluble sulphides of calcium. The amount of carbonate of *S.* contained in black-ash is about 20 per cent. It is extracted from the mass by breaking it into small fragments, and digesting it with warm water for several hours in large vats provided with false bottoms, the last and weakest washings being used to act on fresh portions of black-ash. When the lixivium is sufficiently concentrated, it is transferred to evaporating pans. The residue left behind is known as *S. waste*, and consists of a mixture of oxysulphide of calcium and unburnt coal. The efforts of numerous chemists have been fruitlessly employed for the last 50 years in endeavoring to utilize this waste product, which collects gradually near all *S.*-works, and ultimately forms large mountains. The solution of crude carbonate of *S.* is generally of a dark-green color, from the accidental admixture of iron or manganese, and contains certain proportions of hydrate and sulphate of soda, which are converted into carbonate by mixing the evaporated salts with small coal and sawdust, and in heating in a reverberatory furnace. The resulting salt, which is the soda-ash of commerce, is then once more dissolved in water, the solution evaporated to crystallization, when large rhomboidal crystals of ordinary washing-*S.* are obtained. These consist of carbonate of *S.*, with ten equivalents of water.

Nitrate of S. This salt occurs (like nitrate of potash) as an incrustation on the earth in certain hot districts, more especially in Chili and Peru, where it is found in layers of considerable thickness. It crystallizes in large rhombohedral masses—whence its commercial name of *cubic nitre*. Exposed to the air, it deliquesces, and therefore cannot be substituted for nitre in the manufacture of gunpowder. It is largely used in the manufacture of nitric acid, being cheaper than nitrate of potash, and yielding a larger per centage of acid. It was exported in large quantities during the Russian war (the trade in sulphate being interdicted, that article being contraband of war), for the manufacture of nitre by double decomposition with carbonate or sulphate of potash.

Phosphates of S. With phosphoric acid, *S.* forms a large number of crystallizable salts, the most important of which is the rhombic phosphate. It forms large transparent efflorescent rhombic prisms, which have a cooling saline taste, and are very soluble in water. It is used medicinally as a purgative, and is employed in analysis.

Sulphate of S. Purified sulphate of *S.*, popularly known as *Glauber's salt*, is used medicinally as a purgative. In its crude state, it is manufactured in enormous quantities from common salt and sulphuric acid, forming *salt-cake*, one of the steps in the *S.* manufacture (*q. v.*) In its anhydrous condition, it sometimes forms an incrustation on the surface of the soil, in which state it is known to mineralogists as *Chenardite*. It is also a large product in the manufacture of nitric acid from nitrate of *S.*

Sulphite of S. This salt is made on a large scale by passing sulphurous acid over moist *S.* crystals. By careful evaporation, it may be obtained in transparent, five- or six-sided prisms, which, when exposed to the air, become covered with an opaque crust of sulphate of *S.* It

has been lately much employed as an antichlore for the preservation of wines, and in refining beet-root sugar.

Sod'a-alum. *n.* (*Min.*) A hydrated sulphate of soda and alumina. It occurs native in fibrous crusts, with a glossy internal aspect, about the Solfatara, near Naples.

Sod'a-ash. *n.* (*Chem.*) See SODA (MANUF. OF).

Sod'a Lake. in the N.W. of Louisiana, between Caddo and Cross lakes, 15 m. long and 6 wide, the surplus waters of which flow into the Red River at Shreveport.

Sod'alite. *n.* [From *soda*, and Gr. *lithos*, stone.] (*Min.*) A silicate of alumina and soda with chloride of sodium. It generally occurs crystallized in rhombic dodecahedrons, also massive, and is of various colors.

Sodal'ity. *n.* [Lat. *sodalitas*, from *sodalis*, a comrade.] A fellowship, fraternity, or camaraderie.

Sod'a-salts. *n. pl.* (*Chem.*) Salts having a base of soda.

Sod'a Springs. in Idaho, a village of Oneida co., 220 m. S.E. of Boise City.

Sod'a-waste. *n.* (*Chem.*) See SODA (MANUF. OF).

Sod'a-water. *n.* (*Chem.*) A well-known beverage, which, as usually prepared, is a supersaturated solution of carbonic acid gas in water. *Soda-water*, properly called, consists of one, two, or three drachms of carbonate of soda, dissolved in a pint of water highly impregnated with carbonic acid. This is often a valuable remedy; but it would sometimes be attended by mischievous results, if indulged in to the extent which some persons pursue the use of soda-water. The mere aqueous solution of carbonic acid, which is made by forcing the gas into water by a condensing pump, and under a pressure of six or eight atmospheres, is an agreeable and, generally speaking, harmless diluent.

Sod'den. *pp.* of SKETHE, *q. v.*

Sod'den-witted. *a.* Thick-skulled; heavy; obtuse; stupid.

Sod'dy. *a.* Consisting of, or covered with, sod; turf.

Sod'er. *v. a.* Same as SOLDER, *q. v.*

Sod'ero. an island of Sweden in the Aland Strait. *Ext.* 7 m. long, and 3 broad.

Sod'ium. *n.* (*Chem.*) The alkaline metal of which soda is the oxide. It was discovered in 1807 by Sir Humphrey Davy. It occurs in large quantities in nature, chiefly in combination with chlorine, as sea-salt. It is also found united with oxygen in certain common minerals, such as albite, analcime, labradorite, and kryolite. It also occurs in the form of nitrate, carbonate, biborate, and sulphate. It is found in the ashes of plants, especially those which grow near the sea, such as the *Salsola Soda*, formerly the great source of sodium and its compounds, now principally obtained from sea and rock-salt. Sodium has lately become an article of commerce, in consequence of the demand which has arisen for it for the manufacture of aluminium. M. Deville recommends the following method of manufacturing this valuable metal:—Dried carbonate of soda 717 parts, powdered charcoal 175 parts, and finely-powdered chalk 108 parts, are mixed intimately, and kneaded into a stiff paste with oil, and calcined in a covered iron pot. The mass is then introduced into a retort, and distilled with the same precautions as those used in the manufacture of potassium (*q. v.*). This mixture generally yields one-third its weight of sodium. Sodium is a yellowish-white lustrous metal, resembling silver more closely than potassium. It is soft, and may be readily cut with a knife or moulded with the fingers. Exposed to the air, it tarnishes immediately, becoming covered with a film of soda; it is therefore preserved in petroleum or some other hydrocarbon. Heated in the air or oxygen, it burns with a bright-yellow flame, and is converted into soda. Thrown upon water, it decomposes it rapidly, but without eliminating sufficient heat to kindle the hydrogen formed. It is much used in chemical operations for the reduction of the elements having a great affinity for oxygen, such as boron, silicon, calcium, barium, magnesium, &c.; and in the arts for the reduction of aluminium. Its amalgam with mercury, from not requiring to be kept under naphtha, is frequently used for this and other purposes, when a strong deoxidizing agent is required. Mercury is placed in a strong glass flask, and heated to about 300°; the sodium is then dropped in in pieces the size of a pea. When the whole of the sodium is added, the amalgam is poured out in a flat dish until cold, when it is broken up in small pieces, and kept in a stoppered bottle. *Equiv.* 23; *sp. gr.* 0.972; *fusing-point*, 194° F.; *symbol*, Na (natrium).

Bromide and Iodide of S. These two salts occur sparingly in sea-water and in the ashes of sea-plants, and are the principal commercial sources of iodine and bromine. Like the corresponding salts of potassium, they crystallize in anhydrous cubes, which deliquesce on exposure to the air.

Chloride of S. This important substance constitutes the rock-salt of commerce, or common table-salt. See ROCK-SALT.

Sod'om. (*Script.*) One of the cities of the plain, and for some time the dwelling-place of Lot. Its crimes and vices (the nature of which is recalled in the word *Sodom*) were so enormous, that God destroyed it by fire from heaven, with three neighboring cities, Gomorrah, Zebaim, and Admah, which were as wicked as itself. The plain of Siddim, in which they stood, was pleasant and fruitful, like an earthly paradise; but it was first burned, and afterwards mostly overflown by the waters of the Dead Sea or Lake of Sodom. Modern writers on sacred topography, however, are not agreed as to the precise site to be assigned to those cities, no trace of which now remains; the majority holding that they stood on the S. shore of the Dead Sea, near the salt hill of Usdum; while others, again, maintain that the cities of the plain stood in the circle or plain of the

Jordan, E. from Bethel and Ai, near where the river discharges itself into the Dead Sea.

Sod'om. in Georgia, a village of Burke co.

Sodom. in New Jersey, a village of Warren co., 12 m. from Belvidere.

Sod'omite. *n.* An inhabitant of Sodom;—hence, one guilty of sodomy.

Sodomit'ical. *a.* Pertaining, or relating, to sodomy.

Sod'omy. *n.* Unnatural copulation; buggery.

Sod'orns. or SADORUS, in Illinois, a post-vill. of Champagne co., 33 m. N.E. of Decatur.

Sod'us. in Michigan, a post-township of Berrien co., 5 m. N.W. of Berrien.

Sodus. in New York, a post-village and township of Wayne county, 36 miles north-east of Rochester.

Sodus Bay. in New York, an inlet of Lake Ontario in Wayne co., 5 m. long and 3 broad, 35 m. N.E. of Rochester.

Sodus Centre. in New York, a post-village of Wayne co., 190 m. N.W. of Albany.

Sodus Point. in New York, a post-village of Wayne co., on Lake Ontario, 30 m. W.S.W. of Oswego.

Sod'est. a town of Prussian Westphalia, on the Sösterbach, an affluent of the Lippe, 13 m. N.N.E. of Arnberg, and 33 m. S.E. of Münster. *Manuf.* Linen, woollens, hosiery, leather, paper, and oil. *Pop.* 9,500.

Sod'ver. *So and ever*, found in compounds, as in *who-soever*, *whatsoever*, *wheresoever*, *whosoever*, *howsoever*, and noting any out of all possible persons, things, times, places, ways, &c.

Sof'a. *n.* [Fr., It., Sp., and Ar.; Hind. *sooffu*, a bench.] A long seat, generally with a stuffed or cushioned bottom, used as an elegant or useful piece of household furniture; a kind of divan.

Sofa'la. a tract of country on the E. coast of Africa, included in the territory known as Mozambique, bet. abt. Lat. 18° to 24° S., and from the seaboard to the Lupata mountains. The climate is very unhealthy. The Portuguese possessions in S. occupy an area of abt. 10,000 sq. m., and have a pop. of 287,000. — **SOFALA**, a town in the above country, and formerly the cap. of a native kingdom, is situate in Lat. 20° S., Lon. 35° E., at the mouth of the river Sofala, which has a course of 200 m., and is navigable only for small craft.

Soffioni. *n. pl.* [It.] See BORACIC ACID.

Soffit. *n.* [It. *soffita*.] (*Arch.*) A small ceiling, formed into panels, as over windows, in-goings of doors, staircases, &c.

Sof'i. *n.; pl.* SOFIS. [Pers. *sūfi*, *sūfi*.] In Persia, a dervish. S. was also the surname borne by the ancestors of the Persian monarchs of the race preceding that which now occupies the throne; and Shah Ismael Sofi, the first monarch of that race, also bore it;—hence, by European writers of the 16th and 17th centuries, the word *sofi*, or *sophy*, was used erroneously as a title of the Shah of Persia.

Sofism. (*sō'fizm.*) **Su'fism.** *n.* The religious tenets held by the Sofis or Sufis. They are those of a sect which is said to be gaining ground extensively in Oriental countries, especially among the educated classes of Mohammedans. These tenets, like those of the Quietists and other Christian sects of mystics, are founded on a notion of the union of the human soul with the divinity by contemplation and the subjugation of the appetites. The principles of S. appear also to have a remarkable affinity, in some respects, with those pantheistic notions which are prominent in the system of the Brahmins, and seem to form the very foundation of the still more extended religion of Buddhism. See BABISM.

Soft. *a.* (*comp.* SOFTER; *superl.* SOFTEST.) [A. S. *soft*; Ger. *saft*, *soft*, *mild*.] Readily yielding to pressure; easily cut or separated by an edged instrument; impressionable; yielding. — The opposite of *hard*; as, *soft earth*, *a soft bed*, *soft wood*, &c. — Easily worked; ductile; malleable; as, *a soft metal*. — Smooth to the touch; fine; delicate; not rugged, rough, or harsh; as, *a soft skin*, *soft velvet*. — Hence, by analogy, pleasant to perceive; agreeable to the feelings; as, *soft air*. — Mild to the eyes; not strong or glaring; not agitating by violence of contrast or intensity of coloring; as, *a soft light*, *a soft tint*. — Smooth or melodious to the ear; flowing; harmonious; not loud, rough, harsh, or grating; not dissonant or vehement; gentle; as, *a soft voice*, *a soft whisper*, *soft music*, *soft rhythm*. — Easily yielding to persuasion or motives; flexible; pliant; susceptible of influence or passion; facile; impressionable; compliant; tractable; gentle; delicate; elegantly tender; feminine; as, *a soft form*, *a soft temper*. — Effeminate; weak; easy; not bold, courageous, or manly; as, *a soft spirit*. — Not tinged with salts; not hard; as, *soft water*. — Easy; quiet; tranquil; undisturbed; as, *a soft slumber*. — Weak; impressionable; thin-skinned; as, every man has his *soft place*, which a woman finds out. — Uniformly easy in motion or action; gentle; quiet. — Mild; placid; courteous; complaisant; not rude, rough, or irritating; as, *a soft manner*, *soft in speech*.

(*Pron.*) Not pronounced with a sudden or forcibly emphatic utterance, but forming a partial combination of sound with a following letter;—expressed of certain consonants, as *c*, when *soft*, is pronounced like *s*, as in *cent*; or *g* like *j*, as in *gin*.

—*adv.* Softly; gently; quietly.

Fig. 2394. — SS, SOFFIT.

Soft. *interj.* Be soft; hold; stop; not so fast: as, "But soft, my muse! the world is wide." — *Sir J. Suckling*.

Soften. (*sō'fn.*) *v. a.* To make soft or more soft; as, (1.) To make less hard, as matter. — (2.) To mollify; to assuage; to make less fierce and intractable; to make more susceptible of humane or fine feelings; to make less harsh or severe; as, to *soften* a stern temper. — (3.) To palliate; to seek to lessen the apparent enormity of; as, to *soften* one's transgressions. — (4.) To alleviate; to mitigate; to compose; as, music *softens* pain. — (5.) To make calm, placid, or agreeable. — (6.) To render less harsh, rude, offensive, violent, or vehement; as, to *soften* one's address or manner. — (7.) To make less prominent or glaring; as, to *soften* the lights in a picture. — (8.) To enervate; to make less tender, delicate, or effeminate; as, a savage *softened* by intercourse with civilization. — To make less harsh, strident, or grating, or of a diametrically opposite quality; as, to *soften* the voice.

—*v. n.* To become soft or softer; to become less hard or rigid; as, (1.) To become more pliable and susceptible to pressure; as, wax *softens* in heat. — (3.) To become less rude, barbarous, harsh, or cruel; as, a tyrant *softens* under love. — (4.) To become less stern, or obdurate; to become open to compassion or tender feelings; as, his heart *softens* at the pitiable sight. — (5.) To become mild or temperate; as, the climate *softens*. — (6.) To become less harsh, severe, imperious, or rigorous; as, the law sometimes *softens* in this country toward an offender who has political influence.

Softener. (*sō'f'n-er.*) *n.* One who, or that which, softens.

Soft-grass. *n.* (*Bot.*) See HOLCUS.

Soft-head'ed. *a.* Silly; possessing a weak intellect.

Soft-heart'ed. *a.* Possessing softness or tenderness of heart; impressionable to the softer emotions; open to compassion, pity, or other kindly affection; gentle; benevolent.

Soft-heart'edness. *n.* Quality of being soft-hearted.

Soft'ish. *a.* Somewhat soft.

Soft'ly. *adv.* In a soft manner; without hardness.

Soft'ness. *n.* [A. S.] Quality of being soft;—correlative to *hardness*; susceptibility of feeling or passion; mildness; kindness; civility; gentleness; as, *softness* of disposition. — Effeminacy; weakness; vicious delicacy; timorousness; pusillanimity; excessive susceptibility of fear or alarm. — Smoothness to the ear; as, *softness* of the voice. — Gentleness; candor; easiness to be affected; mildness of temper; meekness; simplicity. — Mild temperature; as, *softness* of the air. — Smoothness or delicacy of surface or texture, as perceived by the touch; as, *softness* of the skin, or of silk.

Soft-spoken. *a.* Having a mild, gentle voice;—hence, gentle; affable; complaisant; courteous; as, *a soft-spoken woman*.

Sog'gy. *a.* (*comp.* SOGGIER; *superl.* SOGGIEST.) [Icel. *soggr*, damp.] Dank; wet; soft with moisture; as, *soggy timber*. — Steaming with damp; as, *soggy vegetation*.

So-ho! *interj.* Ho! holla! — A sportsman's halloo; a word used in calling from a distant place.

Soi-disant. (*swah-de-zōng'*) *a.* [Fr.] Self-styled; pretended; calling himself; would-be; as, *a soi-disant king*.

Soignies. (*swahn'yē.*) a town of Belgium, prov. of Hainault, on the Senne, 10 m. N.N.E. of Mons; *pop.* 6,500.

Soil. *v. a.* [A. S. *selan*; Icel. *solo*, to strain; Fr. *souiller*.] To sully; to defile; to foul; to dirty; to tarnish; to stain; to pollute; as, to *soil* one's clothes by contact with dust. — To bespatter; to begrim; to besmear; to bedaub; to cover with something extraneous or foreign; as, plants *soiled* with mildew. — To dung; to manure; as, to *soil* the ground.

—*v. a.* [Fr. *souler*; Lat. *satullare*.] To feed, as cattle or horses, in the stable or an inclosure with green fodder, instead of sending them out to grass;—hence, to purge by dieting with green food; as, to *soil* a horse.

—*n.* [Ger. *süle*.] Filth; any foul matter covering another substance; dirt; foulness. — A stain, blot, or taint; as, "A lady's honor, nice as ermines, will not bear a soil." — *Dryden*.

—[Fr. *sol*; Lat. *solum*.] Earthy and other substances in a state of mixture with organized matter fit for the growth of plants. The surface of the earth in every country on which plants have grown and decayed is properly denominated *soil*; while the earth at a foot or more beneath the surface, commonly called *subsoil*, is comparatively without organized matter, and is therefore properly denominated earth, clay, sand, gravel, lime, &c.

—Land; country; as, he died on foreign *soil*. — Dung; manure; compost; as, *night soil*.

—[Fr. *souille*, from L. Lat. *souillare*, to foul, from *sus*, a hog.] A dirty or dank place which forms a refuge for a wild bear or other hunted animal. — To take *soil*, to run into the mire or water;—hence, to take refuge or cover.

Soil'less. *a.* Without soil; as, *a soilless desert*.

Soil'ure. (*-yūr.*) *n.* Stain; tarnish; pollution; as, *the soilure* of a woman's chastity. (*R.*)

Soiree. (*swah-rā'*) *n.* [Fr., from *soir*, evening.] An evening party or entertainment; a conversation. — A term often applied to the meetings of certain societies at which tea and other refreshments are introduced; the opposite of *matinée*.

Soissons. (*swois'sawng.*) a fortified town of France, dept. of Aisne, on the Aisne, 17 m. S.W. of Laon. *Manuf.* Coarse linen, hosiery, thread, ropes, and leather. *Pop.* 10,208. — *S. Noviodunum*, and afterwards *Augusta Suesionum*, was the last Roman stronghold in Gaul that withstood the arms of Clovis, who here overthrew Syagrius, the Roman commander, in 486, and made it the seat of the Frankish monarchy, which it long continued to be.

Soja, (so'zd.) *n.* (*Bot.*) A genus of plants, order *Fabaceae*. The legumes of *S. hispida* form the principal ingredient of the sauce called *soy*, which is imported from India in large quantities.

Sojourn, (sō'jērn.) *v. n.* [*Fr. séjourner*; *It. soggiornare*, from *L. Lat. sejourmare*—*sub*, under, and *diurnus*, daily.] To continue, tarry, or abide in a place for a day, or for days, or as a temporary resident, or as a stranger, not considering the place as his permanent habitation; as, to *sojourn* on the continent of Europe.

—*n.* (*Pron.* in poetry sō'jērn'.) A temporary residence, as that of a traveller in a foreign land; as, a *sojourn* in Japan.

Sojourn'er, *n.* A temporary resident; a stranger or traveller who dwells or stays in a place for a time.

Sojourn'ing, *n.* Act of residing in a place for a time; also, the period of abode.

Sojourn'ment, *n.* Temporary abode or residence, as that of a stranger or traveller.

Sok, a river of Russia, rises in the govt. of Orenburg, and after a S.W. course of 130 m. flows into the Volga, 15 m. S. of Samara.

Sol, *n.* [*Lat.*] The sun.

(*Her.*) The tincture of gold (*or*) in the heraldic blazonry of sovereign princes.

—In Switzerland, a copper coin and money of account.

(*Mus.*) The French and Italian name for the note in the gamut corresponding to our G, or the fifth tone of the diatonic scale.

Solace, (sō'lās.) *v. a.* [*O. Fr.*, from *Lat. solor, solatus*.] To lift up the spirits of; to cheer, comfort, console, or encourage in solitude, in grief, or under calamity; to comfort or to relieve in affliction; to console;—used in application to persons; as, I *solace* myself with the hope of better days to come.—To soothe; to allay; to assuage; as, to *solace* distress.

—*n.* [*Sp. solaz*, comfort, consolation; from *Lat. solatium*—*solor*.] That which comforts or alleviates grief or anxiety;—also, that which relieves in distress; consolation; cheer; mitigation; relief; diversion; amusement; as, tobacco is man's truest *solace*.

Solacement, *n.* Act of solacing, or state of being solaced.

Solanaceae, *n. pl.* (*Bot.*) An order of plants, alliance *Solanales*. *DIAG.* 5 free stamens, axile placentae, and a terete embryo.—They are herbaceous plants or shrubs, inhabiting all parts of the world excepting the Arctic regions. They are chiefly known from *Scrophulariaceae* by their curved or spiral embryo, the plaited aestivation of their flowers, and by the flowers being usually regular, with the same number of stamens as lobes. The first of these characters, however, is not of universal importance; the plaited corolla and symmetrical flowers are better marks of distinction. This order contains Nightshade, Henbane, Mandrake, Tobacco, Stramonium, the Potato, and the Tomato, the leaves of all which are narcotic and exciting, but in different degrees, from *Atropa belladonna*, which causes vertigo, convulsions, and vomiting, tobacco, which will frequently produce the first and last of these symptoms, henbane, and stramonium, down to some of the *Solanum* tribes, the leaves of which are so inert as to be used as kitchen herbs. Even in the potato plant, the narcotic acid principle is found in the stem and leaves, and in the rind of the tuber; but the principal part of the latter consists of starch, and the small quantity of deleterious matter being volatile and near the surface, is readily driven off by the heat used in cooking.

Solan'les, *n. pl.* (*Bot.*) An alliance of plants, sub-class *Perigynous exogens*. *DIAG.* Dichlamydeous, monopetalous, symmetrical flowers, axile placentae, 2- to 3-celled fruit, large embryo, lying in a small quantity of albumen. The alliance includes 7 orders,—OLEACEAE, SOLANACEAE, ASCLEPIADACEAE, CORDIACEAE, CONVULVACEAE, CUSCUTACEAE, and POLEMONIACEAE, *q. v.*

Solan'der, *n.* (*Far*) Same as *SALLENDERS*, *q. v.*

Solan-goose, **Sol'and-goose**, *n.* (*Zoöl.*) Same as *GANNET*, *q. v.*

Solan'ia, **Solan'ia**, **Sol'anine**, *n.* [*Fr. solanine*, from *Lat. solanum*, nightshade.] (*Chem.*) The active principle of the *Solanum dulcamara*, or Woody Nightshade, and other species of *Solanum*; it is the ingredient which renders greened potatoes deleterious, being formed in the tubers by the action of light. It is a white alkaloid substance, insoluble in water, but soluble in alcohol, and is highly poisonous, one grain dissolved in dilute sulphuric acid having been found sufficient to kill a rabbit in six hours. Its combinations with the acids are bitter.

Sola'no, *n.* [*Sp.*, from *Lat. solanus*.] A modified form of the *Sirocco* (*q. v.*), experienced in the Mediterranean and on the E. coast of Spain.

Sola'no, a town of Spain, prov. of Ciudad-Real, 103 m. S.E. of Madrid. *Manuf.* Linen and woollen goods. *Pop.* 4,510.

Solano, in *California*, a N. central co.; area, 900 sq. m. *Rivers*. Sacramento and Snisun. *Surface*, mountainous in the W., with several extensive and fertile valleys. *Min.* Gold. There are several valuable mineral springs. *Cap.* Fairfield.

Sol'anford, *n.* [*Lat. solanum*, the generic term for the potato, and *Gr. eidos*, form.] (*Med.*) Resembling a potato;—said of a particular kind of cancer.

Solanum, (so-lai'num.) *n.* (*Bot.*) The typical genus of the order *Solanaceae*. The tuber of *S. tuberosum* is the common potato, so largely used as food in temperate climates. The potato plant is supposed to be a native of S. America. It appears probable that it was first brought into Spain from the mountainous parts of South America, in the neighborhood of Quito, early in the 16th century. Although it now constitutes so large a portion

of the food of civilized man, it was scarcely known until the 17th cent., and was not extensively cultivated before the middle of the 18th. The varieties of the potato are very numerous, differing in their time of ripening, quality, color, form, size, &c. New varieties are readily produced by sowing the seeds, which, with care, will produce good tubers the third year. Potatoes thus reared are now thought to be less liable to the potato rot. Starch is largely obtained from potatoes, and is used for food under the names of English arrow-root, nutritious farine, &c. It is also employed in the preparations of dextrine, or starch-gum, which is much used in the arts. A decoction of the stem and leaves of the potato-plant has been used as an alternative in cutaneous diseases, and an extract of the herb has been also employed as a narcotic and antispasmodic. The medicinal properties of the plant are chiefly due to the presence of an alkaloid, called *solanine*, which has powerful narcotic properties. This has been detected in all parts of the plant; but, in the tuber only traces of it are found, and these are entirely removed by the process of boiling and preparing potatoes for the table. Another interesting species of *S.* is *S. nigrum*, the Black Nightshade, or Morel, which possesses alterative and narcotic properties. The fruit is said to be edible; but if this be the case, its use for food requires caution, as it contains solanine. The fruits of several other species are, however, eaten in various parts of the world; as those of *S. melongena* and *ovigerum*, called Egg Apples, or Mad Apples, those of *S. quitense*, called Quito oranges, and those of the Australian species *S. laciniatum*, commonly known as Kangaroo apples. The species of *S. marginatum* has astrigent properties, and is employed in Abyssinia in the process of tanning. *S. pseudo-quina*, a Brazilian species, is used medicinally in S. America as a febrifuge. *S. dulcamara*, the Bittersweet, is a well-known shrubby climber, with blue flowers and red berries, found from New England to Arkansas. Its root being chewed, gives at first a sensation of bitterness, then of sweetness; its bright red berries are poisonous. *S. carolinense*, the Horse-nettle, found on roadsides, &c., in the Middle States, is a rough weed, 1-2 feet high, flowers white, berries yellowish.

Solar, *a.* [*Fr. solaire*, from *Lat. solaris*—*sol*, the sun.] Pertaining to the sun; as, the *solar* system.—Diffused by, or proceeding from, the sun; as, *solar* influence, *solar* light, *solar* rays.—Produced by the agency of the sun; as, *solar* salt.

Solar Cycle, *n.* (*Chronol.*) A term applied to one of those artificial periods made use of in chronological researches. It comprehends a period of 28 years, compounded of 7 and 4, the number of days in a week, and the number of years in the interval of two leap-years. This cycle will remain undisturbed until the end of the present century; but in consequence of the year 1900 not being reckoned as a leap-year, the whole cycle will then be overthrown. It may, however, be reconstructed after 2000, that year being reckoned as leap-year; it will then last until 2100.

Solarization, (-zā'shun.) *n.* (*Photog.*) Excessive insolation.

Solarize, *v. a.* (*Photog.*) To burn or injure by too much insolation.

—*v. n.* To become impaired by undue exposure to the sun's rays in the camera.

Solar Parallax, the difference of the directions in which the sun is seen from the surface and the center of the earth, or at points separated by a radius of the earth. Attempts to deduce the distance of the sun from the earth by measuring its parallax were made by the ancient astronomers Aristarchus and Ptolemy, but they were necessarily futile, the distance deduced being the small one of 1,210 radii of the earth. The efforts made in recent times to this end have been by a study of the parallax of the planets Mars and Venus, while it is now recognized that the asteroids, from their minute size, are still better suited to the purpose. (See *PARALLAX*.) Other methods of determining the sun's distance have been devised by modern scientists, one of which consists in determining the velocity of light, in connection with the fact that the time in which light passes from the sun to the earth is accurately known. Another method is based on the theory of gravitation, and the effect of the sun's attraction on the moon's motion.

Solar Phosphorus, *n. pl.* Substances which are seen to be luminous in a dark place after having been exposed to light. Calcined oyster-shells are a good example.

Solar Spec'trum, *n.* (*Physics*.) See *SPECTRUM*.

Solar Sys'tem, (*Astron.*) There exists in the popular mind much misconception of what is meant by this oft-used term solar system. It comprises the sun and all the bodies, by whatever name they may be called, which periodically revolve around the sun as a center. Visible to us are 7 distinct orders, or systems of revolving worlds. They are the zodiacal light, whatever that may be, the planetary, the satellite, the meteoric, the cometary, the stellar, and the nebular systems. All but the latter two belong to our solar system. The limits of the planetary system, as far as known, are Mercury, the nearest to the sun, and Neptune, the most distant. It, however, would not greatly surprise the astronomical world to hear that a trans-Neptune planet had been discovered, although there is at the present time no perturbative evidence of its existence, as there was in the case of Neptune. This limit does not include the hypothetical intra-Mercurial planets, discovered during the total solar eclipse, in 1878, by Watson and Swift. Its cometary extent is not known, and never will be, as several comets have computed

periods of over a million years, and even their aphelia reach only a step toward even the nearest star. The sun's far-reaching power, of course, extends to half way to the stars, and it is not an unreasonable supposition to suppose that there are comets whose aphelia extend that far, and if so, their periodic times must be several million years. The bodies as far as known that are denizens of our solar system are the sun (the center), the planets Mercury, Venus, earth with one satellite, Mars with 2 satellites, 428 asteroids, Jupiter and 5 satellites, Saturn with 5 rings and 8 satellites, Uranus with 4, and Neptune with 1, also Halley's, Pons', and Olber's comets of long period, and about 25 of short period, ranging from 33 years (Encke's) to 1378 years, commonly, but unjustly, called Tuttle's comet. It was discovered by Méchain, in 1790. To the list must be added 200 or more meteoric rings, which, while the earth is passing through them, produce the star showers (*q. v.*). The next return of Halley's comet is calculated for about 1912; Pons', 1955; Olber's, 1960. Every member of the solar system, be it planet, satellite, meteoroid or comet, moves in an orbit called an ellipse, of greater or lesser eccentricity. The ancients were loath to believe that the Creator would cause or permit the planets to move in any orbit but that most beautiful and symmetrical of curves, the circle, which they considered symbolical of Divine perfection. As soon, however, as they banished this delusion and substituted the ellipse, they found that at all times computation and observation of their places agreed, while before they agreed and disagreed periodically. There is not a heavenly body known to man that moves in a circle. The planets and satellites revolve in elliptic orbits, while the comets move some in elliptic and others in parabolic and hyperbolic orbits. Those moving in either of the latter 2 can never return, as the 2 branches of their paths do not meet to form a closed curve as does the ellipse. For adopting the ellipse instead of the circle for planetary revolution the world is indebted to the genius of Kepler, who by the first of his 3 laws brought harmony out of confusion. The 3 laws of Kepler, as enunciated by him, are: (1) the planets move in ellipses, having the sun in one of the foci; (2) the radius vector of each planet describes equal areas in equal times; (3) the squares of their periodic times are proportional to the cubes of their mean distances from the sun. As all heavenly bodies hang suspended on nothing throughout all space, each being attracted by all the others, it results that they must move, and, while the motions of the planets are easily noticeable in a few hours, and even minutes, it requires to detect motion in the stars long-continued observation with instruments of great delicacy and power to ascertain that they have any motion at all, so far away are they. (See *STARS*.) No planet whose orbit is interior to the earth's can ever assume the crescent phase, or rise when the sun sets, or be on the meridian at midnight, or transit the sun. On the other hand, those whose orbits are exterior to ours can never assume the crescent and half-moon phase, and are the only ones that can ever be in opposition, rising at sunset. There seems to have been a special design in placing the 4 giant planets farthest from the sun, and from each other, and a like design in locating the 4 smaller planets nearer together and to the sun. Were the order reversed, it is doubtful if the planetary system could endure, certainly not with the order and stability that characterizes their existing movements.

Sold, *imp.* and *pp.* of *SELL*, *q. v.*

Sold note, (*Com.*) A memorandum of sale, given by the broker who effects to the buyer.

Solder, (colloq. *sōl'er*.) *v. a.* [*Fr. souder*; from *Lat. solido, solidatus*, to make solid.] To unite and make solid and firm, as metallic substances; to unite the surfaces of by the intervention of a more fusible metal or metallic cement; to join by the application of metallic cement.—A metallic composition or cement for uniting the surfaces of metals.—*Plumber's S* is an alloy of three parts of lead and one of tin; it is more fusible than lead, and then readily adheres to clean surfaces of that metal when it is fused.—*Fine S* is a mixture of two parts of tin and one of lead; it fuses at 360°.

Soldering, *n.* The process of uniting the edges or surfaces of similar or dissimilar metals and alloys by partial fusion. In general, alloys or solders of various and greater degrees of fusibility than the metals to be joined are placed between them, and the solder, when fused, unites the three parts into a solid mass; less frequently, the surfaces and edges are simply melted together with an additional portion of the same metal.

Soldier, (sōl'jer.) *n.* [*Fr. soldat*; *It. soldato*, from *Lat. soldus, or solidus*, military pay.] One who is engaged in military service as an officer or private; a man engaged to serve in the army, or as one of an organized body of combatants.—Particularly, a private in military service, or one in the ranks, in distinction from an officer; a man enrolled for service when on duty or embodied for military discipline; as, a *soldier* of a regiment of infantry of the line.—Emphatically, a brave warrior; a man of distinguished valor or prowess, or of superior military experience and skill; as, Washington was every inch a *soldier*.

Soldier, in *Kansas*, a twp. of Shawnee co.

Soldier-crab, *n.* (*Zoöl.*) See *PAURIDE*.

Soldiering, (sōl'jer-) *n.* Occupation of a soldier; state of a soldier.

Soldier-like, **Soldierly**, (sōl'jer-) *a.* Like or becoming a real soldier; martial; brave; valiant; honorable; as, *soldier-like* discipline.

Soldier River, (sōld'yūr.) in *Iowa*, rises in Cherokee co., and flowing S.W., enters the Missouri River in Harrison co.

Soldiership, (sôl'jer-) *n.* State or quality of a soldier; military qualities or character; martial skill or acquirements; conduct befitting a soldier.

Soldiery, (sôl'jer-y, *n.* The body of military; soldiers collectively considered; as, disaffected *soldiery*.

Soldin, a town of Prussia, prov. of Brandenburg, 70 m. N.E. of Berlin. *Manuf.* Woollen goods. *Pop.* 5,500.

Sole, *n.* [Fr.; Lat. *solea*, a covering for the soles of the feet, from *solum*, the ground.] The bottom of the foot; also, but rarely, the foot itself; as, he is a good fellow from the crown of his head to the *sole* of his foot. — The bottom of a boot or shoe, or the piece of leather which constitutes the bottom. — That part of anything which forms the bottom, and on which it stands upon the ground.

(*Portif.*) The bottom of an embrasure.

(*Agric.*) The side or bottom of the body of a plough; also, the bottom of a furrow.

(*Mining.*) The seat or bottom of a mine; — applied to horizontal veins or lodes.

(*Fur.*) The horny substance under a horse's foot, serving as protection for the more tender parts.

(*Naut.*) A piece of timber attached to the lower part of the rudder, in order to bring it on a level with the false keel.

(*Zool.*) A genus of flat fishes, family *Pleuronectidae*. The common sole, *Solea vulgaris*, found from the seas of Scandinavia to the Mediterranean, is one of the best and most delicate fishes for the table, and is caught in immense numbers by trawl nets. The genus is represented in N. America by *A. mollis*, the N. York Sole, from Nantucket to Carolina. It is from 6 to 8 inches long, dark-brown, marked transversely with irregular black bands, and scales small.

—*v. a.* To furnish with a sole, as a shoe.

—*a.* [Lat. *solus*; Fr. *seul*; probably from *sine aliis*, being without others.] Single; individual; only; alone; solitary; as, he was the *sole* survivor.

(*Law.*) Alone; single; —used in contradistinction to *joint* or *married*. So, a *feme sole* is a single woman, a *sole* corporation is one composed of only one natural person.

Solecism, (sôl'e-sizm, *n.* [Fr. *solecisme*; Gr. *soloikis-mos*, from *Sold*, a town of Cilicia, the inhabitants of which, who had been transported from Attica, were charged with corrupting the language of their parent state.] (*Gram.* and *Rhet.*) A violation of the idiomatic rules of grammar or construction in writing or speaking a language; incongruity of words; want of correspondence or consistency; any word or expression which does not accord with the established usage of writing or speaking; as, "A barbarism may be in one word, a *solecism* must be of more." — Johnson.

—Hence, by analogy, any unfitness, discrepancy, absurdity, or impropriety; as, a *solecism* in politeness or etiquette.

Solecist, (sôl'e-sist, *n.* [Gr. *soloikistês*.] One who commits a solecism.

Solecist'ic, Solecist'ical, *a.* Pertaining or having reference to, or involving, a solecism.

Solecize, (sôl'e-siz, *v. n.* [Gr. *soloikizein*.] To commit solecism. (*R.*)

Solely, *a.* Singly; alone; only; without another; as, he depends *solely* on his own exertions.

Solemn, (sôl'em, *a.* [Fr. *solennel*; Lat. *solemnis*, or *solemnis*, from the old *sollus*, all, every, and *annus*, year.] Marked with religious gravity, pomp, or sanctity; attended with sacred rites; ritual: ceremonial; formal; as, a *solemn* feast or fast, a day of *solemn* thanksgiving or prayer. — Marked by devoutness or reverential feeling toward God; sober; serious; grave; devotional; affecting with seriousness; impressing or adapted to impress, seriousness, gravity, or reverence; as, *solemn* thoughts, *solemn* language, *solemn* silence. — Affectedly grave, serious, or sanctimonious; as, a *solemn* prig.

Solemnness, *n.* State or quality of being solemn; gravity; reverential manner or character; as, the *solemnness* of an oath.

Solemn'ity, *n.* [Fr. *solemnité*; Lat. *solemnitas*.] A rite or ceremony annually performed, or at stated times, with religious reverence: a religious ceremony; a ritual performance attended with religious ceremonies; as, the *solemnity* of a sacrament. — A ceremony adapted to convey or impress a sense of awe; as, the *solemnities* of the day of judgment. — Steady seriousness; gravity; as, *solemnity* of manner or language. — Hence, affected gravity or seriousness; as, buffoonery with *solemnity* of accent. — Awe or reverence excited or inspired by outward circumstances; appearance calculated to impress with reverential or solemn feelings; as, the *solemnity* of a great public funeral, the *solemnity* of an ancient cathedral.

(*Law.*) A solemn or formal observance; the formality which is necessary to make valid the doing of anything.

Solemnization, (-zôl'shun, *n.* [Fr. *solemnisation*.] Act of solemnizing; celebration; as, the *solemnization* of nuptials.

Solemnize, *v. a.* [Fr. *solemniser*.] To dignify, honor, or make illustrious by solemn or stately ceremonies; — hence, to make famous; to celebrate; as, to *solemnize* a feast. — To perform with ritual ceremonies and reverence, or according to legal formalities; as, to *solemnize* the rite of matrimony. — To perform religiously once a year; as, to *solemnize* an anniversary. — To make grave, serious, or reverential; as, to *solemnize* the mind before taking the holy sacrament.

Solemnizer, *n.* One who performs a solemn rite or religious office.

Solemnly, (sôl'em-ly, *adv.* In a solemn manner; with gravity and religious reverence; with official formalities and by due authority; with formal state, grav-

ity, and ceremoniousness, or with affected gravity; with religious seriousness.

Solen, *n.* [Gr. *solên*, a kind of shell-fish.] (*Anat.*) The vertebral canal, containing the spinal cord

(*Surg.*) Same as CRADLE, *q. v.*

(*Zool.*) The typical genus of the SOLENIDÆ, *q. v.*

Soleness, *n.* Singleness. (*R.*)

Solenidæ, *n. pl.* (*Zool.*) A family of molluscs, distinguished by the great length of their respiratory tubes. The *Solen*, or *Razor-shell*, is a well-known example. It has an elongated shell, the hinge being furnished with distinct teeth, and the ligament altogether external. The animal burrows in the sand sometimes to the depth of nearly two feet, into which it sinks rapidly on the approach of danger; and as it very rarely quits its hole, its movements are nearly limited to an ascent or descent in it. This it accomplishes by means of its foot, which it attenuates into a point when it is about to bore, and afterwards contracts into a rounded form, so as to fix it by its enlargement when it desires to rise. It is found on both sides of the Atlantic; and in places where it abounds it is used for food and as bait for fish.

Solenite, *n.* (*Min.*) A fossilized solen.

Solent, (*The.*) a part of the Atlantic Ocean between the mainland of England and the Isle of Wight, 18 m. long and 3 broad.

Solesbury, in Pennsylvania, a township of Bucks co.; *pop.* ubt. 5,000.

Solesmes, (sôl'm, *a.* a town of France, dept. Dn Nord, 9 m. N. of Cambrai. *Manuf.* Cotton goods. *Pop.* 5,700.

Solenne, (sôl'ur, *a.* or SOLOTHURN, (sô-lo-toorn'), a canton of Switzerland, in the N.W. of the confederation, between Lat. 47° and 47° 30' N., and the 7th and 8th deg. of E. Lon., having N. Basle, E. and S.E. Aargau and Lucerne, and on its other side the canton of Berne; *area*, 255 sq. m. Though of a very irregular shape, it may be divided into two nearly equal portions; the N. W. covered with ranges of the Jura Mountains, and the S.E. comprised in the valleys of the Aar and Emmen. Some of the summits in the former rise to about 4,000 feet above the level of the sea; but, though rugged, this part of the canton has a large extent of fine upland pastures. In the other, or lower portion of the canton, the ground is fertile and well cultivated; so that, on the whole, *S.* is regarded as one of the most productive portions of Switzerland. — SOLEURE, the cap. on the Aar, near the foot of the Jura Mountains, and 18 m. N. by E. of Berne.

Sol-fa, (sôl-fâh, *v. n.* (*imp.* and *pp.* SOL-FAED; *ppr.* SOL-FAING.) (*Mus.*) To run over the notes of the gamut, ascending or descending; as, *do, re, mi, fa, sol, la, si, do*; or the same in converse order.

Solfanaria, *n.* [From It. *solfa*, sulphur.] A sulphur mine.

Solfatara, *n.* [From It. *solfa*; Lat. *sulfur*, sulphur.] (*Geol.*) A volcanic rent from which sulphur and sulphurous or other acid vapors and gases are erupted with much steam.

Solfatara, a lake of Italy, on the Campagna di Roma, near Tivoli, about 500 feet broad, and containing several floating islands. Near it are the ruined baths of Agrippa.

Solfeggiare, (sôl-fed-jâ'râ, *v. a.* [It.] (*Mus.*) Same as SOL-FA, *q. v.*

Solfeggio, (-fêd'jo, *n.* [It.; Fr. *solfege*, from *solfa*, the gamut.] (*Mus.*) The system of arranging the scale by the names *do (ut), re, mi, fa, sol, la, si*, by which musical students are taught to sing, these notes being represented to the eye by lines and spaces, to which the syllables in question are applied.

Solferino, (sol-fe-re'no, *a.* a village of N. Italy, prov. of Brescia, 20 m. N.W. of Mantua. Here the Emperor of the French and the King of Sardinia gained a victory over the Emperor of Austria, June 24, 1859. Hostilities were suspended by the armistice of Villa Franca.

Sol'i, *n. pl.* of SOLO, *q. v.*

Solicit, (-lis'it, *v. a.* To ask from earnestly; to entreat; to importune; to make petition or requisition to. — To try to obtain; to seek to acquire; as, to *solicit* a favor, to *solicit* patronage. — To awaken; to summon; to invite or excite to action; to induce; as, he was *solicited* to become a candidate for Congress. — To disturb; to disquiet; — a Latinism infrequently used.

"But anxious fears *solicit* my weak breast." — Dryden.

Soliciting, Requesting with earnestness; asking.

Solicitant, (-lis'-, *n.* One who solicits; a petitioner.

Solicitation, (-lî'shun, *n.* [Fr. *solicitation*; Lat. *solicitatio*.] Act of soliciting; urgent or earnest request or petition; importunity; a seeking to obtain something from another with some degree of zeal and eagerness; supplication; as, his *solicitations* were granted. — Invitation; excitement; inducement; as, constant *solicitation* of the senses.

Solicitor, (-lis'-, *n.* [Fr. *soliciteur*.] One who solicits or asks with earnestness or eagerness; one who asks or entreats for another; as, Cupid is Love's *solicitor*.

(*Law.*) A person employed to follow and take charge of suits depending in courts of chancery. A solicitor, like an attorney, will be required to act with perfect good faith towards his clients. It is said that to institute a suit he must have a special authority, although a general authority will be sufficient to defend one.

Solicitor-general, *n.* In England, an officer of the crown, who is associated with the attorney-general in managing the legal business of the crown and government.

Sollicitous, (-lis'it-ûs, *a.* [Lat. *solicitus*.] Inclined to solicit; eager or anxious to obtain, as something desirable; wishful to eschew or avoid, as anything evil or calamitous; careful; concerned; — preceding *for* or *about*; as, she was very *solicitous* about her reputation.

Solic'itously, *adv.* In a solicitous manner; studiously; with care or concern.

Solic'itousness, *n.* Solicitude.

Solic'itress, *a.* A female solicitor.

Solicitude, (sô-lis'e-tûd, *n.* [Fr. *solicitude*; Lat. *solicitudo*.] State of being solicitous; uneasiness of mind; carefulness; concern; anxiety; care; trouble.

Solid, *a.* [Fr. *solide*; Lat. *solidus*.] Hard; firm; compact; having the property of resisting impression and penetration; — in contradistinction to *fluid* and *liquid*; as, a *solid* mass. — Dense; full of matter; not hollow or spongy; as, a *solid* orb in distinction from a *hollow* one. — Cubic; having length, breadth, and thickness; as, a *solid* foot is equal to 1,728 *solid* inches. — Having firmness, compactness, or strength; as, a *solid* wall. — Healthy; sound; robust; strong; not weakly; as, a *solid* constitution of body. (*R.*) — Having reality, soundness, or validity; substantial; weighty; not light, trifling, or superficial; firm; wealthy; not empty or fallacious; as, a *solid* man, a *solid* purpose.

(*Bot.*) Not spongy or hollow within, as a stem; of a fleshy, uniform substance, as a root.

(*Metaph.*) That cannot be penetrated; opposing or excluding any other material, particle, or atom from any given spatial surface; — used in application to the supposed ultimate particles of matter.

Solid angle, (*Geom.*) An angle formed by the meeting in one point of three or more plane angles, which are not in the same plane. This is Euclid's definition. A solid angle may be measured by the area of spherical polygon which it determines on a sphere of unit radius, whose centre is at its vertex. — *Solid measure*, a measure for volumes, wherein the units are severally a cube of fixed line or magnitude, as a cubic foot, yard, &c.; thus, a *solid* foot contains 1,728 inches. — *Solid navel*, (*Arch.*) A navel which receives the ends of the stairs, in distinction from a *hollow navel*. — *Solid problem*, (*Geom.*) A problem admitting of geometrical construction only by the intersection of a circle and a conic section, or of two conic sections. — *Solid square*, (*Mil.*) A body of troops in which the ranks and files are equal.

—*n.* A firm, compact body or substance; a body that offers a sensible resistance to impression and penetration; a substance not *liquid* or *fluid*.

(*Geom.*) A magnitude which has three dimensions — length, breadth, and thickness. The boundaries of solids are *surfaces*, which have only two dimensions — length and breadth; the boundaries of surfaces, again, are *lines* which have but one dimension, length. Lastly, the extremities of lines are *points* which are destitute of all dimensions, and possess position merely.

Solidago, *n.* (*Bot.*) The Golden-rods. A genus of plants, order *Asteraceæ*. They are perennial herbs, very abundant in the U. S.; stem erect, branching near the top; leaves alternate; heads small, with 1-15 small rays; flowers generally yellow, expanding in the autumnal months.

Solidar'ity, *n.* [Fr. *solidarité*, from *solide*.] Fellowship; community; consolidation or identification of interests and responsibilities; — a term borrowed from the French Communists.

Solidifica'tion, *n.* [Fr.] Act of making solid, as in the freezing of water.

Solidify, *v. a.* (*imp.* and *pp.* SOLIDIFIED.) [Fr. *solidifier*; Lat. *solidus*, and *facio*, to make.] To make solid, firm, dense, or compact.

—*v. n.* To harden; to become dense or solid.

Solidism, (-izm, *n.* (*Med.*) In pathology, the doctrine that refers all diseases to an affection of the solid parts of the body. It rests on the view that the solids alone are endowed with vital properties, and can receive the impressions of agents tending to produce disease.

Solidist, *n.* (*Med.*) An advocate, or believer, in solidism.

Solid'ity, *n.* [Fr. *solidité*; Lat. *soliditas*.] State of being solid; density; consistency; compactness; that quality of bodies which resists impression and penetration; — opposed to *fluidity*; fulness of matter; — as in contradistinction to *hollowness*; strength; soundness; antithetical to *weakness* or *instability*. — Moral firmness, as opposed to what is *weak* or *fallacious*; strength; soundness; validity; certainty; truth; reality; as, the *solidity* of principles, arguments, or opinions.

(*Geom.*) Volume; the solid contents of a body.

Solidly, *adv.* In a solid manner; firmly; densely; compactly; truly; on firm grounds.

Solidness, *n.* Quality of being solid, or of being firm, dense, or compact; — said of material bodies. — Strength; soundness; validity; stability; — as of opinions, arguments, and the like.

Solidn'gular, *a.* (*Zool.*) Having hoofs that are not cloven, as a horse.

Solid'ian, *n.* [Lat. *solus*, alone, and *fidus*, faith.] (*Ecol.*) A term sometimes applied to those who maintain that men are justified by faith only without reference to works.

—*a.* Entertaining the tenets of Solidians; pertaining, or having reference, to the Solidians.

Solid'ianism, *n.* The doctrinal tenets of Solidians.

Sol'iform, *a.* [Lat. *sol*, the sun, and *forma*, form.] Resembling the sun in form, aspect, or characteristics. (*R.*)

Solikamsk', a town of European Russia, govt. of Perm, 102 m. N. of Perm; *pop.* 4,500.

Soliloquize, (-kwîz, *v. n.* To utter a soliloquy.

Soliloquy, (sô-lîl'o-kwe, *n.* [Fr. *soliloque*, from Lat. *solus*, alone, only, and *loquor*, to speak.] A speaking or talking to one's self alone; a talking or discourse of a person alone, or not addressed to another person, even when others are present. — A written composition, reciting what is supposed a person speaks to himself, as "The whole poem is a *soliloquy*."

Sol'iman. See SOLYMAN.

Solip'edous, *a.* With hoofs not cloven, as a *solipedous* beast.

Solipeds, *n. pl.* [Fr. *solipède*, from Lat. *solus*, alone, and *pes, pedis*, a foot.] (*Zoöl.*) A tribe of mammals, including those with only a single hoof on each foot, as the horse, ass, &c. — Also called *Solidungulates*.

Solis, ANTONIO DE, (*sol'les*), a Spanish historian and dramatic poet, b. at Placentia, 1610. He became secretary to Philip IV., and afterwards entered into holy orders. He wrote many comedies and poems, but his great work is the *History of the Conquest of Mexico*. D. 1686.

Solis, JUAN DIAZ DE, an ancient Spanish navigator, who, with Pinzon, discovered Yucatan in 1507, explored the Bay of Rio Janeiro in 1512, and learning from the natives that a great river (Paragnaya) existed further along the coast, he set sail for Spain, and obtained the King's permission to make conquests upon its banks. He returned to Rio Janeiro, and proceeding in a S.W. route, landed near a river between Realdonado and Montevideo; but was there killed by the Indians, in 1515.

Solitaire, *n.* [Fr., *solitaire*.] A solitary; a recluse; a hermit. (*R.*) — An ornament for the neck; as, a diamond *solitaire*. — A single jewel in a setting, as of a stone in a ring. — A game wherein one person is the sole player: — specifically, that in which a board, perforated with holes, is used, and a set of pegs one less in number than that of the holes.

(*Zoöl.*) An extinct species of Dodo.

Solitarily, *adv.* [From *solitary*.] In a solitary manner; in solitude; alone; without company.

Solitariness, *n.* State of being solitary or alone; forbearance of company; retirement or habitual seclusion; as, you subject yourself to *solitariness*. — Solitude; loneliness; destitution of society, or of animated beings; — said referentially of places; as, the *solitariness* of a mountain glen.

Solitary, *a.* [Fr. *solitaire*; Lat. *solitarius* — *solus*, alone, only, single.] Being alone; living alone; destitute of company; being by one's self; as, a *solitary* individual. — Lonely; retired; secluded; remote from society or the haunts of men; as, to lead a *solitary* life, as a *solitary* place. — Gloomy; still; dismal; oppressive; as, "Let that night be *solitary*." (*Job* iii. 7.) — Single; sole; individual; as, a *solitary* instance of lack of patriotism.

(*Bot.*) Separate; being one only in a place; as, a *solitary* stipule.

n. A hermit; a recluse; one who lives alone or in solitude; a *solitaire*; as, a *solitary's* cell.

Solitude, *n.* [Fr.; Lat. *solitudo*, from *solus*, alone.] A state of being alone; loneliness; a lonely life; seclusion from the world.

"Solitude sometimes is best society." — Milton.

— Lack of company; remoteness from society or the companionship of men; — said of places; as, "He makes a *solitude*, and calls it — peace." (*Byron*). — A desert; a wilderness; a lonely place; as, "deep *solitudes*, and awful cells." — Pope.

Soliv'agant, **Soliv'agous**, (*-gūs*), *a.* [Lat. *solus*, alone, and *vagans* — *vagus*, wandering.] Wandering alone. (*R.*)

Solle'cito, [It., anxious.] (*Mus.*) A term denoting that the movement to which it is affixed is to be performed in a mournful manner. It also means that the music is to be performed carefully.

Soller, (*sol'laire*), a seaport-town of Spain, in the island of Majorca, 14 m. N. of Palma; pop. 7,000.

Solmization, (*-zū'shun*), *n.* [Fr. *solmisation*.] (*Mus.*) Act of sol-fa'ing.

Solo, *n.*: Eng. *pl.* SOLOS; Lat. *pl.* SOLI. [It., from Lat. *solus*, alone, only, single.] (*Mus.*) A tune, air, or strain, to be played by a single instrument, or sung by a single voice.

Solofra, a town of S. Italy, prov. of Principato-Ultiore, 7 m. E. of Avellino; pop. 6,500.

Solola, in Central America, a town of Guatemala, 85 m. N.W. of Guatemala; pop. abt. 6,000.

Solomon, the most celebrated of all the Kings of Israel, the son of David, and named by God, through the prophet Nathan, *Jedidiah*, or "Beloved of the Lord." About 1015 B. C., by order of David, he was anointed and proclaimed King, and on the death of David soon after ascended the throne. Having punished the enemies of his father and married the King of Egypt's daughter, he formed a strict alliance with Pharaoh. The chief features of Solomon's reign will be found in the *Books of Kings and Chronicles*. His great prosperity and power led, however, to his corruption, and awoke the anger of the Almighty, who threatened to destroy, by disunion and strife, the greatness he had given to the kingdom of Israel. The coming ruin was early foreshadowed by the rebellion and conspiracies which broke out around his throne; and Solomon, conscious of his sins, poured out his contrition in the *Book of Ecclesiastes*. The other works under his name are the *Song of Solomon*, the *Psalms*, from lxxii. to cxxvii., and the *Proverbs*.

Solomon Islands, a chain of islands in the Malay or Indian Archipelago, between New Britain on the N. W. and the Queen Charlotte Islands on the S. E.; Lat. 4° 50'–11° 50' S. Area, 10,000 sq. m. The natives are partly Negritos, partly Malays, and are still in the condition of savages. Pop. Unascertained.

Solomon's Fork, a river of Kansas, rises in the N. W. part of the State, and flows into the Smoky Hill Fork on the E. border of Saline co., after a S.W. course of 200 m.

Solomon's Seal, *n.* (*Bot.*) See POLYGONATUM.

Solon, one of the seven sages of Greece, and the celebrated legislator of Athens, b. at Salamis, in the 7th cent. B. C. After having enhanced the glory of his country by recovering Salamis, he was chosen archon B. C. 594, and having received full power to do whatever

he judged needful, he set himself to the task of improving the condition of his countrymen. He abolished most of the cruel laws of Draco, and formed a new constitution, founded on the principle of making property, not birth, the title to the honors and offices of the state. He made many special laws also relating to trade and commerce, marriage, disposition of property by will, &c., caused them to be engraved on wooden cylinders, and is said to have bound the Athenians by an oath not to make any changes in his code for ten years. He then left the country, to avoid being obliged to make any alteration in them, and visited Egypt, Cyprus, and Lydia. The beautiful story of his visit to the court of Croesus, so celebrated in ancient times, is now numbered with other beautiful myths which can only be admired, not believed. On his return, after an absence of ten years, he found the state torn by party violence, and his kinsman Pisistratus aiming at the sovereignty, which he soon seized. S. then withdrew from public life, and is supposed to have D. at the age of 80, about B. C. 558.

Solon, in Iowa, a post-town of Johnson co., 12 m. N.E. of Iowa City.

Solon, in Maine, a post-village and township of Somerset co., 45 m. N. of Augusta.

Solon, in Michigan, a township of Kent county.

Solon, in New York, a post-township of Cortland co., 25 m. S.E. of Syracuse.

Solon, in Ohio, a post-township of Cuyahoga county.

Solon Mills, in Illinois, a post-village of McHenry co., 55 m. N.N.W. of Chicago.

Solor, an island of the Eastern Archipelago, off the E. extremity of Flores; Lat. 8° 47' S., Lon. 123° 8' E. Ext. 30 m. long and 15 broad.

Solothurn, a canton of Switzerland. See SOLEURE.

Solstice, (*sol'z'is*), *n.* [Fr.; Lat. *solstitium* — *sol*, the sun, and *sisto*, to stand.] (*Astron.*) The time when the sun is in one of the solstitial points — that is, when it is at its greatest distance from the equator — and is so called because he then appears to stand still, and not to change his distance from the equator for some time. There are two solstices in each year, — the summer and the winter S. The former is when the sun seems to enter the tropic of Cancer, which is on June 22d, the longest day; the latter S. is when the sun enters the first degree, or seems to describe the tropic of Capricorn, which is on December 22d, the shortest day. This is only to be understood of the northern hemisphere as in the southern — the sun's entrance into Capricorn makes the summer S., and into Cancer the winter S.

Solstitial, (*-stish'al*), *a.* Pertaining, or relating, to a solstice; as, the equinoctial and *solstitial* points. — Happening at a solstice — usually at the summer solstice or mid-summer; as, *solstitial* heat.

Sols, a town of Hungary, 48 m. S. of Pesth, in a marshy district on a branch of the Danube; pop. 7,430.

Solubility, **Solubleness**, *n.* [Fr. *solubilité*.] Quality of being soluble; susceptibility of being dissolved in a fluid; — said of a body; solubleness.

(*Bot.*) Susceptibility of being easily separated into parts, as of certain legumes.

Soluble, *a.* [Fr., from Lat. *solubilis* — *solvo*, to loosen, dissolve.] Dissolvable; capable of solution; susceptible of being dissolved in a fluid; as, a *soluble* substance.

Solus, *a.* [Lat.] Alone; — principally used in stage directions.

Solute, *a.* [Lat. *solutus* — *solvere*, to dissolve.] Soluble; dissolvable; as, a *solute* salt. — Relaxed; — hence, jocund; lively; merry; as, a *solute* brow.

(*Bot.*) Loose; slack; not adhering; — correlative to *adnate*; as, a *solute* stipule.

v. a. [Lat. *solvere, solutum*.] To dissolve. — To absolve.

Solution, (*-loo'shun*), *n.* [Fr.; Lat. *solutio*, from *solvo*.] A loosing or taking apart; a dissolving; act of separating the part of any body; breach; disruption; as, *solution* of continuity. — Bacon.

(*Chem.*) If a liquid be poured on a solid, it often happens that their mutual attraction is sufficiently powerful to overcome the cohesion of the solid; its particles, thus become disunited, combine with those of the liquid, and entirely disappear; this constitutes the chemical process of S. Certain liquids are also soluble in other liquids, gases in other gases, and gases in liquids. In the case of the S. of a solid in a liquid, the latter is usually called the *solvent*, but sometimes the *menstruum*. Particular S. have also particular names; thus, a S. of sugar is called a *syrup*, and S. of a solid in alcohol a *tincture*. A liquid is said to be saturated when it can no longer dissolve further portions of a solid, that is, when the force of cohesion is exactly equal to that of adhesion. In most cases, however, an increase of temperature, by diminishing the cohesion, increases the solvent powers of the liquid. The uses of solution are many; through its means a body can be purified by filtration or crystallization, so that one substance can be separated from another, either by crystallization or the use of such fluids in succession as have a solvent power over any of the substances present.

(*Med.*) A crisis; termination of a disease, sometimes attended by critical signs.

(*Math.*) The construction of a proposed problem, or the expression of its conditions by an equation which gives the value of the unknown quantity.

Solutive, *a.* [Fr. *solutif*.] Loosening; slackening; laxative; having a tendency to dissolve; as, a *solutive* medicine.

Solvability, *n.* [Fr. *solvabilité*.] State or quality of being solvable; ability to discharge all just debts.

Solvable, *a.* [Fr., from Lat. *solvere*.] That may be

solved, resolved, or explained; as, a *solvable* problem. — That can be paid; as, a *solvable* debt or obligation.

Solv'ableness, *n.* Solvability.

Solve, *v. a.* [Lat. *solvo*.] To loosen or separate, as the parts of anything; to diffuse. — To give an explanation of; to unite, as an intellectual knot or entanglement; to explain; to clear; to resolve; to untold; as, to *solve* a difficulty or an enigma. — To do away with; to dissipate; as, to *solve* a doubt.

Solvency, (*sol'ven-sē*), *n.* [From Lat. *solvens*.] State of being solvent; ability to pay all just debts or claims; as, the *solvency* of a merchant or trader.

Solv'end, *n.* [Lat. *solvendus-um*.] (*Chem.*) See SOLUTION.

Solv'ent, *a.* [Lat. *solvens*.] Having the power of loosening or dissolving; as, a *solvent* liquid. — Competent to pay all just debts or claims; as, a *solvent* banker. — Having enough to satisfy all just debts or legal demands; as, the concern is *solvent*.

n. That which solves or dissolves; — specifically, a fluid that dissolves any substance, or in which a solution is effected; — also called *menstruum*.

Solver, *n.* One who solves, elucidates, or explains.

Solvay Frith, a navigable arm of the sea, extending E. from the Irish Sea, and forming a part of the boundary of England and Scotland. It runs 40 m. inland, and is 24 m. wide at its widest part.

Solvay Moss, (*Eng. Hist.*) The Scotch, to the number of 10,000, were routed at this place, in Cumberland, by a small body of English horse, not more than 300 in number, under Dacre and Musgrave, Nov. 25, 1542, and more than 1,000 prisoners were taken.

Solyman I., or SULEYMAN (*the Noble*), Emperor of Turkey, was proclaimed emperor after the defeat and capture of his father, Bajazet, by Timour, 1402. He was dethroned by his brother, Mousa, during a revolt of his subjects, and soon after killed, 1410.

SOLYMAN II., surnamed the *Magnificent*, B. 1493, succeeded his father, Selim I., in 1520. Having concluded a truce with Ismael, sopher of Persia, and quelled a rebellion in Syria, he turned his arms against Europe. In 1521, he took Belgrade; and in the following year Rhodes fell into his hands, after an obstinate defence. In 1529, he made himself master of Buda, and then laid siege to Vienna, whence he was obliged to retreat, with the loss of 120,000 men. In 1534, he marched into the East, and took Tauris from the Persians, but was soon afterwards defeated by the Shah. His forces were also repulsed before Malta; but he took the Isle of Chios in 1566. He was a poet, legislator, and warrior of eminent greatness for an Oriental. He encouraged arts and literature, made roads, bridges, erected noble mosques and public buildings, and superintended the compilation of an administrative code. D. at Szigeth, Hungary, 1566.

SOLYMAN III., became sultan upon the deposition of his brother, Mahomet IV., in 1687. His life had been spent up to his 49th year, in the seraglio, where he had devoted himself to the study of the Koran. Under his weak rule, the Turks were defeated in Hungary and in Servia. D. at Constantinople, 1691.

Somat'ria, *n.* (*Zoöl.*) The Eider, a genus of birds, family *Anatidæ*. The Eider-duck, *S. mollissima*, of the Atlantic and Arctic coasts, is 26 inches long, the wing about 11; prevailing color white; under parts, rump, tail, quills, and stripe above the eye, black. It is an

Fig. 2395. — EIDER-DUCK, (*Somat'ria mollissima*.)

expert diver, often going down in search of food eight or ten fathoms. The celebrated eider-down is obtained from the nest of this species, the birds having plucked it from their breasts to place around their eggs.

Somatology, (*-jī*), *n.* [From Gr. *sōma*, *sōmatos*, the body, and *logos*, speech.] The doctrine of the general properties of bodies or material substances.

Somatotomy, *n.* [Gr. *sōma*, *sōmatos*, the body, and *tomē*, a cutting.] Anatomy.

Sombre, (*som'b'r*), *a.* [Fr., from Lat. *umbra*, a shade or shadow by prefixing *s*; L. Lat. *sumbra*.] Shady; dark; dull; dusky; gloomy; grave; as, a *sombre* costume.

Som'b'rely, **Som'b'rously**, *adv.* In a *sombre* manner; gloomily; gravely.

Som'b'reness, **Som'b'rousness**, *n.* State of being *sombre*; shadiness; gloominess; darkness; as, *som'b'reness* of countenance.

Som'brerite, *n.* (*Min.*) A new mineral (a phosphate of alumina and lime), remarkable for the large amount of phosphoric acid which it contains. It forms a large portion of some small islands in the West Indies, especially of Sombrero Islands, about 60 miles from St.

Thomas.—*S* has been used for the preparation of phosphorous and phosphoric acid, and also for the manufacture of artificial manure (superphosphate of lime) for agricultural purposes.

Sombrero, (*som-brá'ro*), *n.* [Sp., from *sombra*, shade.] A hat;—especially, a broad-brimmed hat.

Sombro'ro, one of the British W. Indies Islands, between Anguilla and the Virgins Islands; Lat. 18° 35' N., Lon. 53° 27' W.

Som'brons, *a.* Sombre; gloomy; downcast.

Some, (*sūm*), [A. S. *sum*.] A termination of sundry adjectives having primarily the sense of *same* or *like*, and in usage denoting a considerable degree of the thing of quality; as, frolicsome, full of frolic, lonesome, very lonely, blithesome, gamesome, mettlesome, haudsome, fulsome, &c.

—*a.* [A. S. *sum*, *som*.] Noting a number of persons or things, greater or less, but indeterminate; as, let me help you to *some* wine, he told it to *some* people;—also employed pronominally; as, she has *some*.

—Noting a certain quantity of a thing, but indeterminate; indicating a person or thing, but not known, or not specific or definite; as, *some* one says you intend to get married, that event must occur at *some* period. —A portion.—Noting indeterminately that a thing is not very great; moderate; partial; a little; not much; as, he found himself in *some* degree compromised. —About; not far from; near; more or less; as, a crowd of *some* thirty persons, a distance of *some* hundred miles. —Considerable in extent, number, or quantity; as, *some* miles away. —Certain; those belonging to one part or portion;—as distinguished from *others*; as, *some* folks are simple enough for anything, while *others* are not. —A part; a portion; a share; employed in the premonial sense, and in certain cases preceding *of*; as, he gave me *some* of his money.

(NOTE. Among illiterate people, the word *some* is often used adverbially in the U. States, instead of *somehow*; as, he is *some* sick, it freezes *some*, &c.)

Somebody, (*sūm'-*), *n.* [Some and *body*.] A person unknown or uncertain; a person indeterminate; as, he is sure to offend *somebody*. —A person of mark, eminence, consideration, or distinction;—opposed to *nobody*; as, he thinks himself *somebody*.

Somehow, (*sūm'-*), *adv.* [Some and *how*.] One way or another; in some way not yet determined; as, I must go home *somehow*.

Somerford, in Ohio, a village and township of Madison co., 27 m. W. of Columbus.

Somers, in Connecticut, a post-village and township of Tolland co., 23 m. N.E. of Hartford.

Somers, in New York, a post-village and township of Westchester co., 110 m. S. of Albany.

Somers, in Ohio, a twp. of Preble co.

Somers, in Wisconsin, a township of Kenosha county.

Somersault, **Somers**, (*sūm'-*), *n.* [From Lat. *supra*, over, and *sultus*, a leap.] A leap or bound in which a person turns with his heels over his head and lights on his feet;—also written *summersault* and *summerset*.

Somerset, a marit. co. of England, having N. and N. W. the British Channel, the Severn, and the co. of Gloucester, E. Wilts, S. Dorset and Devon, and W. Devon; area, 1,645 sq. m. The surface is very diversified, but generally fertile. *Rivers*, Lower Avon, Ax, Brue, Parret, and Exe. *Prod.* Wheat, oats, barley, and beans. Cattle are extensively raised. *Min.* Lead, calcimine, and coal. *Manuf.* Woollens, silks, gloves, linens, hosiery, glass, paper, iron-ware, leather, &c. *Chief towns*, Bath, Wells, Bridgewater, Taunton, Freme, Glastonburg, and part of Bristol. *Pop.* (1897) 521,140.

Somerset, in Indiana, a post-village of Wabash co., 10 m. S. of Wabash.

Somerset, in Kentucky, a city, cap. of Pulaski co., 90 m. S. of Frankfort. *Pop.* (1897) 2,820.

Somerset, in Maine, a N. N. W. co., bordering on Lower Canada; area, 3,510 sq. m. *Rivers*, Kennebec, Penobscot, and St. John. *Surface*, diversified; *soil*, generally fertile. *Products*, Wheat and oats. *Cap.* Skowhegan. *Pop.* (1897) 33,150.

Somerset, in Maryland, a S. E. co., bordering on Delaware; area, 365 sq. m. *Rivers*, Nanticoke, Pocomoke, Wicomico, and Manokin. *Surface*, level and partly covered with oak, hickory, chestnut, and other trees; *soil*, generally fertile. *Cap.* Princess Anne. *Pop.* (1897) 25,210.

Somerset, in Massachusetts, a post-village and twp. of Bristol co., 50 m. S. W. of Boston.

Somerset, in Michigan, a post-township of Hillsdale co.

Somerset, in Minnesota, a post-village and township of Steele co., 25 m. S. of Faribault.

Somerset, in Missouri, a village and township of Mercer co., 60 m. N. W. of La Cade.

Somerset, in New Jersey, a N. central co.; area, 370 sq. m. *Rivers*, Lamington, Millstone, Passaic, and Raritan. *Surface*, mountainous in the N. W., but elsewhere level; *soil*, generally fertile. *Min.* Copper and gold. *Cap.* Somerville.

Somerset, in New York, a post-township of Niagara co.

Somerset, in Ohio, a township of Belmont county. —A post-village of Perry county, 20 miles W. S. W. of Zanesville.

Somerset, in Pennsylvania, a S. co., bordering on Maryland; area, 1,050 sq. m. *Rivers*, Castleman's River, and Laurel Hill and Stony creeks. *Surface*, diversified; *soil*, adapted to pasturage. *Min.* Coal and iron. *Cap.* Somerset. *Pop.* (1897) 40,140.—A post-borough and township, cap. of the above co., 70 m. E. S. E. of Pitts-

burg, a township of Washington co., 24 m. S. W. of Pittsburg.

Somerset, in Vermont, a township of Windham co., 100 m. S. W. of Concord.

Somerset, in Wisconsin, a post-village and township of St. Croix co., 11 m. N. N. E. of Hindson.

Somerset, a division of Cape Colony, S. Africa, between Lat. 30° 20' and 33° 25' S., Lon. 25° 12' and 26° 45' E.; area, 4,000 sq. m. *Cap.* Somerset.

Somerset Mills, in Maine, a post-village of Somerset co., 22 m. N. of Augusta.

Somerset, (North), an Island of British N. America, at the entrance of the Gulf of Boothia, between Lat. 72° and 74° 30' N., Lon. 91° and 96° W.

Somerset Point, in New Jersey, a post-village of Atlantic co., 12 m. S. E. of May's Landing.

Somersetville, in California, a post-village of Contra Costa co., 18 m. E. of Martinez.

Somersetworth, in New Hampshire, a township of Strafford co., 30 m. E. S. E. of Concord.

Somerton, in Ohio, a post-village of Belmont co., 107 m. E. of Columbus.

Somerton, in Virginia, a village of Nansemond co., 100 m. S. E. of Richmond.

Somerville, in Alabama, a post-village, cap. of Morgan co., 12 m. N. N. E. of Tuscaloosa.

Somerville, in Connecticut, a post-village of Tolland co., 22 m. N. E. of Hartford.

Somerville, in Maine, a post-township of Lincoln co., 16 m. E. of Augusta.

Somerville, in Massachusetts, a city and suburb of Boston, in Middlesex co., 3 m. N. W. of Boston. *Pop.* (1895) 52,200.

Somerville, in New Jersey, a post-borough, cap. of Somerset co., 30 m. N. N. E. of Trenton.

Somerville, in New York, a post-village of St. Lawrence co., 175 m. N. W. of Albany.

Somerville, in Ohio, a post-village of Butler co., 14 m. N. N. W. of Hamilton.

Somerville, in Tennessee, a post-town, cap. of Fayette co., 43 m. E. of Memphis.

Somerville, in Virginia, a post-village of Fauquier co., 85 m. N. W. of Richmond.

Somerville, (*Min.*) A variety of melilite, of a dull-yellow color, found in the older ejected lavas on Vesuvius, associated with black mica, &c.

Something, (*sūm'-*), *n.* A thing unknown, indefinite, or not specified; an indeterminate or unknown event; as, *something* will turn up, there is *something* the matter with him. —A part; a portion more or less; a little; an indefinite quantity, degree, or distance; as, "Still from his little he could *something* spare."—*Pope*.

—*adv.* Somewhat; in some degree; as, there is *something* too much of assurance in him. —At a short distance; not far from; as, "It must be done to-night, and *something* from the palace."—*Shaks.*

Some'time, *adv.* Once; formerly; at a past time indefinitely made reference to; as, the *some'time* President of the so-called Southern Confederacy. —At one time or other yet to come; as, I expect to be back in England *some'time*.

—*a.* Former; quondam; having been formerly; as, "Good *some'time* queen, prepare thee hence for France."—*Shaks.*

Some'times, *adv.* At some, or certain times; occasionally; at intervals; now and then; not always; as, he keeps sober *sometimes*. —At one time;—in distinction from *another time*; as, *sometimes* the one and *sometimes* the other.

Somewhat, (*sūm'hvot*), *a.* Something, though uncertain what; more or less; a certain quantity or degree, indeterminate; a part, greater or less; as, *somewhat* of his fortune will have been expended in the speculation.

—*adv.* In some degree or quantity; as, I feel *somewhat* indisposed.

Somewhere, (*sūm'hvair*), *a.* [some and *where*.] In some place unknown or not specified; in one place or another; as, I have put it *somewhere*;—frequently vulgarized into *somewheres*.

Somewhither, (*sūm-*), *adv.* To some indeterminate place.

Somidon'ro, in Brazil, a village of the prov. of Minas Geraes, 12 m. E. S. E. of Mariana; *pop.* 2,500.

Somma, a town of S. Italy, at the base of Mount Vesuvius, 9 m. E. of Naples; *pop.* 8,400.

Somma Paz, a mountain-range of Venezuela, extending from the Magdalena, in the U. S. of Colombia, to the city of Valencia, E. of Lake Maracaibo.

Somme, (*som*), a river of France, rising in the dept. of Aisne, and after a N. W. course of 120 m. flows into the English Channel, between Crotzy and St. Valery.

Somme, a maritime dept. in the N. of France, between Lat. 49° 37' and 50° 20' N., Lon. 1° 25' and 30° 10' E., having N. the dept. of Pas-de-Calais, E. Aisne, S. Oise, and W. Seine-Inférieure and the English Channel; area, 2,378 sq. m. It is generally level and fertile. *Rivers*, Somme, Avre, and Oise. *Prod.* Corn, hemp, hops, flax, and vegetables. *Manuf.* Woollen, cotton, and silken goods, thread, leather, hardware, machinery, paper, and beet-root sugar. *Chief towns*, Amiens, the cap., Abbeville, Doullens, Montdidier, and Peronne. *Pop.* 572,640.

Sommeil, (*sūm-mā'e*), *n.* [Fr.] Sleep; slumber; repose.

(*Mus.*) An air of the old serious operas of the French;—so called because these airs were calculated to tranquillize the feelings, and lull even to drowsiness.

Som'men, a lake of Sweden, 15 m. E. of Lake Wetter. *Ext.* 25 m. long and 8 broad.

Sommeères, (*sūm-me-air*), a town of France, dept. of Gard, 14 m. from Nîmes; *pop.* 4,000.

Somnambulism, (*n.*) [From Lat. *somnus*, sleep, and *ambulo*—*ambulat*, to walk.] Act of walking in sleep.

Somnam'bulator, *n.* A somnambulist.

Somnam'bulie, *a.* Somnambulistic.

Somnam'bulism, *n.* [Lat. *somnus*, sleep, and *ambulo*, to walk about.] (*Physiol.*) Literally, the act or practice of walking in sleep; but, in a wider and more usual sense, that state of sleep or unconsciousness in which the mind retains its power over the limbs, but has no influence over its own thoughts. The controlling power of the will over the current of thought is entirely suspended, all the actions being directly prompted by the ideas which possess the mind. In some cases there is a coherent sequence in the succession of ideas, through which some one dominant impression may be traced, while in other instances it is more or less completely determinable by external suggestions. Among the various curious phenomena connected with this state, not the least remarkable is the peculiar power which suggestions derived from the muscular sense have in determining the current of thought. Thus, if the face, body, or limbs be brought into an attitude that is expressive of any particular emotion, the corresponding mental state is called up in correspondence to it; as, for instance, if the angles of the mouth be gently separated from one another, as in laughter, a hilarious disposition is immediately generated; and this may be made to give place to moroseness by drawing the eyebrows towards each other, and downwards upon the nose, as in frowning. In *S.* proper, the individual gets out of bed, dresses himself, if not prevented; goes out of doors; walks frequently over dangerous places in safety; sometimes escapes by a window, and gets to the roof of a house; after a considerable interval returns, and goes to bed; and all that has passed conveys to his mind merely the impression of a dream. Frequently, during the paroxysm, the individual recollects circumstances which occurred during a previous attack, though there was no remembrance of them during the interval. It is unnecessary to speculate regarding the nature and cause of phenomena so obscure and so little understood. The same observations may apply to clairvoyance, or that state of mesmeric *S.* that in certain cases is said to enable its possessor to see absent objects, to know of things which he has never seen, and other phenomena of a not less extraordinary character. According to the actual state of scientific observation, neither magnetic influence or nervous fluid passes from the operator to the person operated on; in which case clairvoyance would be simply an effect of delusion. Thus, when we see science so far powerless to explain the common phenomena of ordinary *S.*, we see no sound reason for declaring that mesmeric *S.* has no real foundation whatever.

Somnam'bulist, *n.* [Fr. *somnambule*.] One who walks in his sleep; a noctambulist.

Somnambulistic, *a.* Pertaining, or relating, to somnambulism.

Som'nial, *a.* Pertaining or having reference to, or involving, sleep.

Som'niative, *a.* Pertaining or relating to, or causing, dreams. (*R.*)

Somniferous, *a.* Bringing, causing, or inducing sleep; soporific; as, *somniferous* influence.

Somnific, *a.* Causing, influencing, or tending to induce sleep.

Somniloquence, (*-kwens*), *n.* Act of talking in sleep.

Somniloquism, (*-kwizm*), *n.* Same as *SOMNILOQUY*, *q. v.*

Somniloquist, (*-kwist*), *n.* One who talks in his sleep.

Somniloquous, (*-kwis*), *a.* Apt to talk in sleep.

Somniloquy, (*-kwé*), *n.* A talking or speaking in sleep.

Somnipathist, *n.* A person in a state of somniphathy.

Somniphathy, **Somnopathy**, *n.* [From Lat. *somnus*, sleep, and Gr. *pathos*, physical suffering.] Sympathetic sleep, or slumber induced by mesmeric process.

Somnolence, **Somnolency**, *n.* [Fr. *somnolence*.] Sleepiness; drowsiness; disposition or aptness to sleep.

(*Med.*) A state intermediate between sleeping and waking.

Somnolent, *a.* [Fr.] Sleepy; drowsy.

Somnolently, *adv.* In a somnolent manner.

Som'nus, (*Myth.*) The son of Erebus and Nox, and one of the infernal deities, who presided over sleep. According to Hesiod, his palace is a dark cave, where the sun never penetrates. At the entrance are a number of poppies and somniferous herbs. The god himself is represented as asleep on a bed of feathers, with black curtains. The Dreams stand by him, and Morpheus, as his principal minister, guards his slumbers from interruption.

Somonank', in Illinois, a post-village of De Kalb co., 55 m. S. W. of Chicago.

Son, (*sūn*), *n.* [A. S. *suna*; Ger. *sohn*.] A male child; the male issue of a parent, father or mother. —A male descendant, however remote;—hence, plurally, descendants in general; as, a son of Adam. —Style of address of an old man to a young one, or of a confessor to his penitent; a term of affection; a pupil; an adopted child; as, approach, my son. —A native or inhabitant of some specified place or country; as, a son of America. —The produce of a thing; as, trees are the sons of the forest. —Jesus Christ, the Saviour—styled the Son of God, and the Son of Man.

Son of Belial, a Hebraism for child of the Devil.

Sonant, *a.* [Lat. *sonans*, from *sonare*, to sound.] Sounding; pertaining, or having reference, to sound.

(*Phon.*) Spoken with intonated or resonant breath; made with sound, instead of breath alone; vocal; not surd;—applied to certain articulations of alphabetical sounds, as the vowels, semi-vowels, and nasals, and of *b, z, &c.*, compared with *f, p, s, &c.*, which are *aspirate*, or *surd*.

Sona'ta, *n.* [It., from *sonare*, to sound.] (*Mus.*) An instrumental composition, usually containing three movements, an allegro, a slow movement, and a rondo. Modern *S.* are generally for one or two instruments only, as for the piano-forte, or for the piano and violin.

Son'chus, *n.* (*Bot.*) The Sow-thistle, a gen. of plants, order *Asteraceæ*, having an imbricated involucre, swollen at the base, with two rows of unequal scales, which at length bend inwards; a naked receptacle; the fruit transversely wrinkled and without a beak; the pappus hairy and without a stalk. The common Sow-thistle, *S. oleraceus*, is a native of Europe, but naturalized in waste grounds. It is an annual plant, grows to the height of two or three feet, with somewhat branching stem, and small yellow flowers almost in umbels. The tender tops and leaves are sometimes used as greens.

Son'derbund, *n.* (*Hist.*) A name given to the league formed in 1846 by the seven Roman Catholic cantons of Switzerland against the Federal Diet, which had decreed the expulsion of the Jesuits. The Diet voted the *S.* illegal, July 20, 1847. Freiburg, their stronghold, was captured Nov. 13, Lucerne Nov. 24, and the *S.* was dissolved.

Sondershausen, a town of Central Germany, cap. of the principality of Schwartzburg-Sondershausen, 14 m. N. of Erfurt; *pop.* 5,590.

Sone, a river of British India, a tributary of the Ganges, which it joins 25 m. W. of Patua, after a N.E. course of 465 m.

Song, *n.* [A. S. *sang*; Du. *zang*, *gezang*; Ger. *gesang*.] That which is sung or uttered with musical modulations of the voice, whether of the human voice or that of a bird. — A little poem to be sung or uttered with musical modulations; a ballad; a canticle; a ditty; as, a love song, a bacchanalian song. — A lay; a hymn; a strain; a poem; as, "The stretched metre of some antique song." (*Shaks.*) — Poetry; poetical composition; bardic effusions; poesy. — A bagatelle; a mere trifle; you shall have it for a song.

Old song, a trifle; a thing of little or merely nominal value or importance; as, "I do not intend to be thus put off with an old song." — Sir T. More's *Utopia*.

Song of Solomon. (*Script.*) This beautiful poem, called also the *Canticles* and *Song of Songs*, and attributed to Solomon, has always held a place in the canonical Scriptures, and of course was a part of the Bible in the time of Christ; it was so regarded by the early Christians, and appears in the ancient catalogues, manuscripts, and versions. Numerous and very different opinions have been held as to the subject and plan of this poem.

Song'-craft, *n.* Art of lyrical composition; vocation for making songs, ballads, or verses.

Song'ful, *a.* Inclined to sing; melodious; full of song; as, *songful* souls.

Song'less, *a.* Without song; lacking the power of song; as, a *songless* bird.

Song'ster, *n.* [*Song*, and A. S. *steora*, a pilot, steersman.] A singer; one who sings; one skilled in vocal harmony; — seldom applied to men and women, and then only in slight contempt. — A singing-bird; as, "The pretty songsters of the spring." — *Hewel*.

Song'stress, *n.* A female singer.

Soniferous, *a.* [Lat. *sonus*, sound, and *ferre*, to bear.] Sounding; bringing or producing sound.

Son'-in-law, *n.*; *pl.* SONS-IN-LAW. A man who is the husband of one's daughter.

Son'less, *a.* Without a son.

Son'neburg, a town of Prussia, prov. of Brandenburg, 11 m. N.E. of Cüstrin. *Manuf.* Woollen goods. *Pop.* 5,600.

Son'neberg, a town of Germany, in Saxe-Meiningen, 12 m. N.E. of Coburg. *Manuf.* Toys and musical instruments. *Pop.* 4,000.

Son'net, *n.* [Fr.; It. *sonetto*, from Lat. *sonus*, sound.] (*Poetry.*) A species of poetic composition first brought into notice by Petrarch, and consisting properly of fourteen iambic verses of eleven syllables. It is divided into two chief parts, each consisting of two divisions, — in the former, each comprising four lines (*quadrain*); in the latter, three (*terzina*). The quadrains have two rhymes, each of which is repeated four times; and in the common Italian form the rhymes are the first, fourth, fifth, and eighth verses, and the second, third, sixth, and seventh; but several other forms are also adopted. In the two *terzine*, there are either three rhymes each twice repeated, or two rhymes thrice repeated in all positions. The *S.* generally contains one principal idea pursued through the various antitheses of the different strophes, and adorned with the charm of rhyme. Italy and Spain are the countries in which the *S.* is most cultivated, the lightness and flexibility of their languages being eminently suited for such compositions.

Sonnetteer, *n.* [It. *sonettiere*.] A composer of sonnets or short poems; a small poet; — generally in a contemptuous sense.

Sono'ma, in California, a W. co., bordering on the Pacific Ocean; *area*, 1,500 sq. m. *Rivers*, Russian and Guadalupe; also, Sonoma, Santa Rosa, and Petaluma creeks. *Surface*, diversified; *soil*, fertile. *Prod.* Wheat, barley, potatoes, cattle, butter, and wine. *Cap.* Santa Rosa. *Pop.* abt. 30,000. — A post-town, port of entry, and township of the above co., abt. 50 m. N. of San Francisco.

Sono'ma Creek, in California, enters San Pablo Bay.

Sonoma'ite, *n.* (*Min.*) A hydrous sulphate of aluminum and magnesium.

Sonom'eter, *n.* [From Lat. *sonus*, a sound, and *metron*, measure.] An apparatus by which the transverse vibrations of strings may be studied. It is also called *monochord*, because it has generally only one string.

— An instrument, consisting of a small bell fixed upon a table, for testing the efficacy of treatment for deafness.

Sono'ra, in Mexico, a N.W. state, bordering on Arizona and the Gulf of California; *area*, 124,466 sq. m. *Rivers*,

Mayo, Yaqui, Rio Grande de Bavispe, Oposura. Sonora, Dolores, Guaymas, San Ignacio, Gila, and Colorado. *Surface*, mountainous in the E., and flat in the S. and W.; *soil*, generally fertile. The wealth of the state is not in its agricultural capabilities, but in its mineral treasures, which are considered inexhaustible. "Hardly a village or grazing estate," writes a recent traveller, "but can show some vein of gold, silver, lead, or copper;" and he thinks that, in all probability, "not a fourth of its existing metallic wealth is known, while not a moiety of that has been or is being developed." *Cap. Ures*. *Pop.* 147,133. — A river of the above state, flows W.S.W., and enters an inland lake in Lat. 29° 30' N., Lon. 111° W. — A town of the above state, on Sonora River, 35 m. S. of Arispe; *pop.* abt. 9,000.

Sono'ra, in California, a pass of the Sierra Nevada, in Alpine co., Lat. 38° 15' N., said to be 10,000 feet above the sea. — A post-town, cap. of Tuolumne co., 50 m. E. of Stockton.

Sonora, in Illinois, a post-township of Hancock co., 12 m. N.W. of Warsaw.

Sonora, or SONOMA, in Missouri, a village of Atchison co., 70 m. N.W. of St. Joseph.

Sonora, in New York, a post-village of Steuben co., 8 m. S.E. of Bath.

Sonora, in Ohio, a post-village of Muskingum co., 7 m. N.E. of Zanesville.

Sonora, or W. SONORA, in Ohio, a post-village of Preble co., 21 m. W.N.W. of Dayton.

Sonorific, *a.* [From Lat. *sonor*, *sonoris*, and *facere*, to make.] Yielding or producing sound.

Sonor'ity, *n.* A rare synonym for SONOROUSNESS, *q. v.*

Sonorous, *a.* Sounding; giving sound when struck, as metals. — Giving a clear or loud sound; as, a *sonorous* voice. — Yielding sound; sonant; vocal; characterized by sound, as vowels. — High-sounding; characterized by magnificence of sound; as, *sonorous* music, *sonorous* language.

Sonorously, *adv.* In a sonorous or sonant manner.

Sonorousness, *n.* Quality of being sonorous; quality of yielding sound when struck, or coming in collision with another body; having or giving a loud or clear sound; magnificence of sound; as, the *sonorousness* of a voice or an instrument.

Son'ship, *n.* State of being a son, or of having the relation of a son. — Filiation; character of a son.

Sonson', a town of the U. S. of Colombia, dept. of Cundinamarca, 75 m. S.E. of Antioquia.

Sonsona'te, in Central America, a town of San Salvador, 50 m. W.S.W. of San Salvador; *pop.* abt. 11,000.

Son'tag, HENRIETTA, one of the most distinguished singers of her time, b. at Coblenz, 1805. Sprung from a theatrical family, Henrietta was the favorite prima donna of the Berlin stage before she was eighteen. She soon rose to the foremost place among European vocalists. In Paris, where she went in 1828, and afterwards in London, her youth and beauty, her fresh and lovely voice, and the high, finished, exquisite purity of her style, produced universal delight. About 1830, she married Count Rossi, a Piedmontese nobleman, and left the theatre. Her virtues, her manners, and her accomplishments, made her everywhere acceptable in the highest circles. But she never lost her love for her art, and continued to make progress as an artist in the midst of all the enjoyments of high life. After a happy union of nearly twenty years, her husband became involved in the political troubles of 1848, and lost his fortune. Without hesitation she resolved to have recourse to her art for the sake of her husband and her children. She sang for several seasons in Europe, and came to the U. States in 1852. After a brilliant and successful tour through the Union, she accepted a tempting offer from Mexico, where she was cut off by cholera, in 1854, while preparing for her first appearance before the public.

Soo'der, *Soo'dra*, *n.* Same as SUDRA, *q. v.*

Soo'-fee, *n.* Same as SOFI, *q. v.*

Sooloo' Isles, a group of the E. Archipelago, extending from the N.E. part of Borneo to Mindanao, the most S. of the Philippine Islands, between Lat. 4° and 7° N., Lon. 120° and 123° E. They take their name from *Sooloo*, the largest of the group, in Lat. 6° N., Lon. 120° E. They are generally fertile, and produce rice, teak, sago, and a variety of fruits. The inhab. are of the Malay race, are under the rule of the Sultan of Sooloo, and notorious for piracy. In 1851 Spain sent an expedition against them, and in 1881, she compelled the Sultan to recognize the protectorate of Spain over the Archipelago. *P.* abt. 120,000.

Soon, *adv.* [A. S. *sona*.] In a short time; shortly; shortly after time specified or supposed; as, *soon* after Christmas. — Early; betimes; before any time specified or supposed; without the usual delay or interval of time; as, why did you come so *soon*? — Readily; willingly; quickly; promptly; — in this sense associated with *would*, or some other term synonymous with *will*; as, I *would* as *soon* die as see my country dishonored.

As *soon* as, so *soon* as, immediately upon or after another event; as, as *soon* as you are ready we will start.

Soon'da, a town of British India, presidency of Bombay, 55 m. S.W. of Dharwar; Lat. 14° 34' N., Lon. 74° 58' E.

Soor'ma, *n.* A preparation of antimony, used by Hindoo women to anoint their eyelids.

Soo'soo, *n.* (*Zoöl.*) The native name of the Dolphin of the Gauges (*Platanista Gangetica* or *Sosoo Gangetica*), a cetacean of the family *Delphinidae*, supposed to be the *Platanista* of Pliny.

Soot, (*süt* or *sööt*), *n.* [A. S.] The well-known chimney deposit, consisting chiefly of fine particles of carbon, mechanically carried up from a coal or wood fire. It also contains much mineral matter (the lighter portion of the ash of the fuel), and in addition always yields

liquid hydrocarbons, condensed doubtless from unburnt hydrocarbon vapors, together with notable quantities of ammoniacal salts. The latter render soot, especially coal-soot, valuable as a manure.

Soot, *v. a.* To cover or foul with soot.

Soothe, (*söth*), *v. a.* [A. S. *gesothian*, to soothe; Lat. *suavis*; Gr. *hēdus*.] To please by speaking sweet words to; to gratify by kind attentions; to please with blandishments or soft words, or by compliance; to flatter. "Music hath charms to soothe the savage breast." — *Congreve*.

— To relieve from or remove, as pain or passion; to assuage; to calm; to mollify; to soften; to tranquillize; to mitigate; as, to *soothe* an angry woman. — To please; to gratify; to make glad; as, "*sooth'd* with his future fame." — *Dryden*.

Sooth'er, *n.* One who, or that which soothes, softens, or assuages; a flatterer.

Sooth'ingly, *adv.* In a soothing manner.

Sooth'say, *v. n.* To predict; to foretell.

Sooth'sayer, *n.* [A. S. *soth*, truth.] A foreteller of future events; a prognosticator; a diviner.

Sooth'saying, *n.* The foretelling of the future by persons without divine aid or authority.

Soot'ish, *a.* Partaking of the qualities or characteristics of soot; sooty.

Sooty, (*süt'ty* or *sööt'ty*), *a.* (*comp.* SOOTIER; *superl.* SOOTIEST.) [A. S. *sotig*.] Producing soot; consisting of soot; foul with soot; black like soot; dark; dusky; grimy; dingy; smutty; fuliginous; as, *sooty* coal.

Sop, *n.* [Du. *sop*, juice; Ger. *sappe*, soup, broth; Fr. *soupe*; Sp. *sopa*.] Anything steeped, dipped, or softened in liquor; — especially, something thus dipped in broth or liquid food, and intended to be eaten. — Anything given to appease or pacify; — so called in allusion to the sop given to Cerberus in mythological story. "Ill-nature is not cured with a *sop*." — *L'Esrange*.

— *v. a.* (*imp.* and *pp.* SOPPED,) (*söpt*.) To steep or dip in liquor; as, to *sop* bread in milk.

Soph, (*söf*), *n.* In the English universities, an abbreviated form of SOPHISTER, *q. v.* — In American colleges, a contraction of SOPHOMORE, *q. v.*

Sophi, *Sophy*, (*söf'y*). See SOFI.

Sope'tram, a town of the U. S. of Colombia, dept. of Cundinamarca, 10 m. S. of Antioquia.

Sophia, (*söf'i'a*), Empress of Constantinople, niece of Theodora, and wife of Justinian II., with whom she shared in the government of the state. After the death of that prince in 578, she conspired against Tiberius Constantine, who had been raised to the throne by her advice, and, being defeated by him, was compelled to live in privacy.

Sophi'a, half-sister of Peter the Great, and Czarina of Russia, was born in 1667, and in 1682 placed herself at the head of the revolt of the Strelitz. Having succeeded in her ambitious designs, she reigned over the Muscovites under the names of her brothers, Peter and Ivan. The former (Peter the Great), however, finally possessed himself of the sole power; and Sophia died a prisoner in a convent, 1704.

Sophi'a, a city of Bulgaria, on the Bogana, a tributary of the Iscar. *Manuf.* Woollen, silks, leather, &c. *P.* 43,000.

Sophia Dorothea of Zell. SOPHIA DOROTHEA of Prussia. SOPHIA, Electress of Hanover.

Sophism, (*söf'izm*), *n.* [Fr. *sophisme*; from Gr. *sophisma* — *sophos*, clever, wise, skilful.] (*Logic*.) A syllogism which contains some fallacy apt to be overlooked at first sight. Most errors are sophisms, but usually the latter term implies also that the person using it is in some measure conscious, and endeavors to conceal it by subtlety. It is so constructed as to seem to warrant the conclusion, but does not, and is faulty either in form or argument.

Sophist, *n.* [Fr. *sophiste*; Gr. *sophistes*.] (*Phil.*) One of a class of philosophers who arose in ancient Greece about the 5th century B. C. They went about discoursing and debating, and taught for hire the youth of rich and noble families. Hence, they came to be regarded as pursuing philosophy more for the sake of gain than from any proper love of it. They cultivated the various arts of persuasion, and in their attacks upon each other, laboring to expose and lay bare the delusions of appearance, they acquired great dexterity in the uses of terms, and frequently attempted to secure victory by the use of specious fallacies. Some of them, indeed, professed to instruct in the art of making all sorts of orations, and how to speak for or against any cause whatever. Hence, they were frequently held up to ridicule by Socrates and Plato; but there can be no doubt that their labors were of service in tending to improve the language. The most distinguished of the sophists were Protagoras of Abdera, Hippia of Elis, Gorgias of Leontium, Prodicus of Ceos, and Eristydemus of Chios.

— A captious or fallacious reasoner.

Sophister, (*söf'ter*), *n.* In the great English universities, a name given to a student who is advanced beyond the first year of his residence in college.

Sophist'ic, **Sophist'ical**, *a.* [Fr. *sophistique*; Gr. *sophistikos*.] Pertaining, or having reference, to a sophist or to sophistry; embodying or involving false reasoning; fallaciously subtle; not true or sound; as, a *sophistical* argument.

Sophist'ically, *adv.* In a sophistical manner; fallaciously; not soundly.

Sophist'icalness, *n.* State or quality of being sophistical or fallacious.

Sophist'icate, *v. a.* [Fr. *sophistiquer*.] To practise sophistry or fallacy; to falsify; to adulterate; to violate; to pervert; to corrupt by something spurious, extraneous, or foreign; as, to *sophisticate* the understanding, to *sophisticate* liquors.

Sophisticated, Sophisticated, a. Adulterated; not pure; not genuine; as, *sophisticated* wine.

Sophistication, (so-fis-ti-kā-shun), n. [Fr.] Act of adulterating; a debasing or perverting the purity of a thing by an extraneous admixture; as, *sophistication* of sense.

Sophisticator, n. One who sophisticates or adulterates.

Sophistry, n. [O. Fr. *sophisterie*.] Subtle and fallacious reasoning; ratiocination sound in appearance only; practice of a sophist.

Sophocles, (sofo-kless), a. A Greek tragic poet, b. in the Attic demus or village of Colonus, B. C. 495, thirty years later than Æschylus. He received a good education, and at an early age gained the prize in music and gymnastics. He was fifteen when the battle of Salamis was fought, and for his remarkable beauty and skill in music, he was chosen to lead the chorus which sang the paean of victory. As usual on such occasions, he appeared naked, anointed with oil, and holding a lyre in his left hand. His first appearance as a dramatist was in 468, when, under memorable circumstances, he had Æschylus for his rival, and won the victory. Of the next 28 years of his life nothing is recorded; but it is known that he made poetry his business, and that he composed a great many plays during that period. Not one of them, however, is now extant. The *Antigone*, the earliest of his extant tragedies, was brought out in 440, and won the prize. The number of plays attributed to him, without question, was 113, of which 81 were probably produced after the *Antigone*. Seven only are extant, viz., *Antigone*, *Electra*, *Trachinian Women*, *King Œdipus*, *Ajax*, *Philoctetes*, and *Œdipus at Colonus*. These exhibit his art in its maturity, and sustain the verdict of ancient and modern critics, that S. carried the Greek drama to its highest perfection. He effected a complete change in the constitution of tragedy as Æschylus left it; loosening the connection between the parts of the trilogy and the satyric drama, and making them not one great poem, but four distinct ones; introducing a third actor; and for subjects selecting, not a series of heroic and mythical actions, but for each play one leading fact of real human interest and lasting significance. S. lived to be nearly 90, and in his latest years most probably wrote the *Œdipus at Colonus*, so full of sweetness and tender melancholy, and consoling hopes, which was not presented on the stage till five years after the poet's death. D. 406 B. C.

Sophomore, (sōfo-mōr), n. In American colleges, a student next above a Freshman, or one belonging to the second of the four classes of collegians.

Sophomore, Sophomoric, a. Pertaining or relating to, or after the manner of, a sophomore;—hence, timid; inflated or high-flown in style or quality.

Sophonisba, (sōfo-nis-ba), n. See MASINISSA.

Sopor, n. [Lat.] (Med.) A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

Soporiferous, a. [Lat. *soporifer*—*sopor*, lethargy, and *fero*, to bear, bring.] Bringing or producing sleep or drowsiness; tending to produce sleep; soporific; narcotic; opiate; somniferous; as, a *soporiferous* potion.

Soporiferously, adv. In a soporiferous manner.

Soporiferousness, n. State or quality of being soporiferous.

Soporific, a. [Lat. *sopor*, and *facio*, to make.] Causing sleep; tending to bring sleep; soporiferous; as, the *soporific* qualities of morphine.

Soporose, Soporous, a. [Lat. *soporosus*; Fr. *soporeux*.] Inducing sleep; sleepy; somnolent.

Sopper, n. One who sops in liquid something to be eaten.

Soppy, a. Wet; soaked, steeped, or saturated with moisture; as, the streets are *soppy* after heavy rain.

Sopra, [It., above.] (Mus.) A term frequently used for description; as, *nella parte di sopra*, in the higher or upper part; *di sopra*, above; *contrapunto sopra il soggetto*, counterpoint above the subject, &c.

Soprano, n. (Mus.) A singer in treble.

Soprano, n.; Eng. pl. SOPRANOS; It. pl. SOPRANI. [It., from *sopra*.] (Mus.) The highest female vocal organ; the treble;—in distinction from CONTRALTO, q. v.

Soquel, in California, a post-village and township of Santa Cruz co., 3 m. E. of Santa Cruz.

Sora, a town of S. Italy, prov. of Terra di Lavoro, on the Garigliano, 60 m. N.W. of Naples; pop. 8,000.

Sorata, a town of Bolivia, dept. of La Paz, 57 m. N.W. of La Paz, 8,450 feet above the sea; pop. abt. 1,500.

Sorau, (so'rau), a town of Prussia, prov. of Brandenburg, 56 m. S.E. of Frankfurt. *Manuf.* Woollen and linen goods. Pop. 8,000.

Sorb, n. [Lat. *sorbus*.] (Bot.) The Service-tree and its fruit. See PYRUS.

Sorbecient, (-fā'shent), n. [Lat. *sorbere*, to absorb, and *faciens*—*facere*, to make.] (Med.) A medicine which produces absorption.

—*a.* (Med.) Producing absorption.

Sorbet, n. Another orthography of SHERBET, q. v.

Sorbonne, (The.) (sor'bon), a celebrated college of France, founded at Paris in the 13th century, by Robert de Sorbonne, chaplain to St. Louis. It was originally intended for the support of secular priests who should devote themselves wholly and gratuitously to the work of instruction in theology. The members of the college were all either doctors or bachelors of theology, and the high reputation which they enjoyed during the 14th, 15th, 16th, and 17th centuries caused them to be continually appealed to on questions of theology or morals. During the 18th century the S. greatly declined from its ancient reputation, and it was suppressed in 1789. At the reorganization of the University by Napoleon in

1808, the Sorbonne was reestablished as the Theological Faculty of that body; but it failed to recover its old prestige, even with the clerical element. In the more recent organization of the University, the Sorbonne has no distinct or special character; but its halls still retain their ancient appellation.

Sorcerer, (-ser'), n. [Fr. *sorcier*, from L. Lat. *sortarius*—from Lat. *sortes*, oracles.] A diviner; an enchanter; a magician; a conjurer; a wizard; as, an Egyptian *sorcerer*.

Sorceress, n. A female sorcerer; a witch.

Sorcerous, a. Belonging, or relating, to sorcery.

Sorcery, n. [Fr. *sorcellerie*.] The black art; magic; enchantment; witchcraft; divination by the assistance of evil spirits; diablerie; as, a witch burned for *sorcery*.

Sordawallite, n. (Min.) A variety of wicktyne, resembling pit-coal in appearance, found in grayish or bluish-black opaque masses, near Sordawala in Finland, forming thin veins in trap-rock. It is a silicate of alumina, iron, and magnesia, with about three per cent. of phosphoric acid.

Sordes, n. [Lat., from *sordere*, to be foul.] Foul matter; dregs; excrement; filthy or rejected matter of whatever kind.

Sordid, a. [Fr. *sordide*; Lat. *sordidus*—*sordco*, to be foul.] Low; vile; ignoble; mean; base; vulgar; as, a *sordid* nature, a *sordid* soul.—Meanly avaricious or parsimonious; niggardly; covetous; as, the *sordid* lust of gold.

Sordidly, adv. In a sordid manner; avariciously; meanly; basely; covetously.

Sordidness, n. Quality of being sordid; meanness; avarice; baseness; niggardliness; also, filthiness.

Sordine, Sor'det, n. [Fr. *sourdine*, from Lat. *sur-dus*, dull-sounding.] (Mus.) A small instrument or damper put into the mouth of a trumpet, or on the bridge of a violin or violoncello, to render the sound fainter.

Sore, n. [A. S. *sār*, sorrow, grief, pain.] A wound; a raw; a spot or place in an animal where the skin and flesh are ruptured, bruised, or abraded, so as to feel pain at the slightest pressure.—An ulcer; a boil; a blister on the flesh.—Hence, distress; grief; trouble; sorrow; difficulty; as, despised love is a painful *sore*.

—*a.* (comp. *SORE*; *superl.* *SOREST*.) Inflamed; painful; tender and susceptible of pain from pressure; as, a *sore* foot.—Tender, as the mind; easily pained, grieved, or vexed; very susceptible of irritation from anything that crosses the inclination or jars upon the feelings; as, his mind is still *sore* about it.—Severe; afflictive; fraught with pain or distress; bitter; trying; as, a *sore* disease, a *sore* infirmity, a *sore* calamity.

—*ade.* In a sore manner; with violent pain or distress; grievously; as, he was wounded *sore*.—Greatly; deeply; violently; severely; as, they were *sore* repulsed.

Sore, n. [Fr. *sor*, *falcon sor*, a falcon of the first year.] A hawk or falcon of the first year.—In venery, a four-year-old buck.

Sorediferous, a. (Bot.) Bearing soredia.

Soredium, n.; pl. SOREDIA. [Lat., from Gr. *sōros*, a heap.] (Bot.) A heap of powdery bodies found in lichens lying upon any part of the surface of the thallus.

Sorel, n. [Dim. of *sore*, a buck.] A buck of the third year. (u.)

—A reddish-brown color. See *SORREL*.

Sorel (AGNES). See AGNES *SOREL*.

Sorel, or WILLIAM HENRY, in prov. of Quebec, a post-village of Richelieu co., 45 m. N.E. of Montreal. Pop. (1897) 6,845.

Sorely, adv. [From *sore*.] With violent pain, inflammation, or distress; grievously; greatly; violently; severely; as, to be *sorely* grieved, pained, or tempted.

Soreness, n. State or quality of being sore; the tenderness of any part of an animal body, which renders it extremely sensible of pain from pressure; figuratively, tenderness of mind, or susceptibility of mental pain; as, *soreness* of conscience, the *soreness* of wounded vanity, &c.

Soresina, a town of N. Italy, prov. of Cremona, 14 m. N.W. of Cremona; pop. 5,000.

Sorex, n. (Zool.) The typical genus of the *SORICIDÆ*, q. v.

Sorghum, n. (Bot.) See *HOLCUS*.

Sorgo, n. [It., from Lat. *sorghum*.] (Bot.) A plant of the genus *Sorghum*.

Sorri, n.; pl. of *SORUS*, q. v.

Soria, (anc. Numantia), a city of Spain, in Old Castile, cap. of a prov. of its own name, on the Douro, 113 m. N.E. of Madrid. Adjacent to the town, on the N., are the ruins of the famous city of Numantia, destroyed by the Romans 132 B. C. Pop. 5,632.

Soriano, (so-re-a'no), a town of Central Italy, 7 m. E. of Viterbo; pop. 5,400.

Soria'no, a town of S. Italy, prov. of Calabria-Ulteriore II., 8 m. S.E. of Monteleone; pop. 4,000.

Sorites, n. [Gr. *soristes*, from *soros*, a heap.] (Logic.) An abbreviated form of stating a series of syllogisms, in which the conclusion of each is a premiss of the succeeding one; e. g., A = B, B = C, C = D; therefore A = D. This is a sorites consisting of two distinct syllogisms, which, drawn out at length, would stand thus: A = B, B = C; therefore A = C; and A = C, C = D; therefore A = D.

Soroa'bo, a town of Brazil, 50 m. W.S.W. of São Paulo; pop. abt. 12,000.

Sororicide, (-sid'), n. [Fr., from Lat. *soror*, sister, and *cedere*, to kill.] The murder, or murder of, a sister.

Soro'sis, n. (Bot.) A collective fruit, formed of a number of separate flowers, firmly coherent into a fleshy or pulpy mass with the thalamus upon which they are situated. The pine-apple is an example; each hexagonal division represents a flower, while the crown of leaves above consists of empty bracts. The bread-fruit, jack-fruit, and mulberry, are other examples. See *ETERIO*.

Soro'sis, n. The name assumed in the U. S. by certain women's clubs.

Sorrel, n. [Fr. *surelle*; A. S. *sur*, sour.] (Bot.) The common name of the genus *Rumex*, q. v.

Mountain-sorrel. (Bot.) See *OXALIS*.—**Wood-sorrel. (Bot.)** See *OXYRIA*.—**Salt of sorrel. (Chem.)** Binoxalate of potash.

Sorrel, a. Of a yellowish or reddish-brown color; as, a *sorrel* nag.

—*n.* A yellowish or reddish-brown color.

Sorrel-tree, n. (Bot.) *Andromeda arborea*, a tree of the genus *Andromeda*, order *Ericaceæ*, which grows chiefly on the Alleghany Mountains, from Virginia to Georgia, and attains a height of 50 feet, with a trunk 12–15 inches in diameter. The wood is of little or no use. The leaves are acid, and are sometimes used for dyeing wool black.

Sorrento, (anc. Surrentum), a seaport-town of S. Italy, prov. of Naples, on the Bay of Naples, 7 m. S.W. of Castellamare, and 18 m. S.E. of Naples. It is noted for its beautiful scenery, and as the birth-place of Tasso.

Sor'rily, a. [From *sorry*.] In a sorry manner; meanly; pitifully; despicably; contemptibly; wretchedly; as, he sings *sor'rily*.

Sor'riness, n. State of being sorry.

Sorrow, (sōr'ro), n. [A. S. *sorg*, *sorh*.] Mental pain; care; solicitude; grief; affliction; sadness; mourning; woe; uneasiness or pain of mind produced by the loss of any good, real or supposed, or by disappointment in the expectation of good; regret; unhappiness.

—*v. n.* [A. S. *sorgian*.] To feel sorrow or pain of mind; to be sad; to grieve; to mourn, weep, or lament; as, a *sorrowing* mother.

Sorrowful, a. Full of sorrow; sad; mournful; sorry; grieving for the loss of some good, or on account of some expected evil; deeply serious; depressed; dejected; distressed; as, a *sorrowful* heart.—Mournful; lamentable; producing sorrow; inducing grief; as, a *sorrowful* event.—Expressing, or accompanied with, grief; as, a *sorrowful* story.

Sorrowfully, adv. In a sorrowful manner.

Sorrowfulness, n. State of being sorrowful.

Sorrowless, a. Free from care or sorrow.

Sor'ry, a. (comp. *SORRIER*; *superl.* *SORRIEST*.) [A. S. *sarig*, *sari*.] Having feeling or sorrow; grieved; afflicted; lightly grieved or pained; as, I felt *sorry* for him.—Dis-mal; melancholy; wretched; as, to be in a *sorry* plight.—Poor; mean; vile; worthless; as, a *sorry* horse, a *sorry* excuse.

Sors, n.; pl. SORTES. [Lat.] A lot;—also, a species of divination by drawing lots.

Sort, n. [Fr. *sorte*; Lat. *sors*, *sortis*, a lot.] A kind or species; any number or collection of individual persons or things characterized by the same or like qualities or attributes; class; order; as, a *sort* of quadrupeds, a *sort* of flowers, a *sort* of writings.—Form of being or acting; manner; style.—Degree of any quality; as, he, in some *sort*, imitated his manner.—A pair; a set; a suit; a number of things used together.

—*pl. (Print.)* Letters, marks, points, spaces, or quadrats, that are either wanting or superfluous in quantity.

Out of sorts, indisposed; out of order; not in usual health or spirits; as, you appear *out of sorts* to-day.—*(Print.)* With some letters of type in the font deficient or exhausted.—*To run upon sorts*, to use or require a greater number of some particular letters, points, marks, &c., than the regular proportion;—said of types.

—*v. a.* [Lat. *sortior*, to cast or draw lots, from *sors*, *sortis*.] To separate or distribute, as things having like qualities, and place them in distinct classes or divisions; as, to *sort* people according to their tastes or affinities, to *sort* wools of different colors.—To reduce to order from a state of confusion; as, to *sort* nails, to *sort* types.—To conjoin; to put together in distribution; as, "She *sorts* things present with things past." (Davies).—To cull; to select; to choose from a number; as, let him *sort* himself a wife.

—*v. n.* To be joined or combined with others of the same kind or species; to agree; as, metals *sort* with minerals in the earth.—To consort; to conjoin; to associate; as, he *sorts* with persons beneath him in station.—To fit; to suit; to be adapted; as, "Different styles with different subjects *sort*." (Pope).—To fall out; to happen; to come about; to result; to terminate; to issue successfully; as, things did not *sort* according to my expectations.—To harmonize; to come to an agreement or understanding; as, persons of opposite natures often *sort* themselves together.

Sort'able, a. [Fr.] That may be sorted.

Sorter, n. One who sorts.

Sortie, (sor'tē), n. (Mil.) A sudden attack or onslaught made by the garrison of a besieged place upon the besiegers; a sally.

Sortilege, (sor'ti-lēj), n. [Fr., from Lat. *sors*, *sortis*, a lot, and *legere*, to select.] Act or practice of drawing lots;—also, divination by drawing lots.

Sortilegious, (-lē'jus), a. Pertaining, or relating to, or accomplished by, sortilege.

Sor'us, n.; pl. SORI. [Lat., from Gr. *sōros*, heap.] (Bot.) A small heap of reproductive granules found growing upon the fronds of polypodiaceous ferns.

So'so, a. Passably; indifferently good. See *So*.

Sospiro, (-pē'ro), n. [It., a sigh.] (Mus.) Same as *REST*, q. v.

Sottenu'to, p. a. [It.] (Mus.) A term which, affixed to a note, indicates that it is to be held out in an equal and steady manner.

Sot, n. [Fr.; Du. *zot*; L. Lat. *sottus*.] An habitual drunkard; a person stupefied or besotted by excessive indulgence in strong liquors.

Sot, *v. a.* To stupefy; to besot; to infatuate; as, "I hate to see a brave, bold fellow *sotted*." — *Dryden*.

—*v. n.* To tope or tittle to a degree of stupidity.

So'to, FERDINAND DE. See DE SOTO.

Sot'tish, *a.* Like a sot or hoggish fellow; destitute of sense; besotted; very stupid or foolish; as, a *sot'tish* and grossly ignorant understanding. — Dull, deadened, or rendered stupid with intemperance or habitual intoxication.

Sot'tishly, *adv.* In a sot'tish manner.

Sot'tishness, *n.* State or quality of being sot'tish; dullness in the exercise of reason; stupidity; obtuseness of intellect; — also, stupidity or imbecility from intemperance.

Sotto voice, (*sō'to-vō'chā*.) [*It.*] (*Mus.*) With a subdued voice; in an undertone; with moderate inflection of sound.

Sou, (*sō*.) *n.*; *pl.* *Sous*, (*sō*.) [*Fr.*, from *O. Fr. sol*.] The former name of the French copper coin of five centimes, being in value the twentieth part of a franc, or about one cent American.

Soua'ri-nut, *n.* (*Bot.*) See CARYOCAR.

Soubrette, (*sō'b'rēt*.) *n.* [*Fr.*] A lady's-maid; a female waiting-maid or attendant; also, a chambermaid.

Souehong, (*sou-shōng'*.) *n.* A kind of black tea.

Sou'cook River, in *New Hampshire*, rises in Belknap co., and flows into the Merrimac 3 m. S.E. of Concord.

Sou'dan, SOODAN, NIGRITIA, OR BERR-ES SOODAN, (*Land of the Blacks*), an extensive but very indefinite tract of Central Africa, which has for many ages been the peculiar home of the negro race, bounded on the N. by the Sahara, on the W. by Senegambia, on the S. by Upper Guinea, from which it is separated by the Kong Mountains, and on the E. by Kordofan. The Kong Mountains rise to the height

Fig. 2396.

WOMAN OF KASSALA CARRYING WATER.

of 3,000 ft.; while Mount Atlantika, near the sources of the Tchadda, is 10,000 in height. The Niger (*q. v.*) waters the western regions, and in the east are Lakes Tchad and Fitri. The climate of the west and middle districts resembles that of Senegambia and Guinea; that of Eastern S. is still imperfectly known. Agriculture is pursued with considerable skill; cotton, tobacco, and indigo are abundantly cultivated; and wheat, rice, maize, Guinea-corn, and millet are among the ordinary crops. Gold-dust, which abounds in the rivers; iron, made from iron-stone, which prevails in all parts of the country; and ivory and feathers, are the principal exports. Of the numerous kingdoms and states into which the country is divided, the following are the chief: Bambarra, Masina, Gando, Sokoto, Bornou, Bagirmi, Whydah, and Darfur. The Egyptian powers on the E. have settlements, among which Kassala is noted as an important military station, and for the peculiar beauty of its inhabitants (Fig. 2396). The area is not known, but is generally estimated at 2,250,000 sq. m.; the pop. at from 10,000,000 to 50,000,000.

Soudan (the), a prov. of Egypt, being a part of the above; area and pop. unknown.

Sou'ndersburgh, in *Penn.*, a P.-V. of Lancaster co.

Sough, (*sūf*.) *v. n.* To whistle, sigh, or moan, as the wind.

—*n.* A hollow murmuring or buzzing; as, the *sough* of the forest; — hence, a scandal; a rumor; a flying report.

— [*O. Eng. saugh*.] A small drain or sewer; an adit.

Sought, (*sawt*.) *imp.* and *pp.* of SEEK, *q. v.*

Souhe'gan River, rises in the N. of Massachusetts, and flowing N.E. falls into the Merrimac River in Hillsborough co., New Hampshire.

Soul, (*sōl*.) *n.* [*A. S. sawol*, *saul*; *Ger. seele*.] The thinking, spiritual, rational, and immortal principle in man, which distinguishes him from the brute creation; that part of man which enables him to think and reason, and which renders him a subject of moral government; — sometimes, the so-called animal soul, or, in other words, the seat of vital function, the sensitive affections, exclusive of the voluntary and rational powers, in distinction from the higher nature, or *spirit* of man; — occasionally, also, the seat of emotion and feeling, as distinguished from *intellect*; — and sometimes, again, the intellect or understanding, pure and simple, in distinction from *feeling*; as, the immortality of the *soul*. — Hence, the vital principle, spirit, or essence; the animating power or part; as, brevity is the *soul* of wit. — Hence, the inspirer, leader, or ruling spirit of any action, enterprise, or undertaking; as, an able statesman is the *soul* of his party. — Courage; fire; ardor; energy

or grandeur of mind; fervor; any excellent or sublime manifestation of the emotional or moral nature; as, "The will to do, the *soul* to dare." (*Scott*.) — A human being; a person; an individual; as, she had three hundred *souls* on board when she was lost. — A pure or disembodied spirit.

"Every *soul* in heav'n shall bend the knee" — *Milton*.

(*Phil.*) In its original meaning, the word *soul* denoted simply a present fact, or the impression conveyed to the speaker by certain phenomena which he was contemplating. It has now no reference either to the source of this faculty or life, or to its ultimate duration, whether here or in any other state or existence. The history of language carries us back to a time during which men existed without any consciousness of kinship, marriage, or law, or of their relation to a Being who was their maker. The first formation of the ideas of father, mother, wife, and brethren, the growth of the numerals, of words like *duty*, *right*, *love*, of the idea of a creator, ruler, and father of men, seem to mark severally a stage in the revelations made to mankind. How soon these words began to convey ideas similar to those which we now attach to them, it is impossible to say; but it is quite certain that the word *soul* assumed gradually the meaning of a living, thinking, or conscious power; and equally certain, also, that while some held this power to be indestructible, others either denied this conclusion, or rested content without any conclusion on the subject. In other words, the belief in the inherent immortality of the human soul, although by some affirmed to be an innate conviction in the human mind, has not been accepted at all times or in all countries. In the Aristotelian philosophy, the idea of a future or continued existence after death can scarcely be said to have a place. His system of ethics is simply a part of his great theory of politics; and his morality is confined, therefore, essentially to present conditions. The Platonic philosophy, or the Socratic, if we may suppose that on this subject the disciple faithfully represented the master, introduces us to a wholly different phase of thought. The idea of duty, as based on responsibility to an unseen, but absolutely impartial, judge, runs through the great dialogue entitled the *Gorgias*. The belief, if grounded in part on metaphysical arguments, rests chiefly on a profound internal conviction. After death comes the judgment; and as the tree falls, so it lies. As the corpse retains the features seen in life, with any marks or scars which may have been made on the body, so the soul retains its spiritual features, with the wounds or scars which may have been caused by unjust actions. The souls dismissed from the body are brought before Rhadamanthus the judge, who knows not to whom they belong, and whose impartiality cannot therefore be called into question. And the souls of kings, rulers, and statesmen are thus submitted to a trial, at the end of which sentence is passed according to the condition in which they are found. Those which are found unscarred go to the islands of the blessed; while all who are wounded and distorted from the effects of tyranny, intemperance, sloth, or lying, are dismissed to the prison-house, where they are to receive due punishment. The souls so dismissed are divided into two classes, the *curable* and the *incurable*; for punishment must either be for the reformation of the offender, or as a warning to others. For all, therefore, who have not sinned incurably, the punishment of Hades becomes a purgatorial process; and in this class are placed the souls of private citizens who have never been invested with great power or responsibility. According to the Platonic Socrates, it is impossible for such insignificant persons to commit incurable sins, this terrible privilege being reserved for despots, unjust kings, and iniquitous rulers of whatever kind. Thus, for the vast mass of men, the punishments of the unseen world issue in reformation and final happiness. The Platonic belief was adopted by Cicero, who sums up in his treatise *De Senectute* the metaphysical arguments on which belief in the immortality of the soul has been based. But neither in the time of Cicero, nor at any other period of Roman history, can it be said that there was a general belief in the inherent immortality of the soul. In modern times, while it has become the habit of many to appeal to the universal consent of mankind as evidence for the inherent immortality of man, both this appeal and the metaphysical arguments on which this belief is maintained are confronted by a system of philosophy, sometimes called *materialistic*, which sees in human life the expression of forces dependent on certain material combinations, and which, asserting that consciousness is the result of that combination, affirms that with the dissolution of that combination the conscious life will also be at an end. It would be out of place here to enter into the vast field of observation thus opened. We will only note, before concluding, that while the idea of inherent immortality is generally maintained by Christian theologians, there are some who share the belief of the Anglican archbishop Whately (*Scripture Revelations of a Future State*), that immortality is a gift reserved only for those who shall be found worthy of it, the eternal death spoken of in the New Testament being the final extinction of the sinner, and not his continued existence in a state of endless torment. See *Alger's Future Life* (10th ed. N.Y., 1878), with a Bibliography of 4,977 books on this subject.

(*Note.*) *Soul* is frequently used as a familiar designation for a person, usually in association with some word used adjectively, as, I pity the poor *soul*; well, he was a good *soul*, &c. — *Soul* is also largely employed in the formation of compounds, of sufficiently obvious signification; as, *soul-consuming*, *soul-dissolving*, *soul-distracting*, *soul-hardened*, *soul-reviving*, &c., &c.)

Soula'mea, *n.* (*Bot.*) A genus of plants, order *Polygalaceae*. *S. amara*, a native of Molucca, is intensely bitter, and is said to be a valuable febrifuge, and also a valuable remedy in cholera and pleurisy.

Soul'-bell, *n.* The passing-bell.

Souled, (*sōld*.) *a.* Instinct with soul or feeling; as, he is a whole-*souled* fellow.

Soul'ie, MELCHIOR FRÉDÉRIC, a French novelist and dramatist, b. at Foix, 1800, was educated for the bar, and next admitted as an advocate; but, obtaining little practice, he turned his attention to literature, for which he had always a marked predilection. He produced a small collection of poems, in a volume entitled *Amours Françaises*, which attracted no notice. The young author, left without any resources, was compelled to take service as foreman to an upholsterer. In this situation he remained until 1828, when his drama, entitled *Romeo and Juliet*, having been successful upon the stage, he was enabled to take his place among the *littérateurs* of his day. With the production of *Clotilde* his reputation as a dramatist was fixed. He next commenced contributing romances to the French newspapers, and succeeded so well in this new walk, that in a short time he became the most popular romancist of the day. This position he occupied until 1843, when Dumas and Eugene Sue, following in his steps, somewhat eclipsed his fame. He remained, however, a popular writer unto his death. His best romances are: *Mémoires du Diable*; *Deux Cadavres*; and *L'Homme de Lettres*. D. 1847.

Soul'less, *a.* Without a soul, or lacking greatness or nobleness of mind; mean; craven; abject; spiritless; as, a *soulless* villain.

Soulouque, or **Faustin I.**, (*sou-look'*.) ex-emperor of Hayti, was b. a slave, 1787, but was manumitted while in his childhood. At 14 he assisted in expelling the French from Hayti. He rose through the different grades of the republican army until, in 1849, he declared himself emperor; in which capacity he evinced himself a cruel, violent, and ignorant ruler. He was driven from Hayti in 1859, and, after first seeking an asylum at Jamaica, retired to the S. of France. D. 1867.

Soult, NICOLAS JEAN DE DIEU, Duke of Dalmatia and Marshal of France, born 1769, at St. Amand. S. entered the ranks of the army in 1785; and in 1791 he attracted the favorable notice of Marshal Lkner, and received a lieutenant's commission. He rose rapidly under Custine, Hoche, and Marceau, and particularly signalized himself in the victory of Fleurus. In 1799 he acted under Massena in Switzerland, and in 1800 he served under the same commander in the defence of Genoa. S. was wounded and taken prisoner in a sally in the early part of this siege, but was set at liberty after Napoleon's victory at Marengo. Napoleon, who heard of S.'s bravery and skill, now employed him under his own eye; and S.'s promotion went forward till he had reached the highest station. He was the first of the marshals whom Napoleon created in 1804, and he was the first marshal whom Napoleon made a peer. He participated largely in the glories of the campaign of Ulm and Austerlitz; took in the next year a distinguished share in the victory of Jena; and showed consummate firmness, as well as daring, in the desperate struggle at Preuss-Eylau. In 1808 Soult was sent into Spain. He defeated the Spaniards at Reynosa, and subsequently commanded against Sir John Moore, whom he engaged at Corunna. He next occupied the north of Portugal, but being surprised and defeated by Wellington at the Donro, he retreated with great loss and difficulty into Spain. In 1809 he gained the great victory of Ocana over the Spaniards, and subdued all the south-west of Spain, except the city of Cadiz. He lost in 1811 the hard-fought battle of Albuera against Beresford. S. was recalled to aid Napoleon after the Russian campaign; but in July of 1813, he was sent back to Spain to stem, if possible, the advance of Wellington. A series of engagements in and near the Pyrenees followed, in which S. showed strategic abilities of very high order, and gained several partial successes, though ultimately he was driven back into France. He now defended his native country against the invaders with indomitable courage, and an inexhaustible fertility of resources. Repeatedly engaged, and almost constantly defeated, he still presented an unbroken front against his assailants, and kept his retreating army ready to dispute every tenable post, and to seize any favorable chance of attack that fortune might offer. The final battle of Toulouse was contested by him with undiminished skill and courage; and though, on the whole, the English were successful, S. had the advantage in several points of the battle; 5,000 of his enemies had fallen; and he led his army safely out of the city, ready for further operations when the news arrived of the Emperor's first abdication. In 1815 S. joined Napoleon and fought at Waterloo, where he acted as one of the Emperor's major-generals. On the second return of the Bourbons, S. was for some time proscribed, but was ultimately restored to all his dignities. After July, 1830, he was much trusted by Louis Philippe, who employed S.'s talents in the War Office, and also twice made him president of the council. In 1845 he retired from active duty, was honored with the appointment of *Marshal-General of France*, a dignity which had lain in abeyance since the death of Marshal Turenne, and retired to his residence of Soultberg, where he d. 1851.

Sound, *a.* (*comp.* *sounder*; *superl.* *soundest*.) [*A. S. sund*.] Whole; entire; unbroken; not shaky, split, or defective; not bruised, decayed, or imperfect; not carious or mutilated; as, *sound* timber, a *sound* ship, a *sound* apple, a *sound* tooth. — Healthy; robust; hearty; not diseased or distempered; sane; not disordered or deranged; not enfeebled by age or accident; — expressed

of body or mind; as, a *sound* constitution, a *sound* body, a *sound* intellect, *sound* health. — Strong; vigorous; firm. — Founded in truth; solid; weighty; that cannot be overcome or refuted; well founded or substantiated; as, a *sound* argument, *sound* principles, a *sound* excuse or objection. — Heavy; forcibly administered; as, to give a man a *sound* thrashing.

— Free from error or fallacy; orthodox; correct; not false or heterodox; as, *sound* doctrine, *sound* knowledge, *sound* rules. — Profound; fast; undisturbed; unbroken; as, *sound* sleep. — Legal; valid; based upon right, law, or equity; that cannot be overthrown; not defective; as, *sound* justice, a *sound* title or tenure, &c.

(NOTE. *Sound* is occasionally used in the construction of self-explaining compounds; as, *sound-headed*, *sound-bodied*, *sound-hearted*, *sound-timbered*, and the like.)

Sound, *adv.* Soundly; heartily; thoroughly; as, he sleeps *sound*.

— *n.* [Lat. *sonus*; It. *suono*; Fr. and Sp. *son*.] (*Acoustics*.)

Sound is a peculiar sensation excited in the organ of hearing by the vibratory motion of bodies, when this motion is transmitted to the ear through an elastic medium. All sounds are not identical; they present differences by which they may be distinguished, compared, and their relations determined. *S.* are distinguished from noises. *S.* properly so called, or musical *S.*, is that which produces a continuous sensation, and the musical value of which can be determined; while noise is either a *S.* of too short a duration to be determined, like the report of a cannon, or else it is a confused mixture of many discordant *S.*, like the rolling of thunder or the noise of the waves. Nevertheless, the difference between *S.* and noise is by no means precise; Savart has shown that there are relations of height in the case of noise, as well as in that of *S.*, and there are said to be certain ears sufficiently well organized to determine the musical value of the *S.* produced by a carriage rolling on the pavement. *S.* is always the result of rapid oscillations imparted to the molecules of elastic bodies, when the state of equilibrium of these bodies has been disturbed either by a shock or friction. Such bodies tend to regain their first position of equilibrium, but only reach it after performing, on each side of that position, very rapid vibratory movements, the amplitude of which quickly decreases. A body which produces a *S.* is called a *sonorous* body. As understood in England and Germany, a vibration comprises a motion to and fro; in France, on the contrary, a vibration means a movement to or fro. The French vibrations are with us semi-vibrations; an oscillation, or vibration, is the movement of the vibrating molecules in only one direction; a double or complete vibration comprises the oscillation both backwards and forwards. Vibrations are very readily observed. If a light powder is sprinkled on a body which is in the act of yielding a musical *S.* — a bell or jar held horizontally in the hand, for example, — a rapid motion is imparted to the powder, which renders visible the vibrations of the body; and in the same manner, if a stretched cord be smartly pulled and let go, its vibrations are apparent to the eye. The vibrations of elastic bodies can only produce the sensation of *S.* in us by the intervention of a medium interposed between the ear and the sonorous body, and vibrating with it. This medium is usually the air, but all gases, vapors, liquids, and solids also transmit *S.* The following experiment shows that the presence of a ponderable medium is necessary for the propagation of *S.* A small metallic bell, which is continually struck by a small hammer, by means of clockwork, or an ordinary musical-box, is placed under the receiver of the air-pump (Fig. 2397). As long as the receiver is full of air at the ordinary pressure, the *S.* is transmitted; but in proportion as the air is exhausted, the *S.* becomes imperceptible in a vacuum. To insure the success of the experiment, the bell-work or musical box must be placed on wadding; for otherwise the vibrations would be transmitted to the air through the plate of the machine. Although air, from its being the medium most commonly in contact with the membranous tympanum of the ear, is the most general conductor of *S.*, yet other agents are capable of transmitting *S.* A bell rung under the waters of the Lake of Geneva was heard across the whole extent of the water, a distance of 9 m. With respect to its production in the air, Sir John Herschel has shown that in round numbers *S.* of every intensity travel, at the temperature of 62° Fahr., at the rate of 1,125 ft. per second, equal to 12¾ miles per minute, or 765 an hour. The velocity with which *S.* travels through different bodies varies greatly. Assuming its velocity in air as = 1, the rate at which sound travels through other substances is, — distilled water, 4.5; sea-water, 4.7; tin, 7.5; silver, 9; cast-iron, 10; brass, 10.5; wood, 11

Fig. 2397.

to 17; copper, 12; hammered iron, 17. The intensity of *S.* is much augmented if the vibrations be confined in tubes and cavities of any kind. By means of speaking-pipe, *S.*, however slight, may be transmitted from one part of a building to another, while the stethoscope conveys to the ear the slight but ominous *S.* that are generated in the chest. Biot ascertained that the slightest *S.* can be heard through an iron pipe 3,120 ft. in length. *S.* is reflected like light; reflected *S.* being termed an *echo*. In some localities of Switzerland, the mountaineers so contrive to sing their *Ranz des Vaches* that the echo forms an agreeable accompaniment to the air itself. Some *S.* are different only in intensity or loudness, as the reports of a musket and of a cannon; other *S.* differ in musical pitch, as two notes from the same instrument; while others again are different in character or tone, — what the French call *timbre*; as, for instance, the same note sounded upon a trumpet and upon a flute. We have seen that *S.* is produced by a certain vibratory force being transmitted through air, producing what is termed a wave of *S.* The ear is designed to take cognizance of these pulses of force, waves, or tremas within certain limits. The nature of things prevents a single wave of *S.* from ever coming alone. The more nearly alone a wave comes, the more sharp and sudden the *S.* When several nearly equal waves come at equal distances, the *S.* is called a *musical tone*. The middle G between the bass and treble clef is produced by waves about 8 feet 10 inches apart; waves at half that distance apart produce a tone one octave higher. If the distance apart of the waves of one note bears a simple ratio ($\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{1}{6}$, $\frac{1}{7}$, $\frac{1}{8}$, $\frac{1}{9}$, $\frac{1}{10}$, $\frac{1}{11}$, or $\frac{1}{12}$) to the distance apart of the waves of another note, the two notes harmonize; otherwise they are discordant. The gravest musical *S.* is produced by about 16, and the sharpest by about 12,000, vibrations in a second; but this statement must be taken with some qualification, for the power of appreciating *S.* differs greatly in different persons. See PHONAUTOGRAPH.

— [Ice. *sand*, a swimming.] The air-bladder of a fish; as, the *sounds* of a cod.

— [A. S., Dan., and Swed. *sund*, a narrow sea.] (*Geog.*) A strait between the mainland and an island; or, a strait connecting two seas, or connecting a sea or lake with the ocean; a frith; a fiord; as, Long Island Sound.

— [Fr. *sonde*; Sp. *sonda*, a plummet, and, by analogy, a surgeon's probe.] (*Surg.*) An instrument which surgeons introduce into the bladder, in order to discover whether there is a stone there or not.

Sound, *v. n.* To alter a voice; to make a noise; to make an impulse of the air that shall strike the auditory organs with a perceptible effect; as, hark, how the trumpets *sound*.

— To be imparted or conveyed by sound; to be disseminated, spread, or published; to transmit intelligence through the organ of hearing; as, from you *sounded* the news. — Hence, to import; to mean; to denote; to signify; as, his speech *sounds* as if he be a Yankee.

— To sound in damages. (*Law*.) To have the essential nature or quality of damages, as in a case of trespass, &c.

— To use the line and plummet in searching the depth of water.

— *v. a.* To cause to make a noise; to play on; as, to *sound* a bugle. — To utter audibly; to cause to exist as a sound; as, to *sound* a note with the voice. — To give a signal for by a certain sound; to order or direct by a sound; as, to *sound* a parley. — To cause to be reported; to honor or celebrate by sounds; as, to *sound* one's achievements.

— To publish; to proclaim; to announce; to spread or circulate by fame, rumor, or report; as, to *sound* a man's praises.

— To try, as the depth of water and the quality of the bottom or ground, by sinking a plummet or lead. — To try; to examine; to discover, or endeavor to discover, as that which lies concealed in another's breast; to gauge, as the private ideas or secret intentions of another; to test; as, he *sounded* his men and found them willing.

(*Surg.*) To introduce, as a sound into the bladder of a patient, to ascertain whether a stone is there or not; to examine by means of a sound.

Sound, (*The*.) a narrow strait at the entrance of the Baltic, lying between the southern point of Sweden and the Danish island of Zealand. The Sound is about 50 miles in length, and from 4 to 15 in width. Till within the last few years the Danes were in the habit of exacting a toll or custom from all ships entering the Baltic from the North Sea. This vexatious and oppressive impost, known as the *Sound Dues*, was abolished in 1857, by the payment of a composition from the great commercial states of Europe and America, and the Sound is now free for all ships of whatever country or tonnage.

Soundable, *a.* That may be sounded.

Sound'er, *n.* One who, or that which, sounds.

Sound'ing, *p. a.* Sonorous; making a noise; as, a *sounding* instrument. — Uttering or imparting a magnificent sound; as, he addressed me in *sounding* and high-flown language.

— *n.* Act of one who, or that which, utters a sound or sounds.

— Act of endeavoring to discover the opinions, intentions, or desires of another.

— *pl.* (*Naut.*) Act of throwing the lead, to find depth of water, or a bottom. — Any part or place of the ocean, or depth of water where a plummet will reach the bottom.

— Quality of the ground brought up by the lead attached to the *sounding-line*. For an account of recent ocean-bottom explorations, see DEEP-SEA SOUNDINGS.

Sound'ing-board, *n.* A wooden canopy over a pul-

pit (Fig. 2186), intended to diffuse the sound of a preacher's voice over a church, and prevent its being lost by ascension. Such canopies are frequently richly decorated with carved work. — A thin board which propagates the sound in an organ, violin, or other musical instrument.

— *pl.* (Also called *sound-boarding*.) Boards used in floors for intercepting the transmission of sound between the different stories of a building.

Sound'ing-line, *n.* (*Naut.*) A line having a plummet attached to the end, used in taking soundings.

Sound'ing-post, *n.* (*Mus.*) A small post in a violin, violoncello, or similar instrument, set under the bridge for a support, for propagating the sounds in the body of an instrument.

Sound'ing-rod, *n.* (*Naut.*) A rod of iron employed to ascertain the depth of water in a ship's hold.

Sound'less, *a.* That cannot be sounded; unfathomable. — Without sound; noiseless; silent.

Sound'ly, *adv.* In a sound manner; healthily; heartily; severely; lustily; with heavy force or blows; smartly; without error or fallacy; fast; closely; so as not to be easily awakened.

Sound'ness, *n.* State or quality of being sound; wholeness; entireness; an unbroken, unimpaired, or undecayed state; healthiness; an unimpaired state of a vegetable or an animal body; as, *soundness* of constitution, *soundness* of timber, &c. — Sameness; a state in which the mind pursues its proper functions; as, *soundness* of intellect.

— Strength; solidity; vigor; firmness; as, the *soundness* of an argument. — Truth; rectitude; orthodoxy; freedom from error or fallacy; as, *soundness* of doctrine, *soundness* of faith.

Soup, (*sōop*), *n.* [Fr. *soupe*; Ger. *suppe*.] A decoction of flesh for food, seasoned or flavored more or less highly; strong broth; as, turtle soup, clear soup, soup à la reine, oyster soup, &c., &c.

Soup-kitchen, a public institution, supported by voluntary contributions during the winter, or any season of inclement weather, for preparing and supplying soup to the poor.

Sour, *a.* (*comp.* SOURER; *superl.* SOUREST.) [A. S. *sur*.] Acid; possessing a pungent taste; sharp to the palate; acid and astringent; as, a *sour* apple, *sour* cider, *sour* as vinegar, &c. — Rancid; musty; lumpy; turned or coagulated; as, *sour* milk. — Harsh of temper or disposition; crabbed; austere; churlish; morose; as, a woman with a *sour* tongue. — Harsh, repulsive, or disagreeable to the feelings; apt to cause repining or discontent; bitter; distasteful; hard to bear; as, a *sour* look, *sour* poverty.

— Unattainable; beyond one's reach; — used figuratively; as, ah! my boy, the grapes are *sour*.

— *v. a.* To make or render acid; to cause to have a sharp, pungent taste. — To make harsh, cold, or unkindly. — To make severe in temper; to make cross, crabbed, peevish, or discontented. — To make uneasy or less agreeable.

— *v. n.* To become acid; to acquire the quality of tartness or pungency to the taste. — To become peevish or crabbed.

Source, *n.* [Fr., from *soudre*, to spring, to issue, as water, from Lat. *surgo*, to rise.] That from which anything proceeds or has its origin; that which gives rise to anything; he who, or that which, originates. — The spring or fountain from which a stream of water proceeds; any collection of water within the earth, or upon its surface, in which a stream originates.

Sour'crout, *n.* See SAUER-KRAUT.

Sour'det, *n.* (*Mus.*) The little pipe of a trumpet.

Soure, (*so'ra*), in Brazil, a town of the prov. of Bahia, 40 m. S.W. of Itapicuru. — A town of the prov. of Ceara, 16 m. S.W. of Ceara; *pop.* abt. 1,600.

Sour'gourd, *n.* (*Bot.*) The BAEBAL, *q. v.*

Sour'ing, *n.* The quality of being sour.

Sour'ish, *a.* Somewhat sour; moderately acid.

Sour'krout, *n.* [Ger. *sauer-kraut*.] See SAUER-KRAUT.

Sour'ly, *adv.* With sourness or acidity. — With peevishness; with acrimony; discontentedly.

Sour'ness, *n.* The state or quality of being sour; acidity; sharpness to the taste. — Asperity; harshness of temper.

Sour'sop, *n.* (*Bot.*) *Annona muricata*, a West Indian fruit-tree, genus *Annona*, *q. v.* The tree does not attain a large size, but is much branched and very ornamental. The fruit is very large, often weighing two or three pounds; its pulp is white, succulent, sweet, with an agreeable acidity. The soursop is a pleasant and refreshing fruit, and is very much used in the West Indies, being produced in great abundance.

Souse, *n.* [From Lat. *salsus*, salt, salted, from *salio*, to salt.] Pickle made with salt. — Something kept or steeped in pickle. — The head, feet, &c., of swine pickled. — The act of throwing or plunging suddenly into water.

— *v. a.* To soak or steep in souse or pickle. — To plunge into water.

— *v. n.* To make a sudden plunge; to fall on precipitately; to rush with speed, as a hawk on its prey.

— *n.* The act of rushing or plunging, as a bird on its prey. (*R*.)

— *adv.* With sudden violence.

Sous'tik, *n.* (*Zoöl.*) (*Spernophilus citellus*, Cuvier.) A pretty little rodent quadruped, allied to the marmots, but distinguished by having cheek-pouches in which it stores away seeds and nuts. It is not uncommon in different parts of Germany and in Russia.

Sou'tane, *n.* [Fr.; It. *sottana*.] (*Ecccl.*) The French term corresponding to the English CASSOCK.

South, *n.* [A. S. *suth*; Fr. and Sp. *sud*; Ger. *süd*.] One of the four cardinal points of the compass; the point in

pit (Fig. 2186), intended to diffuse the sound of a preacher's voice over a church, and prevent its being lost by ascension. Such canopies are frequently richly decorated with carved work. — A thin board which propagates the sound in an organ, violin, or other musical instrument.

— *pl.* (Also called *sound-boarding*.) Boards used in floors for intercepting the transmission of sound between the different stories of a building.

Sound'ing-line, *n.* (*Naut.*) A line having a plummet attached to the end, used in taking soundings.

Sound'ing-post, *n.* (*Mus.*) A small post in a violin, violoncello, or similar instrument, set under the bridge for a support, for propagating the sounds in the body of an instrument.

Sound'ing-rod, *n.* (*Naut.*) A rod of iron employed to ascertain the depth of water in a ship's hold.

Sound'less, *a.* That cannot be sounded; unfathomable. — Without sound; noiseless; silent.

Sound'ly, *adv.* In a sound manner; healthily; heartily; severely; lustily; with heavy force or blows; smartly; without error or fallacy; fast; closely; so as not to be easily awakened.

Sound'ness, *n.* State or quality of being sound; wholeness; entireness; an unbroken, unimpaired, or undecayed state; healthiness; an unimpaired state of a vegetable or an animal body; as, *soundness* of constitution, *soundness* of timber, &c. — Sameness; a state in which the mind pursues its proper functions; as, *soundness* of intellect.

— Strength; solidity; vigor; firmness; as, the *soundness* of an argument. — Truth; rectitude; orthodoxy; freedom from error or fallacy; as, *soundness* of doctrine, *soundness* of faith.

Soup, (*sōop*), *n.* [Fr. *soupe*; Ger. *suppe*.] A decoction of flesh for food, seasoned or flavored more or less highly; strong broth; as, turtle soup, clear soup, soup à la reine, oyster soup, &c., &c.

Soup-kitchen, a public institution, supported by voluntary contributions during the winter, or any season of inclement weather, for preparing and supplying soup to the poor.

Sour, *a.* (*comp.* SOURER; *superl.* SOUREST.) [A. S. *sur*.] Acid; possessing a pungent taste; sharp to the palate; acid and astringent; as, a *sour* apple, *sour* cider, *sour* as vinegar, &c. — Rancid; musty; lumpy; turned or coagulated; as, *sour* milk. — Harsh of temper or disposition; crabbed; austere; churlish; morose; as, a woman with a *sour* tongue. — Harsh, repulsive, or disagreeable to the feelings; apt to cause repining or discontent; bitter; distasteful; hard to bear; as, a *sour* look, *sour* poverty.

— Unattainable; beyond one's reach; — used figuratively; as, ah! my boy, the grapes are *sour*.

— *v. a.* To make or render acid; to cause to have a sharp, pungent taste. — To make harsh, cold, or unkindly. — To make severe in temper; to make cross, crabbed, peevish, or discontented. — To make uneasy or less agreeable.

— *v. n.* To become acid; to acquire the quality of tartness or pungency to the taste. — To become peevish or crabbed.

Source, *n.* [Fr., from *soudre*, to spring, to issue, as water, from Lat. *surgo*, to rise.] That from which anything proceeds or has its origin; that which gives rise to anything; he who, or that which, originates. — The spring or fountain from which a stream of water proceeds; any collection of water within the earth, or upon its surface, in which a stream originates.

Sour'crout, *n.* See SAUER-KRAUT.

Sour'det, *n.* (*Mus.*) The little pipe of a trumpet.

Soure, (*so'ra*), in Brazil, a town of the prov. of Bahia, 40 m. S.W. of Itapicuru. — A town of the prov. of Ceara, 16 m. S.W. of Ceara; *pop.* abt. 1,600.

Sour'gourd, *n.* (*Bot.*) The BAEBAL, *q. v.*

Sour'ing, *n.* The quality of being sour.

Sour'ish, *a.* Somewhat sour; moderately acid.

Sour'krout, *n.* [Ger. *sauer-kraut*.] See SAUER-KRAUT.

Sour'ly, *adv.* With sourness or acidity. — With peevishness; with acrimony; discontentedly.

Sour'ness, *n.* The state or quality of being sour; acidity; sharpness to the taste. — Asperity; harshness of temper.

Sour'sop, *n.* (*Bot.*) *Annona muricata*, a West Indian fruit-tree, genus *Annona*, *q. v.* The tree does not attain a large size, but is much branched and very ornamental. The fruit is very large, often weighing two or three pounds; its pulp is white, succulent, sweet, with an agreeable acidity. The soursop is a pleasant and refreshing fruit, and is very much used in the West Indies, being produced in great abundance.

Souse, *n.* [From Lat. *salsus*, salt, salted, from *salio*, to salt.] Pickle made with salt. — Something kept or steeped in pickle. — The head, feet, &c., of swine pickled. — The act of throwing or plunging suddenly into water.

— *v. a.* To soak or steep in souse or pickle. — To plunge into water.

— *v. n.* To make a sudden plunge; to fall on precipitately; to rush with speed, as a hawk on its prey.

— *n.* The act of rushing or plunging, as a bird on its prey. (*R*.)

— *adv.* With sudden violence.

Sous'tik, *n.* (*Zoöl.*) (*Spernophilus citellus*, Cuvier.) A pretty little rodent quadruped, allied to the marmots, but distinguished by having cheek-pouches in which it stores away seeds and nuts. It is not uncommon in different parts of Germany and in Russia.

Sou'tane, *n.* [Fr.; It. *sottana*.] (*Ecccl.*) The French term corresponding to the English CASSOCK.

South, *n.* [A. S. *suth*; Fr. and Sp. *sud*; Ger. *süd*.] One of the four cardinal points of the compass; the point in

which the meridian and horizon intersect each other; any point or place on the earth, or in the heavens, which is near the meridian towards the right hand as one faces the east.

—A region, country, or place relatively nearer the south point than another.

South, *a.* In any place north of the tropic of Cancer, pertaining to, or lying in, the meridian toward the sun; being in a southerly direction.

—*v. n.* (*Astron.*) To pass the meridian of a place; as, "the moon *souths*."

—*adv.* Toward the south; as, a ship sails *south*.—From the south; as, the wind blows *south*.

South, in *Iowa*, a twp. of Madison co.

South Abington, in *Massachusetts*, a post-village of Plymouth co., 21 m. S.S.E. of Boston.

South Acton, in *Massachusetts*, a post-village of Middlesex co., 25 m. N.W. of Boston.

South Adams, in *Mass.*, a v. of Berkshire co.

South African Republic. See TRANSVAAL; RHODES, &c.

South Albion, in *Maine*, a post-vil. of Kennebec co.

South Alton, in *New Hampshire*, a post-village of Belknap co., 20 m. N.E. of Concord.

South Amboy, in *New Jersey*, a post-village and township of Middlesex co., 27 m. S.W. of the City of New York.

South America. See AMERICA.

South America, in *Illinois*, a post-village of Saline co.

Southampton, a seaport-town of England, in the S. of the co. of Hants, and a county by itself, situated on a neck of land surrounded by the Southampton Water on the S. and W., and by the river Itchen on the E. S. is a town of considerable antiquity and is entered from the N. by a gate of great architectural beauty and antiquity, called the *Bar Gate* (Fig. 2398). From this point, running S. to the quay extends the main street for the length of a mile, a thoroughfare both handsome and spa-

Fig. 2398. — BAR GATE, (Southampton.)

cious. The most important public buildings are the assembly-rooms, theatre, military asylum for the orphans of soldiers, several places of worship, schools, almshouses, infirmary, and mechanics' and scientific institutions. The manufactures are carpets and silk, and its trade in timber, hemp, and iron is very large; it is, however, as the station of the West India, Chinese, Mediterranean, and Australian steam navigation and mail service, that S. owes its present prosperity and importance. *Pop.* (1897) 67,760.

Southampton, in *Massachusetts*, a post-village and township of Hampshire county, 95 miles south-west of Boston.

Southampton, in *New Jersey*, a township of Burlington co.

Southampton, in *Pennsylvania*, a township of Bedford co.

—A township of Bucks co.

—A township of Cumberland co.

—A township of Franklin co.

—A township of Somerset co.

Southampton, in *Virginia*, a S.S.E. co., bordering on N. Carolina; area, 600 sq. m. *Rivers*, Nottaway, Meherrin, and Blackwater. *Surface*, level; *soil*, moderately fertile. *Cap.* Courtland. *Pop.* (1897) 21,220.

Southampton, in *British N. America*, an island in the N. of Hudson Bay, between Lat. 62° and 66° N., Lon. 80° and 87° W.

South Anna, a river of *Virginia*, rises in Louisa co., and unites with the North Anna to form the Pamunkey, after an E. course of 75 m.—A village of Louisa, 67 m. N.W. of Richmond.

South Anville, in *Penna.*, a twp. of Lebanon co.

South Ashburnham, in *Massachusetts*, a village of Worcester, 50 m. W.N.W. of Boston.

South Attleborough, in *Massachusetts*, a post-village of Bristol co., 40 m. S.S.W. of Boston.

South Australia. See AUSTRALIA, SOUTH, page 209.

South Avon, in *New York*, a village and township of Livingston co., 20 m. S.W. of Rochester.

South Bainbridge, in *New York*, a village of Chenango co., 110 m. W.S.W. of Albany.

South Barre, in *New York*, a post-village of Orleans co., abt. 7 m. S. of Albion.

South Barre, in *Vermont*, a post-village of Washington co., 7 m. S.E. of Montpelier.

South Bay, in *New York*, an inlet of Lake Champlain in Washington co., abt. 4 m. long.

South Beaver, in *Pennsylvania*, a township of Beaver co.

South Beltingham, in *Massachusetts*, a village of Norfolk co., 30 m. S.W. of Boston.

South Bend, in *Indiana*, a handsome manufacturing city, cap. of St. Joseph co., on the S. bank of St. Joseph River, 85 m. S.E. of Chicago. It is the seat of the Northern Indiana College; and near the town are the Roman Catholic University of Notre Dame and St. Mary's Female Academy. *Pop.* (1897) 25,840.

South Bend, in *Minnesota*, a post-village and township of Blue Earth co., on the Minnesota River, abt. 3 m. W. of Mankato.

South Bend, in *Pennsylvania*, a township of Armstrong co.

South Berwick, in *Maine*, a post-village and township of York county, 45 miles west south-west of Portland.

South Bloomfield, in *Ohio*, a township of Morrow county.—A post-village of Pickaway county, 15 miles S. of Columbus.

Southborough, in *Massachusetts*, a post-village and township of Worcester county, 17 miles east of Worcester.

South Boston, in *Indiana*, a village of Washington co., 24 m. N.W. of New Albany.

South Bradford, in *New Hampshire*, a village of Merrimack co., 22 m. N.W. of Concord.

South Braintree, in *Massachusetts*, a post-village and township of Norfolk co., 12 m. S.E. of Boston.

Southbridge, in *Massachusetts*, a post-village and township of Worcester county, 60 miles south-west of Boston.

South Bridge-ton, in *Maine*, a post-village of Cumberland co.

South Bridge-water, in *Massachusetts*, a village of Plymouth co., 27 m. S.E. of Boston.

South Bristol, in *New York*, a post-village and township of Ontario county, 12 miles south of Canandaigua.

South Britain, in *Connecticut*, a post-village of New Haven co., 20 m. N.W. of New Haven.

South Brown, in *Ohio*, a township of Vinton co.

South Brunswick, in *New Jersey*, a township of Middlesex county, 14 miles north-west of Trenton.

South Buffalo, in *Pennsylvania*, a township of Armstrong co.

Southbury, in *Connecticut*, a post-village and township of New Haven county, 22 miles north north-west of New Haven.

South Butler, in *New York*, a post-village of Wayne co., 158 m. W.N.W. of Albany.

South Butler, in *Pennsylvania*, a township of Butler co.

South Byron, in *New York*, a post-village of Genesee co., 25 m. W.S.W. of Rochester.

South Canaan, in *Connecticut*, a post-village of Litchfield co., 50 m. N.W. of Hartford.

South Canaan, in *Pennsylvania*, a township of Wayne co.

South Can-dor, in *New York*, a village of Tioga co., 5 m. N.W. of Oswego.

South Carolina, one of the original States of the American Union, forming nearly a triangle, of which the base is the Atlantic Ocean, is bounded N. and W. by North Carolina, and S. by Georgia. It extends from 32° to 35° N. Lat., and from 79° to 82° 50' W. Lon.; area, 30,213 sq. m. *Desc.* The coast for about 100 m. inward is flat and sandy, with a light soil, covered with pitch-pine forests, traversed by sluggish streams, and interspersed with numerous swamps. This portion of the State is of alluvial formation. Beyond this plain is a belt of low sand-hills, called the *middle country*, which is moderately productive. West of the middle country is a belt called the *ridge*, where the land rises abruptly, and thence continues to ascend, exhibiting beautiful alternations of hill and dale, till it terminates, at the extreme N.W. part of the State, in the Blue Ridge, the highest peak of which, in S. C., is Table Mountain, 4,000 feet above the sea. King's Mountain, in York district, is an isolated mountain of considerable prominence. The coast-line of S. C. extends from Little River Inlet, in a S.W. direction, to the mouth of the Savannah River, about 200 m., presenting numerous inlets, bays, shallow sounds, and lagoons, and a few good harbors. Winyaw Bay, 14 m. long and abt. 2 m. wide, has at its head the port of Georgetown, to which vessels of light draught ascend. Charleston harbor, where the principal commerce of the State centres, has a difficult sand-bar at its entrance.—Beaufort harbor, which admits vessels of 24 feet draught, is one of the best in the S. States. Stone Inlet, a few miles S. of Charleston, admits vessels drawing 9 or 10 feet of water, and was resorted to during the blockade of Charleston in 1775. A number of small islands skirt the S. coast of the State, which are shut off from the mainland by narrow channels, which afford inland steamboat communication between Charleston and Savannah. These islands are low and flat, and produce the Black-seed, or *Sea-island cotton*. (See COTTON.) —*Rivers*. The principal are:—the Savannah, which

Fig. 2399. — SEAL OF THE STATE.

bounds the State on the S., and for nearly 300 m. marks its line; the Broad River and Pocotaligo, which empty into the Bay of Port Royal; the Combahee, Ashepoco, and Edisto, which empty into the Bay of St. Helena, and are bordered with rich rice and cotton plantations; the Stono, which is in the immediate vicinity of Charleston, and the Ashley and Cooper, on which old Charleston is situated; the Santee, which, through its connection with the Congaree and Wateree, runs through the heart of the State up to the mountains; and the Pedee, which receives the Waccamaw of N. Carolina into its bosom, and empties into the Bay of Winyaw. — *Climate*. Favorably situated between the intense heat of the tropics and the frigid temperature of the North, S. C. enjoys the climate of the S. of France and of Italy; and while the State grows the cotton, rice, tobacco, and even the tea of the Southern plantations, it also produces wheat, rye, oats, barley, and every other product of the most northerly farm. The mean temperature at Charleston is about 65° 5'; and the mortality in the State is 1 death in 71 inhabitants, while in the District of Columbia, for instance, there is 1 in 58 inhabitants, and in Prussia 1 in 36. — *Soil*. The soil of S. C. is diversified. On the uplands, it is clay, loam, sand, or a mixture of all; and in the lowlands and bottoms, an alluvial of more or less value. The larger river bottoms are exceedingly rich, and especially in the tidal region. There are no barrens. — *Min.* The gold-bearing rocks of the Atlantic slope extend through the S. portion of S. C., where the precious metal has been found in sufficient abundance to reward the labor of the miner. Iron of a very superior quality, copper, lead, manganese, bismuth, plumbago, soapstone, coal, black-lead, oxide of titanium, sulphuret of iron, and limestone, are found in divers districts. Granite of the finest grain and uniform appearance, equal to gray marble, is frequent in the upper and middle districts. Materials for pottery, porcelain clay, and arenaceous quartz, and pure sand for glass, are also found in many sections of the State. Mineral springs exist in Spartanburg, Greenville, Abbeville, and Laurens districts. — *Agric.* The usual productions of the State are cotton, the long and short staple, rice, both swamp and upland, tobacco, indigo, sugar, wheat, rye, corn, oats, millet, barley, buckwheat, peas, beans, sorghum, broom-corn, sunflower, guinea-corn, sweet potatoes and white potatoes. Hemp, flax, and hops grow as in their native countries. The grape grows luxuriantly in every portion of the State; and enormous vines are found in woods and swamps, extending to the topmost branches of the tallest forest trees. The sea islands yield annually 10,000 bales of the famous long-staple cotton, while on the mainland there is an annual production of about 750,000 bales of short-staple cotton. The rice crop, which is another of the leading products of the State, yields about 12,000,000 lbs. annually. The growth of tobacco is on the increase, as is also truck farming and fruit growing, the demands of the Northern cities greatly stimulating these industries. Stock-raising, once neglected, has been revived with success, the State possessing about 150,000 horses and mules, 300,000 cattle, 100,000 sheep, and 850,000 swine, with a total value of over \$18,000,000. The field work is done mainly by negroes, and many of these have taken up land for themselves, settling an inferior and abandoned territory, which they have made productive by the use of fertilizers. There are also many white farmers on a small scale, especially in the Piedmont district, who cultivate their own land. The number of farms in the State in 1890 was 115,008, a large increase since 1870, when there were but 51,889 farms. This increase in the division of the land is largely due to the freedmen farmers, and is in a ratio considerably greater than that of Georgia, which comes nearest to S. C. in the transformation which the land system has undergone, but is not nearly so much confined to agriculture as S. C. The area of land included in farms was 13,184,652 acres, of which 5,255,237 were improved, the total value, with improvements, being about \$100,000,000, while the value of farm products was estimated at \$51,337,985. Of the leading grain crops S. C. yielded, in 1895, 19,860,908 bushels of corn, 858,624 of wheat, and 4,390,322 of oats. — *Climate*. The climate of S. C. is mild and salubrious, though there is an exception to the latter in the swamps and rice-growing regions. The equable and dry climate of the pine lands is highly favorable to persons suffering from pulmonary complaints, Aiken and Summerville in particular being noted health resorts. The delightful climatic conditions of the Alpine and Piedmont regions attract many visitors in summer, while in winter other districts prove attractive resorts. Snow is rarely seen south of Columbia, and severe frost is an uncommon visitant. The coast region is occasionally devastated by cyclones, one of which, in 1893, caused great loss of life and property on the sea islands, and did much damage to Charleston and other seaboard cities. A cyclone in 1885 caused a loss of over \$1,500,000 in Charleston alone. In 1886 a severe earthquake visited S. C., Charleston being the center of its ravages, and suffering a loss of property estimated at \$6,000,000, with considerable loss of life. The oldest meteorological record on the American continent has been kept in the city of Charleston, extending back to 1670, while since 1783 it has been kept with much regularity. — *Manuf.* South Carolina is of far less importance as a manufacturing than as an agricultural State, being much surpassed in this particular by the neighboring States of North Carolina, Georgia, and Alabama. The principal manufacturing establishments are cotton factories, foundries, oil mills, and fertilizer works. Cotton weaving has increased until there are about 62 factories, with over 650,000 spindles, 3 of the factories having each

bounds the State on the S., and for nearly 300 m. marks its line; the Broad River and Pocotaligo, which empty into the Bay of Port Royal; the Combahee, Ashepoco, and Edisto, which empty into the Bay of St. Helena, and are bordered with rich rice and cotton plantations; the Stono, which is in the immediate vicinity of Charleston, and the Ashley and Cooper, on which old Charleston is situated; the Santee, which, through its connection with the Congaree and Wateree, runs through the heart of the State up to the mountains; and the Pedee, which receives the Waccamaw of N. Robert Southey

1774-1843

over 50,000 spindles. The cottouseed industry, though of recent introduction, shows a satisfactory growth. In 1894 there were in operation 27 mills, crushing one-fourth of the seed crop—75,000 tons of seed—which was converted into oil, hulls, meal, &c. The manufacture of commercial fertilizers, the basis of which is the phosphate rock which exists in such abundance in the vicinity of Charleston, is the most flourishing manufacturing industry of the State. The product of the factories engaged in grinding the rock and preparing the fertilizers, in and around Charleston, is valued at from \$5,000,000 to \$6,000,000 annually, while the mining of the rock is another profitable industry. The land-owners mine their own rock, but those engaged in mining phosphate rock from the river beds pay the State a royalty of 50 cents a ton. The annual product is about 4,000,000 tons. The shipping price of the fertilizers is about \$20 a ton. In land mining the rock is got out with picks and shovels. In the river beds the work is performed by hand picking, by dredging, and by the use of tongs.—*Commerce*. South Carolina has a large foreign and domestic trade, its exports in the fiscal year of 1894 aggregating \$16,477,409, from the ports of Charleston, Beaufort, and Georgetown. The imports were \$678,406. There are three main systems of railroad: the Southern, 688 miles in length; the Atlantic Coast, 423 miles; and the Seaboard Air Line, 267 miles. The total length of railroad in the State aggregates nearly 3,000 miles.—*Polit. Dir.* The State is divided in 35 counties, formerly called districts, viz.:

Abbeville,	Clarendon,	Horry,	Orangeburg,
Aiken,	Colleton,	Kershaw,	Pickens,
Anderson,	Darlington,	Lancaster,	Richland,
Barnwell,	Edgefield,	Laurens,	Spartanburg,
Beaufort,	Fairfield,	Lexington,	Sumter,
Berkeley,	Florence,	Marion,	Union,
Charleston,	Georgetown,	Marlboro,	Williamsburg,
Chester,	Greenville,	Newberry,	York,
Chesterfield,	Hampton,	Oconee,	

The principal towns are:—Charleston, the most important city in the State, Columbia, the capital, Beaufort, Georgetown, Hamburg, Camden, Greenville, Sumter, Spartanburg, Cheraw, Blackville, Aiken, Winnsborough, Anderson, Yorkville and Chester.—*Govt.* According to the Constitution of 1868, the House of Representatives is to be composed of 124 members, apportioned among the counties according to population, who shall hold office two years. There is to be one senator for each county, elected for a term of four years. The regular State elections are to be held on the third Wednesday in October of every second year, beginning with 1869, and the sessions of the General Assembly are to be held annually on the 4th Monday of November. Ministers of the gospel are made ineligible to seats in the Legislature, and to the office of Governor or Lieutenant-Governor. The Governor and Lieutenant-Governor are to be chosen for a term of two years, and are invested with the functions usual to officers of the same grade in other States. Among the disqualifications for these positions, is a denial of the "existence of a Supreme Being." A Comptroller-General, Treasurer and Secretary of State are to be chosen, to hold office for a term of four years. The judicial power of the State is vested in a Supreme Court; in two Circuit Courts, viz., a Court of Common Pleas, having civil jurisdiction, and a Court of General Sessions, with criminal jurisdiction only; in Probate Courts, and justices of the peace. The General Assembly may also establish such municipal and other inferior courts as may be deemed necessary. The Supreme Court is to consist of a chief justice and two associate justices, chosen by a joint vote of the General Assembly, for a term of six years. The Circuit judges are to be chosen in the same manner, and hold office four years. A Court of Probate is to be established in each county, the judge of which shall be chosen by a vote of the people, for a term of two years. Justices of the peace are elected by the people, and have jurisdiction of all cases where the amount involved does not exceed \$100.—*Educ.* The subject of education was early considered in this State, a free school being established in Charleston as early as 1710. Provision was made for four colleges in 1784, but only two of these were established, and only one (the Charleston College) survives. The South Carolina College was founded in Columbia in 1801, and a system of free schools was organized in 1811. These, however, obtained little aid from the public purse, and were mainly supported by private contributions. The existing public school system was established by legislative enactment in 1868, and has since steadily improved. It provides separate instruction for whites and blacks. Nearly every town has a graded school. In 1894 the number of children of school age in the State was 453,100, of whom 226,766 were enrolled in the public schools, the average daily attendance being 165,115. There were 4,594 teachers. The institutions for higher education are four in number, the South Carolina College (*q. r.*), the South Carolina Military Academy (chartered in 1842), the Clemson Agricultural and Mechanical College (for boys), and the Winthrop Normal and Industrial College (for girls). These four constitute the University of South Carolina, in which must also be included the Medical College of the State of South Carolina, and the pharmacy department of the University, both at Charleston. In addition to these institutions are many private colleges and other educational establishments.—*Liquor Legislation.* S. C. has instituted an original and singular experiment in the problem of the control of the liquor traffic, which has excited widespread attention. It is based on the plan of the Gothenburg licensing system of Sweden, the system

which is there confined to a municipality being here extended to a State. Instead of endeavoring to prohibit the sale of liquor, as has been done in various other States, S. C. has taken the business out of private hands and is seeking to conduct it as a State institution. By an act of the legislature passed in 1892, the sale of liquor by private parties is prohibited, and State and county dispensaries established, in which chemically pure liquors are sold in sealed packages, by paid employees, to temperate persons, the opening of the packages on the premises being illegal. The profits arising are divided between the State and the locality. This law was declared unconstitutional by the State Supreme Court in 1893, but this decision was soon after reversed by the same court, and the law is still in force. *Hist.* The first settlement in S. C. was attempted in 1562, by a colony of French Protestant exiles, who named it *Carolina*, in honor of their monarch, Charles IX., King of France. In 1663, Charles II., King of England, granted a charter to a company of English nobles, and under their auspices the first successful settlement was made at Port Royal, previously founded by the French. In 1680 the foundation of Charleston was laid. Henceforth the population increased steadily, but slowly, on account of the dangerous proximity of the Indians, and the many difficulties which the first settlers had to encounter. In the Revolutionary War, S. C. furnished her full quota of patriot heroes, and ever since the achievement of the independence of the republic, she has had occasion to be justly proud of her statesmen and public benefactors. She has been the first to establish free schools for the education of her people; she claims to have been the first to build a railroad; and the first also to introduce the culture of cotton, of rice, &c. She entered at the head of her Southern sister States into the late Civil War, but she accepted its result with good faith, and no State in the Union seems willing to be more faithful to her pledge than the home of the palmetto. A new constitution, establishing perfect equality between the white and the colored races, was voted in 1869; and, in the same year, the ratification of the 15th Amendment of the Constitution of the U. S. having been carried by a vote of 18 to 1 in the Senate, and 8 to 3 in the House, the State was readmitted to representation in Congress.—*Pop.* (1890) 1,151,149, of whom 692,503 were colored, 458,454 white, 172 Indians, and 20 Chinese. There has been an increase of about 60 per cent. in population since 1870, when the number was 705,606. In 1880 it was 995,577. The estimated total population Sept. 1, 1897, was 1,405,550.

South Carolina College. A co-educational institution, founded in 1801, and organized as a college in 1806. It was reorganized in 1880, with two branches, as the South Carolina Agricultural and Mechanical College at Columbia (for whites), and Claflin University at Orangeburg (for negroes). In 1897, the Columbia branch had 12 instructors and 185 students, with 30,000 volumes in its library, with an income of \$27,500. The Orangeburg branch, which is under the control of the Methodist Episcopalians, had in that year 25 instructors and 600 students, with 2,000 volumes in its library, its revenue being \$30,000.

South Carrollton, in Kentucky, a post-village of Muhlenberg co.

South Charles'ton, in Ohio, a post-village of Clarke co.

South Charles'town, in New Hampshire, a post-village of Sullivan co.

South Cor'inth, in New York, a post-village of Saratoga co.

South Cort'land, in New York, a post-village of Cortland co.

South Cov'entry, in Connecticut, a post-village of Tolland co.

South Dakota, Univer'sity of. A Methodist Episcopal, co-educational institution located at Mitchell, Davison co., opened in 1882. In 1897, it had 14 instructors, 200 students, 14,000 volumes in its library, and an income of \$22,000.

South Dan'vers, in Massachusetts, a post-village and township of Essex co.

South-Down, a. Relating to South Downs, England: as, *South-Down* sheep.

South Dres'den, in Maine, a village of Lincoln co.

South-east', n. The point of the compass equally distant from the south and east.

South-east', SOUTH-EAST'ERLY, SOUTH-EAST'ERN, *a.* Pertaining to, or proceeding from, the south-east.

South Eas'ton, in Pennsylvania, a borough of Northampton co., at the mouth of the Lehigh.

South Eg'remont, in Mass., a p.-v. of Berkshire co.

South Eng'lish, in Iowa, a p.-v. of Keokuk co.

Southerliness, (*süth'er-*) *n.* The state of quality of being southerly.

Southerly, Southern, (*süth'-*) *a.* Belonging to, situated in, or proceeding from, the south.

Southern Cross, n. (*Astron.*) A small brilliant,

southern constellation, the principal stars of which are so arranged as to resemble a cross.

Southerner, (*süth'ern-er*), *n.* A native or inhabitant of the South, or Southern States of the American Union.

Southernly, adv. Toward the south.

Southernmost, a. Furthest toward the south.

Southern-wood, n. (*Bot.*) See ARTEMISIA.

Southey, ROBERT, (*sou'the-*) an English poet and miscellaneous writer, b. in Bristol, 1774. Shortly after leaving Oxford he formed the acquaintance of Coleridge, the two friends marrying at the same time two sisters. After a short visit to Portugal, in 1796, he entered himself a student of law at Gray's Inn; this was, however, subsequently abandoned, and in 1801 he fairly devoted himself to the practice of literature, and soon after took up his residence at Keswick, in Cumberland, where the remainder of his life was passed, he being henceforth classed as one of the Lake poets. In 1807 he obtained a pension from the government, and on the death of Pye was appointed poet-laureate. In 1839, two years after the death of his wife, he married Miss Bowles the poetess. The latter years of his life were clouded by a mental imbecility, which attended him to his death. His poetical works, collected in one volume, enjoyed great popularity; and his admirable philosophic gossiping romance *The Doctor*, &c., which was published anonymously (also in one volume), must long continue to be the delight of the reading and the thinking world. His *Commonplace Book*, a posthumous publication in 4 vols. 8vo, is a marvellous monument of his reading and research. D. 1843.

South Fairfax, in Vermont, a village of Franklin co., 35 m. E.N.E. of Montpelier.

South Farms, in Connecticut, a village of Litchfield co., 35 m. S.W. of Hartford.

South Ot'tawa, in *Illinois*, a township of La Salle co., on the Illinois River, opposite Ottawa.

South Par'is, in *Maine*, a post-village of Oxford co., 38 m. W.S.W. of Augusta.

South Per'ry, in *Ohio*, a post-village of Hocking co., 16 m. S.W. of Logan.

South Pitts'burg, in *Pennsylvania*. See PITTSBURG.

South Point, in *Missouri*, a post-village of Franklin co., on the Missouri River, 52 m. W. of St. Louis.

South Pom'fret, in *Vermont*, a post-village of Windsor co.

South'port, a watering-place of England, co. Lancaster, 18 m. N.E. of Liverpool; *pop.* 22,000.

Southport, in *Connecticut*, a sea-port and post-village of Fairfield county, 24 miles S.W. of New Haven.

Southport, in *Indiana*, a post-town of Marion co., 8 m. S. of Indianapolis.—A village of Owen co., about 1 m. S. of Spencer.

Southport, in *Maine*, a post-township of Lincoln county.

Southport, in *New York*, a post-village and township of Chemung co., 190 m. W.S.W. of Albany.

Southport, in *Wisconsin*, a village of Kenosha co.

South Prai'rie, in *Illinois*, a village of Boone co., 80 m. W.N.W. of Chicago.

South Pul'tney, in *New York*, a post-village of Steuben co., 210 m. S.W. of Albany.

South Read'ing, now WAKEFIELD, in *Massachusetts*,

a post-town of Middlesex county, 11 m. N. of Boston.

South Read'ing, in *Vermont*, a post-village of Windsor co., 60 m. S. of Montpelier.

South River, in *Iowa*, flows into the Des Moines River in the S.E. of Polk co.

South River, in *Missouri*, a township of Marion county.

South River, in *N. Carolina*, rises in Cumberland co., and flowing S.E., enters Cape Fear River 10 m. N.W. of Wilmington.

South River, in *New Jersey*. See MANALAPAN BROOK.

South River, in *Virginia*, rises in Augusta co., and flowing N.E., enters the main branch of the Shenandoah River at Port Republic, in Rockingham co.

South'ron, *n.* A southerner.

South Roy'alston, in *Massachusetts*, a post-village of Worcester co., 35 m. N. of Worcester.

South Roy'alton, in *Vermont*, a post-village of Windsor co., abt. 35 m. S.S.E. of Montpelier.

South Sa'lem, in *New York*, a post-village of Westchester co., 120 m. S. of Albany.

South Salem, in *Ohio*, a post-village of Ross co., 16 m. S.W. of Chillicothe.

South Sand'wich, in *Massachusetts*, a post-village of Barnstable co., 60 m. S.E. of Boston.

South Schodac, (*scho-dak'*) in *New York*, a post-village of Rensselaer co., 18 m. S.E. of Albany.

South Scituate, in *Massachusetts*, a post-village and township of Plymouth county, 25 miles S.E. of Boston.

South Scituate, in *Rhode Island*, a post-village of Providence co.

South See'konk, in *Massachusetts*, a post-village of Bristol co., 45 m. S.S.W. of Boston.

South Shaftes'bury, in *Vermont*, a post-village of Bennington co., 49 m. S.W. of Rutland.

South Shenan'go, in *Pennsylvania*, a township of Crawford co.

South Shrews'bury, in *Massachusetts*, a village of Worcester co., 35 m. S.W. of Boston.

South So'dus, in *New York*, a post-village of Wayne co., abt. 190 m. N.W. of Albany.

South So'lon, in *Ohio*, a post-village of Madison co., 5 m. S. of Columbus.

South Stafford, in *Vermont*, a post-village of Orange co., 35 m. S.S.E. of Montpelier.

South Stow, in *Vermont*, a village of Lamoille co., abt. 18 m. N.N.E. of Montpelier.

South Strabane, in *Pennsylvania*, a township of Washington co.

South Thom'aston, in *Maine*, a post-village and township of Knox co., on Penobscot Bay, 40 m. E.S.E. of Augusta.

South Ty'ringham, in *Massachusetts*, a village of Berkshire co., 120 m. S.W. of Boston.

South Union, in *Kentucky*, a post-village of Logansport co., 165 m. S.W. of Frankfort.

South Union, in *Pennsylvania*, a township of Fayette co.

South Val'ley, in *New York*, a post-village of Otsego co., abt. 12 m. E. of Cooperstown.

South Ver'non, in *Vermont*, a village of Windham co., on Connecticut River, 100 m. S.E. of Montpelier.

South'ville, in *Connecticut*, a post-village of Litchfield co., 30 m. N.W. of New Haven.

Southville, in *Kentucky*, a village of Shelby co., 31 m. W.N.W. of Frankfort.

Southville, in *New York*, a post-village of St. Lawrence co., 220 m. N.N.W. of Albany.

South Wales, in *New York*, a post-village of Erie co., 21 m. S.E. of Buffalo.

South Wal'pole, in *Massachusetts*, a post-village of Norfolk co., abt. 22 m. S.W. of Boston.

Southward, (*süth'wärd*), *adv.* Toward the south.

—*n.* The southern regions or countries.

Southwark, (*süth'wärk*), a parliamentary borough of England, co. of Surrey, of which it is the largest town, and also a suburb of the city of London. It is situated on the S. bank of the Thames, immediately opposite the city of London, with which it communicates by London, Southwark, and Blackfriars' bridges. *Pop.* abt. 200,000.

South'wark, in *Pennsylvania*, a former district of Philadelphia co., on the Delaware River. It is now included within the limits of the city of Philadelphia.

South Weber, in *Utah*, a post-village of Davis co., 30 m. N. of Salt Lake City.

South Well'fleet, in *Massachusetts*, a post-village of Barnstable co.

South-west, *n.* The point of the compass equally distant from the south and west.

South-west, or **South-west'erly**, *a.* Lying in the direction of the south-west; coming from the south-west.

South-west, in *Pennsylvania*, a post-township of Warren co.

South-west'er, *n.* A gale or storm from the south-west.

South West'erloo, in *New York*, a post-village of Albany co., 20 m. S.W. of Albany.

South-west'ern, *a.* In the direction of south-west.

South West Harbor, in *Maine*, a post-village of Hancock co., 114 m. S.E. of Augusta.

South West Keys, or ALBUQUERQUE ISLANDS, a group in the Caribbean Sea, 110 m. E. of the Mosquito coast; Lat. 12° 4' N., Lon. 81° 50' W.

South West'port, in *Massachusetts*, a post-village of Bristol co., 60 m. S.W. of Boston.

South Wey'mouth, in *Massachusetts*, a post-village of Norfolk co., 11 m. S. of Boston.

South Wheel'ing, in *W. Virginia*, a village of Ohio co., on the Ohio River.

South White'hall, in *Pennsylvania*, a post-twp. of Lehigh co., 6 m. N.W. of Allentown.

Southwick, (*süth'ik*), in *Massachusetts*, a post-twp. of Hampden co., 100 m. S.W. of Boston.

South Wil'braham, in *Massachusetts*, a post-village of Hampden co., 11 m. E.S.E. of Springfield.

South Williamstown, in *Massachusetts*, a post-village of Berkshire co., 130 m. N.W. of Boston.

South Wind'ham, in *Connecticut*, a post-village of Windham co., 26 m. N. of New London.

South Windham, in *Maine*, a post-village of Cumberland co.

South Wind'sor, in *Connecticut*, a post-township of Hartford co., on the Connecticut River, 8 m. N.E. of Hartford.

South Wo'burn, in *Massachusetts*, a village of Middlesex co., 8 m. N.N.W. of Boston.

South Wolf'borough, in *New Hampshire*, a post-village of Carroll co., 35 m. N.E. of Concord.

South Wood'bury, in *Pennsylvania*, a township of Bedford co.

South Wood'stock, in *Connecticut*, a post-village of Windham co., 38 m. N.E. of Norwich.

South Wood'stock, in *Vermont*, a post-village of Windsor co., 50 m. S.E. of Montpelier.

South Worcester, (*woos'ter*), in *New York*, a post-village of Otsego co., 60 m. S.W. of Albany.

South Wrentham, (*went'*), in *Massachusetts*, a village of Norfolk co., 25 m. S.W. of Boston.

South Yad'kin, in *North Carolina*, a small stream which enters the Yadkin River 9 m. N. of Salisbury.

South Yar'mouth, in *Massachusetts*, a post-village of Barnstable co., 80 m. S.E. of Boston.

Souval'ky, a town of Russian Poland, on the Charnagarche, a tributary of the Nieuwen, 538 m. S.W. of St. Petersburg; *pop.* 13,143.

Souvenir, (*soov-neer'*), *n.* [Fr.] A keepsake; a memento.

Souz'dal, a town of European Russia, govt. of Vladimir, is said to have been founded 606 B. C.; *pop.* 7,224.

Sovereign, (*suw'er-in*), *a.* [Fr. *souverain*; It. *sovano*, from Lat. *supremus*, highest, from *super*, *supra*, above.] Supreme in power; possessing supreme dominion; superior to all others; chief; pertaining to the first magistrate of a nation.—Supremely efficacious; predominant; effectual.

—*n.* One who possesses the highest authority without control; a king, prince, monarch, or emperor; a supreme magistrate.

(*Numis*.) An English coin of the value of 20 shillings, the standard weight of which is 5 pennyweights and 3-27 grains, or 123-374 troy grains; a pound sterling, equal to \$5 (gold).

Sovereignly, *adv.* In a sovereign manner; supremely. (*n.*)

Sovereignty, *n.* [Fr. *souveraineté*.] State or power of a sovereign; supreme power; supremacy; the possession of the highest power, or of absolute dominion.

Sow, *n.* [A. S. *sugu*; Dan. *so*; Ger. *sau*.] The female of the hog kind, or of swine.

(*Foundry*.) A large trough for holding melted metal.—An ingot or mass of metal.

—*v. a.* [A. S. *sawan*; Ger. *säen*; Du. *zaaijen*; Lat. *sero*.] To cast or scatter on the ground, for the purpose of growth and the production of a crop; to scatter, as seed.—To spread or to originate; to propagate.—To supply or stock with seed.—To scatter over; to besprinkle.

—*v. n.* To scatter seeds for growth and the production of a crop.

Sow'-bread, *n.* (*Bot.*) See CYCLAMEN.

Sow'-bug, *n.* (*Zööl*.) See ONISCUS.

Sower, *n.* One who scatters or spreads; one who sows or scatters seed for propagation.—A breeder; a promoter.

Sow'erby Bridge, a town of England, in the West Riding of Yorkshire, 3 m. S.W. of Halifax. *Manuf.* Woollen. *Pop.* 6,500.

Sow'ing, *n.* (*Agric.* and *Hort.*) The process of depositing seed in the soil for the purpose of producing plants. The operation of sowing is generally performed in spring, in order that the plants may have the advantage of the coming summer. The seed is either scattered abroad, or deposited in rows or drills; on a small scale by the hand, and on a large scale by a sowing-machine. Some seeds which are of large size are planted singly. The covering of seeds is greater or less, according to their size and the texture of the soil. Where the soil is somewhat firm, and the seed is pressed into it by a roller, or by other means, and where the climate is moist, very little covering is necessary; but where the soil is loose, and the climate dry and warm, the covering should be twice or thrice the thickness of the seeds.

S-machine. (*Agric.*) A machine for depositing seeds in the soil, either by scattering broadcast, or by dibbling individually, or by placing them in rows, at a greater or less distance asunder. Machines for sowing seeds in rows are termed *drills*.

Sow-thistle, (*-thistl'*), *n.* (*Bot.*) See SONCHUS.

Sox'ville, in *Pennsylvania*, a village of Monroe co., 131 m. N.E. of Harrisburg.

Soy, *n.* See SOJA.

Soy'mida, *n.* (*Bot.*) A genus of plants, order *Erythroxylaceæ*. *S. febrifuga* is the Rohuna or Red-wood tree. Its bark is tonic, febrifugal, and astringent.

Spa, or SPAA, a town of Belgium, and a watering-place of world-wide celebrity, stands in a romantic valley amid hills which form part of the Ardennes chain, 27 m. S.E. of Liège, and 22 m. S.W. of Aix-la-Chapelle by railway. The prettily-built town consists almost entirely of inns and lodging-houses. The mineral springs, seven in number, are all chalybeate, and contain minute quantities of iron, so combined with alkaline salts and carbonic acid gas as to be both easily digested and agreeable to

the salate. They are cold, bright, and sparkling, and are efficacious in complaints of the liver, nervous diseases, dyspepsia, &c. Spa-water is exported to all quarters of the globe. The other springs are in the vicinity of the town, and most of them are situated amid picturesque plantations. S. is also famed for the manufacture of wooden toys, which are stained brown by being steeped in the mineral waters. S. was frequented as a watering-place as early as the 14th cent., and has given its name to many mineral springs. *Pop.* 5,173.

Spa, n. A general name for springs of mineral water, from the place of this name in Belgium.

Space, n. [Fr. *espace*; It. *spazio*; Lat. *spatium*.] Extension, as in length, breadth, thickness, extent; any quantity of extension. — Quantity of time: also, the interval between two points of time. — A short time. (R.) (*Geom.*) S. is not the mere notion of room in which a material object does or may exist, but it is the room in which an object, actual or imaginary, determinate necessarily as to its form and possibly as to its magnitude and its position, does exist.

(*Metaph.*) Matter as known to us, *i. e.* as it exists so far as we are concerned, has always parts. We only know it either as a number of objects, forming parts of a great existing whole—the material universe—or as an object, one of these parts, itself the aggregate of a number of parts. As a whole, also, it is always known to us in a continual variation of state, in a constant change of condition and relation among its constituent parts. Our knowledge of it thus involves three distinct notions—*space, number, and time*. In their most elementary forms: *space* is the room in which more than one material object, or more than one part of a material object, exists, or, in other words, the room in which matter necessarily (*i. e.*, only known to us as) extended does exist; *number* is the plurality, or more-than-oneness, of two or more material objects, or two or more parts of a material object; *time* is the consecution or non-simultaneity of two states—conditions or relations of a material object. These are not definitions of space, number, and time; they add no clearness to our ideas of them; they are only verbal limitations of them to their elementary and primary forms as notions in the human mind. As such notions, they are intuitive and cannot be defined, for that what is intuitive cannot be defined is a maxim in logic. Similarly in spiritual existence, as known to us, an intelligence can exist only as an aggregate of consecutive states, and this knowledge, apart from any knowledge of matter, involves the notions of number and time. Space, number, and time, then, are not existences *per se*; apart from material and spiritual existence we can form no notion of them. As to the infinity of physical space, or the infinity of actual material existence, all that we can say is, that however far we advance (and we have advanced a great deal) in the power of discerning distant objects, we have uniformly found new objects to discern, and we have, therefore, good analogical reason for supposing that no limit can be assigned to their still further existence. This view of what is commonly called the infinity of space is further supported by the fact that metaphysical space, as a conjugate of material existence, in no way precludes the possibility of its infinite extension.

(*Mus.*) The void between the lines in a musical staff. The spaces are four in number, and the lines five.

(*Print.*) The distance or interval between lines or words, as in books. — Also, one of the thin pieces of type metal, cast to various thicknesses and different lengths, and not so high as type, which are put between and increase the width between the lines. They are generally called *leads*.

Space'-rule, n. (*Print.*) A fine line, cast type high, generally cast to a 4-to-pica lead in thickness, and to any length required. It is used in setting up tabular matter.

Spac'ing, n. (*Print.*) The adjustment of the distance between the words in a line, so that there shall not be any glaring disproportion.

Spa'cious, a. [Fr. *spacieux*; Lat. *spatiosus*.] Having large, or ample space or room; roomy; wide; not narrow, as a church. — Extensive; ample; capacious.

Spa'ciously, adv. Widely; extensively.

Spa'ciousness, n. The quality of being spacious; wideness; largeness of extent; roominess; extensiveness; vastness of extent.

Spade, n. [A. S. *spad*, *spadu*; Du., Dan., and Sw. *spade*; Ger. *spaten*.] An instrument for digging or cutting the ground, consisting of a broad and nearly rectangular blade of iron, with a handle. — A deer three years old.

—*pl.* A suit of cards.

—*v. a.* To dig with a spade, or to pare off, as the sword of land with a spade.

Spade'-ful, n. As much as can be placed on a spade.

Spadi'ceous, Spadi'cose', a. [From Lat. *spadix*, *spadicis*.] Of a light red color.

(*Bot.*) Like, or bearing, a spadix.

Spadille', n. [Fr.] The ace of spades in the game of ombre and quadrille.

Spa'dix, n. [Lat.] (*Bot.*) A form of inflorescence in which the flowers are arranged around a fleshy rachis, and enclosed within a kind of bract called a *spathe*, as in palms and araceous plants.

Spa'do, n.; pl. Spa'dones. [Lat.] A gelding; a castrated beast.

Spad'ra, n. In *Arkansas*, a township of Johnson co.

Spad'ron, n. A sword lighter than a broadsword, and made to cut and to thrust.

Spaf'ford, n. In *New York*, a post-township of Onondaga county, on Skaneateles Lake, 150 miles N.W. of Albany.

Spaf'ford Ho'low, n. In *New York*, a post-village of Onondaga co., 140 m. W. of Albany.

Spagnole'tto. See *RIBERA*.

Spah'is, n. [Same as *Sipahi* or *Sepoy*.] Formerly, a Sepoy. See *SEPOYS*. — At the present time, a soldier belonging to one of the regiments (called *regiments of Spahis*) raised by the French from among the native tribes of Algeria and from France in about equal proportion; the dress, especially of the indigenous soldiers, partakes very much of the Arab character.

Spain, (anc. Hispania,) [Sp. *España*, Fr. *Espagne*,] an extensive kingdom of S. Europe, occupying the E. and largest portion of its S.W. peninsula, between Lat. 36° 5' and 43° 30' N., and Lon. 3° 20' and 9° 10' E., having on the W. Portugal and the Atlantic, and S. and E. the Straits of Gibraltar and the Mediterranean. Greatest length, E. to W., about 650 m.; greatest breadth, 550 m. *Area*, 184,000 sq. m. — *Pol. Div.* Spain was formerly divided into a number of provinces, which formed as many separate governments under the Moors, or under the Christian chieftains. The whole were united under one head about the close of the 15th century; but the divisions, and even the titles (generally of kingdoms), were retained, and were attended with consequent discrepancies in the mode of administration. Actually, the 12 ancient divisions of the kingdom, inclusive of the adjacent islands, are divided into 49 provinces, as follows: — 1. *New Castile*: Madrid, Guadalajara, Toledo, Cuenca, Ciudad Real; 2. *Old Castile*: Burgos, Logroño, Santander, Oviedo, Soria, Segovia, Avila, Leon, Palencia, Valladolid, Salamanca, Zamora; 3. *Galicia*: Corunna, Lugo, Orense, Pontevedra; 4. *Extremadura*: Badajoz, Caceres; 5. *Andalusia*: Seville, Huelva, Cadiz, Jaen, Cordova; 6. *Granada*: Granada, Almeria, Malaga; 7. *Valencia*: Valencia, Alicante, Castellon-de-la-Plaña, Murcia, Albacete; 8. *Catalonia*: Barcelona, Tarragona, Lerida, Gerona; 9. *Aragon*: Zaragoza, Huesca, Ternel; 10. *Navarre*: Navarre; 11. *Guipuzcoa*: Alava, Biscay, Guipuzcoa; 12. *Islands*: The Balearic and Canary Islands. — *Desc.* The shape of Spain resembles that of a very irregular pentagon, the longest side of which faces the N. The coast-line is, on the whole, pretty regular without those great and sudden indentations that characterize the shores of many other countries, though an exception may be made as regards the coast of Galicia, which is fringed with bays and headlands, the principal among the former being the bays of Betanzos, Pontevedra, and Vigo; and among the latter the capes Estaca, Ortegal, and Finisterre. The other capes of S. are principally on the coast of the Mediterranean. Cape Tarifa abuts on the Strait of Gibraltar; and further N. are capes Gata, Palos, La Nao, and Crenx, the last being the extreme E. point of the peninsula. The surface is very much diversified, and intersected with mountains; but the whole may be described as a table-land of considerable elevation, Madrid, the cap., being 2,173 feet above the sea, which is the average height of the towns in the interior. Five chains of mountains are pretty clearly defined, running from E. to W., through the peninsula.

1. The range of the *Pyrenees*, not only divides France from S., but runs in a continuous chain parallel to, and at a short distance from, the N. shore, upwards of 600 m., as far W. as Cape Finisterre. The E. division is known as the *Pyrenees*, properly so called, the W. portion consisting of the Asturian Mountains; the highest point in the former is the Pic de Netore on Mount Maladetta (11,424 ft.), and in the latter the Peña de Peñaranda, S.W. of Oviedo (11,031 ft.). 2. A range extending W.S.W. from the Ebro, near Tudela, dividing Old and New Castile, Leon, and Extremadura, and thence running S.S.W. through Portugal to Cape Roca, near Lisbon; the culminating point is the Sierra de Grados (10,552 ft.), at the S.W. angle of Old Castile; but the average height does not exceed 4,500 ft. 3. A chain branching S.W. from that last mentioned, divides the basin of the Tagus from that of the Guadiana; the central portion, S. of Toledo, called the *Sierra de Guadalupe*, attains a height of 5,110 ft. 4. A range, called the *Sierra Morena*, runs along the S. border of La Mancha, in New Castile, which, though not continuous, and of no great extent, forms the water-shed between the Guadiana and Guadalquivir. 5. The *Sierra Nevada*, runs from Cape Palos, near Carthagena, almost as far as Cadiz; it is at no great distance from the Mediterranean, the most elevated part being S.E. of Granada, where the Serro de Mulhagen rises 11,660 ft. above the sea; the peak of Veleta is 11,385 ft. in height. — *Rivers.* In each of the valleys formed by these mountains, flows one of the great rivers of Spain, to which the smaller streams are tributary. These are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. Spain, however, is not a well-watered country; for, although the rivers are long, their water-volume is small. In the Douro drains the N. of the central table-land, and, in its lower course, the N. of Portugal. The Tagus is the largest river in the peninsula, and drains the central portion of the table-land, between the Castilian Mountains and the Sierra de Toledo, and, in its lower course, Central Portugal. The Guadiana drains the S. of the table-land, and the Guadalquivir drains another district S. of the great table-land. The Ebro drains the N.E. and has a rapid course; while the Minho forms the N. boundary between Spain and Portugal. — *Soil.* The central region consists for the most part of arid, unsheltered plains either of sand or gypsum, intersected with lofty mountains, which reflect with intolerable fierceness the scorching heat of summer, and sharpen into more intense keenness the extreme cold of winter. The lower region of the coast, sloping gradually towards the sea, is broken into an alternation of mountains and valleys, producing the most agreeable variety, and presenting a pleasant

contrast to the bleak and barren sameness which characterizes the central region. It is everywhere fertile, or may be rendered so by irrigation. The alluvial soil of Old Castile is tolerably productive, even without irrigation. New Castile has every variety, from the gypseous marl composing the poor soil about Madrid, to the red marl of Guadalaxara and the limestone of Arganda. The valleys of the Sierra Morena, and the whole of Extremadura, have a soil formed of detritus from primary rocks, and cannot be excelled in beauty and natural fertility. The soil of Andalusia is chiefly of marl and clay, interspersed with red-sandstone marls, and it is by irrigation only that it can be made productive. The Vega of Malaga, however, is naturally of surprising fertility, owing partly to the long establishment of irrigation, but partly, also, to the fact of its being in a great measure alluvial. Valencia has a poor, ungrateful soil, yielding crops only by forced cultivation and the use of water. In Catalonia and Aragon the detritus of limestone is found alternating with fine red marls and waste tracts of gypseous marls, similar to those near Madrid. On the whole, the valleys of the Sierra Morena and the Alcarria, the provinces of Toledo and Guadalaxara, the Vega of Malaga, and the country between Gibraltar and Cadiz, would probably repay the labors of agriculture better than other parts of S. — *Climate.* S. is greatly diversified, being modified by the physical conformation of the country. The temperature of the air, always varying less near the coast than in the interior, is much more equable in the maritime than the other provinces. On the N. and W. coast, westerly winds prevail; and being loaded with moisture from the Atlantic, discharge abundant rains in winter and spring. The coast of the Mediterranean has a calmer atmosphere, with a prevalence of E. winds, and a temperature generally rising above 57° Fahr., and seldom descending so low as 32°. Winter indeed, is almost unknown on a coast sheltered by the elevated land of the interior, and warmed by the rays of a cloudless sun; while the heat of summer is very great, and would be all but intolerable were it not lessened by the sea-breeze, which lasts during the greater part of the day. On the plateau of Castile, the mean height of which, according to Bruginère, is about 1,960 feet above the sea, heat accumulates much more slowly, and it is only during the month of July that the temperature ascends as high as 77° Fahr. In August, the mornings and evenings begin to be cold, and in winter the severity of its climate forms a very striking contrast with the heats of summer. Owing to its extreme and sudden variations, the climate of the central plateau is far from healthy. The Madrid colic is always dangerous, and often fatal to strangers; besides which, there is a general tendency to pulmonary consumption and other diseases of the lungs. — *Minerals.* Abundant; they comprise lead, quicksilver, iron, marble, and good building-stone. The iron-works of Biscay, Aragon, and Asturias, have been of great note for several centuries. Precious stones are found on excavating particular spots; and there are indications of coal-mines in various parts, though they are not as yet extensively wrought. Salt forms one of the chief products of Spain; it is procured by evaporating sea-water, a process to which the climate of Spain is as favorable as that of Portugal and Sardinia. — *Forests* are less extensive than any other large country of Europe. — *Zoöl.* Among the animal products of S., the horse is entitled to particular notice. The Arabs, when in possession of the country, stocked it with their finest breeds; and though the race has degenerated, it still shows many of the points by which it was originally distinguished. In beauty, grace, and docility, the horses of Andalusia are said to be superior even to those of England. Great numbers of mules are bred in Old Castile. The asses are of large size, carefully bred, and in strength, docility, and sure-footedness, nearly equal to the mules. The bull of Andalusia is found wild in the Sierra Morena. Hogs are bred in vast numbers. Sheep, however, are the favorite stock of S., nor are there wanting wild animals, such as wolves, lynxes, wild cats, wild boars, and foxes. The bear is now found only in the Pyrenees. Monkeys are met with in the Sierra de Ronda, besides which there are various reptiles, as chameleons, lizards (some 2 feet long), and snakes. Among the birds may be mentioned several species of vultures, falcons, owls, ravens, magpies, partridges, quails, bustards, and plovers. — *Agric.* With the exception of a few districts which have peculiar facilities for irrigation, agriculture at present is in the most backward state imaginable. A great part of the land is not tilled, and that which is tilled is executed in so careless and slovenly a manner as to produce a starved crop of corn in spots where they might command the most abundant harvests. The corn is usually choked up with stones, filth, and weeds of every kind. Generally speaking, tillage-farms are small, and rents low; but owing to the exorbitant taxes, and other expenses wholly exclusive of rent, the farmers are wretchedly poor, and when they require money, are obliged to obtain it at exorbitant interest, by mortgaging their crops. The implements of husbandry are of the rudest description; it is not uncommon, in the S., to see men returning from ploughing seated on a mule, to the sides of which their whole apparatus is tied; the use of faners is unknown, except in the neighborhood of seaport-towns. The most careful cultivation is found in the *huertas*, or irrigated lands of Granada, Murcia, and Valencia. These tracts, indeed, are considered as the gardens of S., and abound not only with every variety of fruits, but all kinds of vegetables and plants, useful either as food or materials for manufactures. The mild red pepper raised in the huerta of Murcia is celebrated all over S., and forms a considerable article of trade with the interior. Rice is

the chief product of Valencia. The sugar-cane of Granada and Valencia is as good as that of the West Indies; but it is cultivated at much greater expense, and its growth has, in consequence, been almost wholly abandoned. Considerable quantities of corn are raised in different parts along the S.E. coast. Mulberry-trees are carefully cultivated in the S. provinces; those of Murcia and Valencia are white, those of Granada black. In the cultivation of vines, poles are not used, but the cuttings are planted, and not being permitted to attain any great height, gradually form thick and very stout stocks. Espaliers, also, are numerous, especially in Andalusia, and the grapes on these vines attain an extraordinary size, the bunches often weighing from 12 to 14 pounds. The rich level lands produce the largest quantities of wine; but here, as elsewhere, that raised on gravelly soils on the hilly slopes is the best. The quality of the wine varies greatly in different districts; but it may be said with truth that, except the wines of Xeres, Rota, Malaga, Alicante, and Benicarlo, which are intended for exportation, few of the Spanish wines are equal even to those of third-rate quality in France. Being very generally kept in skins smeared with pitch, they acquire an *olor de bota*, or peculiar taste, and a flavor not disliked by the natives, but very disagreeable to foreigners. The Pyrenees, the hilly parts of Biscay and the Asturias, the vast plains of Andalusia, the two Castiles, Estremadura, and Leon, are almost wholly in pasture; and in some parts the traveller may journey for many miles without seeing either a house or an individual. In point of fact, however, half the pastures really consist of heaths, or of neglected tracts covered with thyme and other wild herbs, that at present are next to worthless. The Spaniards distinguish their sheep into the *sedentary*, or those which remain in the same place during the year, and the *migratory*, or those which move from place to place. The latter, or *transhumantes*, consisting chiefly of the Merinos, or fine-wooled breeds, are depastured during winter in the vast plains of Andalusia, Castile, Leon, and Estremadura; and are driven in summer to the nearest mountains. These migratory flocks are collected for their journeys in large bodies of 10,000 and upwards, called *mestas*, their peregrinations being regulated by a peculiar code of laws, and by immemorial custom. — *Manuf.* Catalonia, Biscay, and Valencia are the most industrious provinces, and in them manufactures are most advanced. Those of silk and cotton, especially the first, are carried on to a considerable extent in Barcelona, Valencia, and other towns; but, though the fabrics be excellent, the colors are wretched. The blondes mantillas of Almagro, in La Mancha, are perhaps the best of the Spanish manufactured articles. Broadcloth is made at Alcoy in Valencia, and coarse cloths (*pano pardo*) are extensively manufactured in Catalonia, and in various districts throughout the country. But, with the exception of silks, all the woven fabrics produced in S., whether woollens, cottons, or linens, are at once badly finished and enormously dear; even the coarse, hard-spun *manías*, that serve the muleteers for cloaks and blankets, bring exorbitant prices. — *Commerce.* The total imports of S., including bullion and specie, averaged \$80,000,000 per annum, within the ten years from 1885–95, while the exports within the same period averaged \$95,000,000. The great articles of export from Spain are wine, olive-oil, wool, fruit of various kinds, lead, quicksilver, brandy, cork-wood, salt, raw silk, and wheat. The most important articles of import are colonial products, obtained principally from Cuba; cotton and cotton-wool, linens, hemp and flax, woollens, salted-fish, hardware, glass and earthenware, timber, rice, hide, leather, and cheese. S. was famous in ancient times for her mineral wealth, and abt. 2,000 mines are still worked, but some of them are very insignificant. The total value of the minerals and ores raised in the year 1896 amounted to \$10,046,816, and that of the metals to \$16,880,749. — *Roads and Railways.* S., until very recently, was singularly destitute of roads and other means for the speedy and easy transport of travellers and products from place to place. The king's highways (*caminos reales*), the only roads worthy of the name, extended only between the more important places. The ordinary roads of S. were always, and to a great extent still are, in a wretched condition, the consequences of which, for trade and industry, have been only remedied, within the last few years, by the construction of a vast and tolerably well planned network of railway. The railway system centres at Madrid, from which four great lines radiate in as many directions, connecting the capital with all the more important towns of the kingdom. The whole of the Spanish railways belong to private companies, but nearly all have obtained guarantees, or subventions, from the government. The length of lines in 1897 was 6,970 miles, and 900 miles were in course of construction. — *Religion.* S. has long been, and still is, the favorite seat of the Roman Catholic religion, the country in which it has been maintained in the greatest purity, and to the exclusion of every other. The Inquisition was introduced, or, at all events, vested with a vast increase of power, in the reigns of Ferdinand and Isabella; and that formidable tribunal ultimately succeeded, by dint of the stake and the rack, and such like atrocious means, in exterminating heresy, or, in other words, all difference of opinion as to religious matters in S.; and it was, also, mainly instrumental in prevailing on its weak and bigoted sovereigns to banish the Moors. According to an official statement drawn up in 1812, it appears that the clergy were then in possession of about one-fourth part of the landed property of the kingdom, exclusive of tithes and other casual sources of income, producing in all a total gross revenue of about \$55,000,000 a year. The revenues of some of

the high ecclesiastics were immense; the archbishopric of Toledo is said to have been worth from \$325,000 to \$400,000 a year. A decree of the 9th of March, 1836, entirely suppressed all conventional establishments and religio-military orders. This decree gave rise to a long dispute with the head of the Roman Catholic church, which ended in the sovereign pontiff conceding the principles of the measures. By a concordat with Rome (1859) the Spanish government was authorized to sell the whole ecclesiastical property, except churches, in return for an equal amount of untransferable public debt certificates, bearing interest at the rate of 3 per cent. — *Govt.* The government of S. was long a limited monarchy, the people being represented by their Cortes. But after the union, in the 15th cent., of the different provinces into one kingdom, the concentration of power in the executive branch enabled the latter to dispense with the Cortes, and to encroach on the privileges of the provinces; so that, on the accession of the house of Bourbon, in 1700, there remained hardly any vestige of independence, except in Biscay. Since 1833, a constitutional representative monarchy has been adopted. — *Education.* Up to a very recent period, the great mass of the population of S. were in a state of extreme ignorance. It was rare, in the latter part of the 18th cent., and the beginning of the present, to find a peasant or an ordinary workman, who was able to read, which accomplishment among women was even held to be immoral. Until 1808, public education was in the hands of the clergy; but late enactments, giving the instruction of the people in charge of the government, have made a radical change in this respect. The state, however, pays but a very small sum towards public education, which is left mainly to the charge of the communes and the parents themselves; but the superintendence of the government over educational matters has led to vast progress. In 1797, only 393,126 children attended the primary schools, which were very imperfect. In 1812, the Cortes tried to introduce some modifications, but failed, on account of the war, in making a radical

Fig. 2400. — PEASANTS OF ALICANTE.

reform in popular education. Fresh efforts were made in 1820 and 1825, but still without much success. The law of July 21, 1838, enjoining the expenditure of considerable sums by the communes for the purpose of public instruction, proved a great step in advance. It was found, at the census of 1860, that of the total pop. there were 2,414,015 men, and 715,906 women, able to read and write; 316,577 men, and 389,211 women, able to read but not to write; and that all the rest, upwards of 5,000,000 men, and 6,800,000 women, could neither read nor write. Since then the government has made efforts to improve public instruction, and the higher institutions of learning have been the object of special solicitude. — *Finances.* The annual revenue of S. is about \$141,500,000. The total capital of the public debt in 1896 was \$1,475,453,696. In 1851, owing to the inability of the gov. to pay in full, part of the debt of S. was converted into passive stock, not bearing interest, and to be liquidated by an annual sinking fund. This law closed the London and Paris markets against Spanish loans. It was admitted by successive ministers of finance in recent years that S. was absolutely unable to pay interest on its debt in the existing state of things, ruined both by a costly civil war, and desperate and equally costly efforts to suppress the Cuban insurrection. — *Army and Navy.* The army is formed by conscription. The time of service in the infantry is 8 years, of which 5 have to be spent in the infantry of the line, and 3 in the provincial militia. For military purposes the kingdom is divided into 5 districts, or *capitanías-generales*, at the

head of each of which stands a *captain-general*. For the year 1897 the strength of the army on the peace footing was fixed at 146,200 men; on the war footing (including the national guard) at 1,280,000. The navy, commanded by one captain-general of the fleet, consisted of 11 armored and 63 unarmored ships, 2 armored and 40 unarmored gunboats, 79 torpedo boats, &c., with a total of 960 guns. The officers, seamen, &c., aggregated 26,460; the naval reserves, 25,000. — *Races, &c.* There are four distinct races in S.: 1. The *Spaniards*, who form the bulk of the population; 2. The *Basques* (about 500,000), descended from the ancient Cantabrians, and living in Navarre and the Basque provinces; 3. The *Mooriscos*, descendants of the Moors, about 60,000 of whom still reside in Granada and the Alpujarras; and, lastly, the *Gitanos*, or Gypsies, a race (comprising about 50,000) spread all over the peninsula, but especially on the S.E. coasts, not strolling from place to place, as in England, but generally pursuing fixed occupations in the towns. The Spaniards are middle-sized, thin, with well-proportioned limbs, dark hair, black piercing eyes, overshadowed by thick eye-brows, sharp features, and sallow complexions. The women are generally of middle or low stature, but gracefully formed, with almost aquiline noses, full, dark, expressive eyes, dark hair, and complexions varying from the flesh-tint of Northern Europe to the light-olive of the Moors. The character of the Spaniards has been variously drawn; but, though it differs materially in different provinces, its discriminating features are not to be mistaken. Though commonly slow, cautious, and deliberate, they become, when their passions are roused, rash, violent, and precipitate in the extreme. Though formal, they are courteous in their bearing, and, though grave, polite. The pride of the Spaniards is proverbial, and they entertain the most overweening opinion of themselves and their country. Though friendly, they are easily offended, vindictive, and more inclined to revenge real or fancied insults than to remember favors. They are fond to excess of show and ostentation, and will endure the greatest privations at home to make a display in public. Their vicious institutions and their climate have made them in the last degree indolent and procrastinating. They are infinitely less jealous now than formerly, and their bigotry has become passive rather than active. They have ceased, in fact, to care much about religion, and are satisfied if they observe the fasts and external duties which it enjoins. In S. there is a good deal of aristocratic pride, and the distinction of rank is much attended to. The *hidalgos*, or gentry, claim to be descended from those Spaniards who, on the subjugation of the rest of the country by the Moors, founded an asylum in the fastness of the northern provinces, whence they again gradually spread their conquering arms over the whole country. Besides the *hidalgos de sangre*, or by descent, there are also *hidalgos de privilegio*, or by office, conferred on them by the sovereign; but of these there are comparatively few. Even at the present time, the titled nobility of the kingdom is very numerous. It consisted in 1890 of 82 dukes, all *grandes* of S.; 722 marquises, of whom 54 were *grandes*; 558 counts, of whom 59 were *grandes*; 74 viscounts, and 67 barons. There are about half a million persons belonging to the untitled nobility. The manners and customs of the inhabitants vary greatly in different parts of S., and are much influenced by climate. The diet of the middle and higher classes consists of chocolate for breakfast, with mutton, beef, and pork, especially the latter, dressed in various ways, and accompanied by cabbage, garbanzos (Spanish beans), onions, and large peas, called *chichoros*. The *olla*, or *cocido*, is a favorite dish; and the sausages (*chorizos*) of Castile are said to be about the best in Europe. Wine is used only in small quantities, and the kinds in common use are seldom much stronger than the low-priced wines of France. The *siesta*, or repose during the heat of the day, is customary to all classes throughout S. From 1 to 4 o'clock, in Madrid and most other cities, the shops are either shut, or a curtain drawn before the door; the shutters of every window are closed, and scarcely a respectable person is to be seen in the street. But the moment the *siesta* is over, all is again instinct with life and bustle. Exercise is usually taken in the evening, when nearly the entire population is abroad. *Certuñas*, or evening parties, are very frequent in the great towns. The theatre is little frequented. *Bull-fights*, though discountenanced by government, are in S. what the circus was in ancient Italy, — the national pastime, favorite resort, and chief amusement of all classes. The lower classes live on wretched fare, rarely eating meat, and fish only occasionally, except on the coast. The farming laborers fare somewhat better, the chief articles of food being bread, soup, garlic, bacon, and *garbanzos*, with the accompaniments of wine and oil. — *History.* S. was first known to the Phœnicians, subsequently to the Carthaginians, and, in the 3d century before the birth of Christ, to the Romans. It was completely subdued under Augustus, after which it enjoyed tranquillity for nearly 400 years. This state of peace was disturbed by the eruption of the northern barbarians, — the Suevi, the Vandals, and the Alani. Christianity was introduced about the end of the 6th century, the invasion of the Moors took place in the beginning of the 8th, and they overran the whole country except the Asturias. They were finally expelled in the year 1492. Under Charles V., S. made a great figure in the general affairs of Europe. He reigned forty years, and, in 1556, abdicated in favor of his son, Philip II., who died in 1598, and bequeathed to his successor, Philip III., Belgium, Naples, Sicily, and Portugal. Charles II., the last prince of the Austrian branch, reigned from 1665 to 1700; after which began the well-known war for

the succession to the Spanish dominions, in which the claim of Austria was supported by the grand alliance against Louis XIV. Notwithstanding the opposition of the allies, however, the grandson of Louis XIV. reigned in S., relinquishing the Belgic provinces to the house of Austria. Philip V., the first king of the French line, had a long and turbulent reign. After him Ferdinand VI., a prudent prince, introduced various reforms, and maintained peace; but dying in 1759, his son, Charles III., went to war with Great Britain. Peace ensued in 1763, and continued till 1778, when S., at first neutral in the American War of Independence, was prevailed on to take up arms against England, and obtained, at the peace of 1783, the Floridas and the island of Minorca. Charles IV. succeeded to the crown in 1788, became soon after a party to the coalition against republican France, but was, after Prussia, the first of the Great Powers to conclude a treaty of peace, in 1795. In little more than a year after this, the cabinet of S. joined its late opponent, and declared war against Britain. The abdication of the royal family of S. took place at Bayonne, in May, 1808. It was followed by the general resistance of the inhabitants, by the invasion of their country by Napoleon I. and by the subsequent expulsion of the French by the troops of Great Britain combined with those of Portugal and S. The dissatisfaction and indignation excited by the tyrannical proceedings of Ferdinand led, in the beginning of 1820, to a revolution of great importance, by which the constitution of the Cortes, as established in 1812, was restored, and such salutary restraints established on the power of the crown, as seemed best calculated for securing the rights of the people. In 1823, S. was again invaded by French troops, under the Duke d'Angoulême, whose object was to put down the new government, and to restore Ferdinand to absolute power. They penetrated the country without resistance; and having laid siege to Cadiz, the King was given up to them, and afterwards the town. In 1833, on the death of Ferdinand VII., the Queen-mother, Christina, was appointed Queen-regent during the minority of her daughter Isabella, to whom, by his will, he bequeathed his throne. On this, Don Carlos, the late king's brother, laid claim to the crown, when a civil war, which lasted till 1840, ensued. In that year, the partisans of Don Carlos were finally defeated. The next event of importance was the contest between Espartero (*q. v.*), the regent, and the Queen-dowager Christina, for the supreme power during the minority of the Queen. Espartero was successful from 1840 to 1843, but was compelled to flee before O'Donnell and Narvaez, and was not restored till 1847. Espartero's success had obliged Christina to retire to France, whence she returned after his fall, Narvaez and the *moderados* having control of the government. Isabella was now declared of age, married her cousin, Francis of Assis, and succeeded to the throne as Isabella II. During her reign Spanish history presented a dismal picture of faction and intrigue, the queen leading a dissolute life, and the Liberals and Conservatives successively gaining control of the government. The disputes finally ended in a successful revolt of the Liberals, the queen being obliged to fly to France, and the throne being offered in 1870 to Amadeus, a son of Victor Emmanuel. Finding his task too difficult, he resigned in 1873. A republic was now formed, with Castelar as its leading spirit, but it was soon brought to an end, and the throne was offered, in 1874, to Alfonso, the young son of the exiled Queen Isabella. Alfonso XII. died in 1885; the regency was intrusted to his widow Christina, and the birth of a posthumous son May 17, 1886, who, as Alphonso XIII., is now the titular king of Spain. Meanwhile Spain had troubles at home and abroad, the partisans of Don Carlos breaking into occasional revolts, while an insurrection broke out in Cuba in 1868, which was not quelled until twelve years afterward. In 1895 the islanders, despairing of any redress from the heavy burdens laid upon them by Spain, again revolted, and began a war which all the power of Spain has since been vainly attempting to bring to an end. (See *Cuba*.) The natives of the Philippine Islands also rebelled, giving new labors to the army of Spain. On August 8, 1897, Señor Canovas, the Conservative minister, under whom the Cuban war had been vigorously prosecuted, was assassinated. After his death the balance of power inclined to the Liberal side, whose leader, Sagasta, was opposed to the brutal methods with which the war had been prosecuted. *Pop.* (1897) 19,334,550.

Spalding, in *Georgia*, a W. central co. *Area*, 200 sq. m. It is bordered W. by Flint River. *Surface*, diversified; *soil*, fertile. *Cap.* Griffin.

Spallanzani, LAZARE, (*spal-lan-dza'ne*), an eminent Italian naturalist, b. near Reggio, 1729, who became professor of philosophy at Pavia, where he was distinguished by his experiments in physiology. In 1785 he went to Turkey, and made many observations on geology and extinct volcanoes. He also visited Germany, and received particular marks of attention from the emperor Joseph II. His principal works are *Experiments on the Reproductions of Animals*, *Essay upon Animalcule in Fluids*, *Microscopical Experiments*, *Memoirs on the Circulation of the Blood*, *Travels in the Two Sicilies and the Apennines*, and *Observations on the Transpiration of Plants*. D. at Pavia, 1790.

Span, *n.* [A.S. and Du. *span*; Dan. *spand*; Ger. *spanne*.] The space from the end of the thumb to the end of the little finger when extended; nine inches.—A short space of time.

—A pair of horses driven together, and generally similar in color, form, and movement. (U. S.)

(*Arch.* and *Engineering*.) The extent or spread of an arch between its piers and abutments.

(*Naut.*) A rope with both ends made fast, for a purchase to be hooked to its bight.

Span, *v. a.* To measure by spans, or by the hand with the fingers extended, or with the fingers encompassing the object.—To measure or reach from one side of to the other.—To be well matched, as horses. (U. S.)

Span'drel, *n.* [Probably from *span*.] (*Arch.*) One of the triangular spaces included between the arch of a doorway, &c., and a rectangle formed by the outer

Fig. 2401. — SPANDRELS, (Ely Cathedral, England.)

mouldings over it; the term is also applied to other similar spaces included between arches, &c., and straight-sided figures surrounding them. They are usually ornamented with tracery, foliage, shields, or other enrichments.

Spangle, (*spang'gl*), *n.* [A. S. *spange*; Ger. *spange*, *spangel*; Dan. *spang*.] A small plate or boss of shining metal; something brilliant used as an ornament.—Any little thing sparkling and brilliant like pieces of metal, as crystals of ice.

—*v. a.* To set or sprinkle with spangles; to adorn with small, distinct, brilliant bodies.

Span'gler, *n.* A person who spangles.

Spaniard, (*span'yard*), *n.* (*Geog.*) A native or citizen of Spain.

Spaniel, (*span'yel*), *n.* [F. *épagneul*; O. F. *espagneul*, from *Hispaniola*, now Hayti, where the best breed of this species of dogs came from.] A dog of much antiquity, and one whose breed has been particularly attended to in various countries, particularly the Eastern. All the varieties of the S. are more or less elegant (Fig. 498); and the S. has been divided into more varieties than any other dog. The distinguishing characteristics of the race are:—A rather broad muzzle, remarkably long and full ears, the hair plentiful and beautifully waved, particularly that of the ears, tail, and hinder part of the thighs. The prevailing color is liver and white; sometimes red and white, or black and white; sometimes deep brown or black on the face and breast, with a tan spot over each eye. The true English-bred S., called a *springer*, differs but little in figure from the setter, except in being not so tall. Their form is also more delicate, their ears longer, very soft and pliable, and covered with a coat of long waving and silky hair; the nose is red or black; the tail bushy and pendulous.

The *cocker*, so called from his appropriation to woodcock-shooting, is a still smaller spaniel, and more compact in its frame, and his hair still more waved and curly than that of the *springer*. The *Water-S.* (*Canis aquaticus*) is a sturdy S. with crisped hair, and with head rather larger and rounder than those of the land-S. The *Alpine*, or *St. Bernard*, variety of the spaniel breed exceeds others in size and beauty. It is generally two feet high at the shoulders, and full six feet from the nose to the end of the tail. The smaller S., *King Charles' dog* (*Canis brevipes*), is a small variety of the S. used as lap-dogs. The *Maltese dog* and the *Lion-dog* (*Canis leoninus*) are small species of S. The first is supposed to have sprung from the intercourse of the little S. with the smaller water-dog. It has the hair all over the body very long and silky, and generally pure white. The other has long, silky hair about the head, neck, shoulders, and extremity of the tail, but on the other part short, giving the little animal a leonine appearance. The Newfoundland dog is placed by most authorities in the S. group, to which its form, its coat, and its hunting propensities evidently entitle him.

Span'ish, *n.* The language of Spain.

—*a.* Pertaining to Spain.

Span'ish-bayonet, *n.* (*Bot.*) See *Yucca*.

Span'ish-black, *n.* A soft black pigment, prepared by burning cork in the manner of Frankfort and ivory blacks, differing from the former in being of a lighter and softer texture.

Span'ish Bluffs, in *Texas*, a village of Bowie co., on Red River, 12 m. N. of Boston.

Span'ish Creek, in *Ohio*, enters the Scioto river from Pike co.

Span'ish Flat, in *California*, a village of Eldorado co., 10 m. N. of Placerville.

Span'ish-fly, *n.* (*Zool.*) *Cantharis vesicatoria*. See *CANTHARIDÆ*.

Span'ish Fork, in *Utah*, a city of Utah co., 12 m. S. of Provo City. *Pop.* (1897) 2,460.

Span'ish Juice, *n.* The extract of the root of the liquorice.

Span'ish Lake, in *Louisiana*, 12 m. long, and connects with Red River a short distance above Natchitoches.

Spanish Language and Literature. It seems probable that the Cantabrian was the most ancient language of Spain, of which remnants are supposed by some still to exist in the modern Basque, spoken by the Biscayans and other inhabitants of the districts bordering on the Pyrenees. The old language of the Peninsula must, no doubt, have been considerably alloyed by the admixture of Phœnician words and phrases during the Carthaginian dominion; and when the Romans conquered Spain, they introduced their language, which for several centuries was the principal medium of communication of all except those living in the most remote districts. The Visigoths, who followed the Romans in possession of the Peninsula, introduced the *lingua Romana*, a mixture of the Latin and German languages; but the Latin, though corrupt, still continued to be spoken in many parts. Again, when the Moors overran the country, expelled the Visigoths, and established their own power, they brought with them the Arabic language, already highly cultivated, and well adapted for poetry; and this, in turn, became the general language of the country. Thus, out of numerous elements was gradually formed a new language—the *Spanish*; and though numerous dialects necessarily arose in the different petty kingdoms into which the country was split, that of Castile became at length the classical language of Spain. Its basis is Latin; and many of the ancient inflexions, as well as words, are still preserved. There are also a large number of Teutonic words; but the admixture of Arabic, though very considerable, is less than in the Portuguese. Force of expression, depth of sound, and mellifluous cadence, are the peculiar characteristics of the Spanish; which, however, has a guttural accent, derived probably from its Teutonic origin. The abundance of vowels and liquids makes the language harmonious when spoken by native Castilians; it is essentially poetical, and poetry may be considered as the germ of the national literature. It is a curious fact, that there is very little *patois* among the Castilians, and that the language is spoken by the lower classes with remarkable purity and precision. The rise of Spanish literature cannot be traced further back than the middle of the 12th century, for the songs of the Troubadours belong to a period antecedent to the settlement of the language. The ballads composed in honor of Rodrigo Diaz de Vivar, called *El Campeador*, or more popularly the *Cid*, are among the earliest specimens of Spanish writing, and display at once great independence of thought and felicity of expression. No doubt, however, the Moorish ballads, or those written to celebrate the chivalrous contests between Christian and Moslem knights, that preceded and accompanied the fall of Granada, form the most striking and distinctive part of the national literature of Spain. "The Moorish wars had already afforded abundant themes of interest for the Castilian muse; but it was not till the fall of the capital that the very fountains of song were broken up, and those beautiful ballads were produced which seem like the rays of departed glory lingering round the ruins of Granada. They present a most remarkable combination of not merely the exterior form, but the noble spirit of European chivalry, with the gorgeousness and effeminate luxury of the East. They are brief, seizing single situations of the highest poetic interest, and striking the eye of the reader with a brilliancy of execution, so artless in appearance withal as to seem rather the effect of accident than study. We are transported to the gay seat of Moorish power, and witness the animating bustle, its pomp, and its revelry, prolonged to the last hour of its existence." (*Prescott's Ferdinand and Isabella*, ii. 200.) But it was, perhaps, hardly necessary to say so much about the Spanish ballads, as the admirable translations of Mr. Lockhart have made their spirit, at least, familiar to most readers. The honor of being the first to introduce regular dramatic writing into Spain has been ascribed to Torres de Navarro, in the early part of the 16th century. He was followed by Lope de Vega, born at Madrid in 1562, at once the most original, most unequal, and most voluminous of the Peninsular dramatists. Calderon, s. in 1600, carried the Spanish drama to its highest perfection. Like his great precursor, Lope de Vega, his plays are most unequal, the finest scenes being mixed up with the most revolting barbarism and extravagance. The astonishing fecundity of these writers may in some degree account for, though it cannot excuse, the defects and inconsistencies in their dramas. The published works (which do not, however, embrace nearly all his pieces) of Lope de Vega, consist of 25 vols. 4to, each containing 10 or 12 plays; and 127 dramas are ascribed to Calderon, besides a still greater number of vaudevilles and interludes. The Spanish drama, however, has long fallen into decay. The humiliation of the country during the disastrous reigns of Philip IV. and Charles II. and the deadening influence of the Inquisition, were little favorable to its culture; and after the accession of the Bourbon dynasty to the throne, French criticism and taste obtained an ascendancy, while the

Fig. 2402. — KING CHARLES' SPANIEL.

troubles in which Spain has been more recently involved, have stifled all poetical talent. Some endeavors, indeed, have been made to revive the national drama; but they have signally failed, and no modern name connected with this branch of literature deserves notice, except, perhaps, that of Martínez de la Rosa, the author of the *Viuda de Padilla*. The *Araucana* of Ercilla, B. in 1525, is the only poem that Spain has produced that has any pretensions to be classed among epics. Chivalrous romance was early and assiduously cultivated in Spain. Happily, however, the inimitable satire of Cervantes destroyed at once and forever the whole race of knights-errant. His *Don Quixote*, however, still continues to interest all classes of readers by its exhaustless wit, the truth of its delineations, and its practical good sense. It has been rendered into almost all languages; and, how defective soever the translation, it never fails to amuse and instruct. But, with the exception of this unique and admirable work, Spanish works are but little known in foreign countries; and in most departments, indeed, the literature of Spain is poor in the extreme. And how could it be otherwise? In 1502 the censorship of the press was established; and the power of carrying it into effect was very soon entrusted to the Inquisition. "*Il s'est établi dans Madrid*," says Beaumarchais, with quite as much of truth as of wit, "*un système de liberté sur la vente des productions, qui s'étend même à celles de la presse; et que, pourvu que je ne parle en mes écrits ni de l'autorité, ni du culte, ni de la politique, ni de la morale, ni des gens en place, ni des corps en crédit, ni de l'Opéra, ni des autres spectacles, ni de personne qui tienna à quelque chose, je puis tout imprimer librement, sous l'inspection de deux ou trois censeurs*." (Marriage de Figaro, acte v.) Under such circumstances, it would be contradictory and absurd to expect that the Spanish writers should have distinguished themselves in philosophical research, original discussion, or in any pursuit requiring freedom of inquiry. Spain has a few respectable, but no eminent authors. Since 1830, however, a great change for the better has taken place. The censorship of the press has been suppressed, newspapers have been established, and the influence and authority of the clergy greatly diminished. Hopes may, therefore, be reasonably entertained that literature will again revive; but up to the present time the natural development of the mental resources of the nation has been so slow, owing to the continual public disturbances, that many years more may elapse before literature acquires any real influence. See SPAIN, § Education.

Span'ish Peak, in *California*, a mountain peak of Plumas co., about 14 m. W. of Quincy.

Span'ish Prairie, in *Missouri*, a vill. of Maries co.

Span'ish Ranch, in *California*, a post-village of Plumas co., 6 m. W. of Quincy.

Span'ish-red, *n.* (*Paint*.) An ochre differing little from Venetian-red.

Span'ishtown, in *California*. See HALF-MOON BAY.

Spanishtown, in the island of Jamaica. See SANTIAGO DE LA VEGA.

Spank, *v. a.* To slap; to punish by striking with the open hand; as, to *spank* a child.

—*v. n.* To move between a trot and a gallop, as a horse; to move with speed.

Spank'er, *n.* A small coin.

(*Naut.*) Same as DRIVER, *q. v.*

Spank'ing, *a.* Striking with the open hand. — Moving in quick, lively manner or pace.

Span'ner, *n.* A person who spans. — The lock of a fuser or carbine.

(*Mech.*) An iron instrument used in the manner of a lever to tighten the nuts upon screws.

Span'-shackle, (*-shak'l*) *n.* (*Naut.*) A large bolt driven through the fore-castle, and forelocked under the fore-castle-beam and under and upon the upper deck-beam.

Span'-worm, *n.* (*Zoöl.*) See PHALENIDÆ.

Spar, *n.* [*Sw. spat*, a stone; *Ger. spath*; *Sans. spadika*, crystal.] (*Min.*) A term applied to certain crystallized substances which easily break into cubic, prismatic, or other fragments with polished surfaces;—hence, also, the term *spathose*, applied generally to minerals of a sparry fracture. The term *spar* is commonly used by miners to denote crystalline quartz; by quarrymen it is applied indifferently to quartz and calcareous spar.

—[*Du.*; *Dan. sparr*, a rafter; *Ger. sparren*, a spar, rafter.] (*Naut.*) A long beam; a general term for masts, yards, booms, and gaffs.

(*Arch.*) A piece of timber employed as a common rafter in a roof, as distinguished from the principal rafters or other timbers.

—*v. n.* [*A. S. spirian*.] To dispute; to quarrel in words; to wrangle.

—To fight in show, or as in preparation for serious combat; to fight as a pugilist.

—*n.* A contention with the fists, as in boxing or sparring. — A motion, as if to strike a blow.

Sparable, *n.* A small nail, used by shoemakers.

Spare, *v. a.* [*A. S. sparian*; *Ger. and Du. sparen*; *Dan. spare*.] To use frugally; not to be profuse of; not to waste. — To save or withhold from any particular use or occupation. — To part with without much inconvenience; to do without. — To omit; to forbear. — To use tenderly; to treat with pity and forbearance; to forbear to afflict, punish, or destroy. — To grant; to allow; to indulge. — To forbear to inflict or impose.

—*v. n.* To live frugally; to be parsimonious. — To forbear; to be scrupulous. — To be frugal; not to be profuse. — To use mercy or forbearance; to forgive; to be tender.

—*a.* Frugal; parsimonious. — Scanty; not abundant; in small measure. — That can be dispensed with; not

wanted; superfluous. — Held in reserve, to be used in an emergency. — Wanting flesh; meagre; lean; thin.

Spare, *n.* That which is over and above what is sufficient.

Spare'ly, *adv.* Sparingly.

Spare'ness, *n.* The state of being spare, lean, or thin; leanness.

Spar'er, *n.* One who spares or avoids expense.

Spare'-rib, *n.* Some part cut off from the rib; as, a *spare-rib* of pork.

Spar'ganium, *n.* (*Bot.*) The Burr-reed, or Reed-grass, a genus of plants, order *Typhaceæ*, having perennial roots, and flowers collected in several dense, roundish heads, the sterile heads above the fertile.

Spar'ger, *n.* A copper cylinder used by brewers for dashing or sprinkling.

Spar'idæ, *n. pl.* (*Zoöl.*) The Porgée family, comprising acanthopterygious, spine-rayed fishes which have no teeth in the palate, nor spines or teeth on the opercular bones, the muzzle not gibbous, and the bones of the head not cavernous. The Sheep's-head, *Sargus oris*, of the Atlantic coast of the U. States, is 12-30 inches long. Its flesh is very highly prized. The Scupang, Scup, or Big Porgée, *P. argyrops*, also found on this side of the Atlantic, is from 8 to 12 feet long.

Spar'ing, *a.* Scarce; little. — Scanty; not plentiful; not abundant. — Saving; parsimonious.

Spar'ingly, *adv.* Not abundantly; frugally; parsimoniously; abstemiously; moderately; seldom; not frequently; cautiously; tenderly.

Spar'ingness, *n.* The quality of being sparing; parsimony.

Spark, *n.* [*A. S. spearca*; *Du. spark*, a spark, from *Lat. spargo*, to sprinkle.] A small glittering particle of fire, or ignited substance which flies off, with a cracking sound, from bodies when burning. — A small shining body or transient light. — A small portion of anything active; a very small portion. — A brisk, showy, gay man. — A lover; a beau.

—*v. n.* To act the lover.

Spark'-eyed, (*-id*), *a.* Bright-eyed.

Spark'ish, *a.* Airy; gay. — Showy; well-dressed.

Sparkle, (*spark'l*), *n.* [*Dim. of spark*.] A little spark; a luminous particle; lustre.

—*v. n.* To emit sparks; to send off small ignited particles, as burning fuel, &c. — To shine; to glitter; to glisten. — To twinkle. — To exhibit the appearance of animation. — To emit little bubbles, as spirituous liquors.

—*v. a.* To flash, as when sparks are emitted.

Spark'ler, *n.* One who, or the thing which, sparkles.

Spark'ling, *a.* Emitting sparks; glittering; lively.

Spark'lingly, *adv.* With twinkling or vivid brilliancy.

Spark'lingness, *n.* Vivid and twinkling lustre.

Sparks, JARED, an American historian, B. at Willington, Conn., 1789, was ordained a minister of the Unitarian congregation, 1819. His earliest publications were chiefly upon theological and controversial subjects; but, in 1829, he produced his first work in biography, under the title of *Life of John Lydard, the American Traveler*. His subsequent publications were, *The Writings of George Washington, selected and published from 200 folio volumes of Original Manuscripts*, in 12 volumes, — a national work; *The Life of Washington*; *The Life of Benjamin Franklin*; and *Correspondence of the American Revolution, being Letters of Eminent Men to George Washington*. In 1839 he was appointed Professor of Ancient and Modern History in Harvard College, and was President of that College from 1849 to 1852. D. 1866.

Sparks'ville, in *Indiana*, a post-village of Jackson co., 22 m. S.W. of Seymour.

Sparlin'ville, in *Missouri*, a village of Newton co., abt. 10 m. W. of Neosho.

Spar'oid, *a.* (*Zoöl.*) Noting fishes of the family SPARIDÆ, *q. v.*

Spar'row, *n.* [*A. S. speara*; *Ger. sperling*; *Dan. spurv*.] (*Zoöl.*) A group of birds belonging to the family FRINGILLIDÆ, *q. v.*

Spar'row-hawk, *n.* [*A. S. spear-hafoc*, *spär-hafoc*, *spär-habuc*.] (*Zoöl.*) See ACCIPITRIDÆ.

Spar'ry, *a.* Resembling spar, or consisting of spar.

Sparse, *a.* [*Lat. sparsus*, from *spargo*, to strew, to scatter.] Thinly scattered; not dense; set or planted here and there.

Sparse'ness, *n.* State of being sparse; thinness; scattered state.

Spar'sim, *adv.* [*Lat.*, from *spargere*, to scatter.] Sparsely.

Sparta, or LACEDÆMON. (*Anc. Geog.*) The capital of Laconia, the chief city of Peloponnesus, and the rival of Athens in the ancient history of Greece, occupied partly a range of low hills on the right bank of the Eurotas, and partly the intervening plain. Its appearance, even in its palmiest days, was by no means equal to its renown, for, though not destitute of handsome public buildings, the severe law ascribed to Lycurgus, that "the doors of every (private) house should be fashioned only with the saw, and the ceiling with the axe," exercised a cramping influence on the development of architecture, and of the fine arts generally. The Acropolis of S. occupied a hill in the N. part of the city, and was adorned with a temple to Athena (the tutelary goddess of S.), plated with bronze, whence it was called the Brazen House, and the goddess herself *Chalcivæus* (the Dweller in the Brazen House). On the bronze plates were beautifully sculptured various Greek myths. At the E. base of the Acropolis stood the Agora, or Market-place, whence streets proceeded to the different quarters of the city. Here stood the public buildings of the magistrates. The Agora contained many statues. The principal street in S., called the Aphetais, ran S. from the Agora to the S. wall, through the most level part of

the city, and was lined with a long succession of monumental edifices, chiefly *heroa* and sanctuaries. Along the banks of the Eurotas stretched the *Dromos* (Race-course), in which were several *gymnasia*, with temples of the Dioscuri, of the Graces, &c., and numerous statues; and still further S. lay a broader level, Platanistas, so called from the plane trees that grew there. This was the scene of those mock-contests in which the Spartan youth learned to face without fear the realities of war. The history of S. is really the history of Laconia. The origin of S. is unknown; but it cannot be doubted that their inhabitants were Achæans. It is during the rule of the Achæan princes that the events of the famous, but unhistorical, expedition against Troy, forming the subject of Homer's *Iliad*, are described as taking place. Menelaus, husband of Helen, was king at S., and it was during the reign of his grandson, Tisamenus, that the Dorians invaded Peloponnesus. The fact of a Dorian invasion is universally admitted, but of the details, scanty even as they are, we may safely be sceptical. All that is clear is, that the native Achæan population were deprived of political privileges, and appear henceforth as *Periæci* and *Ilots*—the Dorian conquerors alone forming the historical Spartans. Towards the middle of the 5th cent. B. C., the Dorians of S. had not only thoroughly established themselves in their new settlement, but had subjugated the whole of the fertile and beautiful vale of Lacedæmon, commonly known as Laconia, and had begun to cherish ambitious views of extending their supremacy over the other Dorian settlements in Peloponnesus—viz., those of Messenia and Argos. Hence originated the *Messenian wars*, which terminated (668 B. C.) in the complete overthrow of the Dorians of Messenia, who were reduced by the victorious Spartans to the condition of *Periæci*. Similar struggles occurred both with the older Achæan inhabitants in the centre of Peloponnesus and with the Dorians of Argos, &c., in which the Spartans were generally successful. The development of their warlike and ambitious character is usually ascribed to the institutions of Lycurgus; and whatever we may think of that more than semi-mythical personage, the institutions that go under his name were well fitted to make the Spartans exactly what they figure in history—a race of stern, cruel, resolute, rude, and narrow-minded warriors, capable of a momentary self-sacrificing patriotism (as in the story of the 300 heroes who fell at Thermopylæ), but utterly destitute of the capacity for adopting or appreciating a permanently noble and wise policy. The outbreak of the Peloponnesian war (431 B. C.) brought the rivalry between S. and Athens to a head, and in the mighty struggle that ensued, victory declared on the side of the combatant least capable of maintaining the greatness of Greece. S. now attained the hegemony of Greece; but her insolent tyranny in the hour of her triumph excited the indignation of those whom she held in virtual subjugation, and the glorious retaliations of the Thebans under Epaminondas stripped her of all her splendid acquisitions, and reduced the Laconian state to its primitive boundaries. Later, the rise of the Macedonian power limited still more the Spartan territory, nor did it ever after attain its earlier dimensions. Finally, after a series of vicissitudes, S. passed into the hands of the Romans, and became a portion of the Roman prov. of Achaia. Its site is now occupied by two villages, *Magula* and *Psychiko*, about 1 mile apart, by the town of *New Sparta*, built since the revolution, on one of the Spartan hills, and by corn-fields and gardens, amid which fragments of wrought stone may be seen cropping from the ground.

Spar'ta, in *Alabama*, a village, former cap. of Conecuh co., 100 m. S.S.W. of Montgomery.

Sparta, in *Georgia*, a post-town, cap. of Hancock co., 24 m. N.E. of Milledgeville.

Sparta, in *Illinois*, a township of Knox co., about 6 m. N.E. of Galesburg.—A city of Randolph co., 113 m. S. of Springfield. Pop. (1897) 2,230.

Sparta, in *Indiana*, a post-township of Dearborn co. — A village and township of Noble co., 35 m. N.W. of Fort Wayne.

Sparta, in *Kentucky*, a post-village of Gallatin co., 35 m. N. of Frankfort.

Sparta, in *Louisiana*, a post-village, former cap. of Bienville parish.

Sparta, in *Michigan*, a post-village and township of Kent co.

Sparta, in *Mississippi*, a post-village of Chickasaw co., 140 m. N.N.E. of Jackson.

Sparta, in *Missouri*, a village of Buchanan co., about 200 m. N.W. of Jefferson City.

Sparta, in *North Carolina*, a post-town, cap. of Alleghany co.; also called GAP CIVIL.

Sparta, in *New Jersey*, a post-village and township of Sussex county, about 66 miles north-east of Trenton.

Sparta, in *New York*, a township of Livingston co.—A v. of Westchester co.

Sparta, in *Ohio*, a post-village of Morrow co., 35 m. N.N.E. of Columbus.—A village of Stark co., 68 m. S. of Cleveland.

Sparta, in *Pennsylvania*, a township of Crawford co.—A p. v. of Washington co.

Sparta, in *Tennessee*, a post-town, cap. of White co., 85 m. S.E. of Nashville.

Sparta, in *Virginia*, a post-village of Caroline co., abt. 33 m. N.N.E. of Richmond.

Sparta, in *Wisconsin*, a city and township, cap. of Monroe co., 25 m. E.N.E. of La Crosse. A mineral (iron) spring is here. Pop. (1895) 3,511.

Spar'tacus, a Thracian shepherd, famous for his victories over the Romans. He was one of the gladiators

of Lentulus; but, escaping with thirty others, he placed himself at the head of a numerous army, with which he defeated the Romans in several battles. At length Crassus was sent against him, and after a bloody contest *S.* was slain, B. C. 71.

Spar'tan. *a.* (*Geog.*) Relating to ancient Sparta; hence, hardy; courageous.

Spar'tanburg. in *Indiana*, a post-village of Randolph co., 20 m. N. of Richmond.

Spartanburg. in *S. Carolina*, a N.W. dist., bordering on N. Carolina; area, 950 sq. m. *Rivers.* Emoree, Broad, Tiger, and Pacolet. *Surface,* hilly; *soil,* fertile. *Min.* Gold and iron. *Cap.* Spartanburg. *Pop.* (1897) 57,150.—A city, cap. of the above district, 98 m. N.N.W. of Columbia. *Pop.* (1897) 6,140.

Spartanburg. in *Pennsylvania*, a post-village of Crawford co., 9 m. S.S.W. of Corry.

Spart'apolis. in *Virginia*, a village of Rockingham co., 142 m. N.W. of Richmond.

Spar'terie. *n.* [*Sp. esparto*, grass-hemp; *Lat. spartum.*] Woven work, as mats, nets, ropes, cordages, &c., made of the blades of different species of grasses, of the gen. *Spartium stipa*, and others.

Spart'ium. *n.* (*Bot.*) A genus of plants, order *Fabaceae*, distinguished by the roundish form of its standard. The Spanish Broom, *S. junceum*, is a native of the south of Europe, generally growing in dry soils and rocky situations, and attaining a height of 8 feet or upwards. Its branches are upright, round, and rush-like, a characteristic of this genus. They are smooth, and bear only a few small simple leaves, which soon drop off. The fibre of the branchlets is much used in some parts of Italy, France, and Spain, for making cloth, ropes, &c. In the south of France, the plant is cultivated on dry, unproductive soils. The branchlets are made into bundles, dried, beaten, steeped, and washed, in order to the separation of the fibre.

Spar'us. *n.* (*Zoöl.*) The Boce, a genus of acanthopterygious fishes in the Linnæan system, having the gill-opening scaly, the mouth furnished with strong cutting teeth, the body compressed, the lateral line curved behind, and the pectoral fins rounded.

Spasm. (*spazm.*) *n.* [*Fr. spasme*; *Gr. spasmos*, from *spao*, to draw.] (*Med.*) An involuntary contraction of muscular tissue, or that state of contraction of the muscles which is not spontaneously disposed to alternate with relaxation. When the contractions alternate with relaxation, and are frequently and preternaturally repeated, they are called convulsions. *S.* are distinguished as *clonic* and *tonic*: the contractions in the former alternating with relaxations, as in epilepsy; but in the latter remaining fixed, as in lock-jaw.

Spasmod'ic. **Spasmod'ic.** *a.* Relating to spasm; consisting in spasm.—Convulsive.

n. (*Med.*) A medicine good for removing spasm.

Spasmology. *n.* [*Gr. spasmos*, and *logos* discourse.] The doctrine of spasms.

Spas'tic. *a.* (*Med.*) Relating to spasms; spasmodic.

Spat. *n.* The young of shell-fish.—A light stroke or blow.—A petty quarrel. (*U. S.*)

Spat'angus. *n.* [*Lat. spatangus.*] (*Zoöl.*) A genus of *Echinide*, or Sea-urchins, having the mouth situated laterally, and but four rows of pores.

Spat'ch-cock. *n.* A fowl just killed and quickly boiled for any sudden occasion.

Spatha'ceous. *a.* (*Bot.*) Furnished with, or having the appearance of, a spathe.

Spathe. *n.* [*Lat. spatha.*] (*Bot.*) A large and colored bract situated at the base of a spadix, enclosing the latter, and supposed to perform the office of corolla.

Spath'ic. *a.* (*Min.*) Foliated or lamellar.

Spat'ial. *a.* Relating to space.

Spat'ially. *adv.* With reference to space.

Spat'ium. *n.* (*Bot.*) See *LEWISIA*.

Spat'ter. *v. a.* To sprinkle, as with water, or any fluid, or with any moist or dirty matter.—To asperse; to defame.

v. n. To spit; to sputter as at anything nauseous taken into the mouth.

Spat'terdashes. *n. pl.* Coverings to protect the legs from mud and water.

Spat'ts. *n. pl.* A kind of spatterdashes, reaching but little above the ankle.

Spat'ula. *n.* [*Lat. dim. of spatha*, a broad, flat wooden instrument for stirring any liquid.] A broad thin sort of knife, used by apothecaries for spreading plasters, &c.

Spat'ulate. *a.* [*From Lat. spatula.*] (Written also *spatulate.*) (*Nat. Hist.*) Flattened, and broader and rounded at the apex, narrow at the base.

Spauld'ing. in *Michigan*, a township of Saginaw co., abt. 4 m. S. of Saginaw City.

Spav'in. *n.* [*It. spavinio.*] (*Far.*) A disease of horses, which occurs under two different forms, both interfering with soundness. In young, weakly, overworked subjects, the hock-joint is sometimes distended with dark-colored thickened synovia or joint-oil. This is *bog* or *blood S.* The second variety of *S.* is the more common and serious. Towards the inside of the hock, at the head of the shank-bone, or between some of the small bones of the hock, a bony enlargement may be seen and felt. This is *bone S.* At first, there is tenderness, heat, swelling, and considerable lameness; but as the inflammation in the bone and its investing membrane abates, the lameness is less perceptible, although the animal continues to drag his leg and go stiffly.

Spawl. *v. n.* To throw moisture out of the mouth.

n. Spittle; moisture ejected from the mouth.

Spaw'ling. *n.* Spawl; spittle.

Spawn. *n.* [*A. S. spana*, teats.] (*Zoöl.*) The eggs or ova of those oviparous animals which exclude them in a mass, either separate, as in most osseous fishes, or en-

veloped in an albuminous covering, as in frogs, toads, and many molluscs.

(*Bot.*) See *MYCELUM*.

Spawn. *v. a.* To eject or deposit, as fishes do their eggs.—To bring forth; to generate.

v. n. To eject or deposit eggs, as fish or frogs.—To issue, as offspring.

Spaw'ner. *n.* The female fish.

Spay. *v. a.* To castrate female beasts, by extirpating the ovaries.

Speak. *v. n.* [*A. S. spæcan*, *spæcan*; *Du. spreken*; *Ger. sprechen.*] To break silence; to utter articulate sounds or words, as human beings; to express thoughts by words; to discourse; to utter a speech, discourse, or harangue; to utter thoughts in a public assembly; to express opinions; to dispute; to make mention of; to give sound.

v. a. To utter with the mouth; to pronounce; to utter articulately, as human beings; to declare; to proclaim; to celebrate; to talk or converse; to utter or pronounce, as in conversation; to address; to accost; to exhibit; to make known; to express silently or by signs; to communicate.

Speak'able. *a.* That can be spoken.

Speak'er. *n.* One who speaks, in whatever manner; one who proclaims or celebrates.—One who utters or pronounces a discourse;—usually, one who utters a speech in public.—The person who presides in a deliberative or legislative assembly, preserving order and regulating the debates; a chairman: as, the *speaker* of the House of Commons, the *speaker* of the House of Representatives.

Speak'er. in *Michigan*, a post-township of Saui lac co. *Pop.* (1897) 1,550.

Speak'ing. *n.* Act of uttering words; discourse.—Oratory; elocution.

Speak'ing-trumpet. *n.* A trumpet by means of which the voice may be made audible at a great distance.

Speak'ing-tube. *n.* A pipe of India-rubber, gutta-percha, &c., for communicating orders from one room to another.

Spear. (*spër.*) *n.* [*A. S. spere.*] An offensive weapon thrown from the hand; a long, pointed weapon, used in war and hunting by thrusting or throwing; a lance; a sharp-pointed instrument with barbs, used for stabbing fish and other animals.

v. a. To pierce with a spear; to kill with a spear.

v. n. To shoot or sprout in the form of a spear.

Spear-foot. *n.* A horse's off-foot behind.

Spear'-grass. *n.* (*Bot.*) See *POA*.

Spear'-hand. *n.* The right hand—being that in which a horseman holds the spear.

Spear'man. *n.* A soldier who is armed with a spear.

Spear'mint. *n.* (*Bot.*) See *MENTHA*.

Spearsville. in *Pennsylvania*, a post-village of Fulton co., 83 m. W.S.W. of Harrisburg.

Spear'wort. *n.* (*Bot.*) See *RANUNCULUS*.

Special. (*spësh'i-al.*) *a.* [*Fr. spécial*; *It. speciale*; *Lat. specialis*, from *species*, a peculiar sort.] Designating a species or sort.—Particular; peculiar; noting something more than ordinary.—Appropriate; designed for a particular purpose; confined to some particular class of subjects.—Extraordinary; uncommon; chief in excellence.

Specialist. *n.* A person devoted to a specialty; a practical man.

Special'ity. *n.* Specialty.—The quality of the species.

Specializa'tion. *n.* The act of specializing.

Spe'cially. *adv.* In a special manner; particularly; in a manner beyond what is common, or out of the ordinary course; for a particular purpose; chiefly.

Spe'cialty. *n.* [*L. Lat. specialitas.*] Something special or particular.

(*Law.*) A special contract; an obligation or bond; the evidence of a debt by deed or instrument under seal.

Specie. (*spësh'e.*) *n.* [Contracted from *species*, *q. v.*] Special money; not paper money; coin; copper, silver, or gold coined and used as a circulating medium of commerce.

Species. (*spësh'ez.*) *n.* [*Lat., from specio*, to look at, to behold.] The outward appearance; the outside; shape; sensible appearance or representation; sort; kind.

(*Nat. Hist.*) A group of such individuals as have an essential identity in all qualities proceeding from their alternate constitution or nature. The term employed to designate a collection of individuals which resemble each other more closely than they resemble any other, being the group inferior to *genus* and superior to *variety*. *S.* under certain circumstances are liable to variations, but all varieties have a tendency to revert to their original specific type. A *S.* is generally considered as a permanent production of nature, which is capable of varying within certain limits, but in no case capable of being altered so as to assume the characters of another species. Sir David Brewster, Darwin, and his followers, hold a different opinion, and contend that *S.*, so far from being immutable, are liable to change of almost any extent; in fact, that plants, or animals, by the operation of causes acting over a long period of time, may become so altered that they preserve scarcely any apparent resemblance to those from which they sprung. In mineralogy, the term is of very arbitrary application, serving only, like class, order, genus, &c., the purpose of classification, although it thus indicates common characters, or points of real agreement among minerals.

(*Logic.*) A predicable which is considered as expressing the whole essence of the individuals of which it is affirmed.

Specific. **Specific'al.** *a.* [*Fr. spécifique*, from *Lat.*

species, and *facio*, to make.] That makes a thing of the species of which it is; designating the peculiar property or properties of a thing, which constitute its species, and distinguish it from other things.—That specifies or particularizes; definite or particular disease or certain diseases.

S. gravity. or *S. weight.* (*Physics.*) The weight of a given bulk of any solid, liquid, or gas, as compared with some body taken as a standard; thus, taking a given bulk of water to consist of 1,000 atoms, an equal bulk of platinum will contain 23,000; of copper, nearly 9,000; of iron, about 8,000; and of glass, about 3,000; these numbers being in proportion to the specific gravity of the respective substances. The specific gravity of all substances, except the gases, is determined by a ready mode of weighing them in distilled water, after the celebrated principle of Archimedes. (See *ARCHIMEDES*, *PRINCIPLE OF*.) The specific gravity of a solid is ascertained by weighing the substance in air and in water. If the solid be heavier than water, it is first weighed in air, next immersed in water, when it will appear to have lost weight,—this, too, being carefully ascertained. The weight of the substance in water is subtracted from its weight in air, the latter being divided by the difference, the quotient affording the specific gravity desired. If the substance be lighter than water, it is sunk in the water by being fixed to a solid heavier than water,—the weight of this heavy solid both in air and water being known. The compound is weighed both in air and water, the loss of weight being ascertained. Find the difference between this loss and the loss sustained by the heavy body when weighed alone in water; with this number divide the weight of the light body; the result will afford its specific gravity. The specific gravity of a fluid may be readily ascertained by comparing the weights of equal bulks of distilled water and of the fluid whose specific gravity is sought; for on dividing the weight of the fluid by that of the water, the quotient will give the specific gravity. The specific gravity of a gas is ascertained in a manner similar to that of a liquid, except that atmospheric air is taken as the standard of unity. If a copper or glass flask, provided with a good stopcock, be weighed, first when filled with air, and secondly when exhausted as perfectly as possible by means of an air-pump, the difference of these weights will give the weight of air contained in the flask. If the flask be now filled with the gas under examination, and carefully weighed, this weight, after deducting the weight of the flask, will give the weight of the gas. The weight of the gas divided by that of the same bulk of air will afford the specific gravity of the gas as compared to air. The water used in determining the specific gravity of bodies should be taken at the convenient standard of 60° Fahr.

Specific. *n.* That which is peculiar to anything, and distinguishes it from all others.

(*Med.*) A remedy that cures diseases upon some principle peculiar to itself, and not common to any two or more remedies; a remedy which infallibly cures all cases of certain diseases to which it is deemed appropriate.

Specifically. *adv.* So as to constitute a species; according to the nature of the species; particularly; definitely.

Specific'ness. *n.* Quality or state of being specific.

Specifica'tion. *n.* [*Fr.*] Act of specifying; state of being specified; designation of particulars; particular mention; statement of particulars; statement in detail; act of placing in a particular species; act of determining by a mark or limit; notation of limits.

(*Law.*) A written statement containing a minute description or enumeration of particulars, as of an invention which it is sought to secure by a patent.

Specific'ness. *n.* Specific'ness.

Spec'ified. *a.* Particularized; specially named.

Specify. (*spësh'i-fi.*) *v. a.* [*Fr. spécifier*; *It. specificare.*] To make special or specific; to mention or name, as a particular thing; to designate in words so as to distinguish a thing from every other.

Spe'cimen. *n.* [*Lat., from specio.*] That by which a thing is seen, known, or recognized; a token; a proof; a sample; a part or small portion of anything intended to exhibit the kind and quality of the whole, or of something not exhibited.

Spec'ious. (*spësh'us.*) *a.* [*Fr. spécieux*; *Lat. speciosus*, from *species*.] Showy; pleasing to the view.—Apparently right; superficially fair, just, or correct; appearing well at first view; plausible; ostensible.

Spe'ciously. *adv.* With a fair appearance; with a show of right.

Spe'ciousness. *n.* The state or quality of being specious; plausible in appearance.

Speck. *n.* [*A. S. specca*; *L. Ger. spaak.*] A small place in anything that is discolored; a stain; a blemish; a flaw.—A very small thing.

v. a. To stain in spots or drops; to spot.

n. Same as *SPICK*, *q. v.*

Speckle. (*spësh'li.*) *n.* [*Dim. of SPECK*, *q. v.*] A little spot in anything of a different substance or color from that of the thing itself.

v. a. To mark with small spots of a different color.

Speck'led Mountain. in Oxford co., *Maine*, near the boundary of New Hampshire. It is abt. 4,000 ft. high.

Speck'ledness. *n.* The state of being speckled.

Specksioneer. **Specksioneer.** (*spësh'shun-er.*) *n.* (*Whale fishery.*) The man who directs the operation of cutting up a whale.

Spectacle. (*spësh'ta-kl.*) *n.* [*Fr.; Lat. spectaculum*, from *spectare*, to look at.] An exhibition; something exhibited to view;—usually, something presented to view as extraordinary; a representation; anything seen.

Spec'tacle, n. pl. (*Optics*.) An instrument, consisting of two lenses set in a frame, for assisting or correcting the defects of imperfect vision. The lenses are convex or concave, according to the nature of the defect to be remedied. In old age the form of the eye becomes flat, and the rays of light are consequently not refracted sufficiently in passing through it to meet on the retina and produce distinct vision. This defect is remedied by a convex lens, which produces a slight convergency of the rays before they enter the eye. Short-sighted people, on the contrary, require concave lenses; because, in their case, the indistinctness of vision proceeds from too great a curvature of the anterior portion of the eye, which causes the rays to meet in a point before they reach the retina—a defect which is remedied by giving the rays a slight divergency before they enter the eye. Spectacles were probably invented by Alexander de Spina, a monk of Florence, about 1285.

Spec'tacled, a. Furnished with spectacles.

Spectac'ular, a. Relating to shows or exhibitions. (*R.*) — Relating to spectacles or eye-glasses.

Specta'tor, n. [*Lat.*; *Fr. spectateur.*] One who sees or beholds; one personally present; a witness.

Spectato'rial, a. Relating to a spectator. (*R.*)

Specta'tress, Specta'trix, n. A female spectator or looker-on.

Spec'tral, a. Pertaining to a spectre; ghostly. — Relating to a spectrum.

Spectre, (spék'tur), n. [*Fr.*; *Lat. spectrum*, from *specio*, to look at.] An apparition; the imaginary appearance of a person who is dead; a ghost.

Spectroscope, n. (*Optics*.) One of the most powerful and important instruments of modern research, in which the analysis of light coming from various light sources is conducted by means of prisms and gratings. It was first employed in 1860 by Kirchhoff and Bunsen for studying the spectrum. One form of this apparatus, as modified by Duboseq and Graueau, is represented in Fig. 2403. It is composed of three telescopes mounted on a common foot, and whose axes converge toward a prism, P, of very dense flint-glass. The telescope A is the only one which can turn round the prism. It is fixed in any required position by a clamping screw, *n*. The screw-head, *m*, is used to shift the position of the eye-piece, so that a clear image of the spectrum may be obtained, or, in other words, to focus the eye-piece. The screw-head *n* is used to change the inclination of the axis. To explain the use of the telescopes B and C, we

Fig. 2403. — SPECTROSCOPE.

must refer to Fig. 2404, which shows the passage of the light through the apparatus. The rays emitted by the flame G fall on the lens *a*, and are caused to converge to a point, *b*, which is the principal focus of a second lens, *c*. Consequently the pencil, on leaving the telescope B, is formed of parallel rays. This pencil enters the prism P. On leaving the prism, the light is decomposed, and in this state falls on the lens *x*. By the lens *x*, a real and reversed image of the spectrum is formed at *i*. This image is seen by the observer through a magnifying glass, which forms at *ss* a virtual image of the spectrum magnified about eight times. The telescope C serves to measure the relative distances of the lines of the spectrum. For this purpose there is placed at *m* a micrometer divided into 25 equal parts. The micrometer is formed thus:—A scale of 250 millimeters is divided with great exactness into 25 equal parts. A photographic negative on glass of this scale is taken, reduced to 15 millimeters. The negative is taken because then the scale is light on a dark ground. The scale is then placed at *m* in the principal focus of the lens *e*; consequently, when the scale is lighted by the candle F, the rays emitted from it leave the lens *e* in parallel pencils; a portion of these, being reflected from a face of the prism, passes through the lens *x*, and forms a perfectly distinct image of the micrometer at *i*, thereby furnishing the means of measuring exactly the relative distances of the different spectral lines. The micrometric telescope C (Fig. 2403), is furnished with several adjusting screws, *i*, *o*, *r*: of these *i* adjusts the focus; *o* displaces the micrometer in the direction of the spectrum laterally; *r* raises or lowers the micrometer, which it does by giving different inclinations to the telescope. Some of the most important astronomical discoveries of the last few years have resulted from the application of the S. to the telescope, the aid of the latter being called in to collect the light emanating from

the distant stars and nebulae. The light incident on the prism is rendered parallel, as in the ordinary arrangement, and the emergent rays are observed in the same manner, but a further refinement is required in this case. The image of a star formed at the focus of a good telescope is almost a point; its spectrum, therefore,

Fig. 2404.

would be a line, and in such a spectrum it would be impossible to distinguish any of the characteristic features. The point, therefore, is elongated somewhat at right angles to the plane of refraction by means of a cylindrical lens. Messrs. Sorby and Browning have also arranged a modification of the S. for use with the microscope. Their *Micro-spectroscope* is applied to the eye-piece of that instrument by means of direct vision prisms. It is applicable to opaque objects, and may also be applied beneath the stage. By its means the spectrum of the smallest object, or a particular portion of any object, may be viewed with the greatest precision and ease. See SPECTRUM ANALYSIS.

Spect'rum, n.; pl. SPECTRA. [*Lat.*, from *specio*, to behold.] (*Optics*.) The term given to the colored bands of any luminous object when the light proceeding from it is transmitted through a prism and permitted to fall upon a screen. This fact of a decomposition, or separation into a system of pencils, of a single pencil of light, was first discovered by Newton, who admitted into a dark chamber, through a small aperture in a shutter, a pencil of white or undecomposed light. The pencil was refracted by means of a prism of glass, the image being thrown upon a screen in the shape of an elongated stripe of colors, called the prismatic spectrum. (See Fig. 834.) This stripe is made up of seven successive bands, of different colors, the lowest of which, or the least refracted portion, is red; orange, yellow, green, blue, indigo, and violet following. Dr. Wollaston was the first to discover lines in the spectrum. He observed two of these, and subsequently counted nearly a thousand. The relative positions of seven of these lines were named by Fraunhofer after the first 7 letters of the alphabet. The sun, the planets, and almost every fixed star, have each their own system of lines. In the solar spectrum, the intensity of light appears to be greatest in the yellow band. The calorific powers of the spectrum increase from the violet to the red extremity. The chemical action of the solar spectrum appears to be greatest in the violet band, and in the dark space beyond. See DISPERSION.

Spect'rum Analysis. (*Chem.*) A method of determining the chemical constituents of substances by examining the spectra of their flames, as shown in the SPECTROSCOPE (*q. v.*). It consists essentially of a tube, at one end of which is a convex achromatic lens, at the other an adjustable slit. Near the lens is placed a triangular prism, in such a position that the rays of light passing through the slit and convex lens may fall upon it at a certain angle, varying according to the refractive powers of the prism. On the other side of the prism is a telescope of low magnifying power, which receives the rays refracted by it. The flame of a common spirit-lamp (G, Fig. 2403), or a gas-jet known as the *Bunsen's burner*, placed before the narrow slit. A small bead of the substance to be experimented on may be fused into a small loop of platinum wire. The wire being attached to a convenient support (e, Fig. 2403), the bead should be brought to the front edge of the flame. The substance in burning gives the flame certain colors; these are refracted into their proper places on the spectrum by the prism or grating, and examined by the telescope. It has been found that almost every element when burnt gives off light of a tint peculiar to itself. Thus sodium gives a yellow light, refrangible into two lines of nearly equal color. Potassium, which burns with a purple flame, produces, as might be expected, red and blue lines. Lithium also gives red and blue lines, but of a different tint, and in a different part of the spectrum. Calcium gives red, yellow, green, and blue, barium a great number of green, and so on. S. A. affords the means of detecting almost infinitesimal portions of various elements. Sodium, for example, may be detected in quantities very much less than the millionth of a grain. Since the practice of this branch of analysis has obtained favor among chemists, no less than five new elements have been added to our already numerous list. Messrs. Bunsen and Kirchhoff, on examining the evaporated residue of a certain mineral water, noticed a new light blue line, which did not belong to any element with which they were acquainted. They rightly conjectured that it was caused by a new elementary substance, which they named *caesium*, and which they shortly afterward obtained in bulk from the same and other sources. In the same manner they discovered *rubidium*. S. A. has also already thrown considerable light on the question of the constitution of the universe, new facts having been acquired concerning the sun, stars, nebulae, and comets.

It is one of the proud achievements of modern science that the sun, stars, comets, and nebulae are by the pen of light made to write their autographs, and reveal to us the secrets they hold. The marvellous revelations conveyed by their hieroglyphical inscriptions are accepted as legal proof in every scientific court. The power of this new method of analysis is not confined to elements in the chemist's laboratory, but can bridge the enormous spaces that separate him from the stars and the still more distant nebulae. Of the chemical composition of the heavenly bodies, or of their motions to or from the earth in the line of sight, the telescope tells us nothing. There is hardly an art or branch of science in which the spectroscope is not made to do duty. No substance is so pure that it will not detect in it some impurity. Even in the making of steel by the Bessemer method, the spectroscope is used to indicate the completion of the process. Some 73 elementary substances are known, and the vapor of each when heated to incandescence exhibits lines in its spectrum peculiar to itself, regardless of its distance, making us as well acquainted with what is present in Arcturus, or the Dog Star, or the sun, as in a Bessemer converter. It has detected in the sun nearly 30 substances we are familiar with in our world, among which are hydrogen, nitrogen, carbon, calcium, aluminum, iron, nickel, cobalt, &c., but not a trace of oxygen. It will detect the presence of the one hundred millionth of a grain of sodium, the double line of which in the yellow is seen in almost every star. Formerly the metal lithium was one of the rarest elements known to chemists, but S. A. detects it everywhere, even in the ash of a cigar. Its principal spectral line is in the red. Iron gives a spectrum of over 2,000 lines.

The color of light depends wholly on the rapidity of the vibrations of the all-pervading ether, as the musical notes depend on the frequency of the vibrations of the waves of air. The ear begins to hear when aerial vibrations amount to 16 in a second, and ceases to hear when they reach 40,000 during the same time. The eye begins to see when the ethereal vibrations in a second amount to 450,000,000,000, which produces the pale red, and ceases to see when they amount to the vast number of 527,000,000,000. Waves longer than the infra-red produce heat, and those shorter than the ultra-violet are not light, but actinic waves. Spectroscopic analysis of light from the nebulae instantly decides whether they are clusters of suns, or a vast mass of self-luminous gas. If the lines be bright they are true nebulae, but if dark they are clusters of suns, whether the telescope can resolve them or not.

Another qualification the spectroscope possesses that the telescope does not, is its ability to detect motion in a heavenly body in the line of sight. This property has opened a new field of research of vast proportions, notably in the discovery of exceedingly close binary stars, the vibratory movement of the lines, if any, being recorded by photography. Such stars are called photo-spectroscopic binaries, of which Zeta Ursae Majoris, Beta Anriga, and Beta Persci (Algol) are examples. As the two stars revolve, their orbital planes being parallel to our line of sight, it results that while one is moving toward us, the other of course will be receding. Both stars give a spectrum of lines, and those of the approaching star will be moved slightly toward the violet end of the spectrum, and the lines from the receding star will be displaced toward the red end, thereby causing them to appear double on the photographic plates. By examining a long series of plates the periodic times can be ascertained. It is found that the lines in Beta Anriga are double every two days, and therefore the periods of their revolutions are four days. The shortest telescopic binary known is Kappa Pegasi, about 13 years. The stars Arcturus, Vega, Pollux, and many others are moving toward our solar system at a mean velocity of 60 miles a second. The increase in the brightness of Pollux is already apparent to the naked eye, being brighter than its twin, Castor, which has a motion of recession of 25 miles a second. When the stars were first catalogued, Castor was the brighter star, and named Alpha. Now Beta (Pollux) is the brighter. In this way the great velocity with which the red prominences around the sun's limb are formed has been determined.

Speed, v. n. [*A. S. spedan, gaspedan.*] To make haste; to move with celerity.—To have success; to prosper; to succeed, that is, to advance in one's enterprise.

—To have any condition, good or ill; to fare.

—*v. a.* To despatch or send away with celerity; to hurry; to hasten.—To hasten, as to a conclusion; to execute; to dispatch.—To help forward; to assist; to make prosperous; to cause to succeed.—To destroy; to kill; to ruin.

—*n.* Rapidity of motion; quickness; swiftness; rapidity of execution or performance.—Success; prosperity in an undertaking; favorable issue, that is, advance to the desired end.

Speed'er, n. One who, or the thing which, speeds.

Speed'ily, adv. Quickly; with haste; in a short time.

Speed'iness, n. The quality of being speedy; quickness; celerity.

Speeds'ville, in New York, a post-village of Tompkins co., 15 m. S.E. of Ithaca. It is pleasantly situated on a bluff near the confluence of the West Owego Creek with Blair's Brook. It has 3 churches, a hotel, and a school, and a fine park of sugar-maples in the centre of the village.

Speed'well, n. (*Bot.*) See VERONICA.

Speed'y, a. [*A. S. spedig.*] Quick; swift; nimble; lustrous; rapid in motion; quick in performance; not dilatory or slow.

Edmund Spenser

1553(?) - 1598

Speer'town, in *New Jersey*, a village of Essex co., 7 m. N. of Newark.

Speight's Bridge, (*spits*), in *N. Carolina*, a post-village of Greene co., 79 m. E.S.E. of Raleigh.

Speke, JOHN HANNING, a distinguished African traveler, and explorer of the sources of the Nile, was B. of an ancient family at Whitelackington, in Somersetshire, in 1827. He entered the Indian army at the age of 17, served in Sir Colin Campbell's division through the campaign in the Punjab, and during his annual leave of absence made exploring expeditions in the Himalayas and in Thibet, especially studying the botany, geology, and natural history of the region, and collecting specimens. He subsequently accompanied Captain Burton in his exploration of Eastern Africa, and in 1858 reached the head of the great lake Nyanza, under the Mountains of the Moon, and since called Victoria Nyanza. Desirous of ascertaining whether the Nile has its sources in that lake, he set out from Zanzibar in 1860, accompanied by Capt. Grant, to find the southern end of the lake; and after heroic struggles against extraordinary difficulties, succeeded in his object, spent some time on the shores of the Nyanza, and striking the Nile at Urodonogoni, retraced its course to the lake. Speke was accidentally shot near Bath, 1864. His *Journal of the Discovery of the Source of the Nile* appeared in 1863, and a pamphlet, entitled, *What Led to the Discovery of the Source of the Nile*, in 1864.

Spelding, *n.* A dried haddock.

Spell, *n.* [*A. S. spellan*, to take another's place.] The act of taking another's place or turn temporarily in any labor or service.—A short period of time; a little while.—[*A. S. spell*, history, speech.] An incantation; a charm consisting of some words of occult power.

—*v. a.* To take another's place or turn temporarily in any labor or service; to relieve.—To tell or name, as the letters of a word, with a proper division of syllables.—To write or print with the proper letters; to form, as words, by correct orthography.—To read by naming letters singly.—To charm; to bewitch; to fascinate.

—*v. n.* To read. (*R.*)—To form words with the proper letters, either in reading or writing.

Spell-bound, *a.* Arrested or held by a spell or incantation; enchanted.

Spell'er, *n.* One who spells.—A book containing exercises in spelling. (*U. S.*)

Spell'ful, *a.* Full of, or abounding in, charms or spells. (*R.*)

Spell'ing, *n.* Act of naming the letters of a word.—Orthography: the manner of forming words with letters.

Spell'ing-book, *n.* A book for teaching children to spell and read.

Spell-land, *n.* A land of charms or spells.

Spell-work, (*-work*), *n.* That which is performed or wrought by magic.

Spelt, *n.* (*Bot.*) See TRITICUM.

Spel'ter, *n.* A term applied to zinc.

Spencer, *n.* An outer coat or jacket, without skirts;—so called after Lord Spencer, who first brought it into fashion.

(*Naut.*) A fore-and-aft sail, set with a gaff and no boom, and hoisting from a spencer-mast.

Spencer, in *Illinois*, a post-village of Will co., 8 m. E. of Joliet.

Spencer, in *Indiana*, a S.W. co., bordering on the Ohio River; area, 390 sq. m. It is drained by Little Pigeon and Crooked creeks. Surface, diversified; soil, generally fertile. Min. Bituminous coal. Cap. Rockport. Pop. (1897) 22,900.—A township of Harrison co.—A township of Jennings co.—A city, cap. of Owen co., 54 m. S.W. of Indianapolis. Pop. (1897) 2,050.

Spencer, in *Iowa*, a post-village, cap. of Clay co., on the Little Sioux river, and the Chicago, Milwaukee & St. Paul R.R., about 90 m. N.E. of Sioux City; in a farming region. Pop. (1897) 2,210.

Spencer, in *Kentucky*, a N. co.; area, 200 sq. m. Rivers, Salt river, and Brashers creek. Surface, undulating; soil, productive. Cap. Taylorsville. Pop. (1897) 7,600.

Spencer, in *Massachusetts*, a post-village and township of Worcester co., 62 m. W.S.W. of Boston.

Spencer, in *Minnesota*, a village of Goodhue co., on the Cannon river, about 16 m. S. of Hastings.

Spencer, in *New York*, a post-village and township of Tioga co., 20 m. S. of Ithaca.

Spencer, in *North Carolina*, a village of Davidson co., 190 m. W. of Raleigh.

Spencer, in *Ohio*, a township of Allan county, 110 m. N.W. of Columbus.—A township of Guernsey county.—A township of Hamilton county, on the Ohio river.

—A township of Lucas county.

—A post-township of Medina county.

Spencer, in *Tennessee*, a post-town, cap. of Van Buren co., 90 m. S.E. of Nashville.

Spencer, in *W. Virginia*, a post-village, cap. of Roane co.

Spencer-mast, *n.* (*Naut.*) A small mast just abaft the fore and the main-mast.

Spencerport, in *New York*, a post-village of Monroe co., 18 m. W. of Rochester.

Spencersburg, in *Missouri*, a post-village of Pike co., 80 m. N.E. of Jefferson City.

Spencertown, in *New York*, a post-village of Columbia co., 30 m. S.E. of Albany.

Spencerville, in *Indiana*, a post-village of De Kalb co., 135 m. N.N.E. of Indianapolis.

Spend, *v. a.* [*A. S. spendan*; Ger. *spenden*; Lat. *expendo*, to weigh out.] To lay out; to dispose of; to part with.—To consume; to waste; to squander; to exhaust.—To bestow for any purpose.—To pass, as time; to suffer to pass away.—To exhaust of force or strength.

Spend, *v. n.* To make expense; to lay out or dispose of money.—To be lost or wasted; to vanish; to be dissipated; to be consumed.—To prove in the use. (*R.*)

Spender, *n.* One who spends.—A prodigal; a spendthrift.

Spend'thrift, *n.* One who spends improvidently or prodigally money which has been earned or saved by thrift; a prodigal; one who lavishes his estate.

Spenser, EDMUND, an English poet, B. in London, about 1553; was educated at Pembroke Hall, Cambridge, and, on leaving the University, took up his residence with some relations in the north of England, probably as a tutor. In 1579 he published his first poem, *The Shepherd's Calendar*, which he dedicated to Sir Philip Sidney, who became his patron, and introduced him at court. In 1580 he was appointed by the Earl of Leicester secretary to Lord Grey, viceroy of Ireland, and obtained a grant of lands at Kilkolman, in the county Cork, where he built a castle, and finished his celebrated poem entitled the *Faerie Queene*. In the rebellion begun by the Earl of Tyrone, he lost his estate and was plundered; upon which he retired to London. He d. in 1598, and was buried near Chancer, in Westminster Abbey. S. is one of the most purely poetic of all poets. Yet, as it is with Milton, so it is with him; his name is spoken with proud admiration, and his *Faerie Queene* is not read. Some, like Ilume, find it more a task than a pleasure to read his poem. Others, like Pope, find it charming in old age as well as in youth. And an eminent modern critic asserts that "the shaping spirit of imagination was never possessed in the

Fig. 2405. — KILCOLMAN CASTLE, THE RESIDENCE OF SPENSER.

like degree by any other writer: nor has any other evinced a deeper feeling of all forms of the beautiful; nor have words ever been made by any other, to embody thought with more wonderful art." His verse is exquisitely melodious, and the moral tone of his poetry is of the noblest and purest. The *Fairy Queen* is an allegory, a fact which has much to do with the lack of interest in it by modern readers, though the story-telling tendency of Spenser's mind has prevented the allegorical significance of his work from becoming unduly prominent. In addition to the poems named, he produced various others of a less ambitious character, including the magnificent *Epithalamion*, much the finest of his minor poems.

Spent'-ball, *n.* A cannon-ball, or musket-ball, which reaches an object without sufficient force to pass through or penetrate it.

Sper'gula, *n.* (*Bot.*) A genus of plants, order *Illecebraceae*, consisting of herbs with flowers in loose cymes, and leaves stipulate. The Corn Spurry, *S. arvensis*, is a common weed in cultivated grounds, frequent from Canada to Georgia.

Sperm, *n.* [*Fr.*; Lat., from Gr. *sperma*.] The secretion proper to the spermativ vessels of the male; the seminal fluid.—Spermaceti.—Spawn of fishes or frogs.

Spermaceti, *n.* [*Fr.*; Lat. *sperma*, and *cetus*; Gr. *ketos*, a sea-monster.] A fatty substance which concretes or crystallizes spontaneously out of the oil of the *S. whale*. It is purified first by pressure, then by fusion and boiling with a weak alkaline lye. When melted in masses, it concretes in crystalline plates of a silvery lustre and unctuous feel. It fuses at about 100°. It dissolves in boiling alcohol; and as the solution cools it separates in brilliant scales, to which Chevreul has given the name of *cetine*. S. differs from common fats in not yielding glycerine when saponified, but a peculiar base termed *ethal*.

Spermaceti-whale, *n.* (*Zoöl.*) See CACHALOT.

Spermacee, *n.* (*Bot.*) The Button-weed, a genus of plants, order *Rubiaceae*, mostly herbaceous and tropical; flowers small, axillary, sessile, whorled.

Spermat'ic, **Spermat'ical**, *a.* Seminal; pertaining to seed or conveying it.

Spermat'ic Cord, *n.* (*Anat.*) The name given to the artery, vein, nerve, and lymphatic vessel, which, bound together in one sheath, like the *funiculus* or umbilical cord of the foetus, runs from the loins in the male into the bag of the *scrotum*, where it becomes wonderfully attenuated and elongated, and for the better disposition and the compact arrangement of the many thousands of yards into which the cord is extended, it is folded or rather rolled up, not unlike the thread of a ball of cotton.

Spermat'ocoele, *n.* [*Gr. sperma*, and *kele*, a tumor.] (*Med.*) A VASICOELE, *q. v.*

Sperm'atoid, *a.* [*Gr. sperma*, and *eidōs*, form.] Similar to sperm.

Spermatology, *n.* [*Gr. sperma*, and *logos*, discourse.] (*Med.*) A treatise on sperm.

Sperm'atoon, *n.*; *pl.* SPERMATOEA. [*Gr. sperma*, and *ōon*, an egg.] (*Physiol.*) One of the cells which stand in the relation of nuclei to the sperm-cells, and of developmental cells to the spermatozoa. Sometimes the sperm-cell contains a single spermatoon, sometimes several spermatoa, in which case the resulting spermatozoa often unite together and form a fasciculus, as, *e. g.*, in the sparrow.

Sperm'atophore, *n.* [*Gr. sperma*, and *phero*, to carry.] (*Physiol.*) One of the cases of albuminous matter in which the bundles of spermatozoa are packed; they are largest and most complex in the cephalopoda.

Spermatozo'a, *n.*, *pl.* of SPERMATOZOON. [*Gr. sperma*, and *zōon*, animal.] (*Physiol.*) The filamentary bodies developed in the semen, and consisting of an enlarged extremity called *body*, and a vibratile filamentary appendage called *tail*. S. consist of an amber-colored, highly refracting, homogeneous substance, like the hyaline nucleus of cells, and are formal modifications of the nucleus of the spermatoon. They are essential to impregnation.

Spermatozo'id, *n.* [*Gr. sperma*, and *eidōs*, form.] (*Physiol.*) One of the SPERMATOZOA, *q. v.*

(*Bot.*) One of the small cells containing moving filaments, which have been detected in *Antheridia*. They are also called *phytozoa* (*Gr. phuton*, a plant, *zōon*, an animal). Each S. is formed in a special cell, is rolled upon itself in a spiral manner, and escapes either by a pore or by a dissolution of the wall of the cell. Similar moving spores have also been observed in the thecae and sporangia of many cryptogamia.

Sperm'-cell, *n.* (*Anat.*) One of the cells contained in the liquor seminis, in which are formed the spermatoa, or cells of development of the spermatozoa.

Spermid'ium, *n.*; *pl.* SPERMIDIA. [*From Gr. sperma*.] (*Bot.*) A kind of small seed-vessel, resembling a seed, and more commonly called an *achene*.

Sperm'-oil, *n.* (*Manuf.*) The liquid portion of the fat of the spermaceti whale. The crude oil contains a small quantity of a peculiar oil (termed *phocenin* by Chevreul), which gives it a very disagreeable odor and taste, and traces of gelatinous matter. These impurities are removed by adding to the oil a solution of chloride of lime and a small quantity of decoction of oak-bark, after which it is agitated with a small quantity of sulphuric acid, clarified by subsidence, and washed to remove adhering sulphuric acid. S. O. becomes semi-solid at 45° Fahr.

Spermophil'us, *n.* (*Zoöl.*) A genus of Rodentia, family *Sciuridae*, including Ground Squirrels, Spermophiles, and Gophers. It is characterized by a squirrel-like body, variable ears, well developed cheek-pouches, and absence of the thumb claw. They are all burrowing animals. This genus is represented in N. America by at least 14 species.

Sperm'-whale, *n.* (*Zoöl.*) The spermaceti-whale. See CACHALOT.

Sperry, in *Iowa*, a township of Clayton county.

Sper'ryville, in *Virginia*, a post-village of Rappahannock co., 120 m. N.W. of Richmond.

Spetch'es, *n. pl.* Scraps of glue;—the offal of skins or hides.

Spew, (*spū*), *v. a.* [*A. S. spiwan*; Du. *spugen*, to spit, *spuuen*, to vomit.] To eject from the mouth; to vomit; to puke; to eject from the stomach.—To eject; to cast forth; to cast out with abhorrence.

—*v. n.* To vomit; to puke; to discharge the contents of the stomach.—To swell, as wet land affected by frost so as to throw seed out of the ground.

Spewer, (*spū'er*), *n.* One who spews.

Spew'ing, *n.* The act of vomiting.

Spew'y, *a.* Wet; foggy. (*Prov. Eng. and U. S.*)

Spey, (*spai*), a large and rapid river of Scotland, in Inverness-shire, rising from Loch Spey, and, after a course of upwards of 100 m., falling into the sea, about 8 m. E. of Elgin.

Spey'er, a town of Germany. See SPIRES.

Spez'er, in *Nebraska*, a former township of Richardson county.

Spezia, (*La*), (*sped'ze-a*), a town and seaport of N. Italy, prov. Genoa, at the extremity of the gulf of its own name, 50 m. E.S.E. of Genoa. The gulf is formed by the bifurcation of a spur of the Apennines, and is 3½ m. long and 3 broad; its western shore is indented by many coves or creeks, five of which—Porto Venere, La Castagna, the Varignano (the Quarantine station), Grazie, and Panigaglia—are so deep that large men-of-war may be moored in them. Within the last 12 years the Italian government has executed immense hydraulic works for the appropriation of that important position; and La Spezia is now one of the chief naval stations and arsenals of the kingdom. The scenery of the gulf is very beautiful; and the mildness of its climate was famous in ancient times, when it was known as the Gulf of Luna (*Portus lunæ*). The town has become within recent years a much frequented watering-place. Pop. 12,146.

Spezzia, (*spet'ze-a*), a small island of Greece, in the Gulf of Nauplia, 10 miles from Hydra; area, 26 sq. m.; pop. 8,000.

Sphac'elate, *v. n.* To mortify; to suffer with gangrene.

—*v. a.* To affect with gangrene.

Sphac'elate, **Sphac'elated**, *a.* Mortified; affected with gangrene.

Sphacela'tion, *n.* (*Med.*) State of being sphacelated; mortification.

Sphac'elus, *n.* [*Gr. sphakelos*.] (*Med.*) The GANGRENE, *q. v.*

Sphagnum, *n.* (*Bot.*) The Bog Moss, a genus of Mosses, whose sporecase is an urn closed by a deciduous lid, and its brim toothless, the calyptra irregularly torn. They are common in bogs, and are remarkable for the whitish color of their leaves. They are very elegant plants. They often grow in considerable masses, absorbing water like a sponge, but becoming friable when dry. They contribute much to the formation of peat. Gardeners employ them in preference to other mosses for covering the roots of plants and keeping them moist, as they have in a high degree the property of absorbing moisture from the atmosphere.

Sphargididae, *n. pl.* (*Zoöl.*) A family of reptiles, comprising turtles whose general form is something like that of a flattened pyramid, and the body is covered with a thick coriaceous skin, instead of a hard shell. *Sphargis* is the only genus, and is represented by *S. coriacea* of the Atlantic and Mediterranean, which is the largest of all turtles, in some cases attaining the weight of 1,200 to 2,000 pounds. One caught in Chesapeake Bay had a total length of almost 8 feet.

Sphégidae, *n. pl.* (*Zoöl.*) A family of insects comprising hymenoptera which have long antennae, pedicelled abdomen, and long hind legs. They are large, black and red, brown and red, or wholly blue or black. They are very active, and their sting powerful. They are known under the popular names of *Mud-wasps*, *Dirt-daubers*, and *Sand-wasps*.

Sphene, *n.* [*Gr.*, a wedge, from the shape of the crystal.] (*Min.*) A titanate and silicate of lime (or a silicate of titanium, in which part of the latter is replaced by lime). It is found crystallized and sometimes in granular or foliated masses of a brown, gray, and yellow color.

Spheniscine, *n. pl.* (*Zoöl.*) A sub-family of *Alcidae*, the PENGUINS, *q. v.*

Sphenoid, *n.* [*Gr.* *sphen*, a wedge, and *eidos*, form.] (*Anat.*) A bone common to the head and face, which, as the word implies (wedge-like), serves to fix the other bones above and around it in a perfect framework. From its situation at the base of the skull, the sphenoid bone gives origin to several muscles of the face and pharynx, such as the *spheno-palatina*, *spheno-pharyngeal*, and some others.

Spherul, *a.* Round like a sphere; symmetrical; perfect; complete.

Sphere, (*sfer*), *n.* [*Fr.*: *Lat.* *sphæra*; *Gr.* *sphaira*, a ball, a globe which Anaximander conceived as surrounding the universe.] An orb; a ball; a globe.

(*Geom.*) A solid body contained under a single surface, which in every part is equally distant from a point called its *centre*.

(*Astron.*) The concave or vast orbicular expanse in which the heavenly bodies appear: an orbicular body, or a circular figure representing the earth or apparent heavens.

(*Geog.*) A representation of the earth on a globular surface.

—Circuit of motion; revolution; orbit. — Circuit or compass of action, knowledge, or influence; province; employment. — Rank; condition; class or order of society: as, he moves in a higher *sphere* than ourselves. — A socket; an orbit. (*R.*)

Armillary spheres. (*Astron.*) See ARMILLARY. — *Doctrine of the sphere*, spherical geometry. — *Music of the spheres.* (*Anc. Astron.*) Among the Pythagoreans, the music supposed to result from the motions of the spheres. — *Oblique sphere.* (*Astron.* and *Geog.*) The celestial or terrestrial sphere when its axis is oblique to the horizon of the place: or its position to an observer at any point on the earth except the poles and the equator. — *Parallel sphere.* See PARALLEL. — *Right sphere.* (*Astron.* and *Geog.*) That position of the sphere in which the equator cuts the horizon at right angles; in spherical projections, that position of the sphere in which the primitive plane coincides with the plane of the equator.

—*v. a.* To place in a sphere. — To form into roundness.

Spheric, **Spherical**, (*sfer'ik*), *a.* [*Fr.* *sphérique*; *Lat.* *sphericus*; *Gr.* *sphairikos*.] Pertaining to a sphere. — Resembling a sphere: orbicular; globular; having a surface in every part equally distant from the centre; as, a *spherical* body. — Planetary; having reference to the celestial orbs; as, *spherical* predominance.

Spherical angle. (*Geom.*) The angle formed on the surface of a sphere by the arcs of two great circles.

Spherical coordinates. (*Math.*) Trigonometrical coordinates. — *Spherical excess.* (*Math.*) In trigonometry, the excess, above two right angles, of the sum of the angles of a spherical triangle. — *Spherical geometry.* See SPHERICS. — *Spherical line.* (*Geom.*) A portion of a spherical surface included between two great semicircles having a diameter in common — *Spherical polygon*, a portion of the surface of a sphere limited by the arcs of three or more great circles. — *Spherical projections*, the projections of the surface of a sphere upon a plane. — *Spherical sector.* See SECTOR. — *Spherical segment*, the segment of a sphere. — *Spherical triangle*, a figure on a sphere's surface bounded by the intersecting arcs of three great circles. — *Spherical trigonometry.* See SPHERICS.

Spherically, *adv.* In the form of a sphere.

Sphericity, **Sphericity**, (*-is'i-te*), *n.* [*Fr.* *sphéricité*.] State or quality of being spherical; roundness; circularity.

Sphericle, (*sfer'e-kl*), *n.* A little sphere.

Spherics, (*sfer'iks*), *n. sing.* Spherical geometry and trigonometry, or the doctrine of the properties and relations of the circles, figures, and other magnitudes of a sphere, caused by the intersection of planes.

Spherograph, (*sfer'o-gräf*), *n.* [*Gr.* *sphaira*, sphere, and *graphein*, to write.] An instrument invented for the practical application of spherics to navigation. — By

its aid any possible spherical triangle can be constructed without dividers or scales.

Spheroid, (*sfer*), *n.* [*Fr.* *sphéroïde*; *Gr.* *sphaira*, and *eidos*, form.] (*Geom.*) A body or figure resembling a sphere, but not perfectly spherical; — particularly, a solid generated by the revolution of an ellipse about one of its axes. If the generating ellipse revolves about its major axis, the *S.* is *prolate*, or oblong; if about its minor axis, the *S.* is *oblate*.

Spheroid'al, **Spheroid'ic**, **Spheroid'ical**, *a.* [*Fr.* *sphéroïdal*.] Possessing the form of a spheroid.

(*Crystallog.*) Bounded by divers convex faces.

Spheroidal Condition of Liquids. (*Physics.*) When liquids are thrown upon incandescent metallic surfaces, they present remarkable phenomena, which were first observed by Leidenfrost a century ago. They have since then been studied by other physicists, and more especially by M. Bontigny, to whom our present knowledge of the subject is mainly due. When a tolerably thick silver or platinum dish is heated to redness, and a little water, previously warmed, dropped into the dish by means of a pipette, the liquid does not spread itself out on the dish, and does not moisten it, as it would at the ordinary temperature, but assumes the form of a flattened globule, which fact M. Bontigny expresses by saying that it has passed into the *spheroidal state*. It rotates rapidly round on the bottom of the dish, taking sometimes the form of a star, and not only does it not boil, but its evaporation is only about one-fifth as rapid as if it boiled. As the dish cools, a point is reached at which it is not hot enough to keep the water in the spheroidal state; it is accordingly moistened by the liquid, and a violent ebullition suddenly ensues. All volatile liquids can assume the *S. C.*; the lowest temperature at which it can be produced varies with each liquid, and is more elevated the higher the boiling-point of the liquid. For water, the dish must have at least a temperature of 200°; for alcohol, 134°; and for ether, 61°. The temperature of a liquid in the *S. C.* is always below the boiling-point. This property of liquids in the *S. C.* remaining below their boiling-point has been applied by M. Bontigny in a remarkable experiment — that of freezing water in a red-hot crucible. He heated a platinum dish to bright redness, and placed a small quantity of liquid sulphurous acid in it. It immediately assumed the *S. C.*, and its evaporation was remarkably slow. Its temperature was about 11°, and when a small quantity of water was added, it immediately solidified, and a small piece of ice could be thrown out of the red-hot crucible. In a similar manner, Faraday, by means of a mixture of solid carbonic acid and ether, succeeded in freezing mercury in a red-hot crucible. The common experimental method of exhibiting the *S. C.* is easily performed thus: A metallic disc, slightly concave, like a watch-glass, is heated by a lamp, and water is cautiously dropped on it from a pipette. If this be done before the disc is sufficiently heated, the water boils almost explosively, and is dispersed at once in vapor. But, when the disc is hot enough, the water remains suspended, as shown in the cut, above the surface; and the drop, when small, takes nearly the form of an oblate spheroid. Various proofs have been given, though they are obviously unnecessary, that there is no contact in this case. Thus, if the disc be very nearly flat, light passes freely between it and the drop. Again, if one pole of a galvanic battery be connected with the disc, and the other be dipped into the drop, a galvanometer interposed in the circuit shows that no current passes. By heating the disc sufficiently, and dropping on the water very carefully, we may easily keep in the spheroidal state as much water as, if not more than, it could hold when cold. It is not necessary that a metal plate be used — a watch-glass will suffice for the experiment; but *hot* water must be dropped on it, else the glass will crack. Similarly, liquids may be made to roll upon liquids, and solid bodies which vaporize without becoming liquid also assume a condition analogous to the *S. C.* of liquids when they are placed on a surface whose temperature is sufficiently high to vaporize them rapidly. This is seen when a piece of carbonate of ammonium is placed in a red-hot platinum crucible. The phenomena of the *S. C.* seem to prove that the liquid globule rests upon a sort of cushion of its own vapor, produced by the heat radiated from the hot surface against its under side. As fast as this vapor escapes from under the globule, its place is supplied by a fresh quantity formed in the same way, so that the globule is constantly buoyed up by it, and does not come in actual contact with the heated surface. When, however, the temperature of the latter falls, the formation of vapor at the under surface becomes less and less rapid, until at length it is not sufficient to prevent the globule touching the hot metal or liquid on which it rests. As soon as contact occurs, heat is rapidly imparted to the globule, it enters into ebullition, and quickly boils away. These experiments on the *S. C.* explain the fact that the hand may be dipped into melted lead, or even melted iron, without injury. It is necessary that the liquid metal be heated gently above its solidifying point. Usually, the natural moisture of the hand is sufficient, but it is better to wipe it with a damp cloth. In consequence of the great heat, the hand becomes covered with a layer of spheroidal fluid, which prevents the contact of the metal with the hand. Radiant heat alone operates, and this is principally expended in forming aqueous vapor on the surface of the hand. If the hand is immersed in boiling water, the water adheres to the flesh, and consequently a scald is produced. The tales of ordeals by fire

during the Middle Ages, of men who could run barefooted over red-hot iron without being injured, are possibly true in some cases, and would find a ready explanation in the preceding phenomena.

Spheroid'ity, *n.* State, quality, or condition of being spheroidal. (*R.*)

Spherom'ere, *n.* (*Zoöl.*) A name proposed by Agassiz for the homological segments of the body in radiates.

Spherom'eter, *n.* [*Fr.* *sphéromètre*, from *Gr.* *sphaira*, and *metron*, measure.] (*Phys.*) An instrument for measuring, with great precision, the thickness of small bodies, the curvature of optical glasses, &c.

Spheroid'erite, *n.* (*Min.*) A variety of synthose iron-ore in spheroidal masses, occurring in trap.

Spher'osune, *n.* (*Zoöl.*) A name proposed by Agassiz for the body-wall of radiates.

Sphernate, (*sfer'u-late*), *a.* Covered or set with sphernles or minute tubercles.

Sphernle, (*sfer'ool*), *n.* [*From Lat.* *sphæra*, a sphere.] A small sphere, globe, or orbicular body.

Sphery, (*sfer'y*), *a.* Round; spherical; globular. — Pertaining or relating to the spheres.

Sphigmon'eter, **Sphygmom'eter**, (*sfig-*) *n.* [*Gr.* *sphignos*, a binding tight.] (*Med.*) An instrument for counting the arterial pulsations; a sphygmograph.

Sphinct'er, *n.* [*Gr.*, from *sphingo*, to bind tight.] (*Anat.*) A name common to several muscles which draw together, close, or bind certain apertures of the body; the most important of these oval or circular muscles is the *sphincter ani*, the door-keeper to the anus, and which, in its action, operates also on the urethra, assisting to void the last of the urine.

Sphinx'idae, *n. pl.* (*Zoöl.*) The Hawk-moth family of *Lepidoptera*, comprising the most robust and powerful insects in the order, and generally distinguished by their strength of flight and large size. The antennae are prismatic, and terminated by a little feather or thread; the tongue is often extremely long, in some species even exceeding the whole body in length; the labial palpi are broad and compressed, and closely covered with scales; the labrum and mandibles are minute; the body is long, and acute behind; and the wings, especially in the hinder pair, small. The caterpillars are naked, cylindrical, and 16-footed; they are ornamented with pale oblique stripes upon the sides of the body, and are usually furnished with a short horn on the back of the eleventh segment. They descend into the earth to become pupæ, which are naked and conical. Various modifications occur in the character of the image in this family. The maxillæ vary considerably in length, exceeding that of the entire body in *Sphinx*, but scarcely exceeding that of the head in the Death's-head Hawk-moth (*Acherontia atropos*) (see ACHERONTIA), and in *Smerinthus* not longer than the labial palpi; this variation in length corresponds with the rapidity of flight, and the habit of the insects of extracting the nectareous juices of tube-bearing flowers by means of their elongated tongue. The caterpillars of the typical species are remarkable for the attitude in which they are usually seen, and from which they have obtained the genuine name of *Sphinx*, from their supposed resemblance to the figures of that fabulous creature. Some of them are also remarkable for the faculty they possess of elongating and contracting the three anterior segments of the body, giving them somewhat of a proboscis-like appearance, whence they have been termed *Elephant Sphinxes*.

Sphinx, (*sfigks*), *n.* [*Lat.* and *Gr.*, said to be from *Gr.* *sphingō*, to compress tightly.] (*Myth.*) A fabulous monster, said to have had the head and bust of a woman, a dog's body, the wings of a bird, and the tail of a serpent. The *S.* was sent by Juno to punish the Thebans by propounding riddles to all passers by, and devouring all who were unable to interpret her enigmas. Œdipus, however, explained all the riddles, when the monster immediately flung herself into the sea and perished. The form of the so-called Egyptian *S.* is that of a winged lion with a human head and bust, always in a lying attitude, whereas the Greek *S.* is represented in any attitude which might suit the fancy of the poet. The Egyptian figures seem to have been set up in avenues, forming approaches to the great temples. The statue disinterred by Belzoni near the Pyramids of Ghizel, 62 feet high (see Fig. 2191), has again been nearly covered with sand. It is stated by Pliny that the *Sphinx* represented the Nile in a state of flood, as this event occurred regularly under the signs of the Virgin and the Lion. Figures of lions have also been found with the heads of rams and hawks.

Fig. 2407. — PRIVET HAWK-MOTH, (*Sphinx ligustri*.)

Fig. 2406.

Fig. 2408.

CATERPILLAR AND CHRYSALIS OF PRIVET HAWK-MOTH, (*Sphinx ligustri*.)

Sphinx, *n.* (Zool.) The typical genus of the family SPHINGIDÆ (*q. v.*).

Sphragistics (*sfragis'tiks*), *n. sing.* [From Gr. *sphragis*, a seal.] The science of seals, their history, peculiarities, and distinctions, especially with a view to the means which they afford of ascertaining the age and genuineness of documents to which they are affixed.

Sphygmie (*sfig'mik*), *n.* [Gr. *sphygmos*, the pulse.] Pertaining or having reference to the pulse.

Sphy'mograph, **Sphy'mometer**, *n.* [Gr. *sphygmos*, the pulse, and *graphein*, to describe.] (*Med.*) A contrivance for indicating the character of the pulse as to force and extent of undulations.

Spica, *n.*; *pl.* SPICÆ. [Lat., an ear of corn.] (*Astron.*) A star of the first magnitude, located in the constellation Virgo.

(*Surg.*) A kind of bandage; so named from its resemblance to an ear of barley.

Spicate, **Spicated**, *a.* (*Bot.*) Presenting the form of a spike or ear.

Spica'to, *p. a.* [It., divided.] (*Mus.*) A term indicating that every note is to have its distinct sound. When used in relation to instruments played with a bow, it is to be understood that every note is to have a bow distinct from the preceding or succeeding one.

Spice, *n.* [Fr. *épice*; Sp. *especia*; It. *spezie*, from Lat. *species*, spices, drugs, &c.] A series of vegetable products, fragrant to the smell, and pungent to the taste; used in cookery, sauces, &c., and also as condiments. The principal of these in common use are nutmegs, mace, allspice or pimento, ginger, cloves, and cinnamon.—Hence, a small quantity giving aroma, zest, or seasoning to a greater; something that enriches or alters the quality or smack of a thing in a small degree; a relish; a slight flavoring; hence, a little quantity.

—*v. a.* To season with spice, or that which serves the purpose of spice; to flavor with aromatic substances; to mull; as, to *spice* a beverage.—To tincture or impregnate with the odor of spices.

Spice-bush, *n.* (*Bot.*) Spice-wood. See BENZOIN.

Spice-land, in *Indiana*, a post-village and township of Henry co., about 30 m. W. of Richmond.

Spice-nut, *n.* In England, a gingerbread-nut; a jumble.

Spicer, *n.* One who seasons or flavors with spice.

—[Fr. *épicer*.] A dealer in spices.

Spicerville, in *New Jersey*, a village of Gloucester co.

Spicery, *n.* [Fr. *épicerie*.] Spices generally; fragrant and aromatic vegetable substances used in seasoning.—A repository of spices; a place where spices are kept.

Spice Valley, in *Indiana*, a township of Lawrence co.

Spice-wood, *n.* (*Bot.*) See BENZOIN.

Spiciform (*spi'si-*), *a.* (*Bot.*) Having the form or shape of a spike.

Spicily, *a.* In a spicy manner; pungently; with flavor.

Spiciness, *n.* State or quality of being spicy.

Spick, *n.* A provincial English term for a spike or nail. *Spick and span* new, quite new; that is, as new as a spike or nail just made; as, "honor *spick and span* new, piping hot."—Butler.

Spicula, *n.*; *pl.* SPICULÆ. [Lat.] (*Bot.*) A spikelet. —A pointed, fleshy appendage.

Spicular, *a.* [Fr. *spiculaire*, from Lat. *spiculum*, a dart.] Sharp-pointed; resembling a dart.

Spiculate, *v. a.* [Lat. *spiculare*, from *spiculum*, a dart.] To sharpen to a point. (*R.*)

—*a.* (*Bot.*) Divided into small spikelets; covered with minute points, as pointed fleshy appendages.

Spicule (*spi'kyū*), *n.* [Lat. *spiculum*.] (*Bot.*) A minute, slender point or granule.

Spiculiform, *a.* [Lat. *spiculum*, and *forma*, form.] Possessing the form of a spicule.

Spiculigenous (*spic-ū-lī'jē-uūs*), *a.* [Lat. *spiculum*, and *genere*, *gignere*, to produce.] Producing or containing spicules.

Spicy (*spi'si*), *a.* (*comp.* SPICIER; *superl.* SPICIEST.) [From *spice*.] Producing, yielding, pertaining to, or having the qualities of spices; fragrant; aromatic; as, a *spicy* decaction.—Hence, pungent; pointed; racy; as, a *spicy* story, a *spicy* scandal.

Spider, *n.* [For *spinder*; Ger. *spinne*; Dn. *spin*, a spider.] (*Zool.*) An order of invertebrate animals belonging to the class known as *Aranæ*, of the sub-kingdom *Arthropoda*. They are universally distributed and are especially distinguished by the habit of weaving silken snares to capture their prey. They are thus the only animals except man who obtain their living by means of a manufactured article or tool. This spinning faculty has attracted attention in all ages, and has been the subject of myths and popular traditions and superstitions, and the theme of many poets and writers.

The true spiders have been divided into two sub-orders, based upon the number of gills or breathing plates. The classification of Prof. Tamarian Thorell, M.D., is as follows: Order ARANÆ: Sub-order I, TETRAPHNEMONES; Tribus I, Territelariæ. Sub-order II, DIPNEUMONES; Tribus II, Tubitelariæ, (*a*) Ecribellatæ, (*b*) Cribellatæ; Tribus III, Retitelariæ; Tribus IV, Orbitelariæ, (*a*) Cribellatæ, (*b*) Ecribellatæ; Tribus V, Laterigradæ; Tribus VI, Citigradæ; Tribus VII, Saltigradæ.

The tribal classification is here based substantially upon the web-spinning habit of the animal and its method of capturing its prey, which, however, is closely correlated with formal characteristics. From this popular standpoint the spiders may be placed in two great groups, as follows: First division, the SEDENTARY SPIDERS, which sit upon or near their webs, using them as permanent residences and tools for taking prey. This division consists of four tribes or sections:

(1) The Orbweavers (*Orbitellariæ*) which make the

round geometric webs familiar in gardens, fields, and woods. These snares are remarkable structures, and when covered with drops of dew in the early morning and touched with sunlight, are among the most beautiful objects in Nature. They greatly vary in form, some consisting of an entire circular plane; others of a circular plane with a section cut out, and others again, as the triangle spider, of a single section or segment of a circle. The web is composed of numerous radii crossed by consecutive spiral lines, which are armored with numerous globules of viscid material secreted by the spider in the process of spinning. These viscid beads catch the insects that fly against the webs and retain them until the spider rushes from its seat in the center of the snare or within its den on the outskirts thereof. Many Orbweavers make bell-shaped nests of a single leaf or of several leaves worked together and deftly bound by silken bands. Others make nests of closely woven silk, which are often protected by numerous outlying masses of crossed lines, or by a leaf or other material placed over them. The spider remains within this den, which is usually above or to one side of the snare, retaining a connection with the center by a thick thread or trapline. The motion of the entrapped insect is communicated through the vibrating lines of the web along this thread to the spiders, and gives warning of captured prey.

(2) The Lineweavers (*Retitelariæ*) form snares of intercrossed lines within which the spider rests with its back downward. Insects striking this line are arrested and entangled, and thus easily captured. These snares are the most common cobwebs of our houses and barns.

(3) The Tubeweavers (*Tubitelariæ*) construct tubular webs which are used partly as dens or dwelling places, and in part as snares. One of the familiar American representatives is the Speckled-tubeweaver (*Agalena neriæ*), which is everywhere found upon boxwood borders, arbor-vitæ hedges, and on the grass of roadsides, meadows, and lawns. It is a funnel-shaped web, the greatly widened mouth of which is thickly meshed; the funnel runs downward along the stems of the plants. A system of interlaced lines is erected above the top of the funnel, upon which flying insects are

Fig. 3004.

a, Trapdoor spider's turret; nest of *Dolichoscaptes latatei* (Simon); *b*, *Cyclosomia truncata* stopping the door of her burrow with her abdomen.

stopped, and, dropping down upon the outspread sheet, are captured by the spider which commonly lurks at the mouth of its tubular den.

(4) The Tunnelweavers (*Territelariæ*) make their homes within the ground. They burrow straight tubes, varying in size according to the age and size of the spider, which they often line with thick silken sheeting. Sometimes this inner lining extends above the surface of the ground in the form of a little tower composed of chippage of various material. The well-known trapdoor spider of California belongs to the Tunnelweavers. Its beautiful silk-lined burrow with its skillfully constructed and hinged trapdoor is one of the most striking objects of animal architecture known to man. The Tunnelweavers are distributed in all parts of the earth, but have their largest development in tropical and semi-tropical regions. They embrace the largest known spiders. The tarantula or bird-killing spiders of the tropics and of the southwestern United States belong to this tribe.

The second divisional group is that of the WANDERING SPIDERS. The wanderers do not capture their prey by means of snares, but take them in the open as do the carnivora. However, many species construct silken nests within which they live and rear their young. The Wanderers include three tribes: (1) The Citigrades (*Citigradæ*, or ground spiders), among which are the lycosids or wolf spiders. Of these, certain species con-

struct interesting forms of nests, as the turret spider, which erects above its earthen burrow a structure of straws and bits of twigs somewhat resembling an old-fashioned chimney. Some of these ground spiders have the curious habit of carrying their silken cocoons or egg-bags lashed to the ends of the abdomen, and when the young are hatched they are carried about upon the back attached to the numerous hairs that cover the body. (2) The Laterigrades (*Laterigradæ*) get their name from the construction of their legs, which permits them to run sidewise with as great facility as forward or backward. (3) The Saltigrades or Jumping

Fig. 3005.—INTERNAL ANATOMY OF A FEMALE SPIDER.

Sectional view, showing the spinning glands and other organs (McCook: *American Spiders*, 1, 39). Partly diagrammatic view of the spinning organs in *Argiope cophinaria*: spn, spinnerets; py.g, pyriform glands; cy.g, cylindrical glands; tr.g, treeform glands; ep, epigynum; gl, gills; E, eggs; al.c, alimentary canal; a, anus. The figure is a composite one.

Spiders (*Saltigradæ*) include many interesting species, which are known by their peculiar jumping action. They lurk in ambush for their prey, stealing slowly upon them like a cat, and seizing them by a final jump. They are distinguished by the brilliant coloring of many species, and generally live in thick silken tubes spun against stones, trees, or other surfaces.

Some of the most interesting habits of spiders are associated with the maternal instinct. The eggs are commonly enclosed within silken cases, more or less water-tight, which are protected in the most ingenious manner by silken snares, silken mattresses filled with chippage, or mud-plastered cases. They are attached to stones, trees, or other objects, and oftentimes hung upon the branches or within the foliage of shrubs and trees. In some cases the young are cared for during a short season by the mothers. But in all cases the industrial instinct is manifested at an early period, the most perfect forms of architecture being constructed, but on a smaller scale, by the youngest spiders. These vary in form, but the pyriform, globular, hemispherical, or lenticular shapes prevail. Some cocoons are formed of richly colored silk.

Contrary to popular belief, spiders are often beautifully colored, some families, especially of the Jumping Spiders, having even more brilliant hues than one sees upon the gaudily tinted butterflies. A good collection of these animals shows coloring as brilliant as one sees in a case of jewels. Another popular error is that spiders are very poisonous and dangerous to the human species. They are, indeed, provided with a poison apparatus which resembles that of poisonous snakes. This is located in the head within or just beyond the base of the fang, and consists of a small gland covered with muscular tissues, whose contraction expels the liquid poison through a small duct along the fang to an opening near the point. Whatever may be the effect of this substance upon insects, its toxic influence upon man is not greatly to be dreaded. The largest spiders, such as the tarantula of the Southwest, can inflict a painful and in certain conditions a fatal wound. There is also a black species of Lineweaver

Fig. 3006.—CITIGRADE OR GROUND SPIDER (*Lycosa*) CARRYING HER EGG COCOON.

(*Latrodectus mactans*) and a large black Saltigrade spider (*Phidippus mormon*), both of which have a bad reputation which there is evidence to believe is in some measure well founded. But, for the most part, spiders are innocuous to man. At least the writer of this article has never experienced any effect from the strike of their fangs more serious than that inflicted by the prick of a pin. Mosquitoes are far more poisonous to his system, and, he believes, to most human beings. Man's inveterate hostility to the spider is probably due to this belief in its dangerous character. But, in truth, there is no greater friend to man among the small creatures that inhabit the earth. The spider is Nature's check upon the increase of irritating and de-

structive insects, against which it wages ceaseless warfare. It never destroys a man's crops, structures, apparel, and fabrics, as do the larvae of many insects. It does not prey upon the stores within pantry, cellar, barn, and storeroom. Whenever it is found in these places, it is there to destroy the insects that are dangerous or annoying to man. It is, in fact, the philanthropist of the invertebrate world, and it is a striking example of human ingratitude or human ignorance that this most friendly and helpful creature should be pursued with a rancor that is scarcely less than the remorseless hate with which serpents are destroyed. If one will walk through a meadow on a summer morning, and note the myriads of spider-webs revealed by the dewy beads that gather upon them, and remember that all these myriads of creatures are engaged in lessening the number of insects in the world, he will form an adequate conception of the service wrought to man, and possibly find his hostility tempered by justice, and modified into gratitude.

Another popular error is that spiders are insects. This is somewhat justified by the fact that the early entomologists so classified them, and they are by courtesy given a place in entomological treatises. They are

jointed palps which are inserted into the free end of the maxilla or under jaws, of which they are a part. These organs aid in walking, but chiefly serve for the grasping and handling of prey, and revolving and clasping it to the mouth. The abdomen is covered with a soft hairy skin, instead of by a hard case like the cephalothorax, a fact which renders difficult the preservation of these animals for cabinet use. The most distinctive organs are the spinning glands, which are placed in a mass in the lower part of the abdominal cavity, and arranged along the venter forward and laterally. These consist of a number of glands of several shapes, arranged in clusters, containing the several sorts of liquid silk used for spinning snares, nests, and cocoons. These glands connect by delicate ducts with the external spinning organs or spinnerets, which are located under the posterior or apical extremity of the abdomen in most species. In Orbweavers, the external spinning organs consist ordinarily of six spinnerets, which are divided into pairs arranged symmetrically on either side of the median line of the center, occupying a small circular space immediately forward of the anal opening. These spinnerets are covered with numerous jointed tubes or spinning-spools, and with a number of

stacles, and utilize spiders for the production of commercial silk, the naturalist will not need to plead the cause of this our unjustly despised "little sister" of the animal world. But even as the case now stands, she is worthy of high esteem as man's benefactor by reason of her ceaseless and successful warfare against hordes of insects.

To the above general account of the classification and habits of spiders, it may be of interest to add certain particulars of a more special character concerning them. Though the general habitat of the spider is the surface of the earth, it is by no means confined to that locality. We have seen that many members of the spider class build underground habitations or burrows, shut out from the upper world by a skillfully contrived and concealed trap-door. Others, the so-called "flying" or "ballooning" spiders, have learned the art of aerial navigation; and still others make the water their habitat. The flying habit is possessed by many of the smaller species and by the young of most of the species, they flying often with much rapidity—this depending on the strength of the wind—and at considerable heights. Flight is obtained through the buoyant properties of the silken thread. The spider seeks some

Fig. 3007.—SPIDER'S WEBS.

1, Bell-shaped silken nest of *Epeira globosa*; 2, the orb web of *Epeira trifolium* (McCook: *Am. Spiders*, ii, 17); 3, domed snare and cocoon string of the basilica spider, *Hentzia basilica* (McCook: *Am. Spiders*, ii, 106); 4, horizontal snare of *Uloborus plumipes* (McCook: *Am. Spiders*, i, 174); 5, triangle spider's snares.

widely separated from insects. The head, instead of being divided from the thorax by a distinct neck, is set upon the thorax, to which it is closely united. Thus the body is divided into two principal parts, of which the first is called cephalothorax (head-thorax). The other part is the abdomen, and the two parts are united by a small hollow pedicle. The head is provided with a pair of formidable outer jaws or mandibles which terminate in curved fangs. There are usually eight simple eyes which are grouped in various ways, thus forming generic and specific characteristics. There are eight legs, instead of six as in the insects, which are attached to the sternum or breastplate, the under part of the cephalothorax. There are seven joints, named in order as follows: The coxa, which unites the leg with the sternum; the trochanter, a small joint by which the femur articulates upon the coxa; the femur, or thigh; the patella, or knee; the tibia, or shank; the metatarsus, and the tarsus, or foot. The latter is provided with claws which are commonly toothed, and the underpart has in many species a brush-like pad, the scopulae. The legs are armed with numerous spines, bristles, and hairs. Attached to the sternum immediately in front of the forelegs are two leg-like, five-

bristles. The liquid silk within the glands is expressed by muscular contraction through the ducts into the spinning-spools, whose points can be clustered together by the spinner. The delicate jets of liquid silk emerging from the spinning-spools blend into a single thread which is hardened by contact with the air, and thus is formed the well-known spider thread.

Most spiders are solitary in their habits, but in a few species the male and female live together peaceably; and recent observations have discovered several species in South America which appear to possess social habits somewhat resembling that of the social *Hymenoptera*—ants, wasps, and bees. For the most part, however, spiders prey upon one another, as well as upon insects; and the female frequently maims or devours the male who is hardly enough to insist upon his attentions. The extreme voracity and cannibalistic habit of spiders is largely responsible for the fact that their industry has never been utilized by man, as with the silk moth. At various times the experiment has been tried, and specimen objects have been formed from spider silk. But these have served more as curios than as models of a practicable industry. Should human ingenuity succeed in overcoming these seemingly impassable ob-

stacles, and emits a number of threads from its spinning organ, suffering them to float freely in the air until sufficient buoyancy is attained to bear its weight. A period of light air movement seems to be chosen, the wind lifting the threads and the spider with them. These threads are grasped by the feet in such a manner that the head comes usually in front. Ordinarily the limit of flight is within the height of 150 feet, though much greater heights are at times attained. This habit may perhaps be looked upon as one of distribution, and puts minute spiders on a level in this respect with many of the birds and larger animals. Spiders take no less freely to the water, on whose surface many of them run with ease, some descending and remaining under water for considerable periods, depending for respiration on the air confined by the liquid among the hairs with which they are clothed. The *Argyroneta aquatica* of Europe builds itself a dome-shaped dwelling under water, filling it with bubbles of air, and making it its habitual home. Others live under frozen water during winter, passing from point to point by means of threads strung upon water plants. Those that seek food on the surface of water make use occasionally of floating material to rest upon, and this

Fig. 3008.—A GROUP OF SPIDERS.

1, The cross-spider, a garden orbweaver (*Epeira diademata*); 2, Hentz's tarantula (*Eurypelma Hentzii*), a female carrying dirt from her burrow (McCook); 3, a Laterigrade spider; 4, the common speckled tubeweaver (*Agalena naxia*), male; 5, a "poison spider" (*Phidippus morsitans*); 6, a dancing male spider; 7, a spined orbweaver (*Gasteracantha*); 8, egg cocoon of *Argiope cophinaria* (McCook); 9, a female orbweaver (*Epeira angulata*); 10, a jumping spider (*Saltigrade*).

perhaps has given rise to an interesting habit of one species, that of building a sort of raft by lashing together floating leaves by threads. From this the spider darts out to capture prey and returns to it to devour its food. It is certainly of interest to perceive that the spider had thus solved the problems of the balloon and the boat ages before man achieved the same result.

The spider does not prey upon insects with complete impunity. Certain of the insects prey upon it in return. There are various species of wasps which capture spiders as food for their young. For this purpose they do not kill their victims, but sting the nerve centers in such a way as to produce complete paralysis, the captured spiders being stored in proximity to the wasp eggs, and retaining vitality until the wasps are sufficiently developed to feed upon them. The wasp is by no means the only enemy of the spider, and the latter has developed various protective habits and instincts of an interesting character. Well aware of its danger from wasps, it seeks to escape by rapid flight and concealment, and often succeeds. Another protective measure practiced by many Orbweavers is that of swinging with great rapidity in the web, the oscillations becoming so rapid that the form of the spider grows indistinct. Lineweavers have a different habit, their method being that of whirling in a circular direction within the snare, the motion growing so rapid that the spider almost disappears from sight. This, while doubtless protective, may also aid in entangling prey in the web. The feigning of death is another interesting habit of the spider clan. Thus many of the Orbweavers, when touched in the web, suddenly drop from it to the ground, and if examined will be found motionless and to all appearance dead, retaining the appearance of death if picked up and examined. Yet if left alone, activity soon reappears and the spider ascends to its web. It has emitted a long thread instantaneously as it fell, and retains this as a bridge to climb back again. Mimicry is occasionally displayed by spiders, one interesting example being that of certain species which imitate the white excreta of birds so closely as to deceive trained observers. In one African species the spider, whose web is built on the twigs of bushes, admirably imitates in color and appearance an orchid-like flower, its body being blue, its legs yellow, ringed with brown. A mimicry of a different kind is that practiced by the trapdoor spiders. On the surface of the traps are arranged grass blades, bits of lichen, and other vegetable material, in a way to produce so close a resemblance to the surroundings that the door can rarely be discovered unless the inmate of the nest be caught in the act of opening it for an out-door excursion.

The spider possesses the habit of moulting, casting its skin a number of times during its period of growth.

Fig. 3009.—BURROW OF THE TRAPDOOR SPIDER (*Ctenisca Californica*); LID OPEN.

In doing so, it occasionally loses a limb. It is also liable to lose its legs and palps from other causes, but fortunately for itself has the power of reproducing the lost organs. Thus, in the case of a lost leg, the tissues which fill the stump of the leg gradually disappear, and a new organ develops within the cavity thus formed. This regeneration takes place during the period between moults, and the power continues during the time that the animal is subject to moults; that is, until sexual maturity is attained. After that period no lost part will be renewed, though life may be long continued. As to the length of life attainable by spiders, Dr. McCook had in captivity a tarantula which could not have been less than seven years old at its death. Of course, it was carefully protected from the dangers to which spiders are subject under ordinary conditions.

Spiders do not possess composite eyes like those of insects, their eyes resembling the ocelli, or single eyes, of the insects. The web-spinners have less need of acute vision than the hunting spiders (which "sight" their prey carefully before springing upon it) and probably trust largely to the sense of touch. It is difficult to tell to what extent the senses of taste and smell are developed, though there is satisfactory evidence that many spiders are sensitive to odors. It has proved equally difficult to decide regarding the sense of hearing, since what appears a response to sound on the part of some spiders may be simply due to the action on it of air vi-

brations and the sense of touch where the web is moved by the air. The various stories extant in regard to the effect of music upon spiders lack confirmation, and do not agree with the careful experiments made by recent scientific observers. The sense of touch is probably the most important of the senses of spiders, or at least of those that build webs, these depending on the movement of the web as an intimation of the presence of prey. As regards the color of spiders, it is often brilliant and attractive. There are numerous richly-colored species in the tropics, and many of those of the temperate zones display much beauty of color. This is particularly the case with the orchard spider, and with *Argiope argenteola* of the southeastern United States, while the coloring of the Saltigrades is as rich as that of humming birds and beetles, some of them being so brilliant in hue as to remind one of jewels rather than spiders.

We may conclude with some remarks about the building of the web. The framework or foundation lines of the web are laid in two different ways. In one method the spider, after attaching the end of its line, crawls over the objects between which the web is to be built, attaching the line at various points as it proceeds. A second method is that of taking advantage of air currents. The lines emitted from the spinnerets are allowed to float at random upon the wind until they

Fig. 3010.—THE YOUNG OF THE GROUND SPIDER (*Lycosa*) MASSSED ON HER BACK.

touch and become attached to some distant point. These lines may be of considerable length, having been observed as much as 30 or 40 feet long. Usually, however, they find a point of attachment at a few feet distance. One or more foundation lines thus laid and drawn taut, the remainder of the work becomes comparatively easy, the remaining lines of the web being laid in accordance with the character of web native to the particular species.

Several Americans have written upon spiders and their habits—the late George Marx, M.D.; Mr. J. H. Emerton on the New England spiders; the brilliant, interesting, and learned papers of Prof. and Mrs. G. W. Peckham, and Dr. H. C. McCook. The work of the last named, *American Spiders and Their Spinningwork* (3 vols. folio), is the principal treatise in English upon the general habits of spiders and the classification of American Orbweavers. The cuts in this article are taken by permission from that work. M. Eugène Simon is publishing a work (French), of which several series have been issued, *Histoire Naturelle des Araignées*, which promises to be the most important European work, and will embrace not only habits but the latest authorities in classification. Prof. T. Thorell, M.D., and Rev. O. Pickard-Cambridge are eminent living writers and authorities.

—A trevel to hold utensils over a fire.—A skillet.

(Mach.) A skeleton of radial pieces somewhat resembling a spider in shape.

Spider-catcher. *n.* One who, or that which, catches spider;—specifically, a kind of woodpecker.

Spider-monkey. *n.* (Zool.) See ATELES.

Spider-shell. *n.* (Conch.) A species of nautilus.

Spider-wort. (*wurt*), *n.* (Bot.) See TRADESCANTIA.

Spielberg, Prison of. See BRUNN.

Spielhaugen, FRIEDERICH, a popular German novelist, born at Magdeburg, in 1829. After completing his course of "gymnasium" education at Stralsund in 1847, he went to the University of Berlin, intending to study medicine. But his poetical nature soon caused him to give up all thoughts of the medical profession; and the following year he removed to Bonn to study philology, and finally settled in Leipzig, 1854, when he devoted himself entirely to general literature. His first romance, *Clara Vere*, was published in 1857, and in the following year a short romance, "Auf der Düne" (*On the Downs*), appeared, and attracted considerable attention. In 1860, S. went to Hanover, where he married. In 1861, his first large romance, "Problematische Naturen" (*Problematic Characters*), appeared, and at once established for the writer a great reputation. Among his later works are: *Uhlenhaus* (1883); *A New Pharaoh* (1883); *Discoverers and Inventors* (1890); *Poems* (1891).

Spigelia. *n.* (Bot.) A genus of plants, order Loganiaceae. They are herbaceous or suffrutescent plants, with leaves opposite; stipules small, interpetiolar; flowers sessile, in terminal spikes. The most important species is *S. Marylandica*, the Pink-root, or Worm-grass, found in woods from Pennsylvania to Florida and west to Illinois. Its root and leaves are much employed as anthelmintics. In larger doses they operate as irritant cathartics, and in poisonous doses as narcotics.

Spig'got (or **SPICKET**) **River.** rises in Rockingham co., New Hampshire, and enters the Merrimac River in Middlesex co., Massachusetts.

Spig'ot. *n.* [*W. yspigawd.*] A pin or peg used to stop a faucet, or to stop a small vent-hole in a cask of liquor.

Spigur'el. *n.* [*A. S. spicuran*, to inclose.] (*Eng. Law.*) The sealer of the royal writs.

Spike. *n.* [*Sw. and Goth. spijk*; Lat. *spica*, an ear, a spike.] A kind of very large nail.—A rod of iron or wood pointed.—An ear of grain; as, a *spike* of barley.—A shoot or ray.

(Bot.) A form of inflorescence in which all the flowers are sessile along a common axis, as in *Plantago*.

—*v. a.* (*imp.* and *pp.* **SPIKED**.) (*spikt.*) To fasten with spikes, or long and large nails, as the planks of a flooring.—To set with spikes; as, *spiked* palings.—To fix on a spike; as, traitors' heads were formerly *spiked* on Temple Bar.—To stop the vent of with a spike, nail, or the like; as, to *spike* a field-piece.

Spiked. (*spikt.*) *p. a.* Furnished with spikes, as grain.—Secured with spikes, as planking.—Stopped with spikes, as the vent-hole of a cannon.

Spike-lavender. *n.* (Bot.) *Lavendula spica*. See LAVENDULA.

Spike'let. *n.* (Bot.) A small spike; a subdivision of a spike.

Spikenard. (colloq. *spik'nard*), *n.* [*Fr. spicanard*; Lat. *spicanardi*.] (Bot.) The spike or ear that grows on the top of the *Nardus*, or *Nardostachys*, which is highly aromatic; also, the plant itself, and the oil or balsam obtained from it. See NARDOSTACHYS.

Spik'ing. *n.* (Mil.) The operation of rendering a gun unserviceable, either temporarily, by pushing into the vent a spring spike, which can be removed when the spring is compressed by a rammer pushed down the bore from the muzzle, or more permanently, by driving an iron nail hard into the vent, which must be drilled out before the gun can be used.

Spik'y. *a.* Set with spikes.—Presenting a sharp point, or points.

Spilan'thes. *n.* [*Gr. spilos*, a spot, and *anthos*, a flower.] (Bot.) A genus of tropical weeds, order *Asteraceae*, the leaves of many of which have a singularly pungent taste, which is especially noticeable in the Para Cress, *S. oleracea*. This plant is cultivated as a salad and potherb in tropical countries, and, like many cultivated plants, its native country is uncertain. The Japanese call the plant *Hoko So*.

Spile. *n.* [*Dn. spijl*.] A small, wooden peg, used to stop a hole, as in a cask.—A pile or stake driven into the ground as a support for some superstructure.

Spile'-hole. *n.* A vent-hole in a cask.

Spill. *n.* [*Dn. spil*; *A. S. spindel*.] A spike; a small peg for stopping a cask.—A small spiral roll of paper or splinter of wood for lighting lamps, tobacco-pipes, and the like.

—*v. a.* (*imp.* and *pp.* **SPILLED**, or **SPILT**.) [*A. S. spillan*, to spill, spoil, destroy.] To suffer to fall or run out of a vessel; to lose, or suffer to be scattered or dispersed, as liquids, flour, sand, &c.;—implying a loss or waste incurred accidentally.—To pour out; to waste; to cause to flow out or lose; to shed, or suffer to be shed, as blood.

(Naut.) To dislodge the wind from, as the belly of a sail, in order to reef or furl it.

—*v. a.* To be shed; to be suffered to fall, be lost, or wasted.

Spiller. *n.* One who spills or sheds.—A kind of fishing-line.

Spil'let-fishing. **Spilliard-fishing.** (*spil'-yard-*), *n.* Same as BULWOW, *q. v.*

Spil'ling-line. *n.* (Naut.) A rope used for dislodging the wind from a sail in order to furl it easily.

Spin. *v. a.* (*imp.* and *pp.* **SPUN**.) [*Sw. and Icel. spinna*.] To draw out and twist into threads, as wool, flax, cotton, &c., whether by hands or by machinery; as, to *spin* yarn.—To form by a slow process or by degrees; to draw out tediously, or to a great length;—preceding out; as, to *spin out* a long discourse.—To protract; to expend by delays; as, to *spin out* one's whole time in idling.—To twirl; to whirl with a thread; to turn or cause to whirl or rotate; as, to *spin* a top.—To draw out from the stomach in a filament, as a spider.

(Mach.) To put into shape, as metal, by causing it to revolve, as in a lathe, and pressing against it with a roller or hand-tool.

To *spin* a yarn. (Naut.) To tell a long or tedious story, often implying one that is marvellous or improbable;—used in a figurative sense; as, some half-dozen of the crew sat round the galley-fire *spinning yarns*.—To *spin* hay. (Mil.) To twist hay into ropes for portable transport on an expedition.

—*v. n.* To practise spinning; to work at drawing or twisting threads; as, a woman who knows how to *spin*.—To perform the act of drawing or twisting threads; as, this jenny *spins* capitally.—To revolve or whirl, as a top or spindle; as, it *spins* round with great velocity.—To stream or issue in a thread or small current; as, blood *spins* from a wound.

Spinaceous. (*-ā'shūs*), *a.* (Bot.) Pertaining or relating to, or resembling, spinach, and the class of plants to which it belongs.

Spin'ach. **Spin'age.** *n.* [*It. spinacce*, from Lat. *spina*, a thorn.] See SPINACIA.

Spin'acia. *n.* (Bot.) The Spinach, a genus of plants, order *Chenopodiaceae*. The Common Spinach, *S. oleracea*, is a well known potherb and hardy annual, whose native country is unknown. The plant has large, thick, succulent, deep-green leaves, for the sake of which alone it is cultivated, and which are considered wholesome; when properly dressed, and thoroughly deprived of all moisture before being mashed with butter or rich gravy.

they make an excellent dish, which may be eaten with any kind of meat. The seeds of one of the species are spiny, whence it is commonly called, tautologically, Prickly Spinach. It is a singular fact that the water drained from spinach, after being boiled, is capable of making as good match-paper as that made by a solution of nitre.

Spinal, *a.* [Fr.: Lat. *spinalis*.] Pertaining, or relating, to the spine or backbone of an animal; as, the *spinal* marrow.

Spinal column, Spinal cord or marrow. See **SPINE**.

Spindle, (*spin'dl*), *n.* [A. S., Swed., Ger., and Dan. *spindel*.] The pin used, in the primitive mode of spinning with the hand, for twisting the thread, and on which the thread, when twisted, is wound.

(Weaving.) See **WEAVING**.

—*A* slender, pointed rod or pin on which anything turns or revolves; the axis of a wheel or roller; as, the *spindle* of a vane, the *spindle* of a capstan. — *A* long, slender stalk, as of a plant. — The fusée of a watch. — In cotton-yarn, a measure containing 18 hanks, or 15,120 yards; in linen-yarn, 24 heers, or 14,400 yards.

(Geom.) *A* solid generated by the revolution of the arc of a curve line about its chord. The solid generated by the revolution of a curve about its axis is called a *canoid*.

Dead-spindle, (*Mach.*) The spindle of the tail-stock; the non-revolving arbor of a machine-tool, in contradistinction from *live-spindle*, or spindle of the head-stock, or revolving arbor.

—*v. n.* To shoot or grow in a long, slender stalk, as a plant.

Spindle-legged, Spindle-shanked, (*-lēgd, -shānt*), *a.* Having long, slender legs.

Spindle-legs, Spindle-shanks, *n.* A long-legged, slender person;—used humorously or derisively.

Spindle-shaped, (*-shāpt*), *a.* Possessing the form of a spindle.

(Bot.) Fusiform;—said principally of roots.

Spindle-tree, *n.* (Bot.) See **ECONYMS**.

Spine, *n.* [Lat. *spina*, a thorn.] (*Anat. and Physiol.*) The *S.* is the long articulated bony column at the back of the trunk, extending downwards from the head its entire length. (See Fig. 407.) It forms the basis of support of the trunk, and connects all the other parts of the frame. Its interior is hollow, and contains the *spinal cord*, or *spinal marrow*; its lower end rests on the pelvis. It is usually divided into two portions, a superior and inferior; the former flexible, and composed of 24 bones, or true vertebrae; the latter more fixed, and composed of 9 bones, or false vertebrae. The true vertebrae are divided into *cervical, dorsal, and lumbar*; the false form the *os sacrum* and *coccyx*. Each vertebra consists of two parts, the body of the bone and the arch; the former being solid, convex before and concave behind; the latter being formed by two pedicles and two laminae, supporting seven processes: namely, four articular, two transverse, and one spinous process. The bodies of the vertebrae are piled one upon another, forming a strong pillar for the support of the cranium and trunk; the arches forming behind a hollow cylinder for the protection of the *spinal cord*. Between each pair of vertebrae apertures exist, through which the spinal nerves pass from the cord. The several vertebrae are united together by means of a substance incompressible like cork, which is firmest and hardest externally, and gradually becoming thinner and softer, till at length in the centre it is in the form of a mucous substance. There are likewise many strong ligaments which unite the bones of the *S.* to each other. The spinal cord is that portion of the cerebro-spinal nervous system which is contained in the spinal canal. Its length is usually about sixteen or seventeen inches, terminating in the adult in a slender filament of gray substance about the lower border of the body of the first lumbar vertebra. It does not nearly fill the canal, its investing membranes being separated from the surrounding walls by areolar tissue and a plexus of veins. Its membranes are three in number. The most external is the *dura mater*, a strong filamentous membrane, which forms a loose sheath round the cord. The most internal is the *pia mater*, a cellulo-vascular membrane, which closely invests the entire surface of the cord; while between the two is the arachnoid membrane, an intermediate serous sac, which envelops the cord, and is then reflected on the inner surface of the *dura mater*. The surface of the cord is marked by two enlargements,—an upper, or cervical, which is the larger, and extends from the third cervical to the first dorsal vertebra; the latter being situated opposite the last dorsal vertebra. In form, the cord is a flattened cylinder. Its anterior surface presents along the middle line a longitudinal fissure, called the *anterior median fissure*; and its posterior surface another, called the *posterior median fissure*. These fissures divide the cord into two symmetrical halves, which are united in the middle line throughout their entire length by a transverse band of nervous substance, called the *commissure*. When cut transversely, the spinal cord is seen to consist of white and gray nervous matter. The former is situated externally, and constitutes its chief portion; the latter occupies its centre, and is so arranged as to present two crescental masses placed one in each lateral half of the cord, united together by a transverse band of gray matter,—the gray commissure. The posterior horn of each crescental mass is long and narrow, and approaches the surface at the posterior lateral fissure, near which it presents a slight enlargement; the anterior is short and thick, and does not quite reach the surface. The nerves of the spinal cord consist of 31 pairs, issuing from the sides of the whole length of the cord, their number correspond-

ing with the intervertebral foramina through which they pass. Each nerve arises by two roots, an anterior and a posterior, the latter being the larger. The roots emerge through separate apertures of the sheath of *dura mater*, and directly after their emergence a ganglion is formed on the posterior root, the anterior root lying in contact with the anterior surface of the ganglion, but none of their fibres intermingling. Immediately beyond the ganglion the two roots coalesce, and by mingling their fibres form a compound, or mixed, spinal nerve, which, after issuing from the intervertebral canal, divides into an anterior and posterior branch, each containing fibres from both roots. The spinal cord is a nervous centre, or rather an aggregate of many nervous centres, and has the power of conducting impressions or states of nervous excitement. Through it the impressions made upon the spinal sensitive nerves are conducted to the brain, where alone they can be perceived by the mind; and through it also the stimulus of the will applied to the brain excites the action of the muscles supplied from it with motor nerves. As a nervous centre, it has the power of communicating impressions from sensitive to motor nerve-fibres independent of the will, which is usually termed the reflex function of the spinal cord. Thus the movements of the pharynx and oesophagus are involuntary, for the will cannot arrest or modify them. A portion of food being conveyed by voluntary efforts into the fauces, is carried by successive involuntary contractions of the constrictors of the pharynx and muscular walls of the oesophagus into the stomach. These contractions are excited by the stimulus of the food on the sensitive nerves of the pharynx and oesophagus conducted to the spinal cord, and thence reflexed through the motor nerves to these parts. The spinal cord, like other parts of the body, is subject to various diseases, one of the most common of which is inflammation, which may be either acute or chronic, affecting the cord itself or its membranes. It is characterized by pain more or less acute, extending throughout the length of the spine, or confined to a certain portion of it. It is much increased by every movement of the spine, and in many cases is more or less intermittent. It frequently also gives rise to spasmodic or paralytic affections of various parts. It is always a highly dangerous disease, and in general requires similar treatment with inflammation of the brain. (See **BRAIN, DISEASES OF THE**.) — *Spina bifida*, or divided spine, consists in an imperfection of the posterior part of the spinal canal, and is almost always accompanied by an excessive secretion of the spinal fluid. It is almost always characterized by a tumor situated over the defective vertebrae, and varying in size according to the extent of the fissure in the spinal canal. It commences when the spine is being formed in fetal life, and may continue for ten, or even twenty years, without affecting the general health; but the tumor is liable to inflame and ulcerate by friction, and thus produce death. A gentle pressure on the tumor, so as to resist the effusion of the fluid, is recommended.

(Bot.) *A* thorn; a sharp-pointed process from the woody part of a plant.

(Zool.) *A* thin, pointed spike, as found in certain fishes. — *A* ridge; as, the *spine* of a mountain.

Spined, *a.* Spiny; furnished with spines.

Spine-finned Fishes, *n. pl.* (Zool.) See **ACANTHOPTERYGII**.

Spinel, *n.* [Fr. *spinelle*.] (*Min.*) An anhydrous aluminate of magnesia, consisting (when pure) of 71.99 per cent. of alumina and 28.01 magnesia; but part of the magnesia is often replaced by lime and the protoxides of zinc, manganese, and iron, and the alumina sometimes by peroxide of iron. It is of various tints of red, violet, and yellow, sometimes black, as at the copper-mine at Migladone, in the valley of Toce in Piedmont; occasionally nearly white. It occurs in octahedrons, the edges of which are occasionally replaced, and sometimes in rhombic dodecahedrons; also in masses. The finest specimens are brought from Ceylon, Siam, Pegu, and other eastern countries. Spinel constitutes a beautiful gem, which is often sold for Oriental Ruby. The scarlet spinel is called *Spinel Ruby* by lapidaries; the rose-red, *Balass Ruby*; the yellow or orange-red, *Rubicelle*; the violet-colored, *Almandine Ruby*.

Spinescent, *a.* (Bot.) Tapering gradually to a rigid, leafless point, tipped with a spine.

Spinet, *n.* [Fr. *épinette*; It. *spinetta*, from Lat. *spina*, a thorn.] (*Mus.*) A musical stringed instrument, resembling the harpsichord, and, like that instrument, now superseded by the pianoforte. Each note had but one string, which was struck by a quilled jack acted on by one of the finger-keys. The strings were placed horizontally, and nearly at right angles to the keys; and the general outline of the instrument resembled that of a harp laid in a horizontal position, on which account the spinet, when first introduced, was called the *concha harp*. — *A* clavichord; a virginal.

Spiniferous, *a.* (Bot.) Producing, or bearing, thorns or spines; thorny.

Spiniform, *a.* Spine-shaped.

Spinigerous, (*-nig'er-ūs*), *a.* Bearing a spine, or spines.

Spininess, *n.* State or quality of being spiny.

Spinner, *n.* One who spins; as, a *spinner* of yarns or cloths, a *cotton-spinner*, &c. — *A* spider; as, a long-legged *spinner*.

Spinner, Spin'neret, *n.* (Zool.) An organ with which insects form their silk or webs. See **SPIDER**.

Spin'nerstown, in *Pennsylvania*, a post-village of Bucks co., 91 m. E. of Harrisburg.

Spin'ner, *n.* A place where spinning is performed; a mill for spinning.

Spin'ney, Spin'ny, *n.; pl.* **SPINNIES**. In England,

a small coppice or ticket, with an undergrowth of bramble, &c.

Spin'ning, *n.* (*Manuf.*) The art of combining animal and vegetable fibres into continuous threads fit for the processes of weaving, sewing, or rope-making. If wool or cotton is to be spun, it has at first to be "opened;" that is, it must be relieved from its original knotted and lumpy condition; this was formerly done by hand, but is now easily managed by machines called *willows* or *willeys*, *blowers*, and *openers*. By the first of these, which consists of a drum covered with small spikes moving in a hollow cylinder, also lined with spikes, but so arranged that those on the drum pass close to, but do not come into collision with, them as it revolves, the cotton or wool is fed in on one side, is dragged forward by catching on the spikes, and is delivered at an opposite opening to that by which it entered, in a loose state and free from knots. It is not, however, quite loose enough for the subsequent operations, and it is more or less mingled with impurities. It is therefore taken to the "blower" or "opener," and being put into a shaft, is there acted upon by a stream of air violently driven in by machinery, which blows it forward, removes extraneous matters, and so separates the fibres that they pass out at the other end in an exceedingly light flocculent state, and ready for being formed into *laps*. This operation consists in laying the material very equally on an endless apron made of small bars of wood, and of the width of the frame of the machine in which they are placed. This apron passes round two rollers, placed at a little distance apart, the rollers being moved by machinery, which control the direction in which the apron moves; and as the operator covers its entire surface with a thin layer of the fibre, it passes successively under the two rollers, and comes out in the form of a compressed layer of cotton or wool, called a *lap*. The laps are taken to the *carding-machine*, consisting of a series of cylinders revolving in a frame, and placed so close together that they almost touch each other. Each cylinder is covered with a coating of fine steel-wire points, which are stuck in leather, or some other flexible material, and are technically called *cards*. The lap is made of the same width as the cylinders of the carding-machine, and is so adjusted that, as it unwinds from its roller, it passes in between a pair of the carding cylinders, the steel-wire teeth of which seize hold of the individual fibres, and drag them in one direction until they are caught by other cylinders, and so carried from one to another, always being pulled in a straight direction, until they are laid as nearly as possible side by side, and are given off in a thin cobweb-like film at the last cylinder, where it is prevented from continuing its journey round the cylinders by a small bar of metal called the *doffer*, which, with a gentle and peculiar motion, removes it from the cylinder. The film of fibre is of the same width as the cylinder of the carding-machine, but it is gathered together by the operator, who passes it through a smooth metal ring, and between two small polished rollers, the revolutions of which carry it forward, and deposit it in a deep tin-can in the form of a loose untwisted column of cotton or wool, about an inch in thickness, which is called a *sliver*. If such a sliver or cord be firmly gripped or compressed at two points rather farther apart than the average length of its component filaments, it may be extended or drawn out to a greater length, the filaments sliding upon each other. When two or more such cords have been extended in this way, until they will stretch no longer without separating or being pulled asunder, they may be laid parallel to each other, and combined by being slightly twisted together. The compound cord thus formed may be again extended by stretching or drawing; and the repetition of the processes of doubling, twisting, and stretching will enable the spinner to extend the length and diminish the thickness of the cord until it becomes a fine compact thread or yarn. — The primitive modes of *S.* by the spindle and distaff, and by the *spinning-wheel* (Fig. 2410), which are still extensively practised in the East, and not entirely superseded in some remote parts of this country, only enable the spinner to produce a single thread; but with the almost automatic spinning-machinery which has been called into existence by the cotton manufacture, one individual may produce nearly 2,000 threads at the same time. The history of the series of inventions by which this result has been gradually attained is briefly noticed under **COTTON MANUFACTURE**. The manufacture of yarns or threads of silk is a process essentially different from the *S.* of cotton, wool, or flax. Instead of combining a number of short fibres into a long thread, the silk-throwster receives the silk in the form of very long and exceedingly fine filaments, which merely need cleansing and twisting together until the requisite strength is attained. The twisting process is, in this case, called *S.* There is, however, besides the best portion of the silk, which is wound off from the cocoon, a quantity of loose or *floss* silk, which forms a soft tangled mass enveloping it. This, with the refuse of the superior part of the silk, under the general name of *waste*, is converted into yarns for coarse or inferior articles, by a process very similar to that of *S.* of other fibrous substances. This waste silk was formerly cut by a machine, to reduce its filaments into short lengths, and then treated in much the same way as cotton-wool; but the process of manufacturing it into yarns has been recently much improved by the adoption of contrivances similar to those used in flax-*S.*, by which the filaments are heeled or drawn out into a sliver without being cut.

Spin'ning-jenny, *n.* (*Mach.*) A machine used in the cotton manufacture to turn a great number of spindles, by means of bands from a horizontal wheel. See **COTTON (MANUFACTURE OF)**.

Spin'ing-wheel, n. A wheel formerly employed in the domestic spinning of material for textile fabrics; it consisted of a wheel which worked with the foot by means of a treddle, gave motion to a spindle, on which the thread or yarn spun by the fingers was wound.

Spinose', Spínous, a. [Lat. *spinus*.] Full of spines; thorny; as, a spinose branch.

Spínosity, n. State or quality of being spinous.

Spinoza, BENEDICT, (spe-no'za), a celebrated philosopher, b. at Amsterdam, 1632. He was the son of a Portuguese Jew, and was first named BARUCH, but adopted that of *Benedict* on renouncing the faith of his fathers. He was early remarkable for an ardent love of truth, and a keen and logical intellect. His first serious studies were the Bible and the Talmud. He made no secret of the doubts which grew up in his mind, and was exposed to much persecution on account of them. Taking refuge in the house of the physician Vanden Ende, he studied Latin and Greek, mathematics and metaphysics, and was especially attracted by the philosophy of Descartes. A large bribe was offered him if he would continue to conform outwardly to Judaism; but neither his will nor his poverty consented to such a degradation. An attempt was made to assassinate him, and he had a very narrow escape. He was at last excommunicated, and being driven from Amsterdam, lived for a time near Leyden, and afterwards at the Hague. He devoted himself wholly to philosophy, earning such a livelihood as contented him by the trade of polishing glasses for optical instruments. His character was most estimable, and endeared him to his personal friends. His system of philosophy has been made odious by the vulgar accusation of Atheism, which is the very reverse of the truth. To his thought God is the only being, the only substance, infinite, eternal—before whom all things else have but a phenomenal existence. And his aim was to build up, on the knowledge of God as foundation, a system of morals by a rigorously mathematical method. With more reason, *S.* has been called the father of modern Pantheism. The great defect of his system is the virtual suppression of individuality, and the denial of free-will; all finite things, not excepting human actions, being parts of a necessary chain of sequences. *S.* has of late been more fairly judged, and both his merits and errors impartially discussed. His influence on the mind of Goethe was overpowering. Cousin says: "The author whom this pretended atheist most resembles, is the unknown author of the *Imitation of Jesus Christ*." And Schleiermacher thus testifies to the depth of the religious sentiment in *S.*: "He was filled with religion and religious feeling; and therefore is it that he stands alone, unapproachable, the master in his art, but elevated above the profane world, without adherents, and without even citizenship." The works of *S.* are:—*Renati Descartes Principiorum pars Prima et Secunda more Geometrico Demonstrata; Cogitata Metaphysica; Tractatus Theologico-Politicus; Ethica*, perhaps the most important of his treatises; *Tractatus Politicus; De Intellectus Emendatione*; and *Epistolæ*. The last four form his *Opera Posthuma*. The works written in defence and refutation of the system of *S.* are very numerous. D. 1677. Feb. 21, 1877, Earnest Renan delivered an address at the unveiling of a monument to *S.* at the Hague.

Spínolist, n. A follower of, or believer in, the Pantheistical doctrines of Spinoza.

Spin'ster, n. [*Spin*, and term. *ster*.] A woman who spins, or whose occupation is to spin.

(*Law*.) The common designation of an unmarried woman or single woman;—used in legal proceedings as an addition to the surname, as *bachelor* is appended to that of an unmarried man.

Spin'there, n. [*Fr.* from *Gr. spinther*, a spark.] (*Min.*) A greenish variety of sphere, occurring crystallized in very irregular four-sided pyramids, which are obliquely truncated in Dauphine, adhering to crystals of calc spar.

Spinule, (spín'yool), n. A minute spine.

Spinulescent, (spín-ù-lès-sent), a. (*Bot.*) Small-spined.

Spin'ulose, Spin'ulous, a. Presenting minute spines.

Spin'y, a. [*From spine*.] Thorny; full of spines; as, a spinny shrub.—Slender; tenuous; like a spine; as, a spinny insect.—Perplexed; difficult; troublesome; arduous; as, a spinny affair.

Spin'y Lobster, SEA-CRAYFISH, n. (*Zool.*) The popular name of the genus *Palinurus*, a genus of *Crustaceæ*, section *Macrurans*. The Common *S. L.* (*Palinurus vulgaris*), attains a length of about 18 inches. The shell is very hard, and the whole body is rough with short

spines. The antennæ are very long, much longer than those of the common lobster. There are no claws or pincers, the first pair of feet being very similar to the others.

Spiracle, (spí'ra-kl), n. [*Fr. spiracule*; *Lat. spiraculum*, from *spiro*, to breathe.] Any small hole; an aperture or vent.

(*Nat. Hist.*) A small vent in animal or vegetable bodies, by which air or other fluid is inhaled or exhaled.

Spiræ'a, n. (*Bot.*) A genus of plants, order *Rosacæ*. The species *S. ulmaria* is the herb familiarly known

by the names of *Pride of the Meadow*, *Queen of the Meadows*, and *Meadow-sweet* (Fig. 2411). Its numerous white flowers are remarkable for their fragrance, its roots for their tonic properties. It is cultivated in our gardens, as are also other species of this beautiful genus.

Spiral, a. [*Fr.*, from *Lat. spirā*, a coil, a fold; *Gr. speira*.] Pertaining to, or resembling, a spire.—Winding round a cylinder or other round body, or in a circular form, and at the same time rising or advancing forward; winding like a screw; winding round a fixed point or centre, and continually receding from it, like a watch-spring.

Spiral gear, or gearing, a kind of gearing often used in light machinery in place of bevel gearing, to change the direction of motion; it consists of wheels caworking with their axis at an angle with each other double that of the direction of the teeth with the axis.

Spiral wheel. (Mach.) A wheel having its teeth notched at an angle with its axis, so that they form small parts of screws or spirals.

Spiral vessels. (Veg. Anat.) Membraneous tubes with conical extremities, lined in the inside by a fibre twisted spirally, and capable of unrolling with elasticity. Their function is that of the conveyance of air. They are found in almost any part of a plant except the bark; but are most abundant in leaves and flowers, and least common in the stem and root, except in the modular sheath of the former.

n. (Geom.) A curve-line of the circular kind, which in its progress always recedes more and more from its centre.

(*Arch.*) A curve that ascends winding about a cone or spire, so that all its points continually approach its axis.

Spiral of Archimedes. The curve traced by a point moving with uniform velocity along a line (radius vector) which rotates with uniform velocity around a point.

Spirally, adv. In a spiral form or direction; after the manner of a screw.

Spirant, n. [*Lat. spirans, spirantis*, from *spirare*, to breathe.] A continuous or fricative consonant.

Spiranthes, n. [*Gr. speira*, a cord; in reference to the twisted spike.] (*Bot.*) A genus of plants, order *Orchidaceæ*. The Ladies' Tresses, *S. gracilis*, not uncommon in old woods in N. England and Canada, is a very delicate plant. Its small, white flowers are arranged in a row which winds once or twice around the stem.

Spire, or SPIRES, (Ger. Speier, or Speyer, anc. Civitas Nemetur, or Noriomagus), an ancient town of Germany, at the confluence of the Spirebach and the Rhine, 17 miles from Landau. The only interesting building is the old Cathedral, now falling into decay. It is inclosed by walls, has an old palace, a city hall, gymnasium, orphan asylum, house of correction, and museum of antiquities. *Manuf.* Tobacco, vinegar, and there are sugar-refineries.—In this city forty-nine diets were held; and at one, in 1529, the protest to the emperor was made which gave rise to the religious designation of Protestants. On one occasion it was the winter quarters of Julius Cæsar, and in the Middle Ages the residence of several German emperors. *Pop.* 11,742.

Spire, n. [*Fr.*; *Lat. spirā*; *Gr. speira*, from *spiro* to join.] That which is wound, wreathed, coiled, or twisted; a coil; a curl; a twist; a wreath: a winding line like the threads of a screw; anything wreathed or contorted; as, "air seems to consist of spires contorted with small spheres."—*Cheyne*.

—A body that shoots up to a point, so called perhaps because a line drawn round and round in less and less circles and rising at the same time, would be a spire; a conical or pyramidal body; a steeple; a tapering body; as, the spire of a church.—A stalk or blade of grass or other plant.

—The top, apex, or uppermost point of a thing; as, the spire of one's ambition.

(*Geom.*) A line drawn progressively round the same axis, with a distance between each circle.

Spire of a shell. See *SHELL*.

(*Arch.*) Among the ancients, the base of a column, also the astragal or torus of the base. In modern architecture, the conical erection above the tower of a church, which diminishes gradually as it rises, sometimes assuming the form of a plain, slender pyramid, polygonal in plan, rising from the square base formed by the tower from which it springs. The earliest examples of anything resembling a spire are the pyramid roofs of the turrets of Norman date, of which Fig. 2412 presents good specimens. As the early English style arose, considerably greater elevation was given to spires (Fig. 2413), although they were still very frequently less acute than they afterwards became. In the decorated style, the spires were more enriched, with a parapet and pinnacles at the top of the tower, crochets on the angles, and enriched windows. In the perpendicular style the same arrangement was continued, although the character of the details and enrichments were altered in common with those of the other features of Gothic architecture. The spires were often perforated, and their sides filled

1. Turret, St. Peter's Church, Oxford, c. A. D. 1160. 2. Turret, Rochester Cathedral, c. A. D. 1160. 3. Pinnacle, Bishop's Cleeve Church, Gloucestershire, c. A. D. 1080. 4. Than Church, near Caen, Normandy, c. A. D. 1080.

Fig. 2413.—SPIRES.

5. Almondshury Church, Gloucestershire, c. A. D. 1250. 6. Salisbury Cathedral, c. A. D. 1350. 7. St. Mary's Church, Cheltenham, c. A. D. 1300.

entirely with tracery. Such spires are common in Germany, those of Strasburg (see *STRASBURG*) and Freiburg on the Rhine, being very fine examples.

Spire, v. a. To shoot up pyramidically or conically.—To sprout, as grain in malting.

Spi'ed, a. Possessing a spire.

Spi're-steep'le, n. The upper extremity of a spire. (*R.*)

Spi'rifer, n. [*Lat. spirā*, a spire, and *ferre*, to bear.] (*Pal.*) The name of a genus of extinct molluscs of the class *Brachiopoda*, characterized by the shell having two internal calcareous spiral appendages. They are common in the coal strata.

Fig. 2414.
SPIRIFER UNDULATUS.

Spi'rit, n. [*Fr. esprit*, from *Lat. spiritus*, from *spiro*, to breathe, live; akin to *W. ysbrid*, a spirit.] Breath; air or wind set in motion by breathing;—hence, sometimes life itself; as, the balmy spirit of the western breeze.—An immaterial intelligent substance or being; vital or active principle, essence, force, or energy, as distinct from matter; life or living substance, considered apart from material or corporeal existence.—The soul of man, as distinguished from the *body* wherein it dwells.

"If we seclude space, there will remain in the world but matter and mind, or body and spirit."—*Watts*.

—The human soul after its disruption from the body.

"The spirit shall return unto God who gave it"—*Ecc. xii. 7*.

—Hence, a ghost; a spectre; a supernatural apparition or manifestation; also, sometimes, an elf; a fay; a sprite.—Animal excitement, or the effect of it; ardor; fire; courage; elevation or vehemence of mind, temper, energy, or enthusiasm; as, a man of spirit.—A person of life, vigor, activity, or enterprise; one who exhibits liveliness, vivacity, or peculiar characteristics of mind or temper; as, a ruling spirit, a dominant spirit, a restless spirit.—Disposition of the mind, habitual or temporary; turn of tem-

Benedict Spinoza

1632-1677

per: occasional mental, moral, or intellectual state; as, he worked with *spirit*, I left him in good *spirits*, uncertainty is apt to put a man in low *spirits*.—The quality of any substance which manifests life, activity, or the power of strongly affecting other bodies; any tenuous, airy, or volatile substance.—Real meaning: intent;—in contradistinction to the *letter*, or to *formal statement*; also, characteristic quality, particularly such as is derived from the individual genius, or the personal character; as, the *spirit* of the law.

(Chem.) A name generally applied to fluids, mostly of a lighter specific character than water, and obtained by distillation. Thus, the essential oil of turpentine is called *spirit* of turpentine. Essential oils dissolved in alcohol are called *spirits*, as *spirit* of aniseed, peppermint, &c., because formerly prepared by distilling the herbs with alcohol. The volatile alkali ammonia, distilled and condensed in cold alcohol, is called *spirit* of ammonia; even hydrochloric acid is often called *spirit of salts*. But in a stricter sense, the term *spirit* is understood to mean *alcohol* (q. v.), in its potable condition, of which there are very numerous varieties, deriving their special characters from the substances used in their production, as brandy, rum, whisky, gin, arrack, &c.

(Note. *Spirit* is frequently combined with other words, forming self-explaining compounds; as, *spirit-moving*, *spirit-stirring*, *spirit-rousing*, &c.)

Animal spirits. (Physiol.) The fluid which is supposed to circulate through the nerves, and which has been regarded as the agent of sensation and motion, and as analogous in its effects and properties to electricity; the nervous fluid or principle. (Dunglison.)—*The Spirit, or Holy Spirit*. (Theol.) The Holy Ghost; the Spirit of God, or the third person of the Trinity. The *spirit* also denotes the human spirit as animated by the Divine Spirit.—*Rectified spirit*, proof spirit made pure by distillation.

Spirit, v. a. To infuse life or spirit into; to animate with vigor; to excite; to inspirit; to encourage;—sometimes preceding up.

"Civil dissensions never fail at *spiriting* the ambition of private men."—Swift.

—To convey away rapidly and secretly, as if by the agency of a spirit;—often followed by *away*; as, "The ministry had him *spirited away* abroad as a dangerous person."—Arbutnot.

Spirit Creek, in Georgia, enters Savannah River from Richmond co.

Spirit-duck, n. (Zool.) A species of duck; the GARROT, q. v.

Spirited, p. a. Animated; ardent; lively; full of life; vivacious; infused with spirit or fire; bold; as, a *spirited* reply, a *spirited* demand, a *spirited* rebuke, &c.;—used also in composition as expressive of the mind, disposition, or character, as in high-*spirited*, mean-*spirited*, low-*spirited*, &c.

Spiritedly, adv. In a spirited, ardent, or vivacious manner; with spirit, courage, or animation; as, he spoke *spiritedly*.

Spirit-edness, n. Quality of being spirited; life; vivacity; animation; as, his answer was written in a strain of *spirit-edness*.—Disposition or make of mind;—used in the construction of compound terms; as, high-*spirit-edness*, mean-*spirit-edness*, low-*spirit-edness*, narrow-*spirit-edness*.

Spiritful, a. Lively; animated; full of spirit or vivacity. (R.)

Spiritfully, adv. In a spiritful, lively, or vivacious manner. (R.)

Spiritfulness, n. State or quality of being spiritful; liveliness; spiritfulness; vivaciousness.

Spiritism, n. Same as SPIRITUALISM, q. v.

Spiritist, n. A spiritualist.

Spirit Lake, in Iowa, a lake of Dickinson co., abt. 10 m. long and 7 broad.—A post-village, cap. of Dickinson co., on the above lake, abt. 90 m. N.N.W. of Fort Dodge. It is a summer resort, and has the State fish-hatchery.

Spirit Lake, or MILE LACS (meel-lak), in Minnesota, a lake of Aitken co., abt. 18 m. long and 14 broad, the surplus waters of which are discharged into the Mississippi through Rum River.

Spirit-lamp, n. A lamp in which spirits of wine is burned, used chiefly for heating.

Spiritless, n. Destitute of spirit or liveliness; wanting animation; lacking cheerfulness; dejected; depressed; as, a *spiritless* mind.—Wanting in life, courage, fire, vigor, or energy; as, a *spiritless* coward.—Dead; defunct; without breath or vital heat; as, a *spiritless* corpse.

Spiritlessly, adv. In a spiritless manner; without animation, courage, or exertion; as, he went about his work *spiritlessly*.

Spiritlessness, n. State or quality of being spiritless; deadness; dulness; lack of animation, vigor, courage, or energy.

Spirit-level, n. See LEVEL.

Spirito, **Spirito-so**, a. [It., with spirit.] (Mus.) A term denoting, when affixed to a movement, that the latter is to be performed in a spirited manner.

Spiritous, a. [Fr. *spiritueux*.] Like spirit; refined; pure; defecated.—Fine; ardent; active. (R.)

Spirit-rapper, n. A pretender to intercourse with spirits of the departed, which latter impart intelligence by means of audible raps or knocks.

Spirit-rapping, n. Spiritualism; clairvoyance.

Spiritual, a. [Fr. *spirituel*; Lat. *spiritualis*—*spiritus*] Consisting of spirits only; incorporeal; not material; as, a *spiritual* being.—Mental; intellectual; pertaining, or relating, to the higher attributes or endowments of the mind; as, *spiritual* knowledge.—Refined from

external actions or things; having reference to the moral feelings or internal workings of the soul; not gross or sensual.—Pertaining, or having reference, to the soul or its affections, as influenced by the spirit; pertaining to the renewed nature of man; pertaining to divine things; pure; holy; not carnal or material; as, *spiritual* blessings.—Ecclesiastical; pertaining, or having reference, to sacred things; clerical; not lay or temporal; as, a *spiritual* person, *spiritual* kindred, the *spiritual* functions of the church, &c.

Spiritual court. (Law.) An ecclesiastical court or tribunal.

Spiritualism, n. State of being spiritual.

(Philos.) That philosophical system according to which all that is real is spirit, soul, or self; that which is called the *external world* being regarded as either a succession of notions impressed on the mind by the Deity, or else the mere educt of the mind itself. The first is the S. of Berkeley; the second, which may be called *pure egoism*, is that of Fichte.—Of late, however, the term S. has been almost exclusively applied, at least in America, to a faith in the frequent communication of intelligence from the spirit-world, by the agency of physical phenomena, usually manifested through a person possessing peculiar susceptibility, called a *medium*;—which faith is called *Spiritism* in France and other states of continental Europe. The origin of S. has been traced to the writings of Swedenborg, who died in 1774; but S., properly so-called, may be said to have had for a precursor Andrew Jackson Davis, surnamed the *Ser of Poughkeepsie*, born in Orange co., N. Y., 1826, who, in his youth, entered into wonderful communication with the unseen world, which he believed to be from the disembodied spirits of human beings. He, later, entered into what he calls *clairscience*, or the *superior condition*, far above that of ordinary clairvoyance, and proceeded to dictate a book called the *Principles of Nature*, which, in due time, was followed by *The Great Harmonia*; being a *Philosophical Revelation of the Natural, Spiritual, and Celestial Universe*. About the same time (April, 1848) new wonders claimed the attention of the American people. The "spirit-rapping" phenomenon caused throughout the civilized world an excitement which is still fresh in the memory of every one. Spiritualists admit that many impositions have been practised under the name of spiritual manifestations, but they aver that in most instances cheats could not have been palmed off, even if designed, and that in other cases there could not be any possible motive for deception, as the investigations were carried on in private families, while the mediums were their own sons and daughters. For several years S. constituted one of the most prominent themes of public discussion; its phenomena were multiplied by thousands, and were subjected to many tests. Though not over-successful in its public manifestations, S. has impressed itself as a truth in the minds of so many excellent persons that, even at the present day, it would be presumptions, even for the unbeliever, to pronounce decidedly against it. A considerable impulse was given to S. in Europe, chiefly in France and in England (1855), by the arrival of a super-eminent American medium, Mr. Daniel D. Home. In his presence, it is said, an accordion held by the end opposite to the keys played the finest music; tables and chairs moved without contact; the hands of disembodied spirits appeared at the side of a table, or touched the knees of those sitting at it; mystic lights were seen. Most surprising of all, it was stated by various professed eye-witnesses that Mr. Home was occasionally lifted off his feet and passed floating through the air, while the accordion would also float about under the ceiling of the room, discoursing the divinest voluntaries. By the raps and tapping of tables, and by the control of the medium's organs to write and speak, the spirits are supposed to express their own peculiar intelligence in a degree of perfection proportioned to the development and passivity of the medium; and it is averred that persons while under the spiritual affluence have often spoken in foreign tongues which they had never learned; and writings in languages to them unknown have, in a few instances, been produced in their presence, as we are told, by invisible hands.—In their 5th National Convention, held at Rochester, N.Y., Aug. 26-28, 1863, the Spiritualists of America united themselves into an association, to which they gave the name of the *American Association of Spiritualists*, whose objects are "to coöperate with State and local organizations in the promulgation of the Spiritual philosophy and its teachings, and encourage the establishment of at least one national college, for the education of persons of both sexes, on terms of equality, free from all sectarian dogmas, where their children may be educated in accordance with the progressive developments of the age." In the same Convention they adopted the following resolutions, embodying the essential truths of S.:—1. That man has a spiritual nature as well as a corporeal; in other words, that the real man is a spirit, which spirit has an organized form, composed of spiritual substance, with parts and organs corresponding to those of the corporeal body. 2. That man, as a spirit, is immortal, and has continued identity. Being found to survive that change called physical death, it may be reasonably supposed that he will survive all future vicissitudes.—3. That there is a spirit-world, with its substantial realities, objective as well as subjective. 4. That the process of physical death in no way essentially transforms the mental constitution, or the moral character of those who experience it. 5. That happiness or suffering in the spirit-world, as in this, depends not on arbitrary decree, or special provision, but on character, aspirations, and degree of harmonization, or of personal conformity to universal and divine law. 6. Hence,

that the experiences and attainments of this life lay the foundation on which the next commences. 7. That since growth is the law of the human being in the present life, and since the process called death is in fact but a birth into another condition of life, retaining all the advantages gained in the experiences of this life, it may be inferred that growth, development, or progression is the endless destiny of the human spirit. 8. That the spirit-world is near or around, and interblended with our present state of existence; and hence that we are constantly under the cognizance and influence of spiritual beings. 9. That as individuals are passing from the earthly to the spirit-world in all stages of mental and moral growth, that world includes all grades of character from the lowest to the highest. 10. That since happiness and misery depend on internal states rather than on external surroundings, there must be as many grades of each in the spirit-world as there are shades of character—each gravitating to his own place by the natural law of affinity. 11. That communications from the spirit-world, whether by mental impression, inspiration, or any other mode of transmission, are not necessarily infallible truths, but on the contrary partake unavoidably of the imperfections of the minds from which they emanate, and of the channels through which they come, and are, moreover, liable to misinterpretation by those to whom they are addressed. 12. Hence, that no inspired communication, in this or any past age (whatever claims may be or have been set up as to its source), is authoritative, any further than it expresses truth to the individual consciousness, which last is the final standard to which all inspired or spiritual teachings must be brought for test. 13. That inspiration, or the influx of ideas and promptings from the spirit-world, is not a miracle of a past age, but a perpetual fact, the ceaseless method of the divine economy for human elevation. 14. That all angelic and all demoniac beings which have manifested themselves, or interposed in human affairs in the past, were simply disembodied human spirits, or beings of like character and origin, in different grades of advancement. 15. That all authentic miracles (so called) in the past, such as the raising of the apparently dead, the healing of the sick by the laying on of hands or other simple means, power over deadly poisons, the movement of physical objects without visible instrumentality, &c., have been produced in harmony with universal laws, and hence may be repeated at any time under suitable conditions. 16. That the causes of all phenomena—the sources of all power, life, and intelligence—are to be sought for in the internal or spiritual realm, not in the external or material. 17. That the chain of causation, traced backward from what we see in nature and in man, leads inevitably to a Creative Spirit, who must be not only a *font of life* (love), but a *forming principle* (wisdom)—thus sustaining the dual parental relations of Father and Mother to all individualized intelligence, who, consequently, are all brethren. 18. That man, as the offspring of this Infinite Parent, is in some sense His image or finite embodiment; and that, by virtue of this parentage, each human being is, or has, in his inmost nature, a germ of divinity—an incorruptible offshoot of the Divine essence, which is ever prompting to good and right. 19. That all evil in man is in harmony with this divine principle; and hence whatever prompts and aids man to bring his external nature into subjection to, and harmony with, the divine in him—in whatever religious system or formula it may be embodied—is a "means of salvation" from evil. 20. That the hearty and intelligent conviction of these truths, with a realization of spirit-communion, tends, 1st. To enkindle lofty desires and spiritual aspirations, an effect opposite to that of materialism, which limits existence to the present life. 2d. To deliver from painful fears of death, and dread of imaginary evils consequent thereupon, as well as to prevent inordinate sorrow and mourning for deceased friends. 3d. To give a rational and inviting conception of the after-life to those who use the present worthily. 4th. To stimulate to the highest possible uses of the present life, in view of its momentous relations to the future. 5th. To energize the soul in all that is good and elevating, and to restrain from all that is evil and impure. This must result, according to the laws of moral influence, from a knowledge of the constant pressure or cognizance of the loved and the pure. 6th. To promote our earnest endeavors, by purity of life, by unselfishness, and by loftiness of aspiration, to live constantly *en rapport* with the higher conditions of spirit-life and thought. 7th. To stimulate the mind to the largest investigation and the freest thought on all subjects, especially on the vital themes of spiritual philosophy and duty, that we may be qualified to judge for ourselves what is right and true. 8th. To deliver from all bondage to authority, whether vested in creed, book, or church, except that of received truth. 9th. To cultivate self-reliance and careful investigation by taking away the support of authorities, and leaving each mind to exercise its own truth-determining powers. 10th. To quicken all philanthropic impulses, stimulating to enlightened and unselfish labors for universal human good, under the encouraging assurance that the redeemed and exalted spirits of our race, are encompassing us about as a great cloud of witnesses, inspiring us to the work. \$50,000 was left by Mr. Seybert of Phila., for the investigation of modern S. See Report of the Seybert Commission. (Phila., 1887).

Spiritualist, n. [Fr. *spiritualiste*.] One whose avocation or employment is spiritual; one who professes a regard for spiritual things only;—the opposite to *materialist*.—One who upholds or believes in the philosophical doctrine of spiritualism.—One who has faith in immediate intercourse with departed spirits, through

the agency of persons styled *mediums*; a believer in spirit-rapping; a spiritist.

Spiritualist, *a.* Relating or pertaining to, or associated with or deduced from, spiritualism.

Spirituality, *n.* [Fr. *spiritualité*.] Quality or state of being spiritual; essence, as distinct from matter; intellectual or spiritual nature; the quality which affects the spirit or affections of the heart only, and the essence of true religion; immateriality; as, the *spirituality* of the soul.—That which belongs to a church, or to a person, as an ecclesiastic, or to religion; as, the *spiritualities* of a hierarchy.

Spiritualization, (*-zā'shun*), *n.* Act of spiritualizing.

Spiritualize, *v. a.* [Fr. *spiritualiser*.] To render spiritual; to imbue with spirituality or intellectual life; as, to *spiritualize* the soul.—To refine, as the intellect; to purify from the pollutions of the world, as the moral nature.—To convert to a spiritual meaning. (*Chem.*) To extract spirit from, as certain natural bodies.—To convert into spirit, or to impart the properties of spirit to.

Spiritualizer, *n.* One who spiritualizes.

Spiritually, *adv.* In a spiritual manner; in a manner conformed to the spirit of true religion; with purity of spirit or heart; without corporeal grossness or sensuality.

Spiritualness, *n.* State or quality of being spiritual.

Spirituous, *a.* [Fr. *spiritueux*.] Possessing the quality of spirit; pure; active; as, a *spirituous* nature. (*South.*)—Containing spirit; consisting of refined spirit; ardent; as, *spirituous* liquors.

Spirituousness, *n.* State or quality of being spirituous; ardor; heat; vitalizing quality.

Spiritketting, *n.* (*Naut.*) That part of the inner planking of a ship which lies between the ports and the next lower waterway.

Spirometer, *n.* [Lat. *spirare*, to breathe, and Gr. *metron*, measure.] An apparatus for measuring the vital capacity of the lungs, or the quantity of air that an individual can expire after a forced inspiration.

Spirit, *v. and n.* Same as *SPURT*, *q. v.*

Spirit, *v. a.* To spirit in a scattering manner.

Spirula, *n.*; *SPIRULIDÆ*, *n. pl.* [Lat., a small, twisted cake.] (*Zool.*) A genus and family of dibranchiate ce-

Fig. 2415.—*SPIRULA LEVIS*, (half size.)

phalopods (Fig. 2415), characterized chiefly by having a spiral, discoid, chambered shell developed in the substance of the mantle, instead of a calcareous or horny plate.

Spiry, *a.* [From *spire*.] Of spiral form; wreathed; curved.—Pyramidal; having the form of a pyramid; presenting the appearance of a spire; as, a *spiry* turret. (*Pope*).—Having, or abounding with, spires; as, a *spiry* edifice.

Spissated, *a.* Inspissated; thickened; rendered dense or compact.

Spissitude, *n.* [Lat. *spissitudo*.] The denseness or compactness which pertains to substances not perfectly fluid nor perfectly solid.

Spit, *n.* [A. S. *spitu*; Du. *spit*, a spit.] An iron prong or bar pointed, on which meat is roasted.—A long, narrow shoal or sand-bank extending from the shore into the sea.

—*v. a.* To thrust a spit through; to put upon a spit; as, to *spit* a sirloin of beef.—Hence, to pierce; to thrust through; as, to *spit* a man with a bayonet.

—*n.* [Icel. *spytla*.] Spittle; saliva. See *SALIVA*.

—*v. a.* (*imp.* and *pp.* *SPIT*.) (*SPAT*, obs.) [A. S. *spetan*; Dan. *spytte*.] To eject from the mouth; to throw out, as saliva.—Hence, to eject or throw out with violence.

—*v. n.* To throw out saliva from the mouth.

To *spit on*, or *upon*, to treat with gross insolence or contumely.

"I dare meet Surrey, and spit upon him whilst I say he lies." *Shaks.*

Spit-box, *n.* Same as *SPITTOON*, *q. v.*

Spitche-cock, *v. a.* (*Cookery*.) To split, as a fowl or an eel lengthwise, and broil.

—*n.* (*Cookery*.) Any thing split and broiled, or broiled, as an eel, a chicken, &c.

Spite, *n.* [Du. *spijt*; Fr. *dépit*; Lat. *despectus*, from *despicio*, to look down upon.] Contempt; hatred; malice; rancor; malignity; malevolence; pique; grudge; as, a good, solid hatred does not descend to vulgar *spite*.—In *spite of*, in defiance or contempt of; notwithstanding all efforts of; as, he gets drunk occasionally in *spite of* all.—To owe one a *spite*, to cherish a grudge against a person; to harbor a malevolent feeling for one, scarcely amounting to a fixed or permanent hatred.

—*v. a.* To hate, or, rather, regard maliciously; to be angered or vexed at.—To thwart; to meditate or do mischief to; to injure; to treat maliciously.—To vex; to offend; to fill with spite, petty anger, or vexation.

Spiteful, *a.* Filled with spite; malicious; malignant; having an impulse to vex, offend, annoy, or injure; as, a *spiteful* temper.

Spitefully, *adv.* In a spiteful manner; malignantly; maliciously; with a desire or propensity to vex, annoy, offend, or injure.

Spitefulness, *n.* State or quality of being spiteful.

Spitfire, *n.* A violent, irate, or hot-tempered person; particularly, a tergitant; a scolding, railing woman. (*Used colloquially.*)

Spithead, a noted roadstead for shipping in the English Channel, situate between Portsmouth and the Isle of Wight, directly facing Portsmouth harbor. It is about 20 miles in extent, and is said to be capable of holding 1,000 vessels in safety. Its security has obtained for it from sailors the name of the "King's Bed-chamber," and it is the principal rendezvous of the British navy.

Spitted, *p. a.* Put upon a spit; as, a *spitted* joint of meat.

—Shot out at length, as the horns of a full-grown deer.

Spitter, *n.* One who spits meat.—One who ejects spitte or saliva from his mouth.—A brocket or pricket.

Spittle, (*spit'le*), *n.* [From *spit*.] Same as *SALIVA*, *q. v.*

Spittoon, *n.* A box for the reception of saliva or tobacco-juice ejected from the mouth; a spit-box.

Splendberg, a cluster of islands in the Arctic Ocean, and the most northern land yet discovered, in Lat. 76° 30' and 80° 40' N., Lon. 9° and 22° E., 200 m. N. of Scandinavia, and 325 m. E. of Greenland. Being far within the Arctic circle, and surrounded by a wide expanse of sea, almost the whole of its surface is covered with perpetual snow and glaciers. It was discovered in 1596 by W. Barentz, a Dutch explorer, and has since been frequently visited by whalers. It is claimed by Russia as a dependency of its European territories.

Splanchnic, *a.* [Gr. *splāgchnon*, an entrail.] (*Anat.*) Pertaining or relating to the viscera; as, the *splanchnic* cavities.

Splanchni-skeleton, *n.* [Gr. *splāgchnon*, and Eng. *skeleton*.] The osseous structure of the viscera and other organs.

Splanchnography, *n.* [Gr. *splāgchnon*, and *graphein*, to write.] A description of the viscera.

Splanchnology, *n.* [Gr. *splāgchnon*, and *logos*, discourse.] The doctrine of the viscera.

Splanchnotomy, *n.* [Gr. *splāgchnon*, and *tone*, cutting.] (*Anat.*) The dissection of the viscera.

Splash, *v. a.* [*Intens.* of *PLASH*, *q. v.*] To besprinkle or bespatter with water, or with water and mud.

—*v. a.* To strike and dash about water.

—*n.* Water, or mud and water, cast upon anything, or thrown from a puddle or mess of slush.

Splash-board, *n.* The leather guard in front of the driving-box or seat of a vehicle, which prevents the driver or occupants thereof from being splashed by the horse's heels.

Splash'er, *n.* One who, or that which, splashes.—A guard over a wheel, as of a carriage, locomotive, &c.

Splashy, *a.* Wet; wet and muddy; full of dirty water.

Splat'er, *v. n.* To splash or scatter water about.

Splat'erdash, *n.* Tumult; confusion; uproar.

Splay, *v. a.* [A contraction of *splay*, *q. v.*] To dislocate or break, as a horse's shoulder-bone.—To make or render oblique; to slope or slant, as the side of a window and the like.

—*a.* Displayed; spread; turned outward.

—*n.* See *BEVEL*.

Splay-foot, *n.* A wide, flat foot.

Splay-foot, **Splay-footed**, *a.* Having the foot turned outward; possessing a wide foot.

Splay-mouth, *n.* A naturally wide mouth; also, a wide mouth stretched by design.

Splay-mouthed, *a.* Wide-mouthed; having a splay mouth.

Spleen, *n.* [Gr. *splēn*.] (*Anat.*) A spongy viscus (Fig. 218), of a livid color, oval in figure, and situated in the left hypochondriac region, between the eleventh and twelfth false ribs. It is convex externally and concave internally, and its weight in the healthy adult is from four to ten ounces. It is largely composed of cells, but its internal structure is not well understood, neither have its uses been ascertained; but it would seem to be in some way of use to the stomach during the process of digestion. The ancients regarded it to be the seat of all ill-humors, as anger, melancholy, &c.; and hence the term *splenetic* applied to such as are cross and crabbed.

—Latent spite; ill-humor;—a species of hypochondria peculiar to Englishmen.—A burst of anger or vexation; as, do not vent your *spleen* upon me.—Constitutional melancholia; hypochondriacal bent; as, "Bodies changed to recent forms by *spleen*."—*Pope*.

Spleened, *a.* Deprived of the spleen; as, "Animals *spleened* grow salacious."—*Arbuthnot*.

Spleenful, *a.* Exhibiting spleen; angry; fretful; melancholy; hypochondriacal; as, a *spleenful* will.

Spleenish, *a.* Spleeny; affected with spleen.

Spleenishly, *adv.* In a spleenish or petulant manner.

Spleenishness, *n.* State or quality of being spleenish.

Spleenwort, (*-wort*), *n.* (*Bot.*) See *ASPLENIUM*.

Spleeny, *a.* Affected with spleen; angry; peevish; fretful; melancholy.

Spleget, (*splē'et*), *n.* (*Surg.*) A cloth dipped in any kind of liquor for washing a sore.

Splend'ent, *a.* [Lat. *splendens*, from *splendeo*, to shine.] Shining; bright; gleaming; glittering; glossy; beaming with light; very conspicuous; illustrious.

Splendid, *a.* [Fr. *splendide*; Lat. *splendidus*, from *splendeo*.] Shining; very bright; glittering; showy; magnificent; sumptuous; pompous; illustrious; heroic; brilliant; famous; celebrated.

Splendidly, *adv.* With great brightness or brilliant light; magnificently; sumptuously; richly; with great pomp or show.

Splendor, *n.* [Fr. *splendeur*; Lat. *splendor*, from *splendeo*, to shine, be bright.] Brightness; brilliancy; lustre; great brightness; brilliant lustre; great show of riches and elegance; magnificence; grandeur; gorgeousness; display; pomp; parade; brilliance of appearance, as of ceremonies; eminence.

Splen'etic, *n.* A person affected with spleen.

Splen'etic, **Splen'etical**, *a.* Troubled with, or proceeding from, spleen; fretful; peevish.

Splenetically, *adv.* In a morose or spleeny manner.

Splen'ic, *a.* Belonging to the spleen.

Splenitis, *n.* [Gr.] (*Med.*) Inflammation of the spleen.

Splenization, *n.* (*Med.*) The state of the lungs in the first or second stage of pneumonia, or lung fever, in which its tissue resembles that of the spleen.

Splen'ocèle, *n.* [Gr. *splēn*, and *kēlē*, tumor.] (*Med.*) Hernia formed by the spleen.

Splenography, *n.* [Gr. *splēn*, and *graphein*, to describe.] (*Med.*) A description of the spleen.

Splenology, *n.* [Gr. *splēn*, and *logos*, a discourse.] (*Med.*) A treatise on the spleen.

Splenotomy, *n.* [Gr. *splēn*, and *tomeo*, to cut.] (*Anat.*) Dissection of the spleen.

Splend'coal, *n.* A hard, laminated kind of coal, less bituminous than caking coal, and intermediate between cannel and common pit-coal.

Splice, (*splis*), *v. a.* [Ger. *splissen*.] To take asunder or separate, as the strands of the two ends of a rope, and unite them by a particular manner of interweaving them; or to unite, as the end of a rope to any part of another, by a like interweaving of the strands.

To *splice the main brace*.

(*Naut.*) To grant an extra allowance of spirits in case of cold or wet.

—*n.* The union of ropes by interweaving the strands; a piece added to a rope by splicing.

Splic'ing, *n.* Act of one who splices.

Splint, *n.* [Ger. *splint*, *splinter*.] A piece of wood or other solid substance rent from the main body; a splinter.

(*Surg.*) A thin piece of wood, or other substance, used to hold or confine a broken bone, when set.—A piece of bone rent off in a fracture.

(*Furriery*.) A bony enlargement on a horse's leg, between the knee and fetlock, usually appearing on the inside of one or both forelegs, frequently situated between the large and small cannon bones, depending upon concussion, and most common in young horses that have been rattled rapidly along hard roads before their bones are consolidated.

—*v. a.* To split or rend into long, thin pieces; to shiver; to confine with splinters, as a broken limb.

Splint-bone, *n.* (*Furriery*.) One of the two small bones extending from the knee to the fetlock of a horse, behind the cannon, or shank-bone.

Splint'er, *n.* A fragment of anything broken with violence.—A thin piece of wood; a splint.

—*v. a.* To split or rend into fragments; to shiver.

—*v. n.* To be broken into fragments; to be shivered.

Splint'er-bar, *n.* A cross-piece supporting the springs of a carriage.

Splint'ery, *a.* Consisting of splinters, or resembling splinters.

Split, *v. a.* (*imp.* and *pp.* *SPLIT*.) [Du. *splitten*, *splitten*; Heb. *palach*, to cleave.] To divide; to sever; to separate; to part; to sunder; to divide longitudinally or lengthwise; to separate, as a thing from end to end by force; to rive; to cleave; to rend; to tear asunder by violence; to burst; to dash and break on a rock; to divide or break into discord.—To strain and pain with laughter.

—*v. n.* To sever; to part asunder; to burst; to suffer disruption; to crack; to burst with laughter; to be broken; to be dashed to pieces.

—*n.* A crack, rent, or longitudinal fissure.—A breach or separation, as in a political party.

—*a.* Divided; severed; separated; rent; broken or dashed to pieces against a rock, as a ship.

Splurge, (*splū'j*), *n.* A great effort; a struggle; a bustle.

Splut'er, *n.* Bustle; tumult. (*Low.*)

Spodumene, *n.* [Gr., to burn to ashes.] (*Min.*) A silicate of alumina and lithia, with part of the lithia replaced by soda. It is found in crystallized and laminated masses, hard, brittle, translucent, and of various shades of green or gray. Before the blowpipe, it exfoliates into little scales of an ash color; hence its name.

Spohr, Louis, (*spor*), a German composer, b. at Seesen, in Brunswick, 1783, was at first a violin-player in the private band of the Duke of Brunswick. His reputation commenced with the year 1804, upon the occasion of his travelling over Germany and giving concerts. After a course of travel in Italy, he was, in 1818, appointed director of music at the theatre at Frankfort-on-the-Main. About this time he commenced writing those operas which made his name famous throughout Europe. The most popular of these works are *Azor*, *Faust*, *Zemira*, and *Jessonda*. On leaving Frankfort, he was appointed chapel-master to the Grand-Duke of Hesse-Cassel. His *Violin School* is one of the best works of the kind which has ever been written. He also produced oratorios, songs, ballads, cantatas, and orchestral pieces, which are highly esteemed in Germany. D. 1859.

Spoil, *v. a.* [Fr. *spolier*; It. *spogliare*; Lat. *spoliare*, from *spolium*, the skin or hide of an animal stripped off, the arms stripped from an enemy.] To strip or deprive of; to cause to perish; to corrupt; to vitiate; to mar; to taint; to ruin; to injure fatally.

—*v. n.* To grow useless; to become corrupted or ruined; to decay.

Spoil, *n.* Something stripped off; that which is taken from others by violence;—particularly, in war, the plunder taken from an enemy; pillage; booty; prey; that which is gained by strength or effort; that which is taken from another without license; the act or practice of plundering; robbery; waste.

Spoilable, *a.* That may be spoiled.

Spoil-bank, *n.* A bank formed by earth dug out of any place, as in making a canal.

Spoiled, *a.* Plundered; unfit for use; corrupted.

Spoiler, *n.* A plunderer; a pillager; a robber; one who corrupts, mars, or renders useless.

Spokane, *n.* In Washington, an E. co., bordering on Idaho. *Rivers*, Columbia, Palouse, Spokane, and Lewis or Snake rivers. *Surface*, diversified; *soil*, generally fertile. *Cap. Spokane*. *Pop.* (1897) 51,200.

Spokane River, rises in Coeur d'Alene Lake, Idaho, and flows into the Columbia River in Spokane co., Washington Territory, after a N.W. course of abt. 100 m.

Spoke, *n.* [A. S. *spaca*; Du. *spak*, a lever, windlass; *speek*, a spoke; Ger. *speiche*.] The radius or ray of a wheel; one of the small bars which are inserted in the nave, and which serve to support the rim or telly; the rung or round of a ladder.

—*v. a.* To fit or furnish with spokes.

Spoke, *imp.* of SPEAK, *q. v.*

Spoken, (*spo'ku*) *pp.* of SPEAK, *q. v.*

Spoke-shave, *n.* A kind of shave for smoothing spokes, &c.

Spokesman, *n.* One who speaks for another.

Spoleto, (*spo-lai'to*), a town of the kingdom of Italy, formerly cap. of a delegation of the States of the church, on a hill, near the small river Maroggia, 24 m. from Rieti. It is an archbishop's see, and has some interesting remains. *Pop.* 8,714.

Spoilate, *v. a.* [Lat. *spolio*, *spoliatus*.] To spoil; to plunder; to pillage; to rob.

—*v. n.* To spoil; to practise plunder; to commit robbery.

Spoilation, *n.* [Fr.] Act of spoiling or plundering; particularly, of plundering an enemy in time of war; act or practice of plundering neutrals at sea, under authority.

Spoiliative, *a.* (*Med.*) Applied to blood-letting, when used for the purpose of diminishing the mass of the blood.

Spoiliator, *n.* [Lat.] One who commits spoliation.

Sponda'ic, **Sponda'ical**, *a.* [Lat. *spondaicus*.] Pertaining to a spondee. See SPONDEE.

Spon'dee, *n.* [Fr. *spondée*; Lat. *spondeus*; Gr. *spondeios*.] (*Lat. Poetry*.) A foot consisting of two long syllables. It was so called because, from its slow movement, it was ordinarily employed in the hymns sung in honor of the gods during the offering up of a sacrifice. —*Spondaic verse* is a hexameter line, in which the two last feet are spondees, instead of the usual termination, a dactyl and a spondee; but in these the fourth foot is always dactylic.

Spon'dias, *n.* (*Bot.*) A genus of plants, order *Anacardiaceae*, the species of which are natives of the tropics of both hemispheres. The fruits of some of them are edible. Thus, in Brazil and the W. Indies, *S. lutea*, *S. mombin*, *S. tuberosa*, &c., yield fruits eaten under the

Fig. 2417. — HOG PLUM, (*Spondias tuberosa*.)

name of Hog Plum, the taste of which is said to be peculiar, and not agreeable to persons unused to them. These fruits are chiefly used to fatten swine. *S. dulcis*, a native of the Society Isles, yields a fruit compared in flavor to that of the Pine-apple. *S. mangifera* yields a yellowish-green fruit, which is eaten in India, and is used as a pickle in the unripe state. — Some of the species are employed medicinally.

Sponge (*spunj*), *n.* [A. S. *spunge*, *sponge*; Fr. *éponge*; Lat. *spongia*.] (*Zoöl.*) A class of animals known to zoölogists under the name of *Spongia* or *Porifera*, and constituting the simplest type of multicellular animals or *Metazoa*, being the first stage above the *Protozoa*. Though greatly varying in appearance, sponges are of strikingly uniform structure, they being destitute of organs, while their tissues are but little differentiated. Three layers of tissue may always be distinguished, a flattened layer of epithelial cells, forming the outer surface, a digestive layer of columnar cells, each with a delicate collar and a flagellum at its free end, and an intermediate layer, or mesoderm, in which arise the skeletal elements and the reproductive cells. These are arranged as a simple cup-form or in various more complicated forms. Canals traverse every part of the

body, opening into inner chambers, and communicating with the exterior by minute openings through which water is drawn into the body of the *S.* The water, after its microscopic food contents have been absorbed, is driven from the body through larger canals and openings. Nearly all the sponges form a skeleton, whose elements are of two kinds, fibers and spicules. The spicules in some species are composed of carbonate of lime, in others of silica, each being the product of a single cell, while they greatly vary in form, producing figures of striking regularity. The fibers are laid down in a continuous network, and consist of a peculiar organic substance known as spongin. As a rule the spicules of *S.* are of silica, these being occasionally arranged with remarkable regularity, as in that very beautiful form known as "Venus's flower-basket." Sponges, except in the embryo state, have no power of motion, yet their

Fig. 2418.

SPONGIA OCLATA, WITH ONE OF THE PORES AND TWO SPICULES MAGNIFIED.

cilia are constantly active, while sensitiveness is shown in the closing of their pores when disturbed. In digestion each collar'd cell acts like a protozoan individual, swallowing and digesting the food particles, while the nutritive material thus obtained passes from cell to cell. The sponges are very largely marine, though a considerable variety of freshwater sponges have recently been discovered. They are found from the shore to great depths, and from their fixity and mode of growth they were long regarded as plants. Sponges multiply both by budding and by sexual reproduction. In the former the products of the buds remain continuous with the parent body. In sexual reproduction the ova and spermatozoa are produced from the mesoderm, the egg arising from the union of these two. The result of growth is a hollow sphere, swimming by ciliary action, and becoming invaginated to form a two-layered cup-shaped gastrula. This becomes fixed at its mouth end, pores open in the walls, an exhalant orifice is formed at the apex, and it begins life as a mature sponge. The species of *S.* are numerous, the fibrous framework of a number of them being in use for economical purposes. Two species are chiefly brought from the Levant, and a very inferior one from the W. Indies and coast of Florida. The trade in *S.* is very considerable; it is carried on chiefly by the Turks and the inhabitants of the Bahama Islands. The *S.* is obtained by diving, sometimes at great depths. The *S.* of the Bahamas and other West Indian islands are of a larger size and coarser quality; but large quantities are gathered. The *S.* are torn from the rocks by a fork at the end of a long pole. To get quit of the animal matter, they are buried for some days in the sand, and then soaked and washed. Fossil *S.* are found in the Trenton limestone and Potsdam sandstone, and probably were in existence long before the oldest Silurian epoch.

—Any instrument of soft substance, used for wiping and cleansing: a sponge.—Soft dough for bread.—One who hangs on others for a maintenance.—The hinder part of a horse-shoe.

Sponge, *v. a.* To wipe or cleanse with a sponge; to wipe out with a sponge, as letters or writing; to wipe out completely; to extinguish or destroy; to harass by extortion; to drain, as by a sponge; to get by mean arts.

—*v. n.* To suck in or imbibe, as a sponge; to gain by mean arts, by intrusion, or hanging on;—followed by *upon*.

Sponge-cake, *n.* A very light and porous kind of sweet-cake.

Sponge-crab, *n.* (*Zoöl.*) See DROMIA.

Sponger, *n.* One who uses a sponge; one who hangs on others for a maintenance; a hanger-on.

Spongi'form, *a.* That has the form of a sponge.

Spongi'ness, *n.* Quality or state of being spongy, or porous like sponge.

Spongi'ole, *n.* (*Bot.*) The lax cellular tissue and mucus situated at the extremities of roots, having the property of absorbing fluid like a sponge; whence the name.

Spongi'ose, **Spongi'oid**, *a.* Resembling sponge; spongy.

Spongi'y, *a.* Resembling sponge; soft and full of cavities; of an open, loose, pliable texture; full of small cavities; soaked and soft, like sponge; having the quality of imbibing fluids.

Spons'al, *a.* [Lat. *sponsalis*, from *spondeo*, *sponsus*, to promise solemnly, to promise in marriage.] Relating to betrothal, sponsal, or to a spouse.

Spons'ion, (*spôn'shun*) *n.* [Lat. *sponsio*, from *spondeo*.] A solemn promise or engagement; act of becoming surety for another.

(*International Law*.) An engagement made on behalf of a state by an agent not specially authorized, or exceeding the limits of the authority under which it purports to be made, and which, to be valid, must be confirmed by express or tacit ratification, as the official act of an admiral or a general suspending or limiting hostilities, capitulations of surrender, cartels of exchange, &c.

Spons'or, *n.* [Lat., from *spondeo*.] One who answers for an infant at baptism, that the child be brought up in the Christian faith;—particularly, a god-father or god-mother; also, a surety.

Sponso'rial, *a.* Pertaining to a sponsor.

Spon'sorship, *n.* State of being a sponsor.

Spontane'ity, **Spontane'ousness**, *n.* [Fr. *spontanéité*.] The quality of being spontaneous, or of proceeding or acting from nature, feeling, impulse, or temperament, without compulsion or external force; willingness.

Spontane'ous, *a.* [Lat. *spontaneus*, from *sponte*, of one's own accord, willingly, freely.] Being of one's own motion or free will; voluntary; proceeding from internal native feeling, proneness, or temperament, without compulsion or constraint; acting by its own impulse, energy, or natural law, without external force; not mechanical.—Produced without being planted, or without human labor, as a result of the unaided activity of nature, as a growth of weeds.

Spontane'ously, *adv.* Of one's own internal or native feeling; of one's own accord; by its own force or energy; without the impulse of a foreign cause.

Spont'ini, GASPARO, a distinguished musical composer, was b. at Majolatti, near Jesi, in the Roman States, 1778. He was educated at the Conservatorio de la Pietà of Naples, and began his career when 17 years of age, as the composer of an opera, *I Puntigli delle Donne*. This was followed by some 16 operas, produced within 6 years, for the theatres of Italy and Sicily, but not a note of which has survived. In 1803, S. went to Paris; in 1807, he was appointed music-director to the Empress Josephine; and in 1808, he produced his most famous work, *La Vestale*, with brilliant and decisive success. His *Fernando Cortez* appeared in 1809; and the next year witnessed his appointment to the directorship of the Italian Opera in Paris, which he held for ten years. In 1820, the magnificent appointments offered by the court of Prussia tempted him to leave Paris for Berlin, in which capital his three grand operas, *Nourmahal* (founded on "Lalla Rookh"), *Aleidor*, and *Agnes von Holnstauffen*, were produced with great splendor. S. continued to reside as first chapel-master in Berlin till the death of the king, in 1840. The latter period of his sojourn at Berlin was embittered by professional disputes; and in 1842 he repaired to Paris, where, in 1839, he had been elected one of the five members of the Académie des Beaux Arts. D. at the place of his birth, 1851.

Spool, *n.* [Ger. *spule*.] A piece of cane or reed, or a hollow cylinder of wood with a ridge at each end, used by weavers for winding their yarn; a bobbin.

—*v. a.* To wind on a spool, as thread or yarn.

Spo'm, *v. n.* [Probably from *spume*, a foam.] (*Naut.*) To go on swiftly.

Spoon, (*spōn*) *n.* [A. S. *span*; Ger. *span*.] A small domestic utensil, with a bowl or concave part, and a handle, used for taking up liquids, &c., at table, and for dipping; also, something in the shape of a spoon.

—*v. a.* To take up or out with a spoon or ladle.

Spoon-bill, *n.* (*Zoöl.*) The common name of the gullatorial birds comprising the family *Plataleidae*. In their general structure and habits they are allied to the storks and herons; but their beak, from which their name is derived, is long, flat, and broad throughout its

Fig. 2419. — ROSY SPOON-BILL, (*Platella ajaja*.)

length, widening and flattening more particularly at the end, so as to form a round spatula-like disc. The genus *Platella* comprises the only American species, the Rosy Spoon-bill, *P. ajaja*, of the S. Atlantic and Gulf States, which is 30 inches long, and the bill 7; color rose-red.

Spoon'drift, *n.* (*Naut.*) The light spray blown off the waves in a violent wind.

Spoon'ful, *n.* As much as a spoon contains, or is able to contain; a small quantity of a liquid.

Spoon'-meat, *n.* Food that is, or must be, taken with a spoon; liquid food; slops.

Spoon River, in Illinois, rises in the W.N.W. of the State, and flows into the Illinois River near Havana, in Mason co., after a S.W. course of abt. 100 m.

Sporades, (*spor-a-deez'*) called also the *Scattered Islands*, a subdivision of the Grecian Archipelago, belonging partly to Turkey and partly to Greece. They surround the Cyclades.

Sporad'ic, *n.* [Gr. *sporadikos*, scattered.] (*Med.*) A term applied to diseases of an uncertain seat or variable origin, including hemorrhage, cancer, dropsy, and diseases of special systems and origins, as meningitis, paralysis, mania, tetanus, &c.

Sporan'gium, *n.*; *pl.* SPORANGIA. [Gr. *spora*, a seed, and *aggeiose*, a vessel.] (*Bot.*) One of the cases in which

the spores of flowerless plants are formed. In ferns it is applied to the little cysts with their elastic riug (Fig. 2321); in pseudo-ferns, to the organs immediately containing the spores, whether naked or contained in a common receptacle; in mosses, to the urn-shaped bodies, which are often called *capsules* and *thecae*. When the case is so small as to become microscopic, it is sometimes called *Sporangium*.

Spore, *n.* (*Bot.*) One of the reproductive bodies formed by flowerless plants instead of seeds. A spore generally consists of a single cell, composed of two or more membranes, inclosing granular matter. Having no embryo, it can not have a cotyledon, which is an essential part of the embryo; consequently, plants producing S. are said to be acotyledonous.

Sport, *n.* [*O. Fr. deporter*; *It. diporto*; *Sp. deporte*, diversion, merriment.] That which diverts and makes merry.—Contemptuous mirth; mockery; jeer.—That with which one plays, or which is driven about.—Idle jingle.—In a special sense, fowling, hunting, fishing, and the like.—In the U. States, one given to sporting.—*v. a.* To divert (with a reciprocal pronoun); to make merry.—To represent by any kind of play; to exhibit or bring out in public.

—*v. n.* To indulge in sport; to play; to frolic; to jest; to wanton.—To practise the diversions of the field; to be engaged in hunting, racing, fishing, &c.—To trifle.—To form or run into varieties.

Sport'er, *n.* One who sports.

Sport'ful, *a.* Merry; frolicsome; full of jesting; indulging in mirth or play; ludicrous; done in jest or for mere play.

Sport'fully, *adv.* With sport; merrily.

Sport'fulness, *n.* Playfulness; frolicsomeness.

Sport'ing, *a.* Indulging in sport; practising the diversions of the field: hence, also, rakish; loose; dissolute.

Sport'ing Hill, in *Pennsylvania*, a village of Cumberland co.

Sport'ive, *a.* Indulging in sport or play; gay; playful; merry; jocund; jesting; ludicrous; inclined to mirth.

Sport'ively, *adv.* Gaily; merrily; playfully.

Sport'ling, *n.* A bird or other creature that sports or plays.

Sports'man, *n.*; *pl.* SPORTSMEN. One who pursues the sports of the field; one who hunts, fishes, and fowls; one skilled in the sports of the turf, prize-ring, &c.

Sportsman'ship, *n.* The practice of sportsmen.

Spor'ule, *n.* (*Bot.*) A little spore.

Spot, *n.* [*Dan. spætte*.] A mark on a substance made by foreign matter; a place discolored; a stain; a flaw; a speck; a blot.—A small extent of place; place: site; locality; any particular place.—A place of different color from the ground.—A dark place on the disc or face of the sun, or of a planet.—A lucid place in the heavens.—A stain on character or reputation; something that spoils purity; disgrace; reproach; fault; blemish.

—*v. a.* To make a visible mark with some foreign matter; to discolor; to stain.—To patch by way of ornament.—To stain or blemish: to taint; to disgrace; to tarnish, as a reputation.

—To note, so as to again recognize; as, to spot a criminal. (*Colloq.*)

Spot'less, *a.* Free from spots, foul matter, or discolorations; free from reproach or impurity; unspotted; pure; immaculate; irreproachable.

Spot'lessly, *adv.* In a spotless manner; purely; blamelessly.

Spot'lessness, *n.* The state or quality of being spotless: freedom from spot or stain; freedom from reproach.

Spot'ted, *a.* Marked with spots or places of a different color from the ground. (*Fever.* See *Putrid Fever*.)

Spot'tedness, *n.* The state or quality of being spotted.

Spot'tedville, in *Virginia*, a village of Stafford co., 79 m. N. of Richmond.

Spot'ter, *n.* One who makes spots; one who marks or notes.

Spot'tiness, *n.* The state or quality of being spotty.

Spot'sville, in *Kentucky*, a post-village of Henderson co., on Green River, 6 m. from its mouth.

Spot'swood, in *New Jersey*, a post-village of Middlesex co., 26 m. E.N.E. of Trenton.

Spottsylvania, in *Virginia*, an E. co.; area, 400 sq. m. Rivers, Rappahannock, N. Anna, and Mattaponi. Surface, diversified; soil, fertile. *Min.* Gold, granite, and freestone. *County-seat*, Spottsylvania Court-House.

Spottsylvania Court-House, in *Virginia*, a post-village, cap. of the above co., 65 m. N. of Richmond.

Battle of S. See *WILDERNESS*.

Spot'ty, *a.* Full of spots; marked with discolored places.

Spous'al, *a.* Pertaining to espousal or marriage; nuptial; matrimonial; conjugal; connubial; bridal.

—*n.* Marriage; nuptials;—commonly used in the plural.

Spouse, *n.* [*Fr. épouse*; *It. sposa*, from *Lat. sponsus*.] One joined in wedlock; a married person, husband or wife.

—*v. a.* To espouse; to marry. (*R.*)

Spouse'less, *a.* Wanting a husband or wife.

Spout, *n.* [*Dn. spuit*, from *sputen*, to spout.] A pipe, or a projecting mouth of a vessel, useful in directing the stream of a liquid poured out; a nozzle.—A pipe conducting water from another pipe, or from a trough on a house.—A violent discharge of water raised in a column at sea like a whirlwind, or as by a whirlwind.

—To put, or shove up the spout, to pledge at a pawnbroker's. (*Can.*)

—*v. a.* To throw out, as liquids, through a narrow orifice

or pipe.—To throw out words with affected gravity; to mouth.—To pawn.

Spout, *v. n.* To issue with violence, as a liquid through a narrow orifice, or from a spout.—To harangue.

Sprag, *v. a.* (*Mining and Railways.*) To stop, as a car, by putting a sprag in the spokes of the wheel, when on a steep grade.

Sprague, (*sprāg*), in *Connecticut*, a township of New London co., 5 m. N. of Norwich.

Spragueville, in *Iowa*, a post-village of Jackson co., abt. 48 m. N. by E. of Davenport.

Sprain, *v. a.* To stretch forcibly, as the muscular or tendinous tissues beyond their natural length; to overstrain, as the muscles or ligaments of a joint; to stretch, as the muscles or ligaments, so as to injure them, but without dislocation.

—*n.* A violent strain of the muscles or ligaments of a joint without dislocation; the weakening of the motive power of a part by violent exertion.

Spraker's Basin, in *New York*, a post-village of Montgomery co., 48 m. N.W. of Albany.

Sprat, *n.* [*Dn. sprout*.] (*Zoöl.*) *Clupea sprattus*, or *Harengula sprattus*, a fish of the family *Clupeidae*, very abundant in the N. parts of the Atlantic, and which was formerly confounded by naturalists with the young of the herring. It is now, however, generally admitted to be a good and distinct species. Its characteristics are as follows:—Proportions nearly the same as those of the herring, but the depth of the body is greater in proportion than in the young of that species; the gill-covers are not veined; the teeth of the lower jaw are so minute as to be scarcely perceptible to the touch. The dorsal fin is placed farther back, and the keel to the abdomen is more acutely serrated than in the herring. They inhabit the deep water round our S. coast during the summer months, and, like the other species of the genus *Clupea*, they are wanderers; the shoals are capricious in their movements, and extremely variable in their numbers.

Sprawl, *v. n.* [*Dan. spralde, spralle*; *Dn. spartelen*, to sprawl.] To struggle, as in the convulsions of death.—To tumble or creep with much agitation and contortions of the limbs.

Spray, (*sprā*), *n.* [*A. S. spregan*.] A twig; a small shoot or branch of a tree; a collective body of small branches.

—[*L. Ger. spranjan*, to bedew.] (*Naut.*) The water that is driven from the top of a wave by wind, and which spreads and flies in small particles like dew.

Spread, (*sprēd*), *v. a.* (*imp.* and *pp.* SPREAD.) [*A. S. spreadan*.] To make broad or wide; to extend in length and breadth, or in breadth only; to stretch or expand to a broader surface; to set; to place; to pitch; to cover by extending something over; to divulge; to propagate; to publish; to circulate; to disseminate, as news or fame; to cause to be more extensively known; to send forth; to cause to affect great numbers, as an infection; to emit; to diffuse; to send forth, as emanations or effluvia; to disperse; to scatter over a larger surface; to prepare; to set and furnish with provisions.

—*v. n.* To extend itself in length and breadth, in all directions, or in breadth only; to shoot to a greater length in every direction, so as to fill or cover a wider space.—To be extended or stretched.—To be extended by drawing or beating.—To be propagated or made known more extensively.—To be propagated from one to another.

—*n.* Extent; compass; expansion of parts.

Spread'eagle, *n.* (*Her.*) An eagle with the wings extended. See *EAGLE*.

Spread Eagle, in *Pennsylvania*, a post-village of Chester co., abt. 18 m. W.N.W. of Philadelphia.

Spreader, *n.* One who, or that which, spreads.

Spread'ing, *a.* Extending, or extended, over a large space; wide.

—*n.* Act of extending, dispersing, or propagating.

Spread'ingly, *adv.* In a spreading manner.

Spree, *n.* A merry frolic, especially one attended with drinking.

Spree, (*sprē*), a river of Germany, rising in the kingdom of Saxony, and, after a course of 220 miles, joins the Havel at Spandau. It is connected with the Oder by Frederick-William's Canal.

Spreu'berg, a town of Prussia, on an island in the Spree, 15 m. from Cottbus; pop. 5,823.

Sprengel, CURT, a learned German physician and botanist, b. in Pomerania, 1766. In 1789 he was named extraordinary, and six years later ordinary, professor of medicine at Halle, and this post, as well as the chair of botany, soon given to him, he filled till his death. He published a great number of works, esteemed for their learning as well as for original observations in science. Among them are to be noted his *History of Medicine*, *Institutiones Medicæ*, *Antiquitates Botanice*, *Historia rei Herbariæ*; *Flora Halensis*; a German translation of *Theophrastus*, &c. S. was an honorary member of many learned societies. His reputation is based on his knowledge of medicine, and of the anatomy and functions of plants. Died in 1833.

Sprig, *n.* [*A. S. spranca*.] A spray; a small shoot or twig of a tree or other plant; the representation of a small branch in embroidery; an offshoot; a relative.

(*Min.*) Applied to a crystal of quartz found in the form of a hexangular column, adhering at one end to the stone, and at the other terminating in a point.

—*v. a.* To work with sprigs; to mark or adorn with the representation of small branches.

Sprigged, (*sprigd*), *a.* Growing in sprigs.

Sprig'gy, *a.* Full of sprigs or small branches.

Spright, *n.* [*Lat. spiritus*.] A spirit; a shade; a soul; an incorporeal agent; a walking spirit; a ghost; an apparition.

Spright'less, *a.* Spiritless.

Spright'liness, *n.* Quality of being sprightly; liveliness; life; briskness; vigor; activity; gaiety; vivacity.

Spright'ly, *a.* Full of spirit; full of life and activity; lively; brisk; animated; airy; gay; active; agile; alert.

Spring, *v. a.* (*imp.* SPRANG, or SPRUNG; *pp.* SPRUNG.) [*A. S. springan, aspringan*; *Dn. and Ger. springen*.] To cause to leap or break forth; to raise; to start or rouse, as game; to cause to rise from the earth, or from a covert; to produce quickly or unexpectedly; to start; to contrive, or to produce or propose on a sudden; to produce unexpectedly; to cause to explode; to burst; to cause to open; to crack; to cause to rise from a given spot or part; to cause to close suddenly, as the parts of a trap.

—*v. n.* To leap or break forth; to bound; to jump; to issue into sight or notice; to fly with elastic power; to start; to start or rise suddenly from a covert; to shoot; to issue with speed and violence; to proceed or issue, as from a fountain or source; to issue or proceed, as from ancestors, or from a country; to vegetate and rise out of the ground; to begin to grow, as vegetables; to germinate; to proceed, as from a cause, reason, principle, or other original; to arise; to appear; to begin to appear or exist; to grow; to thrive.

—*n.* A leap; a bound; a jump, as of an animal.—A flying back; the resilience of a body recovering its former state by its elasticity; elastic power or force; a body which, when bent or forced from its natural state, has the power of recovering it.—Any active power; that by which action or motion is produced or propagated.—A fountain of water; an issue of water from the earth, or the basin of water at the place of its issue; the place where water usually issues from the earth, though no water is there; a source.—That from which supplies are drawn; rise; original; cause.

(*Astron.*) One of the four seasons of the year. For the northern hemisphere, the spring season begins when the sun enters Aries, the first of the northern signs, or about March 21, and ends at the time of the summer solstice.

(*Mech.*) A piece of mechanism, formed of tempered steel or some other elastic substance, applied mostly for the purposes of producing resistance, or of preventing a shock from the collision of hard bodies, or of giving motion to mechanism by its effort to unbend itself.

(*Naut.*) A rope or hawser passed from the stern of a ship and made fast to the cable or anchor from the bow by which she is riding. The object is to vary at will the direction in which she rides, an object of importance when the broadside has to be brought to bear on any given point.

Spring, in *Pennsylvania*, a township of Berks county.—A township of Centre county.—A post-village and township of Crawford county, 18 miles north-west of Meadville.—A township of Perry county.

Spring Arbor, in *Michigan*, a post-village and township of Jackson county, 11 miles west south-west of Jackson.

Spring-back, *n.* (*Book-binding.*) A curved or semi-circular false back, made of thin sheet-iron or of stiff pasteboard fastened to the under side of the true back, and causing the leaves of a book thus bound to spring up and lie flat;—commonly used in binding ledgers and other blank-books.

Spring-balance, *n.* An instrument for determining the weight of bodies, consisting of a spiral spring, with an index, and pointed.

Spring Bay, in *Illinois*, a post-village and township of Woodford co., on Peoria Lake, abt. 13 m. N.N.E. of Peoria.

Springbok, *n.* (*Zoöl.*) A graceful species of antelope (*Antelope rufocore*), which inhabits in almost innumerable multitudes the vast wilds in the interior of South Africa.

Spring'borough, in *Ohio*, a post-village of Warren co., 37 m. N.E. of Cincinnati.

Spring Brook, in *Iowa*, a post-village of Jackson co., 70 m. E.N.E. of Iowa City.

Spring Brook, in *Wisconsin*, a township of Dunn co.

Spring Creek, in *Arkansas*, a township of Phillips co.—A township of Lee co.

Spring Creek, in *Georgia*, rises in Early co., and flowing S. enters Flint River in Decatur co.

Spring Creek, in *Iowa*, a township of Black Hawk county.—A thriving post-village and township of Tama county.

Spring Creek, in *Ohio*, a township of Miami county.

Spring Creek, in *Pennsylvania*, enters Bald Eagle Creek from Centre co.—A village of Dauphin co., 12 m. E. of Harrisburg.—A post-township of Warren co., 20 m. W. of Warren.

Spring Creek, in *Tennessee*, a post-village of Madison co., 137 m. W.S.W. of Nashville.

Spring Creek, in *Texas*, a tributary of San Jacinto River, forming the boundary between Harris and Montgomery cos.

Spring Dale, in *Iowa*, a post-village and township of Cedar co., about 13 m. E. of Iowa City.

Spring Dale, in *Michigan*, a township of Manistee co.

Spring Dale, in *Minnesota*, a village of Houston co., abt. 5 m. W. of Brownsville.

Spring Dale, in *Mississippi*, a post-village of Lafayette co., abt. 15 m. S.W. of Oxford.

Spring Dale, or SPRINGFIELD, in *Ohio*, a post-village of Hamilton co., 15 m. N. of Cincinnati.

Spring Dale, in *Wisconsin*, a post-township of Dane co.

Springe, (*spring*), *n.* [From *spring*.] A gin; a noose, which, being fastened to an elastic body, is drawn close with a sudden spring, by which means it catches a bird. — *n. a.* To catch by means of a spring; to ensnare.

Springer, *n.* One who springes; one who rouses game. — A jumper. — A name given to the grampus. — A variety of the dog, differing little in figure from the setter. (*Arch.*) Same as **SPRINGING**, *q. v.*

Springersville, in *Indiana*, a village of Fayette co., 64 m. S.E. of Indianapolis.

Springfield, in *Alabama*, a post-village of Greene co., 112 m. W.N.W. of Montgomery.

Springfield, in *Arkansas*, a post-village, cap. of Conway co., abt. 40 m. N.W. of Little Rock.

Springfield, in *California*, a village of Tuolumne co., abt. 4 m. N. of Sonora.

Springfield, in *Georgia*, a post-village, cap. of Effingham co., 27 m. N.W. of Savannah.

Springfield, in *Illinois*, a city, cap. of the State, and seat of justice of Sangamon co., 188 m. S.W. of Chicago, 97 m. N.N.E. of St. Louis, and 4 m. S. of Sangamon River; Lat. 39° 48' N., Lon. 87° 33' W. Situated on a beautiful prairie, and handsomely built, S. has been termed the "Flower City," from the shade-trees which adorn its streets and the beauty of the surroundings of the city. Its public buildings are handsome and substantial, conspicuous among them is the new and splendid State-House (Fig. 1367). S. has iron foundries, flouring-mills, factories of woollen goods, &c., and is the point of shipment for immense quantities of produce and live-stock. The remains of Pres. Lincoln repose near S., at Oak Hill Cemetery, under a handsome monument completed in 1877. *Pop.* (1880) 19,746. (1890) 24,852.

Springfield, in *Indiana*, a township of Allen county. — A post-village and township of Franklin county, 80 miles E.S.E. of Indianapolis. — A township of La Grange county. — A township of La Porte county. — A village of Noble county, 22 miles E.S.E. of Goshen. — A village of Whitley county, 95 miles N.E. of Indianapolis.

Springfield, in *Iowa*, a township of Cedar county. — A post-village of Keokuk county, 55 miles S.W. of Iowa City. — A village of Muscatine county, 25 miles south-east of Iowa City. — A township of Winneshiek county.

Springfield, in *Kentucky*, a post-village, cap. of Washington co., 40 m. S.W. of Frankfort.

Springfield, in *Louisiana*, a village of De Soto parish, abt. 15 m. N.E. of Mansfield. — A post-village, former cap. of Livingston parish, abt. 50 m. E. of Baton Rouge.

Springfield, in *Maine*, a post-township of Penobscot co., 115 m. N.E. of Augusta.

Springfield, in *Massachusetts*, a fine city and seat of justice of Hampden co., on the E. bank of Connecticut River, 98 m. S.W. of Boston; Lat. 42° 6' 4" N., Lon. 72° 35' 45" W. It is an important commercial depôt, and contains manufactories of locomotives, railroad cars, and various kinds of machinery, fire-arms, harness, woollen goods, &c.; also, an extensive U. S. arsenal, giving employment to about 2,800 workmen, who manufacture 1,000 muskets a day. The City Hall, a noble building in the Romanesque style, contains, besides the city offices and a large public hall, a library of over 8,000 vols., with which is connected a scientific and historical museum. S. was first settled in 1637, but it is only since the opening of the Western Railroad, in 1838, that it began to increase rapidly. It was made a city in 1852. *Pop.* (1890) 44,164; (1895) 51,534.

Springfield, in *Michigan*, a township of Oakland co., 12 m. N.W. of Pontiac.

Springfield, in *Minnesota*, a village of Olmsted co., abt. 10 m. S. E. of Rochester.

Springfield, in *Mississippi*, a village of Choctaw co. — A village of Madison co., 40 m. N.N.E. of Jackson.

Springfield, in *Missouri*, a village of Callaway co., 46 m. N.E. of Jefferson City. — A city, cap. of Greene co., 130 m. S.W. of Jefferson City. On Aug. 10, 1861, at David's and Wilson's creeks, the first 9 and the second 15 m. from Springfield, the Nationals, under Gen. Lyon, attacked a Confederate force in superior numbers, under Gens. McCulloch and Price. After 6 hours' severe fighting, the National troops remained in possession of the camp, but with the loss of Gen. Lyon and about 1,000 killed or wounded. After the battle, Gen. Sigel, taking the chief command, was obliged to fall back on S., and the next day to Rolla, to await reinforcements. S. was the scene of several other important movements during the war.

Springfield, in *New Hampshire*, a township of Sullivan co., 38 m. N.W. of Concord.

Springfield, in *New Jersey*, a township of Burlington county, 18 miles S.S.E. of Trenton. — A post-village and township of Union county, 8 miles west of Newark.

Springfield, in *New York*, a post-village and township of Otsego county, 11 miles north-east of Coopers-town.

Springfield, in *Ohio*, a city, cap. of Clarke co., 43 m. W. of Columbus. It is beautifully situated near the junction of Lagonda Creek with Mad River, and at the junction of several railroads. It is well laid out, handsomely built, and contains manufactories of cotton, wool, paper, machinery, agricultural implements, &c., the annual value of the manufacture of the latter reaches abt. \$5,350,000. *Pop.* (1897) 40,000. — A township of Gallia co. — A post-township of Hamilton co. — A township of Jefferson co. — A township of Lucas co. — A township of Mahoning co. — A township of Muskingum co. — A township of Richland co. — A village and township of Ross co., 4 miles N. of Chillicothe. — A township of Summit co. — A township of Williams co.

Springfield, in *Oregon*, a post-village and precinct of Lane co.

Springfield, in *Pennsylvania*, a post-township of Bradford co., 16 miles W.N.W. of Towanda. — A township of Bucks county. — A township of Delaware county. — A village and township of Erie county, 21 miles south-west of Erie. — A township of Fayette co. — A township of Greene co. — A township of Huntingdon co. — A village and township of Mercer co. — A township of Montgomery co. — A township of York co., about 9 m. S. of York.

Springfield, in *Tennessee*, a post-town, cap. of Robertson co., 25 m. N. of Nashville.

Springfield, in *Texas*, a village, former cap. of Limestone county, 140 miles N.E. of Austin City.

Springfield, in *Vermont*, a post-village and township of Windsor co., 73 m. S. of Montpelier. *Manuf.* Cotton and woollen goods, plows, &c.

Springfield, in *Virginia*, a village of Fairfax co., 9 m. W. of Alexandria.

Springfield, in *West Virginia*, a post-village of Hampshire co., 197 m. N.W. of Richmond. — A village of Monroe co., about 245 m. W. of Richmond.

Springfield, in *Wisconsin*, a township of Dane co. — A township of Jackson co. — A township of Marquette co. — A post-village of Walworth county, 34 miles W. of Racine.

Spring Garden, in *Illinois*, a post-village of Jefferson co., 145 m. S.E. of Springfield.

Spring Garden, in *Pennsylvania*, a township of York co.

Spring Garden, in *Virginia*, a post-village of Pittsylvania co., 135 m. W.S.W. of Richmond.

Spring Green, in *Wisconsin*, a post-village and township of Sauk co., 36 m. W. of Madison.

Spring Grove, in *Illinois*, a post-township of Warren co., 6 m. N. of Mommouth.

Spring Grove, in *Minnesota*, a post-township of Houston co., abt. 36 m. S. of Winona.

Spring Grove, in *Wisconsin*, a post-township of Green co.

Spring-head, *n.* A fountain; the original source.

Spring Hill, in *Alabama*, a village of Marengo co., 71 m. S.W. of Tuscaloosa.

Spring Hill, in *Arkansas*, a township of Drew co. — A post-village of Hempstead co., 14 m. S. of Washington.

Spring Hill, in *Illinois*, a post-village of Whitesides co., 65 m. S.S.E. of Galena.

Spring Hill, in *Indiana*, a post-village of Decatur co., abt. 50 m. E.S.E. of Indianapolis.

Spring Hill, in *Kansas*, a post-vill. and township of Johnson co., abt. 28 m. E.S.E. of Lawrence.

Spring Hill, in *Mississippi*, a village of Tippah co., 25 m. N.W. of Ripley.

Spring Hill, in *Missouri*, a post-vill. of Livingston co.

Spring Hill, in *Pennsylvania*, a post-township of Fayette co.

Spring Hill, in *Tennessee*, a post-village of Maury co., 30 m. S. of Nashville.

Spring Hill, in *Texas*, a village of Navarro co., abt. 145 m. N.N.E. of Austin City.

Spring Hill, in *Virginia*, a post-village of Mecklenburg co., abt. 56 m. S.W. of Petersburg.

Spring Hills, in *Ohio*, a post-village of Champaign co., abt. 13 m. N.N.W. of Urbana.

Spring-hook, *n.* (*Locomotive Engines*.) One of the hooks fixing the driving-wheel spring to the frame. A screw on the end of the hook regulates the weight on the driving wheels.

Springiness, *n.* Quality or state of being springy; elasticity; — also, the power of springing; the state of abounding with springs; wetness; sponginess, as of land.

Springing, *n.* Act of one who springs, or of that which springs; act or process of leaping, arising, issuing, or proceeding; growth; increase. (*Arch.*) The impost or point at which an arch unites with its support. The bottom stone of an arch, which lies immediately upon the impost, is sometimes called a *springer* or *springing-stone*.

Spring Lake, in *Illinois*, a village and township of Tazewell co., on the Illinois River, abt. 7 m. S.W. of Pekin.

Spring Lake, in *Michigan*, a post-township of Ottawa county, on Lake Michigan, opposite Grand Haven.

Spring Lake, in *Minnesota*, a township of Scott county.

Spring Lake Villa, in *Utah*, a village of Utah co., 21 m. S. of Provo City.

Spring Mill, in *Pennsylvania*, a vill. of Montgomery co., on the Schuylkill River, 12 m. N.W. of Philadelphia.

Spring Mills, in *New Jersey*, a village of Hunterdon co., 18 m. S. of Belvidere.

Spring Mills, in *Pennsylvania*, a post-village of Centre co., 82 m. N.N.W. of Harrisburg.

Spring Mountain, in *Pennsylvania*, is situated in the W. of Carbon co.

Spring-pin, *n.* (*Locomotive engines*.) One of the iron rods fitted between the springs and the axle boxes, to sustain and regulate the pressure on the axles.

Spring Place, in *Georgia*, a post-town, cap. of Murray co., 230 m. N.W. of Milledgeville.

Spring Place, in *Tennessee*, a village of Marshall co., 66 m. S. of Nashville.

Springport, in *Michigan*, a township of Jackson co., about 14 m. N.W. of Jackson.

Springport, in *New York*, a township of Cayuga co., on the E. of Cayuga Lake.

Spring Prairie, in *Wisconsin*, a post-village and

township of Walworth county, 31 miles S.W. of Milwaukee.

Spring River, in *Arkansas*, a township of Lawrence co.

Spring River, in *Missouri*, rises in Howell co., and flowing S.E. falls into Black River in the S.W. of Randolph co., Arkansas. — A village and township of Lawrence co., 140 m. S.E. of Independence.

Spring Rock, in *Iowa*, a township of Clinton county.

Spring Run, in *Pennsylvania*, a post-village of Franklin co., 166 m. W. of Philadelphia.

Spring-tide, *n.* The tide which happens at, or soon after, the new and full moons, which *springs* or rises higher than common tides. — The time or season of spring.

Springtown, in *New Jersey*, a village of Morris co., 45 m. N. of Trenton.

Springtown, in *Pennsylvania*, a post-village of Bucks co., 45 m. N.N.W. of Philadelphia.

Springvale, in *Maine*, a post-village of York co., 86 m. S.W. of Augusta.

Springvale, or **SPRINGDALE**, in *N. Carolina*, a post-village of Sampson county, about 56 miles N. of Wilmington.

Springvale, in *Wisconsin*, a township of Columbia co. — A township of Fond du Lac co.

Spring Valley, in *Minnesota*, a post-village and township of Fillmore county, about 27 m. S. E. of Rochester.

Spring Valley, in *New Jersey*, a village of Morris co., 4 m. S.E. of Morristown.

Spring Valley, in *Ohio*, a post-village of Greene co., 58 m. N.E. of Cincinnati.

Spring Valley, in *Oregon*, a village and precinct of Polk co., abt. 10 m. N.N.W. of Salem.

Spring Valley, in *Pennsylvania*, a village of Lancaster co.

Spring Valley, in *Wisconsin*, a township of Rock co.

Springville, in *Alabama*, a post-village of St. Clair co., 140 m. N. of Montgomery.

Springville, in *Illinois*, a post-village of Coles co., 10 m. S.W. of Charleston.

Springville, in *Indiana*, a village of Laporte co., 10 m. E. of Michigan City. — A post-village of Lawrence co., 11 m. N.W. of Bedford.

Springville, in *Iowa*, a post-village of Linn co., 9 m. E. of Marion.

Springville, or **South Portsmouth**, in *Kentucky*, a post-town of Greenup co., on the Ohio river, opposite Portsmouth, Ohio.

Springville, in *Michigan*, a post-village of Lenawee co., 12 m. N.W. of Adrian.

Springville, in *Missouri*, a village of Wayne co., 110 m. S.W. of St. Louis.

Springville, in *New York*, a post-village of Erie co.

Springville, in *Oregon*, a village of Multnomah co., 6 m. N. of Portland.

Springville, in *Pennsylvania*, a village of Chester co., 33 m. N.W. of Philadelphia. — A village of Lancaster co. — A post-village and township of Susquehanna co., 10 m. S. of Montrose.

Springville, in *Utah*, a city and precinct of Utah co., 6 m. S. of Provo City. *Pop.* (1895) 3,168.

Springville, in *Wisconsin*, a post-village of Vernon co.

Spring-wafer, in *New York*, a post-village and township of Livingston county, 50 miles south-east of Batavia.

Spring Wafer, in *Wisconsin*, a post-township of Waushara county, abt. 45 miles N.W. of Fond du Lac.

Spring Wells, in *Michigan*, a village of Wayne county, on Detroit River, immediately S.W. of Detroit.

Springy, *a.* [From *spring*.] Having the quality of springing, or of a spring; elastic; possessing the power of recovering itself when extended, bent, or twisted; having great elastic power; having the power to leap; able to leap far. — Abounding in springs or fountains; wet; spongy.

Sprinkle, *v. a.* [A. S. *sprengan*.] To shoot or throw forth in small drops or particles; to scatter; to disperse, as a liquid or a dry substance composed of fine separable particles; to disperse on in small drops or particles; to besprinkle; to bedew; to wash; to cleanse; to purify. — *v. n.* To perform the act of scattering a liquid, or any fine substance, so that it may fall in small drops or particles; to rain moderately. — *n.* A small quantity scattered.

Sprinkler, *n.* One who sprinkles. — A utensil for sprinkling; a watering-pot.

Sprinkling, *n.* Act of scattering in small drops or particles; a small quantity falling in distinct drops or parts, or issuing moderately.

Sprit, *n.* [A. S. *spreot*.] (*Naut.*) A small boom, pole, or spar which crosses the sail of a boat diagonally from the mast to the upper aftmost corner of the sail, which it is used to extend and elevate.

Sprife, *n.* A spirit; an incorporeal agent. (Used in poetry.)

Sprit-sail, *n.* (*Naut.*) The sail that belongs to the bowsprit.

Sprock-et-wheel, *n.* (*Naut.*) A wheel armed with pointed studs, round which the chain-cable of a capstan passes. The studs afford a firmer bite on the cable.

Sproftan, (*sproftou*), a town of Prussian Silesia, on the Bober, 71 m. from Breslau; *pop.* 5,620.

Sprout, *v. n.* [A. S. *sprytan*.] To bud; to hurst forth, as the seed of a plant; to germinate; to push out new

shoots; to shoot into ramifications; to grow like shoots of plants.

Sprout, *n.* The shoot of a plant; a shoot from the seed, or from the stump, or from the root of a plant or tree; a shoot from the end of a branch.

Sprouting, *a.* Shooting in vegetation; germinating.

Spruce, (*sprūs*), *a.* [Said to be a corruption of *Prussian* (Ger. *Preusse*), and to have been originally applied to those who dressed after the fashion of Prussia.] Neat without elegance; nice; trim; finical; foppish.

—*v. n.* To dress with affected neatness; to prink.

—*v. a.* To trim; to deck; to dress.

—*n.* (Bot.) A name commonly applied to several species of the genus *Abies*, or fir.

Spruce, in Missouri, a post-township of Bates co., 65 m. S.S.E. of Independence.

Spruce-beer, *n.* A liquor, made of treacle or molasses, and tintured with the essence of the spruce fir (*Abies excelsa*), well boiled in water and fermented.

Sprung, *imp.* and *pp.* of *SPRING*, *q. v.*

Spry, *a.* Lively; nimble; quick in action. (Prov. Eng., colloq. U. S.)

"She is as spry as a cricket."—Judd.

Spud, *n.* [A. S. *spad*.] An implement resembling a large chisel with a long handle, used for cutting up weeds.—Anything short and thick, in contempt.

Spue, *v. a.* and *v. n.* [Lat. *spuo*.] To vomit. See *SPUE*.

Spume, (*spūm*), *n.* [Lat. *spuma*, from *spus*; It. *spuma*; A. S. *spewian*. See *SPUE*.] Froth; foam; scum; frothy matter thrown up or raised to the surface of liquors or fluid substances by boiling, effervescence, or agitation.

—*v. n.* To froth; to foam.

Spumescence, *n.* The quality or the state of foaming.

Spumiferous, *a.* That produces spume or froth.

Spuminess, *n.* Quality of being spumy.

Spumous, *Spumy*, *a.* [Lat. *spumens*.] Consisting of spume, or of froth or scum; foamy.

Spun, *imp.* and *pp.* of *SPIN*, *q. v.*

Spunk, *n.* [A. S. *sponge*, a sponge.] The Touchwood, a species of fungus, *Polyporus fomentaria*, with which is made the *AMADOU*, *q. v.*

Spunk'y, *a.* Spirited; fiery. (Low.)

Spun-yarn, *n.* (Naut.) A cord formed by twisting together two or three rope-yarns.

Spur, (*sper*), *n.* [A. S. *spura*, *spova*; Fr. *éperon*.] An instrument having a rowel or little wheel, with sharp points, worn on horsemen's heels, to prick horses for hastening their pace.—Incitement; instigation; stimulus; that which excites.—The largest or principal root of a tree.—Hence, perhaps, the short wooden buttress of a post.—The hard, pointed projection on a cock's leg, which serves as an instrument of defence and attack.—Something that projects.—A smaller mountain that shoots from any other mountain, or range of mountains.—Something that resembles a spur. (Ship-building.) A piece of timber fixed on the bilge-ways, and the upper end bolted to the ship's side above water, for security to the bilge-way.

(Fort.) A wall that crosses a part of the rampart and joins to the town-wall.

(Bot.) Any tubular projection resembling a spur.—An ergot;—so called from its resemblance to the spur of a cock. See *ERGOT*.

—*v. a.* To prick with a spur, or spurs; to incite to a more hasty pace;—hence, to incite; to instigate; to urge or encourage to action, or to a more vigorous pursuit of an object; to impel; to drive; also, to put spurs on.

—*v. n.* To travel with great expedition; to press forward.

Spur-clad, *a.* Wearing spurs.

Spur-gall, *v. a.* To gall with the spur.

—*n.* A wound or hurt caused by the use of the spur.

Spurge, (*sperj*), *n.* (Bot.) See *EUPHORBIA*.

Spurious, *a.* [Lat. *spurius*.] Not proceeding from the true source, or from the source pretended; counterfeit; false; not genuine.—Illegitimate; bastard.

Spuriously, *adv.* In a spurious manner; falsely.

Spuriousness, *n.* State or quality of being spurious, or of being counterfeit, false, or not genuine.—Illegitimacy; state of being bastard, or not of legitimate birth.

Spurling-line, *n.* (Naut.) A line communicating between the wheel and the tell-tale.

Spurn, *v. a.* [A. S. *spurnan*, to spurn, to strike.] To kick; to drive back or away, as with the foot.—To reject with disdain; to scorn to receive or accept; to treat with contempt.

—*v. n.* To kick or toss up the heels.—To manifest disdain in rejecting anything; to make contemptuous opposition; to manifest disdain in resistance.

—*n.* Disdainful rejection; contemptuous treatment.—A kick or blow with the foot.

Spurn'er, *n.* One who spurns.

Spurred, (*spurd*), *a.* Wearing spurs, or having shoots like spurs.

Spur'er, *n.* One who uses spurs.

Spurrier, *n.* One who makes spurs.

Spurt, *v. a.* [Written also *spirt*.] To throw out, as a liquid, in a jet or stream; to drive or force out with violence, as a liquid, from a pipe or small orifice.

—*v. n.* To gush or issue out in a stream, as liquor from a cask; to rush from a confined place in a small stream.

—*n.* A sudden or violent ejection or gushing of a liquid substance from a tube, orifice, or other confined place; a jet.

Spurzheim, JOHN GASPAR, (*spurts'hime*), a famous name in the history of phrenological science, was born at Longwich, near Treves, in 1776, and became acquainted with Dr. Gall at Vienna, where he studied medicine. From 1805 till 1813 he was the constant companion of Gall in his travels and scientific researches, and subsequently became an active promulgator of the

new doctrine in England and France. He died in 1832, a few months after his arrival in Boston, U. S. One of his distinct claims is that of having demonstrated the fibrous structure of the brain.

Sputa'tion, *n.* [Fr., from Lat. *sputare*, to spit.] The act of spitting.

Sput'er, *v. n.* [Dan. *sprutte*; Ger. *sprudeln*, to sputter.] To spit, throw out, or emit saliva from the mouth in small or scattered portions, as in rapid speaking.—To throw out moisture in small detached parts.—To fly off in small particles with some crackling or noise.—To utter words hastily and indistinctly.

—*v. a.* To throw out with haste and noise; to utter with indistinctness.

—*n.* Moist matter thrown out in small particles.

Sput'erer, *n.* One who sputters.

Sputum, *n.*; *pl.* SPUTA. [Lat., from *spuere*, to spit.] The secretion ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossae and fauces, and often by the membrane of the larynx and bronchia; spit; spittle.

Spuy'ten Duy'vil, in New York, a former post-village of Westchester co., on the Hudson river, now included in New York city.

Spy, *n.* [It. *spia*; Fr. *espion*; Du. *spion*; Ger. *spähen*.] One who observes or watches the conduct of others.

(Mil.) A scout; a person sent into an enemy's camp or country, to gain intelligence to be communicated secretly to the proper officer; a secret emissary.

—*v. a.* To gain sight of; to discover at a distance, or in a state of concealment.—To discover by close search or examination.—To explore; to view, inspect, and examine secretly.

—*v. n.* To search narrowly; to scrutinize.

Spy-boat, *n.* A boat sent out for intelligence.

Spy-glass, *n.* A small telescope for viewing distant objects.

Spy'ism, *n.* The business of spying. (R.)

Spy-money, (*-mun-y*), *n.* Money paid to a spy for his services.

Squab, (*skwob*), *a.* [Ger. *quabbelig*, from *quabbeln*, to shake, to be flabby.] Fat; thick; plump; bulky.—Unfedged; unfeathered; as, a *squab* pigeon.

—*n.* [Ger. *quappe*.] An unfledged bird; a young pigeon or dove.—A kind of sofa or couch; a stuffed cushion.—A person with a stout, short figure.

—*adv.* With a heavy, sudden fall; plump and flat. (Vulgar.)

Squab'bish, *a.* Thick; heavy; fleshy.

Squabble, (*skwab'bl*), *v. n.* [Du. *kibbelen*, to wrangle.] To contend for superiority; to wrangle; to scuffle.—To debate peevishly; to dispute.

—*v. a.* (Print.) To disarrange or mix, as lines of type, by forcing them horizontally out of their place.

—*n.* A scuffle; a wrangle; a brawl; a petty quarrel.

Squab'bler, *n.* One who squabbles.

Squab'by, *a.* Squab'bish.

Squab'chick, *n.* A young, unfledged chicken.

Squab'pie, *n.* A pie made of squabs.

Squad, (*skvod*), *n.* [Fr. *escouade*, corrupted from *escadron*, *squadron*.] (Mil.) A small party of men assembled for drill or inspection.—Any small party.

Squadron, *n.* [Fr. *escadron*; It. *squadra*, square, *squadrone*, a squadron.] A square, or a square form; hence, a square body of troops; a body drawn up in a square. (R.)

(Mil.) The principal division of a regiment of cavalry, usually from 100 to 200 men.

(Naut.) A division of a fleet; a detachment of ships of war, employed on a particular expedition.

Squad'roned, *a.* Formed into squadrons. (R.)

Squalid, (*skwolid*), *a.* [Lat. *squalidus*, from *squalere*, to be foul or dirty.] Foul; filthy; extremely dirty.

Squalid'ity, *n.* The state of being squalid.

Squalidly, *adv.* In a squalid, filthy manner.

Squalidness, *n.* The state or quality of being squalid.

Squall, (*skwawl*), *v. n.* [Ger. *schallen*; Du. *schellen*.] To cry out; to scream or cry violently, as a woman frightened, or a child in anger or distress.

—*n.* A loud scream; a harsh cry.

—A sudden and violent gust of wind.

Black squall, a S. attended with a dark cloud, diminishing the usual quantity of light.—A *white squall*, a S. which produces no diminution of light.—A *thick squall*, a S. accompanied with hail, sleet, &c.

Squalidae, *n. pl.* (Zool.) The Shark family, comprising cartilaginous fishes, allied to the Rays, and celebrated for the size and voracity of some of the species. The form of the body is elongated, and the tail is thick and fleshy. The mouth is large, generally situated beneath the snout, and is armed with several rows of compressed, sharp-edged, and sometimes serrated teeth; these are movable at the will of the animal, and are usually laid down and directed backwards, but become erect at the moment he is seizing his prey. The skin is usually very rough, covered with a multitude of little osseous tubercles; and that of some species forms the substance called *shagreen*. They devour with indiscriminating voracity almost every animal substance, whether living or dead. They often follow vessels for the sake of picking up any offal that may be thrown overboard; and, in hot climates especially, man himself frequently becomes a victim to their rapacity. No fish can swim with such velocity as the shark, nor is any so constantly engaged in that exercise; he outstrips the swiftest ships, and plays round them, without exhibiting a symptom of strong exertion or uneasy apprehension; and the depredations he commits on the other inhabitants of the deep are truly formidable. The eggs of sharks are few and large, in comparison with those of bony fishes; they are enveloped in a hard, horny,

semi-transparent shell, terminated at the four angles with long filaments. The genus *Alopius* contains the Long-tailed or Thresher Shark, *A. vulgus*, also called Sea-ape and Sea-fox, which inhabits the Atlantic, is 12 or 15 feet long, and has the upper lobe of the tail about as long as the body. The genus *Lamna*, containing the Mackerel Shark, or Green-backed Shark, *L. punctata*, has the snout pyramidal, with the nostrils under the base. The genus *Mustelus*, containing the Dog Shark, *M. canis*, has the teeth blunt, forming a closely compacted pavement in each jaw. The gen. *Acanthias* contains the Dog-fish (*q. v.*). The genus *Zygæna*, containing the Hammer-headed Shark, *Z. vulgæris*, which attains the length of 12 feet (Fig. 2420), and has the head flattened horizontally, with the sides much extended laterally. The genus *Pristis* contains the Saw-fish (*q. v.*). The genus *Cestracion*, which, with some naturalists, constitutes a distinct *Cestraciontidae*, contains nevertheless only two species, the Port-Jackson Shark or Nurse (*C. philippi*) of the Australian seas, and the Cat Shark of Japan and China (*C. zebra*).

Fig. 2420.—HAMMER-HEADED SHARK, *Zygæna vulgæris*.

Squal'ler, *n.* One who squalls; a screamer.

Squal'ly, *a.* Abounding with squalls; disturbed often with sudden and violent gusts of wind.

(Weaving.) Faulty or uneven, as cloth.

Squa'loid, *a.* [Lat. *squalus*, a shark, and *eidōs*, form.] Resembling a shark.

Squa'lor, *n.* [Lat.] Foulness; filthiness; coarseness.

Squama'ceous, **SQUAMATE**, **SQUAMATED**, *a.* Same as **SQUAMOSE**, *q. v.*

Squam Bay, (*skwom*), in Massachusetts, an inlet of the Atlantic, in Essex co., 4 m. long, between Cape Ann and Castle Neck.

Squam'late, *a.* (Bot.) Furnished with little scales; squamose.

Squamiform, *a.* [Fr. *squamiforme*, from Lat. *squama*, a scale, and *forma*, a form.] Formed like a scale.

Squamigerous, (*-mij'-*), *a.* [From Lat. *squama*, a scale, and *gerere*, to bear.] Having scales.

Squam Lake, in New Hampshire, on the border of Grafton and Carroll cos., abt. 8 miles long and 4 wide. It contains a number of islands. The surplus waters are discharged through Squam River into the Pemigewasset.

Squammagon'ic, now **GONIC**, in New Hampshire, a post-village of Strafford co., 2 m. S. of Rochester.

Squa'moid, *n.* [Lat. *squama*, scale, and Gr. *eidōs*, form.] Resembling a scale; scaly.

Squa'mose, **Squam'ous**, **Squam'ulate**, **Squam'ulous**, **Squam'ulose**, *a.* (Nat. Hist.) Scaly; covered with scales; resembling, pertaining to, or composed of, scales.

Squam'scot River, in New Hampshire. See *EXETER*.

Squan (*skwon*), now **MANASQUAN**, in New Jersey, a post-town of Monmouth co., on the Atlantic, between Manasquan Inlet and Meteteunk river. Pop. (1895) 1,427.

Squander, *v. a.* [Ger. *verschwenden*, to squander, *schwinden*, to vanish.] To spend lavishly or profusely; to spend prodigally or without economy or judgment.

Squanderer, *n.* One who squanders; a spendthrift; a prodigal; a waster; a lavisher.

Squanderingly, *adv.* By squandering.

Squan'kum, in New Jersey, a village of Ocean co., 38 m. S.E. of Trenton.

Squan'uacook River, in Massachusetts, falls into the Nashua River from Middlesex co.

Square, (*skwair*), *a.* [O. Fr. *esquarre*, a square; It. *squadra*, from Lat. *quadrare*, to make square.] Forming a right angle.—Having a straight front, or a frame formed with straight lines.—That does equal justice; exact; fair; honest.—Even; leaving no balance.—Exactly suitable; true.—Strong; stout.

(Naut.) Applied to the yards, and implying that they are at right angles to the masts. *Square-rigged* means that the rig includes yards which can be set square. A *square-sail* is a quadrilateral sail never borne as a fore-and-aft sail.

All square. All right; all satisfactory.—*Square measure*. (Math.) The relative magnitude of squares of given dimensions.—*Square numbers*. (Arith.) The product of a number multiplied by itself. Thus, the squares of the natural numbers 1, 2, 3, 4, 5, &c., are respectively 1, 4, 9, 16, 25, &c. Among the properties of square numbers, the following may be mentioned:—Every odd square number is of the form $8n + 1$, or when divided by 8 leaves 1 for the remainder. Every even square number is of the form $4n$, or is divisible by 4. Every square number ends with one or other of the following digits, —0, 1, 4, 5, 6, 9.—*Square root*. (Arith.) A quantity which, being taken twice as a factor, will produce the given quantity. Thus, the square root of 25 is 5, because $5 \times 5 = 25$. When the square root of a number can be expressed in exact parts of 1, that number is a perfect square, and the indicated square root is said to be commensurable. All other indicated square roots are incommensurable.

—*n.* (Geom.) A four-sided rectilinear figure, of which all the angles are right angles, and all the sides equal.

(Arith.) The product of a number multiplied by itself.

(Mil.) A formation of troops. A *solid square* is formed to resist cavalry; and the men all face outward. A *hollow square* is formed to hear orders read, &c.; and the troops face inward.

—An open area of four sides in a town or city, with houses on each side. — A rule or instrument by which workmen ascertain whether an angle is a right angle or not. — Level; equality; rule; conformity; accord.

Magic square. See **Magic**. — On the square, or upon the square, a fair, honest procedure, or mode of action. — On or upon the square with, to be even, or on an equality with. — To be at square, to be in a state of quarrelling. — To break square, to depart from the usual routine.
